The cost estimate for reprocessing spent fuel has jumped by a factor of seven since 1974. And the spot price for uranium has dropped by a factor of two in the last three years. Nuclear plant capacity projections continue to be scaled back. France, the most ardent breeder supporter, no longer expects its breeders to be economical in the near future. It is important that the world not plunge into the plutonium economy during this transition period. The consequences of such a plunge are irreversible and they are potentially disastrous.

(Mr. Chow, a physicist, is a research specialist at Pan Heuristics, a California-based research organization.)

SOVIET MANIPULATION OF THE PEACE MOVEMENT

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. McDONALD. Mr. Speaker, during "détente" the West heard little from the so-called peace movement. But with the election of Ronald Reagan, the peace movement re-emerged in full force in order to thwart the vital modernization of Western defense forces in the face of a massive Soviet buildup. A discussion of the reemergence of the peace movement and its hysterical claims follows, as written in the May issue of *Commentary* by Vladimir Bukovsky:

By the end of the 1970's the West was becoming increasingly aware of these dangerous developments. The usefulness of détente, long challenged by some, was now being questioned by many. And then came the final blow—on Christmas 1979. Just at the moment when most people in the West were preoccupied with such things as Christmas cards and presents, something like 100,000 Soviet soldiers moved in to occupy neighboring Afghanistan, an officially "non-aligned" country with a population of about 17 million. The world was shocked and the USSR was immediately placed in isolation. Even the Communist parties of many countries condemned the Soviet action as a piece of blatant aggression. The invasion of Afghanistan, followed by the arbitrary banishment to internal exile of Nobel laureate Andrei Sakharov, followed still later by the threatening of Poland (leading, finally, to the imposition of martial law), virtually terminated the era of détente.

This termination has cost the Soviets dear. In fact, they have lost almost everything they had gradually managed to gain while the West was enjoying its bout of unilateral relaxation. Ratification of the SALT II agreement was suspended indefinitely. The Americans were awakened from their prolonged lethargy to discover with horror how weak, ineffective, and unproductive their country had become. In this new psychological atmosphere, the victory of Ronald Reagan was inevitable, promising an end to American defense cutbacks, the deployment of a new, previously shelved, generation of weapons like the B-1 bomber, the cruise missile, the MX, and the neutron

bomb. It seemed equally inevitable that the military budgets of all the other Western countries would be increased, while the trade, technology, and credit arrangements with the Soviets would be reduced, or at least be made more difficult to obtain.

Thus, if this trend were to continue, the Soviets would lose their position of military superiority—especially in view of the fact that their economy is much less efficient than that of "rotten capitalism." Add to this the new wave of international hostility noticeable especially in the Muslim world (the United Nations General Assembly voted against the Soviets on Afghanistan, for the first time since the Korean war), a continuing crisis in Poland, a hopeless war in Afghanistan, and a growing unrest among the population at home caused by food shortages, and the picture grew so gloomy as to be just short of disaster. Clearly the Soviet rulers had to undertake something dramatic to avoid a total catastrophe.

I myself, to tell the truth, was not very much surprised when suddenly, within a year, a mighty peace movement came into being in Western Europe. Especially since, by some strange coincidence, this movement showed itself first of all precisely in those European countries where the old missiles were to be replaced by newer Pershings and cruise missiles. I make no claim to special prescience; it is just that after 34 years of life in my beloved Communist motherland, I have some sense of its government's bag of tricks, pranks, and stunts. In fact, it was not a very difficult thing to predict, for the Soviet state is not a particularly intelligent creature. If you think of it rather as a huge, brainless, antediluvian reptile with a more or less fixed set of reflexes, you cannot go far wrong. "Well, here we are, back to the 1950's again," I thought to myself.

What was much more amusing to observe was the ease with which presumably mature and responsible people had by the thousands fallen into the Soviet booby-trap. It is as if history were repeating itself before our eyes, offering us a chance to see how the Russian state collapsed in 1917, or how France collapsed within one month in 1940. It is also quite amusing, if one has a taste for such amusement, to be reminded of how people are practically incapable of deriving any useful knowledge from even the recent lessons of history. Once again, the universal craving for peace right now, this very moment, and at any price, has rendered people utterly illogical and irrational, and left them simply unable to think calmly. Their current arguments, if one may call them that, are so childish, senseless, selfish, that an involuntary smile comes immediately to one's lips. Even at best what one hears is a parroting of the kind of old moldy Soviet slogans and clichés that even schoolchildren in the Soviet Union would laugh at.

To begin with, why is it that everyone has suddenly begun to be so apprehensive about nuclear war again? What has happened to make it more real than it was, say, two or three years ago? The entire history of East-West relations shows that the only way to force the Soviets to respect agreements is to deal from a position of strength. So are we to understand that because the Soviets might cease to be militarily superior to us, nuclear war is once again a reality? Should we, then, take this proposition to its logical conclusion and say that the only guarantee of peace is Soviet military superiority?

Meanwhile, countless TV programs have suddenly sprung up that unfold before us images of the great treasures of our civiliza-

tion—paintings, sculptures, pyramids, antiquities, etc.—and at the end of each the narrator reminds us, his voice trembling with noble passion, how terrible it would be if all these treasures were to be destroyed along with the great civilization that produced them. And on other channels, we are treated to documentary after documentary about nuclear explosions and the consequences of radiation. After such relentless programming, naturally public-opinion polls show a sudden increase in the number of those who believe that nuclear war is imminent.

Then there is the catchy new idea that "Our deterrent does not deter anymore." Why? Has a nuclear war begun already? Have the Soviets attacked any NATO country? Or is it simply because those who like to say the deterrent no longer deters have seen their full quota of televised nuclear explosions?

It is so easy to start a panic. The question is: who is served by this panic? The Soviet-controlled World Peace Council declared in 1980 (and the whole European peace movement repeats it as if under a hypnotic spell): "The people of the world are alarmed. Never before has there been so great a danger of a world nuclear holocaust. The nuclear arms build-up, the accumulation of deadly arsenals, has reached a critical point. Further escalation in the arms build-up could create a most dangerous situation, facing humanity with the threat of annihilation."

Never before. But was not the world in as much danger a year earlier? The leaders of the European peace movement themselves claim that the nuclear potential accumulated on both sides is sufficient for them to destroy one another ten times. Is there any technical reason why "twenty times" is more dangerous than, say, "five times"? Or is it that, like a nuclear charge itself, the accumulation must reach a "critical mass" in order to explode?

Somehow, in the midst of all this nuclear hysteria it seems to be totally forgotten that bombs themselves are quite harmless, unless somebody wishes to drop them. So why are we suddenly alarmed by the stockpile of hardware and not by the Soviet military move toward the Persian Gulf?

Again, quite suddenly, voices begin to cry out in a huge chorus, "Nuclear weapons are immoral!" Wait a minute. Did these weapons just become immoral? Are conventional weapons moral? Why should this idea come all at once into the minds of so many people? Take as another example the question of the new missiles to be deployed in Europe. Why is it more dangerous to replace the old missiles with the new ones than to leave the old ones where they are? Are not the old ones equipped with nuclear warheads as well? To be sure, the new missiles are more accurate. So what? We can thank God that they are on our side. They may make life more difficult for the Kremlin adventurers, but why should millions of people in the West perceive that as a tragedy and danger?

Deep in their hearts most of these terrified people have a very simple answer to all these "whys." They know that the only real source of danger is the Soviet Union and that anything which might make the Soviets angry is dangerous for that very reason. But fear is a paralyzing and deranging force. So deranging as to lead some people to advocate the abolition of the police because the criminals are becoming too aggressive.

Indeed, the most amazing aspect of the present antiwar hysteria—aside from the

fact that it has arisen at a time so remarkably favorable for Moscow—is the direction of the campaign. Millions of people in Great Britain, Germany, Holland, Belgium, France, and Italy, supposedly of sound mind and with no evidence of the influence of LSD, march about claiming that the threat of war comes from . . . their own governments and the government of the U.S.! A psychoanalyst might characterize this behavior as the Freudian replacement of a real object of fear with an imaginary one. Except that even a psychoanalyst might conclude that pro-Soviet propaganda had something to do with the delusion in this particular case.

The facts are too obvious to discuss here. One may like or dislike President Reagan or Chancellor Schmidt, but unlike comrade Brezhnev, they were elected by the majority of their respective populations and are fully accountable in their actions to the parliaments and to the people. They simply cannot declare a war on their own. Besides, it is quite enough to look around to see the real source of aggression. Was it American or Soviet troops who occupied half of Germany and built a wall in Berlin? Is it not the Soviets who still occupy Hungary, Czechoslovakia, the Baltic states, not to mention Afghanistan, very much against the wishes of the people in these countries? Was it East or West German troops who took part in the occupation of Czechoslovakia and who are prepared to invade Poland?

Everything in the West is done quite openly—one might say, far too openly. But what do we know about the decisions made by 14 old fools in the Politburo whom nobody ever elected to make these decisions and whom nobody can call to account? No press is allowed to criticize them, no demonstrations to protest against their dictate. Anyone refusing to obey their secret orders would instantly disappear forever. There is in fact very little difference between the Soviet system and that of Nazi Germany. Is there anyone who supposes that he should have trusted Hitler more than the democrats? ●

A LETTER THAT MAKES EMINENT SENSE

HON. WILLIAM HILL BONER

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. BONER of Tennessee. Mr. Speaker, I am sure that every one of us has received correspondence from constituents concerning the recent news accounts of alleged improprieties which have occurred in the Congress. Recently I received a letter from a citizen from Springfield, Tenn., which makes eminent sense to me. I know that the distinguished majority leader of the House has for many years advocated the establishment of a dormitory to house the congressional pages. I believe, however, that the logic exhibited in the following letter makes eminent sense. I commend the letter from J. Travis Price to my colleagues.

J. TRAVIS PRICE,
ATTORNEY AT LAW,
Springfield, Tenn., July 28, 1982.

Congressman BILL BONER,
Room 552 Federal Court House,
Nashville, Tenn.

DEAR BILL: I have been interested to read reports of drugs and of homosexuality in the hallowed halls. I am not so much addressing my thoughts and remarks to the alleged actions, since I am confident that the legislature will find the means to resolve that aspect of whatever problem exists.

What is disturbing me is the "solution" to the problem offered by some of our representatives. That is, again, to throw money at it—to build some sort of Barbizon hotel for the pages, at the taxpayers' expense. You and I both know that that solves nothing, just changes its address. The taxpayers are sorely tired of such boondoggles in the name of problem solving.

I have a much more logical approach. Terminate the page system. It doesn't bring in enough votes, if any, to justify the expense; certainly it doesn't justify building a hotel for the pages. If the Congress must have people running around bringing the members coffee, etc., why not let the DOD assign non-rated military personnel to the duties. Certainly there are enough of them assigned around Washington who are not otherwise busily engaged. (Maybe those members who have the penchant for that sort of life can employ "hookers" from DuPont Circle areas to run their errands, eh?).

Seriously, Bill, there is absolutely no justification for pouring taxpayers' money into a "glamour" solution to a very unworthy project just to perpetuate what I consider to be an archaic and wasteful ego kick for legislators and pages. I trust you share my sentiments.

Yours very sincerely,

J. TRAVIS PRICE.●

MIDDLE EAST TRIP

HON. NICK JOE RAHALL II

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. RAHALL. Mr. Speaker, I would like to take this opportunity to share with my colleagues a recent statement I made on the congressional delegation I led which visited six Middle East countries. These are my comments and do not reflect on collective findings. Our delegation included besides myself, Congresswoman MARY ROSE OAKAR, Congressman PAUL McCLOSKEY, ELLIOTT LEVITAS, MERVYN DYMALLY, and DAVID BONIOR. This group, Mr. Speaker, on the balance has been overwhelmingly and consistently supportive of the interests of Israel and those who claim otherwise should examine the facts on record.

My statement follows:

STATEMENT OF CONGRESSMAN NICK RAHALL

Our mission, to see first hand what has occurred in Lebanon, and to talk with all parties concerned, took us to six Middle East countries: Syria, Israel, Lebanon, Egypt, Jordan and Saudi Arabia.

We talked with five heads of state: President Assad of Syria; President Sarkis of

Lebanon, Prime Minister Begin; President Mubarak of Egypt; and King Fahd of Saudi Arabia. We would have spoken with King Hussein of Jordan, but he was not in his country at the time of our visit.

In addition we met with five foreign ministers, four defense ministers, numerous faction leaders in Lebanon, members of Parliament in Syria, the Knesset in Israel, and People's Assembly in Egypt, plus representatives of the Labor Party and Peace Now Movement in Israel.

This delegation traveled well over six hours by car to enter Lebanon from its northern border. Once reaching Beirut, we were the first—and so far only—Members of Congress to see in person the massive, senseless and heartless devastation of West Beirut. We traveled the same streets three of us traveled 2½ years ago.

Schools, apartment buildings, businesses totally demolished—with untold numbers of innocent civilians buried underneath. We visited every floor of a Lebanese Red Cross Hospital—clearly marked as such—which had been shelled on three different days, and in which invalid patients, children and infants cried out for help. Doctors pleaded with us for vital medical supplies.

We witnessed an awesome display of U.S.-supplied weapons, including cluster bombs, which were clearly marked with U.S. insignias. U.S. weapons that have been raining on West Beirut for well over a month and a half, in clear violation of U.S. Law.

As I looked out from the bowels of Beirut from what was once the beacon of beauty in the Mideast, the shining Mediterranean Sea, I could only weep for the land of my grandparents. Yes, the PLO brought seven years of hell to Lebanon, as I personally witnessed 2½ years ago, but the worst hell of all has been brought in the last seven weeks, perhaps simply the last seven days.

In West Beirut claims that bombings occur with pinpoint accuracy are lies. Claims that bombings are in response to PLO fire first are lies. Our U.S.-arranged ceasefires are merely transformed instead into massive Israeli escalations—the most unbelievable of which occurs in the final hour preceding cease fires. To use quotes that we heard, "At best, this will be interpreted as the result of U.S.-Israeli impotence; at worse, as another example of U.S.-Israeli collusion in the war in Lebanon."

From Beirut, we traveled south under the escort of the Lebanese Civil Defense Forces and American Embassy Guards, having respectfully refused strongly made requests by Israel defense forces to be our guides and guards.

In Sidon, we again saw schools, housing demolished, and centers of Lebanese populations that again did not benefit from any pinpoint accuracy bombing. It was easy to see how true President Sarkis' statement that many more Lebanese have been killed than Palestinians. Most amazingly of all was the bombing of a Lebanese Army barracks and the confiscation of all Lebanese Army weapons. When I asked Israeli Defense Minister Ariel Sharon of this occurrence, he appeared surprised, perhaps angered that we had seen what he knew Israeli Military Guides would not have let us see.

In Jerusalem, we had frank and lively discussions with Prime Minister Begin, Defense Minister Sharon, and Foreign Minister Shamir. We also had an excellent conversation with Labor Party Leader Shimon Peres and a relaxed very friendly and delightful meeting with Ambassador Phillip Habib.

In our meeting with Prime Minister Begin, I relayed to him what we asked of Yassir Arafat in our West Beirut meeting with him and what we got or did not get. I relayed my appeal to Chairman Arafat to clearly, simply and unequivocally recognize the right of the state of Israel to exist and to renounce terrorism. I stated it had to be in straight forward language with no hedging for world opinion to recognize. He asked if we got it. I responded NO and he exclaimed see!

We had many questions for Defense Minister Sharon. His arrogant attitude leads him to believe that in times of war you can "look through formal agreements" between countries. Therefore, his use of American made cluster bomb units to destroy PLO fighters even if more Lebanese are killed is justifiable in his mind. This is horrifying to me.

After having heard Mr. Begin's insistence that there will never be a Palestinian State on the West Bank and Gaza and that he will never, under any circumstance, have a dialogue with the P.L.O., it was most encouraging to learn that more than 50 members of the Israeli Knesset have signed their names to a resolution that calls for a dialogue with Palestinians, and there are numerous opinions in Israel that the Sharon-Begin West Bank Settlement Policy is in clear violation of U.N. Resolution 242 and the Camp David Accords. Egyptian President Mubarak went further to say that the Sharon-Begin West Bank Policy was "180 degrees in the opposite direction of the Camp David Agreement worked out by his predecessor President Sadat and Mr. Begin."

It was clear to me, as I am sure it was to the others, after our meeting with President Mubarak, that Egypt has again produced a great leader who desires peace in the Middle East.

President Mubarak expressed worry at possible Soviet Union benefits from U.S. mistakes in Mid-East. He firmly believes that unless the U.S. re-evaluates its policy in this part of the world the Soviets will benefit. A U.S. re-evaluation must relate to an overall solution and hope to Palestinians for a return to their homeland.

Simply to disperse the P.L.O. throughout several countries would solve nothing, but perhaps help spread terrorism which the Communists would love. The only way any Arab country would take P.L.O. from West Beirut would be in exchange for some hope for a Palestinian homeland.

President Mubarak feels the Palestinians could be contained easily, but never by Military Force, only by dialogue and discussion.

Our discussions with leaders in Syria, Egypt, Jordan and Saudi Arabia, dispelled in my mind any idea what-so-ever that the Arabs are disunited, for they are much more alike than they are different. Their will is stronger than ever to unite for the Palestinian cause of human rights.

The Palestinian desire for a homeland is just as strong and as legitimate as any Israeli desire for a homeland, and everywhere in the Arab World, there is a complete disbelief in the United States' current policy in the Middle East. The Arab Leaders' message was quite clear, the U.S. must re-evaluate its policy in the Middle East before it is too late.

I strongly agree with Israel's desire for security and protection of its citizens. Terrorism in the region must stop, is the message we told those who have participated in such methods in the past. A Political solution,

rather than a military one, must be the avenues to pursue for peace.

I would just as strongly agree that Lebanon's pleas for security and recognition of its boundaries, as well as the protection of its citizens is legitimate. This country's present problem has, as King Fahd in Saudi Arabia said "far-reaching repercussions with the only beneficiary being the U.S.S.R. and its satellites."

Furthermore, the Palestinians hope for a future is a human rights cause that must be achieved. King Fahd said he will not abandon the Palestinians and doesn't feel other Arabs will either.

A peaceful future for all countries and peoples of the region are all worthy goals that we must help to bring about. Each life is as important as the other and each man has a right to have a say in his future.

As Secretary of State Schultz has said, it is indeed time for us to recognize realities in the Middle East. It is time that we re-evaluate our Policy. It is time that we get to the root of the problem in order to prevent future West Beirut.

Labor Leader Shimon Peres said in our meeting in Jerusalem, that in 10 years with the introduction of more dangerous weapons it "May Be Too Late." Speaker Teleb of the Egyptian Assembly said that in 10 years it may be too late for the U.S. Former Foreign Minister Sa'ad Salama told us we may be witnessing the "last spell of moderation ever".

As this delegation prepares to assemble a report on our trip that we will share with our colleagues, we will certainly stress that at this time, there is a faint flickering of hope for peace in the Middle East, and the U.S. must act now to make that light burn bright. We have passed up opportunities in the past. Let us not repeat our mistakes.

Thank you.●

H.R. 4961

HON. DAVID DREIER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. DREIER. Mr. Speaker, H.R. 4961, the bill to raise revenues in various areas which is currently before a House-Senate conference committee, is one of the most disturbing pieces of legislation to be considered by the 97th Congress. I cannot support it in its present form, and I am deeply troubled by the procedure through which the House sent it to conference.

Although H.R. 4961 began as a minor tax bill, it was rewritten by the Senate and became the complex and highly controversial bill it is today. The House abdicated its constitutional responsibility by sending the bill to conference instead of insisting on its prerogative to originate revenue-raising measures.

Besides these procedural problems, H.R. 4961 should not be passed because it is bad policy. We are, undeniably, in a recession, but there are many signs that it is about to end. A substantial tax increase at this time would insure the continuation of the recession.

The tax hike contained in H.R. 4961 flies in the face of all that we have accomplished toward restoring economic stability to our country. This tax increase, combined with bracket creep and the rise in social security taxation that was enacted during the Carter administration and is now taking effect, would wipe out almost all of the tax cut brought about by the Economic Recovery Tax Act of 1981.

Instead of raising taxes, we should dedicate ourselves to continuing the difficult but necessary process of further reducing the level of Federal spending. My constituents' demand that Government spending be brought under control is as strong today as it was when I was elected to Congress. The last thing they, and the majority of the citizens of this country, want is for us to renege in midcourse on what we have begun. There is no doubt that we must reduce the Federal deficit, but we must do so through reductions in spending, not huge tax increases.

Unless the conference committee makes major revisions in the bill, and unless the spending cuts mandated by the budget resolution are met, I urge my colleagues to vote against final passage of H.R. 4961.●

ACTS OF COWARDICE IN A PARIS RESTAURANT

HON. JOHN EDWARD PORTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. PORTER. Mr. Speaker, last night's news reports and this morning's headlines shocked the American people and saddened those who long for a more rational and sensitive world. Yesterday two terrorists, posing as customers, entered a well-known Jewish restaurant in one of Paris' oldest and loveliest quarters and opened fire on the customers and staff with machineguns and grenades. They killed 6 persons and wounded 21 others. It was described in the press as the bloodiest anti-Semitic attack in France since World War II.

What might have been noted as yet another in a long series of despicable acts of cowardice and terror was particularly brought home to me when I noted a report in the Chicago Tribune confirming that several of my constituents had been in that lunchtime crowd. One of them was killed. Two others were wounded, their condition at the time of the report, not known.

Once again we are reminded that the world all too easily tolerates a level of senseless acts of violence that belies our claim of advanced civilization and commitment to the rule of law.●

SAFE SCHOOLS BECOMING A REALITY IN NEW YORK CITY

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. BIAGGI. I wish to bring to the attention of my colleagues an article which appeared in the New York Times last week detailing the dramatic drop in school crime in New York City in the past 10 years. During the decade which statistics have been compiled by school officials and the United Federation of Teachers, we have witnessed crime in New York City schools dropping an average 22 percent. This includes assaults, robberies, larcenies and other such incidents curtailed from a high of 3,534 to the current level of 2,730.

As New York's senior member of the House Education and Labor Committee, I have maintained a strong personal interest in this area and wish to commend New York City officials for their diligence in working to reduce this unacceptably high level of crime in our schools. I am the author of the safe schools program which was established in the 1978 amendments to the Elementary and Secondary Education Act of 1965. This program authorized \$15 million in grants to be provided to 15 local education agencies which were determined by the Secretary to have the highest levels of school crime. The program, which would have funded both school safety programs as well as safety devices, sadly was never provided with an appropriation. This program has now been folded into the education block grant—funded at \$483 million this year—and it would be my hope that school officials in LEA's with special crime problems might seek to earmark some of their block grant funds for this activity.

I commend this article to the attention of my colleagues—especially those from urban areas in the country which face similar problems to those faced by New York and urge them to work with their own LEA's in targeting Federal funds in this direction. Safe schools are critical to the educational process and we do our young people a great disservice by allowing such activity to continue in schools—activity which should clearly be eradicated for the benefit of all.

STUDENTS' CRIMES AGAINST TEACHERS ARE DOWN BY 22 PERCENT—BIGGEST CITY DROP IN 10 YEARS—STRICTER POLICIES CITED IN REPORT BY THE UFT

(By Gene I. Maeroff)

Crimes against teachers and other staff members in New York City's public schools have declined significantly for the first time in the decade that the United Federation of Teachers has kept such statistics.

Figures provided yesterday by the teachers' union for the school year that ended in

June show a drop of 22 percent in assaults, robberies, larcenies and other reported incidents, to 2,730 cases from 3,534.

"Together with the upturn in our reading and math scores, this should tell the public that most New York City schools are pretty safe places where learning can and does take place," said Albert Shanker, president of the federation.

1,639 ATTACKS REPORTED

The group has regularly expressed its outrage at violence in the schools and has urged that the buildings be made safer.

A similar decrease in crime was revealed in figures compiled by the Board of Education not only against teachers, but also against students, principals and others in school buildings.

However, the figures from the teachers' federation show that, even with the reduction in crime, there were 1,639 physical attacks, 165 robberies, 694 larcenies and 232 other incidents against teachers and staff members reported in the public schools in the 1981-82 year.

The improvement follows a year in which the Board of Education, which has a \$24 million security budget, initiated firmer action against students involved in the most violent and disruptive incidents.

In 1981, Schools Chancellor Frank J. Macchiarola ordered that the police be summoned if a youngster brought a weapon into a school building and that the youngster be immediately suspended.

"Chancellor Macchiarola has provided the leadership and has established the policy and the tone to deal with the school crime problems more effectively," the teachers' federation said in a report with its findings.

The school system has enlarged its security force in the last year by 455 members to 1,705. It has also become more selective in training procedures and has spread coverage to junior high schools as well as high schools.

Statistics compiled by the Board of Education's Bureau of School Safety show that, during the 1981-82 school year, there was a decrease of 15.4 percent in assaults, 26.4 percent in robberies and 3.4 percent in larcenies.

For the first time in the eight years the board has kept such records, there was a drop in four of the five most serious categories of school crime—assaults, robberies, drug offenses and sex offenses. Only weapons infractions increased, and school authorities said that was because more vigorous enforcement in that area had led to better reporting of incidents.

69 UNSAFE SCHOOLS

"What we want now is continued funding," Mr. Shanker said, "with special focus on those schools which still have severe problems."

The number of schools rated "unsafe" by the teachers' organization dropped to 69 from 105. The 69 schools accounted for 43 percent of all the crime reported by teachers in the city.

The schools categorized as unsafe were not identified because "it would not help the schools," according to Susan Glass, speaking for the United Federation of Teachers.

Rated as the safest community school districts by the federation were Manhattan's Districts 2 (the East Side) and 4 (East Harlem), District 7 in the South Bronx, Brooklyn's Districts 14 (Williamsburg) and 22 (Flatbush) and District 31, which takes in all of Staten Island.

Also, in this category were Queens Districts 24 (Long Island City-Ridgewood), 25 (Flushing), 26 (Douglaston-Bayside) and 29 (Queens Village-Springfield Gardens).

The districts ranked as safest averaged one incident or less a school during the year.

THE CRISIS IN SCIENCE EDUCATION

HON. JOHN F. SEIBERLING

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 11, 1982

Mr. SEIBERLING. Mr. Speaker, there is an impending crisis in science education in this country which, unless corrected, is almost certain to result in the near collapse of our position as the leading economic, scientific, and military power. The ill-advised actions of the Reagan administration which have led to cuts in aid to higher education will simply aggravate what is already a serious shortage of science and mathematics teachers.

The Washington Post for Sunday, August 8, contained an excellent article on this crisis by writer Donna Hilts. Ms. Hilts reports that a recent convocation of the National Academy of Sciences called the state of high school science and mathematics teaching in this country "scandalous" and stated that most students graduating from high school are "scientifically illiterate." At a time when America's economic future depends on the expansion of its high technology industries, half the newly hired math and science teachers in high school were not qualified to teach those subjects, and graduates of American high schools are scoring increasingly badly in math and science. One-half of all high school graduates take no math or science beyond the 10th grade.

As Frank Press, the president of the National Academy of Sciences, stated, "The danger . . . is in raising a generation of Americans who lack the education to participate in a technological age . . ." By contrast in West Germany and Japan, the governments have encouraged increasing numbers of young people to enter into engineering and other technical fields, so it is no coincidence that industrial productivity in these countries has increased far more rapidly in those countries than in the United States in recent years.

Even more ominous, the Soviet Union has just instituted a reform of its science education which makes it the most advanced in the world, according to the National Science Foundation. The number of high school students taking calculus each year in the Soviet Union has reached 5 million. For the United States, the comparable number in 1977 was 105,000. In addition to 2 years of calculus, all

youngsters in the Soviet Union are required to complete 5 years of physics, 4 years of chemistry, 4 years of biology and 5 years of algebra.

Mr. Speaker, the worst aspect of our situation is that, from the President on down, politicians seem to be increasingly catering to the antisience movement in this country. At a time when we should be expanding and improving the scientific approach in education, national debate seems to be focused on the efforts of religious fundamentalists to impose the pseudo-science of "creationism" as having equal standing with the scientifically developed theory of evolution. If they succeed, they will have only turned a national comedy into a tragedy.

The full text of the Washington Post article follows these remarks:

EQUATION FOR A TEACHING CRISIS

(By Donna Hilts)

At a recent convocation of the National Academy of Sciences, a group not easily pushed to overstatement, scientists and educators call the state of high school science and mathematics teaching in this country "scandalous." What's more, they agreed, most students graduating from high school are "scientifically illiterate."

The shortage of teachers is critical: In New York and Minnesota last year, according to Academy president Frank Press, not one university graduate qualified to teach high school science actually did so. In the Washington area, universities are graduating only a handful of high school math and science teachers, a trickle not large enough to supply the major school districts in Maryland, Virginia, and the District.

Pirating teachers has become a national way of life. High-tech industries, desperate for engineers and other technically skilled workers, are not only raiding college faculties but offering new graduates \$10,000 more to start than the \$14,000 they could get teaching in area high schools. Colleges and industry in turn are stealing teachers from high schools, according to area educators. As a result, those left behind to teach the young in the public schools are often neither sufficiently competent nor enthusiastic to inspire their students to the wonder of the quirk or the beauty of an equation.

The crisis looms at a time when America's economic future depends on the expansion of its high technology industries—computers, robotics, laser optics, genetic engineering. And yet, not nearly enough people are being trained to fill these jobs. In Massachusetts, Itek Corporation chairman Robert P. Henderson recently told a congressional hearing, the inability of these industries to find enough technically trained workers to fully staff their facilities had lost the state half a billion dollars in personal income revenue.

No one is quite sure why or how this crisis in science education happened. Television, Vietnam and the upheaval of the '60s, which forced lower school standards across the board, are commonly blamed. But it is certain, as Dr. Wade Gilley at George Mason University puts it, that while the high technology express rumbled into America, "We as a nation were asleep at the switch."

As a result, we have begun a national scramble to catch up. The National Science

Board, which directs the National Science Foundation, has set up a panel of experts to find some answers, fast. And the Department of Education has put its own National Commission on Excellence in Education in place. Meanwhile local schools and industries have been left to assemble their own patchwork solutions.

The decline, some would even call it disgrace, of a nation that has long prized its technological ingenuity, can be read in recent statistics from the National Science Foundation:

In 1981, half the newly hired math and science teachers in high school were not qualified to teach those subjects. Forty-three states reported shortages of math teachers; nearly as many lacked enough physics teachers. More alarming, the average education major today scores significantly lower on standardized aptitude and achievement tests than other college students.

The performance of students, not unexpectedly, is equally dismal. The number of college freshmen needing remedial help in math jumped 72 percent from 1975 to 1980. On SATs and national assessment tests administered by the U.S. department of education during the past 10 years, 17-year-olds have scored increasingly badly in math and science. Many give up entirely by senior high: one half of all high school graduates in the United States take no math or science beyond 10th grade.

What is more, many experts are beginning to worry, not only about the quantity of science and math education, but also the quality. Henry Pollak, head of math and statistics research for Bell Laboratories, the nation's premier industrial lab, said recently, "Since 1940 the amount of math known has doubled every 10 years so that we now know about 16 times more math than we did then, but none of it has found its way into the schools."

In the Washington-area public school systems, although admittedly better off than many places, have already begun to feel the crisis. "We're in a state of mild panic right now," admits James Shinn, director of employment services for Fairfax County schools. Despite the system being one of the most affluent and most highly regarded in the nation, Shinn expects to open this fall with uncertified substitutes filling several math and earth science teaching slots. The county's saving grace, he says, is that the quality of their substitutes is so high. Most are quite proficient in their fields, but lack the necessary teaching credentials for state certification.

In Montgomery county, where dwindling enrollments have caused massive school closings, there is a temporary surplus of math and science teachers, according to John Pancella, coordinator of secondary science for the schools. In Prince George's, the school system's recent \$30 million budget cut forced the firing of more than 500 teachers, 16 high school math and science teachers among them. Those with provisional certificates were the first to be laid off.

"I don't want to imply there isn't a problem," said Carl McMillen, director of personnel for the Prince George's system. "There has been for the past several years. . . . As time goes on, if the student population increases, there will be a continuing and worsening shortage in math and science teachers, particularly in physics and chemistry."

Conrad Seeboth, supervisor of mathematics for Prince George's, is equally pessimistic:

"In the junior high, middle school, and elementary levels, we definitely need to beef up the competence of some of our teachers." Already, the system is trying to retrain some of its teachers by offering courses in algebra and geometry. "Many of them haven't had those subjects since high school," he said. "They're very rusty."

In the District, officials have sent a desperate appeal to area universities to fill several math and physics teaching posts before school begins. Although exact figures are not available, Mary B. Harbeck, supervising director of science, said she recently lost two "excellent teachers," one to industry, the other to a college. "The shortage really exists in good teachers," she said. "There are people available who are certified, but not qualified."

To ease the problem, most area school districts are pushing to find teachers within their own systems who are near certification in the critical fields and help them become qualified. In Montgomery and Fairfax, this includes some financial help for teachers' course work at area universities.

Even in Montgomery, where the school system's reputation, prime location, and relatively high salaries make it attractive to teachers, school officials worry about the near future. "I have an aged faculty," said Pancella. "My concern is in four or five years." Fairfax director Shinn agrees. In five years, shortages will be really severe, he said. "The supply will shrink, and we're frightening people out when we say there is an [overall] surplus of teachers."

The recent graduating classes of area universities indicate the kind of future shortage Shinn fears. At George Washington University, there were no graduates in secondary math and science education. At the University of Maryland, one of the largest teaching institutions in the area, out of 179 secondary education graduates, seven were qualified in math, only four in science, while 43 majored in early-childhood education, and 19 in art.

George Mason University vice president Gilley estimates that half the jobs in Fairfax County are in high-tech industries. Yet people to teach youngsters to fill those jobs are not being trained in sufficient numbers. At George Mason only two students graduated in secondary math education last year, none in physics or chemistry.

George Mason, however, recently has begun a new partnership with county industries, which it hopes will "build a critical mass of first-rate faculty," said Gilley.

The new Institute of Science and Technology at George Mason will attempt to tap the highly paid talent, and expensive equipment, of the county's 424 high tech firms, those specializing in computers, software, and research and development among them.

Executives will be offered part-time teaching posts and help develop the university's science curriculum; they will in turn have access to the university's pool of manpower, professors and students, to carry out understaffed projects, said Gilley.

Such a solution, however, may do little to ease the drain of teaching talent below the college level. Gilley points out that in the past decade the number of technological companies in Fairfax has jumped from 135 to 424, and the number of jobs in these industries has more than doubled. "Firms are locating here now almost weekly," he said.

So where does that leave the coming generation of young people, who cannot possibly compete in the marketplace of microchips and robots if they are not somehow

encouraged in science early on? The Washington area reflects what is happening nationally. There is a growing gap of information between rich and poor, the educated have and have nots. In Montgomery County, for instance, more students than ever before are enrolling in advanced science courses and entering science fairs. While in the District's inner city, said science director Harbeck, "We have some young people—and some adults—who think the landing on the moon was a big science fiction extravaganza on T.V. They just don't believe it happened."

"The danger," wrote Academy of Sciences president Frank Press recently, "is not in failing to train the gifted who wish to be scientists and engineers; they still seem to receive the requisite education and opportunities. Rather, it is in raising a generation of Americans who lack the education to participate in a technological age; in failing to assure the scientific literacy of Americans, whatever their future vocations."

How America can be so transformed, it is hoped by many, will be so outlined by the National Service Board's new Commission on Precollege Education in Mathematics, Science and Technology. The 20 men and women on the panel were chosen for their credentials in industry, defense, science and education. They consider their mandate, according to commission executive director Richard S. Nicholson, to write a national science education policy.

Some believe not only the economic health, but the safety of America's future depends on it. In West Germany and Japan, where the governments have persuaded their citizens of the importance of technology and encouraged increasing numbers of young people to enter engineering and other technical fields, industrial productivity has increased far more rapidly than it has in the United States.

America's lag in technological education has perhaps more frightening implications in the state of the country's defense—not missiles and bombs, but the people who will control them.

"We can't compete with a driver of a tank from the Soviet Union who has two years of calculus when we have to write our manuals at the sixth-grade level in comic book style," Nicholson said.

CONTROLLING FEDERAL DEFICITS: PAY AS YOU GO

HON. HOWARD WOLPE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 11, 1982

● Mr. WOLPE. Mr. Speaker, we are now confronted by the projection of extraordinarily high Federal deficits through fiscal year 1985—deficits which threaten to postpone indefinitely any semblance of an economic recovery. With each passing day, public frustration over a Federal budget that is out of control becomes more intense and grassroots demands for quick and decisive action become more urgent.

It is now painfully clear that gaining control of the Federal budget is a battle that will not be won by simple slogans or easy half-truths—rather, it is a battle that will require the kind of

political courage and tough decision-making that has been absent from this Chamber for far too many years.

During our most recent budget deliberations, Congressman MILLER offered us an opportunity to adopt a method of making spending decisions that would have restored faith in the ability of the Congress to reduce deficits and to enact a sound Federal budget. Tragically, however, the administration and the leadership of both political parties in Congress refused to endorse the Miller "pay-as-you-go" alternative, and what was eventually passed was a budget totally unrelated to economic reality—a budget with a deficit in excess of \$140 billion.

Deficits of this magnitude are unsupportable; they serve no party and no constituency. They result in high interest rates, capital shortages and massive unemployment. They drain our economy of its vitality and create an environment in which every wage-earner cringes when its time to pay the monthly bills.

Persistent Federal deficit spending must be brought to an end, and the all-critical challenge before this Congress is to act in a bipartisan fashion to reduce deficit spending and to move toward a balanced budget.

As the Congress continues to search for a workable budget solution, it would do well to reconsider the Miller "pay-as-you-go" alternative—an alternative which, according to the nonpartisan Congressional Budget Office, would generate a budget surplus of \$27.5 billion in fiscal year 1985.

By freezing all Federal spending at 1982 baseline levels and requiring offsetting savings or new revenues for any additional spending above that baseline, the "pay-as-you-go" budget would break the almost constant reliance of Federal budgetmakers upon deficit spending.

Upon reviewing the "pay-as-you-go" alternative, Washington Post columnist Mark Shields found it contained—

No more rigged projections of rosy revenue increases by 1988 . . . [no more promises] of instant and ouchless prosperity by next Tuesday . . . The Miller plan offers some political pain . . . No longer would Members of Congress—of both political parties—be able to finance their untouchable programs through the Federal deficit. Congress would be required to make real choices among competing interests and constituencies.

This Congress has a fundamental responsibility to put partisanship aside and to address in a rational and objective manner the problem of growing Federal deficits. I suggest to all of my colleagues that the first step in fulfilling this responsibility is to seriously reconsider the "pay as you go" budget.●

THE IMMIGRATION REFORM AND CONTROL ACT OF 1982

HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 11, 1982

● Mr. MAZZOLI. Mr. Speaker, I continue to be gratified by the strong support for the Immigration Reform and Control Act of 1982, H.R. 6514, which has come from leading newspapers of the Nation.

Earlier this week, the New York Times, in its usual straightforward fashion, argued for prompt action on the immigration bill in the other body and in the House. The editorial correctly pointed out that the bill maintains today a fair balance, but that balance and symmetry can be lost if unnecessary and inappropriate amendments are attached to it.

I certainly appreciate and welcome suggestions from my colleagues for amendments to H.R. 6514, which was reported unanimously by my subcommittee on May 19 and which will soon be considered by the full Judiciary Committee.

However, when offering such amendments, I trust my colleagues will keep in mind the balance existing in H.R. 6514, and the need to preserve balance in the final product.

This is a good bill and deserves the support of the House and of the Nation.

I am including at this point a copy of the New York Times editorial of August 9, 1982.

TURNING MEAN ON IMMIGRATION

Today or tomorrow, the Senate will have a rare, fleeting moment to put the United States back in charge of its own borders—but it may blow the chance.

Controlling immigration has become an important goal of conservatives and liberals alike. Now, finally, they have a way to get from here to there: the broad and balanced immigration reform bill sponsored by Senator Alan Simpson, Wyoming Republican, and Representative Romano Mazzoli, Kentucky Democrat, which is about to come up for debate in the Senate.

The underlying idea is simple: reduce illegal immigration sharply while holding legal immigration at the present level. But both halves of that proposition are threatened by harsh amendments to be offered in the Senate. Unless they are beaten, the opportunity of a generation will be lost.

The idea of clamping down on illegal immigration may sound like pure virtue, but it arouses employers and civil libertarians. In response, the Simpson-Mazzoli bill is adjusted as delicately as a clock. The best way to discourage illegal immigrants is to make it harder for them to get jobs—and the practical way to do that is to make it against the law for employers to hire them. For that to work, in turn, means some kind of identification system, so employers can tell who is illegal.

Employer sanctions and an identification system are the heart of the bill; without them, it is not worth having. But civil libertarians fear invasions of privacy and His-

panic groups fear discrimination. Unless offset, such fears would trigger powerful perhaps fatal opposition to the bill.

That's one reason it also contains an amnesty provision. Over the years, thousands of illegal entrants have created new lives here, but lives shadowed by fear of discovery and exploitation by unscrupulous employers. The Simpson-Mazzoli bill would provide a one-time amnesty for most of them, offering enough humane benefit to induce some opponents of sanctions to go along.

But that's not good enough for Senator Jesse Helms, the North Carolina Republican. He insists that amnesty must be deleted altogether—even though that would jeopardize the whole bill. He would rather break the clock than see an amnesty provision succeed.

Senator Charles Grassley, the Iowa Republican, proposes, more sensibly, to delay amnesty for three years, the same three years in which the Government is supposed to work out an effective identification system. Both sides of the bargain would remain hostage to each other, not a bad idea considering how much the bill's identification provisions have been watered down.

There is a harsh spirit alive also over legal immigration. Senator Walter Huddleston, a Kentucky Democrat, proposes limiting all immigration to 425,000 a year. That's roughly the present amount—but there's a big catch. He would include refugees within his limit. That would reduce total admissions by 100,000 or more people a year.

The Huddleston cap illogically lumps together two wholly different kinds of people. Refugees are desperate to escape persecution; immigrants are eager to rejoin their families or find new opportunity. The probable effect would be to cut deeply into the number of parents, wives and children of U.S. residents who could come in legally.

At a time of 9.8 percent unemployment, there's a glib appeal to the Huddleston notion. It's not the first time someone has blamed economic distress on foreigners. It's not the first time legislators have turned exclusionary or nativist. But if people like Senator Huddleston are sincere about losing jobs to foreigners, it's illegal migrants they should be worried about.

The 97th Congress is winding down fast, but the chances are that if the Senate can pass the Simpson-Mazzoli bill without these ugly amendments, the House will act quickly. The public, to judge by polls, overwhelmingly supports controlling the borders. This bill provides a way to do so in ways that are effective without being ugly. Congress should jump at the chance.●

HON. JONATHAN BINGHAM

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. STOKES. Mr. Speaker, I take this opportunity to thank the distinguished gentleman from New York, Mr. ADDABO for taking this special order so that Members can salute a man call a perfect statesman and one who has served this Nation since 1965—Congressman JONATHAN BINGHAM. This salute is appropriate action for a gentleman who has not only

made this Congress a more responsible legislative body during his tenure but also represented his constituents in an exemplary manner.

As we all know, Mr. Speaker, Congressman BINGHAM will retire from this legislative body at the end of the 97th Congress. However, the work he has done for this country and the indelible mark he has made on this body will never be forgotten.

From the first day of Congressman BINGHAM's term in 1965, Mr. Speaker, he has exhibited an unquestionable allegiance to this Nation and his constituents. He has toiled and labored on their behalf. Their best interest were always at the forefront of his mind. As a result of those 17 years in Congress, my colleague, Congressman BINGHAM has gained not only the respect that comes with seniority but also the genuine esteem of his peers on both sides of the aisle.

Mr. Speaker, Congressman BINGHAM especially has distinguished himself as an expert in the area of foreign relations. Currently, he serves on the House Foreign Affairs Committee and chairs the Subcommittee on International Economic Policy and Trade. He is also a member of the Foreign Affairs Subcommittee on International Security.

Mr. Speaker, Congressman BINGHAM is also a member of the Commission on Security and Cooperation in Europe which monitors the Helsinki accords.

Additionally, Congressman BINGHAM serves on the House Interior and Insular Affairs Committee and the Steering Committee of the Northeast-Midwest Congressional Coalition.

Mr. Speaker, with all due candor, I must say that we will miss the leadership and expertise Congressman BINGHAM has provided in the Congress. Particularly in the area of foreign affairs, he has been a towering figure and a source of leadership to each of us.

In closing, Mr. Speaker, I would like to say that I salute Congressman BINGHAM for the dedication he has displayed to this Nation and its citizens. The people of New York's 22d Congressional District could not have asked for a more responsive and dedicated Representative. This Congress could not have asked for a finer statement and legislator than Congressman BINGHAM.

My distinguished colleague has truly made an indelible mark on this Nation. His expertise and vision that he shared with Members on both sides of the aisle shall long be remembered. ●

NATIONAL POETRY DAY

HON. CLAUDE PEPPER

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 11, 1982

● Mr. PEPPER. Mr. Speaker, I would like to bring to your attention and that of our colleagues the importance and cultural enrichment of proclaiming October 15 as National Poetry Day.

Dr. Frances Clark Handler, national director of the National Poetry Day Committee, Inc., an honored resident of Miami Beach, Fla. has been instrumental in bringing the importance of poetry to the official attention of many and has long delighted and thrilled Floridians and the Nation with poetic offerings. A national poetry day will doubtless provide enrichment for our cultural life as well as enlighten our citizens with poetry. I have the pleasure to cosponsor House Joint Resolution 550, a bill proclaiming October 15 of each year as National Poetry Day. As I said in this Record 2 years ago, 30 States have officially designated October 15 as National Poetry Day. I urge our fellow colleagues to continue our support in recognizing the many poets and their literary works found throughout the United States.

Attached for your further perusal I include two captivating and informative summaries of the "History of Poetry Day and National Poetry Day Committee Inc." and "How Poetry Day May Be Observed," written by Dr. Frances Clark Handler.

HOW POETRY DAY MAY BE OBSERVED

The National Poetry Day Committee offers the following suggestions to state chairmen, poets, educators and all interested in promoting Poetry Day observances on October 15.

Make high school or college a center of community observance. Promote school assemblies on or close to Poetry Day, in which student poets or visiting poets participate.

Urge literary, cultural and women's clubs to plan community programs, presenting, if possible, local poets and musicians. Feature programs of poetry at church, clubhouse or community centers. Form local community Poetry Day committees with a radio chairman, school and college chairman, press chairman and library chairman. Emphasize the function of the poet as a creator of values and a humanizing force.

Present a local radio program featuring local poets and musicians in recitals or present a speaker on the origin and purpose of Poetry Day.

Request ministers to read poetry from the pulpit and at church meetings and to mention Poetry Day.

Urge librarians to put on a display of volumes of poetry. Feature exhibits of the work of local poets. Put up Poetry Day posters created by students in local art classes or by professional artists.

Secure articles on Poetry Day in magazines, and newspapers and Sunday supplements. Feature interviews with local poets

and get their pictures used. Urge printing in the local press of the Governor's proclamation, giving names of the local Poetry Day organizers and news of any observances in the community.

Secure proclamations by mayors and have them published in the local press and also broadcast on local radio and TV stations.

HISTORY OF POETRY DAY AND NATIONAL POETRY DAY COMMITTEE, INC.

It all started in 1936—though it had been a dream all of Tessa Sweazy Webb's life—to find a way to honor poets—and she talked this over with everyone who would listen.

Finally, she was introduced to Ohio Senator WILLIAMS and through this contact she was able to get a joint resolution—S.J.R. No. 39—called the Grubbs-Myers-Marshall resolution introduced and passed in January 1938, by Ohio's 92d general assembly naming the third Friday of October of each year as Ohio Poetry Day.

Other states followed Ohio slowly, but no concerted effort was made to make this a national day, or National Poetry Day in all states until Lucia Trent of Texas spearheaded the movement and called this movement the National Poetry Day Committee.

It is noteworthy that . . . Lucia Trent selected October 15, for the National Poetry Day to honor Poet Ralph Cheney, who died on that day in 1941.

This day is celebrated in 50 United States of America and 40 Foreign Countries and is listed in all almanacs as Poetry Day.

Even though there is legislation in so many states naming October 15 Poetry Day, it is still necessary to get the Governor's Proclamation every year, for like all holidays and days of special note and days that are legal holidays—they would be forgotten if the proclamations were not forthcoming—reminding the public that this is indeed Poetry Day and give states an opportunity to eulogize their own poets in these proclamations. Most States have long lists of accredited poets that should not be forgotten.

Through the tireless efforts of Dr. Frances Clark Handler who took over the National Director's Chair April 1, 1966, . . . the National Poetry Day Committee, Inc., was then incorporated as a non-profit organization for the name's protection.

Because of the Committee's many worthy endeavors in all cultural circles there is a strong feeling that this will eventually be extended to a Presidential Proclamation for a National Poetry Day.

Without a doubt a National Poetry Day Proclamation will make all the people of the United States more culturally and poetically aware. ●

EAST GOSHEN (PA.) TOWNSHIP: A COMMUNITY WITH SPIRIT

HON. RICHARD T. SCHULZE

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 11, 1982

● Mr. SCHULZE. Mr. Speaker, I am pleased to bring to your attention a community project which came about from a small town's sense of history and team spirit, and which resulted in the restoration of a distinctive piece of Americana.

It all began with the dream of two men, Ira Hicks and Dutch Clark, lifelong residents of East Goshen Township, Pa., who rallied the support of landowner Bernard Hankin and finally the interest and dedication of the townspeople.

For their efforts, a long-abandoned blacksmith shop, which dates to pre-Revolutionary War days—circa 1750—will be dedicated at East Goshen's tricentennial ceremony on September 6. With its renovation, this smithy shop, once the gathering center of the local farmers and their families, will again be operational and open to the public. It has been carefully and painstakingly restored with many of the original door hinges, latches and other hardware, and the original ceiling beams and stone walls have been preserved.

The restoration of any historically important structure is desirable. Even more to the point, however, is the sense of pride and communion this project has instilled in the area residents as they lovingly contributed to the preservation of a small portion of American history for their children and our future.

I applaud the industrious people of East Goshen, Pa., for their united and devoted labors.●

OHIO HIGH SCHOOL STUDENT RAISES \$8,500 FOR SCHOOL SPORTS

HON. CLARENCE J. BROWN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 11, 1982

● Mr. BROWN of Ohio. Mr. Speaker, in these days of fiscal restraint, the White House is placing greater emphasis on voluntarism and self-sacrifice for the greater good. I am encouraged to see so many of our youth who exemplify these principles. In my district, one young high school student has made a contribution which surpasses the records of all those before him.

My respected colleagues, it is a pleasure today to recognize Peter Loukoumidis, a high school football player, who individually raised \$8,500 for the Springfield North High School athletics department on May 6, 1982. In the school's seventh annual lift-a-thon, Peter broke not only his brother George's record of \$5,600 set in 1981, but an all-time national record, as well. In a lift-a-thon, participants solicit donation pledges based on the number of pounds they lift. A dime a pound from one sponsor can mean \$20 for a 200-pound lift. Peter lifted 225 pounds to raise \$8,500 or half of the grand total raised by the team. Through pledges of pennies, nickels, and dollars, the North High football team contributed \$17,510 to the school's athletics department.

How have these lift-a-thons helped North High School? These funds have given the school the finest weight facility in the area; helped pay off football field lights; replaced uniforms; provided the best protection gear available; and helped almost all other sports at the school.

Next year, Pete plans to double what he raised this year, and he will continue to develop his strength and durability by lifting as he has been doing since eighth grade. "I've always been into sports," Pete says. But looking at his background, it is obvious that Pete is involved in many other activities as well.

Pete has excelled in his efforts to contribute to his school, church, and community. Pete, who is 17 years old, is one of five children born to James and Despina Loukoumidis. His parents migrated to this country over 20 years ago to settle in Springfield's Greek community, though most of his relatives remained in Greece. Pete had the opportunity to spend three months visiting in his parent's homeland in 1975 where he gained a greater appreciation for his heritage. Volunteering at numerous bake sales and church picnics, Pete likes to be "involved as much as I can," in the Greek Orthodox Church. He was an active member of the Greek Youth of America and attended Greek schools for 7 years so that now he speaks and writes Greek fluently.

Pete has received five athletic letters in his high school career. He has played football since he was in third grade, making this the eighth year that the 6-footer has played competitively. Along with having received three football varsity letters, he received the award for Best Defensive Lineman. Two of his letters were received in wrestling, a sport he will also pursue this year.

In recognition of his community service, Gov. James Rhodes appointed Pete to the Ohio Governor's Council. As a member of this council, Pete works with the police and highway patrol to promote safety at the county level. He holds the distinction of being an honorary citizen of Disney World and has received a service award from the Springfield Board of Education.

Peter Loukoumidis is an outstanding young Ohioan and an American of whom we can all be proud. On behalf of my colleagues in the U.S. House of Representatives, I commend Pete for his support of high school athletics in Springfield, and I wish him much success in the years ahead.●

CASH ON THE BARRELHEAD

HON. DOUGLAS K. BEREUTER

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 11, 1982

● Mr. BEREUTER. Mr. Speaker, in the wake of the announcement by President Reagan that the United States is prepared to begin negotiations on a 1-year extension of the current United States-Soviet grain agreement, much attention has been focused on the distinct differences between large grain sales to the Soviet Union for, as the President has said, "cash on the barrelhead," and recent U.S. attempts to block construction of the Siberian natural gas pipeline. A particularly cogent editorial was published in the Wall Street Journal of August 4, highlighting the differences between these two transactions.

A definite distinction must be made between aiding construction of the pipeline by providing vast amounts of Western capital at below-market rates, creating a drain on the limited resources of the United States and our allies, and U.S. grain sales to the Soviets which create a substantial outflow of Soviet resources into the pockets of the American farmer. I fully agree with the validity of the distinctions made in the editorial, and I wish that portions of it be reprinted in the RECORD for the benefit of my colleagues.

CASH ON THE BARRELHEAD

President Reagan's speech to the National Corn Growers on Monday was a hit in Des Moines but a disaster in Europe. He promised his one-year extension of grain exports to the Soviets would bring record sales. But the speech seems designed to reinforce the Europeans' feeling that they've been put upon by Mr. Reagan's actions against the Soviet natural gas pipeline.

Mr. Reagan told U.S. farmers that the extension would have "the sanctity of a contract" and "there must be no question about our respect for contracts" and "we must restore confidence in U.S. reliability as a supplier." He went on to say that the U.S. must "restore that faith in us that if we've made a deal or a contract, it'll be a contract and we'll keep it." You could just feel the blood pressures rising in European capitals. . . .

What the President should have pointed out instead is that there are some very good arguments against the pipeline. There's Poland, where the Soviets still enjoy the peace and quiet of martial law. There's all that natural gas Europeans could pump from the North Sea. But the kicker is that Europe is not only subsidizing the pipeline but also taking all the risk. In contrast, the Russians pay cash or gold for grain. As Mr. Reagan said on Monday, hinting that this distinction was at least at the back of his mind, "the granary door is open and the exchange will be cash on the barrelhead."

Grain is different from rotors and turbines in other ways. Europe, Argentina and Canada know how to grow wheat and happily sell it to the Russians whether or not the U.S. embargoes its grain. (At least the U.S.

doesn't subsidize these sales.) But only General Electric has the knowhow to build the rotors needed to make a pipeline anything like the one the Russians planned. Grain can be bought with a quick phone call but for GE technology, firms abroad must abide by U.S. export control laws. . . .

ANTI-SEMITISM

HON. PAUL FINDLEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 11, 1982

● Mr. FINDLEY. Mr. Speaker, I deplore and condemn the horrible and ugly attack on a Paris kosher restaurant, Chez Jo Goldenberg.

The tragic death of six people in this startling act of anti-Semitism follows an October 1980 attack on a synagogue in Paris which killed four people and also the murder of the Israeli Ambassador to France earlier this year.

I urge the French authorities to devote every resource to finding the perpetrators of these terrible crimes and bringing them to justice.●

A TRUE CHAMPION

HON. DON FUQUA

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 11, 1982

● Mr. FUQUA. Mr. Speaker, one of the Nation's outstanding sportsmen, Dean Chenoweth, died on July 31 when his hydroplane, *Miss Budweiser*, flipped out of control during a qualifying run for the Columbia Cup race at Pasco, Wash.

In addition to being a renowned boat racer, Dean Chenoweth was a particularly close friend of mine; a man who wore his exploits and fame with grace, dignity and humility.

Dean Chenoweth was four times champion of the national unlimited hydroplane circuit but was perhaps better known in his hometown of Tallahassee as a devoted family man and good neighbor.

The following story by Tallahassee Democrat Sports editor Bill McGrotha is a sensitive summary of the man and the sportsman and expresses the characteristics which will so sorely be missed by his neighbors and his competitors.

HE'D PLANNED TO QUIT RACING AFTER THIS YEAR

The first time we really talked, about three years ago, I asked him all the questions about a sport of which I knew naught.

What was it really that made the big boats he raced so very dangerous?

"They blow up," he replied simply and very gently.

Dean Chenoweth was one of the world's gentle people, and now as I struggle to put these words together it is that far more than anything else that I remember.

In his low-key manner he spoke more, in subsequent talks, of unlimited-hydroplane racing and its appeal to him.

The last time we talked, about two months ago, I asked him how much longer he planned to race the thunderboats.

There was a pause. Perhaps he took a deep breath. We were talking over the phone.

"I tell you what, just between you and me," he began, "Aw, go ahead and print it if you like."

"This will probably be my last year."

Tragically, it was.

He died Saturday when his monstrous machine, *Miss Budweiser*, crashed on the Columbia River in the state of Washington. Chenoweth had crashed in thunderboats, three times before, and each time in that state.

It was said that his recoveries from the crashes in 1979 and 1980 were miraculous.

But there was no miracle Saturday to avert a cruel and ironic fate. The nose of the boat shot in the air then flipped over backward.

Chenoweth had said to me that day in early June: "You start to think about what's left now—other than to lose your life the way Bill did."

He was speaking of Bill Muncey.

There were two big names in the sport: Muncey and Chenoweth.

Now there are none.

Muncey, 52, died in his boat nine months ago at Acapulco in the last heat of the last race of the season.

With Muncey gone, there seemed much less reason for Chenoweth, 44, to continue. He was well aware.

Yet there are those who were close to him who question whether he really would have quit, as he said he probably would, after this one last season. "People don't understand. I'm not risking my life on the water," Muncey once said, "I'm living it!"

And Chenoweth had said: "I think you have to think that nothing is going to happen to you out there. If you don't think that way, you probably wouldn't be able to drive."

Chenoweth was hardly a guy you would pick out in a crowd. He stood 5-foot-8 maybe, and weighed about 150. No way you would have figured this friendly, smiling guy with his average look a champion of anything, much less a deadly sport.

But he was a splendid athlete and in wonderful shape. He ran about seven miles daily. Doctors said his fine physical condition enabled him to survive a particularly dramatic crash in October 1979 when he was gunning his boat at more than 215 mph on a straightaway.

By all accounts, he was an extraordinary driver.

"He never makes a mistake, and he uses his head," crew chief Dave Culley told The Democrat's Andy Lindstrom a few weeks ago. "Dean knows just what it takes to win."

His courage seems to have been extraordinary. In 1979 his comeback year in a sport he had been away from for more than five years had been capped by that near-fatal crash on Lake Washington. He was one of six finalists for the International Award for Valour in Sports and had gone to London in early 1980 for the ceremonies. The award is for "a single act of bravery in an event, or sustained courage in his or her career."

But there is some indication that unlimited-hydroplane racing—and unlimited seems a key word—maybe too extreme, too severe a test for the skills and bravery of mortals.

Super-charged engines kick up seven tons of water in a wake behind these boats, it is said. Acceleration is boosted by sudden injections of nitrous oxide.

But too big a burst of nitrous oxide can bring speed that will rip a boat's hull apart.

One way or another, the quest is for faster and faster boats lighter and lighter through technology. Water that looks relatively calm to the layman can be disastrous for these big boats.

It was "bad water," created by the wakes of previous boats, that brought Muncey's death at Acapulco, according to Chenoweth. It may have caused his own. Muncey's boat, like Chenoweth's, abruptly flipped into the air.

In its formal history, the unlimited hydroplanes have had only 130 drivers. Of these, only 51 have won a single race. Only Muncey, Chenoweth and five others had won as many as a dozen apiece.

Eight winners of single races died trying to win a second time. Chenoweth was the 16th driver to die in the sport.

Originally from Ohio, Chenoweth came to our city in the late 1973's to operate the Anheuser-Busch franchise here. He had little thought, he once said, of racing the big boats again. But he was lured back in 1979, and not even the death of his only son, 18-year-old Dean Alan, Jr., in an automobile accident in early 1980 slowed him down.

His son, he said, identified a great deal with his racing and would want him to continue. That summer after his son's death, Chenoweth had his biggest season. With his son's picture taped to the wheel of his boat, he won a record 16 straight victories.

Florida State football became one of his loves, and he rarely missed a game. He was involved in more than cheering. For a time, he frequently piloted his Piper 6-seater airplane on recruiting trips for coach Bobby Bowden.

"A hydroplane race has excellent control up to about 175 miles per hour," Chenoweth once said. "Above that, you're on the edge—the boat is more out of the water than in."

"But beyond 200, you're like the guy riding in a rocket car on the Bonneville Salt Flats."

Fate takes charge.

"I call it the twilight zone," Chenoweth had said.

Precisely what happened Saturday morning is not clear and may never be. Probably the details are not that important.

A gentle champion among men is gone, and his time here was so terribly short.●

SUPPORT FOR H.R. 6950

HON. MERVYN M. DYMALLY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 11, 1982

● Mr. DYMALLY. Mr. Speaker, as legislators, we are no strangers to constant outcries over the plethora of injustices, inequities, and inadequacies which vex our society. Each of us, though, knows all too well the futility of raising questions, however relevant, if we fail to take the time to propose serious, viable answers to these questions.

It is precisely that realization which prompts me to call my colleagues' at-

tention to H.R. 6950, a bill which addresses a crucial problem now faced by our United States. Mr. WALGREN's National High-Technology Technician Training Act answers the urgent call for a unified national approach to the training of competent high-technology technicians.

I have stood before this distinguished body on several occasions to decry our Nation's scientific, technological, and educational shortcomings. Believing that Mr. Walgren's bill is a considerable step toward the amelioration of some of these shortcomings, I have joined colleagues on both sides of the aisle to cosponsor this important piece of legislation.

This act would make use of community colleges to train a technological labor force to meet the growing U.S. need for skilled technicians. Mr. WALGREN suggests, and I concur, that our Nation's 2-year community colleges may properly bear major responsibility for such training. First rate community college programs could dramatically increase the number of available, highly skilled workers, thus significantly aiding national industry. At the same time, such programs could open new channels of opportunity for a great many young workers. For too long, training programs in this country have been out of step with national needs. H.R. 6950 will serve to rectify this grave defect.

I invite you to examine this bill in detail. I think you will come to appreciate its timely and sensible approach to an exigent problem. I hope all of you will join me in supporting this bill.●

HON. JONATHAN BINGHAM

HON. MIKE LOWRY

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. LOWRY of Washington. Mr. Speaker, it is a great honor and pleasure for me to join in paying tribute to my good friend and colleague JACK BINGHAM, and I would like to thank the gentleman from New York, Mr. ADDABBO, for arranging this special order.

Last week, we almost succeeded in passing the nuclear weapons freeze proposal through the House. It was a disappointment to lose by two votes, but we have come so far on this issue so quickly that there is good reason for optimism about future efforts to bring an end to the nuclear arms race.

There has been no stronger or more effective supporter of the nuclear weapons freeze in Congress than JACK BINGHAM, who offered the freeze language in the Foreign Affairs Committee and steered it to adoption by that committee. In fact, he has long been a

voice of sanity on the arms race. The country is now in the process of accepting views that he has held for many years.

Our efforts to end the arms race are not over yet. But we have made a good beginning. I hope JACK has found as much satisfaction in seeing this vindication of his foresight, as I have found in working with him on this issue. We will miss his common sense and his ability to work with others.

I can think of only one more fitting way to leave Congress than with this close vote on the freeze, and that would be to have won. But next time we will win, and JACK BINGHAM's work will be one extremely important reason why.●

GFWC RESOLUTION: WATER CRISIS (CONVENTION 1982)

HON. BOB EDGAR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 11, 1982

● Mr. EDGAR. Mr. Speaker, a strong resolution passed at the 1982 National Convention of the Federation of Women's Clubs deserves our careful consideration. As a strong advocate of a new national water policy, I commend their active leadership in this important area. Faye Z. Dissinger, president of the Pennsylvania Federation of Women's Clubs, brought the views of the Federation to my attention. I share their resolution with my colleagues in hopes that it will spark our interest in real water policy reform. The resolution follows:

GFWC RESOLUTION

Whereas the water supply on our planet is a constant factor, and the projected use of the water by the expanding population could exhaust the available supply within the foreseeable future; and

Whereas the wise use of our present water supply augmented by the restoration to usability of presently polluted water would provide a supply of usable water that would sustain the earth's population in the foreseeable future; and

Whereas State and local governments alone can no longer provide solutions for the ever-increasing water supply problems; and

Whereas no single federal water policy is applicable to all parts of the nation where there are vast differences of water supply and water problems; and

Whereas an immediate program of action is necessary if we are to forestall the impending water crisis and yet not work an undue hardship on any segment of society; Now, therefore, be it

Resolved, That the General Federation of Women's Clubs urges the Congress to enact legislation at the national level that will provide a program of action to:

(1) Expand the existing supply of usable water by improved methods of desalinization of sea water, protection of ground water and by research in methods of inducing precipitation;

(2) Prohibit any further pollution of the nation's streams and domestic water supply;

(3) Assist persons, governmental units, and industrial enterprises now polluting the nation's streams and domestic water supplies in making such changes as necessary to bring an end to water pollution and to provide federal financial assistance in the form of tax incentives or by other means of "cost-sharing" so that the cost may be spread over the society which benefits; and further

Resolved, That the General Federation of Women's Clubs urges the Congress:

(1) To provide a strong national water policy for all parts of our nation and all segments of our society;

(2) To provide a vehicle which would abate international water pollution.●

NOW IS THE TIME TO SUPPORT ISRAEL

HON. ROBIN L. BEARD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 11, 1982

● Mr. BEARD. Mr. Speaker, Israel has done the United States and the cause of the world peace a favor by eradicating the PLO terrorists from Lebanon. While we hear the American media castigating Israel for the destruction in Lebanon, the truth is that Lebanon will be far better off without the yoke of the PLO occupation. There has unfortunately been far less coverage of the PLO terrorizing of Lebanon for the past 6 years than of the effects of the attempt by Israel to liberate Lebanon from the PLO.

I think that there should be absolutely no consideration of reducing, cutting, or slowing the flow of American support for Israel. Israel has acted in self-defense. I ask my colleagues: what would we do if terrorist organizations in Mexico or Cuba had engaged in years of shelling American citizens in Florida or Texas? What would we do if terrorists in Cuba or Mexico had periodically crossed our border to blow up schoolbuses in New Mexico or California? I would hope that we would react with the same determination and skill to defend our people as Israel has.

I now would like to insert an editorial by George F. Will that capsulizes the entire situation, especially the press coverage, in eloquent form. I commend the article to all:

[From Newsweek, Aug. 2, 1982]

MIDEAST TRUTH AND FALSEHOOD

(By George F. Will)

Lies are weapons and are today the PLO's most effective weapons. Newspapers that are fastidious about the truthfulness of grocery ads print anti-Israel ads filled with patent lies about Israeli-caused casualties. The New York Times ran a particularly Goebbels-like ad signed by, among others, Noam Chomsky, who has collaborated with a French author who claims the Holocaust never happened.

Lebanon is (in Hardy's words about Leipzig battlefield) "a miles-wide pant of pain." It has been since the PLO and Syrians invaded. It is today because the PLO is hiding behind the babies that Arafat is kissing for U.S. television cameras.

It is hard to prove but easy to believe that Israel, by aiding Lebanese Christians since 1975, has saved more civilian lives than have been lost in this war. But a television screen is easy to fill. A gaggle of Iranians did it for a year, while behind the cameras Teheran went about its business. Television in war is bound to suggest more generalized destruction than has occurred. Furthermore, had there been television at Antietam on America's bloodiest day (Sept. 17, 1862), this would be two nations. Americans then lived closer to the jagged edges of life, but even they might have preferred disunion to the price of union, had they seen the price, in color in their homes in the evening.

Not Chess or Surgery: If "wired democracies" are not to be disarmed by revulsion about televised wars, they must take this truth unperfumed: Wars kill people; that is an immediate purpose of waging war. Many persons who preen themselves on their hatred of war do not hate it enough. They cannot: they know so little about it. They show this when they judge a military operation like Israel's unjust simply because it involves injustices. War is not chess or surgery. It is a leap into a realm of chance, desperation and improvisation. Confusion, unintended effects, undesired but unavoidable collateral effects—all these are expectable. It is morally immature to denounce a war because it has the general attributes of war.

It is said that a good man cannot save a nation because a good man will not do what is necessary. But that, too, is morally immature, confusing public and private duties. Begin's duties include understanding that the moral mathematics of Sadat's life ended with a positive sum because he followed military boldness with political boldness. Sadat, remembered as a peacemaker, first made war. In three weeks in 1973 Israel lost a portion of its population three times larger than the United States lost in eight years in Vietnam. Having failed to get to Jerusalem with Soviet tanks, Sadat went by Boeing 707. Begin's similar challenge is to know when he has reached the limit of his military options.

If the Begin-Sharon aim is to push all Palestinians off the West Bank and into Jordan, they risk a more irredentist Jordan. And the pushing would involve methods intolerable to most Israelis, unless they have lost their moral moorings. Begin's task is to use the threat or exercise of force to finish the PLO in Lebanon, and then make Jordan an offer it can't refuse, abandoning the chimera of "autonomy" and the dream of annexation.

The Reagan-Shultz aim is unclear. Shultz is off to a shaky start, allowing events to set for him a daunting debut: he is supposed to solve one of history's most intractable disputes. It is unhelpfully called "the Palestinian problem." It is actually the problem of Palestine. However laden the work "Palestinian" is with political connotations, it still is a classification more like "North American" than "American." It refers to a geological origin, not a political association. The noun "Palestine" denotes a definable territory, that of the Palestine Mandate of 1923. Israel and Jordan disagree about the proper allocation of a portion of that remnant of the Ottoman Empire. Only they can come to an agreement that will tidy up the mess

left by World War I. Neither Israel nor Jordan—both having fought the PLO, Jordan most bloodily—favors a PLO state on the West Bank, a state that would destabilize both Israel and Jordan, but Jordan first and Jordan most.

In the current crisis, PLO intransigence has grown proportionally with U.S. involvement, and now the United States is protecting the PLO. With words treated as though they are Cheerios, all alike, the U.S. aim has been described as evacuation, disengagement, peacemaking. The PLO had the capacity to injure but not destroy Israel, so if at the cost of military defeat it receives enhanced political status from the United States, it comes out ahead.

Maps: Israel has almost undone the mischievous work of the 1974 Rabat conference, which anointed the PLO the sole legitimate representative of Palestinians. This was an affront to Jordan. (Most Palestinians are Jordanian citizens, and most Jordanian citizens are Palestinians.) Today U.S. diplomacy, which is ineffectual without being innocuous, is resuscitating the PLO and preserving Jordan's excuse for not playing its indispensable role in any peace process worthy of the name. The PLO sits in West Beirut, holding perhaps 300,000 civilians hostage, issuing demands from behind the screen of Habib's mission.

Meanwhile, back in Foggy Bottom, the State Department may be short on realism, but has lots of maps, none of which shows any land that can conveniently be given to a "Palestinian entity." The map is even more full today than it was when Israel was shoe-horned into one-tenth of 1 percent of the land claimed by "the Arab world." That world consists of 21 nations with 175 million people and 7.5 million square miles. In the U.N. the PLO often enjoys the fervent support of 42 Muslim nations with 80 million people. But there is zero desire to make room for the PLO. So Israel is left to deal with the PLO, that creation of Arab hypocrisy and Western appeasement. And Israel still waits for Jordan and Saudi Arabia, two crucial nations of recent and problematic origins, to acknowledge Israel's legitimacy.

Persons far from the theater of menace and violence, persons making fine moral calibrations about Israel's conduct and fretting that Israel is "losing its soul," must hear Golda Meir's words: Jews are used to collective eulogies, but Israel will not die so that the world will speak well of it.●

LEGISLATION TO REFORM THE SOCIAL SECURITY REVIEW PROCESS

HON. SILVIO O. CONTE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 11, 1982

● Mr. CONTE. Mr. Speaker, I rise to introduce legislation to correct inequities in the social security disability review process. This legislation would reform the present system in three ways:

(1) It would slow down the continuing disability investigations (CDI).

(2) It would continue the payment of benefits through the first face-to-face hearing.

(3) It would require that medical improvement be shown before the disability benefits are stopped.

I have introduced this legislation because I feel that although the intention of the review process was good, this stepped-up pace has not achieved its goal. The need for a review process is obvious.

In late 1980, the General Accounting Office published a report which indicated that 20 percent of the persons receiving disability benefits under title II and title XVI were not entitled to those benefits. In an attempt to end this apparent waste and fraud, the Commissioner of the Social Security Administration, under the current administration, mandated that the date for commencement of reviews be moved forward 10 months, causing the investigation and review process to begin on March 1, 1981, as opposed to January 1, 1982.

In the original plan, each State disability determination office would be reviewing approximately 140,000 cases at their discretion. With this new timetable, however, the caseload was increased to 520,000. Few of the State offices were equipped to handle this new load and when the investigation date was stepped up, the offices remained unequipped. As a result of this unfortunate situation, many of those who were entitled to benefits were mistakenly taken off the rolls. In New York State alone, at least three people committed suicide when they received their termination notices.

The minds of the people of America must be put at ease. They must know that we, in Congress, are concerned about their welfare and that we will do everything possible to put an end to this injustice before many people are affected. The Congress must set up some parameters to explain how these reviews should be carried out.

The figures which prove the need for a change are obvious. Of the 50 to 60 percent of the terminated cases appealed by persons involved, a full 67 percent of these were overturned, as compared with an average of 20 percent in years past.

The legislation which I have introduced is similar to that which Senators RIEGLE, METZENBAUM, and KENNEDY have introduced in the Senate. I urge my colleagues to recognize the importance of this legislation and to give it their full support.●

THE FLAT-RATE TAX

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 11, 1982

● Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington

Report of August 11, 1982, into the CONGRESSIONAL RECORD.

Should the current federal income tax be replaced with a so-called "flat-rate" tax? This question has been asked and discussed in every public meeting I have held in recent weeks. Interest in such a tax is strong, so the facts and ideas at issue must be clearly understood.

The federal income tax has been progressive for the nearly 70 years of its existence. The basic notion behind this progressive feature is that a person should be taxed according to his ability to pay—an ability which increases with income. Statistics show just how progressive the income tax is. In 1979, for example, the average tax in each bracket, expressed as a percentage of adjusted gross income, ranged from 3.5 percent for \$4,000 in income to 50.2 percent for \$1,000,000. Despite the well-publicized exceptions, a person usually pays a higher rate of tax the wealthier he is. The second central feature of today's tax code is the vast array of breaks that cut taxable income and tax collections. The basic notion behind these breaks is that the tax code should be used to achieve worthy goals: churches benefit from a deduction which encourages donations; investors want an advantage for capital gains; working parents need a break for child care. Despite the reports of loopholes, specific breaks are popular.

Proponents of a flat-rate tax criticize these two features of the federal income tax. Multiple brackets and scores of breaks make the tax code very complex. The basic filing requirements are confusing to, if not beyond the comprehension of, most Americans. "Bracket creep" occurs when one moves into a higher bracket without a rise in purchasing power. It is a result of multiple brackets in an inflation-ridden economy. Tax breaks erode the base of taxable income to such a degree that rates on that base must be kept high. Cutting the rates without enlarging the base only leads to bigger deficits. Tax avoidance and tax evasion are growing more common. Pushed on by high rates and the sense that they are carrying the burden for those who cheat and exploit the tax code, millions of otherwise honest taxpayers are increasingly willing to bend or break the law.

The flat-rate tax is proposed as a remedy to these problems. The simplest proposal is to end all breaks while replacing the progressive system of 12 rates with a single rate. A rate of 12 percent on the wider tax base would yield as much revenue as we have today. Few proponents of a flat-rate, however, have anything this radical in mind. Most proposals would exempt low-income families from tax and would leave several popular tax breaks in place, at least for a time. Some would build in progressivity by having two or three rates. These variations would have a tax rate higher than 12 percent.

Proponents of a flat-rate tax lean heavily on two arguments to make their case. First, they say that a flat-rate tax would bring simplicity to one of the most important contacts between citizens and government: all tax forms could be replaced by a postcard. This simplicity would make it easier for every taxpayer to understand and carry out his duties under the tax code. People would be confident that others were paying their share. Tax collection would be improved. Also, proponents say that their proposals would give the economy a boost. The low tax rate would encourage saving, risk-taking, and hard work. Money would be

drawn out of unproductive tax shelters and would be put to better use. Energies now being channeled into tax avoidance would be released for more useful purposes. These arguments are disputed by some of the experts, but they must be faced.

A striking thing about a flat-rate tax is the interest it has sparked. President Reagan called it "tempting". Liberals and conservatives in both parties have declared for it. It is supported by some experts who advise the government of taxes. The idea of such a tax is old, so we may ask about this interest. Deficits are making government think about raising revenue without raising tax rates. Last year's tax act—which aided the rich at the expense of the middle class and poor, had little effect on productivity, and set up new breaks—is prompting a review of tax policy. The principal factor behind the interest may be frustration—with the complexity of the tax code, with people who "work" the code for their own benefit, and with the performance of the economy.

The present federal income tax is defective, and I want to see a simpler system of taxation which would help the economy. As we study a flat-rate tax, however, we must answer these questions:

In regard to income taxation, the idea of fairness most Americans seem to accept is the one embodied in the tax code (as a person's ability to pay taxes increases with income, so does his duty). Would Americans' interest in a flat-rate tax be as strong when they began to consider that it is based on an entirely different idea of fairness (a person's duty to pay taxes is always proportionately equal to everyone else's)?

Studies show that the entire tax system (including property, payroll, excise, sales, and other taxes) is roughly flat-rate. The federal income tax is about the only progressive element. If this progressivity were removed, those with less wealth would pay a greater share of it in taxes overall. Would Americans favor this result?

The issues of progressivity and complexity are distinct. A progressive tax can be simple if it has few breaks. Progressivity adds little complexity. Would Americans sacrifice it for simplicity if the sacrifice were not necessary?

Under some of the flat-rate tax proposals, the average poor or middle-class family would pay more tax while the average rich family would pay less. Would Americans want such a redistribution?

The tax breaks currently on the books are embedded in the economy. They play a key role in determining the value of housing and many other items. Would a sudden change in the value of these items have an adverse effect on the economy?

Remembering the fragility of the economy and the impact the tax code has on it, the President and Congress should proceed with caution.●

INTRODUCTION OF CONCURRENT RESOLUTION ON KKK

HON. WILLIAM H. GRAY, III

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 11, 1982

● Mr. GRAY. Mr. Speaker, over the past few years, we have witnessed the disturbing resurgence of racially motivated crimes across this Nation. Con-

tinually, we hear of reports—from Connecticut to Florida, from California to Georgia—of cross burnings, anti-minority marches, sniper attacks, random destruction of private property, and other incidents.

These crimes have directly coincided with the resurgence of activities of various racially oriented hate groups, particularly the Ku Klux Klan. And according to the reports that I have seen, a great deal of these crimes have been instigated, if not committed, by the Ku Klux Klan.

According to a recent report of the Southern Poverty Law Center's (SPLC) Klanwatch program—the most comprehensive in the country—1981 was one of the most active years since the middle 1960's for Klan activity. At least 300 incidents involving harassment and intimidation were believed committed by Klan members in 1981. Not since the 1960's has there been a comparable nationwide outbreak of violence, intimidation, and harassment by the Klan.

The Anti-Defamation League of B'nai B'rith has estimated that there are nearly 12,000 active Klan members throughout the country—an increase of over 65 percent since 1975. And while this membership is much smaller than Klan strength of earlier periods, the violence it represents and their potential for growth create an ever-present danger to the thousands of law-abiding American citizens who have been targeted for intimidation and violence by the group.

More importantly, Mr. Speaker, given today's atmosphere of hard economic times and the sharp swing of the pendulum to the political right, I am afraid that there exists an environment in which a KKK can thrive.

That is why, Mr. Speaker, today I am introducing a concurrent resolution calling upon the Justice Department to "vigorously" seek out and prosecute those members of the KKK who violate the civil and constitutional rights of others. I think that, at this juncture, it is imperative that the Congress, and indeed the Nation, be on record as opposing the violence and racial hatred that has been endemic and characteristic of the Klan.

Many might question the need for such a statement by the Congress, given the progress that the cause of equal rights has achieved over the past 20 years.

However, the Reagan administration is the first in modern times which is clearly committed to halting that progress and rolling back those hard-won gains. In virtually every action, appointment, and policy decision in the area of civil rights, this administration has sought not to build on the last 20 years of civil rights gains, but has instead launched the greatest re-

treat in the fight for equality in the past half century.

It is quite clear to me that the Congress should not and cannot sit idly on the sidelines while this administration ignores and repudiates those laws it is sworn to uphold by declining to enforce them, and refusing to follow court decisions and mandates.

On such issues as equal opportunity in education, equal job opportunity, tax exemption for segregated schools, and voting rights, the administration has sought to turn the clock back to a darker time.

So blatant has this administration's failure to actively pursue civil rights compliance become, that last December, some 200 civil rights lawyers and other employees within the Justice Department signed an open letter to the Attorney General protesting his policies regarding the Department's lax enforcement of our civil rights laws.

The Klan has blatantly thrust itself prominently into the public eye. And while the Klan continues to use violence, harassment, coercion, and intimidation against people belonging to various minority groups, it also seeks to justify these actions to the American public by exploiting such controversial issues as busing, affirmative action, and anxieties over crime and inflation.

While these are certainly legitimate issues, having legitimate varying points of view, we must not be confused by the Klan's apparent new sophistication and renewed interest in the political process.

The Klan has, and always will be, an extremist, fraternal society, which is dedicated to the proliferation of racism in our society. I need not remind my colleagues that in the 1950's and 1960's Klansmen bombed churches, beat integration-minded bus riders, and shot civil rights workers in Mississippi. Nor need I remind you that in the 1920's Klansmen raped countless numbers of black women in the South, while beating and often-times lynching their black men at the same time. I think the history books clearly point to the sadistic and racist nature of this organization. Equally clear however, is that such activity should not, and cannot, be tolerated in our society today.

Klan resurgence nationally has also led to another critical phenomenon, namely, Klan infiltration of the U.S. military. Over the past few years, reports of Klan recruitment as well as Klan-instigated violence on military bases and installations has become widespread. Although the U.S. Constitution provides for the protection of free speech and association, there is no room in our military for organized racist activity among the ranks. Nor is there any room in the military for internal violence among members of our

Armed Forces. And while the military hierarchy has publicly denounced organized racist activity in the military, it is important that the Congress again be on record as opposing such activity, as well as urging the Department of Justice, in concert with the Department of Defense, to ferret out all racially motivated activity aimed at violating the civil and constitutional rights of members of the Armed Forces.

I am particularly concerned about another sad, but real, consequence of the resurgence of such extremist groups as the Klan: the racist indoctrination of children. In Decatur, Ala., in 1979, members of the Klan Youth Corps burned a school bus while their adult Klan counterparts cheered them on at an antibusing rally. In Durham, N.C., that same year, a cross was burned at halftime, during a football game between black and white schools. In Largo, Fla., September 1980, a youth was arrested for a cross-burning incident while wearing a robe lent to him by a Klan member. Literature is circulated in junior high and high schools throughout the country, to belittle and threaten minority students and school administrators while seeking recruits for the Klan Youth Corps.

These children who are taught to be racist, and those who unfortunately are the subjects of that racism, are the same children that will one day be our leaders. We cannot allow our young people's respect for the rights of our Nation's peoples and their unique cultures be undermined.

My colleagues might question the need for such a proposal. For sure, there are nearly 230 million Americans who have no affiliation with the KKK whatsoever. However, Mr. Speaker, those remaining 12,000 or so that are affiliated with the KKK pose one of the most serious threats to the very fabric of today's society, as we know it.

It is for these reasons that I issue this call for action. Unless immediate action is taken to monitor more closely, and prosecute more vigorously, such violations, this country may find itself entering the most turbulent and devastating decade of its history.●

JONATHAN BINGHAM

HON. GERALDINE A. FERRARO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Ms. FERRARO. Mr. Speaker, I am proud to join my colleagues tonight in saluting a man who for 18 years has been a friend of the needy, a champion of human rights, a defender of the environment, and a leader in the cause of world peace.

When JACK BINGHAM came to Congress in 1964, he had already compiled

an impressive list of accomplishments. Following his service in the U.S. Army during World War II, he had gone to work at the State Department, rising to become Assistant Director of the Office of International Security Affairs. He served as Secretary to Governor Averell Harriman for 4 years before he became a member of the U.S. delegation to the United Nations, where he became chief advisor to U.S. Ambassador Adlai Stevenson.

The influence of those two great men, Governor Harriman and Ambassador Stevenson, was clear in JACK's work when he came to Congress in 1964. He applied simple commonsense to the problems facing the Nation, and was constantly guided by a devotion to decency, fairness, and peace.

This basic fairness and commonsense that have marked his tenure in Congress have been on display in the campaign to achieve a freeze on the production, testing, and deployment of nuclear weapons. In the midst of all the complicated and contradictory debate over how best to achieve the universal goal of reducing the threat of nuclear war, JACK BINGHAM stated the case simply and eloquently. He said: "The way to stop the arms race is to stop it."

As chairman of the Foreign Affairs Committee's Subcommittee on International Economic Policy and Trade, JACK, has assumed a leading role in trying to improve trade relationships between the United States and other Western industrialized nations, as well as finding new approaches for increasing economic activity with developing Third World nations.

But perhaps his greatest contribution has been in the area of controlling the proliferation of nuclear weapons. The development and enforcement of international agreements limiting the shipment of nuclear fuel and equipment only to countries accepting full safeguards has been a major concern of Congressman BINGHAM's, and we all owe him a debt of gratitude for his persistent leadership in this fight.

The people of New York City, of the United States, and of the world are better off for having had JACK BINGHAM in Congress. The House will be the worse for his leaving. I want to join my colleagues in wishing him all the best in his future endeavors.●

HON. JONATHAN B. BINGHAM

HON. FRANK HORTON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. HORTON. Mr. Speaker, let me first extend my thanks to my good friend and colleague, JOE ADDABBO, for taking this special order today. By taking this time, he has given his New

York colleagues in particular, but also all Members of the House, the opportunity to pay tribute to a colleague who has served this House ably and effectively since his first election to the 89th Congress in 1964.

As a Member of the 88th class, I have known JONATHAN BINGHAM throughout his congressional career. His contributions in the field of foreign affairs, through his membership on the House Foreign Affairs Committee, are both numerous and well known. His ardent advocacy for universal human rights stands as one of his greatest achievements.

His expertise in foreign affairs is matched only by his work on the Interior and Insular Affairs Committee. I recall his hard work on the legislation I and former Congressman Holifield sponsored establishing the Energy Research and Development Administration. Jon argued forcefully for an equal emphasis by this forerunner to the present Energy Department on all forms of energy, conventional and nonfossil.

I join my many colleagues in wishing a good friend and colleague the best as he prepares to retire. JONATHAN BINGHAM's many fine qualities and accomplishments will long be remembered.●

QUICK ACTION NEEDED ON UNEMPLOYMENT BENEFITS

HON. JOHN F. SEIBERLING

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 11, 1982

● Mr. SEIBERLING. Mr. Speaker, I am submitting for printing in the RECORD a letter which expresses more compellingly than I ever could the urgent need for Congress to restore the safety net of unemployment benefits for those thrown out of work by Reaganomics.

The House may soon consider legislation providing an extra 13 weeks of Federal supplemental benefits to unemployed workers who have exhausted both their regular State unemployment benefits and the first 13 weeks of FSB. I strongly support the 13-week extension, and am pleased that the Senate also recently agreed to an amendment by Senator METZENBAUM supporting the 13-week extension.

But a serious obstacle must be overcome before many unemployed workers can benefit from this extension. A provision in Gramm-Latta II will make it impossible for Ohio and many other States to qualify for FSB as of September 25. If that provision is not changed, unemployed workers in those States could not get any unemployment benefits after their first 26 weeks—not the first 13 weeks of Federal supplemental benefits, and not the additional 13-week extension now under consideration.

Mr. Speaker, with our Nation facing the highest unemployment since the Great Depression, I hope that Congress and the President can work to restore a real safety net for those unable to find jobs today.

The letter follows:

AUGUST 2, 1982.

Congressman JOHN SEIBERLING,
Member of Congress,
Washington, D.C.

SIR: I am writing this letter to get a reaction from you concerning a problem that myself and thousands of other Ohioans are facing right now.

Until November 15 1981, I was employed by the General Tire and Rubber Company here in Akron. On that date I was laid off. On August 15, 1982 my 39 weeks of unemployment compensation is up. Because the federal government has refused to grant a 13 week extension of benefits, on that date I won't have a penny coming in.

Because of the economy and the way your president has decided to run it, I have lost everything I have ever owned. My wife, my house, all my furniture and my car. The only thing I have left now is my son, and on August 15, 1982 I'll lose him to because I have no money coming in and can't get a job.

I served your country for 10 years in the Army. There were times I could have given my life for this country but luck was on my side. Now, when I need help, this country has turned its back on me. It can loan billions of dollars to foreign countries, give grain to the Soviet Union so everybody over there will eat, but it can't help me with a 13 week extension of unemployment benefits, when I'm in their shape because of your government.

I have just one question, why? Why has this country turned its back on me and thousands of others like me?

I really don't expect an answer, and besides, I have already lost everything I ever had, so it's probably too late for me. But there are thousands of others who need your help, I only hope you attempt to help them before it's too late for them too.●

COMMENCEMENT ADDRESS OF AMBASSADOR W. TAPLEY BENNETT, JR.

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 11, 1982

● Mr. DERWINSKI. Mr. Speaker, Ambassador W. Tapley Bennett, Jr., the U.S. permanent representative to the North Atlantic Treaty Organization (NATO) recently addressed the graduating class of the University of Southern California of the Frankfurt, Germany, campus. Ambassador Bennett delivered a very stirring speech on the prospects of peace and the U.S. commitment toward defending freedom and stability in the world. I wish to insert this address of June 12 for the Members' reading:

REMARKS OF AMBASSADOR W. TAPLEY BENNETT, JR., PERMANENT REPRESENTATIVE OF THE UNITED STATES OF AMERICA TO THE NORTH ATLANTIC TREATY ORGANIZATION, AT THE COMMENCEMENT EXERCISES OF THE UNIVERSITY OF SOUTHERN CALIFORNIA, FRANKFURT, GERMANY, JUNE 12, 1982

FOR PEACE IN FREEDOM

It is a great privilege and honor to be invited to address these commencement ceremonies. I am very pleased to be here. It occurs to me that in many ways today's event is unlike a university graduation in the United States itself. Here, of course, as at hundreds of campuses in the US this month, academic achievement, dedication, and hard work are recognized and rewarded. But here, different from home, the participants in this ceremony and their families and friends are already a select group in another way. Living and serving overseas, you are representing the best traditions of the United States to other nations—and you are contributing very directly to the maintenance of peace and stability in today's world.

OVERSEAS SERVICE AND AMERICAN VALUES

As you know, service overseas can be personally very rewarding. It can also be very difficult. Contrary to the popular saying, for instance, diplomats are not individuals "sent abroad to lie for their country". However, many people still seem to think so, and to respond with suspicion. Similarly, life for the military overseas is not all roses, as I have had occasion to observe on numerous visits to exercises and facilities in Germany and other countries of the Alliance. Moreover, the unusual problems of overseas life are not always fully appreciated by those at home.

But, as I have learned in several decades of foreign experience, work overseas does tend to remind those of us who are engaged in it of the values, characteristics, and objectives of the American society which we represent. The principles of democracy and pluralism were, for example, very much on my mind in my first Ambassadorial mission, some 20 years ago in the Dominican Republic, at a time when democratic institutions in that Caribbean island state were under tremendous pressure from all directions, and finally exploded in violent revolution and murderous civil strife. We were able to put things back together—to help a sister nation back onto the path of democratic government, and today the success of Dominican democracy seems to be taken for granted. The recent election and the peaceful change in the presidency produced little press attention—but things were not always so easy. That was where I first saw the sign "Yankee Go Home" painted on a wall. It didn't bother me. First, since I'm from Georgia, I knew they weren't talking about me. And I also noticed—below the sign "Yankee Go Home", someone had come along and painted "And Take Me With You."

Today I am very conscious of our particular values and history in my daily work at the headquarters of the North Atlantic Alliance in building consensus to secure peace in freedom. No matter all the problems we face today, there is a core of basic interests and values among the North Atlantic countries which holds us together, and there is the same understanding now, as more than thirty years ago, that political unity is the indispensable ingredient in providing military security.

We have, of course, another advantage in Brussels, which results more from carpentry than from diplomacy. That is, we have a round table, like King Arthur. All seats are automatically equal, and there are no possible arguments over protocol. People are left with no recourse but to get down to business. I shudder to think what would have happened if we had gotten involved in one of those famous arguments over the shape of the table, which were so prominent for example in the Vietnam negotiations. Can you imagine the number of possible designs to accommodate fifteen nations? And if we had been able to come up with a geometric Rubik's cube solution, there would have been no way of redesigning it in time to accommodate our newest and sixteenth member, Spain, which just two weeks ago took its place in the Alliance, an evidence of the vitality and attraction of NATO today. The round table reflects the reality and strength of the Alliance: we are a community of sovereign nations, with different views and different traditions, joined together for our common security. We don't operate with a single voice as in the imposed unity of the Warsaw Pact to the East—sometimes we don't even sing the same tune—but overall there is a harmony among the many voices around the table—and in the fact of our unity.

THE UNIQUENESS OF AMERICA

Within the Alliance, and indeed anywhere in the world today, the United States is unique among modern nations. It is not a homogeneous ethnic "nation"; it is not the heir to some historic monarchy or empire; it is not a unified religious community; it is not a single linguistic group; it does not have a particular cultural tradition stretching back several millennia. Indeed, we have within our borders more variety and innovation than in the rest of the NATO Alliance combined.

The United States represents an act of will. Its creation by a remarkable generation of men and women was a conscious effort. And we continue today, ever striving, ever yearning, ever seeking higher ground and a better path for all humankind.

New York City, where I served six years at the United Nations, is the most truly heterogeneous and cosmopolitan city in the world. In connection with that primal urge to feed oneself, you can eat everything in New York, from Japanese sushi to German bratwurst, from Spanish paella to Moroccan couscous, from Chinese won ton soup to Russian borscht—not to mention British lambchops or Kansas City prime beef. This gastronomic richness of course poses a serious threat to your waistline if you work at the United Nations. Some of my more athletic colleagues were even driven to exercise. For my part, I find remarkable satisfaction in watching someone else jogging. I belong to the school of Robert Benchley, who wrote that whenever he felt the urge to exercise, he carefully lay down until the feeling passed away.

Despite our great variety, and our unique historical origins, there is no question that we are a nation. Both Americans and foreign observers agree, and have agreed since de Toqueville's visit in the 19th century, and even earlier, that there is something distinctive about the American character and outlook. There is an openness to new people and new ideas, a positiveness in approaching problems, a confidence in the ability of people to work together to overcome almost any obstacle. Indeed, some of our more cautious and traditional friends sometimes find

us too informal, too confident. At times they would doubtless feed us pessimism pills if their chemists could invent them.

These American qualities were developed by the people themselves, by virtue of common experience and conviction. We have no authoritarian state which imposes a unity of views. On the contrary, the free-wheeling structure of our society and economy, and the open nature of the American political system, with its federal structure, its weak party organization and emphasis on the role of individual senators and congressmen; the deliberately established balance of power between legislative, executive, and judicial branches; the vigor of the press and other public institutions—including especially our great universities—virtually ensure the maintenance of pluralism.

This very pluralism is an essential part of that strikingly special American character. Indeed, at times it makes it difficult for us to deal with societies steeped in age-old customs. We assume that people with different backgrounds and ideas will be able to cooperate for common purposes because we have achieved such cooperation in the US. We assume that peaceful social change and democratic politics are possible in a society with many different groups because of our own successful experience, which has had to overcome divisions deeper than those which often seem so intractable in many other countries.

I recently saw a report of an international opinion survey comparing some twenty-six countries, which underscores the unique character of Americans, even within our own diversity. Eighty percent of the Americans said they were proud to be a citizen of their country, while only minorities in other countries responded with that pride in their own societies. The citizens of the US were by far the most prepared to fight to defend their country—some seventy percent of Americans said they would, whereas only minorities would in other countries. The citizens of the US also had more confidence in their institutions, and claimed to be among the happiest, although the Irish took top marks in that latter category—which should not surprise anyone who knows the charms of the Emerald Isle. Also of interest, Americans reported themselves to be by far more religious than citizens of other countries in the poll. While I hesitate to put too much weight on the specifics of a particular poll, the broad characteristics shown here do underscore both the strengths and the uniqueness of the country which we represent. We are an optimistic people—by nature and by experience. When mountains get in the way, we move them.

THE UNITED STATES AND THE WORLD

Americans have traditionally focussed most of their energies and interests inward. From the time of George Washington's admonition against "entangling alliances", there has been a caution about world involvement and a preference for domestic concerns which has never totally disappeared, even today in a period of great and necessary interdependence among the peoples of the world.

At the same time, when the US has involved itself with the outside world, it has done so with extraordinary commitment, enthusiasm, and sense of purpose. Active American engagement with the world goes back to the earliest days of the republic. Our diplomacy traces its origins to Benjamin Franklin, whose mission to Paris was instrumental in obtaining support for the thirteen colonies in their struggle for inde-

pendence. Our major role in world trade goes back to the days when the new republic was exporting everything from southern cotton to New England ice—this latter a brilliant commercial idea in the days before mechanical refrigeration, and something of a logistical feat in delivering it unmelted to tropical ports. Technologically, just as American commercial aircraft have revolutionized transportation in the twentieth century, so too the American clipper ship was the acknowledged leader in world commerce in the days of sail. And just as our concerns today turn to the protection of international trade and resources, so too some of our earliest conflicts had to do with our trading activity, from the Caribbean and Europe to the Barbary Coast of North Africa. Our concern with restricting outside intervention in the Americas, as today in Central America, has parallels all the way back to the early 19th century and the proclamation of the Monroe Doctrine. Our efforts to establish a code of international conduct continue today—as in the effort to compel the Soviet Union to act with restraint and responsibility in today's dangerous world. The challenges have become very much greater.

American engagement has not always been successful in extending our view of a world based on freedom and individual opportunity. The World War I slogan about "a war to make the world safe for democracy" turned to bitter irony with the rise of new and aggressive dictatorships in the 1920s and 1930s. But over the course of the last fifty years we have been quite successful, although at great human and material cost, in shaping a world order in which our ideals can thrive. The list of institutions which we have had a major role in establishing, and on which the free, open, dynamic world structure depends, is itself impressive testimony to our energy and our initiative: the United Nations; the World Bank; the International Monetary Fund; the Organization for Economic Cooperation and Development (originally responsible for the Marshall Plan which restored Western Europe after World War II); the General Agreement on Tariffs and Trade. Perhaps the single most significant of all these institutions, in shaping the peace and ensuring the structure of global prosperity, has been the North Atlantic Alliance—NATO.

THE NATO ALLIANCE

Our present commitment in Europe is the largest, the most important, and the most durable international involvement we have ever undertaken as a nation. It reflects the recognition that a sporadic involvement at times of crisis, as in the two devastating World Wars of this century, is inadequate to protect the peace and secure American and Western interests in an age of totalitarian power and atomic weaponry. Our membership in the NATO Alliance, which is the essential operative expression of that commitment, represents a lasting decision of principle, with all of the advantages, responsibilities, and difficulties of a long-term relationship. One of Groucho Marx' classic lines was: "I wouldn't join any club that would have me for a member." NATO, however, is one club that we are extremely proud to have joined, and we rather believe the other members are pleased with our mutual decision.

Only two days ago the NATO chiefs of state and heads of government met in Bonn to review the state of the Alliance and the problems facing us for the rest of the 1980s.

This was an extremely important opportunity for President Reagan to meet with his colleagues, to hear their views, and to set forth our concepts for the future, for a peace in freedom. It was a most productive and successful gathering, and we are deeply grateful to our German hosts for the efficient and hospitable arrangements.

One of the things underlined by the Summit in Bonn is that the US-European relationship is not temporary. Despite the surface arguments—and we do have them—the Bonn Summit reaffirmed most strongly the essential unity of views on the international situation and the importance of the trans-Atlantic tie. In particular the Summit highlighted the vital contribution made by US forces in Europe. I am personally convinced that US forces in Europe are and will remain an essential element of Western and US security for the foreseeable future. As President Reagan said at Bonn, NATO remains the foundation of American foreign policy, and there will be no unilateral withdrawal of US troops from their European commitment. There is no other structure or formula which could replace the stabilizing and deterrent function of numerically significant and highly capable US forces in place on the continent.

Nor is there any need, it seems to me, to change the fundamental basis of Alliance strategy. We have all read the arguments of those who question flexible response, the deterrent role of nuclear weapons, or the need for an increased conventional effort. But nothing in the present debate changes two basic facts:

First, NATO's deterrent strategy, based on the combination of the conventional and nuclear elements of our forces, has kept the peace successfully for over three decades. A distinguished European said not long ago: "Europe in all its long history has seldom known peace and has never known prosperity. For the last three decades it has had both." This is due to NATO in large part.

And second, that in the presence of excessively large and rapidly modernizing Soviet conventional and nuclear forces, it would be irresponsible madness for the West to give up any element of its forces or its strategy. We can well ponder the words of a Soviet diplomat at Geneva recently—"We Soviets are neither idealists nor philanthropists."

As agreed at Bonn this week, we need to improve all elements of our own forces. And we need to pursue efforts to bring the Soviets to reduce their forces through realistic arms control. We cannot disarm unilaterally—as some naive critics suggest. That would be an invitation to aggression. It would, moreover, destroy any hope of inducing the Soviets to negotiate.

It is a source of great concern to me, and I know it must be puzzling to you, that there is so much ignorance in the current debate on nuclear weapons, NATO, and the relations with America and the Soviet Union. It is almost as though the so-called peace movement had no inkling of how peace broke down in Europe in the 1930s; how it was restored; and how it has been maintained. However, the uninformed criticism that we hear, shrill as it may be, is the view of a small minority. The polls continue to confirm, and Allied governments continue to demonstrate, that the overwhelming majority in all Alliance countries remains convinced that collective security in NATO is the only way to preserve peace and protect their interests. The percentages in the polls consistently run in the seventies, even in countries where specific programs, such as nuclear weapons, cause concern.

We in the West defend the right of people to demonstrate—which is not the case, of course, with the Soviet Union or the countries it dominates by force, including East Germany and Poland, where martial law was imposed at Soviet instigation. At the same time, we expect those who demonstrate to respect the rights of the majority, and the basic principles of the peaceful democratic process. I recently had occasion in Hannover in some give and take with peace group representatives to remind them now lucky they are to be on this side of the Wall. I asked them how long they thought they would be allowed to demonstrate in Moscow, Warsaw or East Berlin. They had no answer, although one or two did have the courtesy to swallow hard.

CONCLUSION

You who are graduating today have every reason to be confident that the values of freedom and individual opportunity which have characterized the United States for over two centuries, and which underlie the alliance of Western nations, will continue to prevail. As always, their preservation will require the dedication of men and women in many countries, in civilian and military pursuits alike. The attraction of those values is such that new recruits are constantly coming forward, while individuals flee those states which impose ideological straitjackets, require subservience to governing elites, and move for the suppression of individual and national identities. Over walls and through minefields, the traffic is all in our direction.

The future is with freedom. You and I have the high privilege of being directly involved in defending that freedom. Let us defend it with courage, with devotion and with dignity.●

ECONOMIC PROBLEMS IN NORTHERN IRELAND WORSEN

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 11, 1982

● Mr. BIAGGI. Mr. Speaker, as chairman of the 127 member bipartisan Ad Hoc Congressional Committee for Irish Affairs, I remain deeply concerned about those factors which are standing in the way of an eventual political peaceful solution to that war torn land.

One of the most chronic of all problems revolves around the deteriorated economy of the north. New figures have just been released which show that unemployment in the six counties of Northern Ireland is at a record 21 percent. Among men in the north the figures translate into the fact that 1 out of every 4 is presently out of work.

As has been the case for years—unemployment in the minority Catholic areas of the north runs far higher than the national average. The town of Strabane which is heavily Catholic is again the area with the highest unemployment rate of 37.4 percent.

Economic problems run deep throughout Northern Ireland still another indication of the ineffectiveness of the British policy of direct rule over

Northern Ireland. Their control over Ulster has been economically, socially, and politically regressive and the policy as presently constructed can never work.

I remain convinced that the United States has a role to play in the peace process for Northern Ireland. I believe one of the ways we can be of most value would be with economic assistance directed at areas in greatest need. To that end last December I introduced H.R. 5163 a bill providing first time U.S. economic assistance to Northern Ireland. The funds under my bill would be controlled exclusively by our Government and would be sent into areas where economic problems are most acute. The funds would be used for economic relief and rehabilitation assistance for the North.

In light of the worsening economic conditions in Northern Ireland I am hopeful that there can be swift movement on my bill for the aid it provides is desperately needed by Northern Ireland and it would represent a tangible commitment on the part of the United States for the cause of peace and justice in Northern Ireland.●

REPRESENTATIVE JONATHAN BINGHAM WILL BE MISSED

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 11, 1982

● Mr. MARKEY. Mr. Speaker, few Members are recognized as preeminent foreign policy experts in this Chamber. Congressman JACK BINGHAM is one of those Members.

Since his election to the House 18 years ago, Congressman BINGHAM has established a reputation as one of the most thoughtful and reform-minded Members of this body. He is a recognized authority on what might well be the ultimate issue this world faces.

I am speaking of nuclear proliferation.

Mr. Speaker, the detonation by India of a nuclear device in 1974 revealed what this Nation and other nuclear suppliers nations had too long ignored: The line between peaceful nuclear power and atoms for war can be easily crossed.

As a result Congress began reconsidering the nuclear marketeering this Nation had practiced for the previous 20 years. That congressional concern culminated in 1978 with the Nuclear Nonproliferation Act. JACK BINGHAM was a principal author of that act, which clearly established the United States as a nonproliferation leader of the world.

And even to this day, as chairman of the International Economic Policy and Trade Subcommittee, the gentleman from New York is fighting to see that

the letter and spirit of that law is maintained.

It has been an honor for me to work with Congressman BINGHAM on non-proliferation issues and to learn from him. In particular, his leadership in the nuclear weapons freeze and reductions resolution proved crucial in guiding that measure through the House Foreign Affairs Committee and on the House floor.

I wish JACK BINGHAM all the best in his future endeavors. I know I speak for all Members in saying that his retirement will leave a large void in the House.

We will all miss him.●

NUTRITION RESEARCH AND INFORMATION

HON. DOUG WALGREN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 11, 1982

● Mr. WALGREN. Mr. Speaker, on June 23 the Subcommittee on Department Operations, Research, and Foreign Agriculture, chaired by GEORGE F. BROWN, JR., and the Subcommittee on Science, Research and Technology, which I chair, held a joint hearing on the Federal commitment to human nutrition research. The purpose of the hearing was to emphasize the need to stimulate human nutrition research, to develop a better understanding of the relationship between food, nutrition, and health, and to transfer the knowledge base and technology to the scientific community and the public.

This hearing was held on the anniversary of the subcommittees' hearing last June which prompted DHHS and USDA to submit the long overdue joint implementation plan for a comprehensive national nutrition monitoring system in September 1981. Thus, a portion of the hearing was devoted to reviewing the progress DHHS and USDA have made toward accomplishing the milestones established to guide the effective implementation of the plan.

Nutrition monitoring is the foundation for expanding our nutrition and health knowledge base. It is essential for insuring the safety and quality of the food supply and for assuring that the nutritional needs of the public are being met. Such information is also needed by Congress and other policymakers for planning nutrition research strategy and for establishing program priorities consistent with budgetary constraints. Yet, the subcommittees learned that the OMB, under the auspices of the Paperwork Reduction Act, has delayed or disapproved several surveys which are an integral part of the implementation plan.

Our colleague, PAUL SIMON, was the lead witness for this joint hearing on

nutrition research. He reiterated the concern that the statistical policy of the Federal Government is weak and fragmented. The broad concern that the United States lacks a coordinated and comprehensive information policy led GEORGE E. BROWN, JR. to introduce the Information Science and Technology Policy Act of 1981 which is currently before the Science, Research and Technology Subcommittee.

As Mr. SIMON pointed out, the failure to implement the national nutrition monitoring system in a timely fashion is evidence of a weak Federal statistical policy. Mr. SIMON believes that a solid information base is vital for effective decisionmaking and argues that the Federal Government is not fulfilling its responsibility to advance our knowledge of the state of our nutritional well-being in our Nation. Mr. SIMON eloquently developed those points in his testimony before the subcommittees.

Mr. Speaker, I would like to share Mr. SIMON's statement with our colleagues by submitting it for the Record.

The testimony follows:

TESTIMONY OF HON. PAUL SIMON

Mr. Walgren, Mr. Brown, thank you very much for inviting me to testify before your committees today. I commend you for holding this hearing, as a demonstration of Congressional commitment to a National Nutrition Monitoring System.

I realize that today is an anniversary hearing—that this time last year, you held a similar hearing to obtain a commitment from USDA and HHS to submit to Congress an implementation plan for a Comprehensive National Nutrition Monitoring System, as mandated by Congress in the Farm Bill of 1977. Although a plan was submitted last September with a schedule of events, it seems that there has not been adequate progress in carrying out this plan. This leads us to be concerned that the current Administration does not place high priority on nutritional research.

I am here today to lend an additional Congressional perspective in addressing the importance of a National Nutrition Monitoring System. The achievement of such a system has implications which go beyond the thorny methodological issues of combining the Health and Nutrition Examination Survey of HHS with the Nationwide Food Consumption Survey of USDA. Beneath the controversy surrounding the National Nutrition Monitoring System are several themes which emerge. In my view, these underlying themes all relate to the role of the federal government in collecting and disseminating information about the U.S. population.

First, the federal government is in a unique position to take leadership in advancing our knowledge about the human condition—in this case, nutrition and its effects on health. The challenge here today is to ask, "How can we best study the nutritional and health status of the U.S. population?" Given the enormity and complexity of the undertaking, the federal government needs to take the lead in designing a systematic, comprehensive, monitoring system which provides data in a periodic, timely, predictable fashion. This is a data base which only the federal government can provide.

Indeed, it is clear that the parts are in place: The HANES survey has well-developed measures of health status—our only national survey using actual medical exams. The NFCS, the Nationwide Food Consumption Survey has developed good methodology for measuring food intake. While I understand that there are problems in fusing these surveys (since they were originally designed with different objectives)—for example, problems such as differences in timing, differences in agency needs, increasing the burden on the participants in the study—While I acknowledge these problems, I believe they should be viewed as technical obstacles to be overcome.

I cannot believe that technical obstacles alone have held this coordination effort up for 5 years. Instead, I must express my concern that the federal government is not fulfilling its responsibility and unique position to expand our knowledge. In addition, it seems that nutritional monitoring is being placed low on the totem pole. As must be evident to everyone here, the failure to establish this monitoring system has implications for many sectors of our nation. The potential data base that could result from a comprehensive monitoring system is of great importance to other federal agencies and policy makers, to researchers, service organizations, and to agricultural markets. As a strong supporter of education programs, I believe that it is imperative that this information system be put in place, so that the data can be used effectively in our universities, schools of nursing, medical schools, and also so that research priorities can be established.

(2) A second theme which emerges from the controversy is the issue of efficiency and coordination in the federal information system. In the case of a nutritional monitoring system, we are not only trying to improve our data base, we are also trying to delete duplication of efforts. While I understand that the HANES survey (HHS) and the Nationwide Food Consumption Survey (USDA) were originally designed for separate purposes, there is not a great deal of overlap in data collection, especially with regard to the food intake and dietary status of the participants. In addition, both surveys independently derive their own samples, which again strikes me as redundant. As long ago as 1970, the GAO recommended the use of one sample for both surveys as a straightforward means of cutting costs.

I raise these points, because I continue to be concerned that there is not a strong enough statistical policy branch in OMB which could take leadership in coordinating such methodological issues. I and 30 of my colleagues in the House expressed deep concern to Mr. Stockman when the Statistical Policy Branch of OMB was abolished in April as a separate branch, its staff reduced and reorganized into a new branch which also includes regulatory review functions. I cannot help but wonder if stronger leadership in statistical and methodological coordination would have avoided the long delays in coordinating the two surveys.

(3) Finally, I would like to address the third theme related to the role of the federal government in developing good data bases. Specifically, comprehensive information systems contribute to effective decision-making in Congress. In this case, the potential use of a nutritional monitoring system is relevant to decisions on food programs, such as School Lunch, Food Stamps, Child Care Food, and WIC. I am not speaking of program evaluation, but rather of the

framework which this system could provide. For example, the demonstrated connection between good prenatal nutrition and a healthy fetus provides an informed context for deliberations on the WIC program. Secondly, a focus on the nutritional and health status of special populations, such as children, the elderly, low income families, is also informative. I understand that a HANES survey for a Hispanic population is about to begin this summer. I applaud the pursuit of such needed information, and I would like to know if any other special populations have been identified for future surveys.

In general, the word, "monitoring," of the National Nutrition Monitoring System should be underscored. By keeping abreast of the health and nutrition status of the population, the system has the potential for more readily identifying a problem, and bringing it—in an informed way—to the attention of policymakers.

In closing, I would like to reiterate my appreciation for the opportunity to testify today. The National Nutrition Monitoring System is an opportunity for improving the federal data base which we cannot let go by. I commend the committees for the pursuit of this endeavor, and I would like to lend my support in any way possible.

BIG BAD BUSINESS

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 11, 1982

● **Mr. DERWINSKI.** Mr. Speaker, an unfortunate negative attitude toward big business has developed over the years. This is an anathema that has been caused by the overpowering image or stigma surrounding business as an enemy of the public.

An accurate account of the reasons for discounting this viewpoint is contained in a commentary by William F. Buckley, Jr., which appeared in the Chicago Sun-Times of August 5. I wish to insert it for the Members' attention.

[From the Chicago Sun-Times, Aug. 5, 1982]

BIG BAD BUSINESS

(By William F. Buckley, Jr.)

A few years ago Benjamin Stein wrote a book about Hollywood in which he remarked that during the entire period he worked in the movie-TV capital, he never saw a script in which a businessman was favorably portrayed. A fortnight ago, U.S. News & World Report ran an interview with Donald Rumsfeld, who ran Jerry Ford's White House and later the Defense Department, going on to be president of the pharmaceutical company, G. D. Searle.

Rumsfeld (than whom no one in public life is brighter) discovered something very interesting when he took over Searle. Namely, that engaging in business in America is extremely difficult. Mostly this is so because of government regulation. But government tends to reflect the public need.

Rumsfeld remarks the difference in attitude in Japan and Germany, where the people think with pride about business. "It's crazy for the society to be unfriendly to enterprise. It's damaging to the country and has contributed in a major way to today's economic difficulties."

Irving Kristol somewhere along the line pointed out that there are practically no American heroes in the business community. Indeed, there are practically no names generally known to the American public who are associated with business. Who is the president of General Motors? I bet you don't know. Exxon is the largest company in the world. Do you know the name of its head? While we are at it, are you aware that Exxon's profits are down 52 percent over last year?

The kind of thing one hears about business in college is the kind of thing Professor John Kenneth Galbraith preaches. What is that? Why, in his book "The New Industrial State," he advised a generation of credulous students that major companies in America have acquired so certain a foothold that they control the circumstances of their own success. When a super-large company desires to maintain a certain level of earnings, all it has to do is contrive to do so by pulling this or that switch in the cockpit: advertising here, legislative favors there, mergers over there.

The cultural commentators teach us that all this is being done while the businessmen guzzle three-martini lunches—paid for by blue-collar workers. How Galbraith got away with that one puts him in the class of people who maneuver Niagara Falls in a barrel. Exxon lost 40 percent of its value on the stock market between 1980 and 1982. So much for controlling one's own economic destiny.

Public attitudes as organic as this one are hard to alter; but they most awfully need to be altered. Businessmen are hardly saints, but we should note here that only saints are saints.

We need to recognize that American businessmen are the people who make possible daddy's job, mother's hospital bed, junior's schooling and grandfather's burial. Unless we move away from the jacobinical attitude of business, American business is going to falter and—die.●

EXTENDED UNEMPLOYMENT BENEFITS

HON. ROBIN L. BEARD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 11, 1982

● **Mr. BEARD.** Mr. Speaker, I am today introducing legislation to repeal the drastic and ill-conceived revisions made in our extended unemployment benefits program last year. In a worthy attempt to cut the Federal budget, we made some hasty decisions—most are still defensible, some must be reconsidered.

During last year's consideration of the Reconciliation Act, we altered the formula by which a State becomes eligible for extended unemployment benefits—the original 13-week extension. The revised system for calculating the insured unemployment rate threatens to discontinue this essential buffer for some of our most economically distressed States: Massachusetts, Delaware, Illinois, Ohio, and Tennessee, among others. This incredible phenomenon will take place in the very near future—September 25—necessi-

tating immediate action if we are to avert this catastrophe.

Oddly enough, these benefits are being threatened on the heels of an announcement that unemployment has reached 9.8 percent in this country—the highest level since the depression of 1929. Even more curious is the recent debate over offering an additional 13 weeks of extended benefits—a second round of benefits which will never reach the intended recipients because their State's have failed to qualify for even the first round. Obviously, we must reassess our distribution formula before we throw additional money into the pot.

Unemployment has victimized the entire country, and yet if these formula changes are implemented as few as seven States will be eligible for extended benefits by year's end. Some 200,000 unemployed workers will lose their only source of financial sustenance.

I urge my colleagues to join me in reversing last year's decision and to partake in devising a system which fairly distributes these essential benefits throughout the country.●

SHERIFF H. "CURLY" MOORE—
ARIZONA SHERIFF OF THE
YEAR

HON. BOB STUMP

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 11, 1982

● **Mr. STUMP.** Mr. Speaker, those we elect to be our law enforcement leaders can dictate, or they can build a strong partnership in their community to make law enforcement a community effort.

Harold H. "Curly" Moore is a sheriff who believes that law enforcement should be a community effort. The people of Yavapai County have shown their support for his approach to law enforcement by electing him sheriff for the past 6 years. And, his fellow sheriffs in Arizona have shown their support by electing him Arizona sheriff of the year.

Curly was a member of the Arizona Highway Patrol for 21 years, with a diverse number of responsibilities including the special tactical squad. It was during his tenure as district supervisor in Prescott that he became concerned with the facilities and operation of the sheriff's office in Yavapai County.

Since his election in 1976, Curly has overseen the opening of the newest and most-effective jail facility in the State, as well as establish a successful youth program to close the gap between youth and law enforcement.

I feel fortunate to have known Curly since my days in the Arizona Legislature, and congratulate the Arizona

County Attorney's and Sheriffs' Association for recognizing Curly's contributions to law enforcement and his community. Yavapai County can be proud of their sheriff. ●

FLORIO REPORTS ON JAPAN

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 11, 1982

● Mr. FLORIO. Mr. Speaker, I rise to report to the House concerning my recent visit to Japan.

PURPOSE AND OVERVIEW

The principal purpose of my visit which took place between July 6 and July 10 was to serve as a member of the U.S. delegation attending the second session of the Japan-United States Rail Congress.

This organization, whose membership includes representatives of both Houses of the U.S. Congress and both houses of the Japanese Diet, was formed a year ago to promote the development of Japanese-style, high-speed passenger rail systems in the United States.

Although most of my activities during my stay involved the Rail Congress, I also took this opportunity to discuss trade problems with Japanese business leaders and Government officials. In particular, I met with executives of Japan's automobile industry concerning the huge automobile trade imbalance between our two countries.

Mr. Speaker, as the chairman of the House subcommittee which has jurisdiction over railroads, I have admired Japan's achievements in rail technology for a long time. Along with the rest of the world, I have also been impressed by the rapid growth of Japan's economy during the last decade and its ascension as a major power in world trade.

This trip, however, gave me a new and deeper appreciation of the important role government has played in the startling achievements Japan has made in the areas of both transportation and world trade. It also has shown me clearly that today the health of not only our own economy but the world economy depends directly on fair and open trading relationships between nations.

While Japan's economic progress remains the envy of most nations of the world, I believe Japan today is at a crossroads in its economic history. The path it chooses from this point forward will either promote worldwide economic recovery or prolong the recession which has sapped the strength of the world's major economies for the last 2 years.

Japan has two choices. It can truly open its market to imports and make job-creating investments in those

countries where it has captured significant shares of domestic markets; or it can remain a no-man's land from a trade standpoint.

If the first choice is made, our world trade system will be fortified and all nations will benefit. On the other hand, if the latter option is chosen, the cry for protectionist restrictions against trade with Japan will grow even more intense, and very likely the system of free trade principles and agreements under which world trade has been conducted for the last 50 years will fall apart.

THE JAPAN-UNITED STATES RAIL CONGRESS

The rail portion of the trip began with a meeting between Mr. F. Takagi, the president of the Japanese National Railway (JNR), his executive staff and the U.S. delegates to the Rail Congress. We were later joined by key members of both houses of the Japanese Diet who are responsible for JNR and transportation matters.

Mr. Takagi praised the recent creation of the American High Speed Rail Corporation, which is chaired by former Amtrak president Alan S. Boyd. Under current plans, American High Speed Rail Corporation would become the development arm in the United States for the kind of high-speed bullet trains that JNR has operated in Japan for the last 18 years.

In 1964, JNR opened its first bullet train or shinkansen, as it is called in Japan. The Tokaido line, which operates between Tokyo and Osaka, serves 30,000 passengers per day and produces an annual profit of \$1.2 billion.

This service operates at a maximum speed of 160 miles per hour. Each day 255 frequencies are operated along the 343 miles between these two large Japanese cities. A train, therefore, leaves Tokyo and Osaka on the average of every 10 minutes.

Seven and a half years of development and construction preceded the opening of the Tokaido shinkansen in 1964. A completely new track, and communications and signaling system were constructed for the shinkansen. Only concrete ties were used and an entirely new overhead electrical system had to be constructed in order to provide power for the shinkansen trains. Due to Japan's extremely mountainous terrain, 67 tunnels had to be constructed along this route. The total construction cost was \$1.5 billion. This new right-of-way is for the exclusive use of the shinkansen—other passenger trains and freight trains do not use this track.

Since 1964, JNR has constructed three additional shinkansen lines: the Sanyo extension from Osaka to Hakata; the Tohoku line from Omiya, northwest of Tokyo to Morioka about 400 miles to the north; and the Joetsu line from Omiya to Niigata which is about 180 miles to the west of Tokyo.

I rode on the Tohoku shinkansen which just opened last month and cost an estimated \$10 billion. The Joetsu line will not open until the end of this year. Its construction cost is estimated to be \$7 billion. The Sanyo extension was built for about \$3.6 billion, bringing the total amount of money JNR has spent on shinkansen development to about \$22 billion. To put this in perspective for my colleagues, \$22 billion is about 11 times as much money as has been spent to date on improvements to the Northeast corridor.

Although this represents a huge capital investment, undoubtedly the largest investment in passenger rail service made by any nation in the last 50 years, the expectation is that it will pay off. Revenues from the Tokaido line have already repaid its construction loans and JNR has great hope that both the Tohoku and Joetsu lines will achieve similar revenue success.

The cost-effectiveness of the shinkansen service is in marked contrast to the heavy losses JNR incurs on its other passenger and freight operations. Overall, JNR's revenues have fallen \$30 billion short of its costs since 1966, and it has incurred liabilities which amount to an additional \$65 billion.

JNR's losses for this fiscal year account for a staggering 18 percent of the total budget of the Japanese Government. Largely due to JNR's skyrocketing deficit, Japan's national deficit today is larger, on both a per-capita basis and as a share of GNP, than the deficit of any other highly industrialized country with the exception of Canada.

By comparison, total U.S. expenditures for all rail assistance between 1946-82 was only about \$13 billion. And, Federal assistance for Amtrak, our Nation's national passenger railroad, represents only about 2 percent of total Federal spending on transportation for the last 35 years.

Clearly, Japan gives its rail system much higher priority than does the United States. There has been no commitment on the part of the U.S. Government that can in any way compare with the Japanese Government's underwriting of the \$22 billion cost of developing the existing shinkansen system and the huge sums needed to develop the additional proposed shinkansen routes.

JNR's losses, however, have become greater than the Government is willing to bear. Enormous inefficiencies result from JNR's route structure, its labor costs, and political constraints on the management of its system. As a result, JNR has failed to adjust its system and its cost to the declining freight and passenger volume it now handles.

In the last 20 years, JNR's share of the intercity passenger travel market

has fallen from 51 percent to 25 percent while the car share has risen from 5 percent to 41 percent. In 1960, JNR carried 40 percent of Japan's domestic freight business; today it carries only about 8 percent.

Despite this decline in demand, JNR's 21,300 kilometer—13,236 miles—system has grown rather than shrunk over the last 30 years. For example, unprofitable local rail lines accounted for 37 percent of JNR's deficit in 1979. These lines represented 45 percent of JNR's total system miles, yet carried only 5 percent of its traffic and produced only 7 percent of its revenues.

In addition, JNR has a labor force of about 410,000 people which probably gives it more employees on a per mile basis than any other operating railroad in the world. Those workers have very costly fringe and pension benefits.

By 1985, estimates are that there will actually be more people receiving pension benefits than there are contributing workers to support them. With life expectancy in Japan actually higher than it is in the United States and retirees receiving up to 70 percent of their final pay, pension costs will continue to drain JNR's financial resources for the foreseeable future.

JNR's contribution to the pension fund already amounts to \$1.5 billion annually. By 1985, estimates are that the fund will need an additional \$400 million a year just to remain solvent.

As a Government-owned national railroad, JNR in the past has not been granted the authority to make radical cost reductions which would result in a more efficient operation. JNR had to obtain approval of any fare or freight rate increase from the Minister of Transportation. More fundamental decisions, such as route restructuring, had to be debated and approved by the Japanese Diet.

This past year, however, legislation was passed in Japan that requires JNR to scale down its operation. Under this plan, JNR's work force is to be reduced from 410,000 to 350,000 by 1985 resulting in a 25-percent increase in labor productivity. JNR was also authorized to eliminate up to 14 percent of its route miles and to concentrate its resources on intercity and commuter passenger services.

More than 700 passenger stations and 550 freight stations are to be closed. JNR has also identified 4 billion dollars' worth of land that it wants to sell. And, JNR has received specific authority to adjust fare and freight rate structures.

Even with these reforms, JNR estimates it will have losses totaling \$4 billion a year by 1985. By comparison, JNR has had a deficit averaging \$3.5 billion per year since 1975. Clearly, greater cost reduction must be achieved if JNR is to remain a viable system.

As I talked with the JNR executives and the members of the Japanese Diet, I found myself reflecting on the enormous similarities between JNR's current financial predicament and that which confronted U.S. railroads just a few years ago.

Until recently, an analogous situation confronted the Consolidated Rail Corporation (Conrail) which was created by Congress in 1976 out of six bankrupt railroads that operated service in 16 Northeastern States. After the Federal Government spent \$3.3 billion to improve and rehabilitate Conrail's system, Conrail's revenues still were projected to fall \$2 billion short of its costs by 1985.

As a result, I sponsored legislation in the 96th Congress which gave the railroads, including Conrail, the freedom to adjust rates so that revenues could in fact cover the cost of operation. In addition, legislation I sponsored in the 97th Congress gave Conrail the authority to terminate service over unprofitable lines and resulted in other major savings.

An agreement with its employees to forgo \$200 million wages;

Wage concessions by management employees totaling \$30 million; and

The elimination of about 9,000 of its 71,000 employees for labor savings of approximately \$100 million annually.

Under this legislation Conrail has announced plans to terminate service on about 15 percent of its 17,700-mile system. In addition, the costly commuter service which Conrail has operated in the Northeast will be turned over to the local commuter authorities or will be assumed by the newly created Commuter Services Corporation.

The overall effect of these savings has been dramatic. Conrail was able to cut its costs by 13 percent in 1981. Conrail's 1980 deficit of \$244 million, as a result, was transformed into a profit of \$40 million for 1981.

I also sponsored legislation in this Congress that gave Amtrak the ability to discontinue service on any passenger route that did not meet statutorily established ridership and revenue criteria. This legislation also required Amtrak to achieve savings in its deficit-ridden food and beverage operation. Amtrak, in addition, already has the ability to adjust its fares as necessary without regulatory or congressional involvement.

Thus, from my discussions with JNR executives and members of the Japanese Diet, I found that there were important lessons to be learned from each of our Government's involvement with railroads. The U.S. experience should demonstrate to the Japanese that government interference in the management of railroads may cause scarce financial resources to be expended in ineffective ways, ultimately undermining a system's viability.

On the other hand, the Japanese experience should make it clear to the United States that government must share in the enormous costs of developing and constructing technologically advanced, high-speed passenger rail systems. The payback period is simply too long and the development costs too great to expect private interests to assume the expense alone.

For example, JNR has been developing and testing a magnetic-levitation (mag-lev) train for the last 20 years. This train is currently being tested on a special elevated guideway, 8 kilometers—5 miles—long, located on Kyushu, Japan's southernmost island.

A record speed of 304.7 kilometers per hour—189.3 miles per hour—was achieved with a two-car train set on the occasion of the U.S. delegation's visit to the test site. Yet today, 20 years after development of this system began, not a single individual has ever ridden on it.

Testing with people aboard the mag-lev cars will begin later this year. JNR estimates that the mag-lev system is still 5 to 10 years away from being operationally feasible.

Thus, if yet unforeseen delays are not encountered, 30 years of testing and development is likely to precede the initiation of mag-lev service in Japan. Clearly, only government, not the private sector, could justify allocating resources to such a project over this length of time. Although efforts are being made to develop high-speed rail service in the United States with private funds, I sincerely believe such projects will not be successful without active government involvement.

JNR has actively sought private sector funding for a bullet train project between Los Angeles and San Diego. So far, these efforts have resulted in a commitment from the Bank of Tokyo to try to sell shares in the project worth \$500 million if U.S. investors will commit \$1.5 billion to the project. The First Boston Corp. has agreed to try to market the U.S. interests in the project. As yet, no money, public or private, has been committed to the construction of this project.

JNR is eager, however, to assist in the development of American high-speed rail systems. JNR's engineering and development team has just completed two major shinkansen lines in Japan, and this team is not ready to begin work on the next proposed line. Thus, to a certain extent, JNR views high-speed rail projects in the United States as a way of holding its development team together during this period before the next shinkansen project begins in Japan.

In my view, JNR has considerable talent and expertise which could be of great use in developing improved, high-speed rail service in areas of the

United States where ridership would be high enough to justify the cost of implementing such service.

Notably, cities in the Northeast seem to rank highest in rail ridership. There are at least two important reasons this is true. First, passenger railroads have operated in the Northeast for a longer period of time than elsewhere in the country, and thus there is a larger dedicated ridership in that region. Second, the Federal Government, through both Amtrak and the Northeast corridor project, has expended substantial amounts of money in order to improve rail passenger service in that area.

As a result, the Northeast corridor service has the greatest potential for being profitable of any rail passenger service in the United States. Even under the constraints rail service in the Northeast corridor has operated for the last 5 years, Northeast corridor revenues cover about 90 percent of its costs. Thus, from a practical standpoint, the Northeast corridor is better able to support the cost of developing bullet trains or other high speed service, than most other areas of the United States.

Although only about 1 percent of all U.S. intercity travelers use rail passenger service, the percentage of travelers who use rail service between certain cities in the Northeast is much higher. For example, rail's share of the rail-air market last year between Philadelphia and New York City was 97 percent; between New York City and Baltimore, 64 percent; and between New York City and Washington, D.C., 27 percent.

As a result, I am especially pleased that the administration and my subcommittee recently have reached an agreement which would permit many of the Northeast corridor improvements to be completed as had been originally planned. Under legislation my subcommittee has reported, the full \$2.5 billion which Congress authorized for the Northeast corridor project would be spent.

As you know, the administration last year had proposed reducing funding for the corridor project by \$310 million. The agreement which I reached with the administration on this new legislation, I believe, represent their willingness to see the corridor project completed to the full extent of the funds authorized.

In addition, this legislation provides funds for the development of rail corridor service between Philadelphia and Atlantic City, N.J., and between New York City and Buffalo, N.Y. Both of these corridors connect with the Northeast corridor main line.

It should be no surprise that the two corridors which connect with the Northeast corridor ranked among the highest of the 25 corridors studied by Amtrak and the U.S. Department of

Transportation. The corridor between New York City and Buffalo, N.Y., had the best cost projections, and the proposed corridor between Philadelphia and Atlantic City, N.J., ranked highest in terms of ridership.

According to this study, ridership on the Philadelphia-Atlantic City corridor would be more than twice as high as ridership on the Los Angeles-San Diego corridor. Projected annual ridership on the Philadelphia-Atlantic City corridor is estimated to be 4 million, and, on the basis of passenger miles per train mile, this corridor would rank higher than any other comparable service in the Amtrak system today. The Atlantic City corridor also was shown to be highly fuel efficient. In fact, it was the only 1 of 25 corridors studied which was shown to be more fuel efficient than bus service.

As rail operators all over the world know, the ability to compete in today's transportation market is directly related to fuel efficiency. Thus, fuel efficiency of the Atlantic City corridor is particularly important in evaluating this corridor's future profitability.

It was the profit potential of this corridor that led Amtrak recently to express its interest in operating rail service between Philadelphia and Atlantic City. In a recent letter to me, former Amtrak President Alan Boyd, said:

We believe that this service has the potential to break even or be profitable and could contribute to ridership in the Northeast Corridor. Based on our current estimates, ridership in the corridor could increase by 4.5% . . . Amtrak would be willing to operate high frequency (peak and non-peak) Philadelphia-Atlantic City service during most of the day, connecting the Northeast Corridor at Philadelphia.

In recognition of the competitive strengths of the Philadelphia-Atlantic City corridor and New York City-Buffalo corridor, and the contribution these corridors will make to the overall performance of the Northeast corridor, the rail legislation which my subcommittee recently allocates Federal funds for capital improvements on both of these corridors. Under this legislation, the Federal Government would complete capital improvements on these two corridors and Amtrak or other entities would operate the service.

Thus, the Federal commitment to rail improvements in the Northeast corridor continues to grow. The Federal Government is looking at not only the improvement of the basic corridor infrastructure but also the development of rail service that connects and feeds into the corridor.

In my view, the Northeast corridor and any related connector service should be viewed as one system whose principal termination points are Washington, D.C., and New York City. This distance is roughly 300 miles and ideal for purposes of higher speed service,

such as bullet trains offer. In addition, as a result of the improvements made under the federally funded Northeast corridor project, much of the track work, signaling and other improvements needed to operate high-speed service have been completed in whole or in part.

In this regard, I am very proud of the agreement between Japan and the United States under which Japan has provided technical assistance to the United States in the development and planning of the Northeast corridor rail improvements. This agreement, which has been in effect for the last 5 years, was just recently extended for an additional 3-year period.

I believe this agreement provides the perfect vehicle under which new rail technology may be introduced in the United States on a continuing basis. I believe, therefore, that the Governments of both Japan and the United States should work together to develop a new master plan for the Northeast corridor that would build upon improvements already completed or under way and that would also involve the development of rail service which feeds into the Northeast corridor main line.

Already, trains in the Northeast corridor operate at speeds of up to 110 miles per hour. With additional improvements, this speed could be increased making train travel even more attractive than it is now.

The Federal Government must continue to play an important role in insuring that funds are available for these improvements. But, the United States has much to learn from Japan where it has been demonstrated that high-speed rail service can compete with car and air travel and, at the same time, be cost effective. With Government support and the technical assistance of the Japanese, I feel certain the Northeast corridor can become a continuing example of advanced high-speed rail passenger service in the United States.

JAPAN AND WORLD TRADE

Japan is the second largest economy in the non-Communist world, surpassed only by the United States. During the last 25 years, Japan's gross national product (GNP) has grown at an unprecedented pace, more than three times as fast as the recent growth rate in the United States, Canada, and Western Europe.

Unlike in Western economies, this phenomenal rate of economic progress has been achieved without fueling domestic consumption. Instead, enormous increases in export sales and an insignificant volume of imports have been the key to Japan's rapid economic development.

Japan, the world's second largest economy, imports actually less manufactured goods than the country of

Switzerland whose economy is 11 times smaller than Japan's. Although exports account for only 12.5 percent of Japan's total GNP, less than in West Germany for example, about two-thirds of the 4-percent rise in Japan's GNP during the most recent fiscal year can be attributed to export trade.

Between 1968 and 1981, Japan's exports have grown almost 1,200 percent. Japan has targeted and, in most cases, successfully captured significant shares of world markets—first in textiles, color televisions and all types of electronic entertainment equipment, then in automobiles and now in computers, chemicals, and aerospace.

Japan's success in the export field has not been accidental. Through tax incentives, research programs, and export financing, the Government of Japan has aggressively promoted the exportation of Japanese products. For example, in 1980, 43 percent of all Japanese exports were sold with financing credits provided by the Government. By contrast, only 8.2 percent of U.S. exports were sold with Government credits.

But, Japan's assistance to its export industries goes far beyond financing credits. Japan, through its Ministry of International Trade and Industry and the Japanese External Trade Organization maintains an extensive communications system through which it shares information with the financial community and business and industry concerning world market trends.

These efforts led to the development of an economic strategy 20 years ago which has caused Japan's productivity in heavy, complex industries to grow by leaps and bounds. In 1959, Japan's exports consisted mainly of textiles, toys, and other products which did not require highly skilled labor or costly investments in plant and equipment.

In each of the last 20 years, however, Japan has invested the equivalent of 30 percent of its GNP in its industrial infrastructure. As a result, Japan has become a major competitor in world markets such as steel, automobiles, shipbuilding, chemicals, electronics, and many others.

For example, by the midseventies Japan had become the world's most efficient producer of steel. While the U.S. steel industry increased its investment in plant and equipment an average of only 4 percent per year between 1966 and 1972, during this same period of time, the Japanese steel industry increased its capital investment on the average of 23 percent a year.

Similar investments were made in developing Japan's highly successful automobile and consumer electronics industry. For example, due to capital improvements productivity in Japan's auto industry has nearly doubled during the last 10 years.

I visited several of Toyota Motor Corp.'s auto production facilities. The size of Toyota's labor force has not increased significantly in the last 10 years, yet, today Toyota produces about twice as many automobiles as it did 10 years ago. Robotics, computer-driven production methods and other innovations in plant and equipment have made the difference.

Japan's automakers produce an average of 40 cars per man-year of employment, and one Datsun plant has achieved a production rate of 78 cars per man-year of employment. In the United States, the average is 11 automobiles for every man-year of employment.

To a much greater extent than in the United States, Japan's incredible investment in plant and equipment was financed through long-term debt financing. These loans, held by Japan's large central banks and often Government backed, have been the source of 85 percent of Japan's capital investment over the last 20 years. Only about 15 percent of Japan's capital investments were financed through equity capital issues.

On the other hand, the U.S. experience has been quite different. Debt financing of U.S. business and industry activities is higher today than at most other times in the last 30 years, yet equity issues still account for more than twice as much business financing as debt instruments.

This difference in the way business has been financed in the United States and Japan accounts for many of the differences in our economies. It also has a great deal to do with the ability of our two economies to compete in the future.

Reliance on debt financing, for example, has been a major driving force behind Japan's development of heavy industry in which land, facilities, and equipment serve as collateral for loans. Since machinery and physical facilities have provided the security for business financing and therefore business expansion, debt financing may also explain why Japan has gone much further than the United States in investing in new manufacturing technologies, such as robotics and computer-driven industrial systems.

Debt financing, in part, also accounts for what has been described as Japanese management's farsightedness and flexibility. The argument goes that long-term debt financing permits Japanese business and industrial managers to make long-term strategy decisions which may not have a short-term payoff. On the other hand, equity financing in the United States is often blamed for U.S. managers' obsession with showing an immediate short-term return on investment.

Although there is undoubtedly some truth to this observation, the Toyota officials with whom I met minimized

this distinction. Mr. T. Toyoda, director of the largest assembly plant in Toyota City, responded that all private managers, the world over, are charged with the same responsibility—to return a profit on investment. While long-term financing may in some cases give managers a little longer time to show a profit from a particular investment, the profit must nevertheless be forthcoming.

With respect to the flexibility of Japanese managers, debt financing can also be a double-edged sword. On the one hand, the pressure to show an immediate return on investment for stockholders is somewhat less, but on the other, it is sometimes more difficult to change courses to accommodate changing circumstances.

For example, Japan's Mitsui Corp. entered into an agreement with the National Iranian Oil Co. 14 years ago to develop jointly a petrochemical plant in Iran. This agreement was reached, prior to the revolution which led to the Ayatollah Khomeini's assumption of power. Since the revolution, work came to a complete halt, and the physical plant was badly damaged during the recent fighting between Iran and Iraq. As a result, the Government of Japan was forced to take the venture over as a national project.

Although no one could expect Mitsui's managers to have foreseen the Iranian revolution, questions can certainly be raised as to why Mitsui continued its activities in Iran despite the political instability and the huge losses it incurred. Mitsui spent \$4 billion on the development of this project despite many signals over the years that it would never be completed or permitted to operate.

In part, debt financing itself may have contributed to Mitsui's managers reluctance to withdraw from this deal. Mitsui's loans, bottom line, were for the production of plant and equipment to be used in this facility. Failure to complete the project as planned meant there would be insufficient collateral to secure the loans.

Debt financing has also caused Japanese industries some difficulties in competing in world high-technology trade. High-technology industries such as computers, data processors, and semiconductors are not industries which require large investments in plant and equipment. Manufacturing productivity tends to be less important in high-technology industries. Instead, a firm's ability to compete is often a direct function of the share of new, innovative technology it commands.

Competition in high-technology markets, therefore, presents a new challenge to the Japanese. Rather than adapting and improving upon technology that has been developed elsewhere, Japanese high-technology

firms will have to develop new technology on their own. While Japan has shown that it can compete successfully in auto and electronics trade where production efficiency is the determining factor, it has yet to demonstrate a capability in the area of high-technology innovation.

For example, even Japan's recent, highly publicized and successful competition in the semiconductor market is due less to innovation than to a miscalculation on the part of its U.S. competitors. The technology which Japan used in the production of its 64K semiconductor is not new. On the other hand, the U.S. competitors were attempting to enter the market with new technology that would put them light-years ahead of their nearest rival. The new technology being developed by the American firms was flawed, but it is being perfected and can be expected to enable these companies to compete successfully in the future.

Similarly, Japan's success in the auto industry is due more to its cost-effective production processes rather than innovation. Through the use of robotics and computer driven production methods, Japan's automakers are able to produce automobiles that are remarkably defect free and that use comparatively little human labor. But, there is nothing particularly sophisticated or advanced about the technology used in Japanese built cars. For example, German automakers more than Japanese have been responsible for the great advances in fuel economy through innovations in fuel injection and other equipment.

Thus, Japan has been most successful in adapting and improving upon already existing technology, and then using this technology to make products in a cost-effective manner. Evidence of this approach can be seen in the much higher priority Japan has given to the training of engineers than to scientists. Japan turns out as many engineers each year as the United States; yet, there is little emphasis placed on training scientists to perform basic research and development. In fact, many Japanese scientists go to other countries to perform basic research.

Scientific achievement, unlike engineering, is most often the product of individual genius. Some, therefore, believe the Japanese penchant for collective action and group consensus creates an unfavorable environment within which to promote scientific research.

A more fundamental reason for this situation, however, is the fact that Japan spends a relatively small percentage of its GNP on research and development. On the other hand, the United States spends more of its GNP on research development than any other industrialized nation, followed

by Switzerland, West Germany, Britain, and the Netherlands. Japan ties with Sweden for sixth place.

Thus, Japan clearly must increase its ability to develop innovative technology if it is to compete successfully in the high technology markets of the world. But to do this, certain changes may have to occur in the way Japanese business is financed and managed.

For example, not only is debt financing somewhat ill suited for the financing of high-technology industries, which are more knowledge intensive than capital intensive, but the advent of high interest rates in Japan has made long-term debt financing more and more costly to business and industry. Thus, equity financing has begun to play a greater role in financing Japanese business activities. As this trend develops, Japanese managers, like their U.S. counterparts, will be forced to pay greater attention to the short-term payoff of their investment and business decisions.

These changes are taking place at a time when Japan's export markets, principally the United States and Europe, are in the throes of the deepest recession in the last 30 years. As a result, worldwide demand remains low, and Japan's economy is beginning to feel the pain of reduced demand for its products.

For the first time in 30 years, Japan's GNP registered a substantial 3.5-percent decline in the first quarter of this year. In addition, domestic demand has been falling in Japan as a result of an austere national budget policy. Japan's Prime Minister Suzuki has given highest priority to the goal of achieving a balanced budget by fiscal year 1984.

Japan's current fiscal year budget represents a total spending increase of only 6.2 percent and is the most austere budget in the last 26 years. The Prime Minister has proposed a budget for next fiscal year which represents an actual cut in most spending areas as total spending would be held to the current level while defense spending would be increased by 7 percent. Thus, Japan's national budget policies will likely continue to depress domestic consumption.

Japan has also experienced a sharp decline in its productivity growth rate. While the rate of productivity growth remains very high, it is substantially lower than it was in the mid-1970's.

These trends taken together may mean trouble ahead for Japan's economy. As it struggles to develop the ability to compete in new, high-technology world markets, Japan's exports are falling. Yet, without a strong, profitable export trade, Japan's overall economic output will fall, thereby jeopardizing its ability to compete in high technology areas.

Japan's automakers are particularly concerned about a potential decline in export trade. For example, Toyota, whose facilities I visited and management I met, exports 54 percent of the vehicles it produces each year. The United States alone accounts for 20 percent of Toyota's annual sales.

For the last 2 years, Japanese auto producers have operated under a voluntary restraint agreement which limits exports to the United States to 1.68 million vehicles annually. Compared to 1979, this represents about a 10-percent reduction in Japan's auto exports to the United States. The dollar value of these exports, however, has continued to increase as Japanese automakers have added options that have raised the price of Japanese cars being sold here in the United States.

During the period of the voluntary restraint agreement, Japan's share of the U.S. auto market has not fallen. In 1979, Japan captured about 27 percent of the U.S. new car market and has remained around that level ever since.

Thus, the voluntary restraint agreement, which could be extended for a third year starting next March, has not caused Japan's auto industry great pain. Instead, what Japan fears most is the possibility that the United States may adopt a more severe protectionist measure like local content. Such proposals have the explicit purpose of increasing the U.S. industry's share of the auto market by restricting Japanese auto imports through artificial barriers.

I discussed this matter with Dr. S. Toyoda with whom I had dinner while I was in Japan. At the beginning of July, Dr. Toyoda became the new president of Toyota Motor Corp., the product of the recent merger of Toyota's heretofore separate production company and sales company. Dr. Toyoda is the grandson of the founder of Toyota Motor Corp. Other members of the founder's family also are associated with the company.

My basic point to Dr. Toyoda was this: In the absence of a major economic turnaround, only job-creating investments in the United States by foreign producers can possibly diffuse the political pressure being the anti-import, protectionist movement. The fact is that in the United States today there are 250,000 auto production workers and 400,000 workers in auto-related industries who are out of work. No one is projecting an economic turnaround that would give all of these people jobs. In fact, the U.S. automakers indicate that only about two-thirds of these production workers would be rehired even if the industry were to return to full production.

The politics of protectionism therefore are likely to be with us for some time. Many European countries which already have market share restrictions

on foreign auto imports are considering new measures which would place even greater limitations on imports. And, Canada last month began an official slowdown of its customs clearance process for Japanese automobiles. Today, there is a backlog of 20,000 Japanese automobiles setting in Vancouver Port.

In the United States auto protectionist proposals range from outright quotas, to local content requirements to various forms of unfavorable tax treatment. Any of these, if implemented, would not only reduce Japan's share of the U.S. auto market, but also throw Japan's auto industry into a tailspin.

In my conversation with Dr. Toyoda I made it clear that without some improvement in the job situation there could be no assurance that a measure severely restricting Japanese imports would not pass. Any foreign auto manufacturer which has not established a facility in the United States, such as Toyota, could be particularly vulnerable to attack.

In response, Dr. Toyoda said his company was continuing talks with General Motors concerning an agreement for the joint production of subcompact cars here in the United States. These talks began earlier this year and are likely to continue into the fall. Toyota hopes the parties will be able to make a decision regarding the proposal before the end of the year.

Not a great deal is known about the specifics of the proposal. Apparently, one plant is being considered initially with the possibility of additional plants being set up in the future. To start, annual production would be about 200,000 vehicles of the 1.3-liter engine size. General Motors seems to be focusing more on the establishment of a west coast facility while Toyota continues to look at east coast sites.

In this regard, I suggested that Toyota consider the abandoned Ford facility at Mahwah, N.J.

During our discussion, Dr. Toyoda expressed concern that his company's production methods and practices were not easily transferable to the United States. In particular, he appeared concerned about American labor's willingness to work under Japanese management and production techniques.

I noted that both Nissan and Honda have recently made major investments in the United States. Nissan is currently constructing a \$500 million light-truck assembly plant in Tennessee which will produce about 160,000 units annually and employ 2,900 people. Although current plans call only for the establishment of the light-truck plant, Nissan has purchased enough land so that major expansion could take place at a later time.

Honda's \$200 million auto production facility will open in Marion, Ohio this November. Initially, this facility will produce 120,000 Honda Accords annually and will employ 2,000 workers.

To insure that Japanese production methods are successfully implemented in its U.S. facility, Nissan is building an enormous training complex complete with a mock assembly line. Many of the same practices which are typically found in Japanese auto plants will be followed in the United States.

As in Japan, Nissan will attempt to make loyalty the fundamental ingredient characterizing the company's relationship with its U.S. employees. Workers will be given a tremendous amount of responsibility for insuring defect-free production. Nissan's Tennessee facility will have only 5 management levels compared to the 14 such levels found in most U.S. auto plants.

Workers will have the ability actually to stop the production line if they encounter problems or errors that cannot be corrected during the assembly process. Quality circles of production workers will be established in order to promote efficiency and good workmanship. In addition, regular meetings between management and workers are being planned and workers will be encouraged to approach management with work-improving recommendations.

Workers will have company uniforms to increase their identity with their work. And, Nissan is building a recreational complex for its employees' use in order to foster off-hour interaction among its workers.

In return, for the loyalty of its workers, Nissan promises that its employees will always have a job with the company. This so-called lifetime employment system has attracted much attention.

In Japan, about one-third of the labor force is covered by lifetime employment. For example, Toyota workers have lifetime employment guarantees; however, these workers make only about 30 percent of the parts used in Toyota automobiles. Seventy percent of the parts are made by independent suppliers, and, most of the workers in these firms are not covered by lifetime employment agreements.

While such commitments clearly have their advantages, there are conditions that should be understood. For example, the commitment is only that the individual will always have a job, not a particular job, with the company. Furthermore, there is no guarantee of salary or benefits that goes along with lifetime employment commitments. In Japan, for instance, such employees may be forced to relocate if management decides to cutback activities in a particular area.

Lifetime employment also places a great deal of pressure on management to sustain company performance and viability. If a company were to suffer a major setback, it is hard to see how lifetime employment commitments could be honored.

Such a setback would certainly result if protectionist auto legislation were passed in the United States. Investment by Japanese automakers in the United States, however, could do a great deal to restrain this protectionist drive. It would also give Japan greater auto producing capacity at a time auto manufacturers around the world are fighting to capture new markets in the Middle East, Africa, Central America, and South America.

Yet, there is a more fundamental reason why Japanese automakers should invest in the United States, and that has to do with a company's responsibility under a free-trade system. I believe in free trade, but I also believe that companies which capture large shares of foreign markets have certain obligations toward those markets that go beyond product satisfaction. Such companies, willingly or unwillingly, become integral parts of local and even national economies. Just as it was not in the interests of the United States to restrict the importation of fuel-efficient Japanese cars during the height of the oil crisis, it is not now in Japan's interest to contribute to the unemployment of American workers.

When America almost doubled their purchases of foreign automobiles between 1972 and 1979, inevitably it cost hundreds of thousands of U.S. workers their jobs. The social cost of that displaced labor has been great, and rightly the foreign automakers who benefited from the change in consumer preference should be expected to assume some responsibility for the situation.

On the international level this problem is dealt with in various ways. For example, at the heart of our trade treaties is the concept of balance of concessions. Under this principle, each country extends to its partners trade concessions which approximate the trade concessions or benefits which it enjoys. In this way, the nations of the world have assurances of equal trade opportunities and no country is victimized.

In exchange for Japan's claim on the U.S. auto market, this principle would dictate that Japan should extend to the United States trade opportunities which approximate those it has in the American market. On this basis, the United States has tried repeatedly for the last 10 years to reduce tariff and nontariff barriers on the sale of U.S. products in Japan.

For example, the United States has been talking with Japan about buying

more American-made auto parts for many years. Annually, U.S. companies buy 2 billion dollars' worth of Japanese parts whereas Japan purchased last year only about \$100 million worth of U.S.-made parts.

These efforts, which have been a high negotiating priority of the United States for some time, have failed terribly. An agreement was reached 2 years ago under which Japan was to triple its annual purchase of U.S. auto parts, but that objective has never been achieved.

Similarly in agriculture, one of America's main export products, Japan severely restricts access to its market. Japanese farmers are paid enormous subsidies to keep them on the farm and many food products are priced much higher than in the United States due to import restrictions. For example, rice sells for about three times as much as it does in the United States. Similarly, beef and fresh fruit costs much more in Japan than in the United States, because of the tight controls on imported agricultural products.

In other areas like insurance, financial services of all types, airline operations, and computer software services, Japan treats foreign firms unfavorably. American-made automobiles are also effectively shut out of the Japanese market. Estimates are that a U.S. car that sells for \$6,500 here would have to be sold for \$13,000 in Japan after all the payments for processing, licensing, approval and transportation were made. Japan also protects its highly inefficient aluminum smelting industry from foreign competition, thereby increasing the price Japanese pay for aluminum.

Some progress was made earlier this year when Japan agreed to eliminate nontariff barriers on 67 different product classifications. This action has been received by U.S. trade representatives as more than a token gesture. Nevertheless, even this concession has been too long in coming and hardly restores balance to the \$20 billion annual imbalance in our trade with Japan.

The United States and Japan simply do not enjoy reciprocal trade benefits. Our trading relationship with Japan does not, therefore, offer any remedy to that part of the U.S. unemployment problem that is caused by our huge trade deficit with Japan. Instead, other solutions are needed to address this problem.

In this regard I have three suggestions. First, the United States must better equip itself to compete in export trade. Free trade should always be our goal, but that does not mean we can afford to ignore the fact that policies of many foreign governments give foreign firms a competitive advantage which U.S. firms cannot overcome.

The recent decision by the Metropolitan Transit Authority (MTA) of New York to buy subway cars from Bombardier of Canada is a case in point. The Budd Co., located in Pennsylvania, submitted a bid to MTA that was actually lower than the one submitted by Bombardier. But Bombardier's offer was selected because it included more favorable financing terms, terms, I might add, which were backed by the Canadian Government.

More and more success in export trade is dependent on the extension of favorable financing. For the United States, the Export-Import Bank (Exim Bank) is the agency for providing export financing.

From 1977 to 1981, the Exim Bank provided financing for U.S. export sales of \$71 billion which, in turn provided jobs for 2.2 million U.S. workers. As if oblivious to the importance of the Exim Bank to U.S. export trade, the administration, however, has proposed massive reductions in the Bank's lending authority. At the administration's insistence, Exim Bank's direct loan authority was cut 19 percent this fiscal year and an additional cut of 14 percent is being sought for next fiscal year.

The administration argues that all nations should eliminate export credit programs. While our major trading partners recently agreed to minimal reductions in export credit assistance, export credits remain the key ingredient of most nation's export promotion programs. In addition to Japan which provides credits for 43 percent of all its exports, France provides credits for 30.3 percent of its exports, and the United Kingdom provides credits for 37.3 percent of its exports.

Restrictions in the Exim Bank's loan authority guarantees more and more losses of U.S. exports sales. Lost export sales mean lost jobs, jobs the U.S. economy cannot afford to lose.

Second, we have to be willing to take unilateral actions to equalize our trade relationships with foreign nations, especially in areas such as services trade which is not currently covered by our trade treaties. Trade in services such as insurance, banking, transportation, data processing, tourism, and many others have become an increasingly important part of the U.S. balance of payments.

While the United States has suffered a deficit in merchandise trade in all but 2 of the last 12 years, the surplus in the services account has grown steadily. Due to service exports, the U.S. balance of payments in goods and services has been in surplus for the last 2 years.

Our balance of trade with Japan, however, shows quite a different situation. Trade in services with Japan has reduced only to a very minor extent our huge merchandise trade deficit with that country.

When we look closely, we see that Japan, through burdensome regulations and requirements, treats foreign service firms unfavorably. In many areas such as insurance, foreign service firms are required to establish joint venture relationships with domestic firms in order to do business in Japan. In order to obtain license to operate, foreign computer firms have been required to restrict their share of the Japanese market.

Since trade in services is not covered by our multinational agreements, the United States has attempted, most often unsuccessfully, to negotiate more favorable trading terms on a bilateral basis. As a result, I have introduced legislation, H.R. 5519, that would give the President the authority to retaliate against foreign service firms, if the foreign country in question discriminates against U.S. service firms.

I feel strongly that Congress must give the President this authority for two very important reasons. First, in the absence of an international agreement which would equalize the rules that govern trade in services, it is essential that the President have the ability to equalize the relationships under which we conduct trade in services with individual nations.

Second, our GATT partners will never take seriously our efforts to negotiate an international agreement unless they perceive that they too will benefit from such an agreement. If other nations understand that discrimination against our service industries may cause their developing service industries to be shut out of the U.S. market, then they not only have a reason to treat our service industries fairly, but a reason to negotiate an agreement that would give every nation increased opportunities for service exports.

Furthermore, the bill would make the negotiation of a GATT agreement covering services a high priority of our representatives at the GATT ministerial meeting this November. Without such an agreement, there can be no international understanding of what unjustifiable, discriminatory trade barriers are. Neither can there be any international procedure for resolving disputes arising from trade in services.

This legislation has been reported by the full Committee on Energy and Commerce. It is now awaiting action by the Committee on Ways and Means and the Committee on Foreign Affairs to which it was also referred. I am hopeful these committees will soon act, so that the House can go to conference with the Senate on its services bill which passed some time ago.

Third, I believe the United States has every right to expect Japanese automakers to locate facilities here in the United States. As a nation, we

cannot close our eyes to the personal and financial suffering of the hundreds of thousands of American workers who have lost their jobs as a result of the lopsidedness of our trade with Japan. Trade in autos is the major cause of this imbalance. While I believe it would be bad policy to restrain the consumer's ability to freely exercise his or her choice of an automobile, I also believe that private companies have a responsibility to contribute to the health of the economy from which they derive great benefit.

On this basis, I believe that, in addition to our current efforts to force the Japanese to treat our export products more favorably, we must insist on greater, direct, job-creating investment in the United States. Only in this way can the free-trade market access which we extend to Japan also result in fair trade.

CONCLUSION

Mr. Speaker, we in the Congress can learn a great deal from the Japanese experience. In Japan, Government has played an active, positive role in allocating scarce capital resources, in working with business to develop long-term economic strategies and goals and in providing direct assistance to business in the form of information, research, and financial guarantees and subsidies that improve the competitiveness of Japan's exports. Government in Japan is fundamentally involved in the success of Japanese business and industry.

In sharp contrast, the current administration is trying to convince the Congress and the American people that there is no mutually beneficial relationship for Government and business in the United States. Instead, this administration insists that governmental involvement of almost any kind is antithetical to the best interests of business.

Admittedly the American and Japanese economies are different. But the differences aside, we need only to listen to the voices of American businessmen to know that our Government is failing in its responsibilities to business. A recent survey of chief executives of 50 major American-based corporations revealed that, "There is a common feeling among many CEO's that the adversarial interrelationships which exist among business, labor, government and the news media must be eliminated." The same survey found that the "President should be less dogmatic."

American business needs Government. It needs Government to negotiate agreements with foreign nations under which favorable trade relationships can be established. But, in the absence of completely open, free-trade relations, it also needs Government to provide financing credits and restrictions on foreign access to the U.S.

market so that American business may remain competitive.

It needs Government not only to establish fair and reasonable regulations at the Federal level but to avoid inconsistency in State regulation of business and industry. It needs Government to maintain a strong commitment to research and development. And, it also needs Government to insure that our educational system is properly funded so that our children will receive the kind of education that will contribute to the long-term growth of our economy.

Mr. Speaker, for all of these reasons I urge my colleagues to think twice before agreeing that Government and all its programs are bad. Contrary to administration claims, many of the changes being made in Government programs emasculate essential programs—programs without which American business and industry may suffer an insurmountable competitive disadvantage.

Thank you.●

A TRIBUTE TO J. DRAKE EDENS, JR.

HON. FLOYD SPENCE

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 11, 1982

● Mr. SPENCE. Mr. Speaker, South Carolina recently lost a distinguished son and leading citizen when J. Drake Edens, Jr., of Columbia drowned on July 30.

Drake was best known as the father of the modern Republican Party of South Carolina. He had, however, many other interests which, despite poor health, he pursued with vigor and enthusiasm.

One of Drake's greatest qualities was his ability to get along with other people, including political rivals. He enjoyed the respect of everyone. Perhaps nothing illustrates this better than the fact that, at the time of his death, he was serving as chairman of the South Carolina Wildlife and Marine Resources Commission, a position to which he was appointed by Democratic Gov. Richard W. Riley.

My own ties with Drake go back to the early 1960's and our struggle to bring a two-party political system to our State. He was much more than a political ally even though one could not ask for a more valued adviser and supporter. He was also a devoted and treasured friend. I feel a great sense of personal loss. I shall miss him.

Both of Columbia's daily newspapers paid editorial tribute to Drake and I would like to include those editorials at this point.

[From the Columbia Record, Aug. 3, 1982]

J. DRAKE EDENS, JR.

Few people in politics or public life elicited as much respect and affection and personified as much integrity as did J. Drake Edens Jr.

There was ample testament to those qualities in the memorials spoken publicly and privately after his untimely death by accidental drowning last week.

Drake Edens tackled life's challenges with vision, dedication and gusto despite painful physical disabilities in recent years. As much as any South Carolinian, he put the Republican party on the state political map in the early '60s. Largely through his efforts, South Carolina became a two-party state, giving the electoral process an added dimension of vitality and viability.

Starting as a grassroots volunteer, Drake Edens worked his way up, becoming state GOP chairman and finally national committeeman. His reputation was such in the higher echelons of the party that he served a seven-year stint as vice chairman of the Republican National Committee.

But as posthumous comments clearly indicated, the respect for Drake Edens crossed party lines. Gov. Dick Riley, a Democrat, appointed him chairman of the South Carolina Wildlife and Marine Resources Commission.

Drake Edens applied to that task an unusual dedication and enthusiasm, nurtured by a lifetime's love for the outdoors. An avid and knowledgeable sportsman, he advocated a policy of openness from which the media and, ultimately, the public were the chief beneficiaries.

In his private life, Drake Edens was a devoted family man and manager of a variety of business interests which attested to his intelligence and initiative.

Politics, public service and private enterprises were well-served over the years by J. Drake Edens Jr., tragically dead at the too early age of 57.

[From the State, Columbia S.C., Aug. 4, 1982]

J. DRAKE EDENS

J. Drake Edens truly believed in the American ethos and did as much as any man his age to promote those unique qualities in our national life.

He inherited enthusiasm for the private enterprise system from his family of successful merchants. He learned early the old-fashioned, personal values in a public school system which then emphasized individual responsibility. As a drill instructor at Parris Island in World War II, he instilled discipline and patriotism in young Marines.

Drake Edens' strong conservative convictions led him to the national political arena where he was recognized for undaunted leadership in the state and national Republican party. During the turbulent 1960s, he was instrumental in establishing genuine two-party Presidential elections in this once-upon-a-time solidly Democratic state.

A high point of his political activity came at the National GOP convention in 1964, when, as chairman of the S.C. delegation, he rose to announce the delegation vote that provided U.S. Sen. Barry Goldwater the Presidential nomination. The S.C. GOP convention had been the first to endorse Mr. Goldwater months earlier, pushing him into prominence as a challenger to President Lyndon B. Johnson.

Mr. Edens was a devoted husband and father, an active Methodist, and a dedicated

conservationist, having served in national and state offices, the latest as chairman of the State Wildlife and Marine Resources Commission. In recent years he pursued these interests despite painful physical ailments that would have slowed many another man.

We know of few South Carolinians who were more respected than Mr. Edens. His death by drowning at age 57 is distressing.●

U.S. DISTRICT COURT IN BOULDER, COLO.

HON. PATRICIA SCHROEDER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 11, 1982

● Mrs. SCHROEDER. Mr. Speaker, I am proud to introduce today, on behalf of the Colorado congressional delegation, a bill to authorize holding U.S. District Court for the District of Colorado in Boulder, Colo.

By amending 28 U.S.C. 85 to add the city of Boulder to the other Colorado cities where Federal court can convene would make the judicial process more accessible to the citizens of Boulder County. The U.S. District Court in Denver frequently hears cases in which all or most of the parties, as well as the jurors, are from Boulder County. The time and expense involved in traveling to and from Denver sour peoples' involvement and interest in the judicial system.

Moreover, Boulder is the only home in Colorado, other than Denver, of a major law school. This amendment would provide the students and faculty at the Fleming School of Law on the University of Colorado campus an easy opportunity to view Federal district court in action.

The moot courtroom located there could host an occasional trial or motion hearings at no or low cost. The dean of the law school, eager to see this bill become law, views this use of the courtroom as an excellent teaching tool. Here law students could see Federal court in action, learn the procedures and the arguments used by the lawyers, and evaluate what they saw back in the classroom. Under extraordinary circumstances and with prior consent, one trial was held there. It was well attended by the students. Both the presiding Federal judge and the law school dean were pleased at the turnout and suggested making this a regular feature.

This legislation is a simple, no-cost idea that will have tremendous teaching value for Colorado's aspiring law students.●

NEW LIGHT ON SMOKING VERSUS HEALTH DEBATE

HON. THOMAS J. BLILEY, JR.

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 11, 1982

● Mr. BLILEY. Mr. Speaker, the Subcommittee on Health and the Environment may soon be marking up H.R. 5653, the Comprehensive Smoking Prevention Education Act. I feel compelled at this time to bring some very important information to my colleagues' attention. The merits of this legislation have been questioned by many sources, most notably by Philip R. J. Burch, professor of medical physics, the University of Leeds, Leeds, England. Professor Burch has provided me with a comprehensive memorandum outlining several misleading factors upon which H.R. 5653 is based. I wish to share this memorandum with my colleagues in the hope that it will shed some new light on the smoking versus health debate.

DEPARTMENT OF MEDICAL PHYSICS,
THE GENERAL INFIRMARY,
Leeds, England, March 12, 1982.
Congressman THOMAS J. BLILEY, JR.,
Cannon Office Building,
Washington, D.C.

DEAR CONGRESSMAN BLILEY. Please find enclosed a somewhat hastily compiled critique of Mr. Waxman's Bill together with reprints of supporting papers that set out my indictment of orthodoxy in technical detail. Should you require further amplification or clarification of obscure points I shall be pleased to give you whatever help I can.

I trust that this monstrous Bill will suffer a resounding defeat. It constitutes a serious danger to public education.

Yours sincerely,

P.R.J. BURCH, Professor.

COMMENTS ON MR. WAXMAN'S BILL TO
AMEND THE PUBLIC HEALTH SERVICE ACT
(By Prof. P.R.J. Burch)

In this memorandum I criticize the statements made in Sec. 2 of the Bill about the effects of cigarette smoking on overall mortality, lung cancer and heart disease. These are issues that I have personally studied in some detail. We are told in Sec. 2 that "The congress finds" six examples of the dangers to human health presented by cigarette smoking. The manner in which these "findings" were made is not described but I presume that the reports of the Surgeon General have served as a basis for the allegations.

MORTALITY FROM ALL CAUSES

"Finding (1)", at the top of page 2, is ambiguously worded: "cigarette smoking is the largest preventable cause of illness and premature death in the United States and is associated with the unnecessary deaths of over three hundred thousand Americans annually." (Emphasis added.) I infer that "is associated with" is meant to be understood as "causes" although, in scientific parlance, the two terms are far from synonymous. Logicians, statisticians and competent scientists are familiar with the aphorism: "association does not necessarily imply causation". The general tenor of the Bill leaves little doubt, however, that we are intended to conclude that cigarette smoking causes at

least 300,000 unnecessary deaths in America. Nevertheless, the use of the expression "is associated with" in the Bill is of more than pedantic interest because the frequent identification in epidemiology of association with causation is a source of many misunderstandings and fallacies. When analyzing epidemiological findings it is of the utmost importance that the distinction between association and causation should always be borne clearly in mind; those who appreciate the distinction will be careful to observe it in their written statements. In discussing "association", Sir Austin Bradford Hill wrote in his "Principles of Medical Statistics": "Merely to presume that the relationship is one of cause and effect is fatally easy; to secure satisfactory proof or disproof, if it be possible at all, is often a task of very great complexity". The degree of complexity is commonly, if not invariably, underestimated in the Surgeon General's reports.

The figure of 'over 300,000' appears to be based on: (a) the Surgeon General's (1979) conclusion (p 2-42), 'The overall mortality ratio for all smokers of cigarettes is about 1.7 compared to nonsmokers'; and (b) the assumption that this association between cigarette smoking and overall mortality is causal in origin. Given this kind of association—and the others implicit or explicit in the Bill's (2) to (6) of Sec. 2—we have in all instances to consider the following possibilities:

(i) Smoking causes the morbid or fatal disorders. This is the straightforward causal hypothesis.

(ii) The associated diseases, or one or more connected pre-disease conditions, cause the smoking. (I call this the 'converse causal' hypothesis.)

(iii) A third factor causes, or predisposes to, both the smoking and the associated diseases. This is sometimes described as the 'common cause' hypothesis and it is often discussed in genetic terms: the genotype predisposes both to the smoking and to the diseases and the association arises at the genetic level. In this latter form, the common cause hypothesis is often referred to as the 'constitutional' hypothesis.

(iv) Any combination of (i) to (iii) may be needed to explain the overall association, whether negative or positive.

Our ultimate scientific objective should be the estimation of the separate contributions (i) to (iii), together with their respective confidence limits. The Surgeon General's reports do not acknowledge, and appear to be unaware of, these obligations.

I have studied the relation between smoking and overall mortality in England and Wales and a reprint of my paper on the subject is enclosed (Smoking and Mortality in England and Wales, 1950 to 1976, Journal of Chronic Diseases, 34, 87-103, 1981). The paper contains an analysis of the temporal trends in sex- and age-specific mortality (all causes) in relation to the corresponding trends in cigarette consumption. An important cause of the consistent decline in mortality, which accounts, in effect, for virtually all of the fall over the age range 20-44 years in both sexes, is shown to be the near-eradication of tuberculosis. There is no indication that the temporal changes in cigarette smoking have modified this fall.

My analysis of temporal (secular) trend is one of the few approaches that addresses itself to the causal/constitutional issue. Another is the randomized controlled intervention trial in which one randomly allocated group of smokers, the intervention group, is

subjected to intensive pressure to give up smoking while the other randomly allocated group, the 'normal care' group, is not subjected to special pressures. Randomization is a device that eliminates the bias of self-selection.

Such a trial has been carried out by Professor Rose and Dr. Hamilton in England. It is reviewed in my paper but here it is sufficient to quote their main findings: the death rate in the randomly assigned 'intervention' group, which had a substantially reduced level of smoking, was 1.74 deaths per 100 man years (based on 98 deaths) and that in the randomly assigned 'normal care' group, with a relatively high level of smoking, was, paradoxically, only 1.63 deaths per 100 man years (based on 94 deaths). The authors concluded in connection with the outcome in the 'intervention' group: 'Disappointingly, we find no evidence at all of any reduction in total mortality.'

The final paragraph of my conclusions reads as follows: 'This paper has shown that secular trends in overall mortality in England and Wales give no consistent indication that they were appreciably influenced by changes in cigarette consumption. The two other types of critical evidence reviewed here—the preliminary results of a randomized controlled intervention trial and findings from MZ and DZ twins discordant for smoking—both suggest that the observed mortality ratios are more likely to result from a constitutional than a causal association. But so far, both studies suffer from small numbers and definitive conclusions on this issue cannot yet be drawn from them. On scientific grounds there can be little doubt that the conclusions drawn by the Royal College of Physicians and the Surgeon General of the United States about the lethality of smoking are precipitate and unwarranted. In the light of the critical evidence, I am unable to find any scientific justification for the assertion in the Bill that cigarette smoking causes in the United States over 300,000 unnecessary deaths annually.'

HEART DISEASE

Following mortality from all causes it is convenient to consider heart disease because, as the Bill states, it accounts for nearly one half of the deaths in the United States. The Bill adds: one third of these deaths are attributable to smoking.

My recent paper published in this field is: *Ischaemic Heart Disease: Epidemiology, Risk Factors and Cause* (Cardiovascular Research, 14, 307-338, 1980), a reprint of which is enclosed. Among the various so-called risk factors discussed in the paper is cigarette smoking. I analyse the sex- and age-specific mortality from ischaemic heart disease in six populations, including U.S. Whites and U.S. Non-Whites, and give special attention to the intriguing fall in mortality from the disease in the United States over the period, 1968 to 1975. The data from all populations have certain special features, including a particular relation between the sexes, that facilitate analysis. These features allow conclusions to be drawn that do not depend too critically on errors of death certification. J. C. Kleinman, J. J. Feldman and M. A. Monk has previously observed (American Journal of Public Health, 69, 795-802, 1979): Smoking changes among women were not generally consistent with declines in CHD mortality. My analysis agrees with theirs and it indicates that any causal influence of smoking on the fatal disease process is either small or non-existent. The factors responsible for the fall in mortality in the United States in

both sexes are unconnected with smoking; over the age range 40 to 64 year they make an effectively equal impact on White males and females and are therefore ubiquitous. They are likely to be either microorganisms, for example viruses, or allergens.

LUNG CANCER

Partly because of past and present errors of clinical diagnosis and death certification it is impossible to derive precise quantitative conclusions about the role of cigarette smoking in the pathogenesis of lung cancer. I have published three major papers on this subject, including an invited one presented to the Royal Statistical Society in London on May 17, 1978 (reprints enclosed). In addition, a substantial portion of Chapter 10 of my book, *The Biology of Cancer: A New Approach* (University Park Press, Baltimore, 1976), is devoted to the relation between smoking and lung cancer.

Recognizing that simple associations and evidence for lung cancer in voluntary ex-smokers do not resolve on the causal/constitutional issue, and bearing in mind the Royal College of Physicians (1971) stricture: 'The chief reason for rejecting the genetic hypothesis is its inability to account for the enormous rise in death rates from lung cancer in the past half century', I have given special attention to the sex- and age-specific death rates recorded for lung cancer in England and Wales. (Thanks to the work of the late Professor R. D. Pass in England and that of Dr. K. McD. Herrold in the United States it is now apparent that the converse causal hypothesis—for example, a pre-cancerous inflammatory condition of the lungs and bronchi causes the smoking—has little or no relevance to this context.)

Careful study of the recorded increases in mortality from lung cancer in England and Wales shows that, although the rises have been generally larger in men than in women, the fine structure of the changes has been extraordinarily synchronous in the two sexes. It follows that the main causes of the increases have also been synchronous in men and women. Smoking cannot have been a main cause because the sharp rise in cigarette smoking by women occurred some 30 years after that by men. More detailed calculations, including those of the sex-ratio of the recorded changes in mortality described in my Royal Statistical Society paper, confirm that smoking cannot be implicated as the main cause of the recorded rises in either sex. Indeed, it is readily shown that these rises are many times greater than those predicted from the causal hypothesis and the data for tobacco consumption. It is now widely agreed that changes in diagnostic practice have been responsible for a substantial part of the recorded increases. However, because they are so large they could readily conceal a genuine component attributable to smoking.

In an attempt to explore this latter possibility and to minimize the complications that arise from errors of death certification I have studied the details of recorded sex- and age-specific mortality from lung cancer in relation to those of cigarette consumption for the relatively recent period, 1950 to 1975 (*Journal of Chronic Diseases*, 33, 221-238, 1980) and the still more recent period, 1974-1978 (*Medical Hypotheses*, 7, 1461-1470, 1981). To test causal hypotheses mathematically we have to make specific assumptions about mechanisms; mine are based on evidence independent of that being examined in the papers cited in this paragraph. The precipitator (causal) hypothesis emerges as being consistent with a wide

range of evidence that refutes initiator and promoter hypotheses. Unfortunately, the precipitator hypothesis is not supported by the analysis of post-1950 trends. However, recent direct post-mortem studies of the accuracy of certification in England (West Midlands) and Scotland (Edinburgh) show that substantial errors in the clinical diagnosis of lung cancer persist. Probably many of the anomalies in the epidemiological data should be attributed to them. In the Abstract of my *Journal of Chronic Diseases* paper I concluded: 'In view of the dubious reliability of the potentially critical data analysed here and elsewhere, it is questionable whether any firm conclusions can as yet be drawn about 'dose-response' relations or cigarette smoking and lung cancer.'

The criterion of consistency is usually applied to a causal relationship. In epidemiology it is impossible to replicate observations as in experimental science because of difficulties, for example, in characterizing, and standardizing for, the relevant parameters of smoking, drinking, etc. It is seldom possible to allow adequately for errors of diagnosis. Nevertheless, in commenting on the 1964 report of the Surgeon General, Professor Mervyn Susser was able to write in his 'Causal Thinking in the Health Sciences' (1973): 'Thus 28 of 29 case-control studies and all seven cohort studies reported in *Smoking and Health* found an association between smoking and lung cancer and roughly the same relative risks.' Had investigation stopped at that point the causal hypothesis could not have been faulted because of inconsistencies over relative risks. The early studies were, however, confined to Western, largely Caucasoid, populations. During the past decade reports on Oriental populations have been published and they reveal a very different picture. The differences are so large it is difficult to avoid the conclusion that some of them should be attributed, in one way or another, to genetic factors.

In the American Cancer Society study the mortality ratio for cigarette-only smokers, versus those who never smoked regularly, was found to be 10 for men and 2.6 for women; for British male doctors the ratio was found to be about 14. However, the corresponding ratios in Japan are 3.8 for men and 2.4 for women; among Chinese in Singapore they are 3.8 (men), 3.6 (non-Cantonese women) and 1.6 (Cantonese women); in Bombay, India, they are 2.2 (sexes combined, all cases) and 1.7 (sexes combined and cases were confirmed by histology or cytology); in Northern Thailand they are 1.8 (men, univariate analysis), 2.1 (women, univariate analysis), but only 1.65 and 1.63 respectively (neither significantly greater than unity), in a multivariate analysis that allowed for several 'risk factors'. A mortality ratio of only 1.57 (sex unspecified) is reported indirectly from the Chinese mainland where, it is said, scientists do not accept that smoking is the main cause of lung cancer. The incidence of lung cancer in Chinese women in Hong Kong is among the highest for the world's women but the risk in cigarette smokers relative to nonsmokers was found to be only 1.74; 53.4 percent of patients had never smoked cigarettes.

A particularly interesting study has been made in Hawaii of lung cancer in women of Hawaiian, Japanese and Chinese origin: relative risks of 10.5, 4.9 and 1.8, respectively, were found. The authors concluded: 'Cigarette smoking is clearly not the only cause, nor even the major cause, of lung cancer in all populations of women.' Although proper

standardization between different populations cannot be carried out, the wide contrasts in mortality ratios between male Caucasoid populations on the one hand, and male Oriental populations on the other, suggest that this generalization can probably be extended from women to men.

Another aspect of consistency can be studied by relating mortality from lung cancer to previous per capita cigarette, or total tobacco, consumption in different countries. When this is done (see Figs. 10.33 and 10.34, p. 352 in my book) a very wide scatter of points is obtained in contrast to the approximately linear relation predicted by the causal hypothesis. The wide scatter of points again suggests that factors other than cigarette smoking are likely to play an important part in determining mortality from lung cancer. In view of the direct evidence for genetic factors in lung cancer it would be most surprising if they made no contribution to these many inter-population differences.

There can be little doubt that constitutional factors make some contribution to the strong association between cigarette smoking and lung cancer in Western Caucasoid populations; it is not yet possible to estimate its extent. In the words of Dr. P. D. Oldham (Journal of the Royal Statistical Society, A141, 460-462, 1978): "... We still do not know how cigarettes cause lung cancer, nor even, if we are particularly rigorous in our use of scientific logic, whether they do."

CONCLUSIONS

According to Alvan Feinstein, Professor of Medicine and Epidemiology at Yale University, and himself a distinguished clinical epidemiologist, "a licensed epidemiologist... can obtain and manipulate the data in diverse ways that are sanctioned not by the delineated standards of science, but by the traditional practice of epidemiologists." It must be clear from my critique that I agree fully with Professor Feinstein's condemnation. The combination of powerful and admirable humanitarian impulses with an invalid methodology—the *trahison des clercs*—has generated many aetiological fallacies and often substituted certainty for agnosticism. Although I have every sympathy with the desire to inform the public of genuine dangers to health I can in no way condone the abandonment of "the delineated standards of science".

If cigarette smoking causes "unnecessary deaths" they form too small a proportion of the total to be detectable by rigorous methods. In short, I regard the Bill as misguided. Mr. Waxman has been misled.●

NUCLEAR ARMS LIMITATIONS

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 11, 1982

● Mr. DERWINSKI. Mr. Speaker, the United Hellenic American Congress is an organization which acts as the mouthpiece for the Hellenic-American groups across the country. Opinions on current issues of concern to Greek Americans were voiced in several resolutions adopted by the steering committee of the United Hellenic American Congress.

One such resolution adopted included support for the Strategic Arms Reduction Talks (START), and for progress in nuclear arms limitations. I wish to include this resolution for the Members' perusal:

RESOLUTION

Whereas, Christ blesses the peacemakers and calls them the children of God (Mt. 5:9) and the Holy Gospel further exhorts us to "follow after those things which make for peace." (Rom. 14:19); and

Whereas, Peace is the goal and hope of humanity but peace to be a real and lasting peace must be a peace based on mutual cooperation and not blind trust; and

Whereas, The United States of America and the Soviet Union have just begun Strategic Arms Reduction Talks (START) in Geneva, Switzerland; and

Whereas, Arms reduction talks are also continuing with respect to medium range nuclear armaments in the European areas; and

Whereas, The survival of civilization as we know it depends upon the elimination of the risk of nuclear war; now, therefore, be it

Resolved, by the Steering Committee of the United Hellenic American Congress that the Governments of the Soviet Union and the United States of America are urged to reach agreement with respect to nuclear arms limitations and reductions that are both meaningful and verifiable and that will lead to the eventual elimination of nuclear arms from the arsenal of all nations of this world; and, be it further

Resolved, That a suitable copy of this resolution be presented to the Secretary General of the United Nations, the President and Secretary of State of the United States of America, the Chairmen of the appropriate Congressional Committees of the United States Congress, and the appropriate officials of the Government of the Union of Soviet Socialist Republics.

Adopted by the members of the Steering Committee of the United Hellenic American Congress this second day of August, 1982 at Chicago, Illinois.

ANDREW A. ATHENS,
National Chairman,
United Hellenic American Congress.●

STRATEGIC TRADE ACT OF 1982

HON. BEVERLY B. BYRON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 11, 1982

● Mrs. BYRON. Mr. Speaker, I rise today to alert my colleagues in the House to the operations of the organization responsible for coordinating international exports, and to the need to change the orientation of this important group.

The organization to which I refer is the Coordinating Committee for Multilateral Export Controls. This group, known as COCOM, was organized in 1949 and began operation in early 1950. By 1953, COCOM attained the membership that has survived to this day, being the NATO nations less Iceland and including Japan. The broad purpose of COCOM is to coordinate the restrictions on the sale and export

of materials and technology to the Communist bloc.

COCOM operates by formulating lists of goods and technologies that the member countries agree should not be exported to the Communist bloc. The lists are comprised of technical specifications for controlled categories of equipment and technologies. The specifications are then applied by each member country to restrict their own exports. When a country recognizes that a proposed export to a Communist bloc country would conflict with a COCOM list specification, the country can either deny permission for the export or apply for an exception to the COCOM controls. COCOM lists are divided into three general areas: A munitions list which includes overtly military items, an atomic energy list which covers materials and reactor technology, and an industrial/commercial list. The controls exercised under this last category, the industrial/commercial list, cause the highest degree of international interest and, sometimes, unrest.

Control of industrial and commercial items is based on the observation that these items have the propensity to be used in both civilian and military applications; the shorthand for this class of items and their related technologies is dual use. It is essential to keep in mind that it is the risk that a proposed export will be applied to a military purpose that underlies the COCOM controls on these items. For example, a precision grinding machine proposed for export to the Soviets for manufacturing steam turbine blades could be diverted to producing better blades for military jet engines.

Let me return for a moment to the status of COCOM to illustrate a problem that needs a solution. COCOM is a voluntary organization, with no treaty status or enforcement mechanism, and indeed very little visibility at all. Some members do not officially acknowledge their participation. This loose status, while it may be politically desirable in some countries, leads to actions which are dangerously contrary to the purpose of COCOM. In the export of dual-use items, there is an attitude among high-technology exporters along the following lines: "If the Soviets can get the goods or technology from another source, why should my country prohibit the export?" In other words, a perception of lack of coordinated control is used as a basis to further diminish control. This is indeed a powerful argument. But instead of following it to its logical conclusion, the abolishment of all international security controls in favor of business opportunity, I believe that this Nation should take the lead in restating the basis of COCOM and should work toward an internationally recognized status for this important organization.

The basis of COCOM, that of controlling and coordinating Western exports in favor of international security, remains viable and appropriate today, even as it did in 1950. The Strategic Trade Act of 1982, includes a clear mandate to increase the U.S. participation in COCOM and to seek treaty status for this organization. Increased emphasis on COCOM control, and the awareness that it implies an international policy, can produce more effective controls on the flow of technology to the Soviet military machine.

Along with increasing U.S. participation in COCOM, our bill seeks a reorientation in the policy basis for the U.S. participation. Other countries have perceived that U.S. actions in COCOM have been economically motivated to create market advantages for U.S. companies. Recognizing that the fundamental basis of COCOM is international security, the Strategic Trade Act enhances the military review of COCOM-list exports and the overall military presence in the COCOM process. By stressing the military security aspects of COCOM, the United States can underscore the fact that COCOM must be viewed as a security organization. In taking this lead, and by showing that increased military review of COCOM procedures is valuable and appropriate, the Strategic Trade Act is intended to induce COCOM members to increase their military involvement in the export process. Indeed, a recent article in the Baltimore Sun includes an assertion by a COCOM expert that most of the COCOM members do not now include military experts in their COCOM delegations.

In summary, I observe that loose controls lead to international insecurity. The United States must take the lead to tighten controls. The Strategic Trade Act provides a means for accomplishing this worthwhile end. I see no reason why we should finance such a large defense budget in the United States, and then tolerate an export policy from our allies which eventually reduces our security and the security of the free world.●

CONRAIL REPORTS BIGGEST PROFIT EVER

HON. BILL GOODLING

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 11, 1982

● Mr. GOODLING. Mr. Speaker, the Consolidated Rail Corporation (Conrail) has reported profits of \$56.2 million in the second quarter of this year, marking its biggest profit since its formation in 1976, and nearly four times the net it reported for the same period of last year.

The carrier achieved the higher earnings despite a drop of nearly 15 percent in freight traffic.

As everyone in this Chamber knows, Conrail lost money during each of the previous 6 years since its operations began on April 1, 1976, with losses totaling some \$1.5 billion.

In its recent Report to Congress, the United States Railway Association (USRA), the nonprofit Federal corporation which developed the plan for reorganizing seven bankrupt railroads in the Northeast quadrant of the country into the Conrail system, noted that there have been major changes in productivity and cost control within Conrail. I might add that this profit was realized in the face of a recession that has impacted more heavily on the region served by Conrail than on other parts of the country.

If I may quote:

Senior management carried out its commitment to find ways to tailor assets and costs to current traffic and revenue. Conrail employees contributed both by wage concessions and by participation in an extraordinary growth in cost consciousness.

Shippers adjusted to deregulation—some shifting to other carriers and modes, others to Conrail—as prices and services were tailored more effectively to the railroad's inherent competitive position.

I am pleased that the Federal Government is beginning to realize some profitable returns on its multiyear \$3.3 billion investment in plant and equipment, and I hope that this signals the establishment of Conrail as an economical and reliable source of freight transportation service to the markets of the region.

The USRA analysis is consistent with this administration's free market transportation policy, particularly when it notes that in early 1982 Conrail "continues to demonstrate the ability to adjust to revenue changes, an achievement crucial to further progress towards viability." Conrail is undergoing substantial changes in its route structure as a result of increased freedom under Federal law; pivotal in the achievement of this goal was passage by this body of the Staggers Act of 1980 and the Northeast Rail Service Act of 1981 in combination with recent ICC rulings. All of these factors have allowed the quasi-Federal Government railroad to eliminate unprofitable lines, as well as to more efficiently handle changes in traffic volume and mix.

I commend all those involved with Conrail, especially its employees in the 19th District of Pennsylvania and throughout the Northeast, and I congratulate Chairman Stanley Crane, formerly of Southern Railway, for this abrupt turnaround.●

SCOTT JOPLIN COMMEMORATIVE STAMP

HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 11, 1982

● Mr. MAZZOLI. Mr. Speaker, for a number of years—particularly since the rebirth of ragtime in the 1970's—various individuals and groups throughout the Nation have petitioned the U.S. Postal Service to issue a commemorative stamp honoring Scott Joplin, the king of ragtime composers.

In December 1979, one of my former staff assistants founded the Northern Virginia Ragtime Society, which today is one of only two organizations in the United States dedicated to the promotion and preservation of classical ragtime and related music. In 1980, the local society requested my assistance in their efforts to revive an interest in behalf of the Joplin stamp.

On November 20, 1980, I wrote to the Citizens' Stamp Advisory Committee of the U.S. Postal Service, expressing my interest and support of the proposal and the following day dispatched a letter to our colleagues asking them to express a similar interest to the Postal Service. The response was so overwhelming and impressive that in July of last year the Service announced that such a stamp honoring Scott Joplin would be issued as part of the black heritage series in 1983.

I was interested to read in a recent issue of Linn's Stamp News that the Postal Service had unveiled the design of the Joplin stamp on July 16 at a ceremony aboard the *Goldenrod Showboat* at Riverboat Landing in St. Louis, Mo.

The article is printed in its entirety at this point in the RECORD:

[From Linn's Stamp News, Aug. 2, 1982]

U.S. UNVEILS JOPLIN DESIGN IN ST. LOUIS

The U.S. Postal Service unveiled the design of a commemorative stamp honoring noted ragtime composer Scott Joplin.

The stamp will be issued on an unspecified date in 1983 as part of the continuing Black Heritage USA series, all of which—including the Joplin design—has been designed by Jerry Pinkney, Croton-on-Hudson, N.Y.

The unveiling took place July 16 in St. Louis, Mo. Assistant Postmaster General Nancy George (USPS Employee Relations Department) unveiled the design with the assistance of ragtime historian Trebor Tichenor during an 11 a.m. ceremony aboard the *Goldenrod Showboat* at Riverboat Landing.

A Registered National Historic Landmark, the *Goldenrod* is "the last authentic showboat surviving on the Mississippi."

The vertically-oriented, standard-sized commemorative features a head and shoulders portrait of Scott Joplin based on a photograph found on the title page of *The Collected Works of Scott Joplin II*, edited by Vera Brodsky Lawrence.

Superimposed to the lower right of the stamp is a drawing of Joplin playing an upright piano. The stamp made its debut without denomination (inscribed simply "00c") due to the advance unveiling.

Scott Joplin was born in 1868 in Texarkana, Tex., just five years after the Emancipation Proclamation and three years after the Civil War. His musical interests were developed at an early age, first with the guitar, then the bugle and—at the age of 7—the piano.

In 1885, 17-year-old Joplin moved to St. Louis, where he hoped to find a less restrictive atmosphere for his style of music than existed in Texarkana. It was this port city along the lower banks of the Mississippi River where he composed and performed much of his music during the late 19th and early 20th centuries.

Playing in the waterfront gambling halls and cafes, this quiet, intelligent man strove to develop a new American musical art form: ragtime.

Joplin successfully combined in his compositions the unself-conscious charm of late Victorian music and the lively qualities of the folk song and dance which had roots going back to the pioneer days of America.

In her address at the stamp design unveiling ceremony, Nancy George noted, "Some regard his ragtime as a crystallization of all the ingredients that make up our nation. In terms of style and scope, his works have been called 'the precise American equivalent of minuets by Mozart, mazurkas by Chopin and waltzes by Brahms'."

Eubie Blake, who has written and played much ragtime and continues to perform at the age of 99, is probably one of the few individuals still living who had the pleasure of hearing Scott Joplin perform in person.

Blake has proclaimed, "Scott Joplin's music was classical ragtime; although it was the source idea, other players played it differently . . . none of them sounded like him."

Besides the ragtime music for which he has received worldwide acclaim, Joplin also had a distinguished career as a composer of marches, operas, and other musical pieces. At the time of his death, he was reportedly working on a symphony.

In the later years of his life, his desire to concentrate on more serious compositions, such as operas and symphonies, led to a decline in both his health and his finances. The immense popularity of his ragtime also faded until its revival in the last decade or so.

In the 1970s, 60 years after his death, ragtime finally began to receive the academic recognition and respect it had long deserved. Contributing to the revival was the scoring of the popular award-winning motion picture, "The Sting," with Joplin's music in 1973.

The renewed interest continued to build, and in 1976 the Pulitzer Prize Committee awarded exceptional posthumous recognition to Scott Joplin for his musical genius and talent. Indeed, ragtime has become known as a truly American musical art form.

In a recent work entitled "Ragtime: A Musical and Cultural History" (Univ. of Calif. Press, 1980) Edward A. Berlin, the musicologist, stated:

The resurrection of ragtime in the 1970's is a phenomenon unprecedented in America's musical history; never before has a long-buried style been so widely and eagerly embraced by a mass public.

The issuance of the Joplin commemorative stamp on June 9, 1983, should prove a suitable sequel.

As I stated in my initial letter to the Postal Service:

Joplin died at the early age of 49. This multi-talented Black American never received the true recognition he deserved during the ragtime era. It is fitting to give posthumous recognition to him for his outstanding contributions to American art and culture.●

LET'S KEEP THE ARMS RACE OUT OF SPACE

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 11, 1982

● Mr. BROWN of California. Mr. Speaker, this week and next, the United Nations is conducting the Second United Nations Conference on the Exploration and Peaceful Uses of Outer Space (Unispace '82). I have the privilege of representing the United States as a congressional adviser to the U.S. delegation, and in fact, will be leaving tonight to join the delegation in Vienna.

As my colleagues may know, I have been concerned for some time with the trend toward more and more military emphasis on our space activities. I plan to share my concerns at the Unispace Conference in the next few days. I know that many nations will be represented there who are worried about the military uses of space as envisioned not only by our own Government, but by the Soviet Union as well.

A weapons race in space would do more than extend the battleground into space; it could seriously impair military communication and surveillance activities of all nations. This would destabilize an already fragile balance of power, if indeed one even exists.

Mr. Speaker, the following Christian Science Monitor editorial succinctly outlines the case I plan to make in Vienna this week. I urge my colleagues to review it.

The article follows:

[From the Christian Science Monitor, Aug. 9, 1982]

KEEP WEAPONS OUT OF SPACE

The United Nations conference on peaceful uses of outer space opening in Vienna today prompts urgent questions: Is outer space to be explored and used for the constructive purpose of improving the lives of all peoples of planet Earth? Or is it to become the dangerous battleground of military rivalry first between the superpowers and ultimately among other nations?

Many fear the latter if the United States and the Soviet Union do not soon get together not only to control the arms race on earth but to prevent it from spilling over into space. The last bilateral talks ended in 1979. It is time they were resumed.

This is not an item on the agenda of unispace '82—the second conference of its kind.

Some 2,000 people from 100 countries gathering there are concerned primarily with finding ways for the developing nations to participate in space programs to improve education, communications, navigation, weather prediction, and the like. Tremendous progress is being made in the use of satellites for such peaceful purposes and the United States and other Western nations are making a substantial contribution in this whole field.

But there is little doubt that alarm about the growing military competition in space will come up at conference sessions. For if the Americans and the Russians continue with their programs for putting antisatellite weapons (ASATs) in space and developing such systems as laser and particle beam weapons, international cooperation for peaceful uses of space will be set back. International law prohibits the superpowers from deploying "weapons of mass destruction" in space, i.e. nuclear warheads. But both are working on space-based weapons systems that could either damage satellites or electronically impede their functions. With the Russians believed considerably ahead of the United States in developing such weaponry, the Reagan administration has expanded its own program.

There are grave dangers in the trend. The United States and the Soviet Union depend more and more on outer space for the daily operation of their military forces. Thus, satellites are used to gather strategic intelligence and for communications purposes. They are also used to verify compliance with arms control agreements, including the SALT I, and the unratified SALT II treaties, and to provide instantaneous warning of the launching of enemy missiles. To deploy weapons that could interfere with these functions, therefore, would not enhance but reduce the security of each side.

Moreover, many scientists are skeptical that effective space weapons can be developed. Kosta Tsipis of the Massachusetts Institute of Technology, for instance, terms proposals for a laser antiballistic missile defense in space "little more than childlike, wishful fantasies of omnipotence." It would take, he says 100 years and \$100 billion just to transport enough laser fuel to space-based platforms.

Even if do-able, however, does the United States want to take the path of doing it? This year marks the 25th anniversary of the opening of the space age with the flight of Sputnik. It has been a quarter of a century of breathtaking progress in space exploration and of helpful international cooperation in the peaceful use of space. What a pity if further progress were threatened because the superpowers failed to reach an agreement to stop the madness of a space arms race.●

ON INFANT FORMULA

HON. TOM HARKIN

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 11, 1982

● Mr. HARKIN. Mr. Speaker, on April 29, 1982, 70 Members of Congress sent a letter to Helmut Maucher, president of the Swiss-based Nestle Co. commending him for Nestle's publicly announced intention to comply with the World Health Organization (WHO)

and UNICEF's International Code of Marketing of Breastmilk Substitutes. This letter, which was initiated by Mr. GILMAN, Mr. OBEY, Mr. ERDAHL, Mr. GORE, and myself, further called upon Nestle to give serious consideration to meeting in good-faith negotiations with the International Nestle Boycott Committee.

As we are all aware, Mr. Speaker, the 1981 World Health Assembly overwhelmingly adopted the WHO/UNICEF International Code as part of global effort to protect infant health. The U.S. Government cast the only negative vote against this code, resulting in widespread criticism from the Congress, press, and general public.

Nestle is the world's largest producer of infant formula and has long been criticized for aggressive and deceptive marketing. Many Americans have chosen to express their dissatisfaction with Nestle's callous policies by participating in a boycott of the company's products.

Over 110 national church, health, labor, women's, and consumer organization have endorsed the Nestle boycott. Over 80 of these groups make up the International Nestle Boycott Committee (INBC). The INBC membership includes, among others, the American Public Health Association, American Baptist Church, American Federation of Teachers, Ambulatory Pediatric Association, AFSCME, Church Women United, Church of the Brethren, Christian Church (Disciples of Christ), Consumer Federation of America, Dominican Fathers and Brothers, International Ladies Garment Workers Union, League of United Latin American Citizens, National Council of Churches, National Council for International Health, National Federation of Priests' Councils, National Organization for Women, National Women's Health Network, Presbyterian Church in the U.S.A., Sisters of Loretto, Unitarian Universalist Association, United Auto Workers, United Church of Christ, United Methodist Church, Board of Global Ministries, United Presbyterian Church, United Steelworkers of America and the YWCA.

Following Nestle's announcement in mid-March that it intended to comply with the WHO/UNICEF Code, the INBC immediately sent an invitation requesting a meeting with Nestle officials. The INBC was seeking clarifications on the substance of Nestle's new policy. They also hoped to negotiate an appropriate mechanism to insure that such policies will be followed upon termination of the boycott.

Although Nestle had refused for years to meet with the INBC, we hoped that Nestle's apparent new attitude would bring a greater willingness to face its critics.

Nestle responded to our letter on May 21. I would like to make some

comments on the four major points in Mr. Maucher's letter.

First, Mr. Maucher reiterated Nestle's decision to bring its infant formula marketing practices into compliance with the WHO/UNICEF International Code. However, it has now become quite apparent that these new instructions fall significantly short of the WHO/UNICEF standards.

At the 35th World Health Assembly held in May of this year in Geneva, Switzerland, several delegates from developing countries indicated their alarm with Nestle's interpretation of the code.

As stated by Dr. A. Maruping of Lesotho:

Infant formula sales promoting agents insist that they will function within their interpreted version of the International Code. . . . As many of us are aware, Nestle's interpreted version of the International Code has a number of unfortunate loopholes.

International pressure on the infant food manufacturers to respect the International Code and abide by it must be increased.

It now appears that Nestle is interpreting the code to its own convenience, continuing practices which were judged unsafe and dangerous during the code-drafting process. Nestle's instructions condone promotional practices such as mothercraft nurses, free formula samples, free formula donations which encourage routine hospital bottle-feeding, and personal gifts to health workers, all of which the WHO/UNICEF Code specifically prohibits.

Speaking at the 1982 World Health Assembly, Dr. A. Tarutia of Papua-New Guinea observed:

With all due respect to Nestle, the company does not particularly support the WHO/UNICEF International Code. In Nestle's view, the Code is too restrictive . . . so they are trying to rewrite the Code to suit their needs. . . . My delegation is convinced that no private sector has the right to amend the WHO/UNICEF Code.

More recently, the Washington Post reported on June 10, 1982, that UNICEF has formally rebuked Nestle officials for the "possibly harmful" way the company has chosen to interpret the WHO/UNICEF guidelines. The Post article quoted a letter from UNICEF Executive Director James Grant, in which he asked Nestle "not to use the name of UNICEF nor mine in any way which suggest our endorsement of Nestle's instructions."

The World Health Organization appears to have similar concerns. At a June meeting with Douglas Johnson, national chairman of the Infant Formula Action Coalition (INFAC), WHO Assistant Director General Dr. David Tejada commented that while WHO welcomed Nestle's publicly stated intention to abide by the code, they did not welcome the company's current interpretation. Both WHO and UNICEF are currently drafting a

joint document for their field staff clarifying the discrepancies of the Nestle interpretation.

Mr. Maucher's second major point deals with the issue of where the new Nestle instructions will apply. He states that his company will comply with individual national codes, while applying the Nestle policy in all countries "except for those provisions that are inconsistent with national or local requirements."

The question here is whether Nestle intends to continue practices restricted by the WHO/UNICEF code where national guidelines permit such practices. Mr. Maucher's letter leaves this matter in somewhat ambiguous terms, however, the introduction of Nestle's March 16, 1982, instructions to marketing personnel states that—

This policy is intended for application in countries where no specific measures have been, or are being taken to give effect to the Aims and Principles of the WHO code.

According to the World Health Organization's "Infant and Young Child Feeding—Progress Report by the Director General," most of the countries in which Nestle sells infant formula have taken some followup measures in terms of implementing the code. One can conclude that the Nestle policy, deficient as it is, will be implemented in only a handful of the countries in which the company operates.

Where national codes are in place, or in the process of formulation, Nestle's obligation remains with the WHO/UNICEF standards, unless specifically in violation of national law. Article 11.3 of the WHO/UNICEF Code clearly states that—

Independently of any other measures taken for implementation of this code, manufacturers and distributors of products within the scope of this code should regard themselves responsible for monitoring their marketing practices according to the principles and aim of this code, and for taking steps to ensure that their conduct at every level conforms to them.

One predominant reason for the variation between the WHO/UNICEF Code and some national codes is the intense lobbying efforts of the infant formula industry in developing countries. While claiming "cooperation" with national governments, Nestle and others have been working to obtain much weaker standards than those provided in the WHO/UNICEF Code.

In the Philippines, for instance, Nestle and three U.S. formula manufacturers prepared a 15-page critique of the WHO/UNICEF Code. They urged the Government to substantially weaken 10 of the 11 WHO/UNICEF Code articles. In Pakistan, the Government has adopted an eight-page code, with six of those pages taken verbatim from the Nestle-dominated International Council of Infant Food Industries' Code. Only the definitions are

extracted from the WHO/UNICEF Code.

At the recent World Health Assembly, the delegate from the African state of Rwanda observed:

Sometimes we may be tempted to let ourselves be convinced by the arguments of industry representatives that offer ready-made legal texts for us to follow-up on the WHO Code without us realizing immediately—because we lack time and appropriate competence in marketing matters—that these industry texts do present significant differences with respect to the WHO text which we as member states of the WHO have adopted as "a minimum requirement".

We should not forget that these multinational companies have influence and powerful means to make themselves heard in government circles. . . . Their interest lies in business turnover, ours in the health of our children.

It would appear that Nestle has been talking out of both sides of its mouth. Pledging cooperation with sovereign nations and support for the WHO/UNICEF Code, on the one hand, while actively promoting weaker standards to those same governments.

The third main point outlined in the letter from Nestle responds to our request that the company meet in good-faith negotiations with the International Nestle Boycott Committee (INBC). Nestle claims to have met with INBC representatives immediately after its March 16 announcement, to explain its new policy and answer detailed questions. Mr. Maucher also refers to a second meeting with an INBC representative on April 20.

Those individuals who attended the first meeting, however, point out that Nestle was adamant that they were not officially meeting with the INBC, but rather with representatives of national church bodies whose denominations had endorsed the boycott. The distinction here stems from Nestle's longtime unwillingness to recognize the INBC as a legitimate negotiating group. Nestle did in fact formally meet with the INBC lawyer, Jonathan Churchill, on April 20, but only with assurances from Churchill that the INBC keep those discussions confidential.

The fact that Nestle has, in its letter to Congress, broken the confidentiality it sought from the INBC, can be viewed with the positive implication that Nestle has finally acknowledged the credibility of the boycotting coalition as a legitimate bargaining agent. Although Nestle has made a positive step toward the negotiation table, the company has yet to seriously participate in "good-faith" discussions. The boycott remains the most effective tool to sustain the needed pressure for more substantial changes by Nestle.

In his final point, Mr. Maucher describes the creation of an independent audit commission, "with the responsibility for reviewing implementation of the WHO code and for auditing the investigation of allegations of any Nestle

activity deemed to be incompatible with the WHO or applicable national code." Nestle has announced that the distinguished former Senator from Maine, Edmund Muskie, will chair this new commission.

The establishment of a watchdog committee is a positive and welcome initiative by Nestle. Led by a man of unquestionable integrity, Senator Muskie, this commission could play a useful role in the ultimate resolution of this issue.

However, for the commission to be successful, Senator Muskie must make a determined effort to exert its independence from Nestle. Let me take the liberty of making a few constructive suggestions to the members of the Nestle Audit Commission.

First, the commission should measure Nestle's performance by the strict standards of the WHO/UNICEF Code, rather than the now-discredited Nestle instructions.

Second, the commission should define more clearly Nestle's role in relation to contacts with national governments. Nestle should conform to the WHO/UNICEF guidelines in all countries, and immediately suspend lobbying efforts aimed at weakening national infant formula marketing codes.

Third, the commission should contract an independent group to do first-hand monitoring of Nestle marketing practices in developing countries. As now defined, the commission's role appears to be that of reviewing Nestle's own internal investigation of complaints received from outside sources. To do its job properly, the commission should initiate its own monitoring, preferably by an independent group with the freedom to quietly observe company practices without advance warning of their presence to Nestle marketing managers. Such a group should have the authority to complete its findings before supplying them to the commission for review.

Finally, the commission should use its prestige to actively advocate the establishment of a monitoring system by the World Health Organization. Monitoring of the code's implementation would be far more appropriate, impartial, equitable, and effective by the world's highest health authority. Early drafts of the WHO/UNICEF Code contained a provision clearly delegating this role to WHO. Nestle and other infant formula manufacturers succeeded in removing this authority, however, hampering WHO's ability to critique the Nestle guidelines and otherwise monitor industry practices.

At the World Health Assembly in May, there was considerable support for a more active role by WHO in implementation of the code. A resolution passed unanimously, with U.S. support, requesting greater assistance from WHO for member states "in

their efforts to implement and monitor the code and its effectiveness." The resolution further urged WHO to provide guidance to member states "to insure that measures they adopt are consistent with the letter and spirit of the (WHO/UNICEF) International Code."

Speaking on the dangers of industry self-monitoring, Dr. Ondaye of the Congo commented:

We would suggest that the WHO Secretariat set up a system for the monitoring of its implementation. Such a system must be completely independent and objective and therefore in no way could be set up by any of the parties directly concerned with the marketing of breast milk substitutes.

Senator Muskie, an international statesman of high regard, could play an instrumental role in providing the needed mandate from governments and industry for such action by WHO. If Nestle is truly serious about its intention to abide by the WHO/UNICEF Code, it would clearly be to its advantage to support universal and equitable monitoring of all members of the infant formula industry.

Mr. Speaker, I sincerely wish Senator Muskie and his fellow commission members success in their efforts to raise the ethical standards of the Nestle Co. Far too many Third World infants have suffered needlessly due to the insensitive marketing strategies of multinational infant formula manufacturers. But until Nestle visibly and verifiably commits itself to full compliance with the letter and spirit of the WHO/UNICEF Code, millions of Americans like myself will continue to actively support the Nestle boycott.

Mr. Speaker, I request that the attached Washington Post article of June 10, 1982, be included with my remarks in the RECORD:

UNICEF HITS NESTLE ON INFANT FORMULA

(By Philip J. Hilts)

UNICEF has rebuked Nestle officials over the "possible harmful" way the company has chosen to interpret the World Health Organization (WHO) guidelines on marketing infant formula.

Nestle products, including coffee, chocolates and Stouffer's food, have been the target of a boycott by some 75 unions, church groups and health organizations. Nestle's and other companies' aggressive marketing practices have persuaded mothers to switch from breast to bottle feeding, creating a danger to the health of the infant and a high cost to the family, the boycotters say.

Last year, the United Nations approved a voluntary marketing code it intended for nations to adopt that would restrict the aggressive marketing of formula. The vote was 118 to 1, with the United States the lone dissenter.

The Nestle company is the world's largest manufacturer of infant formula, and the only one that has said it will try to comply with the voluntary rules for marketing infant formula. But the company has done so by issuing its own interpretation of the code, which critics have attacked.

Last month, James Grant, executive director of UNICEF (the United Nations Children's Fund), wrote to Nestle:

"It is with regret that I now inform you that my staff have conveyed to me their serious misgivings on Nestle's interpretations of significant aspects of the [WHO infant formula marketing] code, and on the possible harmful effect of its instructions [to sales personnel] in the implementation of the true spirit and intent of the code.

"I must ask you," Grant's letter continued, "and your colleagues in Nestle not to use the name of UNICEF nor mine in any way which suggests our endorsement of Nestle's instructions."

Rafael Pagan, president of Nestle's Coordination Center for Nutrition, wrote back to Grant, "I am shocked and dismayed at your letter of May 10 stating your staff's 'misgivings' with our recent policy initiatives to implement the WHO code."●

CARIBBEAN CRUISE CONVENTIONS WILL IMPROVE CARIBBEAN ECONOMY

HON. RICHARD T. SCHULZE

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 11, 1982

● Mr. SCHULZE. Mr. Speaker, today, I am introducing H.R. 6975, a bill to amend the Internal Revenue Code to provide that business expenses for seminars and conventions held aboard ship will be treated for tax purposes like any other business expense, provided that they are not lavish and that certain conditions are met.

The purpose of the bill is to remove a statutory impediment to the continued development of tourism and commerce in the Caribbean nations which are our friends and close neighbors. The prohibition against deducting on-board convention expenses has injured the maritime industry in the United States, and it has depressed the market for the services of many thousands of skilled and unskilled workers, both in our domestic port cities and in the ports of call in the Caribbean.

Under my bill, expenses for meetings held on U.S.-flag vessels would qualify wherever conducted. Expenses for meetings held on nondomestic cruise ships would be required to meet two tests designed to encourage usage of U.S. port facilities and to encourage tourism and employment in the Caribbean.

If meetings are held on foreign-flag vessels, the cruise would have to originate or terminate at a U.S. port, and 75 percent or more of the ports of call visited on the cruise would have to be in qualifying Caribbean Basin countries.

As under present law, the seminar and convention would have to have a valid business purpose and could not be lavish or extravagant.

The bill defines a "qualifying Caribbean Basin country" to mean any Caribbean Basin country which is not, as

of the beginning of the cruise, declared by the President to be disqualified for purposes of the tax deduction. The President could specify that a convention's deductibility is disqualified if, for example, a port of call were located in a Communist country such as Cuba. Other acts causing disqualification include expropriation of American investment without proper compensation or other hostile economic actions directed at U.S. citizens or businesses.

"U.S. ports" are located in the United States, its possessions, or the Trust Territory of the Pacific Islands. This means that cruises originating or ending in Puerto Rico or the U.S. Virgin Islands would qualify, even if they did not call on ports in the continental United States.

Mr. Speaker, the United States must take an active interest in the economy and well-being of our neighbors in the Caribbean Basin. The nations that ring the Caribbean are tied closely to the United States politically and economically. The largest source of income is from American visitors brought in by air and cruise vessels, and U.S. passengers account for several hundred million dollars in revenue of the Caribbean Basin nations annually.

The cruise ship industry provides jobs for thousands of American and Caribbean residents. Approximately 40 percent of the onboard hotel crew, those catering to the personal needs of the passengers, are from Caribbean nations. Further, the economic benefits are not limited to onboard employment. When travelers leave the cruise ships to spend a few hours ashore, jobs are created for local restaurant workers, taxi drivers, tour guides, and merchants. Their prosperity creates a chain reaction of employment for thousands more.

Opponents of the deductibility of convention expenses for cruise ship meetings generally view such conventions as mere vacations for the participants. They think of the cruises as pleasure cruises whether or not most of the time is spent in business meetings.

The fact is that the organizer of the convention has a captive audience on-board ship and is able to engage in more communicative activity than would occur at a land-based convention where golf courses are inevitably nearby.

The requirement that the port of origin or destination be a U.S. port is intended to insure that supporting activity business benefits both United States and Caribbean ports. Hotels, restaurants, and entertainment businesses in both the United States and Caribbean countries would find this change a stimulus to their economics.

Since the deduction for cruise conventions was eliminated, cruise opera-

tors have experienced a 15-percent loss in load factor. This is a serious reduction and has impacted not only on the cruise operators, but on the entire Caribbean area.

I urge the support of my colleagues for the targeted reinstatement of deductibility for legitimate business meetings held aboard the floating hotels of the Caribbean.●

CYPRUS SITUATION

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 11, 1982

● Mr. GILMAN. Mr. Speaker, a just and lasting settlement of the Cyprus situation is imperative and must remain a primary foreign policy objective of the United States. However, a peaceful settlement is not possible as long as Turkish troops remain on that island.

The United Hellenic American Congress, the voice of Greek-American organizations across the country, recently met and adopted several resolutions, one of which pertains to the Cyprus question. I wish to insert this resolution for the Members' special attention:

RESOLUTION

Whereas, In his recent address to the British Parliament, President Ronald Reagan reaffirmed the traditional stance of the United States when he stated: "Armed aggression must not be allowed to succeed. The American people firmly support this principle and the principle of the rule of law under God;" and

Whereas, Turkey invaded the independent Republic of Cyprus in July-August, 1974, and ever since illegally occupies approximately 40% of the total territory of the Cyprus Republic; and

Whereas, The Turkish invasion and occupation brought about bloodshed, destruction, misery, calamities, and enormous sufferings for the people of Cyprus as a whole; and

Whereas, As a result of the Turkish invasion and occupation, 200,000 Greek-Cypriots, i.e., one-third of the total population of Cyprus, have been forcefully uprooted from their ancestral homes and lands and have become destitute refugees in their own country; and

Whereas, Approximately 2,000 Greek Orthodox Cypriots—men and women, boys and girls, military and civilian, and American citizens—disappeared while in the custody of the Turkish army and have been missing ever since and the Turkish authorities refuse to give any account of their whereabouts; and

Whereas, Many of the holiest shrines of the Greek Orthodox Church, including the tomb of St. Barnabas, the patron Saint of Cyprus, are located in the territory of Cyprus occupied by Turkish troops; and

Whereas, The Turkish occupation forces desecrated, looted, and destroyed hundreds of Greek Orthodox Churches and prohibit Greek Orthodox worship in the occupied part of Cyprus; and

Whereas, Unanimous Resolution No. 3212 of the United Nations General Assembly, subsequently endorsed by Security Council Resolution No. 365, and numerous other Resolutions of the United Nations, the Non-Aligned Movement, the British Commonwealth of Nations, the Council of Europe, and other international bodies have all condemned the Turkish aggression against the Republic of Cyprus and called inter alia, for:

(i) Respect for the independence, sovereignty, and territorial integrity of the Republic of Cyprus;

(ii) The immediate withdrawal of all Turkish troops from the territory of the Republic of Cyprus;

(iii) The return of all refugees to their homes and properties under conditions of safety;

(iv) Sincere and effective efforts for the tracing and accounting of those missing in Cyprus; and

Whereas, The Congress of the United States of America has on numerous occasions called upon Turkey to withdraw its troops and colonists from Cyprus and has supported the independence, sovereignty, and territorial integrity of the Republic of Cyprus; and

Whereas, While Turkey contemptuously disregards the aforementioned Resolutions and demands, and flagrantly refuses to comply with them in violation of all norms and principles of International Law, Turkey is systematically colonizing the occupied part of Cyprus with tens of thousands of settlers from mainland Turkey for the purpose of changing the centuries old demographic character of Cyprus; and

Whereas, Turkey has illegally used American-supplied weapons to invade and occupy the Republic of Cyprus; and

Whereas, American law prohibits further military aid to be given to governments which violate American statutes and policy governing the use of such weapons; now, therefore, be it

Resolved, by the Steering Committee of the United Hellenic American Congress, That the invasion, continued occupation, and colonization of the Republic of Cyprus by Turkey is again condemned; and, be it further

Resolved, That the Secretary General, the General Assembly, and the Security Council of the United Nations, the President and Secretary of State of the United States of America, the Congress and Senate of the United States of America as well as their appropriate committees be urged to take all steps within their power to bring about a peaceful solution of the question of Cyprus on the basis of the relevant United Nations Resolutions and in accordance with the United Nations Charter; and, be it further

Resolved, That a suitable copy of this Resolution be presented to the Secretary General of the United Nations, the Presidents of the General Assembly and the Security Council of the United Nations, the President and Secretary of State of the United States of America, and the Chairmen of the appropriate committees of the United States Congress.

Adopted by the members of the Steering Committee of the United Hellenic American Congress this second day of August, 1982 at Chicago, Illinois.●

THE PEOPLE OPPOSE WITHHOLDING

HON. NORMAN E. D'AMOURS

OF NEW HAMPSHIRE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 11, 1982

● Mr. D'AMOURS. Mr. Speaker, a nationwide public opinion survey by the respected Behavioral Research Corp. shows that 7 out of 10 adult Americans oppose interest and dividend withholding.

Even more significant for proponents of supply-side economics is the fact that 5 out of 10 Americans reported that interest and dividend withholding would discourage them from making interest bearing investments.

If my mail is representative of the mail that other Members are receiving on this topic, and I think it is, then opposition to interest and dividend withholding is particularly intense among senior citizens. Many senior citizens rely on the interest and dividends from small investments to make ends meet each month. Without these small earnings, they cannot pay their rent, or utilities, or buy the food they need. Withholding of any amount will push them to the edge of the social safety net. In many cases I suspect they will find themselves over the edge. That is why the American Association of Retired Persons and other senior citizens groups have so adamantly opposed interest and dividend withholding.

Mr. Speaker, the Senate claims to have taken care of our Nation's senior citizens by providing a way for them to obtain an exemption if they have low enough incomes. Unfortunately, the process set forth by the Senate is quite complex. Senior citizens will have to affirmatively seek out exemption forms. They will have to fill out a separate form for each different account or investment they have. They will have to renew each of these exemption forms every year. The paperwork will be very burdensome for many senior citizens, and few financial institutions on businesses will want to help them because that would only generate more costly paperwork for themselves.

To add insult to injury, the Treasury estimates that over 85 percent of the taxes owed on interest and dividend earnings are already being paid by law-abiding citizens. Senior citizens have an exemplary record of tax compliance yet they will have to bear a substantial share of the burden of withholding.

Mr. Speaker, we should take heed of the message our constituents are sending us and should give our senior citizens a hand by refusing to adopt the Senate's interest and dividend withholding proposal. There are other simpler, and less burdensome ways to go after the few people who are trying to

cheat the tax collector. We should not burden the many for the sins of a few.

I invite Members who share my opposition to interest and dividend withholding to join the 75 Members who have already agreed to cosign my letter to the House Rules Committee asking for a separate vote on interest and dividend withholding when the conference report on the tax bill comes back to the full House.●

THE UNITED STATES SHOULD NOW CONSIDER TERMINATING OUR SO-CALLED SPECIAL RELATIONSHIP WITH ISRAEL

HON. PAUL N. McCLOSKEY, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 11, 1982

● Mr. McCLOSKEY. Mr. Speaker, between July 22 and August 1, I was privileged to participate in a congressional factfinding mission to six countries in the Mideast. That factfinding mission was specifically authorized by you, concurred in by the Secretary of State, accomplished in a U.S. Air Force plane, and accompanied by three U.S. military personnel and one representative from the State Department. The delegation was chaired by Congressman NICK J. RAHALL of West Virginia and included DAVID E. BONIOR of Michigan; MERVYN M. DYMALLY of California; ELLIOTT H. LEVITAS of Georgia; MARY ROSE OAKAR of Ohio and myself.

The delegation arrived in Damascus, Syria on Friday evening, July 23 and visited, during the following 8 days in succession, Syria, Lebanon, Israel, Egypt, Jordan, and Saudi Arabia. We met with the heads of state in every country save Jordan, where King Hussein was unfortunately out of the country and was represented by his brother, Crown Prince Hassan. We also met with either the foreign minister, his deputy and/or the defense minister of every country, as well as leading spokesmen for the various opposition parties in Lebanon and Israel.

While a report by the full delegation is under preparation, I would like to individually report to the House with a series of comments on specific facts ascertained during our visit to the Mideast. The first of those comments follow:

THE UNITED STATES SHOULD NOW CONSIDER TERMINATING OUR SO-CALLED "SPECIAL RELATIONSHIP" WITH ISRAEL

The current bloodshed in Lebanon has several tragic implications for the United States.

First is the hardening conviction elsewhere in the world that the U.S. has authorized and approved the indiscriminate and massive use of firepower against an innocent and largely defenseless Lebanese civilian population.

To the rest of the world Israel has now become a U.S. proxy—an instrument of U.S. policy in the Mideast, much as we view Cuba as an instrument of Soviet policy in the Western Hemisphere.

When Israel uses U.S.-supplied artillery, aircraft and weaponry, including the fear-some CBUs, or "cluster bombs," against refugee camps and urban areas, the world—and particularly the Arab world—understands that these are U.S. weapons, supplied under agreements that they will not be used save with U.S. consent, express or implied.

The blood of innocent women and children both Lebanese and Palestinian, is thus on our hands, not just on the hands of the Israelis. The American-made cluster bombs, for example, are among the most sophisticated and deadly anti-personnel weapons ever conceived by man. Scattering hundreds of small bomblets over an area of 25 acres or more, a single CBU has a particularly horrifying impact on a civilian population. It is well-known that cluster bombs were furnished by us to the Israelis in the early 1970s on the specific condition that they be used only against regular armies when Israel was under attack, and that they not be used against guerrilla forces or in civilian areas. When the Israelis violated this agreement in 1976 by the use of CBUs in southern Lebanon, the U.S. government lodged a formal and public protest.

Not so in 1982, however. Not only has the U.S. stood silently like Pontius Pilate as the CBUs were used in southern Lebanon in recent weeks, we also vetoed, a U.N. Security Council resolution calling for Israeli withdrawal from Lebanon. As in the case of Vietnam, whatever may be the merits of the destruction of rural villages by U.S. firepower, the indiscriminate use of that firepower is viewed with universal horror elsewhere in the world.

It is not merely world opinion that is shocked. We violate our own principles in this process. We have long treasured our heritage as a nation under law, a nation which sought to restrain the excessive use of force, even in just causes, according to clear legal principles. One of those principles is that our police, in pursuit of an armed criminal, cannot pursue that individual into a marketplace and indiscriminately shoot into the crowd. Under no circumstances can the Israeli pursuit of not more than 15,000 armed Palestinians, in a country of 3 million people, be considered a restrained use of force. Naval bombardments and aerial bombing of Beirut, Sidon, Tyre and the Palestinian refugee villages must, of necessity, kill and maim tens of thousands of noncombatants.

A captured Israeli pilot put it fairly and accurately the other day when he said that he could not justify his country's use of force—that such use of force was excessive. Indeed, to much of the world Israel has become the newest international bully, created and armed by the U.S. Israel is now viewed as out of control—but still supported by Washington in whatever its leaders, the former terrorists Prime Minister Menachem Begin and Defense Minister Ariel Sharon, may seek to do, regardless of how many innocent people are killed in the process.

In my judgment, respect for the opinions of mankind and our own legal heritage should prompt us now to treat Israel as just one more foreign country, to be assisted when right and condemned when wrong.

There is no longer any reason why we should send \$2.2 billion per year in foreign aid (one fifth of a total \$11 billion in U.S.

foreign aid this year) to a single nation of 3.5 million people when that nation is violating basic concepts of human decency.

It seems to me high time we considered severing the so-called "special" relationship with Israel which has existed since 1948—that we cut off the military weapons deliveries, economic assistance and special tax benefits that we have given for so many years.

It is time to say: "Israel, after 34 years on this planet, you have finally come of age. If you choose to use excessive force in attaining your objectives, however praiseworthy—if you continue to flout U.S. policy goals and unanimous U.N. Security Council resolutions—then do so on your own. We no longer choose to support the killing of innocent people, no matter how understandable may be your goal of eliminating military threats on your borders. Our past relationship with you has been based on morality, but we find no morality in your actions in and around Beirut today." ●

HAPPY BIRTHDAY, LITERACY VOLUNTEERS OF AMERICA

HON. GEORGE C. WORTLEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 11, 1982

● Mr. WORTLEY. Mr. Speaker, I would like to call your attention and that of my colleagues to the 20th anniversary of Literacy Volunteers of America, Inc.

Literacy Volunteers of America was founded by Ruth Colvin in 1962 for the express purpose of eradicating illiteracy in Syracuse, N.Y. Mrs. Colvin worked with professional reading consultants to develop a training workshop to equip nonprofessionals to tutor basic reading and writing to adults and teenagers in need of these skills. All volunteer tutoring was, and continues to be done, on a 1-to-1 basis free of charge to the student.

From that small but successful volunteer effort in Syracuse, the program grew far beyond what its originators had expected. Literacy Volunteers now operates 150 local programs and has 8 State literacy volunteer organizations.

In addition to helping adults and teenagers acquire basic skills, Literacy Volunteers branched out and established a tutor training workshop for English as a second language students. In 1978, the "Read On!" instructional series of readers was published to accommodate the special needs of students who need a more structured learning format.

Adult basic education agencies, libraries, correctional facilities, and community colleges have received technical assistance from LVA and use LVA methods and materials in their programs; 23,000 tutors and learners are currently working in LVA programs in 26 States and two Provinces of Canada.

Literacy Volunteers of America embodies the real American spirit of

giving one's time and effort so that others may benefit. May the next 20 years be devoted to totally winning the battle against illiteracy in the United States. ●

THE WORLD PEACE COUNCIL AND THE PEACE MOVEMENT

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 11, 1982

● Mr. McDONALD. Mr. Speaker, of all the useful idiots in the peace movement none are as active and dedicated as those associated with the World Peace Council. The leadership of this foremost Communist front organization are far from idiotic however; it is the sincere person concerned about peace who fulfills the Leninist role of useful idiot. In September 1980, 2,260 peace-lovers gather in Sofia, Bulgaria, for the high-sounding World Parliament of the Peoples for Peace. This event was orchestrated by none other than the World Peace Council.

Continuing with Mr. Vladimir Bukovsky's commendable article on "The Peace Movement and the Soviet Union," which appeared in the May 1982 Commentary magazine, is an examination of the program of action 1981 of the World Peace Council. As Mr. Bukovsky points out, this program reads like a bad joke but it is nonetheless faithfully followed by Soviet surrogates and useful idiots.

The article follows:

But let us return to this remarkable program, unanimously adopted by the international community of peace-lovers. (It is published by the World Peace Council in Helsinki, as already noted, and is available in English under the title, Program of Action 1981.)

This program includes such items as the "elimination of all artificial barriers to world trade," an amazingly frank recognition of the Soviet need for Western goods and technology and its desire to be granted the status of most favored nation. But what this has to do with the problem of peace and why all peace-loving people should fight for it tooth and nail is hardly made clear.

As could be expected, the program contains a clear definition of "just" and "unjust" wars: "The policy of destabilization of progressive regimes in developing countries actually constitutes an aggression, waged by psychological, economic, political, and other means, including armed intervention." However, similar acts against "racist and fascist" regimes are quite justified because the mere existence of non-progressive regimes "is abhorrent to the conscience of humankind." Accordingly, the sale of arms to these "abhorrent" countries should be banned, but nothing need restrain the peace-loving from selling arms to "progressive" regimes and to "liberation movements."

And, of course, there are directives to the mass media, which "must serve the cause of

peace and not the military-industrial complex by confusing public opinion with lies and disinformation." (In other words, the media should not report on the Soviet arms build-up.) A similar directive is issued to those "who bear responsibility for educating a new generation."

The program further specifies precisely which events and campaigns to undertake, and designates weeks for the collection of signatures on various petitions, etc., all around the world. It constantly emphasizes the urgent need for "further intensification of actions against the deployment of the new U.S. weapons of mass annihilation in Western Europe" and plans for "strengthening and broadening of national movements into a worldwide network of peace organizations."

It is not possible here to discuss all the details of this remarkable document. It simply introduces each and every aspect of Soviet foreign policy wrapped around with the phraseology of peace. Not surprisingly, therefore, it includes Afghanistan under the guise of a "week of solidarity, with special emphasis on support for a political settlement as proposed by the Afghan government." For Ethiopia it proposes "a week of solidarity with the Ethiopian revolution" and "support for the struggle of the Ethiopian people against imperialist and reactionary conspiracies and plans in the Horn of Africa." For Kampuchea there should be an "international campaign of solidarity with the government and people of Kampuchea led by the National United Front for National Salvation and an international campaign for recognition of the People's Revolutionary Council of Kampuchea and the seating of its representatives in the UN; exposure of the conspiracies of the Peking hegemonists who are working in collusion with the U.S. imperialists against Kampuchea." For Israel: "Support for the peace forces in Israel in their struggle for the complete withdrawal of Israel from the occupied territories and for the realization of the inalienable national rights of the Palestinian people."

Whereas for the Middle East in general: a "campaign of solidarity with the Arab peoples in their struggle to liquidate the political and military consequences of the Camp David and Washington accords; solidarity actions with Libya against the threats of aggression by the Egyptian regime and U.S. imperialism." As for the U.S., even in so totally pro-Soviet a document as this the instruction to campaign for the "release of political prisoners in the United States of America" reads like a bad joke. Clearly, the love of peace dulls the sense of humor. The only countries where violations of human rights are recognized by the unanimous vote of 2,260 delegates from 137 countries are: Bolivia, Chile, El Salvador, Guatemala, Haiti, Israel, Paraguay, Uruguay, Indonesia, South Korea, Northern Ireland, and the U.S. Has the world not undergone a remarkable improvement?

After the successful adoption of this program, what followed was simple. Returning from Sofia, the enthusiastic delegates threw themselves into a hectic round of implementing the program, pressing for appropriate resolutions, actions, and commitments in each of their respective organizations (*Pravda*, November 5, 1980). An additional impetus was given to the campaign by an endorsement from the World Council of Churches at their meeting in Dresden (East Germany) on August 28, 1981, thus committing a huge number of adherents of the var-

ious Christian denominations to following the Soviet line. And in no time hundreds of thousands in the West came honestly to believe that they were out to save world peace.

Well, is there any further need to explain why the Soviet Union is so interested in the peace movement? There is a term in party jargon coined by Lenin himself: "a useful idiot." Now, in spite of all their blunders, senseless adventures, economic disasters, the Polish crisis and the stubborn resistance of the Afghan peasants, Reagan's rearmament plan and UN resolutions, the Soviet rulers have scored a spectacular victory: they have recruited millions of useful idiots to implement their bankrupt foreign policy. They are no longer isolated and there is still a big question as to whether the Americans will be allowed to place missiles in Europe.

True enough, the American economy is vastly more productive and efficient than the Soviet, but the Americans don't have a weapon like the "struggle for peace." True again, this peace movement will be expensive for the Soviet people (the meeting in Bulgaria alone must have cost them millions, to say nothing of subsidizing all peace activists on those jaunts to the best Soviet resorts; the cost of running this worldwide campaign must be simply astronomical). Still, it is cheaper than another round of the arms race, let alone the cost of maintaining a priceless military superiority. And the result will be long-lasting.

Mind you, we are into only the second year of a planned ten-year "struggle for peace." Within a few years, the whole earth will be trembling under the marching feet of the useful idiots, for their resources are inexhaustible.

I remember in the 50's, when the previous peace campaign was still in full swing, there was a popular joke which people in the Soviet Union whispered to each other: "A Jew came to his rabbi and asked: 'Rabbi, you are a very wise man. Tell me, is there going to be a war?' 'There will be no war,' replied the rabbi, 'but there will be such a struggle for peace that no stone will be left standing.'"

IRS CHIEF UPSCALES HIS DIGS

HON. WILLIAM HILL BONER

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 11, 1982

● Mr. BONER of Tennessee. Mr. Speaker, they are at it again.

Officials of the Reagan administration just do not seem to learn. If you will recall, the President, right after his inauguration, told his appointees in the executive branch not to make unnecessary expenditures setting up their offices.

Rather than listening to their boss, some of Mr. Reagan's top executives have been busy redecorating their offices in what looks like an attempt to get on the cover of *Architectural Digest* or, at least, *Better Homes and Gardens*.

First we learned that Commerce Secretary Baldrige had spent \$118,000 redecorating his office suite.

Then we found out that the head of the Veterans' Administration, Robert

Nimmo, had 54,000 dollars' worth of work done on his office.

Now it looks like the chief of the Internal Revenue Service, Roscoe Egger, Jr., is trying to keep up with the Nimmos by spending \$85,000 in tax money to remodel two executive offices at the IRS.

Mr. Speaker, to me, it is unbelievable that the Commissioner of the IRS and its chief counsel would be spending Government money on microwave cooking centers and remote control doors at a time when budget cuts are forcing severe reductions in taxpayer services and tax audits.

Mr. Speaker, I would suggest that other members of the President's team start listening to the coach and stop spending money on remodeling their offices.

I would also like to suggest that my colleagues read the article by Ronald Kessler which appeared in this morning's *Washington Post* and which I submit for publication in the *Record*.

IRS CHIEF UPSCALES HIS DIGS

(By Ronald Kessler)

Internal Revenue Service Commissioner Roscoe L. Egger Jr. and the agency's chief counsel are planning to spend \$85,000 to remodel and redecorate their offices.

"As far as I'm concerned, this office, because it is the senior office of the IRS, ought to reflect an appropriate executive-level atmosphere," Egger said. "The place looks shabby the way it is."

President Reagan, two days after taking office, told his appointees to "set an example by avoiding unnecessary expenditures" in setting up their offices. He exempted "reasonable and necessary cleaning, painting and maintenance or structural changes essential to the efficient functioning of an office."

A study last year by the Chicago-based Better Government Association found that Reagan's department heads subsequently ordered more than \$350,000 worth of new furnishings, including \$118,000 for Commerce Secretary Malcolm Baldrige's suite. Robert P. Nimmo, head of the Veterans Administration, later came under fire after \$54,000 worth of work was done on his offices.

At 1111 Constitution Ave. NW., Thym Smith, assistant to the IRS commissioner for public affairs, said the remodeling will be funded out of the current appropriation.

"We are so sensitive to the taxpayers, because those are the people we serve," he said. "We don't want people to think that's where our taxes went—to the commissioner's office. I bet it will be 30 years before they do [the remodeling] again."

Egger has ordered \$6,517 worth of blue carpeting to replace his beige carpets, 10 mahogany and leather arm chairs, at \$5,650, to replace white modern ones, and a new \$1,966 conference table.

Egger ordered an additional door for his secretary installed at a cost of \$4,015. He ordered a remote-control device of \$886 so that he can open his door from his desk.

Egger also requested a new and expanded kitchen for his suite. It will include a \$1,213 microwave cooking center, new cabinets costing \$3,596, and a dishwasher, refrigerator, garbage disposal and hot water heater costing a total of \$1,296. The existing kitchen

en has an electric range, under-the-counter refrigerator and cabinets.

The General Services Administration estimates that it will cost an additional \$15,000 to break through walls to expand the kitchen.

The offices of the agency's chief counsel, Kenneth W. Gideon are also being reconstructed, at a cost estimated by GSA at \$45,000. Gideon plans new carpeting and furnishings, but the items have not yet been purchased.

GSA still has to give final approval to the plans and could reject them, according to officials at both GSA and IRS. In the past, GSA generally has gone along with remodeling requests of presidential appointees. In any case, the IRS has already spent \$21,283 on Egger's appliances and new furnishings.

Egger, a former partner in the Price Waterhouse & Co. accounting firm who was appointed by Reagan last year, said the work is necessary and "modest" in cost. He said his chief counsel's office needs reconstruction because of the addition of a deputy chief counsel.

Egger said he needs an expanded kitchen because the existing one is not large enough to make meals for himself and official visitors. The meals are prepared by Egger's secretary or a caterer, or are brought from the IRS cafeteria, all at Egger's personal expense.

"I have breakfast once a month with the chairman of the [IRS] oversight committee on the Senate side," Egger said, referring to Charles E. Grassley (R-Iowa), a member of the Senate Finance Committee. "The last time he was here, he didn't say a word, but they [his eggs] were cold."

Egger said he personally bought some of his own furniture from Price Waterhouse because of difficulty in finding furniture through GSA. "It's not being done for personal preference," he said.

GSA regulations say, "As long as an office is in good repair and suitable to the function of the executive position to which it is assigned, it is GSA's policy to discourage preferential modifications with a change in occupant."

But a GSA official noted, "Somehow [government agencies] insert in their justification that [remodeling] is needed for the mission of the agency. We have a great deal of difficulty arguing against that."

The regulations permit a kitchen of no more than 30 square feet for agency heads such as Egger. Egger's new kitchen will have 66 square feet, according to the IRS.

James G. Whitlock, GSA's assistant regional administrator, said IRS officials told him the expanded kitchen could be considered a substitute for a 200-square-foot dining room, to which Egger is entitled under GSA rules. He now dines at his conference table.

"The IRS pleaded their case on the basis of no dining room," Whitlock said. "That's not an unlikely trade-off. I don't consider it to be illegal." The plans do not appear to be "ostentatious or outrageous," he said.

Lee Keller, chief of the IRS national office facilities branch, said Egger's present kitchen is a "safety hazard" because it is so small that people crowding into it could spill coffee on each other. "One of the things we try to do," he said "is avoid injuries, especially on the third floor," where the commissioner has his office.

An official said counsel Gideon had been given several plans that would have provided a new office for his deputy and two additional people without rearranging the entire

suite. However, Gideon, a Texas lawyer, said this week, "We felt it was important that my deputy be right next to me." ●

SMOKE: FIRE'S FATAL FACTOR

HON. MARTY RUSSO

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 11, 1982

● Mr. RUSSO. Mr. Speaker, smoke is the proximate cause of more than 70 percent of all fire deaths in the United States and I feel we need a greater public awareness and understanding of this fact.

Three men and a woman died and at least 20 others suffered injuries in a fire in Chicago's Conrad Hilton Hotel on May 23, 1982. In the past 5 years in Chicago alone, 34 persons have died in hotel fires and more than 900 have died in fires in structures of all kinds.

One young woman who escaped the Hilton Hotel blaze pointed out vividly what it is like to be caught in a fire like this: "You can't breathe and you can't see and you can't move," she said. Firemen rescued her.

Across the country, fires in both public lodgings and in residences take an enormous annual toll.

The per capita rate of fire incidents, casualties and injuries in the United States is among the highest in the world. In this country, fire takes more lives than all natural disasters combined. The most recent statistics released by the National Fire Protection Association indicate that an estimated 6,639 people died and 30,200 were injured in fires in 1980. Some sources estimate that more than 7,500 people died in fires last year.

These statistics make a powerful argument that, as much as we have learned about preventing and fighting fires, we should redouble our efforts to reduce injuries and deaths.

One important and deadly aspect of fires has been documented all too often. As I said, an estimated 70 percent of the thousands of deaths and injuries from fires every year are caused by smoke, rather than by heat and flames. Many victims are unable to escape through fire exits and stairways because smoke blocks their pathway to safety. The smoke not only prevents escape from the flames; it is itself the major cause of injuries and deaths in fires.

Smoke is the byproduct of the flames and heat produced by fires; it is not a simple phenomenon. Smoke can consist of any of several toxic substances, including carbon monoxide, toxic gases such as hydrogen chloride, and hydrocarbons. Hydrocarbons are the visible and invisible products of incomplete combustion—the unburned portions of materials actually burning.

Hydrocarbons are what we see as smoke—the sometimes thick, dark

grey or black vapor in the air. Hydrocarbons are extremely irritating to the eyes, nose, throat, and lungs. They cause choking, gagging and impaired breathing. If a person is exposed to hydrocarbons for an extended period of time, he or she will die. In such cases, which are all too common, the cause of death is listed as smoke inhalation or asphyxiation.

Smoke thus presents a panic-producing threat to the person attempting to escape a life-threatening fire. If the fleeing person encounters an area of dense concentration of hydrocarbons lying between himself or herself and the exit, it is virtually impossible to plunge through this barrier to safety. The eyes close in self-defense, in spite of one's efforts to keep them open, and as breathing becomes labored, strength fails. Escape is really possible only for those fortunate enough to encounter mild concentrations of hydrocarbons.

The deadly consequences of smoke were most tragically demonstrated in the MGM Grand Hotel fire in Las Vegas in November 1980. The actual fire was contained within little more than an hour after discovery and never extended beyond the fifth floor of the hotel. Yet 61 of the 85 people who died in the fire were located in the 21-story high-rise tower portion of the MGM Grand. Postmortem analyses of the blood of 74 victims revealed that all who were found in the tower had died of asphyxiation secondary to carbon monoxide. In other words, they were killed by smoke, not fire.

Smoke need not continue to claim its yearly toll of victims. There are measures to be taken both before and in the event of fire which can significantly increase one's chances of surviving a fire. Smoke detectors are effective in alerting people to fires, and should be installed even more widely. People are now more aware of escape routes so they can take the best path to safety. Recently, an emergency escape mask to help individuals get out of residential or hotel fires has been placed on the market.

I think that these and other life-saving steps be made widely known through extensive public education programs. Knowing what to do and how to use the safety equipment available could save thousands of lives a year. Local firefighting organizations can and should make even greater efforts to provide local news media and schools with this truly vital information. I hope my colleagues will join with me in disseminating this knowledge. It would be a public service in the truest sense. ●

BUKOVSKY ON THE PEACE MENTALITY

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 11, 1982

● Mr. McDONALD. Mr. Speaker, "It is simple commonsense," writes Vladimir Bukovsky in the May 1982 Commentary magazine, "to try to restrain both sides of any would-be conflict if one wishes to preserve peace." But, he goes on to point out, "the European peace movement is so remarkably unilateral that it seems barely conscious of 'the other side.'" The same can often be said of the American peace movement as it cries about Cruise and Pershing missiles, while just barely acknowledging the existence of SS-20's.

Mr. Bukovsky's excellent article on "The Peace Movement and the Soviet Union" reviews and exposes the mentality of the leaders behind this crusade for world peace—peace at any price as far as the West is concerned. The excerpt follows:

[From Commentary magazine, May 1982]

EXCERPT FROM THE "PEACE MOVEMENT AND THE SOVIET UNION"

(By Vladimir Bukovsky)

After the experience of speaking several times with members of the current European peace movement, however, I know only too well how futile is the recourse to rational argument. They announce unabashedly that there is no Soviet military superiority. It is all, they say, CIA propaganda; the only reliable source of information as far as they are concerned seems to be the KGB. They refer one to the findings of a certain Stockholm International Peace Research Institute, leaving one to guess at the kind of methods employed by this institute for assessing the Soviet arsenal. Since the Institute has no satellites at its disposal, its "researchers" are undoubtedly left in a painful dilemma: whether to obtain their information from the blue sky, or from the Sputniks. Nobody in the European peace movement, it seems, has ever wondered about the reliability of this obscure establishment.

But this is just a trifle. More seriously, our peace-lovers—repeating word for word an old Pravda cliché—maintain that the "crazy American generals" are so trigger-happy as to push the button just for the fun of it. I have never been able to understand why generals must invariably be crazy—American generals, of course, not the Soviet kind, who seem to have some innate immunity from craziness—and if they are crazy, why they did not push the damn button long ago. In any case, it is hard to imagine that the generals, who at least have some technical education, are less equipped to understand nuclear problems than the primary-school teachers who are so heavily represented in the peace movement.

Some of the "peace-makers" sincerely believe that as soon as the West disarms itself, the Soviets will follow suit, and with an almost literally incredible naïveté they urge us to "try" this suicidal experiment. Others, far more sophisticated, know perfectly well that their Soviet comrades need to gain time so as to enjoy a more advantageous posture in future negotiations with the

Americans. What they urge is that the West start negotiations first and improve the Western position later. Still others are more candidly selfish and object only to the deployment of nuclear weapons near their own village, so to speak—as if being protected is more dangerous than not being protected. Or better still, as if any single village, city, or country could maintain neutrality during a nuclear war. "Let the Americans fight the Russians," they say, implying that the entire problem of the modern world grows out of some stupid far-off quarrel between "Americans and Russians," who are apparently in some kind of conspiracy to destroy the poor Europeans. Surely if comrade Brezhnev promised to respect the "nuclear-free zones" in case of war, people could heave a sigh of relief and go to sleep untroubled. If Brezhnev says so, there will be no nuclear-armed submarines off your shores. After all, has comrade Brezhnev ever broken his word? Of course not. He is an honest man. He is so honest he can even guarantee you in what direction the contaminated clouds will move and locate for you the radioactive fallout. "Why should the Russians attack us, if we are disarmed?" Why indeed? Ask the Afghan peasants, they would probably know the answer.

There is no sense in rehearsing all the various "peace arguments," so contradictory and even incompatible that one wonders how those who make them manage to get along together in the same movement. Only one thing these various strands have in common: panic, and a readiness to capitulate to the Soviet threat even before such capitulation is demanded. Better red than dead. That is why current Soviet propaganda has so quickly become so remarkably successful.

Indeed, it is difficult to imagine a more openly pro-Soviet line than that of the European peace movement. It is even more pro-Soviet than that of the local Communist parties, who after all at least have to camouflage themselves with a cover of independence from Moscow. Nothing is more obvious, for example, than that the present increase in international tension was brought about by the Soviet invasion of Afghanistan. There is hardly a country, a political party (including some Communist parties), or an international organization that did not condemn the Soviet aggression unequivocally. The only public movement in Western Europe that never condemned the invasion, paradoxically, is the one that calls itself the "peace movement." No such condemnation has ever been pronounced at a peace-movement rally in Western Europe, or passed as a resolution, or published in one of the movement's major publications, or circulated as a mass petition. Perhaps you will imagine that the peace groups condemned the invasion in their hearts? On the contrary, the evidence is far more convincing that they simply justify this international crime.

Not long ago I myself was publicly charged by the leaders of the British Campaign for Nuclear Disarmament (CND) with having distorted their position on Afghanistan. Therefore I find it particularly useful to quote from an official CND booklet, *Why We Need Action, Not Words*, by Betty England: "The intervention in Afghanistan may well have been caused partly by the Soviet Union's fear of its growing encirclement. The fear cannot be called unreasonable after Sir Neil Cameron's statement in Peking . . ." (p. 12). In other words, the poor Russians whom Sir Neil, Marshal of

the Royal Air Force, so frightened with a speech critical of them, must have good reason for what they do. By this logic, we ought to be imposing strict censorship on anti-Soviet speeches lest we be faced with Soviet occupation of the entire world. But the implications are even more important. The idea buried in Miss England's passage is that the only way to keep the peace is gradually to accept the Soviet system and Soviet demands.

Even more outspoken than the CND is the World Peace Council. Its booklet, *Program of Action 1981*, contains a direct instruction to support the present puppet government of Afghanistan (p. 25). This program was unanimously adopted in 1980 by a gathering in Sofia, Bulgaria of representatives of most of the peace groups (about this gathering, more later). After this it comes as no surprise that at the recent International Peace Conference in Denmark it was decided to convene the next meeting in Kabul, the capital of Afghanistan, within six months.

It is obvious that a Soviet invasion of Poland would bring us closer to world war, or, to be more precise, would make any real relaxation of international tension quite impossible for ten or fifteen years. And once again, the only public movement that has never condemned the continuous Soviet threat to Poland (and is still uncertain about its reaction to the Soviet-dictated imposition of martial law) is the peace movement. The leaders of the biggest British peace group, CND, went even further, publicly praising themselves for not "overreacting" to the events in Poland (B. Kent, letter to the London Times, December 9, 1981) only a few days before the imposition of martial law, and displaying their "impartiality" by equating the Polish crisis with that in East Timor. Perhaps the leaders of the movement seeking to promote peace in Europe should be reminded that in 1975 the 35 countries of Europe, together with Canada and the U.S., solemnly recognized an inseparable link between security in Europe and respect for human rights in the participating countries. Should we assume that the CND leadership refuses to accept the Helsinki agreement, or are we to conclude that it is indifferent to the question of European security?

At least about Poland not all in the movement can be accused of indifference. I have, for instance, never heard of a case in which a representative of the Chilean or Argentinian government was invited to expound his government's views before any international peace conference. But for some strange reason, an exception was recently made for a representative of the Polish junta, who was invited by the World Peace Council to address the International Peace Conference in Denmark. His vicious lies about Solidarity and personal slanders against Lech Walesa (see the Guardian, January 11, 1982) were greeted with hearty applause by the peace-lovers (BBC report).

It is simple common sense to try to restrain both sides of any would-be conflict if one wishes to preserve peace. But the European peace movement is so remarkably unilateral that it seems barely conscious of "the other side." It cries shame on the Americans for as yet non-existent weapons like the neutron bomb, or the not-yet-deployed cruise and Pershing missiles, but speaks only in whispers, if that, of the hundreds of Soviet SS-20's already aimed at Europe.

Since, again, I have provoked an angry reaction from the CND leaders for pointing

out this particular instance of extreme unilateralism (London Times, December 9, 1981), I looked through the major CND publications once more. The booklet by Betty England quoted above does not contain a single mention of the SS-20's though it is virtually saturated with the names of American missiles. Nor does a widely distributed report on the CND annual conference of 1981 (the latest to my knowledge), nor the official CND leaflet, Nuclear War and You, dropped into my mailbox by some caring hand. Only recently I have learned that a decision to mention the SS-20 was finally taken by CND after many heated debates and very much against the wishes of the CND leadership, many of whom are also members of the British Communist party.

Oddly enough, there are many in the European peace movement who have worked (some still do) with Amnesty International in support of prisoners of conscience in the Communist countries. Unfortunately, this by itself does not seem to prevent one from making dangerous political mistakes, nor, to judge from the results, does it guarantee any moderating influence on the movement's leadership. Be that as it may, the fact is that the European peace movement (including its large constituent organizations) has never said a word in support of the thousands of people in the USSR who are imprisoned for opposing aggressive Soviet policies, for refusing to serve in the army on errands of aggression, or to shoot civilians in Afghanistan. During all the time that hundreds of thousands of "peace-lovers" were noisily expressing their one-sided feelings on the streets of London, Bonn, Amsterdam, and Brussels, not one word was said about Sakharov, still in exile and on a hunger strike—Sakharov, who has done more than anyone in the world to halt nuclear testing. These peaceful souls would happily throw stones at General Halg, but they would welcome Marshal Brezhnev with servile smiles.

This is not to deny that there are plenty of well-intentioned, and genuinely concerned and frightened people in the movement's ranks. I am certain that the overwhelming majority of them are. Just as it did in the 1950's, the movement today probably consists of the same odd mixture of Communists, fellow-travelers, muddleheaded intellectuals, hypocrites seeking popularity, professional political speculators, frightened bourgeois, and youths eager to rebel just for the sake of rebelling. There are also the inevitable Catholic priests with a "mission" and other religious people who believe that God has chosen them to make peace on earth right now. But there is also not the slightest doubt that this motley crowd is manipulated by a handful of scoundrels instructed directly from Moscow.

In fact, just as this essay was going to press, John Vinocur reported in the New York Times (April 6, 1982) "the first public substantiation from inside the antinuclear movement . . . that the West German Communist party, at the direction of the Soviet Union, has attempted to coopt public sentiment against nuclear weapons." The environmentalist party known as the Greens "charged that the West German Communist party, which is aligned with Moscow, dominated and manipulated a meeting [in Bonn] Sunday [April 4] in which representatives of 37 groups, describing themselves as elements of the antimissile movement, planned a major demonstration against President Reagan when he visits Bonn . . . June 10." The Greens, who participated in

the meeting, acknowledge that they themselves have cooperated with the Communists "on certain local issues," but what happened in Bonn was "scandalous" even to them. "The Communists dominated the meeting completely. It took place under seemingly democratic rules, but that was a joke. We could barely get a word in." The meeting—at which were represented such groups as the German Student Federation, the Evangelical Student Committee, the Federation of German Youth Groups, and the German Peace Society—rejected resolutions condemning Soviet interference in Poland and Soviet intervention in Afghanistan, and the delegates refused to express support for Solidarity. "They adopted, however, by a large majority, a motion condemning United States actions in Central America, the Middle East, southern Africa, and other regions."

Earlier, as I was in the process of writing this essay, news came that one of the Danish leaders of the movement, Arne Petersen, was arrested along with his wife for channeling Soviet money into the funds of the peace movement. His master, the Second Secretary of the Soviet embassy in Copenhagen, was expelled from the country. Now and then we hear about subsidized trips taken by peace activists to the best Soviet resorts where they are wine and dined royally—and, of course, shown kindergartens, schools, and hospitals (no munitions factories).

The majority of the European peace movement is undoubtedly not aware of these facts. Probably they will ignore the charges of the Greens, just as they missed the reports of Mr. Petersen's activities, which involved placing paid advertisements (out of Soviet donations) for the Danish peace movement in the Danish papers, ads signed by a number of prominent Danish intellectuals (who for sure knew nothing about it). And even our angry CND leaders "know nothing of the subsidized trips to Soviet resorts" (London Times, December 9, 1981). Well, sometimes it is very comfortable—even for professional intellectuals—not to know things . . .

For those, however, who do wish to know, let us track down the origin of the current revival of the "struggle for peace." Anyone who has read thus far will not be surprised to hear that the earliest traces of this revival are to be found in Soviet publications, quite clear for those who know how to read them:

The first bright colors of autumn have already touched the emerald green parks of Sofia. The golden leaves of maples and aspens are trembling on the breeze. And everywhere the tender-blue streamers bearing the insignia of the World Peace Council. Sofia is expecting an important event: the World Parliament of the Peoples for Peace will be working here from 23 to 27 of September. It is the biggest and the most representative meeting of the world's peace forces convened in the last years by the World Peace Council. (*Izvestia*, September 23, 1980).

The same day *Pravda* referred to "the biggest gathering in history of the fighters for peace." Indeed, the most peaceful and independent country of the world, Bulgaria, played host during those September days to 2,260 peace-lovers from 137 countries, claiming to represent 330 political parties, 100 international and over 3,000 national non-governmental organizations. To be sure, this was no ordinary meeting of the international Communist movement. The political spec-

trum of those represented was exceptionally wide: 200 members of different national parliaments, 200 trade-union leaders, 129 leading Social Democrats (33 of them members of their respective national executive bodies), 150 writers and poets, 33 representatives of different liberation movements (including the Association in Defense of Civil Rights from Northern Ireland), women's organizations (like the National Assembly of British Women), youth organizations, the World Council of Churches and other religious organizations, 18 representatives of different UN specialized committees and commissions, representatives of the Organization of African Unity and of OPEC, ex-military people, some of them generals, and representatives of 83 Communist parties (*Pravda*, September 23, 24, 25, 26, 27, 28, 29, November 5, 1980; *Izvestia*, September 23, 24, 27, 28, 1980).

It had all started about a year earlier, as we are informed by a talkative Bulgarian, the chairman of the Organizational Bureau, responsible for the "practical preparation" for this show (*Pravda*, September 23, 1980). They had expected, you see, only 1,500 delegates, but 2,200 came. No wonder the chairman wished to talk about his success.

Yet a year earlier—in 1979—none of the conditions now cited to explain the current miraculous resurrection of the peace movement existed. There was no so-called "new strategy of the Pentagon," the famous presidential directive 59; there was no new escalation of the arms race; there was no neutron bomb. The Vienna summit meeting had just been successfully concluded with the signing of SALT II. September 1979 was a time of universal happiness, the sky was cloudless. Only one significant thing happened in September 1979: a sudden wave of mass arrests in the Soviet Union and, as we have learned now, a decision to reactivate the peace movement. Who could have predicted in September 1979 that within a year the cold war would be back—who else but those involved in "practical preparations" for the invasion of Afghanistan? Given the nature of the Soviet planned economy, with its fabulously inflexible, slow, and inefficient workings, the Soviets must prepare everything well in advance. Why should they have allocated such a large sum of money to hold a Bulgarian peace show in the middle of happy times, if not in anticipation of grave political trouble ahead?

Furthermore, we learn from comrade Zhivkov, the Bulgarian Communist leader who opened the meeting with a long speech, about an appropriate decision taken by the Political Consultative Committee of the Warsaw Bloc countries in May 1980 (*Pravda*, September 24, 1980), as well as an appropriate resolution of the Plenary Session of the Central Committee in June 1980 (*Pravda*, September 29, 1980). Comrade Zhivkov was simply revealing the way decisions and resolutions first travel through the Communist bureaucratic machinery on their way to rubberstamping by a "representative" body—in this case, the Sofia "Parliament" in September.

Indeed, the whole show was depressingly familiar to anyone acquainted with the methods the Kremlin producers applied to the same scenario in the time of Stalin. Even the dramatic personae were the same. There was the same World Peace Council with its immortal President Ramesh Chandra; there was the same chief conductor, Boris Ponomarev, former official of the Comintern (now responsible in the Politburo for contacts with fraternal Communist par-

ties as well as for intelligence). Even the slogan adopted for the occasion, "The people have the power to preserve peace—their basic right," was remarkably similar to the unforgettable words of comrade Stalin in 1952.

Only this time the personal message that comrade Ponomarev brought to those converted was from comrade Brezhnev, not comrade Stalin. The latter, of course, would never have tolerated even the mention of the term "rights"—basic or any other—in his slogans. Well, the times have changed after all. Still, those damned "human rights" had gotten out of hand. Hence, better to find something like "basic rights."

The first to speak, as I said, was comrade Zhivkov, and he spilled the beans about the Soviets' real concern (*Pravda*, September 24, 1980). The aggressive circles in America, he said, refuse to accept the present balance of forces in the world. They don't wish to submit to their historically predestined defeat. They have become so arrogant as to reject all of the recent Soviet peace proposals. They have decided to replace détente with a policy based on a "position of strength." They don't observe agreements on cooperation; they interrupt political and economic contacts; they interfere with cultural and scientific exchange; they dissolve sporting and tourist connections (in other words, the grain embargo, the Olympic boycott, the scientific boycott, etc., responses to the invasion of Afghanistan and the persecution of scientists in the USSR).

This theme was taken up by most of the speakers with only minor variations. The main speaker, comrade Ponomarev, suggested a whole program of action intended to bring America's aggressive circles into compliance. He appealed for unity among all those concerned with preservation of peace, irrespective of their political views. "The time has come for action, not words," he said. (Wait a minute, have we not met this sentiment somewhere already? Surely not in the CND official booklet?)

The show proceeded smoothly, exhibiting the whole gallery of monsters, from the greatest peace-lover of our time, Yasir Arafat, to a "representative" of Afghanistan.

How did all these 2,260 representatives of Social Democrats, trade unions, youth, women, and religious organizations react? Did they rush out in disgust? Did they demand the withdrawal of the Soviet troops from Afghanistan in order to remove the main obstacle to détente? Did they express concern about the massive Soviet arms build-up and the deployment of SS-20's? By no means. This self-appointed World Parliament issued an Appeal in which the main ideas of comrade Ponomarev's speech were repeated. Thus, the "Parliament" is opposed "to the vast machine and arms build-up of the most aggressive forces of imperialism which seek to take the world toward a nuclear abyss; to the falsehoods and lies of the propaganda in favor of the arms build-up, which are disseminated through imperialist-controlled mass media."

Translated from party jargon, this constitutes a clear directive to work against the armament programs of the Western countries (first of all, of course, the U.S.—the "most aggressive forces of imperialism"), and to reject any "lies" of the mass media about the Soviet arms build-up.

Beyond this, the "parliamentarians" set "the new tasks and duties . . . for action of the peoples of all continents" and worked out the Charter of the Peoples for Peace

which was adopted unanimously (!) together with the People's Program for Peace for the 1980's. The year 1981 was chosen to be "the springboard of the 80's, a year of a decisive offensive of the peace forces to achieve a breakthrough in curbing the arms build-up."

Most of the program was carried out, the mass demonstrations of October 1981 in the European capitals having been planned within a framework of what is called in the Soviet program "UN Disarmament Week (October 24-31)." How on earth could the Soviets have known in 1980 about events that would take place at the end of 1981, unless they were running the whole show?

My pointing out this strange coincidence, which I did in an article in the *London Times* (December 4, 1981), was bound to provoke heated denials; and did so. The Soviets in *Literaturnaya Gazeta* (December 23, 1981), as well as the CND leaders in the *London Times* (December 9, 1981), made much of the fact that UN Disarmament Week had originally been designated as an annual observance by the UN General Assembly as early as June 1978. Now, the UN flag may seem to many to be a perfect cover. One must ask, however, why virtually nothing happened during that all-important week in 1978 or 1979—even the Sofia meeting was scheduled in September, not October, of 1980—until details for its observance were specified by the Soviet-inspired program? Moreover, if one looks through the Final Document of the Assembly Session on Disarmament (May 23-July 1, 1978), issued by the UN, one can find hundreds of designated weeks, months, years, and decades, all totally ignored by our peace-lovers, whereas the suggestion singled out by the Soviets was the one, the only one, to gather thousands in the streets. For example, was anyone aware that the decade 1969 to 1979 was solemnly declared by the United Nations to be "The Decade of Disarmament"? If there were any huge rallies or vigorous campaigns during these ten years, they seem to have escaped notice.●

PROVIDE THE PROVISION FOR FOOD FOR THE HUNGRY

HON. MARY ROSE OAKAR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 11, 1982

● Ms. OAKAR. Mr. Speaker, I wish to comment on a provision which was included in the Senate version (S. 2774) of H.R. 6892, the 1983 reconciliation provisions for the House Committee on Agriculture.

On August 5, the Senate accepted a provision which is identical to the resolution which I introduced on July 21, 1982. Senator Kennedy introduced this provision as a sense of the Senate resolution to S. 2774, which is the Senate reconciliation bill to the first concurrent resolution on the budget for fiscal year 1983 (S. Con. Res. 92, 97th Cong.).

Growing numbers of Americans go to bed hungry and malnourished each night, yet we continue the thoughtless waste of food they so desperately need. A study by the GAO estimates that 20 percent of the food produced

in America is discarded. At shipping terminals, wholesale markets and supermarkets, massive quantities of edible fresh fruits and vegetables, dairy products and bread, and so forth, are discarded. The volume of waste is enormous and unconscionable. Yet there are no laws which require the destruction of food or produce that is dated. At this time of crisis in our country when the President is calling for the private sector to get involved, what more humanitarian method for involvement than to feed the hungry? It is time for action that dramatizes the desperation that millions of Americans are experiencing and at the same time addresses the need. We propose:

A joint resolution expressing the Sense of Congress that:

(1) agencies and departments of the Federal government take steps to distribute surplus food to the hungry;

(2) state and local governments enact legislation to encourage private cooperative efforts to provide food for the hungry (for example, Good Samaritan Acts or Donor Liability laws);

(3) wholesale and retail food distributors should work closely with charitable organizations to make available to hungry citizens food which is currently being wasted.

In conjunction with this resolution, a congressional buffet luncheon was held on July 28, 1982, that was catered with a wide variety of discarded, but wholesome foods. Members of Congress were invited. It provided an opportunity for congressional Members to join with service and religious organizations to urge food wholesalers and retailers to develop distribution policies for the needy.

The resolution has much support. There are now 30 cosponsors.

I urge the chairman of the House Agriculture Committee, Mr. DE LA GARZA, and the conferees, to accept the Senate passed provision when it is considered in conference.●

INDEPENDENCE DAY PARADE

HON. NORMAN D. DICKS

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 11, 1982

● Mr. DICKS. Mr. Speaker, one of the disadvantages of scheduling a July 4 congressional recess each year is that most of the Members of Congress do not have the opportunity to see the American Independence Day Parade here in Washington, D.C. This year 123 bands and drill teams competed for awards in the Washington, D.C., parade, and among those were 134 members of the Bremerton High School Marching Band and Drill Team, directed by Mr. Dick Norton and Mr. George Mantzke. I am particularly proud of the Bremerton High Knights, not only because Bremerton

is my home town and is part of the congressional district I represent, but because the group received very special honors for its performance in the Independence Day Parade. In their division, the Bremerton Knights placed second in competition as they marched 17 blocks down Constitution Avenue on July 4. These honors followed another second place award in the July 3 parade in Philadelphia, Pa.

The experience of participating in the Nation's premier Independence Day Parade has left all 134 members of the band with many proud memories and with a renewed sense of patriotism. Each one of these young men and women had the opportunity during their stay in Philadelphia and Washington to visit many of the places and sites which are important to our Nation's heritage.

These young people worked long and hard to prepare for the trip, and thousands of people from the Bremerton/Kitsap County area in Washington State participated in a very successful fundraising effort to make their appearance in the parade possible. They represented Bremerton and Kitsap County well here on the east coast. To demonstrate the pride I have in this talented group of young people, I ask the permission of the House of Representatives to include a complete list of their names in the RECORD:

LIST OF NAMES

Dick Norton, Band Director.
George Mantzke, Drill Team Director.

CHAPERONES

Mr. and Mrs. Greg Brown, Mr. and Mrs. James McGee, Mr. and Mrs. Mike Shaw, Mr. and Mrs. Neil Torpey, Mr. and Mrs. LeRoy Williamson, and Mr. and Mrs. Beverly Schrick.

BAND MEMBERS

Armstrong, Robin; Bassett, Patience; Beck, Susan; Beliveau, Dean; Bishop, John; Bower, Bonnie; Brown, Angela; Clark, Steve; Clark, Debra; Cook, Jo; Day, Steven; Derrig, Rick; Dolan, Hubert; and Eder, David.

Epps, Mike; Escalona, Adam; Ferguson, Brian; Fernandez, Jan; Frohardt, Brian; Gifford, Pat; Gillett, Art; Gisi, Paul; and Glenn, Pat.

Goodale, Greg; Gray, Carmen; Hall, Bob; Hankinson, Mike; Hecker, Michelle; Hicks, Vicki; Jankowski, Jon; Jensen, Ruth; Klein, Joe; and King, Colleen.

Kollars, Bob; Kvistad, Judy; Leaf, Kirk; Lidke, Mike; Marlin, Tyler; McGee, John; McGee, Julie; McGee, Roxanne; McInnes, Earl; Meckkenberg, Ann; Metzker, Ty; Mike-sell, Sarah; Montgomery, Steve; and Morrell, Rob.

Mueller, Jill; Mueller, Wendy; Myers, Cheryl; Nichols, Ken; Olmstead, Joni; Outlaw, June; Pitts, Dan; Poling, Brad; Rich, Mary; Robinson, Hiram; Robinson, Vincent; Russell, Chris; Santos, Marites; and Schram, Nancy.

Shaw, Laurie; Sherman, Bill; Smith, Mike; Sumpter, Anita; Thompson, Tracy; Torpey, Mary Lou; Villaviray, Rod; Wade, Melanie; Wall, Kim; White, Patti; Whitney, Karen; Williamson, Greg; Willis, Dave; and Yeowell, Kellie.

DRILL TEAM MEMBERS

Shelly Anderson, Gwen Barrios, Jann Bearbower, Tracy Bennett, Lisa Blackwood, Karen Boschee, Renee Bragg, Rhonda Cain, Julie Eckert, Anna Elia, June Geraci, Geri Hamlin, Janet Harris, Rusty Harris, Desiree Ingham, Lisa Johnson, Kris Krafenik, Katie La France, Annette Lewis, Jonee Lewis, Melanie Mangrum, Shannon McCarthy, Susie McGillis, and Kathy O'Brien.

Jill Parker, Kristy Reynolds, Sandie Richie, Jodie Schrick, Darle Seamans, Sue Summers, Donna Taylor, Linda Tomassi, Diane Tufte, Jeannine Ulbright, Michelle Walsh, Jacque Wedge, and Kathy Spencer.

RALLY SQUAD

Sherri Deichert, Robin Harris, Jan Foltz, Michelle Koch, Teresa Sturgeon, Marlene Winkler, and Jill Morrison.●

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Thursday, August 12, 1982, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

AUGUST 13

9:00 a.m.

Energy and Natural Resources

Business meeting, to consider pending calendar business.

3110 Dirksen Building

9:30 a.m.

Banking, Housing, and Urban Affairs

To hold hearings on the nominations of Bevis Longstreth, of New York, and James C. Treadway, Jr., of the District of Columbia, each to be a member of the Securities and Exchange Commission.

5302 Dirksen Building

10:30 a.m.

Foreign Relations

To continue hearings on U.S. economic policy toward the Soviet Union.

4221 Dirksen Building

AUGUST 16

9:00 a.m.

Energy and Natural Resources

Public Lands and Reserved Water Subcommittee

To hold hearings on S. 2818 and S. 2805, bills providing for an adjustment in the termination, extension, or modification of certain contracts for the sale of timber from National Forest System lands and public lands.

3110 Dirksen Building

10:30 a.m.

Judiciary

To hold hearings on S. 2784, clarifying the intent of antitrust laws relating to the relocation of member clubs of professional sports leagues.

2228 Dirksen Building

2:00 p.m.

Appropriations

Business meeting, to mark up the substance of H.R. 6956, appropriating funds for fiscal year 1983 for the Department of Housing and Urban Development, and certain independent agencies (pending on House calendar).

1223 Dirksen Building

Foreign Relations

To hold hearings on the nomination of James M. Rentschler, of Pennsylvania, to be Ambassador to the Republic of Malta.

4221 Dirksen Building

AUGUST 17

10:00 a.m.

Agriculture, Nutrition, and Forestry

To hold hearings on the nominations of Wilmer D. Mizell, Sr., of North Carolina, to be Assistant Secretary for Governmental and Public Affairs, Department of Agriculture, Tom H. Carothers, of Texas, and Leonard R. Fouts, of Indiana, each to be a member of the Federal Farm Credit Board of the Farm Credit Administration.

324 Russell Building

Energy and Natural Resources

Business meeting, to consider pending calendar business.

3110 Dirksen Building

Environment and Public Works

Business meeting, to resume consideration of proposed amendments to the Clean Air Act (Public Law 95-95).

4200 Dirksen Building

Governmental Affairs

To resume hearings on S. 2562, transferring certain activities of the Department of Energy to the Department of Commerce.

3302 Dirksen Building

10:30 a.m.

Foreign Relations

To hold hearings on the nomination of Theodore G. Kronmiller, of Virginia, Deputy Assistant Secretary of State for Oceans and Fisheries Affairs, for the rank of Ambassador.

4221 Dirksen Building

2:00 p.m.

Energy and Natural Resources

Public Lands and Reserved Water Subcommittee

To continue hearings on S. 2818 and S. 2805, bills providing for an adjustment in the termination, extension, or modification of certain contracts for the

sale of timber from National Forest System lands and public lands.

3110 Dirksen Building

3:00 p.m.

Governmental Affairs

To hold hearings on the nomination of Dennis M. Devaney, of Maryland, to be a member of the Merit Systems Protection Board.

3302 Dirksen Building

AUGUST 18

9:30 a.m.

Governmental Affairs

Federal Expenditures, Research and Rules Subcommittee

To hold hearings on S. 1782, eliminating the withholding of retainages by the Federal Government from small business contractors and subcontractors in certain cases.

3302 Dirksen Building

Labor and Human Resources

Labor Subcommittee

Business meeting, to consider proposed amendments revising certain provisions of title IV (plan termination insurance) of the Employee Retirement Income Security Act of 1974.

4232 Dirksen Building

10:00 a.m.

Energy and Natural Resources

Business meeting, to consider pending calendar business.

3110 Dirksen Building

Environment and Public Works

Transportation Subcommittee

To resume hearings on highway revenue and cost allocation issues.

4200 Dirksen Building

Governmental Affairs

To continue hearings on S. 2562, transferring certain activities of the Department of Energy to the Department of Commerce.

3302 Dirksen Building

Judiciary

To resume hearings on Senate Joint Resolution 199, proposing a constitutional amendment providing for voluntary prayer in public schools and certain institutions.

2228 Dirksen Building

Select on Intelligence

Closed briefing on intelligence matters.

224 Russell Building

10:30 a.m.

*Labor and Human Resources

Labor Subcommittee

To hold hearings on S. 2617, abolishing mandatory retirement and other forms of age discrimination in employment.

4232 Dirksen Building

2:00 p.m.

Energy and Natural Resources

Public Lands and Reserved Water Subcommittee

To hold hearings on S. 2118, designating certain lands in Wyoming as wilderness.

3110 Dirksen Building

Judiciary

To hold hearings on pending nominations.

2228 Dirksen Building

AUGUST 19

9:00 a.m.

Select Committee on Indian Affairs

To hold hearings on S. 1652, restoring certain lands in Arizona to the Colorado River Indian Reservation to be held in trust by the United States.

457 Russell Building

9:30 a.m.

Labor and Human Resources

To resume consideration of proposed legislation establishing a program to increase the availability to the American public of information on the health consequences of smoking and thereby improve informed choice.

4232 Dirksen Building

Small Business

Export Promotion and Market Development Subcommittee

To hold hearings on certain obstacles faced by small business exporters.

424 Russell Building

10:00 a.m.

Energy and Natural Resources

Business meeting, to consider pending calendar business.

3110 Dirksen Building

Governmental Affairs

To hold hearings on S. 2629, proposed Budget Reform Act, establishing a 2-year Federal budget cycle.

3302 Dirksen Building

10:30 a.m.

Veterans' Affairs

Business meeting, to mark up S. 2378, amendment No. 1909 to S. 2378, S. 1956, S. 2460, S. 2461, S. 2048, S. 2381, S. 2382, S. 2709, S. 2388, measures increasing the rates of disability compensation for disabled veterans, increasing the rates of dependency and indemnity compensation for surviving spouses and children of veterans, discontinuing duplicative payments to certain veterans, increasing the level of disability required for the payment of dependent allowances, and providing for cost-saving improvements in veterans' programs, S. 2747, and amendment No. 1984 to S. 2747, measures improving certain aspects of the Veterans' Administration educational benefits programs and the Department of Labor veterans' employment programs.

412 Russell Building

AUGUST 24

9:00 a.m.

Governmental Affairs

Civil Service, Post Office, and General Services Subcommittee

To hold hearings on S. 2190, providing for the recruitment and training of volunteers in Federal agencies.

3302 Dirksen Building

AUGUST 25

10:00 a.m.

Energy and Natural Resources

Business meeting, to consider pending calendar business.

3110 Dirksen Building

SEPTEMBER 14

9:30 a.m.

Energy and Natural Resources

Energy and Mineral Resources Subcommittee

To resume oversight hearings on America's role in the world coal export market.

3110 Dirksen Building

Labor and Human Resources

Labor Subcommittee

To hold oversight hearings on the implementation of the Federal Mine Safety and Health Act of 1977.

4232 Dirksen Building

10:00 a.m.

Commerce, Science, and Transportation

To hold hearings on the nomination of Justin Dart, of California, to be a member of the Board of Directors of the Communications Satellite Corporation.

235 Russell Building

SEPTEMBER 16

9:30 a.m.

Energy and Natural Resources

Energy and Mineral Resources Subcommittee

To resume oversight hearings on America's role in the world coal export market.

3110 Dirksen Building

SEPTEMBER 17

9:30 a.m.

Energy and Natural Resources

Energy and Mineral Resources Subcommittee

To continue oversight hearings on America's role in the world coal export market.

3110 Dirksen Building

SEPTEMBER 21

10:00 a.m.

Labor and Human Resources

Alcoholism and Drug Abuse Subcommittee

To hold hearings on the effects of alcohol consumption during pregnancy.

4232 Dirksen Building

10:30 a.m.

Veterans' Affairs

To hold hearings to receive American Legion legislative recommendations for fiscal year 1983.

318 Russell Building

SEPTEMBER 23

10:00 a.m.

Judiciary

Agency Administration Subcommittee

To holding hearings on proposed legislation to extend Federal employees compensation benefits to all Federal jurors, to provide the taxing of attorney fees for court appointed attorneys, and to expand the method of serving jury summons.

Room to be announced

SEPTEMBER 30

10:00 a.m.

Judiciary

Agency Administration Subcommittee

To hold oversight hearings on the indemnification of Government contractors

2228 Dirksen Building

OCTOBER 6

10:00 a.m.

Judiciary

Agency Administration Subcommittee

To hold oversight hearings on the accessibility of the judicial system.

2228 Dirksen Building

CANCELLATIONS

AUGUST 13

10:00 a.m.

Labor and Human Resources

Handicapped Subcommittee

To resume hearings to review proposed regulations implementing part B (assistance for education for all handicapped children) of the Education for All Handicapped Children Act (Public Law 94-142).

4232 Dirksen Building

HOUSE OF REPRESENTATIVES—Thursday, August 12, 1982

The House met at 10 a.m.
Rev. W. B. Bingham, Binghamtown Baptist Church, Middlesboro, Ky., offered the following prayer:

Our Father in Heaven, we stand in this historic place in great awe.

Because You are from everlasting to everlasting, God and Creator and because of this great and important assembly, we love the Congress and pray Your blessings upon them.

Give them the faith of Abraham, the patience of Job, the strength of Samson, the endurance of Paul, the wisdom of Solomon, like David, man after God's own heart, that they may guide the good ship of democracy.

When she was young and weak, You blessed the Continental Congress and again when wicked men and nations led the world to the brink of hell itself You were there.

O Lord, keep on blessing until time shall be no more. In Christ's name. Amen and amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

Mr. MILLER of California. Mr. Speaker, pursuant to clause 1, rule I, I demand a vote on agreeing to the Chair's approval of the Journal.

The SPEAKER. The question is on the Chair's approval of the Journal.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. MILLER of California. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 344, nays 27, answered "present" 1, not voting 62, as follows:

□ 1015

So the Journal was approved.

The result of the vote was announced as above recorded.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed with amendments in which the concurrence of the House is requested, a bill of the House of the following titles:

H.R. 6863. An act making supplemental appropriations for the fiscal year ending September 30, 1982, and for other purposes.

The message also announced that the Senate insists upon its amendments to the bill (H.R. 6863) entitled "An act making supplemental appro-

□ This symbol represents the time of day during the House proceedings, e.g., □ 1407 is 2:07 p.m.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

priations for the fiscal year ending September 30, 1982, and for other purposes," requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. HATFIELD, Mr. STEVENS, Mr. WEICKER, Mr. MCCLURE, Mr. GARN, Mr. SCHMITT, Mr. COCHRAN, Mr. ANDREWS, Mr. ABDNOR, Mr. KASTEN, Mr. D'AMATO, Mr. MATTINGLY, Mr. PROXMIER, Mr. STENNIS, Mr. INOUE, Mr. HOLLINGS, Mr. EAGLETON, Mr. CHILES, Mr. JOHNSTON, Mr. HUDDLESTON, Mr. LEAHY, and Mr. DECONCINI to be the conferees on the part of the Senate.

The message also announced that the Senate has passed a bill of the following title in which the concurrence of the House is requested:

S. 537. An act to aid State and local governments in strengthening and improving their judicial systems through the creation of a State Justice Institute.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. The Chair will recognize the gentleman from Kentucky (Mr. ROGERS) for 1 minute. The Chaplain who gave the prayer today was his guest. We will forego all other 1-minute speeches until after the wilderness bill has been concluded.

REV. W. B. BINGHAM

(Mr. ROGERS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ROGERS. Mr. Speaker, I am honored to welcome Rev. W. B. Bingham as guest chaplain in the U.S. House of Representatives today.

The Congress has some herculean tasks before it these days—from getting our economy back into shape to shoring up our Nation's defenses. The Bible enjoins us to pray for those who are in authority. And I can think of no time when we have stood in greater need of prayers from a great religious leader like Reverend Bingham.

Mr. Speaker, let me tell you about our highly esteemed guest.

He is a graduate of Knox Central High School and Clear Creek Baptist Theological School for Adults. He is married to a fine woman, the former Mae Bowling. And they have four children, one of whom is following in his father's footsteps in the ministry.

For the past 32 years, Reverend Bingham has been pastor of the Binghamtown Baptist Church of Middlesboro, Ky., at Cumberland Gap. Under his tutelage, this church has earned a reputation as one of the most dynamic in the area. As a matter of fact, it is now the largest church in the seven county tristate area.

He has conducted over 300 revivals and appears regularly on television and radio. And he has obeyed the Biblical command to preach into the ut-

termost parts of the world—preaching in nearly every corner of the globe.

But no listing of his impressive credentials would be complete without mentioning the profound influence he has had on generations of families in southeast Kentucky who have been inspired and supported by his wise Christian leadership.

I am proud to welcome Brother Bingham to the U.S. House of Representatives. We can certainly use his prayers in these marble Halls.

APPOINTMENT OF CONFEREES ON H.R. 6863, SUPPLEMENTAL APPROPRIATIONS, 1982

Mr. WHITTEN. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 6863) making supplemental appropriations for the fiscal year ending September 30, 1982, and for other purposes, with Senate amendments thereto, disagree to the Senate amendments, and agree to the conference asked by the Senate.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

Mrs. SCHROEDER. Mr. Speaker, I would like to reserve the right to object.

I reserve the right to object to make a point. During its consideration of the bill, the other body agreed to an amendment offered by the Senator from Alaska, Mr. STEVENS, which would establish a Commission on Executive, Legislative, and Judicial Salaries—known as the Quadrennial Commission—which would report its recommendations to the President by November 15, 1982.

The President is instructed to submit his recommendations, based on the report of this Commission, soon afterwards. These recommendations take effect 30 calendar days after they are submitted to Congress, unless a concurrent resolution is adopted during that time to disapprove the raise. Put simply, this amendment means a large pay raise for Members of Congress immediately after the elections.

This Commission was originally created under Public Law 90-206 in 1967. In 1969, pursuant to this Commission's recommendations, Members' pay was increased 42 percent from \$30,000 to \$42,500. In 1973, the next time the Commission worked, the Senate disapproved its recommendations. In 1977, the recommendations of the Commission were greatly scaled down before Congress failed to disapprove a 28.9-percent increase from \$44,600 to \$57,500. And, last year, the proposed raise of 23 percent from \$60,662.50 to \$74,800 was vetoed. After the mess we got in by raising our pay so much in 1977, we passed a law, Public Law 95-19, saying either House could veto the proposal. So, if history is a guide, we

can expect the Commission to recommend an increase of 30 percent to over \$80,000.

The amendment adopted in the other body perverts the Quadrennial Commission, since it is not supposed to meet until 1984, returns to a two-House veto, and virtually guarantees us a large pay raise right after the election. Still reserving the right to object, I would appreciate the assurance of the chairman of the Committee on Appropriations that we will not see this sort of automatic pay raise come out of conference.

Mr. FAZIO. Mr. Speaker, will the gentleman yield?

Mrs. SCHROEDER. I would be delighted to yield to the gentleman from California.

Mr. FAZIO. Mr. Speaker, I think at this point it would only be fair to say that the members of the conference committee have not had an opportunity to study this language, that they should study it and ought to take the opportunity to do so in conference.

While we certainly understand the concerns the gentleman has expressed, there should be at this point no certainty as to what the committee does. I think we have ample experience with this area of the law. This committee has a very good record, I think, in terms of dealing with these issues in an up-front manner, as we will on this occasion.

I would hope the gentleman would give the committee license to consider the issue, and should we so decide, bring it back in open session, outside of the conference report, and give an opportunity to this body to express itself.

Mrs. SCHROEDER. I want to thank the gentleman, because my main concern was to make sure that the body was on notice, since we could not take this up and make sure the conferees were aware of what happened in the other body so that we did not get ourselves in the position we did on the tax benefit issue that took us a long time to undo. So, I appreciate the gentleman's awareness of it.

Mr. OBEY. Mr. Speaker, will the gentleman yield?

Mrs. SCHROEDER. I would be delighted to yield.

Mr. OBEY. Mr. Speaker, I would just like to say, as one individual Member who has had it with the way Congress has dealt with this issue through the years, I would hope that this matter, which was offered in the Senate, would be included when it comes back in the conference report. I am not a member of the conference committee, but I simply say as one Member that I congratulate the Senator who put the amendment in in the first place.

It seems to me this place as an institution has to face up to a critical

choice. Is the question—which is a legitimate issue regardless of how you come down on the resolution of it—is the question of the appropriate level of compensation for Members of Congress, members of the executive branch of the Government, of the judiciary, going to be considered in a backdoor manner through increases in other emoluments around here, or is it going to be considered through the front door in a legitimate manner and reviewed by someone other than those who have a vested interest in the outcome? I suggest the proposal offered by the Senate is a legitimate, forthright, and open way in which to go about it, and I for one hope that this place has guts enough to face up to the necessity to deal with it that way and not through the back door.

There is a perfectly legitimate reason for having the Commission report this year, because their recommendations 2 years ago were turned down. We are losing a good many top quality people in the executive branch, and we do need to deal with this in a forthright, up-front manner. This is the only mechanism I know of to do it.

Mrs. SCHROEDER. Mr. Speaker, further reserving the right to object, and I will not object, I wanted to make it very clear that we are dealing with the potential pay raise in a front-door manner because in the past the front doors were shut and attempts were made to slip pay issues through the back door. People are tired of backdoor tactics.

I think it is very important that the body be aware of what the other body has done in this bill we are going to conference on. We may differ in our positions on the issue but at least we have had the discussion and the body is aware of the matter.

Mr. WALKER. Mr. Speaker, will the gentlewoman yield?

Mrs. SCHROEDER. I yield to the gentleman from Pennsylvania.

Mr. WALKER. Mr. Speaker, I thank the gentlewoman for yielding.

A further part of the problem we are faced with here, if in fact we would have a report from the Quadrennial Commission as the gentlewoman suggested could be a possibility, that we have already enacted into law an automatic appropriation for such pay raises so that this House would have no way of getting at such a pay raise should the Commission report under the circumstances described, under the Senator from Alaska's provision.

Mrs. SCHROEDER. Well, further reserving the right to object, the way I understand the Senator from Alaska's amendment, there are 30 calendar days to veto the pay increase once the President recommends it. The problem we could get into is, if his recommendations come over when we are not in session, since the amendment says

"calendar days" and not "legislative days," the gentleman's position that the pay raise would be automatic is right. The pay raise would be automatic if there are no legislative days during that 30-day period. So the gentleman is correct.

Mr. WALKER. If the gentlewoman will yield further, the fact is, even later on if there was a public outcry about this, we could not handle it as we have often handled these matters in appropriation bills because the appropriation for it would have been automatic.

Mrs. SCHROEDER. Further reserving the right to object, the gentleman is correct. They would be automatic, and of course members of the judicial branch would automatically have the pay increase because the court says we cannot undo their pay increases retroactively.

Mr. Speaker, I withdraw my reservation of objection.

□ 1030

The SPEAKER. Is there objection to the request of the gentleman from Mississippi? The Chair hears none, and appoints the following conferees:

MESSRS. WHITTEN, BOLAND, NATCHER, SMITH of Iowa, ADDABO, LONG of Maryland, YATES, ROYBAL, BEVILL, BENJAMIN, DIXON, FAZIO, CONTE, MCDADE, EDWARDS of Alabama, MYERS, MILLER of Ohio, COUGHLIN, KEMP, and O'BRIEN.

REPEALING OUTDATED SIZE AND WEIGHT LIMITATIONS IMPOSED ON U.S. POSTAL SERVICE

Mr. FORD of Michigan. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the Senate bill (S. 2073) to repeal outdated size and weight limitations now imposed on the U.S. Postal Service, and ask for its immediate consideration in the House.

The Clerk read the title of the Senate bill.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

Mr. HILER. Mr. Speaker, reserving the right to object, could the gentleman from Michigan (Mr. Ford) inform me, has he cleared this with the ranking member on the Committee on Post Office and Civil Service?

Mr. FORD of Michigan. Mr. Speaker, if the gentleman will yield, yes, it has been cleared by every interested party.

Mr. HILER. It has been cleared with the gentleman from Illinois (Mr. DERWINSKI) and every other interested party?

Mr. FORD of Michigan. Yes. I will just call the gentleman's attention to the fact that we are discharging our

committee and accepting a bill coming from the Republican-dominated committee on the Senate side. It is their bill that we are taking up, not ours. It is not a House bill.

Mr. HILER. Mr. Speaker, I thank the gentleman, and I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 2073

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 3682 of title 39, United States Code, is amended to read as follows:

"§3682. Size and weight limits

"The Postal Service may establish size and weight limitations for mail matter in the same manner as prescribed for changes in mail classification under subchapter II of this chapter."

(b) The size and weight limitations for other than letter mail established by subsections (a) and (b) of section 3682 of title 39, United States Code, as in effect on the day prior to the effective date of this section, shall remain in effect until changed pursuant to section 3682 of such title, as amended, by subsection (a) of this section.

Mr. FORD of Michigan. Mr. Speaker, the provisions of this much needed bill were included in comprehensive postal legislation which passed the House in both the 95th and 96th Congresses, but never reached the Senate floor.

I am now happy to report that the Senate has finally acted on this issue. On July 29, S. 2073 passed the Senate by voice vote. Upon its passage by the House today, and final enactment, we will at last have corrected a longstanding anomaly in our postal law concerning the mailing of parcels.

As the Senate report accurately points out, the purpose of this bill is to eliminate a statutory relic which discriminates against mailers in the Nation's urban areas. Since 1952, there have been statutory size and weight limits on parcels traveling through the mails. One set of limits, 100 inches in girth and length combined and 70 pounds, applies basically to parcels mailed to or from rural or outlying areas. Another, more restrictive set of limits, 84 inches in length and girth and 40 pounds, applies to parcels mailed between larger, urban post offices.

The only justification for the enactment of these differing standards was to protect the Railway Express Agency (REA), which was a private sector corporation in the business of transporting large parcels by rail between major cities. The Congress believed that the Federal Government should not compete for this specialized business. Because REA served only

urban areas, a more liberal standard was applied to parcel post delivery in rural areas.

REA ceased operations in 1975, thereby terminating the need for the restrictive and discriminatory parcel post limitation which are still found in the statute. Unfortunately, a variety of circumstances totally unrelated to the merits of this issue have prevented repeal of these limitations until today.

S. 2073 would remove the statutory restrictions and make parcel size and weight limits subject to the same administrative classification proceedings to which other types of mail, such as letters, are subject. Under this bill, appropriate nondiscriminatory size and weight standards will be determined in public proceedings before the Postal Rate Commission. All interested parties will have the opportunity to participate.

S. 2073 is totally noncontroversial. Even the Postal Service's most vigorous competitor for the parcel delivery business, United Parcel Service, has no objection to this bill. It is sound, public-spirited legislation.

I urge the passage of S. 2073.

● Mr. DERWINSKI. Mr. Speaker, this is progressive legislation designed to come to the aid of the overregulated American public.

What this bill does is repeal outdated size and weight limitations imposed on parcels mailed from certain post offices. The bill would standardize regulations to allow all post offices to handle packages that weigh 70 pounds and that are 100 inches in length and girth.

Right now, post offices in big cities cannot accept packages that weigh more than 40 pounds and exceed 84 inches in length and girth. However, smaller post offices can process for delivery parcels that weigh up to 70 pounds and that are 100 inches in length and girth.

The weight discrepancy which now exists between large and small post offices is the result of legislation enacted in 1951 to protect the old Railway Express Agency, which had offices located in the larger cities across the Nation. By limiting the ability of the old Post Office Department to process large packages, Congress made it clear it did not want the postal system to compete with private firms in the parcel post business.

The REA went out of business in 1975, and the United Parcel Service, the largest competitor to the Postal Service in the parcel business, has no objections to the bill before us.

This bill was passed by the other body on July 29 without opposition. It is a positive step forward in the elimination of an unnecessary regulation which has been a source of confusion to the public.●

GENERAL LEAVE

Mr. FORD of Michigan. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the Senate bill under consideration.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

REQUEST FOR PERMISSION FOR COMMITTEE ON ENERGY AND COMMERCE TO SIT DURING THE 5-MINUTE RULE ON TODAY AND THE BALANCE OF THE WEEK

Mr. SHARP. Mr. Speaker, I ask unanimous consent that the Committee on Energy and Commerce be permitted to sit while the Committee of the Whole is considering legislation under the 5-minute rule on today, Thursday, and for the remainder of the week.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

Mr. MILLER of California. Mr. Speaker, reserving the right to object, I do so in order to ask the gentleman who made the request if this is for further consideration of the Clean Air Act?

Mr. SHARP. Mr. Speaker, if the gentleman will yield, yes, it is.

Mr. MILLER of California. Mr. Speaker, I object.

The SPEAKER. Objection is heard. Under the rule, 10 objectors are required.

(Messrs. MARINEZ, PANETTA, SHANNON, MAVROULES, BEILSON, and VENTO, Mrs. SCHROEDER, and Messrs. GEJDENSON, UDALL, KASTENMEIER, and LUNDINE also objected.)

The SPEAKER. More than the required number having arisen, objection is heard.

WILDERNESS PROTECTION ACT OF 1982

Mr. SEIBERLING. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 6542) to withdraw certain lands from mineral leasing, and for other purposes.

The SPEAKER. The question is on the motion offered by the gentleman from Ohio (Mr. SEIBERLING).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly, the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of

the bill, H.R. 6542, with Mr. EVANS of Georgia, Chairman pro tempore, in the chair.

The Clerk read the title of the bill.

The CHAIRMAN pro tempore. When the Committee of the Whole rose on Monday, August 9, 1982, the Clerk had read section 1. Are there any amendments to section 1?

Mr. UDALL. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I take this time to make a unanimous-consent request.

We have worked with the minority on this bill to try to get it expedited and passed this week if we possibly can. We have adopted the rule, we have had the general debate, and we are now down to amendments. I am unaware of more than two or three amendments that will be offered, and in order to accommodate a couple of Members on the other side, I ask unanimous consent that all debate on the bill, and all amendments thereto, close at 11:10 a.m.

The CHAIRMAN pro tempore. Does the gentleman from Arizona (Mr. UDALL) first ask that the bill be considered as read and open to amendment at any point?

Mr. UDALL. Yes, Mr. Chairman. I ask unanimous consent that the remainder of the bill be considered as read, printed in the RECORD and open to amendment at any point.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Arizona?

There was no objection.

The balance of the amendment in the nature of a substitute, consisting of the text of H.R. 6846, is as follows:

WITHDRAWALS

SEC. 2. Except as specifically provided in this Act, notwithstanding any other provision of law—

(a) lands designated by Congress as components of the National Wilderness Preservation System are hereby withdrawn from disposition under all laws pertaining to oil, gas, oil shale, coal, phosphate, potassium, sulphur, gilsonite, and geothermal leasing, and all amendments thereto;

(b) lands within the national forest system which have been recommended for designation as wilderness in Executive Communication 1504, Ninety-sixth Congress (House Document Numbered 96-119) are hereby withdrawn from disposition under all laws pertaining to oil, gas, oil shale, coal, phosphate, potassium, sulphur, gilsonite, and geothermal leasing, and all amendments thereto, until Congress determines otherwise or until a revision of the initial plans required by the Forest and Rangeland Renewable Resources Planning Act of 1974 as amended by the National Forest Management Act of 1976 is implemented recommending the land concerned for other than wilderness designation, whichever comes first;

(c) wilderness study areas designated by act of Congress are hereby withdrawn from disposition under all laws pertaining to oil, gas, oil shale, coal, phosphate, potassium, sulphur, gilsonite, and geothermal leasing, and all amendments thereto for the period

or interim wilderness protection and management of such wilderness study areas contained in the act of Congress designating such wilderness study areas;

(d) lands within the national forest system identified for further planning in Executive Communication 1504, Ninety-sixth Congress (House Document Numbered 96-119) are hereby withdrawn from disposition under all laws pertaining to oil, gas, oil shale, coal, phosphate, potassium, sulphur, gilsonite, and geothermal leasing, and all amendments thereto, until one year after the date of final approval and implementation of an initial forest plan covering the further planning area concerned pursuant to the Forest and Rangeland Renewable Resources Planning Act of 1974 as amended by the National Forest Management Act of 1976: *Provided, however*, That if any further planning area is recommended for wilderness in such initial plan it shall remain withdrawn for the period specified for recommended wilderness areas in subsection (b) of this section.

EXCEPTED LANDS

SEC. 3. The withdrawal and other provisions of this Act shall not apply to—

(a) any national forest system land released to management for any uses the Secretary concerned deems appropriate through the land management planning process by any statewide or other Act of Congress designating components of the National Wilderness Preservation System now in effect or hereinafter enacted;

(b) lands designated as congressional wilderness study areas in Colorado by sections 105 and 106 of the Act of December 22, 1980 (Public Law 96-560), lands designated as congressional wilderness study areas in New Mexico by section 103 of the Act of December 19, 1980 (Public Law 96-550), or to lands within the River of No Return Wilderness, Idaho, which are subject to section 4(d)(1) of the Central Idaho Wilderness Act of 1980 (Public Law 96-312);

(c) Bureau of Land Management wilderness study areas, which have been identified pursuant to section 603 of the Federal Land Policy and Management Act of 1976 (Public Law 94-579); or

(d) lands in the State of Alaska.

PROSPECTING AND INVENTORIES

SEC. 4. (a) Nothing in this Act shall prevent the Secretary of Agriculture or Interior from issuing under their existing authority in any area of national forest or public lands withdrawn pursuant to section 2 of this Act such permits as may be necessary to conduct prospecting, seismic surveys, and core sampling conducted by helicopter or other means not requiring construction of roads or improvement of existing roads or ways, for the purpose of gathering information about and inventorying energy, mineral, and other resource values of such area, if such activity is carried out in a manner compatible with the preservation of the wilderness environment: *Provided, however*, That seismic activities involving the use of explosives shall not be permitted in designated wilderness areas.

(b) The Secretary of the Interior shall augment recurring surveys of the mineral values of wilderness areas pursuant to section 4(d)(2) of the Wilderness Act and acquire information on other national forest and public land areas withdrawn pursuant to this Act, by conducting, in conjunction with the Secretary of Energy, the national laboratories, or other Federal agencies, as appropriate, such mineral inventories of

areas withdrawn pursuant to section 2 of this Act as he deems appropriate. These inventories shall be conducted in a manner compatible with the preservation of the wilderness environment through the use of methods including core sampling conducted by helicopter; geophysical techniques such as induced polarization, synthetic aperture radar, magnetic and gravity surveys; geochemical techniques including stream sediment reconnaissance and X-ray defraction analysis; land satellites; or any other methods he deems appropriate. The Secretary of the Interior is hereby authorized to conduct inventories or segments of inventories, such as data analysis activities, by contract with private entities deemed by him to be qualified to engage in such activities whenever he has determined that such contracts would decrease Federal expenditures and would produce comparable or superior results.

(c) The Secretary of the Interior and the Secretary of Agriculture may prescribe such regulations, as they deem necessary, to insure that confidential, privileged, or proprietary information obtained by them or any officer or employee of the United States under this Act is not disclosed.

RECOMMENDATIONS OF THE PRESIDENT TO CONGRESS

SEC. 5. (a) At any time after the date of enactment of this Act, the President may transmit a recommendation to Congress that minerals prospecting, exploration, development, or extraction not permitted under this Act shall be permitted in a specified area or areas withdrawn pursuant to section 2 of this Act. Notice of such transmittal shall appear in the Federal Register and shall be conveyed to the Governor of the State in which the area or areas are located.

(b) A recommendation may be transmitted to the Congress under subsection (a) if the President finds that, based on available information—

(1) there is an urgent national need for the minerals activity; and

(2) such national need outweighs the other public values of the wilderness lands involved and the potential adverse environmental impacts which are likely to result from the activity.

(c) Together with a recommendation, the President shall submit to the Congress—

(1) a report setting forth in detail the relevant factual background and the reasons for his findings and recommendations;

(2) a statement of the conditions and stipulations which would govern the recommended activity; and

(3) in any case in which an environmental impact statement is required under the National Environmental Policy Act of 1969, a statement which complies with the requirements of section 102(2)(C) of the Act.

(d) Any recommendation made pursuant to this section shall take effect only upon enactment of a joint resolution approving such recommendation.

VALID EXISTING RIGHTS

SEC. 6. All provisions of this Act shall be subject to valid existing rights.

SEC. 7. The Secretary of the Interior is authorized to issue oil and gas leases for the subsurface of national forest or public land wilderness areas that are immediately adjacent to producing oil and gas fields or areas that are prospectively valuable. Such leases shall allow no surface occupancy and may be entered only by directional drilling from outside the wilderness or other nonsurface disturbing methods.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Arizona as to the limitation of time?

Mr. YOUNG of Alaska. Mr. Chairman, reserving the right to object, the gentleman from Arizona (Mr. UDALL) is fully aware that I will ask for votes on both of my amendments. First, I want to thank the gentleman for his consideration concerning this legislation on my behalf, but I would point out that that would give us approximately 30 minutes for votes, and it would be 5 minutes and 5 minutes. I would ask the gentleman, let us make it 11:30 a.m.

Mr. UDALL. Mr. Chairman, I amend my unanimous consent request to make it read 11:30.

The CHAIRMAN pro tempore. On the bill and all amendments thereto?

Mr. UDALL. Yes, Mr. Chairman.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Arizona?

There was no objection.

AMENDMENT OFFERED BY MR. SEIBERLING

Mr. SEIBERLING. Mr. Chairman, I offer an amendment. It is a technical amendment which I think we can dispose of very quickly.

The CHAIRMAN pro tempore. The Clerk will report the amendment.

Mr. SEIBERLING. Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Ohio?

There was no objection.

The text of the amendment is as follows:

Amendment offered by Mr. SEIBERLING: Page 6, line 4, change the period to a colon and insert the following: "*Provided*, That authority to enter into contracts, to incur obligations, or to make payments under this subsection shall be effective only to the extent or in such amounts as are provided in advance in appropriation Acts."

Mr. LUJAN. Mr. Chairman, will the gentleman yield?

Mr. SEIBERLING. I yield to the gentleman from New Mexico.

Mr. LUJAN. Mr. Chairman, let me ask the gentleman, is this the amendment for authority to enter into contracts and incur obligations?

Mr. SEIBERLING. Yes. This is a technical amendment to bring the bill in line with the Budget Act.

Mr. LUJAN. Mr. Chairman, I thank the gentleman.

We have no objection to the amendment on this side.

Mr. SEIBERLING. Mr. Chairman, I ask that the amendment be approved.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from Ohio (Mr. SEIBERLING).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. YOUNG OF ALASKA.

Mr. YOUNG of Alaska. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. YOUNG of Alaska: Page 5, line 18, amend by striking all after "Provided, however," through line 20 and insert in lieu the following: "That any seismic activities involving the use of explosives shall be limited to the surface area only, and that any permit issued for such activity shall stipulate conditions which mitigate fire hazards and wildlife impact."

Mr. LUJAN. Mr. Chairman, will the gentleman yield?

Mr. YOUNG of Alaska. I yield to the gentleman from New Mexico.

Mr. LUJAN. Mr. Chairman, I have a question that I would ask of the chairman of the subcommittee.

Are we proceeding on the basis now of H.R. 6542, as amended by H.R. 6846?

Mr. SEIBERLING. That is correct. Mr. Chairman, if the gentleman will yield, that is the markup vehicle under the rule.

Mr. YOUNG of Alaska. Mr. Chairman, this is a bill that has generated a great deal of interest across the Nation as a whole, and it is strongly supported by those environmental groups that have fought the Alaskan pipeline. I call them the "zero growth" groups. In fact, if the land we are talking about today did not have a potential for minerals and gas, we would not be arguing about this at all.

In the committee I offered an amendment that should have been accepted because it still would have given the people who are interested in developing the gas and oil in this Nation the one tool they must have. The one tool they must have is the utilization of seismic activities, on-surface explosives.

For those who are Puritans in the wilderness movement and throw up their hands and say that this is not compatible with the wilderness, my argument has been on this subject all along that what we are doing today in this action, without letting us use seismic activity, is that we are taking away the one tool that we must have if we are to identify those areas that will have the oil and gas potential. And, yes, as even the environmental groups say, when we need them, we need to go and get them, so we should let ourselves know where those gas and oil deposits are.

This is the only tool that we can use to narrow that area down to where the fields can be located.

There is no damage to be incurred with this amendment which I have offered. It is compatible with the habitat. We are talking about surface explosives, and I say to those Members in the Chamber that what we are talking about, if the Members can see this, is very important, and what I am showing here today is that the damage done by explosives is nil. What we see

here is a 5-pound charge. What we see down here is after it has been utilized, and there is no disturbance to the surface at all.

What happens when the charge is utilized is that then they can record upon the scientific equipment those shock waves and can in fact identify the possibilities of oil and gas deposits.

The gentleman from Montana (Mr. WILLIAMS) who led this charge to lock up vast areas of wilderness, came very nearly to the point of accepting this, too, recognizing full well that it would be politically advisable in his district. It is the one tool that every geologist has ever told me they must have to identify the fields.

I urge my colleagues to think of the debate and remember what was said. Unfortunately, most of them were not here when we debated this very important legislation on a Monday. I ask them to think about what I am asking here. I am not asking them to vote with the idea that we are going to lock up lots of land because I am going to vote against that, but I am asking them to at least give the opportunity to the geologists and the people in the USGS to identify with this one tool.

You would not go to a doctor and ask him to operate without the proper tool. You would not ask someone to build a home without giving him a hammer. You would not drive a car without a steering wheel. You certainly cannot identify these gas deposits without this utilization of surface explosives.

The amendment is very restrictive. It can only be used at a time when it is compatible with the wildlife and habitat in the vicinity of the area in which it is going to be used. It can only be used when it is not used against those other people who are visiting the area.

But the tool would be available, and I urge the Members to make this bill a little more compatible, a little more acceptable, and a little more realistic, and allow those who are experts in this field to utilize explosives in small amounts with strict limitations to be able to identify those fields which they need.

It is a simple amendment. It is a good amendment. It should be accepted if we are thinking rationally about what we are faced with today, the shortage of gas, the shortage of oil, and the shortage of resources which this Nation needs.

Mr. LUJAN. Mr. Chairman, will the gentleman yield?

Mr. YOUNG of Alaska. I yield to the gentleman from New Mexico.

Mr. LUJAN. Mr. Chairman, I want to tell the gentleman that I will support him in this amendment.

I was concerned about it, and in committee I did not support it because I have an agreement that I made with the gentleman from Ohio.

The CHAIRMAN pro tempore. The time of the gentleman from Alaska (Mr. YOUNG) has expired.

(By unanimous consent, Mr. YOUNG of Alaska was allowed to proceed for 1 additional minute.)

Mr. LUJAN. Mr. Chairman, if the gentleman will yield further, I will say that I will support it now because I think it is a necessary tool.

I noticed that the gentleman has put something in there—and some problems were raised about that before—and that is that activity shall stipulate conditions which mitigate fire hazards and wildlife income.

Mr. Chairman, I am convinced that there is no damage to the surface area of a wilderness area by seismic exploration, and I congratulate the gentleman on his amendment.

Mr. CLAUSEN. Mr. Chairman, will the gentleman yield?

Mr. YOUNG of Alaska. I yield to the gentleman from California.

Mr. CLAUSEN. Mr. Chairman, I think the gentleman from New Mexico (Mr. LUJAN) has raised a point that I was going to get clarification on. I understand the mitigation issue. The point I want to make is this: Is there anything in this amendment that would provide for a subsurface impact as a result of the explosion? It is strictly surface impact?

Mr. YOUNG of Alaska. It is surface impact, and the bill is very strictly drawn up. This only allows surface impact and small explosive charges, not subsurface drilling or setting the charges underground.

The CHAIRMAN pro tempore. The time of the gentleman from Alaska (Mr. YOUNG) has expired.

(By unanimous consent, Mr. YOUNG of Alaska was allowed to proceed for 1 additional minute.)

Mr. CLAUSEN. Mr. Chairman, if the gentleman will yield further, if there is surface impact, under the new amendment the gentleman has a requirement to mitigate the impact; is that correct?

Mr. YOUNG of Alaska. That is exactly right, against fire, and against any damage to wildlife.

Mr. CRAIG. Mr. Chairman, will the gentleman yield?

Mr. YOUNG of Alaska. I yield to the gentleman from Idaho.

Mr. CRAIG. Mr. Chairman, let me ask, the gentleman's amendment was basically objected to for what reason?

Mr. YOUNG of Alaska. Primarily because they said it was not compatible to wildlife and that in fact it would disturb the surface of the wilderness area.

Mr. CRAIG. In the noncompatibility wilderness argument, what was the reason for that? Was it concussion or sound?

Mr. YOUNG of Alaska. Sound primarily. My statement was that in the

wilderness hunting is allowed, and hunting decibel rates are higher than the explosive rates of these charges.

Mr. CRAIG. Mr. Chairman, if I could pursue that for just a moment with the gentleman, these wilderness areas do allow hunting for big game with big game rifles; is that correct?

Mr. YOUNG of Alaska. That is true.

Mr. CRAIG. And the gentleman is saying the concussion of a large rifle going off, in a decibel effect, has no greater impact than the charges proposed in this seismic activity?

Mr. YOUNG of Alaska. The seismic activity has less impact. It has less actual impact.

The CHAIRMAN pro tempore. The time of the gentleman from Alaska has again expired.

Mr. CRAIG. Mr. Chairman, I ask unanimous consent that the gentleman from Alaska, Mr. YOUNG be permitted to proceed for 1 additional minute.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Idaho?

Mr. SEIBERLING. Mr. Chairman, reserving the right to object, we have until 11:30 to take care of the gentleman's two amendments, and he says he is going to ask for record votes. That takes care of a half hour. That means that we have until 11 in effect to cover the two amendments, and I submit that in fairness, we ought to have equal time on each one of them.

□ 1045

The gentleman has now consumed about 8 minutes. I would appreciate his exercising restraint since we are trying to accommodate him in this time restraint.

Mr. YOUNG of Alaska. I respect the Chairman's kindness and would urge those that have listened to this argument I presented to please vote my way. When you listen to arguments from the gentleman from Ohio, listen to what he has to say, but you need this one tool.

Mr. Chairman, I withdraw my unanimous-consent request.

Mr. SEIBERLING. Mr. Chairman, I move to strike the requisite number of words and rise in strong opposition to the amendment.

Mr. Chairman, such an amendment, not precisely the same, but in substance the same, was rejected by the Committee on Interior and Insular Affairs by a vote of 29 to 11.

The committee rejected the amendment because we reached the conclusion that certain activities are compatible with wilderness and certain others, such as the use of large amounts of dynamite, are not. I might add that a 5- to 10-pound charge of dynamite is far, far noisier than any rifle used for hunting.

Initially one might ask why the committee was so concerned with explo-

sions in wilderness areas, because such explosions only temporarily, it is said, disrupt the wilderness serenity. The answer is that it would not be just one series of explosions, but a series of explosions over many months.

Each company is free to conduct its own seismic testing and set of explosions and each company reserves the information to itself and does not necessarily share it with others. So, if this amendment passes you could have a whole series of seismic tests over several field seasons in the same wilderness area.

The situation in the Bob Marshall Wilderness in Montana is a good example, and is one of many reasons why Regional Forester Tom Casten turned down the seismic permit application for that area.

Mr. WILLIAMS of Montana. Mr. Chairman, will the gentleman yield?

Mr. SEIBERLING. At this point I yield to our colleague from Montana to describe that situation.

Mr. WILLIAMS of Montana. I thank the chairman for yielding and rise in opposition to the amendment of my friend and colleague from Alaska (Mr. YOUNG).

DON YOUNG is correct when he says that small surface explosions cause little or no surface damage. That is, above-surface explosions, when they are completed, show very little surface damage.

In fact, I have been in the areas after they have gone off and I have been impressed that there may be a few rocks thrown around, but very, very minor surface damage. But that simply is not the issue here.

If we have learned anything in modern civilization these past noisy 20 years, we have learned that repeated loud, unexpected, booming sounds are very disruptive, obnoxious, and provide harassment to the people that hear them.

Let me describe what would have happened in a wilderness area in Montana, the largest wilderness area in the Nation called the Bob Marshall, 1½ million acres in the center of the Rocky Mountains.

There was a permit there by a company to do the type of seismic explorations to which the gentleman from Alaska refers. The Forest Service refused to grant the permit.

Here is why. Not because there was going to be any surface damage but, rather, because it would have involved 270,000 pounds of explosives. It would have required 5,700 separate explosions and that is 60 pounds of explosions placed every 150 feet and fired off perhaps 100 times a day.

It would have involved a crew of three dozen people transported back and forth over this wilderness area by helicopters for probably the better part of a summer. That is just the one company.

This amendment refers to all the wilderness areas in this country. Noise in wilderness is a pollutant, make no mistake about it. The setting off of 270,000 pounds of explosives continually, 100 times a day for a fourth of a year every year, chases animals, starts forest fires, disrupts hunters and fishermen who are in those areas, and is absolutely incompatible with wilderness.

Let me assure my colleague from Alaska and my friends in the Chamber that people who like wilderness areas have no fight with oil or gas companies. I have no fight with them.

We all understand that this is a roughneck, dirty, noisy, but essential business in this country. Americans welcome the oil companies. We welcome them into the recreation rooms of our States. We want them in the kitchens of our agricultural areas and in the dining rooms of our mountains where they can feed on the supplies below.

We simply ask, I think legitimately, that they stay out of our parlor. The wilderness areas are America's parlors and the dirty, roughneck, but essential oil companies should politely but firmly be told to stay out of our parlors.

The CHAIRMAN. The time of the gentleman from Ohio (Mr. SEIBERLING) has expired.

(By unanimous consent Mr. SEIBERLING was allowed to proceed for 2 additional minutes.)

Mr. SEIBERLING. Let me just thank the gentleman and make one or two additional observations.

First of all, we did reach a compromise on the seismic issue in the bill that is before us. The bill allows seismic exploration in wilderness candidate areas. That is, areas that have been recommended by the executive branch for wilderness, or areas that have been designated by the executive branch or Congress for further wilderness study. It does not allow it in designated wilderness. That was a compromise that was reached in the bill as introduced and which was reaffirmed by the Interior Committee by a vote of 29 to 11.

This amendment would go further and breach that compromise by opening designated wilderness areas to explosive seismic testing.

Second, I would simply like to point out that no less valid a conservative than George Will, writing in the latest Newsweek magazine, has this to say, and he supports this bill: "There are 80 million acres of designated wilderness, 56 million of them in Alaska."

(I might say parenthetically this bill does not affect Alaska at all.)

Only 1.2 percent of the "Lower 48" States is wilderness; only 4 percent could ever be so designated. Surely the Nation's vitality and security are not so marginal as to depend on that 4 percent.

We are not dealing with 4 percent today, we are dealing only with about 2 percent. Someday we may have to go into that last 2 percent but not now, because we already have 137 million acres under lease and open to oil and gas explorations and development on the public lands in the lower 48 States alone. And untold millions of acres are already under lease in Alaska and offshore.

Mrs. BYRON. Mr. Chairman, will the gentleman yield?

Mr. SEIBERLING. I yield to the gentleman from Maryland (Mrs. BYRON).

Mrs. BYRON. Mr. Chairman, I rise in opposition to the amendment offered by my colleague, the gentleman from Alaska.

As a member of the House Interior Committee's Subcommittee on Public Lands and National Parks and as an original cosponsor of this measure, I know firsthand the delicate compromise that it represents for many of us from both sides of the aisle.

The proposal is designed to protect the national wilderness preservation system and future additions to it from certain types of mineral leasing including oil and gas leasing. The impact of such leasing can be destructive to the very characteristics of these areas which made them worthy of actual or potential wilderness designation by Congress in the first place.

I would also like to stress that this bill will not unduly jeopardize efforts to increase U.S. energy independence. Reducing U.S. dependence on unstable and expensive foreign energy sources is a goal to which I am as committed as any Member of this body. However, I firmly believe that our unique and untouched wilderness areas should be the last place where oil and gas leasing is allowed, not the first.

I find it interesting to note that a General Accounting Office study found that up to 80 percent of the existing oil and gas leases on some 137 million acres of federally owned non-wilderness lands will expire without any exploratory drilling. I understand that the Department of the Interior has made a similar estimate. Clearly there is room for far more exploration and development on these nonwilderness lands.

To those who would argue that most of our Nation's oil and gas reserves are located in areas protected by this bill, it is worth noting that experts at the Oak Ridge National Laboratory have estimated that wilderness and wilderness candidate areas possess only 2 to 3 percent of the country's undiscovered reserves.

Another important concern of mine which ties in to my work on both the House Interior Committee and the Armed Services Committee is the issue of U.S. dependence on imported strategic and critical materials. I would like

to assure my colleagues who share my concern in this area that the provisions of this bill do not apply to the exploration and development of such strategic and critical hard rock minerals as cobalt, chromium, manganese, nickel and tungsten. Other hard rock minerals such as lead, gold, zinc, silver, and copper are also exempt from the provisions of this bill.

I oppose this amendment which would, if adopted, allow the use of explosives in existing wilderness areas like the Bob Marshall Wilderness in Montana.

Last summer, I joined with my chairman and other members of the Public Lands Subcommittee to travel into the Bob Marshall Wilderness Area. It was a challenging trip but extremely worthwhile. During our visit to the Bob Marshall Complex, I discussed firsthand with the regional forester the seismic prospecting permit which had been requested. When asked why the permit to carry out the seismic exploration in the Bob Marshall Wilderness had been denied, he made several points.

First, he noted that the public was overwhelmingly opposed to the seismic operations.

Second, he felt that the seismic operations would conflict with significant wildlife, geologic, scenic, and recreational values.

Third, he recognized that similar prospecting efforts by other interests in the same area would repeat the potential environmental and social impacts on the area.

While these are only a few of the reasons the permit was denied, all of these points are just as important today as they were then.

As reported from the Interior Committee, this bill specifically allows seismic activity involving the use of explosives in recommended wilderness or further planning areas. Indeed, the committee recognized that the use of such testing procedures might be necessary to gather the best possible information for making wilderness versus nonwilderness recommendations. However, I fail to see the wisdom involved in going through the lengthy process of designating an area as wilderness, actually designating that area as wilderness and then blasting it with explosives as my colleague from Alaska would have us do.

Mr. Chairman, I hope that my colleagues in the House will join me in opposing this amendment. The Bob Marshall is not the only wilderness area which would be hurt if this amendment were adopted, but it would be among the first as CGG is now appealing its seismic permit denial. To conclude my remarks in opposition to this amendment and in support of the bill as reported out of the Interior Committee, I would like to quote two Montanans who wrote to me more

than a year ago concerned about the future of the Bob Marshall Wilderness.

They were, and I am sure continue to be, concerned about unnecessary exploration and development in the Bob Marshall Wilderness Complex. First, they asked if I had ever actually been to any of the wilderness areas in Montana—which I did do incidentally just a few months later. Then Mr. and Mrs. Steele of Missoula, Mont., let me know in no uncertain terms how they felt about protecting unique wilderness areas like those which can be found in the State of Montana.

In their own words they suggested that—

To destroy these areas would be to destroy the very heart and soul of this Nation. They represent our history, our heritage, and our future.

Mr. Chairman, I would be among the first to admit that the day may come when it will be necessary to develop our wilderness areas, but I agree with these two Montanans that that day has not yet arrived.

Mr. BEREUTER. Mr. Chairman, I move to strike the requisite number of words.

I will be brief to preserve the time remaining for other debate.

I would first like, however, to identify myself as one of the original cosponsors of this resolution and a strong supporter of the resolution.

I know that we all have various interest groups come to us with statements like "this is a delicate balance," "we cannot change anything," "do not touch anything."

This simple-minded approach is a kind of knee-jerk reaction, I would have to say, but it is understandable given this objective.

There is one thing we have to consider, it seems to me, however, in this body and that is we are here to make rational decisions.

The gentleman from Alaska I think has convincingly made the point that the rational decision is to accept his amendment.

I would like to associate myself with the remarks of the gentleman. We are here to make rational decisions. This is a reasonable amendment and it ought to be approved.

I ask my colleagues to support the amendment offered by the gentleman from Alaska.

Mr. JEFFORDS. Mr. Chairman, will the gentleman yield?

Mr. BEREUTER. I yield to the gentleman from Vermont.

Mr. JEFFORDS. I appreciate the gentleman yielding. I respect the gentleman's judgment.

However, I must say that I have to rise in opposition to this amendment.

I think the points have been well made on the need for exploration but

it seems to me that this bill reached a reasonable compromise by allowing such exploration to go on in the study areas.

We have such a small amount of wilderness area and yet the tremendous harm that could be done, not necessarily will be done, but the kind of exploration which can go on here with respect to the explosives and the intrusion of man into these wilderness areas when there is so little land of that available to those who really desire to preserve the wilderness. It seems to me the compromise, which I understand was a bipartisan compromise reached by the subcommittee, seemed to be a very reasonable one.

So I must rise in opposition. Let me point out some of the difficulties with specifics. It makes little sense to allow any type of seismic activity in wilderness areas without allowing exploratory drilling, and the reasons for prohibiting drilling have already been discussed at length.

Regardless of the type of seismic exploration employed, it is impossible to adequately mitigate fire hazards and wildlife impact. Even under the method of seismic exploration that is thought to be the least damaging, there are grave risks of forest fires. Typically, 50 pounds of explosive is detonated every 150 to 200 feet for several miles or more. In order to do the job adequately, a surveying crew might construct a grid of crisscrossing lines that is many square miles in size.

Although such a system involves only a small crater around each explosive charge, there is also some burning of vegetation. Since seismic exploration usually occurs during times of good weather, this activity clearly represents a serious forest fire risk.

In addition, seismic exploration can have harmful effects on wildlife species, many of which are extremely sensitive to human activity. Not only are explosions disturbing, but so are helicopters and other activities associated with seismic exploration.

Mr. Chairman, I said during general debate on this bill that the reason we are here debating this bill is that the administration has miscalculated by underestimating the importance of wilderness and other environmental issues to the American people. We all share the goal of making our Nation more energy independent, but the amount of oil and gas at issue here is simply not worth the sacrifice of compromising this national commitment to compromising the wilderness character or the recreational value of these lands.

In summation, in opposing this amendment I might say that the explosive potential is so great relative to the fragile ecosystem we are dealing with that we might dub this amendment the "Nuke the Moose" amendment.

Mr. BEREUTER. I would have to say that if the President is ever to appropriately exercise his emergency powers we simply must have this kind of seismic exploration. It is not a damaging kind of provision to add to this bill; nor is the technique really damaging to the wilderness areas where it might be used.

Mr. LUJAN. Mr. Chairman, will the gentleman yield?

Mr. BEREUTER. I am happy to yield to the distinguished gentleman from New Mexico, the ranking minority member of the Committee in Interior and Insular Affairs.

Mr. LUJAN. The gentleman, as always, comes up with a very reasonable explanation and I think he has done so in this particular case.

Seismic is a buzzword and any time you are going to use that you are going to incur the wrath of many people. But the fact is, that there is no damage to the surface of the wilderness area. It is just that we seem to draw sides and find ourselves in that position many times.

I congratulate the gentleman on his logic.

Mr. BEREUTER. I thank the gentleman.

Mr. CHENEY. Mr. Chairman, will the gentleman yield?

Mr. BEREUTER. I am pleased to yield to the distinguished gentleman from Wyoming, my colleague on the committee.

Mr. CHENEY. Mr. Chairman, I rise in support of H.R. 6542, which would prohibit the leasing and development of oil and gas in our Nation's wilderness system.

Although the bill lacks certain provisions which I would have preferred to see included, such as clarification of the status of certain lands outside the wilderness system, I nevertheless supported this legislation in committee and I vote for it today because of a strong personal belief that congressionally designated wilderness areas should be off-limits to oil and gas leasing and development at this time.

This has been my position for more than a year, dating back to the disclosure that hundreds of lease applications had been filed on wilderness lands, including Wyoming's Washakie Wilderness—a 686,584-acre region in northwestern Wyoming, adjacent to Yellowstone National Park, which was set aside by Congress several years ago as a component of the National Wilderness Preservation System.

Our national parks and wilderness areas are special places which deserve preservation and protection from development. I believe, and I think most people agree, that oil and gas development could be potentially destructive to the physical characteristics of these areas and that it would be incompatible with the esthetic and scenic attributes which motivated the Congress

in the first place to single out these areas for special status. Therefore, I strongly support that portion of H.R. 6542 which prohibits leasing in designated wilderness areas. This action will place the Congress clearly on record, ending the speculation and uncertainty that currently prevails as to the legal responsibilities of the Government under the 1964 Wilderness Act with respect to leasing in wilderness areas.

At the same time, I wish to make clear my disappointment that the committee refused when considering this legislation to provide the same kind of clear guidance and management certainty with regard to lands which have been studied for wilderness potential, but not included in the wilderness system. For too long, too much land has remained in uncertain management status in the wake of the Forest Service's RARE I and RARE II wilderness inventories. This legislation should have addressed this problem. Attempts to raise this legitimate area of concern during committee consideration of the bill were ruled nongermane, thus precluding a full and open discussion and a vote on the record.

The point is that the purpose of this legislation is to prevent leasing and development in areas set aside by Congress as wilderness. However, the bill withdraws from leasing not only designated areas, but also proposed areas and lands under study which may eventually be proposed as wilderness, pending congressional action on their status. Yet, there is nothing in the bill that would impel the Congress to determine the wilderness status of these lands in a timely fashion—such as a date in the future on which these lands would again become available for leasing in the event of congressional inaction. In other words, certain lands are withdrawn without benefit of congressional decision as to whether or not they should be added to the wilderness system, and certain other lands could automatically be withdrawn from leasing merely by virtue of their being recommended for designation as wilderness at the end of a study process. Congress needs to fulfill its responsibility to make a decision, one way or the other, on the wilderness status of these lands, so that they can be considered in the forest planning process and managed according to their particular attributes. Instead, these lands are in management limbo.

In an effort to address this problem of management uncertainty in my own State, I have joined with Wyoming's two Senators to introduce the Wyoming Wilderness Act of 1982. Our Wyoming bill has three major objectives. First, like the bill we are considering today, it would withdraw all congressionally designated wilderness areas in Wyoming from leasing. In this regard,

our bill goes a step further than the Lujan-Seiberling bill by also withdrawing Wyoming wilderness areas from operation of the mining laws, subject to valid existing rights, effective upon enactment. Second, our bill would add several hundred thousand additional acres of national forest lands in Wyoming to the wilderness system. And, third, it would release remaining forest lands from their current uncertain status and include them in the forest planning process. It is the hope of the Wyoming congressional delegation that our bill can be enacted yet this year.

Mr. Chairman, I would like to make one other point about Wyoming's contributions, both to the Nation's wilderness system, and to the effort to achieve energy sufficiency. Currently, about 25 percent of Wyoming's national forest system has been designated as wilderness. More than 2 million acres of some of the Nation's most spectacular wilderness country is in Wyoming, and if the Wyoming congressional delegation's bill is enacted, our contribution to the wilderness system will increase by several hundred thousand acres. We in Wyoming are proud of our national parks and wilderness areas, and we mean to preserve and protect them.

We are also proud of our contribution to the Nation's energy supply. For many years, the oil and gas resources of Wyoming have helped fuel the American economy, and they continue to do so. There are enormous coal resources in Wyoming which we have only begun to tap. There are extensive uranium deposits, and a variety of other important minerals. Since half of Wyoming is owned by the Federal Government, most of these resources lie beneath federally owned lands—national forest and Bureau of Land Management lands. It is the view of most Wyoming people that we should continue to encourage the development of these resources, which contribute to the Nation's energy security and benefit the economy of the State.

It is also the view of most people that Wyoming's national parks and wilderness areas, which comprise less than 10 percent of the State's land, should be protected from development. These lands should be off-limits to leasing, and that is why I support the legislation before us today.

The remaining federally owned lands in Wyoming should be managed according to the several laws already on the books and according to their particular attributes. For many areas, that should mean allowing leasing and others kinds of public uses. But the land planning and management responsibilities of the various land-managing agencies cannot be met until Congress fulfills its responsibility to make a decision on the status of federally owned lands.

The bill before us today represents one important decision: that wilderness areas will be off-limits to mineral leasing. Now, it is time for Congress to get on with the job of determining the status of millions of acres still in limbo.

Mr. BEREUTER. I thank the gentleman for his comments.

Mr. HUCKABY. Mr. Chairman, will the gentleman yield?

Mr. BEREUTER. I yield to the distinguished and able gentleman from Louisiana, also my colleague on the committee.

Mr. HUCKABY. I thank the gentleman for yielding and want to commend the gentleman from Nebraska (Mr. BEREUTER) for his excellent statement.

I also am in favor of this legislation. In addition to that, I support the gentleman from Alaska in his amendment. I think it is a reasonable balance, just enabling this Nation to take inventory of what we have so that in the future, if it is necessary that we develop these areas, and hopefully it will not be, but at least we will have an inventory and have the knowledge of what is there.

I think that this amendment certainly offers a reasonable balance and I think the statements today bear out that there will be no harm done whatsoever to the wilderness areas.

Mr. BEREUTER. I thank the gentleman for his comments and yield back the balance of my time.

□ 1100

Mr. UDALL. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I am strongly opposed to this amendment which would remove the bill's prohibition against seismic blasting in areas formally designated as wilderness. I would note that this amendment was offered during markup in my committee and was soundly rejected by a vote of 28 to 11.

The bill as it stands before the House today would permit such testing in wilderness candidate areas, but would prohibit blasting in areas that the Congress has formally determined to be wilderness. There is a good and obvious reason for this action. Wilderness candidate areas are still in something of a state of examination and discussion. Congress has not yet determined them to be deserving of designation as wilderness, although it may soon do so. But formal wilderness areas have passed through this process and have been determined fully qualified.

Although some forms of blasting do not involve great or permanent damage to the surface of the land in a wilderness, there can be no question that all forms of seismic blasting entail considerable disruption. Helicopter overflights are frequent, crews

of workers are in and out, hundreds of explosions may be ignited each day, wildlife is disrupted, and forest fires are increased.

These are not permanent effects on the wilderness but they are significant and wilderness areas are special places. The Wilderness Act itself describes these lands as places that have "outstanding opportunities for solitude or a primitive and unconfined type of recreation." Now I have managed to spend a great deal of time in the outdoors myself and I cannot understand how anyone else who has ever been in a wilderness area would not cringe at the thought that he would have to share this grand and glorious environment, this place with an "outstanding opportunity for solitude," with the sound of a few hundred TNT explosives reverberating around the mountains every day.

Now, if some overriding national purpose were being served by this negation of everything most people go to wilderness areas for, then I might understand. But despite the assertion of the amendment's proponents, seismic testing does not determine what is the mineral potential of a given area. There is nothing definitive about seismic testing in determining the oil and gas potential of the lands subjected to this blasting. There are other ways, if they must be employed, for geologic information about whether the lands may be favorable for oil and gas that are far less destructive to wilderness values.

This brings me to a point I would like to make about an argument that is made generally against our bill, and indeed it is made constantly against the very concept of wilderness. Some of my colleagues ask, "How can you lock up this land until you know precisely what minerals, what oil, and what gas lie underneath? Let's find out what resources are there first."

I come from the greatest mining State in the Union and I have been listening to arguments about mining all my life. If there is one thing you can say with any certainty about finding minerals it is that a mineral inventory is not like taking inventory in a supermarket. It is not like counting cans of peaches on a shelf. The knowledge and the technology that helps us determine what minerals exist in a given place, as well as the knowledge and technology that make it possible to extract those minerals, are constantly changing and improving.

In the oil and gas business, you can never know "what is there" until you build roads, get your equipment in and drill a hole in the ground. Without it, you can never get the kind of "knowledge" that opponents of this bill say we must have before we designate a wilderness area. So what these opponents would have us do is build roads

and move in drilling equipment and punch holes deeper and deeper, year after year, in every area of this country that could become wilderness. In the process, of course, the wilderness values are destroyed and those very areas we cherish so much are condemned to a lengthy, if not perpetual, exploration program.

I do not think that this is a proposition many of us would accept. I think most of us understand that in everything we do we make decisions on the basis of imperfect information—it is information that is the best we can possibly have, but it is imperfect. The job of designating and maintaining wilderness is no different. It is and always will be impossible for us to know everything there is to know about a wilderness area before it is designated.

But we are able to say that this area is primitive, its wildlife is abundant, its scenery special and its opportunities for solitude and divorce from the modern industrial world outstanding and that this should be the last place where we dig and drill and mine and pave and blast. I would hope that my colleagues keep this in mind as we vote on this amendment, and others to follow, and of final passage of this important bill.

Mr. VENTO. Mr. Chairman, will the gentleman yield?

Mr. UDALL. I yield to the gentleman from Minnesota.

Mr. VENTO. Mr. Chairman, I rise in opposition to the Young of Alaska amendment. I think it breaches the good faith agreement that of the Interior Committee. I understand there might be some misunderstanding, but clearly I think the intention of the legislation is to achieve a compromise in an area where there had been confrontation between the Department of the Interior, specifically the Secretary, and the committee. I would hope that we could move ahead on this compromise. Many of us have bent over backwards to provide the type of inventory and survey opportunities that are present in this bill. I feel that this attempt to grab, to expand on that and to open it up further in these areas for seismic blasting, 270,000 pounds of explosives, for instance, in the Montana area, would be inappropriate.

Mr. Chairman, I think there are other ways we can achieve that. Necessity is the mother of invention. There are other ways that we can obtain that which will be less intrusive to wilderness. I would hope that we would vote down this amendment and seek other means to provide for the adequate inventorying of these resources.

Mr. Chairman, it has been almost 20 years since the enactment of the Wilderness Act. With this historic legislation, Congress declared that it was a national policy "to secure for the American people of present and future

generations the benefits of an enduring resource of wilderness." In making this commitment, Congress assured the public that when the environmental and recreational opportunities that wilderness areas offer was sought, it would be found.

Yet, we are now faced with an assault on our commitment to the preservation of the irreplaceable assets that wilderness represents. For over a year there has been an intense debate taking place on the question of whether to allow oil and natural gas leasing in wilderness areas. The debate arose because the present administration in their rush to open public lands, proposed granting leases in several environmentally fragile areas.

Leasing and exploration in wilderness areas is a high stakes issue, whose consequences threaten the integrity of that which we have worked so hard to protect. Virtually all Americans recognize the need for the United States to become more energy independent. Legislation has been enacted that balances this need with conservation of our unique resources. Careful compromises were worked out in an effort to secure the proper management of the public's resources. As a result of these past legislative compromises, there are presently over 100 million acres of Federal land under lease.

Mr. Chairman, H.R. 6542 is a careful compromise in the tradition of past legislation. To allow the splintering of this compromise through amendment which subvert the intent of this legislation, shakes the premises on which this compromise was formed. The House Interior Committee held a number of hearings, including one I chaired in St. Paul, Minn., to gather information on the wilderness question. The hearing record speaks for itself. The public thoroughly enjoys and values the wilderness areas we have and is adamant in their opposition to activities which threaten this resource. I think we in Congress would do well to heed the public's concern and pass H.R. 6542 as drafted by the Interior Committee.

Mr. AuCOIN. Mr. Chairman, will the gentleman yield?

Mr. UDALL. I yield to the gentleman from Oregon.

Mr. AuCOIN. Mr. Chairman, I rise in opposition to the amendment and in support of the bill as reported from the committee.

I think Members need to remember what the wilderness system was intended to be when it was created. The wilderness is an area in which man is a visitor. I cannot understand how anyone can feel that man, bringing in dynamite for seismic tests on the surface or beneath the surface, can believe in any way that that is compatible with the idea of a wilderness.

The gentleman from Arizona makes the point that this prohibition does

not apply to candidate wilderness areas. I think that is a crucial fact. It applies only to the designated areas.

I do not think that anyone should feel like they are a no-growth freak to oppose this amendment. The conservative columnist, George Will, as Chairman SEIBERLING indicated, has come out essentially in agreement with the committee's position on this issue. If George Will is, to use the gentleman from Alaska's term, a "zero growth" extremist, then Alexander Haig is a "shrinking violet."

The bill is a solid compromise and only the most narrow of special interests oppose its enactment.

I commend my colleagues for producing this legislation. I know it was not easy—particularly in light of all that Secretary Watt has done to confuse this issue.

Like many Americans, I was stunned one Sunday morning last February to hear the Secretary announce that he intended to present Congress with legislation to close the Nation's 80 million acres of wilderness to oil and mineral development. I was hopeful that Secretary Watt's statement marked a turn-about in his attitude and I anxiously awaited a draft of his bill.

I was quickly brought back to reality once I read it. It was a sham. Instead of preserving the wilderness system, it would have destroyed it.

After reading the fine print, I joined nearly 140 of my colleagues in cosponsoring House Resolution 427, introduced by Mr. UDALL and Mr. CONTE. That resolution laid out some fairly basic principles with respect to our existing wilderness, the foremost among them being that the National Wilderness System should be the last place where oil and gas development is allowed to occur.

This bill strikes a bipartisan compromise that averts the crisis brought about by the Secretary's actions. Much of this could have been avoided if the Secretary had exercised his discretion in this matter as previous Secretaries had done.

As we all know, the Secretary, while empowered to issue leases, is not forced to do so and, since the passage of the Wilderness Act in 1964, no Secretary of the Interior, regardless of political party, has done so.

I strongly urge my colleagues to vote for this bill and against any weakening amendments. It is a thoughtful, balanced piece of legislation designed to protect our current wilderness system and future additions as well as insure the orderly development of our mineral resources.

Mr. UDALL. Mr. Chairman, I urge a "no" vote on the amendment.

Mr. Chairman, I yield to the gentleman from Alaska (Mr. Young).

Mr. YOUNG of Alaska. I am glad the chairman of the full committee

recognizes us. I thought we did have an agreement. We can go on and on. I am going to start asking unanimous consent for an extension of his time.

Mr. UDALL. I did not ask for an extension. I will be glad to yield what time I have to the gentleman.

Mr. YOUNG of Alaska. I understand what you are saying, but I just want you to know on that side that if we editorialize when we continue, I am going to ask for it. I just want you to know that.

Mr. UDALL. Mr. Chairman, I ask for a "no" vote on the amendment.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from Alaska (Mr. YOUNG).

The question was taken; and on a division (demanded by Mr. SEIBERLING) there were—ayes 14, noes 20.

RECORDED VOTE

Mr. YOUNG of Alaska. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 115, noes 281, not voting 38, as follows:

[Roll No. 270]

□ 1115

Messrs. ATKINSON, BRINKLEY, PRITCHARD, and DAVIS changed their votes from "aye" to "no."

Mr. RITTER changed his vote from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. YOUNG OF ALASKA

Mr. YOUNG of Alaska. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. YOUNG of Alaska: Page 2, line 14, delete "," and insert "., strike lines 15-22.

Page 3, strike lines 1 through 25.

Page 4, strike lines 1 through 6.

Page 5, line 5, strike the "., and insert "., and add:

"(e) lands within the forest system which have been recommended for designation as wilderness in Executive Communication 1504, Ninety-sixth Congress (House Document Numbered 96-119);

"(f) wilderness study areas designed by act of Congress; and

"(g) lands within the national forest system identified for further planning in Executive Communication 1504, Ninety-sixth Congress (House Document Numbered 96-119)."

Mr. YOUNG of Alaska (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Alaska?

There was no objection.

Mr. YOUNG of Alaska. Mr. Chairman, at this time, because of the time limit, I ask unanimous consent to extend the debate time on all amendments to the bill for an additional 10 minutes, to be equally divided.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Alaska?

There was no objection.

The CHAIRMAN pro tempore. The gentleman from Alaska (Mr. YOUNG) is recognized for 7½ minutes.

Mr. YOUNG of Alaska. Mr. Chairman, the last vote shows the mood of this House, the pressure of those groups that have misled you, the inactivity of those who try to tell you they want to seek those resources. Frankly, I will tell you that you voted your consciences, but without good knowledge.

Mr. Chairman, the additional part of this bill, to which the last amendment was not accepted, would have made the bill part way compatible; but there are 14½ million acres in this bill and I want each one of you in this room to know that it affects you because it is in your districts, and you have not spoken on it. You have not voted on it. You have not had any hearings on it.

The fact is you are being asked today, unbeknownst to you, to put in an additional 14½ million acres of land

by the action of this bill. I do not know how many of you know this.

Mr. Chairman, we are faced with an energy shortage, a mineral shortage, and we are cutting our own throats. I hope some of the Members that voted against that last amendment and are going to vote for this bill recognize what you are doing to yourselves, and I am going to go through the areas.

Alabama has 12 areas that are going to be affected by this legislation and we had no hearings on it.

Arizona, 37.
Arkansas, 11.
California, 217.
Colorado, 20.
Florida, 12.
Georgia, 11.
Idaho, 37.
Illinois, 6.
Kentucky, 2.
Mississippi, 3.
Missouri, 2.
Montana, 66.
New Hampshire, 8.
New Mexico, 6.
Nevada, 15.
North Carolina, 24.
Oregon, 43.
Pennsylvania, 12.
South Carolina, 3.
Tennessee, 8.
Texas, 6.
Utah, 26.
Virginia, 18.
Vermont, 2.
Washington State, 29.
West Virginia, 3.
Wisconsin, 7.
And Wyoming, 32.

And we are not having one hearing on those wilderness areas. Now, my good chairman will tell you, saying, you vote for this bill and then if you do not want it in wilderness, we will take it out. My friends, how many wilderness areas have we ever taken out after we put it into wilderness? None. We have taken no wilderness area out.

We have 229 million acres in wilderness and our people are out of work. We are taking from the Third World. We are buying with our economic might and we want to have wilderness.

All I have ever asked is that let us identify them. Yes, have wilderness, but let us not lock up those resources that we will need.

Even the gentleman from Ohio and the gentleman from Arizona say that when we want it, we will go get it.

I saw what happened to Alaska in 1941. It was not the oil companies, it was not the mining companies, it was this Government and this Congress that went out and dug ditches and used cats and it took over \$500 million from the oil companies when we had Prudhoe Bay to clean up the Government's mess.

That environmental group took that hall and that hall and downtown, sat here and misled this body into the idea that we have all those resources, and we do not.

□ 1130

Now, I can tell my colleagues I may be crying in the darkness but, by God, some day along the line someone will look back in history and say, "Who were those people that misled this Nation, and how weak and spineless were those people who followed them without understanding and making rational decisions?"

No, you will not make a rational decision. It is election year and you respond to that well-organized group. I can tell my colleagues, they are misleading their constituency. Unfortunately, you can have both if you will just listen to reality and recognize that the environment can be protected by man and inclusion of man, not the exclusion of man. But you will not do that. Not today. Not last year. Maybe next year when the gas pumps are lined up again, when the houses are cold, when the people are out of work, when we are asked to pass restrictive legislation so we do not import finished products; if maybe then, but until that time you are going to follow that pied piper out here, that 57 different groups, who tell you you cannot be against the wilderness, you must get close to the soil.

We talk about hearings on this bill. Five hundred people testified. I will challenge the chairman or the staff on that side right now. If you will check each one of those people, they belonged to one of those groups. That is not a cross-section of America. I did not see any sweatshirts. I did not see anybody down there that had been drinking beer on Saturday while they are out of work.

I saw just a group of people who have that special time or money or privilege and are able to enjoy the wilderness.

I will tell my colleagues right now, it may only take a few more years, hopefully longer than that, but a few more years and this body is going to react. This body is going to react and say, "Where are those resources? My God, we do not know. We did not use seismic activity. We did not use the knowledge that we had on hand, but we are out of these minerals such as chrome, magnesium. We are out of oil and coal."

They are going to say, this body is going to say, "Where is it? Let us go get it right now. Let us go get it. Let us rip, rape, and run. Let us do it now, because we need it."

We need it now. No planning. No management. No consideration of mankind. No understanding, complete ignorance. Ignorance is what we are dealing with here today.

I ask my colleagues, and I ask my colleagues again, to consider what is being done here. Fourteen and one-half million acres of land that is in your districts, you have not had one hearing from your constituents on

these issues. Fourteen and one-half millions acres of land.

I urge you to vote for this amendment. If you do not vote for this amendment, go ahead and vote against the bill, but do not do it blindly, as you are doing now.

Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN pro tempore. The time of the gentleman has expired.

The gentleman from Ohio (Mr. SEIBERLING) is recognized for 7½ minutes.

Mr. SEIBERLING. Mr. Chairman, I rise in strong opposition to the amendment.

The amendment would gut the compromise that was reached in this bill. This bill allows seismic testing in wilderness candidate areas; that is, areas that have been recommended for wilderness by the administration, areas that are recommended for further planning by the administration and areas that have been designated by Congress for further study.

What this amendment would do would be to deprive Congress of the option to decide whether or not to put those areas in wilderness and would breach the compromise that allows continued exploration in those areas.

Now, why should this be defeated? Because if we allow roads, as well as drill rigs and seismic dynamiting in wilderness candidate areas, all at the same time, these lands are going to lose their character of wilderness and, therefore, Congress will be deprived of the option to make that decision.

What is more, under the compromise bill which the gentleman from New Mexico and I worked out, the administration, any time it wants to, can withdraw the recommendations for further planning or for wilderness as part of its normal planning process, and all this bill says is that if they do, Congress will have 1 year from that time to decide whether or not to take action.

Mr. LUJAN. Mr. Chairman, will the gentleman yield?

Mr. SEIBERLING. I will be glad to yield to the gentleman from New Mexico.

Mr. LUJAN. I thank the gentleman for yielding.

Mr. Chairman, I would just like to make the comment that the gentleman from Ohio (Mr. SEIBERLING) is correct. All that we are attempting to do here in not allowing drilling and exploration in wilderness candidate areas is to preserve them so that we can make that decision in the future.

If we make the decision that they are not going to be wilderness, then we can go ahead and develop them. But not to do anything within that wilderness candidate area that will destroy the wilderness characteristics until we have an opportunity to see if they are worthy of wilderness designation.

So I would urge the defeat of this amendment.

Mr. SEIBERLING. I thank the gentleman for his help as coauthor of this bill.

Mr. Chairman, before we finish our debate on this important legislation, I also want to pay tribute to our colleague, the gentleman from California (Mr. PHILLIP BURTON) for his leadership on this legislation. Mr. BURTON introduced the original bill to prohibit without qualification, all mineral leasing in wilderness and wilderness candidate areas. He is the spiritual author of this legislation.

Mr. FISH. Mr. Chairman, will the gentleman yield?

Mr. SEIBERLING. I yield to the gentleman from New York.

Mr. FISH. I thank my colleague from Ohio for yielding.

Mr. Chairman, I rise in strong support of this legislation, and in opposition to all amendments to open proposed wilderness areas to mineral development.

Mr. Chairman, the need for H.R. 6542 has been made clear by many of my colleagues. As a result of the Department of the Interior's new interpretation of the Wilderness Act of 1964, we are faced with the potential opening up of pristine wilderness lands to mineral leasing. Congressional intent in passing the Wilderness Act was to continue the policy of denying applications for leases in wilderness areas unless directional drilling or other non-surface methods could be used. This policy was followed by the Forest Service until May of 1981. At that time, the Secretary of the Interior announced his intent to consider applications for mineral leases and seismic prospecting in wilderness areas.

Mr. Chairman, there is unquestionably a need for greater use of the tremendous natural resources of the United States in order to relieve the U.S. economy of the burden of relying on the whims of other nations.

But in achieving this goal, we must not detract from the critical need for maintaining the beauty and sanctity of our wilderness areas. The purpose of H.R. 6542 is to protect areas already in the National Wilderness Preservation System from mineral leases by immediately and permanently withdrawing all land in the Wilderness System from oil, gas, oil shale, and other mineral leasing. These lands would have been withdrawn from potential development under these leases as of December 31, 1983. In order to prevent the unwarranted and unnecessary new policy of the Department of the Interior from taking effect and mineral leases being approved, H.R. 6542 prevents new leasing between now and December 31, 1983. I believe this legislation is critical to preservation of our wilderness lands.

The other important result of the provisions of H.R. 6542 is to permit the President, with the concurrence of the Congress, to open any withdrawn area for potential leasing in case of urgent national need.

Mr. Chairman, we are talking about only 2 percent of the land in the lower 48 States, and less than 5 percent of oil and gas resources. Surely, development of those wilderness areas even on the potential that such resources exist is not worth the environmental cost of losing the beauty and continuity of the wilderness areas.

I urge my colleagues to oppose all amendments that attempt to weaken this vital legislation. H.R. 6542 is the most critical environmental legislation to be considered in this Congress. It is the product of many hearings and much compromise and deserves our full support. Without H.R. 6542 as reported by the Interior Committee, we will not be able to fully preserve our wilderness lands as they have been for hundreds of years.

Mr. WILLIAMS of Montana. Mr. Chairman, will the gentleman yield?

Mr. SEIBERLING. I yield to the gentleman from Montana.

Mr. WILLIAMS of Montana. I thank the gentleman for yielding.

Mr. Chairman, I think that there is a point here that is very important to the Members of the House.

The CHAIRMAN pro tempore. The 3 minutes of the gentleman from Ohio have expired.

Mr. SEIBERLING. Mr. Chairman, I yield 1 minute to the gentleman from Montana (Mr. WILLIAMS).

Mr. WILLIAMS of Montana. I thank the gentleman for yielding this time to me.

Mr. Chairman, there is an important point here to which each of us should pay attention. The sponsor of this amendment has stated that it may affect areas in my colleagues' congressional districts or in their States. His amendment affects 14 million acres of wild land left in this country and, yes, some of it may be in your congressional districts. The areas have either been recommended for wilderness by the administration, not by the Congress—we have not yet agreed—or they are being studied for potential recommendation for wilderness.

If this amendment passes, development may be allowed to go ahead before we have our hearings and decide whether or not we want to preserve these areas. So if my colleagues want to maintain them as good, pure, pristine wild areas until they get a chance to make up their minds, vote "no" on this amendment.

Mr. SEIBERLING. Mr. Chairman, I yield 1 minute to the gentlewoman from Maryland (Mrs. BYRON).

Mrs. BYRON. I thank the gentleman for yielding this time to me.

Mr. Chairman, let me bring up a point that the gentleman from Montana just brought up, and that is, my State is not on the list that the gentleman from Alaska mentioned. Unfortunately, we do not have any wilderness areas in my State to be considered because there were no Members serving before us looking out for the wilderness areas in our State to be maintained and retained.

Mr. SEIBERLING. Mr. Chairman, I yield 1 minute to the gentleman from Oregon (Mr. WEAVER).

Mr. WEAVER. I thank the gentleman for yielding this time to me.

Mr. Chairman, I chaired a hearing in Seattle at which 172 witnesses appeared. As a cross section, there were accountants, loggers, business people. They were from all walks of life. They all testified against such measures as are in this amendment here today.

By the way, hearings were well advertised throughout the State, throughout the region. Everybody knew about them.

Throughout the day I said, "Is there not someone who will stand up for Mr. Watt?" And no one would.

Mr. SEIBERLING. Mr. Chairman, I yield 1 minute to the gentleman from Arizona (Mr. UDALL), the chairman of our committee.

Mr. UDALL. I thank the gentleman for yielding this time to me.

Mr. Chairman, let me review basically why we are here today.

We are in this process of sorting out what ought to be wilderness and what ought not to be. Secretary Watt took the position that he was compelled to lease areas in the wilderness system under the law, and there was a big outrage in Montana because the oldest and best of the wilderness areas, the Bob Marshall, the drilling rigs were poised to go.

We had an emergency meeting of the committee and were able to head that off.

Then down in New Mexico, two areas in the Capitan Wilderness were actually opened and leases were signed for drilling in the State of New Mexico. There was a great deal of concern.

So what we are trying to do in this bill is to clarify the law. Under this bill, the Secretary not only does not have to lease, but does not have discretion; it must come to the Congress for a decision on these matters. That is the purpose of this bill, to clarify the situation.

Secretary Watt says he agrees we ought to go to the wilderness areas last; if the day comes when we are down to our last barrel of oil, we may have to go into the wilderness areas. But we are clarifying his power and authority in the manner he requested.

The CHAIRMAN pro tempore. The Chair reminds the gentleman from

Ohio (Mr. SEIBERLING) that he has 1 minute remaining.

Mr. SEIBERLING. Mr. Chairman, I yield 15 seconds to the gentleman from Washington (Mr. LOWRY).

Mr. LOWRY of Washington. Mr. Chairman, I rise in strong support of H.R. 6542, the Wilderness Protection Act. The 1964 Wilderness Act permitted the mining laws to be in effect in wilderness areas until 1984. I thought of this as a generous safety valve granted to the mining and energy interests in the original act. Now, as a result of threats by the administration to open up wilderness areas, and even to make wilderness the focus of leasing activities, we must reconsider that safety valve.

In Washington, two wilderness areas, the Alpine Lakes Wilderness, and the Wenaha-Tucannon Wilderness, were threatened by lease applications. At Alpine Lakes, the Enchantment Lakes area is the very center of the oil and gas leasing applications. In section 5 of the Alpine Lakes Wilderness Act of 1976, Congress foresaw the importance of the Enchantment Lakes area and asked the Forest Service to conduct a special study, "taking into consideration its especially fragile nature, its ease or accessibility, its unusual attractiveness, and its resultant heavy recreational usage. The study shall explore the feasibility and benefits of establishing special provisions for managing the Enchantment Lakes area to protect its fragile beauty, while still maintaining the entire area for projected recreational demand."

That provision alone should provide plenty of reason to deny any lease application in this area, but we should not expect to find similar provisions in every wilderness bill.

In a Seattle field hearing on April 16 by the House Public Lands Subcommittee, not one witness favored increased drilling. Nearly all asked that the "window of vulnerability" from now until December 1983, be closed. These articulate witnesses included representatives of the cities of Seattle and Tacoma, the leaders of many conservation organizations, the director of the Seattle Zoo, sportsmen, Indian tribal leaders, scientists, and ordinary citizens. I want to thank and commend the gentleman from Oregon (Mr. WEAVER) for his excellent service chairing that 2 hour Seattle hearing.

If Secretary Watt were to plan a strategy to generate opposition in Washington State to leasing even in safe areas, one effective way to do it would be to propose such activities in the Enchantment Lakes. Our former Governor, Republican Dan Evans, has called this area "the border between Heaven and Earth." It makes no sense geologically to propose drilling in these volcanic areas. It makes even less sense from an environmental point of view.

Another effective way to generate opposition would be to propose leasing in the watersheds of major cities. The Bureau of Land Management has done just that by allowing and actually granting leases in the watersheds of Seattle and Tacoma, in spite of existing agreements with the cities; in spite of objections by the Forest Service; and in spite of the fact that Seattle relies on a pure source, gives its water only minimal treatment, and would be required to spend millions of dollars to build a treatment plant if its watershed were to become polluted or full of silt.

It is this type of abuse of delegated authority which brings us to the need for this bill. Ideally, it would seem reasonable to leave open some opportunity for leasing to occur in the event of some national emergency, oil embargo, or the like. But I cannot conceive of the logic of this administration, this Interior Department, this Forest Service, which says that wherever any private company or individual, for whatever reason—speculation or not—has chosen to file an application, that application takes priority over the public's interest in the land. Due to the opposition by this administration to the bipartisan policies of the last 20 years, this delegation of authority must be revoked.

I strongly support that provision of the Lujan-Seiberling bill which prevents mineral leases from being issued for national forest lands under formal consideration for wilderness designation. In my State, we are still debating the issue raised in the RARE II process. The citizens of Washington deserve a chance to have their case on wilderness heard, without pre-emptive damage from drilling and exploration.

In the April field hearings, Mr. David Hancocks, director of the Seattle Zoo, expressed the views of my constituents very eloquently when he said:

I believe the remaining wild lands of America are the soul of this nation. You must not sell them, no matter how tempting a deal you may be offered. . . . Future generations will never forgive us if we allow the best of America's natural treasures to be traded for the 20th Century equivalent of a barrel of beads.

I urge the adoption of H.R. 6542 without weakening amendments.

I want to commend the excellent work by the full committee chairman, Mr. UDALL, the subcommittee chairman, Mr. SEIBERLING, and the ranking minority member from New Mexico for their excellent leadership on this vital legislation.

Mr. SEIBERLING. Mr. Chairman, I yield 15 seconds to the gentleman from Washington (Mr. DICKS).

Mr. DICKS. I thank the gentleman for yielding this time to me.

Mr. Chairman, I rise in support of the bill. I want to say Mr. Watt wanted to allow drilling in the Seattle

and Tacoma watershed in the State of Washington, and we appreciate this committee helping us stop Secretary Watt from doing this despicable act.

Mr. SEIBERLING. Mr. Chairman, I yield 15 seconds to the gentleman from California (Mr. PANETTA).

Mr. PANETTA. Mr. Chairman, I rise in opposition to the amendment.

An amendment has been offered by Representative YOUNG to this balanced legislation which would seriously undermine the purpose of H.R. 6542, would contradict the intent of Congress in instituting a roadless area review (RARE II) process, and would open millions of acres of wilderness planning areas to the permanent consequences of development without permitting requisite assessment of the areas' natural resources. Representative YOUNG's amendment would remove the provisions which grant temporary protection to Forest Service wilderness study areas and further planning areas pending assessment of their wilderness values.

My district's Los Padres National Forest would be severely affected by this amendment. Hydrocarbon leases affecting thousands of acres of study area are pending for the Los Padres National Forest. Enactment of Representative YOUNG's amendment would pass judgement on the suitability for wilderness designation of not only this land, but of over 7 million acres of diverse roadless area all across the Nation. Sensitive alpine areas would be considered with delicate marshland and desert in a single wasteful stroke.

Upon enactment of this amendment, irreparable damage to further planning areas would be permitted. Hydrocarbon exploration and production temporarily prohibited in these areas pending completion of studies to determine their suitability for wilderness designation would cause irreparable damage to these study areas before study has been completed and waste the considerable time and energy already devoted to study of these areas.

That time and energy is considerable. Assessment of wilderness study areas and further planning areas has been underway since 1979. Review of further planning areas in the Los Padres National Forest has been underway since October 1979. The review is proceeding on schedule and a draft assessment for the area is scheduled for completion June 1983. Actually, the draft forest plan for the Los Padres Forest has been delayed considerably, more than many other forest plans in the region. Several other further planning areas in the region are scheduled to publish their draft environmental assessments in November of this year, several months prior to the scheduled completion of the Los Padres assessment.

Congress in enacting the Wilderness Act, recognized a wilderness area as "an area where the Earth and its community of life are untrammeled by man, where man himself is a visitor who does not remain." These are strict guidelines, to be sure. In all likelihood, many further study areas do now possess the unique qualities by which wilderness areas are distinguished. It is probable that some of these further study areas will not be considered suitable for designation as wilderness areas, and will be opened for hydrocarbon development in order to provide for our Nation's energy needs. However, if Representative Young's amendment to exclude these lands from the Wilderness Protection Act is included with the bill, a reasonable decision based upon assessment of an area's wilderness character will not occur. Instead, millions of acres of study area will be opened for leasing before completion of the review.

The subcommittee of the Congress have heard convincing testimony regarding the destructive force of explosive seismic testing conducted as a part of hydrocarbon exploration. Testimony has been heard from exploration crews describing the practice of blasting and reblasting identical or similar shot lines in exploration areas as a result of industry interest in protecting proprietary resource information. The danger of forest fires resulting from exploratory blasting, as well as the necessity of numerous roads and structures for test-hole drilling has been well documented.

The result of these exploratory steps, far from having the minimal impact some would have us believe, is significant, long-lasting damage to areas sensitive by their very nature as study areas for possible designation as wilderness. The result is permanent degradation of those exact qualities by which further planning areas were initially designated for study. The result is antithetical to the definition of "wilderness."

To permit hydrocarbon exploration and development in wilderness study areas with the knowledge that such exploration will probably result in long-lasting destruction of those same qualities which could qualify the area for wilderness status is to decide that studies conducted across the Nation to determine qualifications of candidate areas do not deserve completion. To permit the destruction of wilderness study areas by opening those areas to hydrocarbon development is to impose a self-fulfilling prophecy upon them. In the Wilderness Act, Congress was explicit in describing those attributes of a wilderness area. Testimony before our committees has confirmed the truth implicit in that act: Wilderness designation and hydrocarbon development are simply incompatible.

Heated conflict has been generated over the matter of leasing in wilderness areas. At times, the issue has appeared to be beyond resolution. However, divisive the issue has been at times, some middle ground—a point of agreement common to all interests—has been maintained. Throughout the consideration of this issue, at least one focus of agreement has been preserved: the temporary protection of wilderness study areas until studies to determine the suitability of wilderness designation are completed. It has been preserved in H.R. 5603, which was supported by Secretary Watt and cosponsored by Representative Young. It is an essential provision of H.R. 6542 as well.

There is considerable disagreement in the Congress regarding the necessity of hydrocarbon development on public lands. Compelling arguments have been presented for all aspects of the debate. But the issue at hand here is not one of whether or not hydrocarbon drilling should occur on public lands, nor is it even one of whether or not hydrocarbon development in wilderness areas is justified. The issue presented by the Young amendment is of whether or not this Congress will respect the Wilderness Act and the will of the administration, the Secretary of the Interior, previous Congresses, and the American people in allowing study of wilderness candidate areas to reach conclusion.

This proposal to exempt wilderness study areas from provisions of H.R. 6542 was not offered in committee, nor was a similar provision to the administration's H.R. 5603 included in that bill. Exemption of wilderness study areas was not considered necessary then, nor should it be considered necessary now. I urge my colleagues on both sides of the aisle to oppose passage of this amendment.

PARLIAMENTARY INQUIRY

Mr. YOUNG of Alaska. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN pro tempore. The gentleman will state it.

Mr. YOUNG of Alaska. Mr. Chairman, do I have any time, or did I yield back the balance of my time?

The CHAIRMAN pro tempore. The Chair believes the gentleman used his time and yielded back what he did not use.

Mr. SEIBERLING. Mr. Chairman, I yield the balance of my time to the gentleman from Alaska (Mr. YOUNG).

Mr. YOUNG of Alaska. Mr. Chairman, I yield to the gentleman from Oregon (Mr. SMITH).

Mr. SMITH of Oregon. I thank the gentleman for yielding to me.

Mr. Chairman, I rise in support of the amendment. Short of the passage of the amendment, I think the bill should be defeated.

I welcome this opportunity to convey to the House of Representa-

tives my view on H.R. 6542, the Wilderness Protection Act of 1982. I am opposed to H.R. 6542 because it fails to incorporate language addressing balanced land management policies which take into consideration environmental protection, conservation, and mineral development.

H.R. 6542 withdraws permanently designated wilderness areas, withdraws RARE II recommended wilderness areas, congressionally designated wilderness study areas and Forest Service further planning areas from the mineral leasing laws. These lands are obviously being withdrawn from mineral entry in order to protect their wilderness values. Industry has proven many times that its changing technology enables it to operate safely in environmentally sensitive areas without causing long-term adverse impacts. Proper evaluation of the subsurface resources consequently requires leasing and drilling and, as just stated, can be accomplished in an environmentally sound manner through new technology. If mineral exploration is prohibited, Congress will be limiting its knowledge in determining the best use of our lands * * * whether it is suited for wilderness or multiple-use management. The type of withdrawal addressed in H.R. 6245 is also breaking a commitment Congress made during its deliberations on the Wilderness Act of 1964, when, through a series of debates, a compromise was reached which gave the Department of the Interior discretionary authority to grant leases in wilderness areas through 1984. Denying the Department this discretion appears to reverse congressional intent of the 1964 act.

H.R. 6542 also fails to recognize this country's dependence on foreign sources for energy. The 1973-74 Arab oil embargo was only a 6-percent loss of our oil requirements, and yet, I need not remind my colleagues of the disruption which occurred. Estimates are that the 5-month Arab oil embargo cost this Nation 500,000 jobs and from \$10 to \$20 billion in lost production. With the two armed conflicts we are reading and hearing about daily in the news—the Israel raids into Lebanon and the Iran-Iraq war—we are continuing to see an escalation from a serious situation in the Mideast to one with the possibility for critical global implications. Certainly, not a time to be withdrawing lands from oil and gas exploration.

Some of my colleagues will argue that should an urgent national need exist, H.R. 6542 provides a mechanism for wilderness areas to be opened to mineral activity. However, this type of exploration, development, and production required in these areas of rough terrain, as well as transportation facilities if a resource is found, could easily require a timeframe of 3 to 8

years. With this in mind, it is unrealistic to think that a wilderness area could be opened up should an emergency situation occur, we simply would be unable to respond to the crisis. To believe that we could rectify the closure of these areas in an emergency situation is a misconception and is being shortsighted on the part of this body which was elected to protect the best interests of our citizens. Locking up areas with no knowledge of existing resources is not, in my estimation, looking out for our best interests.

I was happy to see that the language in the legislation does exclude mining from the withdrawal provisions, but I think it is important to note that oil and gas are strategically just as crucial to national security.

My last point of contention is that H.R. 6542 does not provide for statutory release language for Forest Service lands which are determined unsuitable for wilderness designation. Strong release language is essential to achieving balanced wilderness legislation. Any lands which are deemed unsuitable for wilderness should be returned to multiple-use management and not subjected any further to study programs. I think it is in the best interests of this Nation to settle once and for all the uncertainty and delay in the long-term planning and management of our national forest lands.

The United States has 229 million acres in designated wilderness and wilderness study categories which is close to one-third of the total Federal land base of 760 million acres. I believe this clarifies the point I have made many times. The balance is tipping heavily in favor of wilderness and wilderness study areas leaving us vulnerable to critical mineral shortages.

I commend the U.S. Congress in conjunction with the appropriate Federal agencies and various private organizations who have contributed to the development of a wilderness preservation system in which we can all be proud. I, too, want to see our present system protected now and in future generations; however, because of possible ramifications presented by H.R. 6542, I will oppose passage of the legislation.

Mr. PORTER. Mr. Chairman, unlike most of what Government does—addressing the crises of the moment, attempting to put out the most recent fires—the legislation we are considering today addresses a vital concern for the future of our country, for generation after generation to come. It also puts out a fire that may not be the nearest at hand, but nevertheless is most terrifying: the prospect that pristine wilderness areas, largely protected from development for that past two decades, will at a time in the not too distant future, be covered by the evidences of civilization.

Clearly, we need to be concerned with the energy independence of our

country and I have been as strong a supporter as any of increased domestic energy production. But anyone looking at our recent experience can well conclude that the combination of conservation, represented by, for example, the purchase by Americans all up and down the economic scale of increasingly fuel efficient automobiles, and of production, unleashed by the President's ending of oil price controls—a wise step indeed—has moved us substantially away from the great dependence on OPEC that we found ourselves locked under in the mid-1970's. Barring a national emergency, surely we need not despoil what can never be replaced: the natural wilderness areas that remain today in the same state as when our forefathers first laid eyes on them, indeed, in the same basic state as when our Creator gave them to us.

I could go on at length, perhaps, about the importance of what we do here today. But recently I read an article by George Will in Newsweek that expresses perhaps better than any why wilderness protection is so high a priority. In the article, he indicates that applications for oil, gas, and mineral claims are pending for 3 million acres in 200 wilderness areas, including 30,000 acres of the Maroon Bells not far from Aspen, Colo. If ever a more poignant example was offered, at least to me, I cannot imagine it. I have stood at the base of the Bells, climbed the hills nearby, skied the mountains that provide its backdrop, and 15 years ago, fell in love with the beauty and purity of this area, so much so that my wife, Kathryn, and I were married at the Prince of Peace Chapel in Aspen on the road leading to the Bells. I could never find within myself the intention to allow development of this area. I harbor, too, the suspicion that if the Maroon Bells is an area that developers have their eyes on, then perhaps there is another wilderness area that one or the other of us feel the same way about, that would also fall to development if this legislation is not adopted.

But, George Will says it so much better than I, and in urging the Members to support H.R. 6542 unamended, I commend his words from the August 16 issue of Newsweek to their minds and hearts and insert them in the RECORD at this point:

[From Newsweek, Aug. 16, 1982]

A WORD FOR THE WILDERNESS

(By George F. Will)

It is said that any stigma will do to beat a dogma with, and environmentalism is often stigmatized as an "elitist" cause. It is odd to say that removing lead from gasoline or from paint in tenements concerns Palm Beach more than Baltimore, or that regulating chemical wastes benefits only one class. It is less obviously wrong, but still wrong, to say that preservation of wilderness is elitist in any awful way.

Colorado's Maroon Bells wilderness area is one of the brightest jewels in the nation's

diadem. More than 50,000 persons visit it annually, more than visit most wilderness areas but fewer than half the number that watch the average Michigan Wolverine home football game. And no wilderness area is as heavily used as most national parks are. (Yosemite has an indispensable institution of civilization: a jail.)

An Irreplaceable Asset: In 1964 Congress created the wilderness system, "where man is a visitor but does not remain." A 20-year "window" was left open for leases for oil, gas and mineral claims. As the Dec. 31, 1983, deadline approaches, there is developing a dash for applications. More than 1,000 are pending against 3 million acres in 200 wilderness areas, including 30,000 acres of the Bells. Previous administrations routinely rejected virtually all applications, but the current Interior secretary, James Watt, wants to open up wilderness areas. This week Congress considers a bill that would close the window, imposing an immediate ban on leases except in cases of urgent need affirmed by Congress.

There are 80 million acres of designated wilderness, 56 million of them in Alaska. Only 1.2 percent of the "lower 48" states is wilderness; only 4 percent could ever be so designated. Surely the nation's vitality and security are not so marginal as to depend on that 4 percent. According to one study, wilderness contains just 1 percent of the nation's onshore oil and gas. It would be a pity to damage an irreplaceable asset for a few weeks' worth of oil. Particular wilderness designations may have to be reconsidered, eventually. For example, one area (the Sawtooth Range in Idaho) contains perhaps \$1 billion worth of minerals, including cobalt. The United States imports 97 percent of the cobalt it uses.

Opposition to wilderness designations comes not only from industry. It also comes from individuals whose recreation preferences are at stake. This conflict may have a class dimension, pitting plain folks in their station wagons and motorboats against backpackers who are suspected of packing Brie rather than Blue Ribbon and of going to earth in winter at Radcliffe or Grosse point. Pristine wilderness is an acquired taste and is incompatible with the enjoyment of some popular tastes such as dirt bikes, snowmobiles and other off-road vehicles. But surely there is no shortage of space in America for persons whose play must involve internal-combustion engines.

All gains involve pains. Environmental protection has an economic price. Wilderness designation can raise the cost of many things, from minerals to lumber, affecting many things, from job creation to the cost of housing. Environmentalism that is careless about cost will be regressive in effect and will discredit itself by seeming to be a luxury of persons affluent and callous. But the current danger is that Watt will discredit economic analysis by seeming sympathetic only to economic considerations.

Part of the Watt problem is the Watt manner: he acts like a machine in the garden. When he testifies beneath bright television lights, h/p high, glistening forehead, his electric smile and his eyes flashing behind metal-rimmed glasses call to mind a 1955 Buick, a convention of chrome. When he speaks, you half expect to hear gears grind, and you sort of do. He has no patience for the toing-and-froing practiced by persons who understand that in politics the straightest line between two points is rarely the easiest route. He speaks almost too clearly, indifferent to the bureaucratic art

of constructing whole paragraphs perfectly devoid of substance.

His cocksureness, his thirst of conflict, his tone-deafness regarding his own shrillness in the nuances of the subtle city—have invigorated environmental groups and have caused Congress to say (as a Michigan state legislator once said), "From now on, I'm watching everything you do with a fine-tooth comb." He has made it easy to caricature conservatism as philistine, as hostile to all but commercial values. He sometimes seems unreconciled to government's stewardship concerning community assets. Some assets, such as wilderness areas, cannot survive if unprotected from the morals of the marketplace.

It is a law of politics: extreme political intensity begets equal and opposite intensity. Watt is partly a cause and partly an effect of persons for whom environmentalism is political romanticism masquerading as science, a doctrine of putting sand in the gears of industrialism and for expressing root and branch rejection of America's commercial civilization. Their liking of chipmunks expresses primarily a dislike of human beings, creatures of nasty despoiling rationality. Such environmentalists value wilderness areas primarily as refuges from all reminders that they share the planet with other human beings.

"The Challenge": This nation began as an "errand into the wilderness." The first task was to tame that wilderness, but as Wallace Stegner says, we need to preserve some of it "because it was the challenge against which our character as a people was formed."

Most Americans will never care a fig about wilderness. Perhaps that means it is an elitist concern. But so what? Edith Hamilton, the classicist, once said to Ezra Pound: "I have heard of a great Confucian who wrote a letter so difficult there was only one other man in all China who could understand it. That is not very democratic, I'm afraid. That is aristocratic, like you, Mr. Pound." Pound replied: "It is democratic insofar as it provides that anyone may have the opportunity to learn enough to read that letter." Enjoyment of wilderness may not be spontaneous and "natural." It may be a learned process, inviting and even requiring reflection. But it is nonetheless valuable for being an aristocratic pleasure, democratically open to all.

Mrs. SCHNEIDER. Mr. Chairman, I rise in strong support of H.R. 6542. As legislation that insures the preservation of wilderness areas for future generations, it deserves our unqualified support. This bill would protect roughly 33 million acres of designated or potential wilderness threatened by oil and gas development once the leasing moratorium expires in November. The strength of the bill lies in the fact that it is a true compromise. It does not withdraw any lands in Alaska or any BLM wilderness study areas. It does not prohibit hardrock leasing. It prevents seismic testing only in the 18 million acres of designated wilderness. It contains a Presidential "unlock" provision that is not a component of the 1964 Wilderness Act.

And yet, Mr. Chairman, this bill is the subject of intense and vehement criticism from the oil and gas industries. We are told that H.R. 6542 represents a massive lockup of Federal

lands. Yet these 33 million acres represent only 2 percent of the land in the lower 48 States. Furthermore, some 460 million acres of Federal land are available for oil and gas development; 26 percent of this land is currently under lease; most of these leases, however, will expire without any exploration according to GAO. There seems, then, to be no shortage of Federal land to lease and explore.

We are then told, however, that it is unwise to lock up any land without knowing exactly what is underneath it. The American people have a right to an accurate inventory of all of our natural resources. True enough, and according to studies conducted by the Department of Energy at the Oak Ridge National Laboratory, all wilderness areas together, designated and potential, contain only 3 percent of the Nation's undiscovered oil and 2 percent of the undiscovered gas resources. These statistics were almost exactly confirmed by an independent resource economist's study. Both of these reports were based on data from the U.S. Geological Survey.

These numbers, though, are dismissed as "nondefinitive reconnaissance" results by opponents of this bill. The only meaningful inventory, it seems, calls for exploration. The concept of inventory, in my view however, bears little relationship to the realities of oil and gas exploration which involves extensive use of explosives in seismic testing and considerable drilling. None of which is without cost, and oil companies have made it clear that they are not interested in merely performing a public service by inventorying all of our oil and gas reserves in the wilderness areas; their investment, reasonably enough, is contingent upon the option to work their lease as they see fit. Inventory, in other words, is a transparent code for development.

We are told not to fear, however. Oil and gas exploration activities are fully compatible with the wilderness environment. This simply is not so. My colleagues have already documented in detail the negative impact of exploration including disturbance of wildlife and habitats, road construction, and the introduction of toxic wastes. The Department of Interior has testified on this point as well. There can be no question that once thus invaded, an area is no longer wilderness.

Nevertheless, it is pointed out, the economy is in a slump, dependence on foreign oil is still high and unemployment is on the rise. Mr. Chairman, if leasing 33 million acres of wilderness would solve any of these problems, I certainly would not stand in the way. Again the simple fact is that it will not. Opponents of the bill call for a rational management policy devoid of "emotional claptrap," and I fully agree with them. Development for the sake of development is the worst kind of

planning, certainly the worst kind of energy policy. It should be abundantly clear by now that the security of our energy future depends on planning how we use our resources, not continuing a discredited policy of blindly extracting nonrenewable resources at any cost. Whatever is under those 33 million acres is finite. If 98 percent of the lower 48 States is insufficient as an energy source, how does it seem reasonable to find salvation in the remaining 2 percent?

There are essentially no valid arguments to be made against this.

Basically, there is no valid case against this bill. The wilderness preservation system was established to secure the "benefits of an enduring resource of wilderness." We have not reached the point at which we must invade the most spectacular and remote of landscapes. I urge my colleagues to support H.R. 6542 and oppose all weakening amendments.

Mr. WIRTH. Mr. Chairman, in recent months the issue of whether to allow oil and gas leasing in wilderness areas has aroused understandable controversy.

On the one hand, some paint the image of our Nation's most pristine lands, our heritage to future generations and quiet places for all of us to reflect and regenerate. I believe none of us would prefer the image of dirt roads and drill pads, gaping holes in the sides of mountains, eroding lands, and fleeing wildlife.

On the other hand, others paint the image of gaslines, brownouts, and elderly people freezing because they cannot afford to pay their heating bills. None of us would choose this future for our Nation.

The debate over whether to allow oil and gas leases in wilderness areas has been couched in these emotional terms, and indeed both underlying issues—securing greater domestic energy supplies and protecting our environment—are major ones facing our Nation, and issues I have devoted much of my time to since I came to Congress.

But I am pleased that the bill before us today, of which I am a cosponsor, strikes a careful bipartisan balance among competing claims over what image to create for our Nation's future. It is our best hope for solving this controversy in a sensible and swift way.

It permanently withdraws wilderness areas designated by Congress from oil, gas, mineral, and geothermal leasing, thus recognizing that these lands are special, and must remain as places where people are temporary visitors and not permanent invaders. These lands, which represent only 4 percent of my State's area, deserve the permanent protection this bill provides for the sake of all who follow us.

The effect of withdrawal of these lands on our ability to develop independence from imported oil will be very small. Studies have indicated that only 1.1 percent of the potentially producible oil, and 1.2 percent of the potentially producible natural gas in the United States lie under lands designated as wilderness areas. Additionally, when we consider that 80 percent of leases which have routinely been issued on 118 million acres of nonwilderness Federal lands expire without being explored, there is no reason not to give permanent protection to wilderness areas.

At the same time, the bill allows flexibility, and allows both Congress and the President to make decisions in the future in case of circumstances we cannot foresee. For example, it would exempt wilderness lands from this ban which are released by an act of Congress, or authorize the President to recommend to Congress opening a withdrawn area under certain conditions. Certainly, the fact that this bill would not ban mineral leasing in certain wilderness study areas—including some in my own State of Colorado—proves that it is not an effort to reduce efforts toward energy independence, or to shackle our domestic energy industry.

Mr. Chairman, it is important to remember where this careful compromise bill came from. It resulted in large part from Interior Secretary James Watt's sudden reversal of past policy in declaring an official administration policy that leases would be granted for energy exploration in wilderness areas.

In my opinion that action was a deliberate attempt by the administration to divert attention from the real issue, which is the total dismantling of a national energy program many of us here worked for years to create. Through drastic cutbacks in new oil and gas technology research, coal research, and research to accelerate development of alternative resources like solar, the administration declared that it has no energy policy. Suddenly, drilling for oil in wilderness has been painted as the only way to save our Nation from more gaslines.

Secretary Watt, following public outcry, reversed himself and offered what was termed a wilderness protection bill which was laden with loopholes. It would have protected wilderness from energy exploration for only 17 years, and granted immediate exceptions to wilderness protection.

All this marked a dramatic reversal of past efforts to build a carefully balanced energy program which also protected the environment. For Western States, where such vast reserves of energy resources are located, this has had particularly damaging effects. Rather than balancing energy development with protecting the quality of

life in the West, the administration proposed energy development in wilderness. Rather than proposing synthetic fuels development with adequate environmental regulations and research into health effects, it proposed to scrap any research into the effects of synfuels on workers, surrounding communities, and the environment. The list goes on.

These extreme actions make the balance in the bill before us today all the more impressive. It is not a perfect bill, but it is a good compromise, one which I hope my colleagues will join me in supporting.

● Mr. CONTE. Mr. Chairman, I rise in support of H.R. 6542 as I think it represents a compromise attempt to resolve an ongoing controversy over how best to balance the need for oil, gas, and minerals with the need to preserve the recreation, scenic, and wildlife wilderness areas. Time and again we go over this subject, and time and again we fail to resolve the controversy.

The Wilderness Act of 1964 empowered the Secretary of the Interior to issue oil and gas exploration leases on a discretionary basis. This law does not preclude the Secretary from withholding leasing authority if wilderness value, for example, is seen as an overriding value of importance. Thus, the Secretary of the Interior is not compelled to issue a maximum number of leases before the December 1983 expiration date of his authority.

This bill was put together to answer the uncertainty of how to respond to the hundreds of oil, gas, and other mineral lease applications which are expected at the end of the present moratorium on leasing in wilderness areas.

Earlier this year, Congressman Mo Udall and I cosponsored a resolution to go on record with our belief that wilderness areas should be the last areas of our land where mineral leasing should occur. We went on record because we felt a need to get a better hold on our criteria for issuing exploration and development leases, most particularly because of our Nation's appetite for oil, gas, and minerals. As I said in my remarks at the time of the introduction of that resolution, getting a better hold on criteria for issuing leases is nothing more than sound land management policy, not for any one group, but for all citizens.

One of the intents of H.R. 6542 is to insure that lands being considered for wilderness designation will not be leased until a final decision has been made as to wilderness or nonwilderness status. Such a policy is based on the theory that it would not be prudent to grant leases for any purpose before a study is completed or a decision made on designating a wilderness area.

Mr. Chairman, as our lands continue to be explored and developed and we try to set policies to govern that exploration and development, let us try to hold on to some principles and balanced reasoning in the debate over what constitutes the most pressing need.

Not long ago, I read a phrase which I think is appropriate as we think about setting leasing policies; it says:

We didn't inherit our land from our ancestors—we're only borrowing it from our children."

I think the Members ought to keep that phrase in mind, and vote for H.R. 6542. ●

● Mr. STARK. Mr. Chairman, today the Congress has the opportunity to show to this administration and to the American people our renewed commitment to the maintenance and preservation of pristine wilderness areas. Despite the fact that wilderness policy was developed and adhered to by Democratic and Republican administrations alike, we are now informed by the Reagan administration and Interior Secretary James Watt that the Wilderness Act of 1964 has actually been misread all of these years and that indeed, it is the obligation of the Federal Government to consider land lease applications for mineral exploration in these wilderness areas.

This is especially ironic when one considers what the original purpose of these wilderness areas was—to preserve and protect in their original, God-given form, a few areas of great natural beauty. For the administration to turn around and say that the Government is dutybound to examine development opportunities in these areas goes outside the realm of sensibility—and could only come from the mind of someone who could hold a private, illegal cocktail party on the graves of our Nation's war dead.

The Wilderness Protection Act of 1982 offers us a chance to interrupt this line of thinking, however, by placing into law a prohibition of leasing for exploration on those lands designated wilderness by the Congress. The proposal also includes exempting from leasing those lands now under consideration for wilderness classification, and bans for the time being any seismic testing in these areas, as this testing is obviously disruptive to the natural state.

If in the future an urgent national need calls for exploring an area, this measure does not preclude it. This is in keeping with the entire wilderness concept—that we preserve lands which are precious to us now in order that we may retain some few, rare spots to enjoy peace and tranquillity. The whole idea is to preserve now, so we have an option to develop later if we need to.

In 1934, the American writer Stuart Chase said:

Natural resources and inanimate energy are . . . increasingly regarded as affected with a public interest . . . Certainly they were left by God or geology to mankind and not the Standard Oil Company of California.

This measure emphasizes this point, stating that the American people will no longer tolerate environmental policies that raze the land in an irrevocable manner so some company can turn a profit. That is voodoo environmental policy, and as with any voodoo policy, it holds no water because it has been stuck full of holes.

It is not up to this Congress to make every decision regarding our children's future, but we do have certain obligations we must fulfill. If we fail to provide for wilderness areas we will have made a decision that closes a door to them for all time—we will have destroyed their chance to know and sense the awesome beauty of this land, its magnificence, its grandeur.●

● Mr. HOLLENBECK. Mr. Chairman, I rise to express my strong support of H.R. 6542, the Wilderness Protection Act, without weakening amendments. I do so because of my firm belief that this legislation represents an effective vehicle through which we can insure the future preservation of America's beautiful wilderness areas.

In 1964, Congress established the National Wilderness Preservation System in order to protect those areas "where the Earth and its community of life are untrammeled by man, where man is a visitor who does not remain." Since 1964 I am pleased to note that the Wilderness System has grown to more than 86 million acres. To turn our backs on our commitment to preserving wilderness areas by opening them to development and supporting weakening amendments to today's legislation would represent a disservice to our people and all future generations of Americans.

Over 3 million acres are presently under mineral lease application—mostly for oil and gas. While past administrations have issued only a handful of leases virtually excluding wilderness areas, the Reagan administration led by Interior Secretary James Watt has promised to end this pattern by opening wilderness lands to energy exploration. With the current moratorium on wilderness exploration in effect only until the end of this Congress, I believe it is essential that we close these environmentally sensitive areas to incompatible development right now. If we do not act today and approve this legislation we would be providing Secretary Watt with a full year to issue leases before the Wilderness Act's statutory deadline on leasing expires on December 31, 1983. To me this is completely unacceptable.

I urge my colleagues to join me and vote in favor of H.R. 6542 and oppose all weakening amendments. Now is the time to immediately and permanently withdraw existing wilderness areas from oil, gas, oil shale, coal, phosphate, potassium, sulfur, and geothermal leasing. Now is the time to prohibit leasing on lands under consideration for possible wilderness designation until either Congress or the Forest Service determines their status. To do otherwise would be a disservice to future generations and a vote against the beauty which our natural environment has to offer.●

● Mr. GEJDENSON. Mr. Chairman, I want to express the support of my constituents for the Wilderness Protection Act (H.R. 6542) that we are voting on today. This bill provides a reasoned and needed approach in providing, and I quote from the 1964 Wilderness Act, "present and future generations with an enduring resource of wilderness."

Today, the wilderness system in the lower 48 States stands at some 23 million acres, or 5.7 percent of the Federal lands, or 1.2 percent of the total conterminous United States; only 4 percent could ever be so designated. In short, this legislation permanently protects existing wilderness from the adverse impacts of mineral leasing and development and insures that the wilderness character of areas under consideration for addition to the national wilderness preservation system will not be impaired until either the Forest Service or congressional wilderness evaluations are completed.

The citizens of the Second Congressional District of Connecticut strongly oppose opening the Nation's few remaining wilderness areas to mineral development. I have received 663 letters expressing their concern and dismay at the Secretary of Interior's egregious proposal entitled the Wilderness Protection Act of 1982. When one measures Watt's proposal against what he says, one must conclude that there is no limit to the extent of the Secretary of Interior's cynicism and contempt for the American people. My constituents realize this.

Mr. Chairman, there are no wilderness areas in the State of Connecticut, but my constituents believe that the existing National Wilderness Preservation System should be the last place where oil and gas development is allowed to occur. I believe this bill is imperative for the immediate preservation of the integrity of our wilderness areas. I am pleased to offer the support of my constituents to this important, and long overdue, legislation.●

● Mr. MATSUI. Mr. Chairman, I rise today to urge that my colleagues approve H.R. 6542, the Wilderness Protection Act of 1982 with no amendments. It is a measure that will preserve the pristine quality of America's

dwindling wilderness areas. H.R. 6542 responds to the ongoing debate regarding the need to balance the preservation of the Nation's wild lands with oil, gas, and mineral drilling in such wilderness. I want to commend the House Interior Committee, under the guidance of Congressmen UDALL and LUJAN, for crafting this measure after 9 months of extensive consideration of public comments.

In 1964, Congress passed legislation which created the National Wilderness Preservation System for the purpose of protecting areas "where the Earth and its community of life are untrammeled by man, where man is a visitor who does not remain." The Wilderness Act of 1964 expressed our Nation's desire to maintain wild lands as part of our heritage and as a legacy that we shall confer upon our children. The act allowed mining exploration in wilderness areas only so long as those activities were compatible with the maintenance of the wilderness environment. It permitted the issuance of new oil and gas leases and hardrock mineral claims until the end of 1983.

Previous administrations have used the authority granted by the 1964 law sparingly and approved few leases in these environmentally sensitive areas. With the advent of the Reagan administration, however, a new view of natural resource management has prevailed and this environmentally sound policy has been abandoned. President Reagan appears to remain dedicated to his promise to unlock the wilderness and encourage unprecedented development in these protected areas notwithstanding that they contain only 3 percent of the undiscovered oil resources and 2 percent of our undiscovered gas resources. He has pursued this policy even as a majority of Americans have articulated the view that such a small return does not justify the denigration of these irreplaceable lands.

H.R. 6542 seeks to prevent this wholesale destruction of our wild lands by immediately withdrawing existing wilderness areas from oil, gas, oil shale, coal, phosphate, potassium, sulfur, and geothermal leasing. In addition, lands under consideration for possible wilderness designation will be withdrawn from leasing until either the Congress or the Forest Service determines their final status. H.R. 6542 represents a reasonable approach to wilderness preservation as it provides for the excavation and development of certain designated strategic minerals in withdrawn areas and second it empowers the President, with the approval of the Congress, to open wilderness areas upon a finding of the existence of an urgent national need.

While I appreciate the necessity of increasing our domestic energy and mineral development, I believe that by

pursuing aggressive and often premature development in our wilderness areas we inflict permanent and unnecessary damage to these lands. Our wilderness should be the last frontier for oil and gas exploration. It must be noted that H.R. 6542 only withdraws from lease sales wilderness and wilderness candidate areas that equal less than 2 percent of the lower 48 States' land mass. Over 137 million acres of Federal lands, or four times the amount of land to be withdrawn, will still be available for active mineral development.

With the enactment of H.R. 6542, we shall insure that future generations can enjoy these unique preserves and gain an insight into an earlier America. In view of this responsibility to our children and grandchildren, it is incumbent upon this body to adopt H.R. 6542.●

● Mr. FOGLIETTA. Mr. Chairman, I am very pleased that H.R. 6542, the Wilderness Protection Act of 1982, has come before the House for consideration. This legislation will provide important and much needed protection for our Nation's wilderness resources and addresses an issue which this Congress must not ignore.

Since taking office, Secretary of the Interior James Watt has undertaken numerous programs geared to the wholesale disposal of public resources. Department of the Interior and Forest Service actions in this administration have reflected a commitment to this goal of resource exploitation over and over again. Whether it is massive and economically shortsighted leasing of offshore areas for oil and gas or a program for accelerated leasing of wilderness areas for energy development, the thrust of these agency initiatives is the same.

Fortunately the American public has become immensely concerned about the recent threats to our wilderness areas and other public lands. H.R. 6542 is clearly both a reflection and a product of that concern. The intent of Congress in designating units of the National Wilderness Preservation System in the first place has been to protect the unique values of those areas from development. The approximately 7 million acres of national forest land which has been recommended to Congress for wilderness designation, along with the lands which the Congress has specifically designated for wilderness study and those which the Forest Service has categorized for further planning need at least temporary protection pending final congressional action to assure that wilderness designation is not precluded.

There are several areas within the Allegheny National Forest in my home State of Pennsylvania deserving of and under consideration for wilderness designation. It would be an abrogation

of responsibility to the citizens of Pennsylvania if we were to permit oil and gas leasing and development in these potential wilderness areas before Congress has the opportunity to give them permanent protection.

Some argue that oil and gas activity is not detrimental to other uses of an area. It has been suggested during the debate on this bill that seismic exploration, for instance, is not destructive of wilderness values. One only need be presented with the broad outlines of the effects of seismic activity to realize that it is totally incompatible with such important wilderness purposes as wildlife protection. Dynamite explosions at 50 pounds a shot and a rate of 50 to 100 times a day over the course of 3 months, work crews numbering 30 people, road construction and persistent helicopter activity accompany a typical seismic exploration project such as the one which has been proposed for the Bob Marshall Wilderness in Montana. This was the case which focused congressional attention on this issue last year. The grizzly bear and the California condor stand out as examples of sensitive and threatened wildlife, dependent on wilderness habitat for survival, which would be seriously endangered by seismic activity. The Forest Service has given recent consideration to issuance of oil and gas leases in wilderness and proposed wilderness areas which provide homes for these dwindling species.

There is a real need for legislation to protect our Nation's wilderness values from the threats of oil and gas leasing; the clear intent of this administration is to press ahead with such leasing if permitted. H.R. 6542 is a modest and reasonable response to this threat. The Interior Committee is to be commended for having developed so well balanced a compromise out of the numerous hearings which it has held on this issue over the course of the past year. I urge my colleagues to join me in supporting this wilderness protection bill without amendment as a necessary step in protecting the small remaining portion of our Nation's land base which sustains wilderness values—a resource of incalculable importance to our society.●

● Mr. BEDELL. Mr. Chairman, I wish to express support for H.R. 6542, the Wilderness Protection Act of 1982, a bipartisan compromise recently reported by the Interior and Insular Affairs Subcommittee on Public Lands and National Parks. I commend my colleague, Mr. SEIBERLING, chairman of the subcommittee, for his expertise in ably accommodating in this bill the diverse interests whose views have fueled this highly contentious debate.

Today we are voting to extend our commitment to a strong National Wilderness Preservation System, a commitment that began almost 20 years

ago with the passage of the National Wilderness Protection Act of 1964. This act mandated the creation of a wilderness system, "where the Earth and its community of life are untrammelled by man, where man is a visitor who does not remain." The enactment of today's measure will insure the continued protection of the 18 million acres not presently withdrawn from mineral leasing through previous legislation.

The American wilderness played a pivotal role in the formation of that spirit which has propelled our Nation to the forefront of world affairs. Our love of individual freedoms was nurtured by the lure of the frontier, whose call our ancestors heeded despite the ever-present dangers and loneliness. Indeed, our country's literature is suffused with references to the wilderness—its explorers, its beauty, and its values.

None of us alive today had the fortune to look upon our land as it was when the first colonists ventured forth from the old world. We have dramatically changed the landscape of the United States, building it into the most productive nation on the face of the Earth. We have tapped the great cache of resources beneath our soils; we have irrigated vast deserts and built farms on millions of acres of land; our cities have sprung up into centers of modern culture unparalleled throughout the globe.

But we have also increased our appetite for the minerals and energy resources whose presence in the United States facilitated this phenomenal growth. Our needs will continue to grow into the future, as we find increased demands for oil, natural gas, coal, and strategic minerals. Certainly this bill's provisions for emergency leasing and exploration at the recommendation of the President will insure our national security in a time of threat. In addition, these wildernesses have not been closed to exploration for the strategic minerals our national defense depends upon.

We must protect our wilderness areas from the despoilation that some would visit upon them. As the last remaining pockets of frontier, their importance to the American public and its spirit cannot be measured in the dollar value of the resources beneath their surface. They serve as a living testament to the bounty of the land we settle over 300 years ago. Our unwavering efforts to insure the integrity of these wilderness areas will be appreciated by the many generations of Americans who will follow us.

My colleagues, I urge your support in the passage of H.R. 6542, the Wilderness Protection Act of 1982. The people of northern Iowa are almost totally unanimous in their hopes for the

enactment of this bill. I urge its swift passage. Thank you.●

● Mr. CRAIG. Mr. Chairman, as Congress considers legislation that affects our vital natural resources, let us keep a few facts about our forest resource in focus.

First, our country is blessed with forests that are among the most productive in the world. They have the biological potential to grow a great deal more wood than they are now growing.

Second, our soils, climate and know-how to improve our timber-growing productivity is enormous. We certainly have the capability and ability to supply our future domestic wood needs and to meet an increasing worldwide demand for the products from trees. Indeed, out ahead, wood fiber joins food among our country's greatest strengths.

But the key is increased productivity. This can be accomplished on our Nation's forest lands without harm to the environment—while retaining other forest benefits such as watershed protection, recreation, and wildlife habitat.

Our national forests are vital to the country's wood supply. They contain 46 percent of all the country's softwood growing stock—the wood most used in housing, construction, and for pulp and paper. Yet, tens of millions of national forest acres are frozen—and have been for more than a decade in the RARE I and RARE II studies of millions of acres national forest lands that could be considered for wilderness designation or released for multiple use.

Uncertainty over the land base available for timber production prompted many mills to bid up national forest timber sales by 300 to 400 percent and more—to insure that they would have timber to run their mills. Now, with housing in the doldrums and the market for lumber and plywood collapsed, these same mills cannot work this timber. Finished product prices in many cases are lower than stumpage costs. This critical issue is at least in part due to the uncertainty over timber supply. And uncertainty about timber supply is largely a product of unresolved decisions about which lands will be wilderness and which lands will be used for multiple-use management.

Yet, while the national forests contain nearly half of the country's entire growing stock of softwoods, they supply only 20 percent of the U.S. softwood harvest. Of all forest ownerships, the national forests have the greatest opportunity to increase timber productivity. These assets are owned by all Americans—and they should be better managed to provide returns commensurate with their value.

The U.S. forest products industry, after extensive study, has adopted and

is implementing a timber supply program that sets specific productivity targets for softwood timber supply for all forest ownerships. These targets can be considered wood consumer goals—because U.S. consumers will ultimately pay. The goals call for increased levels of productivity to achieve two major objectives: First, to minimize the cost impact of wood product and housing prices for U.S. consumers and, second, to build the potential for the United States to have an international net trade surplus of forest products.

The objective of these goals is to increase the total softwood timber harvest by 50 percent by the year 2030. This means that productivity on industry-owned lands will have to increase 20 percent by that year and the productivity of private nonindustrial woodlands will have to increase 84 percent. It also means national forest timber supply will have to increase by 45 percent by the year 2000.

To achieve these productivity increases, our forest lands must be available for timber growing, more trees must be planted, the lands must be managed intensively, and a favorable climate must be created for investments in forestry.

Vital to increased productivity on the national forests is resolution of the management freeze on lands that the second roadless area review and evaluation (RARE II) study found best suited for nonwilderness uses. RARE II studied 62 million acres of roadless lands in the national forests. When completed in 1979, the decision was that 15 million acres qualified for wilderness designation, 11 million acres needed to be studied further, and 36 million acres were best suited for nonwilderness multiple use. It is the 36 million acres that continue to cause controversy.

It is time Congress ended the runaway creation of de facto wilderness and legislatively released these lands for multiple-use management. This would give the Forest Service the stable, reliable land base that is essential to plan timber management programs without threat of costly and time-consuming lawsuits and appeals. Release would not tie the hands of any future Congresses in designating any of these lands as wilderness at a future time.

It would, however, uphold the fundamental principle of the Wilderness Act that only Congress can designate wilderness areas. I do not think our country can afford to have its land management plans characterized by uncertainty and paralysis. Too much is at stake, environmentally, economically, and socially.●

● Mr. PATTERSON. Mr. Chairman, I rise to lend my name to the growing list of House Members who support the continued protection of our Na-

tion's wilderness areas. The Wilderness Protection Act which we have before us today is truly a bipartisan consensus bill which enjoys the support of a majority of Americans. I do not believe that it serves any useful purpose to bring forward damaging amendments which were soundly defeated during the Interior Committee's markup.

Mr. Chairman, I do not hesitate to say that a majority of Americans support the principles embodied in this bill because I was one of several members of the Interior Committee who had the opportunity to chair hearings on the original Watt and Burton proposals in my home district of Orange County. Out of nearly 100 witnesses who testified at this hearing, only one, a member of the California Mining Association, had anything negative to say about protecting our Nation's wilderness and wilderness candidate areas. Furthermore, national polls conducted by pollster Lou Harris have confirmed public sentiment on this matter. Americans believe in environmental protection and Americans believe that the pursuit of a balance between conservation and energy exploration should be a national priority. In direct defiance of this public mandate, Secretary Watts treats energy and mineral exploration as the preeminent use for all land. "Compromise" and "balance" are apparently missing from Secretary Watt's vocabulary.

Mr. Chairman, since the establishment of the National Wilderness Preservation System in 1964, it has been national policy not to allow oil and gas leasing in wilderness areas. This has been the case under both Democratic and Republican administrations alike. In the past, previous administrations have exercised their discretion not to lease in wilderness areas, except in 22 minor instances. It is the Reagan administration which has broken faith with the American people and literally reversed this longstanding policy. Unfortunately, they have provided no good reason for doing so. In fact, the available statistics strengthen the case against opening wilderness areas to leasing. In the lower 48 States, there are currently 137 million acres of Federal lands under oil and gas leases. Both the Interior Department and the General Accounting Office have reported that up to 80 percent of these existing leases will expire without any exploratory drilling having been undertaken. Coupled with the fact that wilderness and wilderness candidate areas hold only approximately 3 percent of the Nation's potentially producible oil resources and 2 percent of the gas resources, opening our Nation's outstanding wilderness areas to leasing and development is simply unwarranted.

I urge my colleagues to vote for final passage on this important issue. Today's vote will be one of the few important environmental votes of this session. Let us not do the American public wrong. Mr. Chairman, I yield the balance of my time. ●

● Mr. MINETA. Mr. Chairman, I rise in strong support of H.R. 6542, the Wilderness Protection Act of 1982.

Although this is a complex bill, there is a very simple and clear basic issue before us today. Where are our national priorities? Are we dedicated to preserving our vanishing wilderness areas or are we not?

Once lost, wilderness is gone forever. We cannot fail to act now to recommit ourselves to our basic goal of preserving at least a small portion of this Nation in a pristine, undeveloped state.

There is a tendency for some to say that wilderness areas are important, and worth preserving, but that other goals are also important as well. Although seemingly fair minded and innocuous, this view starts us down a very dangerous slope we best not approach.

The essence of wilderness is that our impact does not show. A wilderness area with just a few oil wells or coal mines—however well landscaped—is hardly the untouched wild place we are determined to protect by our action today.

This is a good bill before us. The Committee on Interior and Insular Affairs has done an excellent job of putting together a complex piece of legislation which we can all support with confidence and enthusiasm.

Mr. Chairman, we face many difficult decisions in this House every year. This bill is not one of them. Our choice and our path is clear. We must, and I am sure we will, act today to protect our remaining wilderness areas. I urge my colleagues to overwhelmingly approve H.R. 6542.

Thank you. ●

The CHAIRMAN pro tempore. All time has now expired.

The question is on the amendment offered by the gentleman from Alaska (Mr. Young).

The amendment was rejected.

The CHAIRMAN pro tempore. The question is on the amendment in the nature of a substitute, as amended.

The amendment in the nature of a substitute, as amended, was agreed to. The CHAIRMAN pro tempore. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker pro tempore (Mr. MURTHA) having assumed the chair, Mr. EVANS of Georgia, Chairman pro tempore of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 6542) to withdraw certain lands from mineral leasing, and for

other purposes, pursuant to House Resolution 534, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

Is a separate vote demanded on the amendment to the amendment in the nature of a substitute adopted by the Committee of the Whole? If not, the question is on the amendment.

The amendment was agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the bill.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. LUJAN. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 340, nays 58, not voting 36, as follows:

□ 1145

Mr. DAVIS changed his vote from "yea" to "nay."

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

□ 1200

GENERAL LEAVE

Mr. SEIBERLING. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks, and to include extraneous matter, on the bill just considered and passed.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

APPOINTMENT AS MEMBERS OF DELEGATION TO CONFERENCE OF THE INTERPARLIAMENTARY UNION IN ROME, ITALY

The SPEAKER. Pursuant to the provisions of title 22, United States Code, section 276a-1, as amended by Public Law 95-45, the Chair appoints as members of the delegation to attend the Conference of the Interparliamentary Union to be held in Rome, Italy, September 14-22, 1982, the following Members on the part of the House.

Mr. PEPPER of Florida, chairman;
Mr. DERWINSKI of Illinois, vice chairman;
Mr. FOUNTAIN of North Carolina;
Mr. PICKLE of Texas;
Mr. DE LA GARZA of Texas;
Mr. BOWEN of Mississippi;
Mrs. BOGGS of Louisiana;
Mr. WASHINGTON of Illinois;
Mr. BROOMFIELD of Michigan;
Mr. MCCLORY of Illinois;
Mr. STANTON of Ohio; and
Mr. BUTLER of Virginia.

UPDATING OF LEGISLATION AND POLICIES RELATING TO TELECOMMUNICATIONS

(Mr. WIRTH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WIRTH. Mr. Speaker, for the last 7 years, the Congress has been working toward updating our hopelessly outmoded telecommunications policy by rewriting the Communications Act of 1934 for the first time

since it was written. Building on the foundation laid by my predecessor as chairman of the House Subcommittee on Telecommunications, Lionel Van Deerlin, introduced and considered in this Congress, H.R. 5158, with which you are all quite familiar.

There were several critical goals underlying the provisions of H.R. 5158, and support of those aims was underscored yesterday in the decision settlement agreement signed by A.T. & T. and the Department of Justice.

As we did in H.R. 5158, he has helped keep telephone rates reasonable by allowing the local operating companies to keep the highly profitable yellow pages, which have over \$3 billion in annual revenues.

He has reinforced the commitment in H.R. 5158 to the first amendment guarantee of a full diversity of information sources. We were concerned that, by allowing A.T. & T. to transmit information it owned or controlled over its own monopoly long-distance facilities, the settlement created a "bottleneck" to access to the fullest array of information. Judge Greene incorporated into his decision, practically verbatim, the provision in H.R. 5158 dealing with that critical issue.

And, like H.R. 5158, the Judge's decision will help ratepayers and A.T. & T.'s shareholder by strengthening the to-be-divested local operating companies. By allowing the operating companies to market new customer premises equipment, including sophisticated switchboard and computer systems; by giving the operating companies a limited role in the divestiture process; and by making certain they are not left with an undue portion of their shared debt with A.T. & T., the operating companies are more likely to have the capacity to keep local rates reasonable in the future.

Judge Greene's opinion is a major step in the direction of a progressive new telecommunications policy. I will be sending out material explaining what is in that opinion, and its relationship to the recently withdrawn H.R. 5158.

We will also be holding aggressive oversight hearings on the FCC to insure that they are properly prepared to implement and oversee the settlement if A.T. & T. and the Department of Justice agree to it. I look forward to working on this critical issue with my colleagues in the months ahead.

And I want to share with my colleagues the statement I issued yesterday on Judge Greene's opinion, and a summary of the opinion.

STATEMENT BY REPRESENTATIVE TIMOTHY E. WIRTH, CHAIRMAN, HOUSE SUBCOMMITTEE ON TELECOMMUNICATIONS, CONSUMER PROTECTION AND FINANCE

The following statement was issued today by Rep. Tim Wirth (D-Colo.), Chairman of the House Subcommittee on Telecommunications, in response to the opinion issued by Judge Harold Greene, which will require

certain modifications in the proposed agreement between AT&T and the Department of Justice, settling the government's longstanding lawsuit against the Bell system:

"I am pleased that Judge Greene has shared the view of myself and so many other Members of Congress that while the settlement as proposed will significantly enhance competition in the telecommunications industry, it also needed major changes. He has acknowledged that changes had to be made to keep local telephone rates reasonable, and to protect Bell's divested local operating companies.

"Within the severe legal and practical limitations on the Judge's power to modify the agreement without the consent of the parties, he has addressed many of the issues we sought to resolve with H.R. 5158, the Telecommunications Act of 1982.

"He has helped keep local telephone rates reasonable by allowing the local operating companies to keep the highly profitable Yellow Pages, which have over \$3 billion in annual revenues.

"He has helped to assure a diversity of information sources for the public. We were concerned that, by allowing AT&T to transmit information it owned or controlled over its own monopoly long distance facilities, the settlement created a "bottleneck" to the First Amendment purpose of access to a full diversity of information sources. Judge Greene incorporated into his decision, almost verbatim, the provision in H.R. 5158 dealing with that critical issue.

"The Judge's decision will help ratepayers and AT&T's shareholders by strengthening the to-be-divested local operating companies. By allowing the operating companies to market new customer premises equipment, including sophisticated switchboard and computer systems; by providing a standard for other restrictions; by giving the operating companies a limited independent voice in the divestiture process; and by making certain they are not left with an undue portion of their shared debt with AT&T, the operating companies are more likely to have the capacity to keep local rates reasonable in the future.

"Clearly, not all my concerns have been addressed by the Judge, nor could they be. Judge Greene was limited in those steps he could take while still preserving the pro-competitive centerpiece of the proposed decree—divestiture of the local operating companies. For example, the Judge enables the local companies to market new telephone equipment, but he allowed AT&T to take away from them all the already-installed home and business telephones. He clearly believes that AT&T's \$30 billion a year long distance monopoly will become subject to effective competition far sooner than our data indicates. And although the opinion establishes a maximum level of debt (45%) that can be left with the operating companies, it does not deal with our very serious concerns about the evaluation of AT&T's assets prior to the divestiture. The operating companies are losing their most productive assets and the division of debt should reflect that loss of value.

"Overall, the Judge has significantly improved the proposed settlement, which was already a major step in the right direction. Yet, it is still only a step. The need for Congress to establish comprehensive new telecommunications policy is still critical, and Congress should not abdicate its responsibility to do so."

U.S. HOUSE OF REPRESENTATIVES,
SUBCOMMITTEE ON TELECOMMUNICATIONS,
CONSUMER PROTECTION,
AND FINANCE OF THE COMMITTEE
ON ENERGY AND COMMERCE,

Washington, D.C., August 11, 1982.

To: Members, Subcommittee on Telecommunications, Consumer Protection and Finance.

From: Timothy E. Wirth, Chairman.

Subject: Today's Order in *United States v. A.T. & T.*

Judge Harold Greene today issued an opinion indicating that he would not approve the settlement proposed by AT&T and the Justice Department unless the parties accepted substantial changes, most of which resemble provisions of H.R. 5158. The parties must agree to the suggested modifications within 15 days, or the Court will resume trial on the merits.

RATEPAYERS

Judge Greene's most significant condition would require AT&T to allow the operating companies to retain ownership of Yellow Pages. This change will have a strongly beneficial impact on the affordability of local service, since Yellow Pages revenues will continue to offset local rates. I have attached a table showing the adverse rate impacts that would have occurred if the operating companies lost Yellow Pages—as the proposed settlement provided.

Another modification would allow the operating companies to continue to offer new terminal equipment, but would apparently transfer installed telephones to AT&T. (p. 111 & fn. 248) This would mean that AT&T, not the operating companies, would own telephones now in ratepayers' homes. It is possible that this transfer would remove installed equipment from State regulation and allow unregulated price increases.

VIABILITY OF THE BELL OPERATING COMPANIES

Judge Greene cited the letter he received from five Members of the Subcommittee as asserting that permanent restrictions on the operating companies "would have adverse consequences in that they would undermine the financial viability of the divested operating companies, or produce substantial increases in the rates for local telephone service, thus eroding the statutory goal of universal telephone service for all Americans." (p. 103) Accordingly, the Judge will grant petitions allowing an operating company to compete in markets if it shows that "there is no substantial probability that it could use its monopoly power to impede competition."

The Judge was somewhat responsive to our concern that the operating companies be divested with a reasonable ratio of equity to debt, and with a voice in the divestiture process. AT&T would have to divest each operating company with debt instruments whose terms are representative of AT&T's consolidated debt, and which equal approximately 45 percent of the assets that company retains (50% for Pacific Tel). Before approving the plan, the Court will require the head of each operating company to submit a sworn statement that he believes the company will continue to be viable and discussing "any element of the plan . . . that may have been imposed by AT&T over (his) objections." (p. 170) The court will approve the plan only if it is "consistent with the provisions and purposes of the decree," and will retain jurisdiction over its implementation. Judge Greene also observed that "AT&T has a fiduciary obligation, separate and apart from the decree, to approach the

divestiture in good faith and to protect the interests of all involved." (p. 142)

The Court did not restrict AT&T from immediately reentering the local loop by "bypassing" the operating company, nor did he require AT&T to "pay back" the operating companies for patents and research developed under the license contract. For a limited period of time, the operating companies will have access to these patents and will be able to sublicense them—but only to suppliers of their telecommunications equipment. AT&T would not have to license pre-divestiture patents to electronics firms seeking to market new products for a "reasonable royalty," as required by the 1956 decree, nor would the operating companies receive any of the royalties that are collected.

COMPETITIVE ISSUES

The Court found that the "incentive and the opportunity for anticompetitive conduct (by AT&T) will after divestiture and on account of divestiture be greatly reduced." (p. 72 & n. 175) Consistent with this view, the Judge did not require substantial additional steps to prevent anticompetitive practices between the interexchange network and other markets. He observed that the decree does not "immunize (AT&T) from its obligations under the regulatory decisions or the antitrust laws." (fn. 176) The Court specifically observed that "since separate subsidiaries are essentially a regulatory device, it does not seem appropriate, except in the most unusual circumstances, for an antitrust court to impose such a requirement." (p. 112 & fn. 251)

The opinion proposed that any operating company that bills interexchange calls disclaim any affiliation with AT&T. The Court also made clear that any exception from the requirement of equal interconnection would be conditioned on a cost-based discount.

DIVERSITY OF INFORMATION

The Court expressed particular concern for the First Amendment values that underlay section 263 of H.R. 5158. The Judge suggested that the parties agree to an almost identical replica of this provision, prohibiting AT&T from providing information publishing services over its own facilities. AT&T may petition for relief from this provision after seven years.

EMPLOYEE PROTECTION

The Court declined to require the operating companies to continue to recognize existing unions or to respect current bargaining agreements for the remainder of their term, as provided in the Senate bill and in section 267 of H.R. 5158. The Court stressed that divestiture posed "no obstacle . . . to adherence . . . to the terms of existing bargaining agreements," but that the unions and the operating companies "will be entirely free to arrange their mutual labor relationships." (p. 146)

EXPRESSING DISAPPROVAL OF CUTBACKS ON COMMUNITY COMMITTEES SERVING AGRICULTURE

(Mr. SKELTON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SKELTON. Mr. Speaker, farmers in my congressional district have brought to my attention a proposal by the U.S. Department of Agriculture that will have the most serious conse-

quences for the efficient and effective operation of U.S. Government farm programs. That proposal is one that would reduce the number of community committees within the Agricultural Stabilization and Conservation Service, cut back the number of meetings for the committees, and remove local financial control.

Mr. Speaker, this proposal is being made in name of cost savings. However, if it is allowed to go forward, it will have exactly the opposite effect. Over the years, community committees have been instrumental in detecting waste, fraud, and abuse in USDA programs. They have returned to the Government many times the cost of their operation.

Further, Mr. Speaker, this proposal runs counter to the Zorinsky amendment to tobacco legislation enacted last month by Congress, and signed into law by the President. That provision states, in pertinent part, that "it is the sense of Congress that the Secretary of Agriculture should insure that the structure and operation of the Agricultural Stabilization and Conservation County and Community Committees . . . be preserved and strengthened."

Mr. Speaker, these community committees are the heart and soul of programs operated by the ASCS. Made up of working farmers, elected by their neighbors, they have given these farm programs a grassroots participation and a responsiveness to local needs matched by few other Government programs. This administration has talked a great deal about returning Government to the local level. But the proposal to reduce the level of participation of community committees within ASCS will ultimately result in the responsibility for farm programs being taken away from working farmers at the local level and placed in the hands of Washington bureaucrats.

Mr. Speaker, today I have written Secretary of Agriculture John Block and urged him to drop this proposal before it goes any further. I encourage my colleagues here in the House to join me in expressing their disapproval of this ill-advised and misguided proposal.

INTEREST RATES

(Mr. ALEXANDER asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. ALEXANDER. Mr. Speaker, on September 9, 1981, I introduced a resolution directing that the President consult with the Governors of the Federal Reserve System for the purpose of substantially reducing interest rates within 90 days after adoption.

My resolution was one of many directing that the President confer with the Federal Reserve Board on lowering interest rates. The sense of the Congress is clear—that the Chief Executive and the Federal Reserve Board begin to work together to bring down these devastatingly high interest rates. In some cases interest rates are now more than 17 percent.

The President and the Federal Reserve Board have not acted to restore the confidence of the financial markets and the general public, they have not worked toward lowering interest rates and they show no signs of doing so.

In October 1979, Chairman Volcker announced a radical departure from traditional Federal Reserve policy. At that time, the Fed officially abandoned any attempt to control interest rates and announced that its entire effort would be to control the money supply alone.

The result of the Fed's deciding to ignore interest rates is that interest rates quickly reached and have maintained their highest levels in American history.

In the 2 years following the implementation of the policy of ignoring interest rates, the prime rate averaged 16.8 percent.

With interest rates at that level the American dream of homeownership is fading. Under this ballooning of interest rates caused by the Fed's ignoring the subject only 3 percent of the American people can afford a home.

Time and time again, I am told by the business people in my district that the most influential factor in the continuing high interest rates is what they identify as the "fear factor." The public is seeing no action by this administration to relieve high interest rates and they are convinced that interest rates will remain high. This fear factor is stopping investments.

A bill introduced Wednesday by the distinguished majority leader, Mr. WRIGHT, and myself, as a cosponsor, is meant to pick up where the many resolutions that have been offered left off.

The bill is designed to relieve some of the uncertainty over interest rates by making the Federal Reserve Board consider the long-term affects of their monetary policy on interest rates and by making the Fed announce its intentions.

The high interest rate policy is a conscious policy of the Federal Reserve with the support of the administration. Congress and the general public have the right to know the Fed's and this administration's intentions toward monetary policy affecting interest rates.

This bill is not an attempt to have Congress set interest rates. However, it is an attempt to make an institution that has been unapproachably respon-

sive to the needs of the people as constituents have expressed them to their elected officials.

This amendment of the Federal Reserve Act is necessary to restore confidence.

THE JACKASSES AND THE ELEPHANTS

(Mr. WILLIAMS of Montana asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WILLIAMS of Montana. Mr. Speaker, yesterday President Reagan was kind enough to travel out to my home State of Montana, and while he was out there he referred to the Members of the Congress of the United States as "jackasses."

Now, another term of "jackass" is "donkey." The donkey is the symbol of my party. By the way, a donkey is a domesticated jackass. Donkeys are notorious for having their own minds, being stubborn, and thinking for themselves, whereas the animal representing the other party is easily trained. We have all seen elephants in the circus. They grab the tail of the elephant in front of them and then they all perform the identical trick each in turn.

Now, the President's problem is not with the jackasses; it is with the elephants who are starting to develop a mind of their own on the President's economic policy. He is having trouble with those elephants who are beginning to think like jackasses.

Mr. Speaker, I would suggest that the President quit concentrating on the donkeys and start trying to get his elephants back into line.

SIGNS OF THE TIMES

(Mr. STARK asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. STARK. Mr. Speaker, this morning's Washington Post placed side by side two news articles that are a sign of the times—the hard times brought to us by the President's economic policies of trickle down tax cuts and unemployment as a cure for inflation.

One article reported the horse Conquistador Cielo was syndicated yesterday for \$36.4 million. The racehorse was sold to 40 investors who put up about \$900,000 apiece for the animal, expecting, of course, handsome profits off the stallion's offspring. As the article explained:

At the same time, you've got a tax shelter. You can depreciate the cost of a 3-year-old over 3 years, writing off 25 percent the first year, 38 percent the second year, and 37 percent in the third. It is a nice game.

Next to this article was one entitled "Agencies Water the 'Charity Soup.'" As the article reported:

At Sacred Heart Parish, 16th and Park Road NW, the number of families receiving church emergency food packages jumped from 70 last July to 230 in May of this year, according to the Rev. Joaquin Bazan, pastor.

SOME (So Others May Eat), a church-operated soup kitchen half a mile north of the Capitol, has watched its daily line grow from 200 persons a few years ago to 600 today.

In affluent Montgomery County, \$30 emergency aid grants given by the interdenominational Community Ministry jumped from 16 a month three years ago to over 100 in June of this year.

"I don't know where it's going to end," says Marita Dean of Catholic Charities' crisis intervention service. "Last summer we were seeing 40 people a month. Now, it's close to 100. And this is summer, when it should be down. God knows what it will be in November and December."

Clearly, Mr. Speaker, the times are out of joint when a racehorse can sell for \$36.5 million—one offer even went as high as \$60 million—while thousands of our fellow human citizens are reduced to soup lines.

POSITIVE EFFECTS OF THE JOB TRAINING PARTNERSHIP ACT

(Mr. EVANS of Georgia asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. EVANS of Georgia. Mr. Speaker, passage of the Job Training Partnership Act by the House on August 4, is a meaningful step toward addressing our Nation's chronic unemployment problem.

As a sponsor of H.R. 5320, I am pleased that approximately 1,000 people in Bibb, Twiggs, Monroe, and Jones Counties, as well as thousands of others in Georgia's Eighth District will be provided training and jobs in the private sector through partnership with private industry.

I have contacted the business communities in my district and requested their meaningful and enthusiastic support for this legislation and its effective implementation.

Unemployment hurts people. Not only does each 1 percent of unemployment mean a loss in revenues to our Treasury of \$25 billion, more importantly it represents misery and despair to the unemployed and families of unemployed.

Mr. Speaker, I recognized that H.R. 5320 is not a cure-all for our unemployment problem. We must continue our efforts to put people back to work through sound fiscal and monetary policies. This legislation will help, however, in attacking high unemployment.

RENEWED EFFORTS FOR A VERIFIABLE NUCLEAR FREEZE

(Mr. BINGHAM asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BINGHAM. Mr. Speaker, I am proud today to join once again with my colleagues, the gentleman from Massachusetts (Mr. Ed MARKEY) and the gentleman from Massachusetts (Mr. SILVIO CONTE), in reintroducing the resolution to call for a mutual and verifiable freeze of the testing, production, and deployment of nuclear weapons.

Members may say, "Well, why do this now? You just got beaten the other day."

We do not consider that we got beaten. We consider that in view of the tremendous effort that was made by the White House, with calls from all over the world coming in to Members, getting 202 Members to support the freeze was a substantial victory. We want the people around the country who believe in the freeze, who call for the freeze, who call for a halt to the arms race, to know that we are going to carry on the fight and eventually we will win that fight.

Mr. Speaker, at some point the people of this country, through their elected representatives, are going to see to it that the insane nuclear arms race comes to a halt.

AN APPEAL TO THE SOVIET UNION ON NUCLEAR DISARMAMENT

(Mrs. SCHROEDER asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. SCHROEDER. Mr. Speaker, an article in Sunday's New York Times brought to my attention an interesting contradiction: While the Soviet Union accuses the United States of sabotaging talks on nuclear disarmament, the Kremlin is suppressing unofficial peace initiatives in the Soviet Union and the East bloc.

I am disturbed by reports that Soviet officials have taken steps to disband the country's first unofficial peace movement, disconnecting telephones of participants, detaining them, and warning some that they risk criminal prosecution.

Last Friday in Moscow, it was reported, KGB agents arrested Sergei Batovrin, a founding member of the peace movement and have placed him in a psychiatric hospital where he is allegedly being administered depressant drugs.

It has been reported East Germany has decided to crack down on unsanctioned peace movements in East Berlin. Known peace campaigners have been given the choice of joining the army or going to jail. East German

officials want to squelch this disarmament campaign in East Berlin, which has the backing of the Protestant church, to discourage the formation of similar movements in Moscow.

This crackdown comes at a time when both the Governments of the Soviet Union and the United States, urged on by the popular support of their people, are working to halt the nuclear arms race. If these acts of repression are carried out by the Soviet Union it undermines the grassroots effort of the nuclear freeze movement.

I hope that Soviet officials will reevaluate their treatment of this group. If Soviet concern for the prevention of a nuclear holocaust is real, I trust grassroots efforts will be encouraged, rather than restrained. I want to urge my colleagues to sign the "Dear Colleague" letter I am circulating expressing concern about these reported crackdowns to Soviet President Brezhnev.

STRATEGIC TRADE ACT

(Mrs. BYRON asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. BYRON. Mr. Speaker, I rise today to alert my colleagues to an international organization which seeks to preserve the security of the free world. This organization is known as Cocom, short for the Coordinating Committee for Multilateral Export Controls. Cocom has existed for 32 years, and it restricts exports to the Communist bloc on the grounds that the exported items could be used for military purposes.

Cocom has been effective, but there are areas that need improvement. The Strategic Trade Act of 1982, which I introduced last month, would stress the U.S. role in Cocom and would seek treaty status for this important organization.

Along with strengthening Cocom, we need to bring more military analysis into the picture. Most Cocom nations do not have military participants in their Cocom delegations. The Strategic Trade Act places more emphasis on the military review of proposed exports from the United States. This move would demonstrate to our Cocom partners that appropriate military analysis must be a part of the export control process.

Events in recent months clearly indicate that there is a lack of international control of technological exports to the Communist bloc. The Strategic Trade Act of 1982 will strengthen international coordination in order to restrict the export of technology that could be used by the Soviets to improve their warmaking capability.

SUPPORTING REINTRODUCTION OF RESOLUTION ON THE NUCLEAR FREEZE

(Mr. AuCOIN asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. AuCOIN. Mr. Speaker, advocates of a nuclear weapons freeze are reintroducing a resolution to that end. Again I am pleased to join them in this effort. I do so convinced that the American people are on our side on this issue, and that we will win.

Last week the freeze measure failed to pass on the floor of the House—only after an intensive lobbying effort against the resolution by the administration. But do you know what? In my district the people have not changed their desire for peace or their support for this freeze resolution one whit. They still want to stop the limitless arms race which is being perpetrated in the false name of defense. Because they feel so strongly, in only 10 weeks 112,000 Oregonians signed an initiative petition to put the freeze resolution on the State ballot this fall.

□ 1215

I predict the freeze will pass overwhelmingly in Oregon, in California, in Wisconsin, and in every State and town and hamlet which has it on the ballot this fall.

I believe that once the wave of this support is added to the momentum being built by the advocates within the Congress, the people of America will get the victory that they want on the nuclear weapons freeze and that this initiative will win.

President Eisenhower said:

Every gun that is made, every warship launched, every rocket fired, signifies in the final sense a theft from those who hunger and are not fed, those who are cold and are not clothed.

The American people recognize this. I wish we had a Republican President in the White House who recognized this as Eisenhower did. We do not have such a President. But we do have a freeze resolution. And it must be passed.

SOVIET REFUSNIK SAMUIL AZERSKY

(Mrs. KENNELLY asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. KENNELLY. Mr. Speaker, another human being who is courageously attempting to emigrate with his family from the Soviet Union to Israel has come to my attention—this is Samuil Azersky of Odessa.

Samuil and Emilia Azersky, along with their two children, were first denied permission to emigrate to Israel because Soviet authorities

claimed that their invitation was not sent from a direct relative in Israel. Officials told them that as soon as they received such an invitation, they would be allowed to emigrate without any difficulty.

Emilia's mother, upon arriving in Israel in March 1979, immediately sent an invitation to the Azerskys. They applied again and this time were denied on the pretext that since Samuil's parents were still residing in the Soviet Union, they would not be allowed to leave unless they took his parents with them.

With this courageous act of stepping forward to express their deep desire to emigrate, Samuil and Emilia Azersky and their two children joined thousands of other suffering from increasing persecution at the hands of Soviet authorities. Since filing their application in March 1979, no one in the family has been able to find employment in their profession. Samuil is a mechanical engineer, Emilia is a physician, their daughter Elena is a laboratory assistant, and their son, Vladimir, is still in school.

It is extremely important that we who enjoy such abundant freedom continue to express our outrage at the persecution of Soviet Jews who want nothing else but to join family members in Israel. Only 182 Jews were allowed to leave the Soviet Union in June to emigrate to Israel, while nearly 4,500 Jews received exit visas in June 1979. As long as Soviet authorities continue their current campaign to smother Jewish emigration, we shall be hearing about other families forced into these same tragic circumstances by the conflict between Soviet oppression and an individual's pursuit of his or her basic human rights.

SYNAGOGUE IN WEST BEIRUT BOMBED

(Ms. OAKAR asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. OAKAR. Mr. Speaker, I want to associate myself with the previous speakers concerning the nuclear freeze. And what about an arms freeze?

Bombs know no targets. I am saddened to see that in addition to the Palestinians and the Lebanese killed and left homeless, the Jewish community in West Beirut is homeless, and, indeed, the only synagogue in West Beirut has been bombed.

This holy synagogue, along with the holy mosque and the holy Christian churches have been destroyed.

I appeal to the President of the United States to speak out against this unbelievable desecration of a country and its people and to call for an arms and nuclear arms freeze.

KEEP CHRYSLER OUT OF POLITICS

(Mr. PEYSER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PEYSER. Mr. Speaker, I was really quite surprised yesterday when I was watching television in the morning to see a picture of Mr. Lee Iacocca, the chief executive officer of Chrysler, coming out of the White House and pausing to say that he was coming out to support the President's tax program, and this was something he was going to really get involved in.

I do not know whether this is a payoff for Chrysler getting their loan money through this Congress but I would like to suggest that Mr. Iacocca devote himself to selling Chryslers and not entering this arena.

I think he is doing nothing to help their sales because this tax increase is aimed at hurting an awful lot of people. Maybe they are not Chrysler buyers and that is why he feels he is free to do it, but it is certainly hurting a lot of the elderly and a lot of the poor people and a lot of the middle income people.

May I suggest, Mr. Iacocca, that you work out in Chrysler country and stay out of the White House and the Congress.

NUCLEAR FREEZE

(Mr. DELLUMS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DELLUMS. Mr. Speaker, I rise briefly to join with those voices who have taken the well this afternoon in the spirit of peace, and I do so in two ways.

One, to applaud my colleagues for their continued battle to reduce and ultimately remove the risk of the insanity of nuclear war.

But I also do so in a second fashion and that is to deplore the sabre-rattling that is going on with respect to Cuba, a nation in this hemisphere.

Mr. Speaker, I think it is a contradiction for this Nation to talk about peace, communication, negotiation, and cease-fire in one hemisphere of this world and in this hemisphere we are prepared to talk about language such as "by any means necessary."

I think this kind of sabre-rattling is absurd. It is warmongering. It does not speak of peace.

Again I summarize by saying I take the well in the spirit of peace and join my colleagues who are attempting to force this body to address a reality.

PERSONAL EXPLANATION

(Mr. FISH asked and was given permission to address the House for 1

minute and to revise and extend his remarks.)

Mr. FISH. Mr. Speaker, yesterday, August 11, 1982, I was unavoidably absent from the House of Representatives due to illness. Had I been present, I would have voted as follows on the bills under consideration:

Rollcall No. 264: Harkin amendment to H.R. 5203, "aye."

Rollcall No. 265: Final passage of H.R. 5203, "aye."

Rollcall No. 266: Eckart amendment to H.R. 6214, "no."

Rollcall No. 267: Harkin amendment to H.R. 6214, "no."

Rollcall No. 268: Final passage of H.R. 6214, "aye."

NUCLEAR FREEZE

(Mr. CONTE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CONTE. Mr. Speaker, imagine if you will that there are two hostile groups of people hurtling through space in a starship. Each group believes that the other is bent on taking over the starship. Each does not trust the other. Each is armed to the teeth. Each possesses thousands of weapons of mass destruction called nuclear weapons. Employment of any one of these weapons could trigger a chain that would destroy the starship. Yet, the leaders of both groups believe they must have more and more of these weapons. It becomes clear to everyone, even the leaders, that this is madness, yet they do not do anything because of mistrust and the inability to stop the process.

Suddenly, a ground swell of concern begins to grow, because the inhabitants of the starship begin to realize that these weapons have no military worth. The leaders, however, do not realize the earnest and serious intentions of the inhabitants and they miss the opportunity to stop the inevitable destruction of their starship. I am convinced that we should not miss the same opportunity to secure our starship Earth. Therefore, I am joining my colleagues Mr. MARKEY and Mr. BINGHAM in reintroducing the nuclear freeze legislation that was recently considered and rejected in this House. I hope you will be able to join us this time in a successful effort to adopt this resolution.

DEFENSE TARIFFS BILL

(Mr. REGULA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. REGULA. Mr. Speaker, the time has passed for the United States to continue shouldering the largest burden of protecting the free world.

Our allies are on par with us economically, and it is time they reach equality on defense costs as well.

The fact is that Japan, with a higher per capita GNP than the United States, allocates less than 1 percent of this GNP for its defense. The fact is that our European allies average only 3.6 percent of GNP for defense, while the United States allocates over 6 percent.

In March in this Chamber, I twice discussed this problem of disproportionate defense burden sharing. Today I, along with 17 colleagues, am introducing a bill that will give the President the power to impose tariffs on imports from NATO nations, France and Japan, in the amounts we spend on their defense.

These tariffs would be in levels that would recover our costs of defense assistance to these countries. My aim is to provide the President with a new and powerful bargaining tool in negotiations with our allies in an effort to convince them to contribute more to free-world security.

RUSSIANS CANNOT BE TRUSTED ON NUCLEAR FREEZE

(Mr. WALKER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WALKER. Mr. Speaker, the other evening on the House floor the cause of peace was served when we approved a nuclear freeze resolution which freezes after reducing the levels of nuclear terror in the world and thereby develops a process that aims at getting the Soviet Union to do what we are willing to do and that is bring down the level of nuclear arms.

Yet today nuclear freeze proponents come to the floor saying that they want a different kind of nuclear freeze, one that says that we ought to trust the Soviet Union. They do so coming 1 day after our Secretary of Defense told Americans that the Soviet Union may well be violating the Nuclear Test Ban Treaty of 1960, violating it by exploding weapons of a greater megatonnage than is permitted in the treaty.

We heard some predictions here this morning. We heard someone predict that when this issue goes to the voters this fall across this country that it will be approved overwhelmingly.

I will give you one more prediction. I will give a prediction that the people of the Soviet Union will never be allowed to vote on this issue.

COURT RULINGS ON A.T. & T.

(Mr. RITTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RITTER. Mr. Speaker, in a recent decision on the Justice Depart-

ment-A.T. & T. settlement Judge Greene made some good points with regards to the Bell operating companies' financial viability and the needs of consumers of those Bell operating companies' services.

Specifically, it allowed those Bell operating companies (BOC's) to retain yellow pages and sell and lease new terminal equipment. This allows additional revenue-raising means for BOC's which should result in lower telephone rates to consumers.

Those of us who were strongly opposed to H.R. 5158, the telecommunications bill recently before the Energy and Commerce Committee, were in support of those measures advocated by Judge Greene to modify the Justice-A.T. & T. settlement.

However, what we opposed in H.R. 5158 was the counterproductive dismemberment of a very successful telecommunications system, particularly the dismemberment of the working relationship between A.T. & T. Cos., that is, the separations legislated between Long Lines, Western Electric, and Bell Labs.

This battle against structural dismemberment was embodied in those amendments which opponents to this telecommunications legislation were offering when the bill was pulled.

Judge Greene concluded that further separations, sought in H.R. 5158, were not necessary. Mr. Speaker, we agree.

□ 1230

THE NUCLEAR FREEZE

(Mr. LUNGREN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LUNGREN. Mr. Speaker, I must admit that I was somewhat befuddled by some of the 1-minute speeches that were uttered here a few minutes ago. Some of those who suggested to us that the only way that we can have peace in the world is through a nuclear freeze also voiced, virtually at the same time, some expression of concern about what the Soviets are doing to the minute, almost infinitesimal publicly allowed peace movement, in the Soviet Union.

I would suggest that they ought to think about that for a while. Many of the arguments that I think would be valid with respect to the nuclear freeze would be valid only if you assume that both parties about which we are concerned, the United States and the Soviet Union, were essentially in the same situation with respect to the number of weapons, and also with respect to their same systems.

But we know that is not true. We do influence our elected officials here. We influence them very directly, both at the ballot box and through demonstrations and through communica-

tions. We know that is not true in the Soviet Union. Thus, we have to look, if we truly want to have peace in the world, at how we leverage the Soviet Union into a position of true negotiations.

I would suggest that it is far more complicated than a mere freeze. I would suggest as one of our Members said some time ago, that we not have negotiations by bumper sticker.

INCREASE AUTHORIZATION FOR THE ANNUAL FEDERAL PAY- MENT TO THE DISTRICT OF COLUMBIA

Mr. DELLUMS. Mr. Speaker, by direction of the Committee on the District of Columbia and pursuant to the unanimous-consent request of Monday, August 9, 1982, I call up the bill (H.R. 5595) to amend the District of Columbia Self-Government and Governmental Reorganization Act to increase the amount authorized to be appropriated as the annual Federal payment to the District of Columbia, and ask unanimous consent that the bill be considered in the House as in the Committee of the Whole.

The Clerk read the title of the bill.

The SPEAKER pro tempore (Mr. ECKART). Is there objection to the request of the gentleman from California?

There was no objection.

The Clerk read the bill, as follows:

H.R. 5595

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 502 of the District of Columbia Self-Government and Governmental Reorganization Act (D.C. Code, sec. 47-3406) is amended by striking out "and for the fiscal year ending September 30, 1982, and for each fiscal year ending after September 30, 1982, the sum of \$336,600,000" and inserting in lieu thereof "for the fiscal year ending September 30, 1982, the sum of \$336,600,000; and for the fiscal year ending September 30, 1983, and for each fiscal year ending after September 30, 1983, the sum of \$361,000,000".

GENERAL LEAVE

Mr. DELLUMS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks in explanation of the bill before the House.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. DELLUMS. Mr. Speaker, I move to strike the last word.

Mr. Speaker I am pleased to bring up for the consideration of the House the bill, H.R. 5595. The bill amends the District of Columbia Home Rule Act to increase the amount authorized to be appropriated as the annual Federal payment to the District of Columbia from the existing level of \$336.6

million to \$361 million. The purpose of the Federal payment is to serve in part as compensation to the District of Columbia for the extraordinary net costs and denied revenues related to the Federal presence. In calculating the amount of the Federal payment, both the costs and the benefits of the Federal presence are considered.

Mr. Speaker, H.R. 5595 is required because the amount of the actual payment has not kept pace with the increase in the extraordinary net costs and denied revenues related to the Federal presence. In addition, Mr. Speaker, the Federal payment has decreased as a percentage of the District budget from almost 27 percent at the time that we passed the Home Rule Act in 1973 to 21 percent in fiscal year 1982. The proposed \$361 million figure would be approximately 20 percent of the District's fiscal year 1983 budget.

Mr. Speaker, the Subcommittee on Fiscal Affairs and Health of the Committee on the District of Columbia held hearings on March 3 of this year. The bill was reported to the full committee at that time. On March 12 of this year the committee approved the bill, H.R. 5595, by a unanimous vote of 9 ayes and zero nays.

I might also add, parenthetically, Mr. Speaker, that the amount of revenue requested in this authorization bill, \$361 million, is the figure proposed by the President and incorporated in OMB's budget request for fiscal year 1983, and, finally the figure is also within the budget resolution adopted by this body.

Mr. McKINNEY. Mr. Speaker, I move to strike the last word.

Mr. Speaker, in the past few months, the Members of this body have made numerous decisions that will determine the fiscal future of our Nation as a whole, and of the countless cities and towns making up that Nation. Certainly, we will see more of those decisions surface in the weeks ahead as we begin to consider the 13 appropriations bills covering the operation of our Government in the fiscal year ahead. Each and every one of us will be aware of programs that will directly impact on the cities that we represent, and we will all vote to protect the interests of our constituents, insofar as possible.

While we take those steps we should not forget that one jurisdiction in this country does not have a vote in this body. That jurisdiction, of course, is the District of Columbia. The responsibility to insure the well-being of the Nation's Capital falls to the Congress, and more specifically, to the Committee on the District of Columbia. We come to the floor today with a bill that acknowledges that responsibility, and ask your support for legislation to increase the amount authorized to be appropriated as the annual Federal payment to the District of Columbia.

Let me make sure my colleagues understand what the Federal payment is all about. It is not a handout. It is certainly not compensation to the city of Washington for being the Nation's Capital, because if that were the case, the figure we are discussing here today would be much greater. It is a fully justified payment to the District to help defer the unique costs associated with the city's role as our Nation's Capital, a role which includes providing services to the Federal Government and local residents, as well as visitors from all over the country and the world.

H.R. 5595 would raise the amount authorized for the annual Federal payment from \$336.6 million to \$361 million for fiscal year 1983 and each fiscal year thereafter. President Reagan has recognized the need for an increased authorization and passage of H.R. 5595 would enable the Congress to appropriate the full amount requested by the Reagan administration.

I would remind my colleagues that this is an authorization bill, and as such we are not mandating a certain level for the Federal payment. Rather, we are establishing a ceiling on the amount of money the Appropriations Committee can eventually pass on to the District government. And I have a great deal of faith that if this level is not justified, the Appropriations Committee will not appropriate the full amount. This is not just wishful thinking, because history tells us otherwise. We are currently in the eighth fiscal year since the passage of the Home Rule Act. In only two of those years, fiscal year 1981 and fiscal year 1982, has the appropriated Federal payment been the full authorized amount. In the other 6 years, the Appropriations Committee exercised its authority to determine what the level should be, based on the performance of the local government.

While, I was exploring the history of the Federal payment, Mr. Speaker, I came upon another statistic that some should find very enlightening. In the 10 fiscal years prior to the passage of home rule, the Federal payment increased from \$37.5 million to \$187.5 million. That works out to be an increase of 400 percent in the final 10 years when Congress had full control over the operation of the city. Since the passage of home rule, the Federal payment has increased from \$226.2 million to the current \$336.6 million, which works out to an increase of 48.8 percent over the 8 years during which the city has had some form of local autonomy. Apparently, we are expecting more from the locally elected government than we did from ourselves.

Mr. Speaker, I am sure we have all heard that statistics can be made to verify whatever an individual might want them to verify. So that my colleagues can judge for themselves, I in-

clude in the RECORD at this point two tables which bear out the information I have provided in summary form.

FEDERAL PAYMENT TO THE DISTRICT OF COLUMBIA

Fiscal year	Authorization	Appropriation
1975	\$230,000,000	\$226,200,000
1976	254,000,000	248,948,000
1977	280,000,000	276,650,000
1978	300,000,000	276,000,000
1979	300,000,000	250,000,000
1980	300,000,000	276,500,000
1981	300,000,000	300,000,000
1982	336,600,000	336,600,000
1983	361,000,000	(*)

* Proposed.

† Not yet enacted.

Federal payment to the District of Columbia—fiscal year

Pre-Home Rule (Public Law 93-198):	Amount
1964	\$37,500,000
1965	37,500,000
1966	44,250,000
1967	58,000,000
1968	70,000,000
1969	89,365,000
1970	116,166,000
1971	131,000,000
1972	173,654,000
1973	181,500,000
1974	187,450,000
Post-Home Rule (Public Law 93-198):	
1975	226,200,000
1976	248,948,000
1977	276,650,000
1978	276,000,000
1979	250,000,000
1980	276,500,000
1981	300,000,000
1982	336,600,000

The citizens of the District of Columbia have long endured the hardship of being second-class citizens, and it may be that they will never achieve complete home rule. In the time since the Home Rule Act was passed, the Congress has come a long way toward righting the wrongs of past decades. Increasing the authorized Federal payment to a realistic and proper level is one more step in the progression. I urge my colleagues to join me in taking that step.

Mr. FAUNTROY. Mr. Speaker, I move to strike the last word.

Mr. Speaker, I rise in support of H.R. 5595, a bill which will increase the Federal payment authorization. I am pleased to be able to fully agree with the President on this proposal and to be the sponsor of a recommendation by the administration.

The legitimacy of the Federal payment to the District of Columbia is widely recognized and accepted. There is no doubt that the District of Columbia experiences extraordinary costs in running its Government and maintaining the city as a result of the presence of the Federal Government.

This bill is an effort to take into account the spiraling costs of running a government as a result of inflation

and other economic pressures. Indeed, as a percentage of the District's budget, the Federal payment has not kept pace with increased costs, but in fact has decreased.

H.R. 5595 will not correct the steady decline of the Federal payment over the years, but it does provide some relief.

I urge my colleagues to support the President on this bill. Thank you.

AMENDMENT OFFERED BY MR. PARRIS

Mr. PARRIS. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. PARRIS: Page 2, line 8, insert ". Of any funds appropriated for the fiscal year ending on September 30, 1983, under the authorization contained in this section, not less than \$14,300,000 must be paid to the District of Columbia Retirement Board to eliminate any deficits in the District of Columbia Teachers' Retirement Fund and the District of Columbia Police Officers and Fire Fighters' Retirement Fund".

Mr. PARRIS. Mr. Speaker, although in relative terms, this is a fairly small amount of money, compared to what this Congress usually considers, I believe the principle embodied here is very important, and this is a fairly complicated matter. I would hope that my colleagues on the floor, and those who may be watching the proceedings from their offices, will pay close attention to the facts and the debate that will ensue on this amendment.

Mr. Speaker, I have been requested by the District of Columbia Retirement Board to call to the attention of my colleagues the fact that the District of Columbia government presently owes the police officers, firefighters, teachers and judges retirement funds the sum of \$14.3 million. These funds are not moneys owed based on some future actuarial projections. They are, quite simply, back payments that are past due, payments that have not been made as required by law.

On November 17, 1979, the Congress enacted Public Law 96-122, commonly known as the District of Columbia Retirement Reform Act, legislation that created the District of Columbia Retirement Board, with the intention that the District of Columbia government would make regular payments sufficient to adequately fund the retirement plans of those who had devoted their lives to improving the quality of life in our Nation's Capital—the police officers, the firefighters, teachers, and judges.

According to section 142.4 of that legislation, the District government is responsible for funding the retirement plans of those dedicated public servants effective January 1, 1981. However, the District of Columbia Retirement Board advises me that the District government has been deferring the required payments and that a shortfall of \$14.3 million now exists

from fiscal year 1981. Thus arises the need for this amendment.

Public Law 96-122 created the D.C. Retirement Board to manage the investments of the officers and firefighters' retirement funds and to perform a number of other functions including the determination of the amount of each annual payment that the District of Columbia is required to make to the funds under section 142, which I referred to just a moment ago.

The amount of the District payment appropriated for fiscal year 1981 was not, however, determined by the Retirement Board because the Board had not yet at that time come into being when the fiscal year 1981 District budget was first approved by the Congress. Instead, the budget for fiscal year 1981 reflected determinations made by the District government on the basis of an actuarial study performed by the U.S. Treasury Department actuary.

In April of 1981, the Mayor of the District of Columbia publicly acknowledged the existence of a projected shortfall in budgeted District contributions to the three funds of \$23 million for fiscal year 1981. This knowledge provided the District ample opportunity to include an additional payment in the 1981 supplemental budget request, but no such action was taken. Upon learning of the shortfall, the Retirement Board commenced discussion with the District in an attempt to obtain appropriate increases in District payments.

□ 1245

As a result of these discussions, the District government has acknowledged its responsibilities for that portion of the shortfall which is attributable to the fiscal year 1981 cost of the "early out retirement program" adopted by the District in September of 1980. Payment of \$4.89 million for that item was received by the Retirement Board from the District government on May 28 of this year. The balance of the fiscal year 1981 shortfall, approximately \$14.3 million, has not been paid and no agreement as to payment of the balance of this amount has been reached.

The SPEAKER pro tempore. The time of the gentleman from Virginia has expired.

(By unanimous consent, Mr. PARRIS was allowed to proceed for 5 additional minutes.)

Mr. PARRIS. On January 11 of this year, the District notified the Board that the city would pay \$4.3 million toward the remaining shortfall, but only in the event that the fiscal year 1983 increased Federal allocation amount goes from \$336 million to \$361 million, which is, of course, the exact provisions of the bill that we are now addressing.

The fiscal year 1981 shortfall is not an isolated occurrence. A similar shortfall of \$13.1 million occurred in fiscal year 1980 and was paid by the District of Columbia.

Subsequently, the Board was invited by the District to participate in the fiscal year 1982 amended budget process. The Board's actuary estimated that an additional \$14.5 million of payments of the funds should be made for fiscal year 1982. The amount was included in the fiscal year 1982 amended budget at the District's request and is now being paid by the District of Columbia government on a quarterly basis.

The District's conduct in 1980 and 1982 acknowledged that the methodology and the data base for determining payments to the funds had not yet been brought into the kind of alignment which the statute adopted by this Congress anticipated would provide the necessary annual contribution by the District, which together with the employee contributions would make the actual benefit payments.

In the opinion of the Retirement Board's actuary, the fiscal year 1981 shortfall is attributable to basically two factors: First, the U.S. Treasury Department's actuarial calculations were based upon data provided at that time by the District regarding individual members and individual beneficiaries. This data, very simply, was deficient and proved to be inadequate.

Second, in order to project required District payments under the statutory formula, the actuary must make assumptions regarding future cost-of-living increases, salary increases, rates of mortality, disability and termination of employment, the number of new employees and their age, sex and salary rates, and other matters which is, of course, impossible to project exactly.

It is, therefore, the purpose of this amendment, Mr. Speaker, to require that the \$14.3 million, which is the existing shortfall, be set aside to make up for a clearly anticipated shortfall which could have been rectified in the normal budget process of the city, but has not been so done.

The amendment that I have before the House would correct this situation. It would provide for a mandatory payment in accordance with existing law previously adopted by this Congress.

Now, let me make several additional points, if I might, Mr. Speaker.

This is not a matter of home rule. It is a matter of home survival, the survival of the homes and futures of a great many, and I am told approximately 8,500, District of Columbia government retirees who have devoted their lives to public service with the expectation that their government would keep its word and protect their retirement benefits.

It is consistent with the interests of the Federal Government in providing these funds to compensate for the Federal presence in the city. It is a matter of fundamental fairness.

I would suggest, Mr. Speaker, that there are several arguments that we will hear in opposition to this amendment; but before we hear those arguments and before I conclude my statement, let me say that this Member has read in the Washington media over the last 2 months at least seven different public estimates of the financial condition of the District of Columbia from various D.C. officials. Three of them said there is a deficit. Four of them said there is a surplus, and I respectfully submit that nobody really knows what the fiscal situation truly is.

Now, I anticipate that we will hear much about a letter from the mayor of the District of Columbia, which I saw for the first time this morning, and it suggests that there has been an understanding about meeting this shortfall which can and will be accomplished over the next 3 years.

Let me share with you a response to that letter, Mr. Speaker, and I ask unanimous consent that it be included in the Record at this point.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Virginia.

There was no objection.

The SPEAKER pro tempore. The time of the gentleman from Virginia has expired.

(By unanimous consent, Mr. PARRIS was allowed to proceed for 5 additional minutes.)

Mr. PARRIS. The letter to which I refer, Mr. Speaker, is dated August 11, 1982. It is signed by the chairman of the District of Columbia Retirement Board. It is addressed to me and it says in paragraph No. 1:

In response to your question "has the D.C. Retirement Board entered into an agreement with the government of the District of Columbia under which the D.C. government has agreed to pay the entire shortfall of \$14.3 million", the answer is "No."

Mr. Speaker, on July 28, 1982, just 2 weeks ago, the D.C. Employee Retirement Board in order to avert an existing cash shortage voted to use \$6.8 million from its long term investment account to make the August and September 1982, retirement benefits payments to 8,500 retired teachers, policemen, and firefighters in this city. That is unacceptable brinksmanship. That withdrawal represents a cost to the board of \$85,000 a month in earned interest on funds, and if you take the Mayor's suggestion that we should pay this out over a 36-month period, it will represent a \$3 million loss in interest over the next 36 months, or almost 25 percent of the amount of the existing shortfall. To me, Mr. Speaker, that is simply not good economics.

The use of long-term investments for short-term payments compounds the future financial problems of the Board and aggravates the problem of the District and of its retirees and jeopardizes their benefits.

Now, in the Mayor's letter you will see the figure used as \$12.9 million in deficits. That was from an actuarial study made in May of 1981. My amendment carries with it the appropriation of the sum of \$14.3 million and the difference is it was made in September of 1981, just 5 months later, and \$1½ million is the difference between the two studies.

The Retirement Board now reports that the deficit in the D.C. government employees' retirement system will climb to a staggering \$8.8 billion in 25 years.

Under Public Law 96-122, adopted by this Congress on November 17, 1979, section 144(2) paragraph (c) provides that these funds shall be a claim "on the revenues of the District of Columbia", all of the revenues of the District of Columbia to the extent necessary to meet the obligations of the fund. It is a clear, preemptory claim, on all revenues.

Worse than that, section 144(E)(1) requires in the year 2004, which just happens to be the same 25-year period that the Retirement Board just estimated, requires the Federal Comptroller General of the Federal Government to determine "whether the Federal share has been paid in full", and if it has not, to rectify that problem.

Now, Mr. Speaker, I apologize for the length of my observations on this question, but as I indicated to you earlier, I think it is important. After I make just one additional point, I will be delighted to yield to my friend, the gentleman from California.

I anticipate, Mr. Speaker, that we will hear again some argument that this is a question of precedent. There is ample precedent here, I submit. The Federal Government has been requiring States and local jurisdictions to comply with Federal law for 200 years and that is exactly what we are trying to do here. We are trying to suggest to the District of Columbia that it live up to its obligations to comply with the Federal statute that requires the payment of funds into the police officers, firefighters, and teachers retirement funds. There is ample precedence, I think, for that principle. For more than 100 years the Federal Government has been granting Federal funds to States and localities with conditions attached.

The District of Columbia is asking for \$361 million in Federal funds and we are saying, fine, but there is a condition attached.

The SPEAKER pro tempore. The time of the gentleman from Virginia has once again expired.

(By unanimous consent, Mr. PARRIS was allowed to proceed for 2 additional minutes.)

Mr. DELLUMS. Mr. Speaker, would the gentleman yield at that point?

Mr. PARRIS. I will be delighted to yield to my chairman.

Mr. DELLUMS. Mr. Speaker, the gentleman is not suggesting that the District of Columbia is not in compliance with the law, is that correct? I would like to understand what the gentleman is saying here, whether the gentleman is implying they have not complied with the law. If the gentleman is, I would suggest that the gentleman has not read the act. What is the gentleman suggesting?

Mr. PARRIS. I am suggesting to the chairman that the District of Columbia has an unfunded liability for fiscal year 1981 in the amount of \$14.3 million and for almost 2 years it has failed to satisfy that.

Mr. DELLUMS. Mr. Speaker, will the gentleman yield further?

Mr. PARRIS. I would be delighted to yield to the gentleman.

Mr. DELLUMS. I would concur with the gentleman that there has been a shortfall in the funding for fiscal year 1981. That is not at debate. What may be at debate is the figure. The city says \$12.9 million. The gentleman says \$14.3 million. Somebody else says some other figure; but the point is that when you read the act, it says very specifically how you address shortfalls in any given year. It is to be amortized over the life of the act itself.

So No. 1, the District of Columbia is, I would suggest, in compliance with the law as it is laid out. There is nothing in that act that suggests that a shortfall has to be paid in a specific year in a specific way. All it says is that it must be amortized over the life of the act.

No. 2. The gentleman from Virginia is perfectly correct when he states that the basic reason for the shortfall was that the actuary employed by the U.S. Treasury Department made a low estimate, and as a result of that we ended up with a shortfall somewhere between \$12.9 and \$14.3 million, but the fact of the matter is that the District of Columbia paid in that fiscal year 1981 what it was lawfully required to pay; so on both counts I would suggest to my colleague that his implying lack of compliance is something that needs to be straightened out and cleared up on this floor.

The SPEAKER pro tempore. The time of the gentleman from Virginia has again expired.

(At the request of Mr. DELLUMS, and by unanimous consent, Mr. PARRIS was allowed to proceed for 5 additional minutes.)

Mr. DELLUMS. Mr. Speaker, will the gentleman yield further?

Mr. PARRIS. Yes. I would be delighted to yield to the gentleman.

Mr. DELLUMS. So in summary, Mr. Speaker, I am making two points. In fiscal year 1981, the District of Columbia paid what it was lawfully required to pay at that time. We have since determined as a result of the low estimate by the actuary that there was a shortfall in 1981.

Now, the District of Columbia is, indeed, required to pay that shortfall; but if the gentleman from Virginia reads the act, what it says in order for the District to comply is that they must amortize that shortfall over the life of the act itself. It does not in any way suggest that they have to pay in any other way.

So my question to the gentleman is, at what level is the District of Columbia not in compliance with the law?

Mr. PARRIS. Mr. Speaker, I would respond to the gentleman and correct him in just two observations, which are perhaps not terribly important for this purpose, but let me make sure it is done.

As I indicated earlier, the difference of estimates of the deficit is \$12.9 million and my amendment is \$14.3 million, so we are \$1½ million apart.

Mr. DELLUMS. The gentleman's amendment is \$14.3 million, am I not correct? That is what I had suggested.

Mr. PARRIS. The question is roughly \$1½ million as the difference of opinion as to what is in fact due.

□ 1300

Second, I practiced law for about 20 years and I respectfully submit to the gentleman that our interpretation of the act is apparently different than his in terms of the District obligation toward a shortfall. But assuming, for the sake of the argument, that the gentleman is correct about the provisions of the act, that still does not go to my quarrel with this situation.

My quarrel with the situation is that the Retirement Board of the District of Columbia, as I indicated earlier, is in fact now required to go to its long-term investment funds to find short-term cash flow for existing benefits owed currently including this month to retired District of Columbia Government employees. To me, that is fiscal chaos. It is insanity and irresponsible.

Mr. DELLUMS. Mr. Speaker, will the gentleman yield further to me for this colloquy?

Mr. PARRIS. I would be happy to yield to the chairman of the committee.

Mr. DELLUMS. I appreciate the gentleman yielding to me.

Mr. Speaker, I appreciate the comments that the gentleman has made. When you add that to the last part of the gentleman's debate, what he did was to point out the significant problems inherent in the act itself. This

gentleman, and a number of other gentlemen, including the ranking minority member on this committee, stated that when we passed the bill there was an unfunded liability of well over \$1 billion then.

This gentleman said if we are going to fund this pension plan, let us fund it in toto; let us not have over \$1 billion of unfunded liability, and throw that to the District of Columbia, with all of its fiscal problems that we contributed to over time, and then say, "You people, sink or swim on your own," and then we can come back to the floor and be the hero of the employees by saying that the District of Columbia has to earmark these funds.

I would suggest that if we are going to be the heroes of the workers and the heroes of the retired people, then we have to look at this act in a comprehensive fashion.

Just one other point.

The act itself says after there has been some experience with this bill, some time, that we can look back and begin to see the implications of the act itself, it is then time for us to review it. I think that that time is about now.

I think there are a number of issues that we ought to look at.

No. 1, what is the implication of this incredible unfunded liability that we wrote into the act?

No. 2, how do you handle shortfalls over time, over the long term?

The gentleman is correct in trying to deal with 1 year. But what happens if this is a shortfall in more than 1 year?

There are also questions about the procedure of this board and the system and how it works. It would seem to me that we have a responsibility to review it, review the act in a comprehensive way, and if there is a need for us to reform and change the act, we ought to do that in some cogent, intelligent, rational, and analytical way.

I want to help the workers just as much as the gentleman from Virginia does. If the gentleman will go back and read the record, we said then, let us fund this to the tune of over \$2 billion. But my colleagues in the House were being fiscally conservative at that time. You cannot walk both sides of the street. You cannot strip them monetarily and then come back another year and beat them because they do not have the funds. This is a contradiction.

I am saying to the gentleman there are problems in the act itself that we need to look at. I am committed to holding those hearings, and the gentleman can be there and take a lead role in that regard.

I am simply saying that I think his amendment only deals with one aspect of these problems that we need to look at in a total, comprehensive fashion; and No. 2, I appreciate the gentle-

man's motivation. I do not want to say anything that challenges that.

The SPEAKER pro tempore. The time of the gentleman from Virginia (Mr. PARRIS) has expired.

(By unanimous consent, Mr. PARRIS was allowed to proceed for 2 additional minutes.)

Mr. DELLUMS. Mr. Speaker, will the gentleman yield further to me?

Mr. PARRIS. I will be happy to yield to the gentleman from California.

Mr. DELLUMS. I thank the gentleman for yielding.

All I am suggesting to the gentleman is that to imply that the District of Columbia is not in compliance with the law it seems to me is inappropriate. What this gentleman is attempting to say to the House, regarding what the gentleman from Virginia is talking about, is that in 1981 when the District of Columbia made its payment, it was at that time complying with the law because it paid what it lawfully was required to pay. They were in compliance.

No. 2, how do they pay the shortfall? The District of Columbia has suggested that in fiscal years 1983, 1984, and 1985 they will pay the sum of \$4.3 million each year over that 3-year period to handle what they perceive to be the \$12.9 million figure.

Now, if it is \$14.3 million, as the gentleman from Virginia (Mr. PARRIS) suggests, then those figures would have to go up. But the fact that we do not know the difference, whether it is \$12.9 or \$14.3 million, only underscores the point of the gentleman from Virginia, and this gentleman from California, and that is that there are some problems we need to look at in this act.

The fact that you are just now getting to the reality that there is a problem in 1981 only speaks to the budgetary problems of the District of Columbia that we contribute to because we are involved in their lives on a very regular basis.

I thank my colleague for yielding.

Mr. PARRIS. I am delighted to have been able to.

Mr. Speaker, I would respond to my chairman by once again reiterating the fact that the District of Columbia has in fact made up the shortfall which existed in fiscal year 1980 and fiscal year 1982, and I submit that out of a \$2 billion annual budget appropriation, the utilization of \$14 million, less than 3 percent of this Federal contribution this year, for this purpose is not an excessively onerous burden for the District of Columbia to undertake.

For a period of about 22 months, we have seen the spectacle of the Retirement Board and the District of Columbia discussing this problem, but there has been no agreement and there just

might not be one in the absence of this amendment.

Mr. DELLUMS. I thank my colleague for his comments.

Mr. WALKER. Mr. Speaker, will the gentleman yield to me?

Mr. PARRIS. I yield to the gentleman from Pennsylvania.

Mr. WALKER. I thank the gentleman for yielding.

Mr. Speaker, it sounds to me as though this is a rather complicated problem for some of us who are not on the committee, and it becomes even more complicated. Let me see if I can un-complicate the situation.

Is the gentleman adding any money to the authorization here at all? Is there additional money that would have to come from this body in order to approve the gentleman's amendment?

Mr. PARRIS. No. I would say to the gentleman from Pennsylvania that, as indicated by the chairman and by the ranking Republican Member from Connecticut, this appropriation for Federal payment is in accord with the administration request, is consistent with the budget resolution, and my amendment does not add to those funds in any way.

It simply sets aside for this limited purpose a one-time payment of this one-time shortfall.

Mr. WALKER. If the gentleman will yield further, I thank the gentleman for his comments.

Now, if I understood the argument—and it got a little complicated in there—it seemed to me that I was hearing that perhaps if we do not go ahead and do this, that somewhere along the line my taxpayers are going to have to pick up a rather substantial sum of money that the District of Columbia government would owe.

The SPEAKER pro tempore. The time of the gentleman from Virginia (Mr. PARRIS) has again expired.

(On request of Mr. WALKER and by unanimous consent, Mr. PARRIS was allowed to proceed for 3 additional minutes.)

Mr. WALKER. Will the gentleman yield further, Mr. Speaker?

Mr. PARRIS. I would be delighted to yield, but first I want to retreat for just one moment to the argument made by the gentleman from California, the chairman of the committee, Mr. DELLUMS.

This is a photostatic copy of the act which, as you can see, is some 50 pages long and extremely complex in its provisions. It says, among other things, and I quote from section 144 relating to the Federal payment, section E(1): "In the year 2004," which is the same 25-year period that I alluded to in my earlier comments, "the Comptroller General," and that means the Federal Comptroller General, "shall determine whether the Federal share with respect to each fund has been paid in

full by payments made pursuant to appropriations authorized."

The Retirement Board now estimates that the retirement system will have a deficit in that year 2004 of \$8.8 billion. I submit to the gentleman that if it is unreasonable or unlikely that the District of Columbia is going to pay \$14 million, what are the chances of it paying \$8.8 billion in the year 2004?

Mr. WALKER. Mr. Speaker, will the gentleman yield further?

Mr. PARRIS. I yield to the gentleman.

Mr. WALKER. I thank the gentleman for yielding.

Mr. Speaker, I have some Pennsylvania Dutch constituents who admit to themselves that they need to provide retirement benefits for themselves. I think they would have some problem with the idea that at some point they are going to come in and bail out a District of Columbia retirement system that has underfunded itself over a period of time.

It seems to me that that is what I hear the gentleman saying: that if we permit this pattern to continue we are going to end up with massive problems a few years from now that only will be able to be picked up by all of the taxpayers of the country.

Is that what the gentleman from Virginia is really saying?

Mr. PARRIS. Mr. Speaker, I suggest that as a possibility, and I submit to the gentleman from Pennsylvania (Mr. WALKER) that the real motivation for our being here today on this question and on this issue is to try to avert at any cost that kind of a situation.

Mr. WALKER. Mr. Speaker, if the gentleman will yield further, the one way we have of correcting that problem right now is to approve the amendment of the gentleman from Virginia (Mr. PARRIS) to assure that that unfunded liability does not continue to pile up. If, in fact, there was an unfunded liability when we passed the bill, that we do not go any further than that and aggravate the situation by piling onto it.

The gentleman's amendment helps go to that question?

Mr. PARRIS. Mr. Speaker, it does address that question, but I would say in all candor it does not solve the problems of the act, as pointed out by the chairman of the committee (Mr. DELLUMS).

Mr. WALKER. Mr. Speaker, one reason why the Congress did not go along with that payment in the first place is because we did not want to place that burden on the U.S. taxpayers; is that correct?

Mr. PARRIS. That is correct.

I submit to the gentleman this is not a panacea. It will not solve all of the problems of this fund, nor the obligations, of the Congress, but it at least will draw attention: First, to the Dis-

trict of Columbia government that it cannot continue to persist in this position; and second, it will solve at least this limited problem.

The SPEAKER pro tempore. The time of the gentleman from Virginia (Mr. PARRIS) has again expired.

(On request of Mr. DELLUMS and by unanimous consent, Mr. PARRIS was allowed to proceed for 3 additional minutes.)

Mr. DELLUMS. Mr. Speaker, will the gentleman yield to me?

Mr. PARRIS. I yield to the chairman, the gentleman from California.

Mr. DELLUMS. I thank the gentleman for yielding.

Mr. Speaker, I was listening very carefully to the response to the gentleman from Pennsylvania (Mr. WALKER).

First, I am sure that the gentleman from Virginia (Mr. PARRIS) misspoke himself because I am certain that as a matter of fact, he was not trying to suggest, in response to my distinguished colleague on the other side of the aisle, that his amendment has anything to do with the unfunded liability. I am sure that is not what the gentleman from Virginia (Mr. PARRIS) suggested because, first, if the gentleman recalls—and I would like the gentleman from Pennsylvania (Mr. WALKER) to listen to this; it is very complicated and we do not want to look foolish on the floor here—prior to the time we enacted home rule, this was a Federal program, funded by the Federal Government.

After home rule, we enacted this retirement program with a significant unfunded liability, a Federal payment. All right? But the argument by this body was that even though we funded it with this huge unfunded liability which was the Federal share—and I repeat for emphasis—the Federal share, the argument by my more conservative colleagues was that the District of Columbia government can make up this difference with their local funds.

That was indeed the Federal share. Now this gentleman's argument was that we are kidding ourselves. The District of Columbia government cannot function; their expenses are not such that they are going to be able to make up over \$1 billion in unfunded liability. That is a pipe dream.

But my distinguished colleagues know there are many pipe dreams that are dreamed up on the floor of Congress as we engage in enacting legislation. But it has nothing to do with the reality.

So I say in summary, the amendment offered by my distinguished colleague from Virginia (Mr. PARRIS) has nothing to do with the unfunded liability. To me that was a tragic and ludicrous mistake we made a long time ago, back a couple of years ago, when we enacted this law.

But the gentleman's amendment simply does this: It simply says that we earmark some money in what is by law a lump-sum figure to the District of Columbia for a specific purpose, and that specific purpose is to pay \$14.3 million for a shortfall in the funding for the Retirement Board in fiscal year 1981. All right? That is all it does.

Just one additional comment, two points: The way the budget process is so complicated, by the time we found out about this, it was the end of April 1982. So the process itself contributes.

Just one last comment: My colleague from Virginia suggests that in some way the District of Columbia does not know what its funding is, how much the deficit is.

The entire spread of all the potential calculations is \$20 million in a \$2 billion budget. Now, that is 1 percent, 1 percent. If you applied that standard to the Federal Government, do my colleagues realize we would be talking about \$8 billion?

So, if the Federal Government were operating in the same manner that the District of Columbia government is, it would be \$8 billion more deficient.

The SPEAKER pro tempore. The time of the gentleman from Virginia (Mr. PARRIS) has once again expired.

(By unanimous consent, Mr. PARRIS was allowed to proceed for 3 additional minutes.)

Mr. JOHNSTON. Mr. Speaker, will the gentleman yield?

Mr. PARRIS. Mr. Speaker, I yield to the gentleman from North Carolina.

Mr. JOHNSTON. I thank the gentleman for yielding.

Mr. Speaker, as I understand it, if the amendment offered by the gentleman from Virginia passes, this \$14 million, plus or minus a half million dollars, will go immediately into the pension fund. Is that correct? That is, rather than being paid over a 3-year period?

Mr. PARRIS. No.

Mr. Speaker, I would say to the gentleman that we are losing the point here, I think.

In response to the comments of the chairman and in response to the gentleman's question, we are talking about authorization for fiscal year 1983, future authorization authority.

Now, the question is: Can or should the District of Columbia appropriate authorities, that is, the City Council of the District, to make up this amount of money out of fiscal year 1983 moneys, or not? I submit they have a \$2 billion budget and \$14 million to correct this one-time shortfall for the benefit of these retirees is not an exceptional or extraordinary burden.

Mr. JOHNSTON. Mr. Speaker, will the gentleman yield further?

Mr. PARRIS. I will be delighted to yield to the gentleman from North Carolina.

Mr. JOHNSTON. As I understand it, the question, though, is if the money is not put in, in 1983, it will be put in, in 1983, 1984, and 1985 so that it does affect the long-term obligations of the fund because the money will not be there in 1984 and 1985 drawing interest, which, as the gentleman knows, is substantial now.

So, in fact, the absence of that money drawing interest will require other funds to be put in, in lieu thereof. So to say that it does not affect accurately the soundness of this plan is a misstatement.

□ 1315

I will concede that it is not significant when you balance \$2 billion, but of course the Congress of the United States did not get to a \$1 trillion deficit by one single action. It was a combination of a billion here, a billion there, a few hundred million there, and this fund is just like the Congress of the United States.

Mr. PARRIS. I appreciate the gentleman's comments. If I might just complete my statement, Mr. Speaker, we are saying that of the \$361 million that will be provided in Federal funds for the District of Columbia in fiscal year 1983, there is a condition attached: "You must use a part of this money to pay the legal obligations that you have neglected for almost 2 years."

That is the simple issue in this matter. Finally, Mr. Speaker, the argument is made that we should not offer this amendment to this legislation. We should not condition the use of these funds under this legislation, that we should condition the use of the appropriation of these moneys in the appropriation process. I submit to you, Mr. Speaker, that we have heard from the chairman of the Appropriations Committee, the gentleman from Mississippi, a 100 times on the floor: "Do not ask the Appropriations Committee to legislate. Do not ask us to make these decisions that we do not know anything about, other than fiscal. Bring these matters in the authorization legislation to us so that we can appropriate the appropriate sums."

That, Mr. Speaker, is what I am attempting to do. I think this matter should be settled under authorization, and that is my purpose in being here today.

The simple question is that this Government so far has failed to comply with a clear mandate from this Congress, a mandate that is in existing law and has been so for almost 4 years. This is a one-time, one-amount shortfall. This action will correct a serious inequity which will probably not be corrected otherwise in the near future, which I think is fiscally unsound. I

think it will go a long way toward making the benefits of the thousands of retired District of Columbia employees more secure. It is, in my opinion, an amendment that should be adopted, and I hope my colleagues will support it.

Mr. McKINNEY. Mr. Speaker, I rise to speak against the amendment.

While I am sympathetic to the concerns of the gentleman from Virginia (Mr. PARRIS), and agree that he has focused attention on a problem in the proper financing of the District of Columbia retirement funds, I am opposed to his amendment on this bill for several reasons.

First, the amendment is contrary to the very nature of the Federal payment. There has never before been an earmarking of the Federal payment in the authorization process. Rather, the level recommended is the result of a consideration of the net impact of the Federal Government on the local community, after taking into account all of the various positive and negative factors. In our one major concession to true homerule, the Federal payment is granted with no strings attached. When special needs have been identified, such as reimbursement for water and sewer use by the Federal Government, or the Federal contribution to these same retirement funds, specific payments have been authorized in addition to the regular Federal payment. To change that procedure, as this amendment would, not only ignores the practice of the past 9 years, it rejects the basic principle of homerule and undermines the basis of the Federal payment.

Second, the gentleman is certainly aware that there is major legislation dealing with the retirement systems of the District of Columbia (Public Law 96-122). This legislation outlines exactly how the local and Federal contribution to the retirement funds is determined. If there is a shortcoming in the manner in which the local contribution is handled, it would seem to me much more appropriate to amend Public Law 96-122 than the bill currently under consideration. In addition, the District of Columbia Retirement Board has had under consideration a series of amendments which I trust will come before the Congress next year if not sooner. I would be happy to join the gentleman from Virginia in requesting the chairman of the District of Columbia Committee to hold hearings on this matter to consider any and all changes needed in the operation of the District of Columbia retirement funds.

Next, I would remind the gentleman of my earlier statements concerning the work of our colleagues on the Appropriations Committee. We have relied on that committee to pass final judgment on the appropriate level for

the Federal payment. At times, that committee has found it necessary to force the city to take certain actions by earmarking the Federal payment. This occurred once when the city indicated that it did not intend to make required payments to the Federal Bureau of Prisons and St. Elizabeth's Hospital. Also, that committee has many times found it necessary to severely restrict the use of funds, whether from local sources or Federal sources. Most recently, in action on the fiscal year 1982 supplemental, the city was strongly reminded that the \$10 million budgeted for elimination of a portion of the accumulated deficit was to be used for that purpose only, not as a cushion against local revenue shortfalls.

So I would say to the gentleman that if earmarking of funds is deemed to be necessary in order to insure the city lives up to its commitment with regard to retirement funds, it should be considered in the appropriation act, not in this authorization bill.

Finally, I would remind all of my colleagues that just last year we passed a bill eliminating the technical impediments to the issuance of bonds by the District of Columbia (Public Law 97-105). One provision of this act requires the Mayor to use the Federal payment to pay bondholders in the unlikely event that no other resources are available for that purpose. If we now decide to get into the practice of earmarking the Federal payment whenever a problem arises, a cloud of uncertainty will be hanging over any bonds offered by the city.

For all of these reasons, I submit that the proposed amendment, while trying to contribute to the financial soundness of the city, will instead do great harm to the overall financial health of the city.

Mr. Speaker, as I said, I am very sympathetic to the concerns of the gentleman from Virginia. I can certainly understand that any collapse of the pension program would have a severe effect on the constituents of his district. But, I would have to suggest to the House that in seeking a remedy he is taking exactly the wrong tack.

First off, we set a historical precedent—a dangerous precedent if we try to direct or allocate the Federal payment. There has never been an earmarking of the Federal payment in the history of the U. S. Congress in an authorization bill. It has always been left up to the Appropriations Committee to appropriate a justified Federal payment, and in fact if this amendment were to pass, there is nothing that says the Appropriations Committee has to put that line item in the District of Columbia budget. In fact, they could simply leave that line item blank and it would therefore not be funded.

The gentleman from Virginia has suggested to us that in fact the chairman of the Appropriations Committee would say that he will not legislate on appropriations bills. That is perfectly true. But a line item change or an earmarking of funds in the budget of the District of Columbia by the Appropriations Committee is not legislating. Many times, the Appropriations Committee has thrown in a number of dollars for this and taken a number of dollars away from something else. All they simply have to do is to put in a budget line item that says \$14.3 million, \$12.9 million, \$13.6 million. Perhaps by the time they get to the Appropriations Committee, somebody will know what the figure is.

The real problem here, I suggest to the gentleman from Virginia—and I spoke to the chairman about it—is the fact that we have Public Law 96-122, which is not good legislation. We knew when we passed that legislation that we were passing one of the most complicated types of legislation that can possibly be written—pension legislation. They have lawyers that make \$500,000 a year in New York City just to try and write the actuarial tables and figure out the logistics, out-forward movements in the pension process. It obviously has got to be brought back in front of the authorizing committee and changed.

That is the second place where what the gentleman wants to do should be done—in the rewrite, the amending, the review of Public Law 96-122.

I would also suggest to the gentleman that saying that the District of Columbia government has not complied with the law is inaccurate, incorrect, and wrong. They have complied exactly with the letter of the law—exactly. What is the problem? Public Law 96-122 is flawed, and if it is brought before the committee, which the chairman assured me he would do, I would move to insist that the District of Columbia pay the unfunded liability on a yearly basis rather than having the Pension Board go into their trust fund and take it out. That is the real problem.

The gentleman and I, and I think the chairman, are very disturbed by the fact that they are dipping into the fund, and that we feel it is absolutely necessary to fund this through local revenues. But let me tell the gentleman, the unfunded pension liabilities of the city of Washington were founded by the Congress, built by the Congress, made by the Congress, and on this very floor in 1938, I believe it was, one of our astute former colleagues—probably now long gone from the scene—stood up on the floor of the House and amended all our funding from the pension program of the District of Columbia. He said, "The tax revenues of the city will take care of it," and that money was thrown into

the general fund of the United States of America, and the funding for all of our pension programs disappeared. I would hope some of the Members would have their staffs or the Congressional Research Service find that debate, or I will send them that debate.

So, that is what we are talking about. We are talking about a bill that does not operate quite properly. We are talking about a bill that is obeyed by the District of Columbia. We are talking about a bill that has a problem that would not be taken care of by the gentleman's amendment until fiscal year 1983. We are talking about a problem that should be taken care of either in a reauthorization and amending of the bill, and most definitively soon, or in the appropriation process where the line item is put in for the payment of the figure.

The SPEAKER pro tempore. The time of the gentleman from Connecticut has expired.

(At the request of Mr. PARRIS and by unanimous consent, Mr. McKINNEY was allowed to proceed for 1 additional minute.)

Mr. PARRIS. Mr. Speaker, will the gentleman yield?

Mr. McKINNEY. I yield.

Mr. PARRIS. The gentleman indicated in his remarks that the District of Columbia Retirement Reform Act of 1979 "is not good legislation," and is "flawed."

I would remind the gentleman that that act was adopted when my predecessor was a Member of the Congress and a member of the committee that adopted it and supported its adoption. I was not a part of that, and I agree with the gentleman that it is flawed and it is not good legislation. I think my predecessor perhaps would agree with that point of view by now because everybody else seems to.

Mr. McKINNEY. If the gentleman will give me back my time, I hope they are watching on channel 14 and channel 53. I understand the gentleman's point. I would also suggest to the gentleman that the only pension legislation I have seen that is worse than this one is the Federal pension legislation that governs every Federal employee in the United States of America.

Mr. PARRIS. I would just add that it was my pleasure to serve in the Congress when we adopted the Home Rule Act in 1973. That act I think is good legislation. But, we do need in fact to revise and review the Retirement Act which is not good.

Mr. FAUNTROY. Mr. Speaker, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Before I do that, I want to remind the gentleman from Virginia that he was in fact here in 1973 when we

passed the home rule charter, and voted against it.

Mr. PARRIS. Will the gentleman yield?

Mr. FAUNTROY. Against all of the—he supported all weakening amendments and supported on final passage. I am pleased to correct myself.

Mr. PARRIS. I appreciate that. I am confident the gentleman does not want to be in error in the CONGRESSIONAL RECORD. I did in fact vote for the final passage of the Home Rule Act in 1973 and worked extremely hard on that particular piece of legislation.

Mr. FAUNTROY. Yes, after having attempted to weaken it at every point possible.

Mr. Speaker, I rise in opposition to the amendment on the basis, first, of the fact that the Mayor has in fact agreed with the OMB and with the Pension Board to amortize this debt over a 3-year period, and I would hope the gentleman from Virginia would support his President and support his OMB in allowing the Mayor to carry out that commitment.

I would like at this point to enter into the RECORD a letter from the Mayor dated August 10, in which he reaffirms, and I quote:

We made a commitment to pay off the \$12.9 million fiscal year 1981 shortfall between income and expenditures through installments of \$4.3 million for three years.

That is from the Mayor, and on that basis I think we ought to recognize that this matter is being dealt with in an appropriate manner.

Second, it is clear that the Pension Board is already impacted to require the District of Columbia government to make payments as determined by an actuary appointed by the Pension Board. The Mayor in his letter of August 10 indicates that he is in complete compliance with the request of the Pension Board in this regard. I would certainly hope, finally, that this amendment would be opposed for the reason that it does establish, as the gentleman from Connecticut has already indicated, a precedent that certainly we do not want to establish in this Congress. Never in the history of this Congress has the Federal payment been earmarked, as this gentleman's amendment would have it earmarked.

I would hope that upon defeat of this amendment, the gentleman from Virginia would in fact take up the offer of the chairman of the committee and the ranking minority member of the committee to correct some of the flaws in the bill as originally passed.

Mr. PARRIS. Mr. Speaker, will the gentleman yield?

Mr. FAUNTROY. I will be happy to yield.

Mr. PARRIS. In response to the gentleman's latter point, I would agree to work diligently in attempting to correct the inadequacies of the Retirement Act wholeheartedly, but that does not address the problem we are debating here today. In response to the gentleman's observations about the Mayor's letter of August 10, that precipitated my call to the Chairman of the District of Columbia Retirement Board, which I read and inserted in the RECORD earlier. I did not receive a copy of the Mayor's letter, as I stated earlier until this morning, but, I had been told that there was an agreement, and I went to the Board itself and said, "Is there in fact an understanding?"

As I indicated to the gentleman earlier, the answer was, "No, there is not."

Mr. FAUNTROY. As I was about to indicate, the gentleman has the letter from the Mayor, and it indicates that the District government has made a commitment to pay off the \$12.9 million over a 3-year period.

Mr. PARRIS. Will the gentleman yield further?

Mr. FAUNTROY. I will be happy to. Mr. PARRIS. But in the pertinent point, and I read from the letter in part, it says and I am reading now from the letter of the Mayor of the District of Columbia dated August 10:

The law requires that the Mayor include in his annual budget the full amount as certified by the Board's actuary.

Nobody disagrees with that. It continues:

Each year since the inception of the plan we have done this, and in fiscal year 1982 and fiscal year 1983 we did more.

Nobody quarrels with that either. We are, however, discussing the shortfall for fiscal year 1981, which is not dealt with in that part of the Mayor's letter.

Mr. FAUNTROY. To be sure, let me read it for the gentleman, and he has it in his hand:

In addition to this, we made a commitment to pay off \$12.9 million fiscal year 1981 shortfall between income and expenditures through installments of \$4.3 million for three years.

□ 1330

The SPEAKER pro tempore (Mr. ECKART). The time of the gentleman from the District of Columbia (Mr. FAUNTROY) has expired.

(On request of Mr. PARRIS, and by unanimous consent, Mr. FAUNTROY was allowed to proceed for 1 additional minute.)

Mr. PARRIS. Mr. Speaker, if the gentleman will yield, I will make only one brief point, and that is to reiterate that there is apparently and has been a gigantic communication failure between the Mayor of the District of Columbia and the Chairman of the Retirement Board, and that is precisely

the reason we are here today discussing this matter. The day after the Mayor's letter the Chairman writes a letter that says there is no understanding for the fiscal year 1981; the Mayor says there is. A direct contradiction.

Mr. FAUNTROY. Precisely.

Mr. PARRIS. I merely suggest that the District of Columbia should comply with the requirement that exist in the present applicable law, make up this shortfall, and let us be done with it.

Mr. FAUNTROY. Mr. Speaker, the District has done that, and we have the Mayor's commitment on the record, and that says that with the \$4.3 million in the next 3 years, that will be retired.

Mr. BLILEY. Mr. Speaker, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Speaker, in the almost 2 years that I have served on the Committee for the District of Columbia I have seen growing evidence of unfortunate and unwise attempts to play political games with the District's finances. I am referring to the actions of the District government regarding their budget and their financial responsibilities. Disregarding for the moment the famous case of the disappearing deficit of last year and the reappearing deficit this year and the famous bonds for operating deficit scheme we are now faced with another problem that affects real people and demands our immediate attention.

The District government has an acknowledged unfunded obligation of over \$12 million to the retirement funds of its police, firefighters, and teachers. There has been great reluctance on the part of the District to make good on this commitment and to insure the future benefits of its retirees. The Retirement Board has tried to work with the District, but to no avail. In a desperate attempt to remain solvent and get the money it is owed, so that it can maintain its growth and payment schedule, the Board is now asking for congressional help to solve this problem.

I am reluctant to support a restriction such as this on the Federal payment, however, I believe that the need is both urgent and critical. The Congress is the body of final decision for the District of Columbia. Along with our desire and obligation to increase the independence and local responsibilities of the District government we must consider our responsibilities under the Constitution. As the final authority we cannot and must not fail to act to correct a failure of the District government.

I am supporting and will vote for the amendment to require the proper funding of the pension plans. The

people who have faithfully served the District deserve no less and I will not abandon them and allow the District to use their retirement money to bail itself out of temporary problems of its own creation. The District must realize that its employee obligations are not fiscal footballs to be kicked around the field.

Mr. DELLUMS. Mr. Speaker, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Speaker, I would assume that we probably will be closing debate momentarily on this matter, and I would like to summarize for my colleagues where we are.

My distinguished colleague, the gentleman from Virginia (Mr. PARRIS), has perceived a problem, and that is a shortfall in the funding of the pension plan for fiscal year 1981. The gentleman pitches that figure at \$14.3 million. There is some question about whether that is an appropriate figure. As I stated earlier in the debate, the District of Columbia comes up with a figure of \$12.9 million.

The only reason I make this point is to simply underscore the fact that we do have some problems that flow from the organic legislation itself to which my distinguished colleague, the gentleman from Connecticut has already spoken, Public Law 96-122.

Mr. PARRIS. Mr. Speaker will the gentleman yield?

Mr. DELLUMS. I yield to the gentleman from Virginia.

Mr. PARRIS. Mr. Speaker, I appreciate the gentleman's yielding, I do not mean to interrupt the gentleman's train of thought, but I rise to correct a misstatement I made in my earlier comments.

I transposed a figure. My mathematics was in error when I misspoke and said that there was a half million dollar difference in deficit estimates. The fact is there is a million and a half dollar difference between the Mayor's figure of \$12.9 million and my amendment's figure of \$14.3 million.

I would remind my colleagues, however, that the amendment is correct and the figure of \$14.3 million is correct although my earlier spoken comments were erroneous. The fact is, that the difference was that the Mayor's deficit estimate was made by the actuaries in May 1981; my figures and the Board's deficit estimate were made in September 1981.

Mr. DELLUMS. Mr. Speaker, I thank my colleague, the gentleman from Virginia.

Mr. Speaker, \$14.3 million is the request of my colleague, the gentleman from Virginia, that it be earmarked in the Federal payment for fiscal year 1983 to pay off the shortfall in the pension plan for fiscal year 1981.

I rise in opposition to that amendment, first raising the home rule issue.

As my colleague, the gentleman from Virginia, and my colleagues in the House know, my position on the matter of home rule is that we must preserve and protect the integrity of the right of people at the local level to make their own determinations where those determinations do not affect the Federal interest. So any time that we instruct the residents of the District of Columbia, we ought to be very thoughtful about what we do with respect to the principle and the integrity of home rule, which is an inherent part of our approach to democracy as we have defined it in the act that we passed in 1973.

The reason why I raised the Home Rule Act is that the Federal payment is a lump-sum figure. Now, many people talk about the Federal payment in earmarked terms, but in a strict technical sense it is not an earmarked figure. It is a lump-sum payment, not an earmarking. Therefore, to talk about earmarking funds in this lump-sum payment is in my estimation violative of the principle of home rule.

Now, that is the No. 1 argument, that we violate the legislation, the spirit and the intent of the act that we passed several years ago.

Now, I would say to my colleague, the gentleman from Virginia that if he wants to violate the Home Rule Act, then this is not the best way to do it. I would say to my colleagues that if they want to violate the Home Rule Act and earmark funds for the shortfall in 1981, they should do it in the appropriation process, not in the authorization bill, because the Appropriations Committee regularly and routinely earmarks funds because they have the capacity to review and act upon each line item in the District's budget.

Therefore, if I may have the attention of my colleague, the gentleman from Virginia, I would say that I suggest we not put that in this amendment. What I am simply suggesting is that if he wants to go beyond the spirit and the intent of the Home Rule Act, it is not appropriate to argue our assertion that we ought to do it in the appropriations process and not in the authorizing bill and that is suggesting in some way that we ought to legislate in the appropriations bill, because the gentleman well knows that the Subcommittee on the District of Columbia of the Appropriations Committee routinely reviews each line item of the District of Columbia budget, and routinely and regularly inserts into the appropriations process line items on how aspects of that Federal budget are to be expended.

The SPEAKER pro tempore. The time of the gentleman from California (Mr. DELLUMS) has expired.

(By unanimous consent, Mr. DELLUMS was allowed to proceed for 5 additional minutes.)

Mr. Speaker, to suggest that it be done in the appropriations process, it seems to me, does not violate the Home Rule Act. It certainly allows us to violate the Home Rule Act in a much different way that is consistent with what this House has done over a long period of time. To do it in the authorization process, as I said, allows us to move away from a lump-sum figure and start to earmark, and I think that is a road down which we ought not to travel.

The third point is that I do not agree with my colleague, the gentleman from Virginia, that the District of Columbia government has not been in compliance with the law. As my colleague knows and as my two distinguished colleagues on this side of the aisle know, this is a nation of laws. The corporation counsel on the record has interpreted the act to say that the Mayor of the District of Columbia government is not obligated at all by the law to pay the shortfall in the unfunded liability except as otherwise referred to in the legislation, and that is to pay for it over the lifespan of the law, that is, to amortize over a long period of time.

Now, we are either a nation of laws or we are not. The Mayor must look to his legal counsel and his legal counsel has said their interpretation of the act is that they do not have to do it. But even if the corporate counsel made that interpretation, the District of Columbia in good faith, I say to my colleague, the gentleman from Virginia, it is saying, "we are prepared to pay it in 3 years, although our own counsel suggests that we are not violative of the law if we don't do it in any other fashion than to amortize."

So in good faith, this District of Columbia government is saying that in fiscal years 1983, 1984, and 1985 we will pay the \$4.3 million, or whatever it is—and if the gentleman is correct, then it would have to be modified in that fashion—over a 3-year period.

Finally, Mr. Speaker, I would simply underscore that Public Law 96-122 is a very complicated and flawed piece of legislation, and it needs to be looked at. The act itself said, "Let us take some time, let us have some experience with it."

So let us have them back up and review it, and if it needs to be changed, let us do it.

My colleague, the gentleman from Connecticut, and other members of the committee are more than committed at this moment to hold comprehensive hearings and look at this legislation and make whatever appropriate reforms have to be made. This is a very complicated piece of legislation. We only started this in 1981, and here we are in 1982. Let us look comprehensively at it.

I do not in any way challenge the motives of my colleague. He has a perfect and correct right to challenge and advocate on behalf of his constituency. I am simply saying that that is what all of us are here to do. I am saying that the best way to do that is to do it in a comprehensive fashion. Let us not violate the principle of the Home Rule Act. If we are going to do it, let us do it in a way that is at least more efficient, and that is through the appropriations process. We do not have the mechanism to engage in a line item review in an authorization committee, and I do not think we should get into that area.

Finally, Mr. Speaker, I would hope that we would even go far beyond this one aspect of the problem that my colleague raises and look at it in a comprehensive fashion and bring whatever changes on this floor need to be made. Many of us knew that when this bill was passed, but we did what we often have to do around here, and that is to swallow hard, hold our noses, and punch eyes for the legislation in the hopes that down the road some intelligent body will decide that there needs to be reforms made in some appropriate fashion.

So, Mr. Speaker, in conclusion, I am asking that we oppose this amendment and I suggest that there is a more efficient and effective way to address the problem.

Mr. JOHNSTON. Mr. Speaker, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Speaker, I find it appalling that an actuarial error that occurred back in 1981 can put in jeopardy the pensions of thousands of firefighters, policemen, and teachers in the District of Columbia. The fact is that a contribution that should have been made was not made due to an error. We are not attempting to assess blame here, but the fund is being denied the use of that \$14 million and the interest accruing thereon because the money is not in there. As long as it is not in there, it will not get the interest yield and it will continue to do exactly what it has had to do—rob Peter to pay Paul.

I will admit that the Congress has given the District government a very poor example when we authorized the old-age and survivors benefit fund to start raiding the fund for the disability income and the medicare program. However, I think the Congress is in very much the same position I was in when I was trying to raise my children and said, "don't do what I do, do what I say."

That is exactly what we are saying to the District of Columbia. There is a right way and a wrong way to fund these programs. It is an error that occurred, and there is \$14 million that is not there. As long as that \$14 million

is not there, sometime somewhere down the line the taxpayers of the United States—and I am talking about the people from North Carolina, I am talking about the people from Wisconsin, I am talking about the people from California—are going to have to pay that interest that is not accruing on \$14 million because it is not there.

Now, I quote to you from this letter, which is a very candid letter, that the Mayor wrote to the distinguished leader of the District of Columbia Committee, and I think it pretty well covers the situation:

While we are meeting our commitment under the law, I assure you that the funding needs of this program in a few years will outstrip the District's ability to pay. In contrast to the 100-percent growth in cost to the District, the Federal contribution has been a level payment of \$52 million per year. Action must be taken now to reopen discussions aimed at modification of the Federal contribution to the pension plan.

□ 1345

So he is already telling us he is going to come back to us and ask for more money, yet he wants to keep that \$14 million from earning the interest that will lower what he is going to come back and ask us for.

Mr. DELLUMS. Mr. Speaker, will the gentleman yield?

Mr. JOHNSTON. I yield to the gentleman from California.

Mr. DELLUMS. I appreciate my colleague yielding. We often do not agree because we stand in two different ideological camps, but I respect my colleague because he often argues in an earthy fashion and urges arguments that create an image that this gentleman can understand very clearly.

So within the framework of that kind of atmosphere that I hope we have established for the moment, let me ask the gentleman this question: What makes the gentleman believe that it is not also in the best interests of another group of politicians, not unlike ourselves, at the District of Columbia level, to keep their employees happy, to keep their votes coming in?

What makes the gentleman think that because we rise to the lofty Chamber of the Congress of the United States that we have ascended to the heaven of politicians and that public figures at the District of Columbia level are not as interested in paying the unfunded liability for their hard-working employees, just as my distinguished friend wants to do?

What makes him think we have locks on integrity with respect to politicians?

Mr. JOHNSTON. Is my distinguished colleague suggesting we are translating an economic matter to the level of political circumstance?

Mr. DELLUMS. I am not suggesting that.

Mr. JOHNSTON. Or something like that?

This is an economic matter. The interest either is accruing or it is not accruing.

Mr. DELLUMS. What I am saying is that all of us see the economics and the economic problem, and all I was trying to do in injecting a little bit of humor into this debate with my colleague is to say that we have to also respect the intellect and the capacity of the locally elected officials to see what the gentleman sees, and that is, there was an unfunded liability in 1981. It needs to be paid off.

They are suggesting paying it off over a 3-year period of time.

They are in compliance with the law.

It would seem to me what we ought not to want to do, I would say to my colleague, is to squeeze this branch of Government. If they are saying this is the best way they can pay it, over a 3-year period, because it would hurt from a financial point of view to try to do it in 1 year, then why do we not give them the latitude to do that within the framework and the spirit of the Home Rule Act?

That is all I am saying.

Mr. JOHNSTON. If I may reclaim my time, what the chairman is suggesting is that we reward the politicians of the District at the expense of all of the taxpayers in the rest of the country. I just do not regard that as innately fair.

I might add that I do not expect to get any votes from any firefighters, any teachers, or any policemen from the District of Columbia. I am not running in an adjacent area.

The SPEAKER pro tempore. The question is on the amendment offered by the gentleman from Virginia (Mr. PARRIS).

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. DELLUMS. Mr. Chairman, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 221, nays 181, answered "present" 1, not voting 31, as follows:

Mr. WILLIAMS of Ohio and Mr. PATTERSON changed their votes from "yea" to "nay."

Messrs. PORTER, SAM B. HALL, JR., and ZEFERETTI changed their votes from "nay" to "yea."

So the amendment was agreed to.

The result of the vote was announced as above recorded.

● Mr. DIXON. Mr. Chairman, I rise in support of H.R. 5595, which authorizes an annual Federal payment of \$361 million to the District of Columbia government beginning in fiscal year 1983.

Let me say to the Members that the modest increase provided by this bill is very much in order. The Federal payment authorization in 1978—almost 6 years ago—was \$300 million, and since that time there has been only one increase, and that was to \$336.6 million. So while the Federal payment authorization has increased by 12.2 percent, the overall rate of inflation since 1978, according to the Federal Bureau of Labor Statistics, has been 48.8 percent, or four times greater. If this bill were to authorize a Federal payment to keep pace with reality and provide the buying power equivalent to the 1978 authorization, it would provide a Federal payment of \$446.4 million instead of the \$361 million we are considering today.

Mr. Chairman, even with the increase that the bill now before the House provides, the Federal Govern-

ment's share of the District's operating expenses in 1983 will be lower than it was in 1978 when the Federal payment represented one-fourth of the District's operating expenses. In 1982 it represents a little more than one-fifth, or 21 percent, and will drop to 19 percent in 1983 unless the committee's bill is approved. And even with the increase to \$361 million which H.R. 5595 provides, the Federal payment will be down to 20 percent of the District's operating budget in 1983 as compared to 24 percent in 1978.

My colleagues are well aware of the New Federalism concept that is being advanced by the present administration and the consequences of that concept which State and local governments throughout the Nation are experiencing in the form of reduced Federal assistance. The District of Columbia government is faced with those same reductions, and in order for the city to meet its obligations not only to those who call the District their home and earn their livelihood here, but also to the millions of visitors who come to the Nation's Capital every year, it is only fair that the Federal Government pay its share.

Mr. Chairman, I urge my colleagues to approve this bill as reported by the committee. It is not largesse; it is a matter of simple equity.●

● Mr. COLLINS of Texas. Mr. Speaker, I rise to strongly oppose H.R. 5595. This bill represents an injustice to the American taxpayer whom this Congress promised last year that it was ready to hold the line on Federal subsidies to the District of Columbia. This bill would increase the Federal payment to the District by \$24.4 million. Only last year the Congress froze the Federal payment for the District at \$336.6 million for future fiscal years. We are now asked to approve a bill that would increase that amount to \$361 million. I believe that the time has come to finally draw the line on Federal outlays for the District of Columbia and urge my colleagues to join with me in opposing this bill.

Before we discuss the merits of H.R. 5595, let us put the issue into perspective. Very simply, the District is subsidized by the American taxpayers in a disproportionate and unfair manner. Look at the facts. The District has received a disproportionate amount of Federal funding as compared to the other 50 States. For example, the District of Columbia pays 32 cents in taxes for every Federal dollar that it gets back from Washington—a massive subsidy at best. By contrast, my home State of Texas pays \$1.40 for every dollar that it gets back from the Federal Government. Since 1968, the annual Federal payment to the District of Columbia has increased by almost five times, from \$70 million to the current \$336 million. While the

American taxpayer increasingly subsidizes the District, the District of Columbia has demonstrated a lack of sound fiscal management. It is currently running a huge \$309 million deficit. Many States, Texas included, mandate that their government operate within a balanced budget.

Look at some more indications of the District's poor fiscal management. According to last year's report from the Appropriations Committee on the District of Columbia, the District of Columbia has had a steadily declining pupil enrollment in its public school system and high per-pupil cost. The enrollment has dropped from 145,000 in 1969 to approximately 94,000 last year. Yet it costs the District \$3,203 a year to educate one child, while the Dallas school system spends only \$2,306 per student. Unfortunately, the academic results achieved by the District of Columbia are far below those realized by the Dallas system.

Another example of unsound fiscal management is the District's public assistance programs. The District has a 13-percent error rate in its welfare programs; \$11 million is being paid to ineligible recipients, and this does not even take into account wrongful payments in medicaid, food stamps, and social service programs.

Finally, it is important to point out that this payment represents only a portion of the approximately \$1.1 billion available to the District of Columbia from the Federal Government. The District also receives Federal grants, reimbursements, contributions to the city's employees' retirement funds, and loans for capital outlays.

I urge my colleagues to take a stand against the spiraling budget outlays for the District of Columbia. Vote against this bill and for fiscal responsibility. ●

Mr. DELLUMS. Mr. Speaker, I move the previous question.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the bill. The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

RECORDED VOTE

Mr. WALKER. Mr. Speaker, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 279, noes 122, not voting 33, as follows:

Mr. TAUKE changed his vote from "aye" to "no."

Mr. CRAIG and Mr. LEVITAS changed their votes from "no" to "aye."

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. DELLUMS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks, and to include extraneous matter, on the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. DELLUMS. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 2457) to amend the District of Columbia Self-Government and Governmental Reorganization Act to increase the amount authorized to be appropriated as the annual Federal payment to the District of Columbia, and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 2457

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 502 of the District of Columbia Self-Government and Governmental Reorganization Act (D.C. Code, sec. 2501d) is amended by striking out "and for the fiscal year ending September 30, 1982, and for each fiscal year ending after September 30, 1982, the sum of \$336,600,000" in the first sentence and inserting in lieu thereof "for the fiscal year ending September 30, 1982, the sum of \$336,600,000; and for the fiscal year ending September 30, 1983, and for each fiscal year ending after September 30, 1983, the sum of \$361,000,000".

MOTION OFFERED BY MR. DELLUMS

Mr. DELLUMS. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. DELLUMS moves to strike all after the enacting clause of the Senate bill, S. 2457, and to insert in lieu thereof the provisions of the bill, H.R. 5595, as passed by the House, as follows:

That section 502 of the District of Columbia Self-Government and Governmental Reorganization Act (D.C. Code, sec. 47-3406) is amended by striking out "and for the fiscal year ending September 30, 1982, and for each fiscal year ending after September 30, 1982, the sum of \$336,600,000" and inserting in lieu thereof "for the fiscal year ending September 30, 1982, the sum of \$336,600,000; and the fiscal year ending September 30, 1983, and for each fiscal year ending after September 30, 1983, the sum of \$361,000,000".

Of any funds appropriated for the fiscal year ending on September 30, 1983, under the authorization contained in this section, not less than \$14,300,000 must be paid to the District of Columbia Retirement Board to eliminate any deficits in the District of Columbia Teachers' Retirement Fund and the District of Columbia Police Officers and Fire Fighters' Retirement Fund.

The motion was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed.

A similar House bill, H.R. 5595, was laid on the table.

PERMISSION FOR COMMITTEE ON ENERGY AND COMMERCE TO SIT DURING 5-MINUTE RULE TODAY AND TOMORROW

Mr. SHARP. Mr. Speaker, I ask unanimous consent that the Committee on Energy and Commerce be allowed to meet during the 5-minute rule on today and tomorrow.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana?

There was no objection.

PROVIDING FOR CONSIDERATION OF H.R. 6100, NATIONAL DEVELOPMENT INVESTMENT ACT

Mr. LONG of Louisiana. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 539 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 539

Resolved, That upon the adoption of this resolution it shall be in order, section 402(a) of the Congressional Budget Act of 1974 (Public Law 93-344) to the contrary notwithstanding, that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 6100) to amend the Public Works and Economic Development Act of 1965 and the Appalachian Regional Development Act of 1965, and the first reading of the bill shall be dispensed with. After general debate, which shall be confined to the bill and shall continue not to exceed one and one-half hours, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Public Works and Transportation, the bill shall be read for amendment under the five-minute rule. It shall be in order to consider the amendment in the nature of a substitute recommended by the Committee on Public Works and Transportation now printed in the bill as an original bill for the purpose of amendment under the five-minute rule, said substitute shall be considered for amendment by titles instead of by sections, and each title shall be considered as having been read, and all points of order against said substitute for failure to comply with the provisions of clause 5, rule XXI are hereby waived. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the committee amendment in the nature of a substitute. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions. After the passage of H.R. 6100, the House shall proceed, section 402(a) of the Congressional Budget Act of 1974 (Public Law 93-344) to the contrary notwithstanding, to the consideration of the bill S. 2144, and it shall then be in order in the House to move to strike out all after the enacting clause of the said Senate bill and to insert in lieu thereof the provisions contained in H.R. 6100 as passed by the House.

The SPEAKER pro tempore. The gentleman from Louisiana (Mr. LONG) is recognized for 1 hour.

Mr. LONG of Louisiana. Mr. Speaker, for purposes of debate only, I yield the customary 30 minutes to the gentleman from Tennessee (Mr. QUILLEN), pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 539 is an open rule providing for the consideration of H.R. 6100, a bill to amend the Public Works and Economic Development Act of 1965 and the

Appalachian Regional Development Act of 1965. The first reading of the bill will be dispensed with.

The rule makes in order the amendment in the nature of a substitute reported by the Committee on Public Works as an original bill for the purposes of amendment. The legislation will be read for amendment by title, with each title considered as read. After the passage of H.R. 6100, the House shall proceed to the consideration of S. 2144, and it shall then be in order to strike out all after the enacting clause of the Senate bill and to insert the provisions of H.R. 6100 as passed by the House.

There are two waivers of points of order contained in this rule. Clause 5 of rule XXI, prohibiting appropriations in a legislative bill, is waived against the Public Works Committee substitute. This waiver was deemed necessary because grant provisions in the legislation not subject to appropriations could be construed as a violation of this rule.

Section 402(a) of the Congressional Budget Act is waived against consideration of both H.R. 6100 and S. 2144. Section 402(a) provides that it shall not be in order to consider any bill which authorizes the enactment of new budget authority for the fiscal year unless that bill has been reported on or before May 15 preceding the beginning of that fiscal year. The legislation was under the jurisdiction of both the Public Works Committee and the Banking, Finance and Urban Affairs Committee. Some of the many hearings on the bill were conducted jointly by subcommittees of the two committees. The Public Works Committee ordered the bill as amended reported favorably and complied with the Budget Act by filing its report on Monday, May 17, 1982. The Committee on Banking, however, decided not to report the bill but does not want to delay consideration of the bill. Thus the Committee on Rules, on recommendation of the Budget Committee, granted a waiver of section 402(a) for what might be considered a technical violation, in view of the implicit concurrence of the Banking Committee with bringing the bill to the floor.

This rule provides 1½ hours of debate in an effort to fulfill a request by the Banking Committee that committee members have floor time during general debate and the opportunity to offer possible amendments to the legislation. The debate time will be divided between the chairman and ranking minority member of the Committee on Public Works and Transportation.

Mr. Speaker, the authorization for the Public Works and Economic Development Act of 1965 expires on September 30, 1982. H.R. 6100 completely revises the programs provided by the

Public Works and Economic Development Act and authorizes new economic development programs through fiscal year 1985. It extends the Appalachian Regional Development Act by adopting a finish-up program for the Appalachian Highway System and the area development programs funded through the Appalachian Regional Commission.

The programs which are covered by H.R. 6100 are scheduled for termination under the President's fiscal year 1983 budget. H.R. 6100, however, emerged from the Committee on Public Works and Transportation with strong bipartisan support. The revision of the Economic Development Act is a model of what can be achieved through positive efforts to preserve the principles of a good program—at the same time streamlining it for the era in which we live now—one in which we are keenly aware of our limited resources.

In this new light, the National Development Investment Act tightens the eligibility criteria for Federal assistance. The program has been so broad that 80 percent of the Nation's population has been eligible. This legislation cuts eligibility in half. The share of Federal aid has also been cut, to a 50-50 matching grant basis. Private sector commitment and a viable strategy for economic development will weigh heavily in the evaluation of applications for economic development aid.

Title I of the bill authorizes \$500 million annually for 3 years for the construction, repair, rehabilitation, and improvement of public facilities, and to establish locally administered revolving loan funds to assist small business or to retain existing business and other projects which promote development and create jobs.

Title II of H.R. 6100 will permit the Appalachian Regional Commission to bring its infrastructure programs in severely distressed and underdeveloped counties in Appalachia to completion. The bill authorizes \$83 million annually for 1983 through 1985, and \$75 million annually for 1986 and 1987. It also provides funding for the Appalachian Highway System in the amount of \$215 million in 1983 and an additional \$2 billion through fiscal year 1990 in order to complete the highway construction program.

This legislation represents a worthy bipartisan effort at improving important Federal programs. I urge adoption of the rule so that we may proceed to the consideration of H.R. 6100.

□ 1430

Mr. QUILLEN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the provisions of the rule have been ably explained by the gentleman from Louisiana (Mr. Long).

I think it is time for action on the floor. I know of no objection to the rule, even though the administration opposes certain provisions of the bill.

The bill is a product of 13 days of hearings. It has been widely discussed. The programs in my district, ARC and EDA have been very fruitful and helpful.

Mr. Speaker, I have no requests for time. I reserve the balance of my time. I urge the adoption of the rule.

● Mr. TAYLOR. Mr. Speaker, House Resolution 539 is an open rule under which the House will consider legislation to reform and reauthorize the Economic Development Administration, and thereby begin a process of rebuilding the economic base of our Nation's economically distressed areas.

As the gentleman from Louisiana (Mr. Long) has explained, this rule contains one waiver of the Budget Act against our consideration of H.R. 6100, provides for a committee amendment in the nature of a substitute, and waives clause 5 of rule XXI against that substitute.

The waiver of section 402(a) of the Budget Act is considered to be a technical matter in this instance, because the bill was not reported by one of the two committees involved by the May 15, 1982, deadline. Various sections of H.R. 6100 as introduced would directly authorize the enactment of new budget authority for fiscal 1983, and thus the triggering of the reporting requirement. The waiver is provided because the Banking Committee has no objection to the bill as reported by the Public Works Committee, and the Public Works Committee did meet the reporting deadline.

Mr. Speaker, this rule provides for 1½ hours of general debate, to be equally divided, and it makes in order a Public Works Committee amendment in the nature of a substitute as on original bill for the purpose of amendment under the 5-minute rule.

The committee substitute will be read for amendment by titles instead of by sections, with each title considered as read. The rule waives clause 5 of rule XXI against our consideration of the committee substitute.

This waiver is provided because one section of the substitute does constitute an appropriation in a legislative bill. One motion to recommit with or without instructions is also provided for.

Finally, Mr. Speaker, the rule makes in order our consideration of S. 2144, a similar Senate passed bill, following passage of H.R. 6100. A waiver of section 402(a) of the Budget Act is provided because the Senate bill contains new budget authority and was not reported prior to May 15.

Mr. Speaker, the legislation made in order by this rule, H.R. 6100, represents a major effort on the part of the Public Works Committee to change

the Economic Development Act of 1965 by targeting grant assistance on the basis of prospects for success in our Nation's distressed areas. The committee has brought forth a bill that substantially revises the EDA program and tightens the standards for eligibility of local communities by using a more strict criteria of economic distress.

All of us know, Mr. Speaker, that over the years EDA grew too big and began to try and solve problems far beyond its scope. Indeed, some 80 percent of the Nation is currently eligible for EDA assistance. Under this legislation, which I wholeheartedly support, we will slim down the criteria for EDA assistance to cover about 40 percent of the country.

This bill is designed to insure that our scarce Federal resources are used most effectively, and it contains provisions requiring the Secretary of Commerce to consider the amount of private sector involvement and the potential for economic success—to take these factors into account—when selecting development plans for assistance.

Under the legislation reported from the Public Works Committee, communities which apply for EDA grants will be required to devise development plans that emphasize the involvement of private industry. Private industry investment is a vital part of any economic recovery program, and this bill promotes private industry investment as the cornerstone of local economic development plans.

Mr. Speaker, I am pleased to say that this measure has strong bipartisan support from the Committee on Public Works. There is hardly any controversy about the merits of the legislation reported from that committee, and there was no controversy at all about the provisions of House Resolution 539 in the Committee on Rules.

Mr. Speaker, I strongly urge my colleagues to support this rule and to support the legislation it makes in order. ●

GENERAL LEAVE

Mr. QUILLEN. Mr. Speaker, I ask unanimous consent for all Members to have 5 legislative days within which to revise and extend their remarks on the pending rule.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Tennessee?

There was no objection.

Mr. LONG of Louisiana. Mr. Speaker, I have no further requests for time, and I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

PROVIDING FOR CONSIDERATION OF H.R. 6308, RAIL SAFETY AND SERVICE IMPROVEMENT ACT OF 1982

Mr. MOAKLEY. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 546 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. Res. 546

Resolved, That upon the adoption of this resolution it shall be in order, sections 401(a) and 402(a) of the Congressional Budget Act of 1974 (Public Law 93-344) to the contrary notwithstanding, to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 6308) to insure rail safety, provide for the preservation of rail service, transfer responsibility for the Northeast corridor improvement project to Amtrak, and for other purposes, and the first reading of the bill shall be dispensed with. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Energy and Commerce, the bill shall be considered for amendment under the five-minute rule. In lieu of the amendments recommended by the Committees on Energy and Commerce and Interior and Insular Affairs now printed in the bill, it shall be in order to consider an amendment in the nature of a substitute consisting of the text of the bill H.R. 6911 as an original bill for the purpose of amendment under the five-minute rule, said substitute shall be considered for amendment by titles instead of by sections and each title shall be considered as having been read, and all points of order against said substitute for failure to comply with the provisions of clause 5, rule XXI are hereby waived. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the amendment in the nature of a substitute made in order as original text by this resolution. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

The SPEAKER pro tempore. The gentleman from Massachusetts (Mr. MOAKLEY) is recognized for 1 hour.

Mr. MOAKLEY. Mr. Speaker, I yield 1 minute to the gentlewoman from Ohio (Ms. OAKAR) to speak out of order.

(By unanimous consent, Ms. OAKAR was allowed to speak out of order.)

CONFERENCE COMMITTEE ADDRESSES ISSUE OF FEDERAL EMPLOYEES AND RETIREES

Ms. OAKAR. Mr. Speaker, right now the conference committee is meeting. Among other issues they are addressing is the plight of Federal employees and Federal retirees.

Congresswoman SCHROEDER and myself were recommended to the conference committee to expand it to five members on our side, three on the Re-

publican side. Unfortunately, Congressman LATTA threatened to object.

This may have been acceptable if, in fact, the Committee on Agriculture had not had five members on the Democratic side and three members on the Republican side.

We think it is discrimination. We think it is a blow to Federal employees and to retirees and I must say I am deeply disappointed.

Mrs. SCHROEDER. Mr. Speaker, will the gentlewoman yield?

Ms. OAKAR. I yield to the gentlewoman from Colorado.

Mrs. SCHROEDER. I thank the gentlewoman for yielding.

Mr. Speaker, I think what the gentlewoman from Ohio said is very true, and we are just very, very sorry this whole incident has occurred.

The SPEAKER pro tempore. The time of the gentlewoman from Ohio (Ms. OAKAR) has expired.

Mr. MOAKLEY. Mr. Speaker, I yield 1 minute to the gentleman from Illinois (Mr. DERWINSKI) to speak out of order.

(By unanimous consent, Mr. DERWINSKI was allowed to speak out of order.)

PROCEDURES FOLLOWED IN CURRENT CONFERENCE COMMITTEE MEETINGS

Mr. DERWINSKI. Mr. Speaker, I thank the gentlewoman.

I wish to correct, for the record, and give my understanding of the point made by the gentleman from Ohio.

There was no discrimination involved. There are the normal number of conferees. The position of Federal employees and Federal retirees is being very well protected by the three majority members at the conference and, in fact, by one of the minority members, Mr. TAYLOR. So I would say the only effect of not expanding the number of conferees is that we are not quite as crowded around the conference table.

The practical, political, and budgetary effects involved are not changed at all by the absence of the two very noble and concerned gentlewomen.

Mrs. SCHROEDER. Mr. Speaker, will the gentleman yield?

Mr. DERWINSKI. Of course, I yield to the gentlewoman.

Mrs. SCHROEDER. I thank the gentleman for yielding.

Mr. Speaker, the thing we were distressed about—

The SPEAKER pro tempore. The time of the gentleman from Illinois (Mr. DERWINSKI) has expired.

Ms. OAKAR. Mr. Speaker, I ask that he be allowed to address the House for 1 minute.

The SPEAKER pro tempore. The time is controlled by the gentleman from Massachusetts.

Mr. MOAKLEY. Mr. Speaker, I yield 1 minute to the gentleman from Illinois (Mr. DERWINSKI) for purposes of debate only.

Mrs. SCHROEDER. Mr. Speaker, will the gentleman yield?

Mr. DERWINSKI. I yield to the gentlewoman from Colorado.

Mrs. SCHROEDER. Mr. Speaker, I would like to respond that I think the thing we are so distressed about is no one seemed to care how crowded the conference table was when it came to Agriculture members, but suddenly when it came to having the same number, an equal number from the Committee on Post Office and Civil Service, they cared, and both of our subcommittees are the ones with specific jurisdiction.

Mr. DERWINSKI. I think the difference is the Agriculture conference is far more complex, and there is less unanimity among its members.

I would say if the two gentlewomen have any complaint at all, it probably should be directed to the chairman of the House Committee, because that is how we arrived at the five-member group.

Really, nobody can win on this issue; but I assure the gentlewomen, rest assured that their retirees are being well protected.

The SPEAKER pro tempore. The time of the gentleman from Illinois (Mr. DERWINSKI) has expired.

□ 1440

Mr. MOAKLEY. Mr. Speaker, I yield the customary 30 minutes to the gentleman from Tennessee (Mr. QUILLEN), and pending that, I yield myself such time as I may use.

Mr. Speaker, the resolution (H. Res. 546) provides for the consideration of the bill (H.R. 6308), the Rail Safety and Improvement Act of 1982. It is a 1-hour open rule.

The rule provides for an amendment in the nature of a substitute consisting of the text of a bill (H.R. 6911) to be considered as original text for the purpose of amendment. It contains the provisions customarily included in rules when a committee reports a substitute. All are technical and simply insure that the minority has the same rights which would be available if the committee had reported a clean bill. They provide for the substitute to be read as original text for purpose of amendment; permit Members to demand separate vote in the House on perfecting amendments as well as the substitute; and provide that the motion to recommit may contain instructions.

The text used as a substitute was introduced by the gentleman from New Jersey (Mr. FLORIO) prior to the hearing in the Committee on Rules, in order to provide a convenient vehicle for floor consideration. That text accommodates an amendment proposed by the Committee on Interior and Insular Affairs to the substitute reported by the Committee on Energy and

Commerce. It also corrects a provision in the committee report subject to a point of order under section 401(a) of the Congressional Budget Act of 1974.

The rule provides for a waiver of section 401(a) of the Congressional Budget Act of 1974, which prohibits certain forms of back-door spending. The waiver applies to section 502(c) of the introduced bill, related to contract authority, but it is technical because the substitute cures that violation.

A waiver of section 402(a) of the Congressional Budget Act of 1974 is also provided. The committee reported 1 day late but the Committee on the Budget notes that a good-faith effort was made to comply and, since the text was available in advance, the real object of the requirement was met.

The resolution provides a waiver of clause 5 of rule XXI for the substitute. The rule prohibits appropriations in legislative bills. Numerous provisions of the bill could be considered reappropriations since they would make funds previously appropriated available for other purposes. However such waivers are routine and noncontroversial in the case of bills of this type. Indeed, it would be impossible to make any changes in any multiyear funding programs without a technical violation of the rule.

Mr. Speaker, I wish to commend the gentleman from New Jersey (Mr. FLORIO) and the gentleman from New York (Mr. LENT). Their subcommittee has provided effective leadership on the issue of rail development. They have brought forward an outstanding product, which this House may consider with pride. This is the omnibus rail bill which includes, in title III, funds earmarked for the Northeast corridor improvement project. This project is of vital importance to the transportation needs and the economy of my region and I am grateful for the consistent support this work has enjoyed in the Committee on Energy and Commerce.

The bill also reauthorizes the Rail Safety Act through fiscal year 1984. Title II of the bill provides authority to the Secretary of Transportation to oversee the reorganization of railroads in bankruptcy, and directs the Secretary to guarantee necessary loans to carrier for employee protection and retraining.

The amendment of the Committee on Interior and Insular Affairs relates to the disposition of lands in connection with the sale of the Alaska Railroad. Since that amendment is accommodated in the text made in order under the rule, the Interior Committee felt it required no special allocation of time.

Mr. Speaker, this is an important bill and I strongly urge the adoption of the rule to permit the House to take it up for consideration.

Mr. Speaker, I reserve the balance of my time.

Mr. QUILLEN. Mr. Speaker, I yield myself as much time as I may use.

The description of the rule has been well done, Mr. Speaker. I think we would find that Amtrak would operate in a much safer manner should it run through Tennessee. I would like to plant that seed again, and I believe it would be a great service to the people, particularly in the World's Fair State. I would hope that the committee would take note.

Mr. Speaker, even though the administration opposes the bill, this is an open rule and will allow for adequate debate on the floor of the House.

● Mr. TAYLOR. Mr. Speaker, House Resolution 546 is a 1-hour open rule under which the House will consider legislation to reauthorize the Rail Safety Act to insure continued Federal oversight of the safety of rail operations in this Nation.

The gentleman from Massachusetts (Mr. MOAKLEY) has explained that this rule contains two waivers of the Budget Act against our consideration of H.R. 6308, provides for an amendment in the nature of a substitute consisting of the text of a new bill, H.R. 6911, and waives clause 5 of rule XXI against that substitute.

One of the two Budget Act waivers is technical in nature, and was provided for by the Rules Committee because the substitute will not violate section 401(a) of the Budget Act.

The second Budget Act waiver, that of section 402(a), is necessary because the Committee on Energy and Commerce did not report the legislation by the May 15 deadline. The Budget Committee noted that a good-faith effort was made to comply, and, since the text was available in advance, the object of the requirement was met.

Mr. Speaker, the rule provides that the amendment in the nature of a substitute, H.R. 6911 introduced by the gentleman from New Jersey (Mr. FLORIO), will be considered as original text for the purpose of amendment under the 5-minute rule.

The text of the substitute accommodates an amendment by the Committee on the Interior which was reported to the Energy and Commerce Committee bill, and will be read by title instead of by sections.

The rule also provides a waiver of clause 5 of rule XXI for the substitute. The rule prohibits appropriations in legislative bills, but numerous provisions of H.R. 6911 could be considered reappropriations since they would make funds previously appropriated available for other purposes.

Mr. Speaker, the Energy and Commerce Committee has brought forward an omnibus rail bill that is generally supported by the minority on that committee.

The Republican members of the Subcommittee on Commerce, Transportation and Tourism, the gentleman from Illinois (Mr. MADIGAN), and the gentlemen from New York (Mr. LENT and Mr. LEE) indicate some concern, however, over some provisions of the bill.

Indeed, the bill in its present form, is strongly opposed by the administration.

Since this rule permits amendments that will give the House a chance to overcome these objections, I ask that the rule be adopted.●

GENERAL LEAVE

Mr. QUILLEN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks, and to include extraneous material, on the pending rule.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Tennessee?

There was no objection.

Mr. QUILLEN. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. MOAKLEY. Mr. Speaker, I have no further requests for time, and I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

PROVIDING FOR CONSIDERATION OF H.R. 6323, ENVIRONMENTAL RESEARCH, DEVELOPMENT, AND DEMONSTRATION ACT OF 1983

Mr. DERRICK. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 535 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. Res. 535

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 6323) to authorize appropriations for environmental research, development, and demonstration for the fiscal years 1983 and 1984, and for other purposes, and the first reading of the bill shall be dispensed with. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Science and Technology, the bill shall be read for amendment under the five-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without in-

intervening motion except one motion to recommit. After the passage of H.R. 6323, it shall be in order to take from the Speaker's table the bill S. 2577, and it shall then be in order in the House to move to strike out all after the enacting clause of the said Senate bill and to insert in lieu thereof the provisions contained in H.R. 6323 as passed by the House.

The SPEAKER pro tempore. The gentleman from South Carolina (Mr. DERRICK) is recognized for 1 hour.

Mr. DERRICK. Mr. Speaker, for purposes of debate only, I yield the customary 30 minutes to the gentleman from Tennessee (Mr. QUILLEN), pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 535 provides for the consideration of the bill, H.R. 6323, to authorize appropriations for environmental research, development, and demonstration for the fiscal years 1983 and 1984, and for other purposes.

The rule provides 1 hour of general debate to be equally divided and controlled by the chairman of the ranking minority member of the Committee on Science and Technology. This is a straight open rule, allowing any germane amendment to be offered under the 5-minute rule. There are no waivers of points of order. One motion to recommit is in order. After passage of the bill, it is in order to take from the Speaker's table the bill S. 2577 and to move to strike out all after the enacting clause of the Senate bill and insert in lieu thereof the provisions contained in H.R. 6323 as passed by the House.

Mr. Speaker, H.R. 6323 authorizes \$296.8 million for fiscal year 1983 and \$303.1 million for fiscal year 1984 for the environmental research, development, and demonstration activities of the Environmental Protection Agency. The authorizations will enable EPA to carry out the mandates of the environmental statutes administered by the Agency. In addition, the bill strengthens EPA's environmental monitoring activities, establishes a research program on indoor air quality, and expands long-term research on emerging environmental health hazards.

Mr. Speaker, it is important that we maintain our commitment to the protection of the public health and welfare of our citizens and of the environment. I know of no opposition to this rule, and I urge my colleagues to adopt House Resolution 535 that the House may proceed to the consideration of this very important legislation.

Mr. QUILLEN. Mr. Speaker, I yield myself as much time as I may use.

Mr. Speaker, the provisions of the resolution have been ably explained by the gentleman from South Carolina (Mr. DERRICK). The administration opposes this measure. Instead of the bill which mandates high levels of funding, they prefer lower funding levels.

Mr. Speaker, I know of no opposition to the rule. There may be some opposition on the floor of the House to the bill. I urge adoption of the rule, and reserve the balance of my time.

□ 1450

Mr. DERRICK. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsideration was laid on the table.

PROVIDING FOR CONSIDERATION OF H.R. 6324, ATMOSPHERIC, CLIMATIC, AND OCEAN POLLUTION ACT OF 1982

Mr. ZEFERETTI. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 540 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. Res. 540

Resolved, That upon the adoption of this resolution it shall be in order, section 401(a) of the Congressional Budget Act of 1974 (Public Law 93-344) to the contrary notwithstanding, to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 6324) to authorize appropriations for atmospheric, climatic, and ocean pollution activities of the National Oceanic and Atmospheric Administration for the fiscal years 1983 and 1984, and for other purposes, and the first reading of the bill shall be dispensed with. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, thirty minutes to be equally divided and controlled by the chairman and ranking minority member of the Committee on Merchant Marine and Fisheries and thirty minutes to be equally divided and controlled by the chairman and ranking minority member of the Committee on Science and Technology, the bill shall be read for amendment under the five-minute rule. In lieu of the amendments recommended by the Committees on Merchant Marine and Fisheries and Science and Technology now printed in the bill, it shall be in order to consider an amendment in the nature of a substitute consisting of the text of the bill H.R. 6798 as an original bill for the purpose of amendment under the five-minute rule, said substitute shall be considered for amendment by titles instead of by sections, and each title shall be considered as having been read, and all points of order against said substitute for failure to comply with the provisions of clause 5, rule XXI and section 401(a) of the Congressional Budget Act of 1974 (Public Law 93-344) are hereby waived. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the amendment in the nature of a substitute made in order

as original text by this resolution. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

The SPEAKER pro tempore. The gentleman from New York (Mr. ZEFERETTI) is recognized for 1 hour.

Mr. ZEFERETTI. Mr. Speaker, for purposes of debate only, I yield 30 minutes to the gentleman from Mississippi (Mr. LOTT), pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 540 provides for the consideration of H.R. 6324, Atmospheric, Climatic and Ocean Pollution Act of 1982. The Rules Committee has granted 1 hour of general debate, 30 minutes to be equally divided and controlled by the chairman and ranking minority member of the Committee on Merchant Marine and Fisheries, and 30 minutes to be equally divided and controlled by the chairman and ranking minority member of the Committee on Science and Technology. Further, the rule waives 401(a) of the Congressional Budget Act prohibits new contract authority unless such authority is limited to amounts provided in advance in appropriation acts.

These violations occur on page 10, section 303(a)(3) lines 17 through 23, on page 13, section 306, lines 22 through 25, and on page 22, section 202(c)(3) lines 19 through 22.

In lieu of the amendments reported by the Merchant Marine and Science and Technology Committees, it shall be in order to consider an amendment in the nature of a substitute consisting of the text of H.R. 6798, as an original bill for the purpose of amendment. This substitute shall be considered for amendment by titles instead of by sections, with each title to be considered as read.

In addition, the substitute will necessitate the need for several waivers. On page 10, section 303(a)(3), lines 1 through 7 a waiver of clause 5, rule XXI, and a waiver of 401(A) of the Congressional Budget Act is needed. On page 13, section 306, lines 3 through 6, and on page 21, section 202(c)(3), line 23, through page 22, lines 1 through 2, a waiver of 401(A) of the Congressional Budget Act is required.

At the conclusion of the amendment process the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instruction.

Mr. Speaker, H.R. 6324 was jointly referred to the Science and Technology Committee and the Merchant Marine Committee. The committees differed slightly on several items in the measure, however, were able to resolve these differences and have incor-

porated their compromises in a clean bill, H.R. 6798.

H.R. 6798 authorizes \$544 million for fiscal year 1983 and \$576.6 million for fiscal year 1984 for about 60 percent of the activities of the National Oceanic and Atmospheric Administration. This measure is part of an ongoing process of consolidating the NOAA reauthorization into a single item of legislation.

Included in the bill are authorizations for sludge studies of the New York and Puget Sound areas, the establishment of a Great Lakes Protection, Research and Sanctuaries Act, the national climate program, and restored funding for a second polar orbiting weather satellite.

Mr. Speaker, the National Oceanic and Atmospheric Administration plays a vital role in the Nation's welfare, economic self-sufficiency, and national security.

The Administration monitors and predicts weather and environmental conditions, provides basic maps and charts for safe navigation, provides research to advance oceanic and atmospheric science, and manages and conserves marine resources for the good of the country.

Mr. Speaker, this is a fairly noncontroversial measure and I urge my colleagues to support House Resolution 540, so we may proceed to the consideration of H.R. 6324, the NOAA authorization for fiscal years 1983 and 1984.

Mr. LOTT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of this rule and of the bill which authorizes appropriations for fiscal years 1983 and 1984 for the National Oceanic and Atmospheric Administration.

There are, however, some problems with the bill. There are those who feel that this authorization level is too high, because it provides \$544 million in fiscal year 1983 and for \$576.6 million in fiscal year 1984, and there are some provisions that were included in the bill to which the administration has raised some objections. I am sure there will be some serious debate on the bill, and some amendments will be offered.

But, Mr. Speaker, this is a fair and noncontroversial rule providing 1 hour of general debate, and it allows adequate consideration of conflicting points of view and for an adequate hearing on the House floor. I support the rule. I know of no objections to it. I have no requests for time, and I yield back the balance of my time.

Mr. ZEFERETTI. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

RAIL SAFETY AND SERVICE IMPROVEMENT ACT OF 1982

Mr. FLORIO. Mr. Speaker, I move that the House resolve itself into the Committee on the Whole House on the State of the Union for the consideration of the bill (H.R. 6308), to insure rail safety, provide for the preservation of rail service, transfer responsibility for the Northeast corridor improvement project to Amtrak, and for other purposes.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from New Jersey (Mr. FLORIO).

The motion was agreed to.

The SPEAKER pro tempore. The Chair designates the gentleman from Massachusetts (Mr. FRANK), as Chairman of the Committee of the Whole and requests the gentleman from New York, Mr. McHUGH, to assume the chair temporarily.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 6308, with Mr. McHUGH, Chairman pro tempore, in the chair.

The Clerk read the title of the bill.

The CHAIRMAN pro tempore. Pursuant to the rule, the first reading of the bill is dispensed with.

Under the rule, the gentleman from New Jersey (Mr. FLORIO) will be recognized for 30 minutes, and the gentleman from New York (Mr. LENT) will be recognized for 30 minutes.

The Chair recognizes the gentleman from New Jersey (Mr. FLORIO).

Mr. FLORIO. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, the House is today considering H.R. 6308, the Rail Safety and Service Improvement Act of 1982. This is an important rail bill which deals with a number of rail safety and service issues.

Title I of the bill reauthorizes the rail safety functions of the Federal Railroad Administration. This reauthorization is crucial if we are to insure continued oversight of the safety of rail operations.

Title II deals with rail service and labor problems caused by the liquidation of the Rock Island Railroad. Its enactment is necessary to insure the maximum possible continued rail service in the Midwest.

Title III restructures the Northeast corridor improvement project and insures that crucial aspects of this project can be completed.

Title IV extends a railroad loan program that has been of great assistance in improving rail service in all parts of the country, particularly the Midwest.

Title V authorizes additional transition funding for Northeastern commuter agencies and also provides for the transfer of the Alaska Railroad to the State of Alaska. An amendment to

the Alaska Railroad section was added by the Interior Committee, and this amendment is incorporated in the text of the substitute.

All parts of this bill are important to rail service in this country, but I want to emphasize the importance of the \$75 million for commuter authorities in the Northeast. These commuter lines carry nearly half a million people per day, and are vital to the economic health of the region.

Last year, in order to improve the operation of these commuter lines, the Congress gave the local authorities the ability to operate and manage these lines. No longer would they be required to rely on Conrail—the current operator—to operate the service or negotiate their employee contracts.

The transition expenses for this change have been greater than expected by some, and, with the support of the administration, we have made additional funds available. These funds should insure a smooth transition and continued commuter service in Connecticut, New York, New Jersey, Pennsylvania, and Maryland.

H.R. 6308 is an important piece of legislation and I urge its adoption by the House.

□ 1500

Mr. LENT. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I would like to take this opportunity to describe to my colleagues in the Chamber H.R. 6308, the Rail Safety and Service Improvement Act of 1982.

This five-titled bill is an important piece of rail legislation that has been developed within the Energy and Commerce Committee in a spirit of bipartisan cooperation. Very briefly, I would like to highlight what I consider to be some of the more significant aspects of H.R. 6308.

Title I of the bill reauthorizes the rail safety program at funding levels consistent with those requested by the administration, except with respect to the cost of State inspection programs. In addition, title I provides a much-needed clarification of the authority and responsibility of the Federal Railroad Administrator in the field of commuter rail safety. Taken as a whole, title I assures a continued commitment on the part of the Congress to improved rail safety.

Title II of H.R. 6308 provides a procedure for the sale of lines abandoned by the Rock Island Railroad to assure the continuation of essential service over these lines. In addition, the bill establishes an employee protection program to deal with railroads in liquidation. This particular subject has been a troubling one for a number of years as the Congress has attempted to strike a balance between protecting

rail employees and not unduly burdening the industry.

I have some reservations about this provision as drafted, both as to whether it will result in Rock Island employees receiving any benefits and as to its negative impact on other viable carriers. Nonetheless, based on assurances received from the chairman of the subcommittee, Mr. FLORIO, on his desire to work together to improve this provision, I am confident that the final product that emerges from a House-Senate conference will be one that strikes that balance.

Title III addresses the Northeast corridor improvement project. Principally, it seeks to clarify the scope of the overall project and the availability of funds to complete the project as contemplated by Congress. Also, title III makes funds available for much-needed corridor improvements between the main line and Buffalo, N.Y. At the approximate time I intend to offer an amendment along with my colleague from New York, Mr. LEE, that would assure that two specific projects are addressed with these funds, both of which are very important to the State of New York. One of these is the "corridor connector" project that will link the Empire Amtrak corridor with Pennsylvania Station in New York City, thus eliminating the need for Amtrak rail passengers to shuttle to Grand Central Station to connect with Amtrak service to Albany and Buffalo.

Title IV continues the 505 preference share program for an additional 3 years. I believe this extension is appropriate as the rail industry pursues the goal of rehabilitating and rebuilding its facilities and equipment (infrastructure).

The last title of the bill includes additional funding for the costs associated with the transfer of commuter operations in the Northeast from Conrail to the appropriate commuter authorities. This provision is extremely important to assure a smooth transition. In addition, this title provides for the transfer of the Alaska Railroad to the State of Alaska. There has been agreement between the two relevant committees, Energy and Commerce, and Interior and Insular Affairs, to incorporate the latter committee's provision for the sale of the railroad to the State. Nonetheless, I remain concerned that, as presently drafted, the language could frustrate everyone's stated intent to transfer the railroad from the Federal to the State government. I hope that those concerns are addressed as the bill continues through the legislative process.

In closing, I would like to commend the chairman of the subcommittee, Mr. FLORIO, for his efforts in working with the minority members of the committee in shaping the bill under consideration.

Although I continue to have reservations about certain aspects of the legislation, on balance, I believe it is a good bill. Therefore, I would urge my colleagues to vote in favor of the bill as reported by the Committee on Energy and Commerce.

Thank you.

Mr. Chairman, I yield 5 minutes to the gentleman from Nebraska (Mr. BEREUTER).

Mr. BEREUTER. Mr. Chairman, I rise in reference to one section of this bill, section 212, which I support strongly. Section 212 deals with an issue in which I have a deep and longstanding interest—railroad bankruptcies. I was pleased to submit a statement on this matter to the Commerce, Science and Tourism Subcommittee of the Energy and Commerce Committee, chaired by our distinguished colleague from New Jersey (Mr. FLORIO), and I am delighted to see that the bill as finally reported out of committee provides such a thorough and well-crafted remedy to my concerns.

Mr. Chairman, section 212 of the bill specifies that bankrupt railroads may be transferred only to financially responsible entities which are capable of covering expenses required to provide rail service for at least 4 years. It further provides that if such an offer has been made and declined, the ICC may, on request, make a determination that the offer is a bona fide one and that the offeror is financially responsible, and set a reasonable price for the takeover. Once the ICC does this, the decision is binding unless the offeror withdraws its bid within 10 days. In the event that there is more than one potential purchaser, the ICC is required to prescribe terms that best serve the public interest.

Mr. Chairman, for the benefit of those who may not have had the personal experience with railroad bankruptcy that I have had in my district, I would like to take a few minutes to explain to my colleagues the gross inequity and callous disregard for the public interest which can result, and has resulted, in the absence of such legislation as we are now considering.

Seven years ago the Rock Island Railroad, part of which runs through my district, was declared officially bankrupt. Operations continued on major portions of the line, as a result of directed service orders and the efforts of other rail carriers, until June of 1980, when the order was granted allowing total abandonment of operations by the Rock Island. Over the past 2 years, many carriers have aggressively and repeatedly sought to purchase sections of the line, but their offers have met with rejection after rejection by the trustee in bankruptcy.

Mr. Chairman, the farmers in my district rely on rail service to transport their grain to market. For years the Rock Island was a dependable integral

part of farm operations throughout Nebraska. Today speculation and perhaps petty considerations of financial gain to the trustee may have resulted in the capricious withholding of this vital service from residents of my district. Something is rotten in the State of Illinois specifically in the office of the overpaid trustee of the Rock Island Railroad. Delay only adds more dollars to his pocket.

While no one would deny a trustee's obligation is to obtain the highest offer for the assets of a bankrupt estate, it has been conclusively documented that the offered price on each of these segments far exceeds the salvage value. Until very recently, Mr. Chairman, a mere 300 miles of this once great 3,500 mile line has been sold.

The prospective purchasers of these segments are becoming increasingly frustrated by the trustee's refusal to consider the offers which they have put forth. Farmers, small business families, and whole communities for whom reliable transportation is an essential business need, are suffering. Each day the Rock Island line deteriorates further and further, fast approaching the point where it will no longer be feasible to attempt to reestablish service, and this great asset of the plains will be lost to us forever.

In conclusion, Mr. Chairman, I want to say that I support this portion of the bill as a long-awaited remedy to a problem which has caused hardship to farmers in my district and elsewhere in the country at a time when they can ill afford to support the delays and the speculations of those who have put their own financial gain above the public good.

□ 1510

Mr. FLORIO. Mr. Chairman, I yield 4 minutes to the gentleman from New York (Mr. WEISS).

Mr. WEISS. I thank the distinguished chairman of the subcommittee for yielding this time to me, and I rise in support of the Rail Safety and Service Improvement Act, and at the same time to express my concern about the problem of rail freight service through the Northeast corridor. I am concerned that this serious problem is not sufficiently addressed in this legislation.

Recent legislation has been geared toward improving passenger rail service in the Northeast and rightly so. Efficient rail passenger transportation can be the cornerstone of renewed prosperity for depressed urban areas; it reduces our dependence on cars, saves energy and reduces air pollution.

Unfortunately, transportation planning has tended to ignore the potential contribution that rail freight service could make in assisting economic

and environmental revitalization in the Northeast.

As a result, rail freight service through the Northeast corridor has never been fully realized. However, the potential for rail freight along the route from Washington, D.C., up into New England is great and the net benefits of a healthy rail freight industry along the Northeast corridor to shippers, railroads, labor, and to society as a whole are very substantial.

In 1975, the U.S. Railway Association, in its plan to set up Conrail, made certain recommendations about how rail freight service along the Northeast corridor could be improved without interference with passenger lines. The recommendation included a proposal for establishing a separate, but parallel route for freight trains on already existing track from Washington straight through to Newark, N.J. Connecting routes into New England could be achieved through the construction of a rail freight tunnel beneath the Hudson River. An uncompleted New York-New Jersey Port Authority study done a few years ago showed that the level of traffic attracted by such a tunnel would alone be nearly enough to support the project financially.

The beauty of this plan—and similar ones like it—is that it does not require excessive costs and would allow rail freight to travel exclusively on its own rail routes, free of conflicts with Amtrak and commuter trains. It would eliminate the problem of high fees that freight companies are forced to pay Amtrak. And, it would alleviate the wear and tear on passenger tracks that freight trains are known to aggravate.

At the same time, an independent off-corridor rail freight route would shift some highway freight traffic to rail, thereby saving significant amounts of highway maintenance—now a very high cost—while conserving energy and reducing air pollution.

I understand that progress is being made in some of these areas. The question of rail freight fees is being litigated before the Interstate Commerce Commission at this time. Title 7 of this legislation mandates that the Transportation Secretary study alternative routes for rail freight. Yet, this problem was recognized back in 1975, and it seems long past the time when some more substantive action should have occurred.

We already have the elements and the technology to establish a separate right-of-way for freight trains from Washington, D.C., to New York and beyond. With careful planning and management, performed with an eye toward the long term, I believe that freight usage in the Northeast corridor could be increased markedly. In my view, one I believe is shared by many others as well, increased freight

exchange through this vital and productive region will not only benefit the citizens of this region, but serve as a model for improving rail service across the country.

I would very much appreciate an expression on this matter from my distinguished friend from New Jersey, the chairman of the subcommittee.

Mr. FLORIO. Mr. Chairman, if the gentleman will yield, I appreciate the concern expressed by the gentleman from New York. I certainly agree that it is important to encourage rail freight service in the Northeast.

Efforts are being made to route freight traffic off the tracks of the Northeast corridor owned by Amtrak onto alternative off-corridor routings. Those efforts are important and should continue. The off-corridor routings are important freight routes and should continue to be improved.

Mr. WEISS. Mr. Chairman, I thank the gentleman, and I am looking forward to working with him toward this end.

Mr. LENT. Mr. Chairman, I yield 5 minutes to the gentleman from Illinois (Mr. McCLODY).

Mr. McCLODY. Mr. Chairman, I have had a communication from attorneys representing substantial creditors of the Rock Island and who have communicated with me with respect to this legislation, particularly title II, subtitle B of the Rail Safety and Service Improvement Act of 1982, which would impose a \$75 million labor protection obligation upon the bankrupt and the liquidating Rock Island estate.

The labor protection program would be funded either directly from the assets of the estate or by a federally guaranteed loan, as I interpret it. If a loan were utilized, it would have administrative expense status and thus repayment of the loan is quite likely to be accorded priority superior to the interests of the estate's creditors and shareholders.

If, on the other hand, the \$75 million is required to be paid out of the estate, and the labor protection provisions of the act were subsequently held to be constitutional, why, of course, that would come out of the pockets of the creditors and shareholders of the Rock Island. If this part of the act were held to be unconstitutional, then, I believe, they would be entitled to reimbursement under the Tucker Act and the taxpayers would foot the bill.

I should call attention to the fact that Congress has twice passed similar legislation in which it has attempted to provide this \$75 million guarantee by specific legislation. On May 30, 1980, President Carter signed the original Rock Island Act. On June 9, the U.S. District Court in Chicago, Judge McGarr, in the Bankruptcy Court, enjoined the implementation of that legislation, holding that that part

of the act was unconstitutional. That unconstitutionality holding was sustained by the U.S. Supreme Court.

Again, the Congress, in September 1980, reenacted, without substantial alteration, the same provision, and again it was held unconstitutional.

So this is the third attempt.

Now, as I interpret it, section 215 of the bill attempts to provide by general legislation for the funding of such labor protection agreements, with the idea that by the enactment of such general language we can circumvent the decisions of the Supreme Court which held the earlier provisions to be unconstitutional. There remains the question as to whether we are not taking the money of the pockets of the creditors, which would be wrongful and unconstitutional or imposing a corresponding obligation on the Federal Government, which I do not believe the Federal Government should be required to assume.

So I do want to call attention to these parts of the measure before us and to voice the objections to it which have been communicated to me by attorneys representing substantial interests in the Rock Island bankruptcy proceedings.

Mr. LENT. Mr. Chairman, will the gentleman yield?

Mr. McCLODY. I yield to the gentleman from New York, who undoubtedly is more familiar with this subject than I am, and perhaps the gentleman can enlighten me with respect to these points.

Mr. LENT. I thank the gentleman for yielding.

Mr. Chairman, I do not know whether I can enlighten the gentleman, but, as I said in my opening remarks, I am cognizant of the problem, and we have been trying on this subcommittee to work this issue out with the administration, to assure that the employees of the Rock Island are protected while at the same time without prejudicing the creditors of the estate.

Mr. McCLODY. This is very encouraging. I would say that I am encouraged by the statement of the gentleman, and I hope that your efforts will be successful, because it does seem to me that in our desire to be fair to the employees of the railroad, we certainly also want to be fair to those who have invested in and loaned money to the railroad and who are legitimate creditors of the railroad and we should not jeopardize or prejudice their interests in the bankruptcy proceedings by any legislation such as those provisions to which I have made reference. And, likewise, I am sure that we want to be certain that whatever legislation we enact will stand the constitutional test.

I thank the gentleman very much for his statement.

Let me add these further facts about the Rock Island proceedings which are pertinent to the present debate.

Within the last few weeks, Judge McGarr ordered the trustee to file a plan of reorganization by November 30 of this year. However, the threat hanging over the estate of a new legislatively imposed \$75 million obligation as in the measure before us could well make the filing of a plan impossible until the constitutionality of the legislation is finally determined. Past experience indicates that such a final judicial resolution could take as long as 2 years.

This new delay would be most detrimental to the interests of the Rock Island's creditors, particularly the small businesses, individuals, and State and local taxing authorities, who have been awaiting payment of their claims for years. Many of these creditors are presently reported to be in difficult financial straits because of the failure of the Rock Island to pay its debts. In addition, delay in the liquidation of the Rock Island estate will be contrary to the best interests of the Government, which is a major creditor of the estate, and to the public interest, which would prefer that sales be consummated quickly so that rail service can be preserved.

The Rail Safety and Service Improvement Act will be very detrimental to the Government in another way. It has already been established that no labor protection is legally owing in connection with the Rock Island's abandonment. If, under the terms of any new legislation \$75,000,000 becomes immediately payable out of the Rock Island estate to railway labor, the trustee, creditors, and shareholders will be compelled to sue the Government under the Tucker Act for reimbursement of all sums paid, plus interest from the time of payment. In light of the earlier decisions of the seventh circuit and Judge McGarr that the Rock Island cannot be subjected to labor protection obligations consistent with the Constitution, the Government will incur a \$75,000,000 expense, plus interest. In addition, if the trustee is compelled, pursuant to subtitle A of title II, to sell any rail properties for less than fair market value, the Government will be responsible for the shortfall.

I am confident that the gentleman from New York (Mr. LENT) and other members of the committee will give earnest consideration to these facts as they apply themselves in formulating the final text of this legislation.

□ 1520

Mr. LENT. Mr. Chairman, I yield such time as he may consume to the gentleman from New York (Mr. LEE), our colleague on the subcommittee.

Mr. LEE. Mr. Chairman, I thank the gentleman for yielding.

I wonder if the distinguished chairman would engage in a colloquy here for a couple of minutes on a key point or two.

Approximately a year ago, when we were going through the excellent leadership accomplishments of both the gentleman from New Jersey and the gentleman from New York (Mr. LENT) in insuring that we did not end up with a garage sale for the Conrail system, we all stood unanimously in support of insuring we would implement under the Northeast Rail Services Act the tools to insure that Conrail could attain its profitability with the hopeful objective that at a designated time it could continue on its own without being dissected.

My point to the distinguished gentleman from New Jersey is this:

As we address this particular section relevant to the transfer of approximately 6,000 employees to the commuter services, do we have assurances among ourselves here as we go to conference that we will do everything that we possibly can to protect Conrail from having to pick up the financial liability for the cost of that, as well as insuring that there is equity for the employees that are transferred to either the metropolitan agencies or to Amtrak?

Mr. FLORIO. Mr. Chairman, will the gentleman yield?

Mr. LEE. I yield to the gentleman from New Jersey.

Mr. FLORIO. I thank the gentleman for yielding.

I think the gentleman, from our previous conversations as well as communications with the gentleman from New York (Mr. LENT), is aware we are all of one mind that it is important to balance out the equities between all of the players, and that one of our paramount concerns is to maintain the financial integrity of Conrail.

As the gentleman knows, last year we stood here in opposition to some feelings in the administration, and argued against a liquidation of Conrail. And we wanted to provide the time to have Conrail go forward in a profitable way so as to maintain it as a northeast railroad system. I think we are all very pleased with the results, that management and labor have cooperated, that there is a high degree of productivity. Conrail is now in the black.

I think it is important we preserve Conrail's opportunity to succeed so we do not find ourselves later on having to respond to those who say that Conrail did not meet the standards that we set, and, therefore, there should be a parcelling out of the system, which would be catastrophic for the health of the Northeast.

I am committed to insuring that there be that amount of money left in the appropriation maintained for Conrail so they have an amount to deal

with unexpected contingencies—weather problems, whatever. I will go forward through the legislative process to insure that Conrail is able to preserve an amount to insure that it meets the financial requirements Congress has imposed on it so that system can be kept together.

Mr. LEE. I thank the gentleman for affirming that significant point.

I would like, Mr. Chairman, to take this opportunity to compliment both the gentleman from New York (Mr. LENT) and the gentleman from New Jersey (Mr. FLORIO) for the outstanding leadership they have demonstrated in bringing this legislation to the floor.

● Mr. SEIBERLING. Mr. Chairman, I thank the gentleman for yielding, so that I may very briefly discuss the role that the Committee on Interior and Insular Affairs has played with regard to this bill.

Our committee sought and received a sequential referral of H.R. 6308 so that we might address those aspects of section 507, which provides for the transfer of the Alaska Railroad to the State of Alaska, which are within our jurisdiction under the rules of the House.

After a formal briefing and a hearing on this section of the bill, the Subcommittee on Public Lands and National Parks adopted an amendment to section 507 which was later approved by the full committee by unanimous voice vote and now is incorporated in the committee substitute being offered by the Committee on Energy and Commerce.

I will very briefly outline the effects of our committee's amendment, but first I want to express my great appreciation for the cooperation of the Committee on Energy and Commerce and especially of our colleague from New Jersey (Mr. FLORIO) which has made it possible for us to have our amendment incorporated into the substitute and thus has greatly facilitated the work of the House in considering this important bill. I also ask unanimous consent to revise and extend my remarks.

Mr. Chairman, the Interior Committee's amendment to section 507 addresses the transfer of the Alaska Railroad, now federally owned, to the State of Alaska. It includes provisions for the protection and proper management of the national park system and the national forest system, through whose lands the railroad passes. It provides a mechanism for resolving certain pending claims that various parties are entitled to ownership of certain lands now held by the railroad, under a variety of Federal laws including the Alaska Native Claims Settlement Act. It makes it clear that the transfer of the railroad will not include transfer of any Federal right of

eminent domain or any floating easements for railroad expansion which in the past may have been reserved in favor of the United States. It specifies that future railroad rights-of-way across Federal lands in Alaska are to be available in accordance with existing law. And finally it provides the State the option of paying for the railroad wholly or partly in cash or through the transfer to the United States of State lands within such conservation system units as national parks or national wildlife refuges or within other areas of conservation values.

In connection with that last point, I should note that our committee did not address the fundamental question of whether the State should or should not have to pay for the railroad—that was addressed by the Committee on Energy and Commerce, which determined that payment was appropriate and set the price at 75 percent of the railroad's liquidation value.

In summary, Mr. Chairman, the provisions which our committee added to section 507 of this bill are intended to facilitate the transfer of the railroad to the State of Alaska while also providing for proper recognition of the rights and interests of the public and the other parties who stand to be affected by that transfer.

Those desiring further details on this bill and our amendment to it will find them discussed in the report of the Committee on Interior and Insular Affairs on H.R. 6308 (H. Rept. 97-571, part II).

● Mr. MOFFETT. Mr. Chairman, the Rail Safety and Service Improvement Act of 1982 was introduced by Representatives FLORIO, MIKULSKI, and myself on May 6, 1982. The bill before us today contains two provisions on which I worked: First, it insures that State commuter agencies—like ConnDOT in Connecticut—which will bear the costs of assuming the obligations currently undertaken by Conrail commuter, will receive adequate upfront funds to operate these lines; and second, the bill insures that, when the Federal Government transfers the Alaskan Railroad to the State of Alaska, adequate compensation for this rather generous gift is obtained. In addition to these two provisions, I support the bill in its entirety.

Before addressing myself to these two provisions, let me provide some background.

It has always been my view that the Federal Government has had a consistently wrong policy when it comes to funding commuter operations. We have operated with the narrowest view of profitability, rejecting models used by every other Western democracy. Federal commuter policy rejects the view that there is value in providing decent, affordable, and reliable transportation for people who work for a

living. The inevitable consequence of this policy is that we have been lurching from crisis to crisis—in both commuter and freight areas—without a long view into the future as to the transportation needs of our people.

The Consolidated Rail Corporation (Conrail) was patched together after the demise of the Penn Central Railroad. In addition to providing freight service—which itself was inadequately funded—Conrail's commuter operations provided rail service in Connecticut, Maryland, New York, New Jersey, and Pennsylvania. It was an operation that never proved profitable, again in the narrow definition of that term, because Congress demanded that the commuter service be somehow self-sustaining.

When the Reagan administration took office, it had one answer to Conrail's problems and the agony of commuting: shut it down. It crafted legislation to do just that. First, with respect to freight operations, the legislation empowered the Secretary of Transportation to sell Conrail—either whole or in pieces—to the highest bidder. Second, to make this sale more attractive, the administration ordered the divestiture of Conrail's commuter obligations. I served on the committee which attempted to resolve the differences between the Senate's version of the administration's bill, and the House legislation which was really designed to save Conrail.

The agreement reached between the Senate and House conferees approved, with major modifications, the plan of the administration to sell Conrail. In addition, the conference agreement provided transition money so that the commuter agencies would have adequate funds to assume Conrail's commuter obligations.

Under the final agreement, the commuter agencies had two options: they could run Conrail's former obligations themselves; or, they could contract with a new Amtrak commuter subsidiary, which would run the local trains for the agencies. Connecticut DOT has chosen the right course: it will run commuter train service on behalf of Connecticut's consumers itself.

The agreement we reached, the Northeast Rail Service Act, did provide \$50 million for the transition from Conrail commuter. This money, which was woefully inadequate, was included because there are millions of dollars of upfront expenditures required so that these agencies could assume Conrail's former role. ConnDOT, for example, will have to buy computers; and new staff; arrange new collective bargaining agreements; and the like. These are responsibilities which Conrail has provided, but will no longer do so after January 1, 1983.

Again, we should remember what the removal of Conrail from the commuting arena meant: the Reagan Ad-

ministration was trying to balance Conrail's books on the backs of commuters. And, the transition money was compensation to the commuter agencies at the State level which would have to assume Conrail's duties.

Unfortunately, the administration decided that it would stretch out the payments of the transition money from October 1, 1981, through the end of the 1985 fiscal year—this is a period of over 4 years. Despite the fact that all of the costs which ConnDOT and the other four commuter agencies would absorb were upfront, U.S. Department of Transportation wanted to hold onto the money, and pay it out gradually.

Commissioner Burns was a witness before our Transportation Subcommittee on April 28, 1982. He described, eloquently, how the administration's disbursement schedule would injure the interests of Connecticut's commuting public. He recommended a quick release of the transition funds, to insure that the commuter agencies assuming Conrail's service obligations would be able to put these services into place immediately after January 1, 1983.

Commissioner Burns said before the subcommittee:

I believe that it is essential that all of the funding be made available immediately so that we may proceed to take the necessary action prior to January 1, 1983 (the) takeover deadline with the full knowledge that the funding is in place.

The amendment which I offered during consideration of the legislation provided for a quick release of the transition funding provided in the bill. The \$40 million previously authorized in the Northeast Rail Service Act and \$75 million taken from a prior Conrail authorization would be released completely by the Secretary within 30 days after enactment. That is a vast improvement over the Secretary's regulations.

Another part of the amendment regarded something referred to as the float. The use of Conrail as a banker to assist local commuter agencies with their cash management problems was recognized, in part, in the Northeast Rail Service Act. Section 1139(b) stated:

The Secretary shall consider any particular adverse financial impact upon any commuter authority contracting with Amtrak Commuter that results from the termination of any lease or agreement between such commuter authority and Conrail.

The act took into consideration the adverse consequences of local agencies cash management problems, if and only if they contracted with Amtrak's new commuter subsidiary.

I saw no reason why the formula should be biased toward commuter agencies which elect to have Amtrak operate their lines. Surely, the expenses awaiting those agencies which

will be operating their lines themselves will be equally difficult for them to bear.

For this reason, my amendment—which was adopted by the subcommittee without dissent—also eliminated the words “contracting with Amtrak commuter” from section 1139(b).

Finally, let me address myself to the provision regarding the Alaskan Railroad. Originally, the bill contained a provision permitting the transfer of the railroad “without monetary consideration to the United States.” I agreed with the policy decision to transfer the railroad. However, I could not agree with the awarding of the railroad to oil-rich Alaska without payments from that State. An amendment I offered required compensation.

The Interior Committee sought and won sequential referral of the bill. It added substitute language which permitted land exchanges in lieu of financial consideration for the transfer. While I cannot endorse the claim of the committee as to jurisdiction, I do applaud the work they did on the bill.

First, the committee addressed appropriate Alaska Native land claims against railroad lands by requiring a full and expedited adjudication of those claims by the Department of the Interior. The result is a savings to the Federal Government of approximately \$150 million because an unconstitutional taking of Native claims is thereby avoided.

Second, the committee left the price for the railroad at 75 percent of the net liquidation value of railroad land and assets. That price had been set by the Energy and Commerce Committee. The subcommittee granted to the State the option of paying that price wholly or partly in cash and wholly or partly in land comprising inholdings in national parks and wildlife refuges, because the State may find it easier to pay in land than in cash.

If the State chooses the land exchange option, key waterfowl and wildlife areas could be traded to the Federal Government for the railroad lands. This trade would benefit sport hunting interests in Alaska and the lower 48 States by protecting valuable wetlands and wildlife habitat from possible incompatible development or disposal to private interests.

Third, the committee granted existing rights-of-way for the railroad through Denali National Park and the Chugach National Forest, while preserving Federal ownership of these lands.

The legislation could not have been brought to the House without the outstanding leadership of Representative FLORIO. He is, of course, the most knowledgeable Member we have in the area of railroad legislation. I applaud his efforts. And, I am pleased to be listed as one of the three original au-

thors of the bill. I urge its adoption by the House.

● **Mr. RAILSBACK.** Mr. Chairman, I rise in support of provisions in the Rail Safety and Service Improvement Act that pertain to the Milwaukee and Rock Island Railroads. I do so because many former Rock Island employees live in Illinois 19th Congressional District, which I represent.

Basically, title II, subtitle A, would authorize the Interstate Commerce Commission to set compensation for purchase of a line if the trustee rejects an offer, and subtitle B would insure \$75 million in labor protection. The legislation provides that the estate could sue under the Tucker Act so that the Federal Government would reimburse the estate.

Congress has already attempted to legislate labor protection twice by approving the 1980 Rock Island Act and similar language in the Staggers Rail Act of 1980. In both cases, I wholeheartedly supported the provisions, because people are struggling with unemployment. Rock Island County, where most reside, is considered a labor surplus area, meaning jobs are not readily available.

However, the trustees chose to litigate, resulting in delays and finally Supreme Court decisions finding the legislation, in both cases, an unconstitutional taking of property from creditors. I understand the trustees will bring the issue to Court again if the legislation is passed by Congress.

I feel the certain delay is both unfortunate and unnecessary. The legislation clearly provides that the estate may sue the Federal Government for assistance to Rock Island employees. There is no need for delay.

And, in the meantime, former employees and agricultural shippers suffer. The Rock Island was used extensively by farmers to ship grain. Many of these shippers must now depend on truckers who are more expensive. A solution to the problem must be reached soon. No positive results are being achieved by the estate accusing Congress of causing delays and by Members of Congress accusing the estate of no concern for employees. Now is the time for a resolution. The Rail Safety and Service Improvement Act should be approved with the Milwaukee Railroad and Rock Island Railroad provisions, and I would hope the estate will decide not to fight the decision in Court, but use the Tucker Act to provide assistance to the unemployed in my district.

I appreciate this opportunity to express my views.

● **Mr. LEE.** Mr. Chairman, at the appropriate point in the proceedings, the ranking minority member of the Transportation Subcommittee, Mr. LENT, will offer a perfecting amendment, on behalf of both of us, to title III of H.R. 6308, the Rail Safety and

Service Improvement Act of 1982. The purpose of this amendment which we have worked on together is to delineate two critical projects that will upon their completion, dramatically improve rail passenger service in New York State between Buffalo and New York City.

The first part of the amendment would authorize funds to carry out a proposal for the rehabilitation of a rail line required to facilitate rail passenger service between Spuyten Duyvil on the Hudson line and the main line of the Northeast corridor. This proposal, referred to as the west side connection, would allow the Empire Service train from upstate New York to connect directly with the Northeast corridor at Penn Station. The connection is expected to yield benefits of approximately \$10 million a year. This is based on an expected net operating cost savings of approximately \$2 million a year, and an estimated increase of approximately \$8 million in new revenue from improved connections between the Empire Service and the Northeast corridor. The current subway/taxi transfer between the two services is regarded as a major inconvenience by most travelers and discourages many potential through passengers.

Amtrak is currently proposing a detailed engineering study in cooperation with the State of New York to define the scope and cost of the proposed rehabilitation. Included in the study are track and signal rehabilitation over the 11-mile line and structural analysis of various tunnels and bridges, including the Spuyten Duyvil Bridge. The study will also analyze rail and river traffic at the Spuyten Duyvil Bridge. The results of this study will be used to prepare the detailed specifications for the project.

The second and equally important aspect of the amendment would permit Amtrak in concert with the New York State Department of Transportation and a local citizen's committee already appointed by the State transportation commissioner to develop and implement a plan for the improvement of the present Amtrak rail passenger station or construction of an appropriate new facility at Syracuse, N.Y. The Syracuse Station is an important link in the upper New York State Empire Service. Eight trains per day serve this station over track upgraded to superb condition by significant capital investment from the State. In the first 9 months of fiscal year 1982, 79,035 passengers used the Syracuse stop and, by the end of fiscal year 1983, Amtrak anticipates a 9.3 percent increase over total fiscal year 1982 on/off riders at this station. The existing Amtrak station, in deteriorating condition, is unattractive and inadequate to meet the growing needs and

increasing demands of the Syracuse area market. This improvement project will be designed to provide the rail passenger in Syracuse with a modern, efficient, cost effective, and accessible facility similar to those constructed at other locations along the Empire corridor.

Mr. Chairman, this is an extremely important amendment and I urge all my colleagues to support it.●

Mr. LENT. Mr. Chairman, I yield back the balance of my time.

Mr. FLORIO. Mr. Chairman, I have no further requests for time, and I yield back the balance of my time.

The CHAIRMAN. Pursuant to the rule, the text of H.R. 6911 shall be considered by titles as an original bill for the purpose of amendment under the 5-minute rule in lieu of the amendments recommended by the Committees on Energy and Commerce and Interior and Insular Affairs. Each title shall be considered as having been read.

The Clerk will designate section 1. Section 1 reads as follows:

That this Act may be referred to as the "Rail Safety and Service Improvement Act of 1982".

The CHAIRMAN. Are there any amendments to section 1? If not, the Clerk will designate title I.

Title I reads as follows:

TITLE I—RAIL SAFETY

SHORT TITLE

SEC. 101. This title may be referred to as the "Federal Railroad Safety Authorization Act of 1982".

REGULATORY AUTHORITY

SEC. 102. Section 202 of the Federal Railroad Safety Act of 1970 (45 U.S.C. 431) is amended by adding at the end a new subsection as follows:

"(1)(1) As used in this section, the term 'all areas of railroad safety' includes the safety of commuter or other short-haul rail passenger service in a metropolitan or suburban area, including any commuter rail service which was operated by the Consolidated Rail Corporation as of January 1, 1979.

"(2) The Secretary shall, within one year after the date of enactment of the Federal Railroad Safety Authorization Act of 1982, issue rules, regulations, orders, and standards to apply appropriate safety principles to track used for commuter or other short-haul rail passenger service in a metropolitan or suburban area."

AUTHORIZATION FOR APPROPRIATIONS

SEC. 103. (a) Section 214 of the Federal Railroad Safety Act of 1970 (45 U.S.C. 444) is amended as follows:

(1) Subsection (a) is amended to read as follows:

"(a) There is authorized to be appropriated to carry out the provisions of this Act not to exceed \$52,000,000 for the fiscal year ending September 30, 1983, and not to exceed \$52,700,000 for the fiscal year ending September 30, 1984."

(2) Subsection (b)(1) is amended by striking out "\$22,500,000" and all that follows through "September 30, 1982." and inserting in lieu thereof "\$25,800,000 for the fiscal year ending September 30, 1983, and not to exceed \$26,500,000 for the fiscal year ending September 30, 1984."

(3) Subsection (b)(2) is amended by striking out "\$2,000,000" and all that follows through the period and inserting in lieu thereof "\$2,700,000."

(4) Subsection (b)(4) is amended by striking out "\$10,000,000" and inserting in lieu thereof "\$20,000,000."

(b) The amendments made by this section shall take effect on October 1, 1982.

MOVEMENT FOR REPAIR

SEC. 104. The fourth section of the Act of April 14, 1910 (45 U.S.C. 13) is amended by striking out "where such car can be repaired" and all that follows through "at the sole risk of the carrier," and inserting in lieu thereof "on the line of railroad on which the car was discovered to be defective or insecure where such car can be repaired, or, at the option of a connecting carrier, such car may be hauled to the nearest available point on the line of such connecting carrier where such car can be repaired if such point is no farther than the nearest available point on the line on which the car was discovered defective or insecure, without liability for the penalties imposed by this section or section 6 of this title, if any such movement is necessary to make such repairs and such repairs cannot be made except at any such repair point; and such movement or hauling of such car shall be at the sole risk of the carrier doing the moving or hauling."

ASH PAN ACT

SEC. 105. The Act of May 30, 1908 (45 U.S.C. 17-21), commonly known as the Ash Pan Act, is repealed.

The CHAIRMAN. Are there any amendments to title I?

AMENDMENT OFFERED BY MR. SIMON

Mr. SIMON. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. SIMON: Page 2, line 4, strike out "a new subsection as follows" and insert in lieu thereof "the following new subsections".

Page 2, line 16, strike out the quotation mark and the period which follows it.

Page 2, after line 16, insert the following:

"(j) The Secretary shall within 30 days report to Congress on whether it should issue rules, regulations, orders, and standards to require that the leading car of any railroad train in operation after July 1, 1983, be equipped with an acceptable form of mounted oscillating light."

Mr. SIMON. Mr. Chairman, I would like to take my 5 minutes just to explain this situation, though I believe the amendment may be acceptable.

I want to give the "Slowest Moving Agency Award" to the Federal Railroad Administration and tragically so.

Let me explain what happened.

On February 1976, 11 people were killed in my district at a railroad crossing near Beckemeyer, Ill. I took a look at what we could do about that kind of thing, and I found that the FRA had had two studies which had recommended that all railroad locomotives ought to have some kind of strobe light or oscillating light. So I wrote to the man who was then the head of the FRA, a man named John Sullivan, and I said, "You have these two studies; those studies show that, No. 1 you are going to save lives; No. 2 you are going to save money for the railroads, and I

would like to see the FRA do something."

He wrote back and he said, "Thanks for your fine letter. We will study the problem."

That was a completely less than satisfactory answer.

I finally had lunch with the gentleman. He promised he was going to move into action. I have a whole series of promises from that agency, but no action. March 1978 they published their advance notice of proposed rulemaking. June 1979, FRA published notice of proposed rulemaking. September 1979, they held hearings finally.

I have had several meetings with the new FRA Administrator. They keep assuring me they are going to do something. And I wait, and I wait, and I wait.

We have about 12,000 accidents at crossings each year, over 900 killed, over 4,000 injured.

We have had up to this time, now, six FRA studies. To my knowledge every one of them says we are going to save lives, and, interestingly, one study concluded that the economic benefit to the railroads would be approximately \$65 million a year by going ahead. About 20 percent of the railroads do it, just on their own. Amtrak, for example, does it. The employees of the railroads believe it is a safety measure. And yet I cannot get the agency to move.

So we have this amendment. And my apologies to the chairman of the subcommittee and to the ranking minority member, because I found suddenly we are on the bill faster than I thought we were going to be and I did not have a chance to discuss this amendment with them.

Mr. FLORIO. Mr. Chairman, will the gentleman yield?

Mr. SIMON. I yield to the gentleman from New Jersey.

Mr. FLORIO. Mr. Chairman, I thank the gentleman for yielding.

I reviewed the amendment. The amendment I think is desirable in putting a limit on the Secretary's time to provide some answers as to the questions the gentleman raises. I think it is acceptable to the majority.

Mr. LENT. Mr. Chairman, will the gentleman yield?

Mr. SIMON. I yield to the gentleman from New York.

Mr. LENT. I thank the gentleman for yielding.

The minority has had an opportunity to review this amendment and we have no objection.

Mr. SIMON. Let me just urge my colleagues when you are in the conference committee to see that this amendment is put on. The progressive leaders of railroads in this country are for it. But you have in the railroad industry unfortunately some pretty be-

nighted leadership in many of these railroads and anything that means they have to spend 1 penny, even though it may save lives, even though eventually it is going to pay off for the railroads economically, they do not want to do it. I hope my colleagues fight for this in conference.

Let me add if this amendment does not do the trick and we do not get positive answers in 30 days the Members and the FRA are going to hear a lot from me from the well of this House on this matter.

If we cannot do things that save lives and save money at the same time—things that are so obviously needed—something is wrong. Drastically wrong.

□ 1530

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois (Mr. SIMON).

The amendment was agreed to.

The CHAIRMAN. Are there further amendments to title I?

AMENDMENT OFFERED BY MR. MATSUI

Mr. MATSUI. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. MATSUI: Page 2, lines 3 and 4, strike out "amended by adding at the end a new subsection as follows:" and insert in lieu thereof the following:

amended—

(1) by amending subsection (h) (1) to read as follows:

"(h)(1)(A) The Secretary shall, within one year after the date of enactment of the Federal Railroad Safety Authorization Act of 1982, issue initial rules, regulations, orders, and standards as may be necessary to insure that the construction, maintenance, and operation of railroad passenger equipment maximize safety to rail passengers. The Secretary shall, as a part of such rulemaking, consider comparable Federal regulations and procedures which apply to other modes of transportation, especially those administered and enforced by the Federal Aviation Administration. The Secretary shall periodically review such rules, regulations, orders, and standards and shall, after a hearing in accordance with subsection (b) of this section, make such revisions in such rules, regulations, orders, and standards as may be necessary."

(2) by redesignating subsection (h)(2) as subsection (h)(1)(B);

(3) by striking out "subsection" in subsection (h)(1)(B), as redesignated by paragraph (2) of this section, and inserting in lieu thereof "paragraph";

(4) by inserting after subsection (h)(1)(B), as so redesignated, a new paragraph as follows:

"(2) The Secretary shall, within two years after the date of enactment of the Federal Railroad Safety Authorization Act of 1982, issue initial rules, regulations, orders, and standards as may be necessary to require initial and periodic subsequent training of on-board railroad operating and service personnel in evacuation procedures and the use of emergency equipment. The Secretary shall, as a part of such rulemaking, consider comparable Federal regulations and procedures which apply to other modes of trans-

portation, especially those administered and enforced by the Federal Aviation Administration. The Secretary shall periodically review such rules, regulations, orders, and standards and shall, after a hearing in accordance with subsection (b) of this section, make such revisions in such rules, regulations, orders, and standards as may be necessary."

(5) by redesignating subsection (h)(4) as subsection (h)(5);

(6) by inserting after subsection (h)(3) a new paragraph as follows:

"(4) The Secretary shall submit to the Congress a report—

"(A) within one year after the date of enactment of the Federal Railroad Safety Authorization Act of 1982 with respect to rules, regulations, orders, and standards issued under paragraph (1) of this subsection, and

"(B) within two years after the date of enactment of the Federal Railroad Safety Authorization Act of 1982 with respect to rules, regulations, orders, and standards issued under paragraph (2) of this subsection,

which describes any rules, regulations, orders, and standards issued or to be issued under this subsection, explains the reasons for their issuance, and compares them to comparable Federal regulations and procedures which apply to other modes of transportation, especially those administered and enforced by the Federal Aviation Administration."

(7) by adding at the end a new subsection as follows:

Mr. MATSUI (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. MATSUI. Mr. Chairman, I offer this amendment to tighten up what appears to be some looseness in the approach to passenger safety on our railroads.

The record of Amtrak and our private railroads has been fairly good. In Amtrak, in fact, it has been very good. Some of that record has been due to physical differences between rail and other modes of transportation, especially air and automobile. But, that does not mean there is no room for improvement.

In June, we suffered a tragic rail accident in California. Passenger sleeping cars were engulfed in flame from an undetermined cause. Two people were killed and dozens injured. The National Transportation Safety Board is investigating the accident. Its official report will not be completed until the end of the year, but early reports revealed that the most minimal precautions had not been pursued. The train's crew fled the scene and gave no assistance in evacuating the cars or in first aid. The fire interrupted the single power line for the train, and the lights went out, causing additional confusion in the dark and the smoke. There were no smoke detectors or

alarms. Half of the windows were designed to break out, but they were not marked; there were no instructions for opening them, and in the alternate compartments without breakout windows, there was no indication that exit was possible through adjacent rooms. The breakout windows were not identified from the outside, which might have assisted rescuers.

None of these faults would have been difficult or expensive to rectify but, not having been rectified, they were certainly expensive in terms of life and injury. It immediately occurred to me that although most airline accidents are not survivable, when they are, the equipment is well designed and constructed for quick evacuation, and the crews are well trained in evacuation, use of emergency equipment, and in first aid. It seemed that if something like the regulations administered by the Federal Aviation Administration had been in place, some of the deaths and injuries might have been prevented.

So, the amendment I offer today would require new regulations for both equipment and personnel training to maximize passenger safety. It would also require that in promulgating new regulations, the Federal Railroad Administration would have to consider those which apply to other modes of transportation, especially air travel. Finally, the FRA would, at the end of its rulemaking process, have to report to Congress on its action, with special emphasis on the comparison of its rules to those of the FAA's. That report should include comparisons to the following rules from the Code of Federal Regulations: 14 CFR 25.803, .805, .809, .811, .812, .813, .819, .851, .853, and 14 CFR 121.215, .221, .223, .265, .267, .269, .271, .273, .275, .310, .400, .415, and .417.

I am aware that the relationship between Government, labor, and management in the rail industry is different than that in the airline industry. It is not my intent in citing these FAA regulations that some elaborate Government-sanctioned certification and dismissal procedure be established for railroad workers as exists for airline cockpit crews. But, for trainmen, conductors, and car attendants, a system of initial and recurrent training and testing, similar to that for airline attendants, would be in order. Personnel who could not pass written and hands-on tests could simply be transferred to nonpassenger operating positions.

There is language in this amendment, Mr. Chairman, as there was in the Rail Safety Act of 1980, to include cost/benefit considerations in the regulations and to focus the requirements for equipment on new purchases. My intent is not to hamstring Amtrak and the other railroads with impossibly expensive standards. It seems, from the

evidence of the accident in California, that the simplest and least costly changes could have saved lives. It is time that these measures be pursued.

Finally, Mr. Chairman, I would like to thank the floor leader and the subcommittee's ranking Republican member and their staffs for their assistance and cooperation in the preparation and presentation of this amendment. The intense commitment of the gentleman from New Jersey (Mr. FLORIO) to rail safety was a constant when I served on his committee, and I continue to be impressed by his persistent devotion to this priority.

Mr. FLORIO. Mr. Chairman, will the gentleman yield?

Mr. MATSUI. Yes, I yield.

Mr. FLORIO. Mr. Chairman, the amendment that the gentleman offers is a very valuable one. The gentleman is a former member of this subcommittee and played a very significant role in the development of the Federal Railroad Safety Act amendments of the previous year.

I would accept the amendment and would urge its passage.

Mr. LENT. Mr. Chairman, will the gentleman yield?

Mr. MATSUI. I yield to the gentleman from New York.

Mr. LENT. Mr. Chairman, the minority has had an opportunity to review this amendment, and we have no objection to it.

Mr. MATSUI. Mr. Chairman, I thank the gentleman.

I would only like to further say to the chairman and also to the ranking minority member and, of course, the gentleman from New York, that we appreciate very much their assistance in drafting our amendment. We appreciate also the efforts of their staffs.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. MATSUI).

The amendment was agreed to.

The CHAIRMAN. Are there further amendments to title I?

If not, the Clerk will designate title II.

Title II reads as follows:

TITLE II—BANKRUPT RAILROADS

SHORT TITLE

SEC. 201. This title may be referred to as the "Bankrupt Railroad Service Preservation and Employee Protection Act of 1982".

SUBTITLE A—SERVICE PRESERVATION

FINDINGS

SEC. 211. The Congress finds—

(1) that it is necessary to establish procedures to facilitate and expedite the acquisition of rail lines of carriers subject to liquidation by financially responsible persons in instances where service is not being provided over the line by the carrier and where the financially responsible person seeks to provide rail service over the line;

(2) that procedures set forth in the amendments made by this Act represent an exercise of the powers of the Congress under the Constitution to regulate commerce among the several States which will

provide a practicable means for preserving rail service, thus benefiting shippers, employees, and the economies of the States in which such carriers subject to liquidation have operated service, and for facilitating interstate commerce, while at the same time providing safeguards to protect the interest of the estates of such carriers by requiring compensation which is not less than the constitutionally required minimum; and

(3) that it is in the public interest that the Interstate Commerce Commission's authority to issue orders involving temporary authority to operate service over lines of carriers subject to liquidation be clarified.

LINE SALES

SEC. 212. Section 17(b) of the Milwaukee Railroad Restructuring Act (45 U.S.C. 915) is amended by inserting after paragraph (3) the following new paragraph:

"(4)(A) If a person has made or makes an offer to acquire from a carrier subject to liquidation a rail line or lines over which no service is provided by that carrier, and that offer has been or is rejected by the trustee in bankruptcy of such carrier, such person may submit an application to the Commission seeking approval of such person's acquisition of such line or lines. A copy of any such application shall be filed simultaneously with the court.

"(B) The Commission shall, within 15 days after receipt of an application under subparagraph (A), determine whether the applicant—

"(i) is a financially responsible person; and

"(ii) has made a bona fide offer to acquire the line or lines under reasonable terms.

"(C)(i) If the Commission's determination under subparagraph (B) is affirmative with respect to the matters referred to in clauses (i) and (ii) of such subparagraph, the applicant and the trustee in bankruptcy (hereafter in this paragraph referred to collectively as the 'parties') shall enter into negotiations with respect to terms for the acquisition of the line or lines applied for. If the parties at any time agree on such terms, a request for approval of the acquisition shall be filed with the Commission and the court. If the parties are unable to agree to such terms within 30 days after the date of the Commission's determination under subparagraph (B), either party may, within 60 days after the expiration of such 30-day period, request the Commission to prescribe terms for such acquisition, including compensation for the line or lines to be acquired. The Commission shall prescribe such terms within 60 days after any such request is made. The terms prescribed by the Commission shall be binding upon both parties, subject to court review as provided in subparagraph (D), except that the applicant may withdraw its offer within 10 days after the Commission prescribes such terms.

"(ii) If more than one applicant has requested under this subparagraph that the Commission prescribe the terms of acquisition for the same or overlapping lines or portions of such lines, the Commission shall prescribe terms for such acquisition which it determines best serve the public interest.

"(D)(i) Within 15 days after the Commission prescribes terms under subparagraph (C), the Commission shall transmit such terms to the court, unless the offer is withdrawn under such subparagraph (C). Notwithstanding any other provision of law, the court shall, within 60 days after such transmittal, approve the acquisition under terms prescribed by the Commission if the compensation for the line or lines is not less than required as a constitutional minimum.

"(ii) Except as provided in this subparagraph, no action shall be taken by the court which would prejudice the acquisition which is the subject of an application under this paragraph.

"(E) The Commission shall require that any person acquiring a line or lines under this paragraph shall use, to the maximum extent practicable, employees or former employees of the carrier subject to liquidation in the operation of service on such line or lines.

"(F) No person acquiring a line under this paragraph may transfer or discontinue service on such line prior to the expiration of 4 years after such acquisition.

"(G) As used in this paragraph—

"(i) the term 'financially responsible person' means a person capable of compensating the carrier subject to liquidation for the acquisition of the line or lines proposed to be acquired and able to cover expenses associated with providing service over such line or lines for a period of not less than 4 years;

"(ii) the term 'carrier subject to liquidation' means a carrier which, on the date of enactment of the Bankrupt Railroad Service Preservation and Employee Protection Act of 1982 was the subject of a proceeding pending under section 77 of the Bankruptcy Act or under subchapter IV of chapter 11 of title 11, United States Code, and which has been ordered by the court to liquidate its properties; and

"(iii) the term 'the court' means the court having jurisdiction over the reorganization of the carrier subject to liquidation.

"(H) The Commission shall, within 45 days after the date of enactment of the Bankrupt Railroad Service Preservation and Employee Protection Act of 1982, prescribe any regulations and procedures which are necessary to carry out the provisions of this paragraph."

DIRECTED SERVICE EXTENSION

SEC. 213. Section 120 of the Rock Island Railroad Transition and Employee Assistance Act (45 U.S.C. 1015) is amended—

(1) by striking out "the Rock Island Railroad" the first place it appears and inserting in lieu thereof "any railroad subject to section 77 of the Bankruptcy Act or subchapter IV of chapter 11 of title 11 of the United States Code which has ceased to provide passenger commuter service over any line of such railroad (hereafter in this section referred to as 'the railroad')";

(2) by striking out "the Rock Island Railroad" each place it appears after the place referred to in paragraph (1) and inserting in lieu thereof "the railroad"; and

(3) by striking out "2-year" and inserting in lieu thereof "3-year".

INTERSTATE COMMERCE COMMISSION AUTHORITY

SEC. 214. Section 122(a) of the Rock Island Railroad Transition and Employee Assistance Act (45 U.S.C. 1017(a)) is amended by inserting at the end the following new sentence: "The Commission's authority under this subsection with respect to a rail carrier subject to liquidation shall continue until the disposition of the properties of the estate of such carrier."

GUARANTEES

SEC. 215. Section 511 of the Railroad Revitalization and Regulatory Reform Act of 1976 (45 U.S.C. 831) is amended by adding at the end a new subsection as follows:

"(n)(1) The Secretary shall guarantee and make commitments to guarantee the pay-

ment of the principal balance of, and any interest on, an obligation of any railroad in reorganization under section 77 of the Bankruptcy Act or subchapter IV of chapter 11 of title 11, United States Code, for purposes of funding any agreement between such railroad and its employees which provides for the protection of such employees who are adversely affected as a result of a reduction in service by such railroad or a restructuring transaction carried out by such railroad. Such employee protection may include interim employee assistance, moving expenses, employee relocation incentive compensation, and separation allowances.

"(2) Any obligation guaranteed under this subsection shall be treated as an administrative expense of the railroad in reorganization for which such obligation is guaranteed. Employee claims to be paid with the proceeds of obligations guaranteed under this subsection shall not be deferred but shall be paid as soon as practicable.

"(3) The aggregate unpaid principal amount of obligations which may be guaranteed by the Secretary under this subsection and the maximum liability of the railroad in reorganization for such guarantees shall not exceed \$75,000,000 for each such railroad.

"(4) Section 511 (g) and (h) and section 516 of this title shall not apply to any obligation guaranteed under this subsection."

SUBTITLE B—EMPLOYEE PROTECTION

FINDINGS

SEC. 231. The Congress finds that:

(1) Liquidation of major railroads results in greater disruptions of interstate commerce and large losses of employment.

(2) The public interest is served by and interstate commerce is facilitated by ensuring a uniform system of labor protection for employees of major railroads in liquidation.

(3) Such labor protection system does not represent a new obligation for the estate of a railroad in liquidation, but merely provides a sum certain to employees and an obligation certain to such estate in lieu of uncertain payments and obligations at the end of the liquidation process.

EMPLOYEE PROTECTION

SEC. 232. (a) Any rail carrier with respect to which a case under section 77 of the Bankruptcy Act or subchapter IV of chapter 11 of title 11, United States Code—

(1) is pending on the date of enactment of this Act; or

(2) is entered into after such date of enactment, which was a class I rail carrier immediately before such case commenced, and which is in liquidation as a result of the provisions of such section or subchapter or of an order of the court having jurisdiction over such case (hereafter in this subtitle referred to as the "bankrupt carrier") shall, no later than 5 days after the date of enactment of this Act in the case of a bankrupt carrier described in paragraph (1), and no later than 30 days after the date the carrier becomes a bankrupt carrier under this section in the case of a bankrupt carrier described in paragraph (2), enter into an agreement with labor organizations representing the employees of the bankrupt carrier to provide protection for such employees who are or have been adversely affected as a result of a reduction in service by the bankrupt carrier. Such employee protection may include, but need not be limited to, interim employee assistance, moving expenses, employee relocation incentive compensation, and separation allowances.

(b) If the parties do not enter into an agreement under subsection (a) within 5 days after the date of enactment of this Act, or within 30 days after the date the carrier becomes a bankrupt carrier under this section, as the case may be, the Interstate Commerce Commission shall by appropriate order prescribe, within 15 days after the end of such period, fair and equitable terms for an employee protection arrangement which shall be binding upon the parties and shall take effect immediately.

(c) Any order of the Interstate Commerce Commission under subsection (b), and any order of a bankruptcy court having jurisdiction over a case referred to in subsection (a) with respect to any agreement or arrangement under this section may be appealed only to the appropriate United States Court of Appeals having jurisdiction over such bankrupt carrier. Any such appeal shall be filed within 5 days after the date of entry of the order of the Interstate Commerce Commission or the bankruptcy court, as the case may be, and such court of appeals shall finally determine such appeal within 60 days after the date such appeal is filed.

(d)(1) Any claim of an employee for benefits and allowances under an employee protection agreement or arrangement entered into under this section shall be filed with the Railroad Retirement Board in such time and manner as such Board by regulation shall prescribe. Such Board shall determine the amount for which such employee is eligible under such agreement or arrangement and shall certify such amount to the bankrupt carrier for payment.

(2) Benefits and allowances under any agreement or arrangement entered into under this section shall be paid by the bankrupt carrier from its own assets or in accordance with section 235, and claims of employees for such benefits and allowances shall be treated as administrative expenses of the estate of the bankrupt carrier.

(e) As used in this subtitle, the term "employee" includes any employee of the bankrupt carrier, but does not include any individual serving as president, vice president, secretary, treasurer, comptroller, counsel, or member of the board of directors, or any other person performing such functions.

(f) The first sentence of section 7(b)(7) of the Railroad Retirement Act of 1974 (45 U.S.C. 231f(b)(7)) is amended by striking out "and the Rock Island Railroad Transition and Employee Assistance Act" and inserting in lieu thereof "the Rock Island Railroad Transition and Employee Assistance Act, and the Bankrupt Railroad Service Preservation and Employee Protection Act of 1982".

NEW CAREER TRAINING ASSISTANCE

SEC. 233. (a) An employee who elects to receive a separation allowance from the bankrupt railroad under an employee protection agreement or arrangement entered into under section 232 of this subtitle may receive from the Railroad Retirement Board reasonable expenses for training in qualified institutions for new career opportunities.

(b) To be eligible for assistance under this section an employee—

(1) must first exhaust any Federal educational benefits available to such employee under any existing program; and

(2) must begin his course of training within two years following the date of such employee's separation from employment with the bankrupt carrier.

(c) Reasonable expenses for assistance under this section shall be determined by the Railroad Retirement Board on the basis

of an application therefor filed by an employee with such Board.

(d) No assistance may be provided under this section after April 1, 1984.

(e) As used in this section—

(1) the term "expenses" means actual, reasonable expenses paid for room, board, tuition, fees, or educational material in an amount not to exceed \$3,000; and

(2) the term "qualified institution" means an educational institution accredited for payment by the Veterans' Administration under chapter 36 of title 38, United States Code, or a State-accredited institution which has been in existence for not less than two years.

ELECTION

SEC. 234. (a) Any employee who receives any assistance under an employee protection agreement or arrangement entered into under section 232 or any new career training assistance under section 233 shall be deemed to waive any employee protection benefits otherwise available to such employee under the Bankruptcy Act, title 11 of the United States Code, subtitle IV of title 49 of the United States Code, or any applicable contract or agreement (other than as provided in the agreement entered into in Washington, District of Columbia, on March 4, 1980, entitled "Labor Protective Agreement Between Railroads Parties Hereto Involved in Midwest Rail Restructuring and Employees of Such Railroads Represented by the Rail Labor Organizations Operating Through the Railway Labor Executives' Association").

(b) Any employee of a bankrupt carrier who is entitled to receive assistance under an agreement or arrangement entered into under section 232 shall, no later than 120 days after the date such agreement or arrangement becomes effective, file a statement with the Railroad Retirement Board indicating whether such employee elects to receive (1) assistance under such agreement or arrangement; or (2) any employment protection benefits otherwise available to such employee under the Bankruptcy Act, title 11 of the United States Code, subtitle IV of title 49 of the United States Code, or any applicable contract or agreement.

(c) With regard to any employee who elects benefits under subsection (b)(2), nothing in this subtitle shall be deemed to determine or otherwise affect the priority, status, or timing of payment of, or the liability for any claim for, employee protection which might have existed in the absence of this Act.

(d) An employee shall not be eligible to receive any assistance (other than moving expenses) under an employee protection agreement or arrangement entered into under section 232—

(1) during any period in which such employee is employed by any rail carrier providing temporary service over any lines of the bankrupt carrier; or

(2) at any time after the date such employee receives an offer of employment, in such employee's craft and for which such employee is qualified, from a rail carrier acquiring lines of the bankrupt carrier.

OBLIGATION GUARANTEES

SEC. 235. (a) The Secretary of Transportation, under the authority of section 511 of the Railroad Revitalization and Regulatory Reform Act of 1976 (45 U.S.C. 831), shall guarantee obligations of a bankrupt carrier for purposes of providing employee protection in accordance with the terms of any

employee protection agreement or arrangement entered into under section 232.

(b) Any obligation guaranteed under this section shall be treated as an administrative expense of the estate of the bankrupt carrier.

(c) The aggregate unpaid principal amount of obligations which may be guaranteed by the Secretary of Transportation under this section shall not exceed \$75,000,000 for any one bankrupt carrier.

(d) The total liability of any bankrupt carrier in connection with benefits and allowances provided under any employee protection agreement or arrangement entered into under section 232 shall not exceed \$75,000,000.

(e) Except in connection with obligations guaranteed under this section, the United States shall incur no liability to employees in connection with any employee protection agreement or arrangement entered into under section 232.

(f) Section 511 (g) and (h) and section 516 of the Railroad Revitalization and Regulatory Reform Act of 1976 (45 U.S.C. 831 (g) and (h) and 836) shall not apply to any obligation guaranteed under this section.

JUDICIAL REVIEW

SEC. 236. (a) Notwithstanding any other provision of law, any appeal from any decision of the court having jurisdiction over the reorganization of the bankrupt railroad with respect to the constitutionality of this subtitle shall be taken to the United States Court of Appeals having jurisdiction over such bankrupt railroad.

(b) If appeals are taken from decisions described in subsection (a) involving section 232 or 235 of this subtitle, the Court of Appeals shall determine such appeals in a consolidated proceeding, sitting en banc, and shall render a final decision no later than sixty days after the date the last such appeal is filed.

(c) Nothing in this subtitle shall limit the right of any person to commence an action in the United States Court of Claims under section 1491 of title 28, United States Code (commonly referred to as the Tucker Act).

AUTHORITY OF THE RAILROAD RETIREMENT BOARD

SEC. 237. (a) The Railroad Retirement Board may prescribe such regulations as may be necessary to carry out its duties under this subtitle.

(b) In carrying out its duties under this subtitle, the Railroad Retirement Board may exercise such of its powers, duties, and remedies provided in subsections (a), (b), and (d) of section 12 of the Railroad Unemployment Insurance Act (45 U.S.C. 362 (a), (b), and (d)) as are not inconsistent with the provisions of this subtitle.

CONFORMING AMENDMENTS

SEC. 238. Section 14 of the Milwaukee Railroad Restructuring Act (45 U.S.C. 913) is amended—

(1) in subsection (b) by striking out "and" before "section 119" and inserting in lieu thereof a comma; and by inserting ", and section 233 of the Bankrupt Railroad Service Preservation and Employee Protection Act of 1982" after "Assistance Act"; and

(2) in subsection (c) by inserting "and the Bankrupt Railroad Service Preservation and Employee Protection Act of 1982" after "Assistance Act" both places it appears.

The CHAIRMAN. Are there any amendments to title II?

If not, the Clerk will designate title III.

Title III reads as follows:

TITLE III—NORTHEAST CORRIDOR PROJECT AMENDMENTS

SEC. 301. Title VII of the Railroad Revitalization and Regulatory Reform Act of 1976 (45 U.S.C. 851 et seq.) is amended as follows:

(1) Section 703(1)(A)(ii) is amended by striking out "and Albany, New York" and inserting in lieu thereof "Buffalo, New York, and Atlantic City, New Jersey".

(2) Section 704(a)(1) is amended to read as follows:

"(1) \$2,313,000,000 to remain available until expended (A) in order to effectuate the goals of section 703(1)(A)(i) of this title, of which not less than \$27,000,000 shall be available to finance the cost of the equipment modification and replacement which States (or local or regional transportation authorities) will be required to bear as a result of the electrification conversion system of the Northeast corridor pursuant to this title; (B) of which, if the National Railroad Passenger Corporation receives notification from the State of New Jersey or the State of New York on or before June 1, 1983, that such State has approved a plan for the operation of both peak and non-peak period passenger rail service between the main line of the Northeast corridor and Atlantic City, New Jersey, or Buffalo, New York, as the case may be, \$80,000,000 shall be made available by the Secretary to the National Railroad Passenger Corporation as such Corporation deems necessary for rehabilitation and other improvements (including upgrading track and the signal system, ensuring safety at public and private highway and pedestrian crossings by improving signals or eliminating such crossings, and establishing and improving necessary stations and intermodal facilities) on the main line track between such points to ensure that such track will be of sufficient quality to permit safe passenger rail service at a minimum of 79 miles per hour not later than September 30, 1985, and to promote passenger rail use of such track; and (C) of which such sums as may be required shall be available for the following projects with respect to the main line of the Northeast corridor: development of the Union Station in Washington, District of Columbia; installation of 189 track miles of concrete ties with continuously welded rail between Washington, District of Columbia, and New York, New York; renewal of 133 track miles of existing continuously welded rail on concrete tie track between Washington, District of Columbia, and New York, New York; installation of reverse signaling between Philadelphia, Pennsylvania, and Morrisville, Pennsylvania, on numbers 2 and 3 tracks; restoration of ditch drainage in concrete tie locations between Washington, District of Columbia, and New York, New York; undercutting of 83 track miles between Washington, District of Columbia, and New York, New York; rehabilitation of bridges between Washington, District of Columbia, and New York, New York (including Hi line); development of a maintenance-of-way equipment repair facility at Bristol, Pennsylvania; roadbed stabilization at various locations between Washington, District of Columbia, and New York, New York; automation of Bush River Drawbridge at milepost 72.14; improvements to the New York Service Facility to develop rolling stock repair capability; construction of maintenance-of-way bases at Philadelphia, Pennsylvania, Sunnyside, New York, and Cedar Hill, Connecticut; installation of rail car washer facility at

Philadelphia, Pennsylvania; restoration of storage tracks and buildings at the Washington Service Facility; installation of centralized traffic control from Landlith, Delaware, to Philadelphia, Pennsylvania; track improvements including high speed surfacing, ballast cleaning, and associated equipment repair and material distribution; rehabilitation of interlockings between Washington, District of Columbia, and New York, New York; painting of Connecticut River, Groton, and Pelham Bay bridges; additional catenary renewal and power supply upgrading between Washington, District of Columbia, and New York, New York; rehabilitation of structural, electrical, and mechanical systems at the 30th Street Station in Philadelphia, Pennsylvania; and installation of evacuation and fire protection facilities in tunnels at New York, New York."

(3) Section 704(a) is amended by adding at the end the following new sentences: "Funds are authorized to be appropriated under this section in excess of limitations imposed under the preceding sentence with respect to a fiscal year, or for fiscal years after the fiscal year ending September 30, 1983, to the extent that the amount appropriated under the authority of this section for any previous fiscal year is less than the limitation under such sentence with respect to such previous fiscal year. The Secretary shall expend funds from the yearly appropriations under this section for the fiscal years ending September 30, 1983, September 30, 1984, and September 30, 1985, first (A) if the National Railroad Passenger Corporation receives the notification referred to in paragraph (1)(B) of this subsection, for the purposes under such paragraph (1)(B); (B) in the amount of \$62,000,000 for track improvements with respect to the Southwest corridor project in Boston, Massachusetts, less any amounts obligated for such purpose from yearly appropriations for any fiscal year ending before October 1, 1982; and (C) in the amount of \$29,000,000 for rehabilitation and improvement for the South Station in Boston, Massachusetts, less any amounts obligated for such purpose from yearly appropriations for any fiscal year ending before October 1, 1982."

(4) Section 704(b) is amended—

(A) by striking out "LIMITATION.—" and inserting in lieu thereof "LIMITATIONS.—(1)"; and

(B) by adding at the end a new paragraph as follows:

"(2) The projects for which funds are authorized to be appropriated under subsection (a)(1)(C) of this section shall be a part of the Northeast Corridor improvement project, and the goals of this title shall not be considered to be fulfilled until such projects are completed. Such projects shall not be undertaken or viewed as a substitute for any improvements specified in the document entitled "Corridor Master Plan II, NECIP Restructured Program", dated January 1982, prepared for the United States Department of Transportation, Federal Railroad Administration, Northeast Corridor Improvement Project, in cooperation with the Federal Railroad Administration and the National Railroad Passenger Corporation (Amtrak), by DeLeuw, Cather/Parsons, NECIP architect-engineer."

(5) Section 705 is amended—

(A) in subsection (a) by striking out "the" after "reallocation to" and inserting in lieu thereof "such"; and

(B) in subsection (b) by inserting "National Railroad Passenger" before "Corporation".

AMENDMENT OFFERED BY MR. LENT

Mr. LENT. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. LENT: Page 21, lines 12 and 13, strike out "from the State of New Jersey or the State of New York".

Page 21, line 14, insert "(i) from the State of New Jersey" after "1983".

Page 21, lines 17 and 18, strike out "or Buffalo, New York," and insert in lieu thereof "or (ii) from the State of New York that such State has approved a plan for the acquisition and rehabilitation of a line and construction necessary to facilitate improved rail passenger service between Spuyten Duyvil, New York, and the main line of the Northeast corridor, and has approved a plan, in concert with Amtrak and appropriate local governmental officials, for the improvement of the Amtrak station at Syracuse, New York."

Mr. LENT (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. LENT. Mr. Chairman, I will not take 5 minutes.

The amendment that I have offered is simply a clarifying amendment that the gentleman from New York (Mr. LEE) and I have jointly sponsored. We have discussed it with the chairman of the subcommittee, the gentleman from New Jersey (Mr. FLORIO). The gentleman is in agreement.

Basically it seeks to specify two specific improvement projects that are to be carried out pursuant to section 301.

Mr. Chairman, I would urge adoption of the amendment.

Mr. FLORIO. Mr. Chairman, would the gentleman yield?

Mr. LENT. I would be happy to yield to the gentleman from New Jersey.

Mr. FLORIO. Mr. Chairman, I would just say that this is a very important amendment. I support it.

I would like to just say that I also thank the gentleman for his cooperation, not only on this amendment, but through the course of the bill.

Mr. Chairman, I urge approval of the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York (Mr. LENT).

The amendment was agreed to.

The CHAIRMAN. Are there further amendments to title III?

If not, the Clerk will designate title IV.

Title IV reads as follows:

TITLE IV—CONTINUANCE OF PREFERENCE SHARE PROGRAM

EXTENSION

SEC. 401. Section 505(e), 507(a), 507(d), and 509(a) of the Railroad Revitalization and Regulatory Reform Act of 1976 (45 U.S.C. 825(e), 827(a), 827(d), and 829(a)) are amended by striking out "September 30, 1982" each place it appears and inserting in lieu thereof "September 30, 1985".

TRANSACTION ASSISTANCE

SEC. 402. Section 505 of the Railroad Revitalization and Regulatory Reform Act of 1976 (45 U.S.C. 825) is amended by adding at the end the following new subsection:

"(1) PURCHASE OF CONRAIL ESSENTIAL PROPERTIES.—(1) Notwithstanding subsections (a) through (g) of this section (other than subsection (b)(2)), the Secretary shall, upon application of any financially responsible person, including any government authority, except for a class I rail carrier, purchase not less than \$80,000,000 in redeemable preference shares, bonds, or trustee certificates convertible to redeemable preference shares under this section as necessary for the purchase, lease, or rehabilitation of properties of the Corporation which are to be used for common carrier rail service and with respect to which—

"(A) an application for a certificate of abandonment has been filed with the Commission under section 308(a) of the Regional Rail Reorganization Act of 1973; or

"(B) a notice of insufficient revenues has been filed with the Commission under section 308(c) of such Act.

"(2) Preference shares, bonds, and trustee certificates purchased under this subsection shall be purchased under terms and conditions that insure that the applicant will be financially capable of making the requisite dividend or interest and redemption or principal payments without impairing its financial resources, and the Secretary shall insure that all assistance provided under this subsection is likely to be repaid or can be secured.

"(3) For purposes of this subsection, the return on redeemable preference shares shall be the minimum established pursuant to section 506(a)(3) of this title.

"(4) Not less than \$27,000,000 of the amount referred to in paragraph (1) shall be used for the purchase by the Secretary of redeemable preference shares, bonds, or trustee certificates convertible to redeemable preference shares under this section for the rehabilitation of the rail properties of the Delaware River Port Authority, upon application by such Authority."

AUTHORIZATION AMENDMENTS

SEC. 403. Section 509(b) of the Railroad Revitalization and Regulatory Reform Act of 1976 (45 U.S.C. 829(b)) is amended—

(1) by striking out paragraph (3);

(2) by redesignating paragraph (4) as paragraph (3);

(3) in paragraph (3), as redesignated by paragraph (2) of this section—

(A) by striking out " (2) and (3) " and inserting in lieu thereof "and (2)"; and

(B) by inserting " , and not more than \$160,000,000 are authorized to be appropriated for fiscal year 1983 " before the period; and

(4) by adding at the end the following new paragraphs:

"(4) Of the funds appropriated under subsection (a) of this section, \$50,000,000 shall be reserved and made available for meritorious applications regarding the restructuring of rail freight facilities and systems referred to in the last sentence of section 505(b)(2) of this title.

"(5) \$30,000,000 of the funds appropriated under subsection (a) of this section shall be available for the purchase of the rail line of the Chicago, Rock Island and Pacific Railroad Company between Fort Worth and Dallas, Texas, by a State or one or more political subdivisions thereof."

AMENDMENT OFFERED BY MR. LENT

Mr. LENT. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. LENT: Page 28, line 23, insert " , or for the refinancing of the purchase," after "for the purchase".

Page 29, line 1, insert "or of interests in such rail line," after "Dallas, Texas,".

Page 29, line 2, insert " , notwithstanding the third sentence of section 505(b)(2) of this title" after "subdivisions thereof".

Mr. LENT (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. LENT. Mr. Chairman, this is an amendment that I am offering on behalf of the gentleman from Texas (Mr. COLLINS). It is a clarifying, perfecting amendment. I believe it has the approval of the gentleman from New Jersey.

Mr. FLORIO. Mr. Chairman, will the gentleman yield?

Mr. LENT. I would be happy to yield to the gentleman from New Jersey.

Mr. FLORIO. Mr. Chairman, this amendment is acceptable to me and I would urge its approval.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York (Mr. LENT).

The amendment was agreed to.

The CHAIRMAN. Are there further amendments to title IV of the bill?

If not, the Clerk will designate title V.

Title V reads as follows:

TITLE V—MISCELLANEOUS

LOCAL RAIL SERVICE

SEC. 501. Section 5(h)(2)(A) of the Department of Transportation Act (49 U.S.C. 1654(h)(2)(A)) is amended to read as follows:

"(A) two-thirds of the available funds, multiplied by a fraction the numerator of which is the sum of (i) the total rail mileage in the State, other than rail mileage of the Consolidated Rail Corporation, which, in accordance with section 10904(e) of title 49, United States Code, either is 'potentially subject to abandonment' or with respect to which a carrier plans to file, but has not yet filed, an application for a certificate under subsection (a) of such section, and (ii) the total rail mileage of the Consolidated Rail Corporation in the State which such Corporation has certified to be in a situation comparable to 'potentially subject to abandonment' within the meaning of such term under such section 10904 or with respect to which the Consolidated Rail Corporation plans to file, but has not yet filed, an application for a certificate under section 308 of the Regional Rail Reorganization Act of 1973 or under section 10904(a) of title 49, United States Code, and the denominator of which is the total of the rail mileage described in clauses (i) and (ii) in all the States; and"

TRANSPORTATION TEST CENTER

SEC. 502. (a) The Secretary of Transportation shall operate the Transportation Test Center in Pueblo, Colorado, until such time as such Center is transferred to another party for operation.

(b) The Secretary of Transportation shall attempt to enter into an agreement before January 1, 1983, with an organization or individual which is not an agency or agent of the United States for the transfer to such organization or individual of the Center referred to in subsection (a).

(c) Nothing in this section shall be construed to prevent the United States from entering into a contract with the Center referred to in subsection (a) for the performance of work at such Center after any transfer agreed to under subsection (b), so long as authority to enter into any such contract is limited to the extent provided in appropriations Acts.

INSURANCE

SEC. 503. (a) Section 303(b)(6) of the Regional Rail Reorganization Act of 1973 (45 U.S.C. 743(b)(6)) is amended—

(1) in subparagraph (B) by striking out "The Corporation shall be entitled" and all that follows through the end; and

(2) by adding at the end the following new subparagraphs:

"(C) The Corporation shall be entitled to a loan pursuant to section 211(h) of this Act in an amount required for the costs of the insurance coverage and benefits described in subparagraph (B) of this paragraph. For purposes of section 211(h)(4)(A)(iii), amounts required for such costs shall be deemed to be valid administrative claims against the respective estates of the railroads in reorganization, due and payable as of April 1, 1976. The Corporation, or, if the loan is forgiven under section 211(h)(6) of this Act, the Association, shall be entitled to a direct claim as a current expense of administration, in accordance with the provisions of section 211(h) of this Act, for reimbursement of such costs (including interest thereon and the costs and expenses of processing such claims) from the estate of the railroad in reorganization on whose behalf such medical or life insurance was maintained or such benefits were paid. In the case of a railroad in reorganization which is described in subparagraph (D)(i)(I), such amounts shall be deemed to be obligations of such railroad, due and payable as of April 1, 1976, and shall be reimbursable in accordance with the procedures set forth in paragraphs (4), (5), and (6) of such section 211(h).

"(D) As used in subparagraphs (B) and (C) of this paragraph, the term—

"(i) 'railroad in reorganization' includes (I) any railroad which is controlled by a railroad in reorganization but is not itself subject to a bankruptcy proceeding, if such railroad conveyed substantially all of its rail properties to the Corporation pursuant to paragraph (1) of this subsection and conducted operations over such rail properties prior to the date of such conveyance; and (II) any corporation which, pursuant to a plan of reorganization under section 77 of the Bankruptcy Act, is the successor in interest to a railroad in reorganization; and

"(ii) 'employee' does not include a member of a board of directors, a president, vice president, general counsel, treasurer, secretary, comptroller, or any other person who performed functions corresponding to those performed by such officers immediately prior to his retirement.

"(E) Any action or claim for benefits or premium payments related to any medical or life insurance coverage described in subparagraph (B) of this paragraph shall not be brought or maintained against the Corporation, the National Railroad Passenger Corporation, the Association, or the United States.

"(F) Any obligation of a railroad in reorganization which is described in subparagraph (D)(i)(II)—

"(i) which railroad in reorganization was authorized and directed, by an order of its reorganization court issued prior to the effective date of this subparagraph, to continue life and medical programs for nonagreement employees who retired prior to April 1, 1976, or

"(ii) which is an obligation described in section 211(h)(1)(A)(viii) of this Act and which the Corporation paid on the basis of an acknowledgement of such obligation by the trustees of such railroad in reorganization under section 211(h)(4)(A)(ii) of this Act,

shall be a valid administrative claim against such railroad in reorganization and the Corporation shall be entitled to a direct claim as a current expense of administration for reimbursement of the amount of such obligation paid as provided under subparagraph (C) of this paragraph."

(b) Section 211(h)(1)(A)(viii) of the Regional Rail Reorganization Act of 1973 (45 U.S.C. 741(h)(1)(A)(viii)) is amended by inserting "through (D)" after "section 303(b)(6)(B)".

(c) Section 2 and section 3 of the Act of November 4, 1978 (Public Law 95-597; 92 Stat. 2548), are repealed.

(d) The amendments and repeals made by this section shall be effective as of the date of enactment of Public Law 95-597.

BURNHAM CANAL

SEC. 504. The portion of the Burnham Canal, in Milwaukee, Wisconsin, which is underneath and west of a point one hundred feet east of South Eleventh Street is declared to be not a navigable water of the United States within the meaning of the Constitution and laws of the United States. The right to alter, amend, or repeal this section is hereby expressly reserved.

COMMUTER TRANSITION FUNDING

SEC. 505. (a) Section 1139(b) of the Northeast Rail Service Act of 1981 is amended—

(1) by inserting "(1)" after "(b)";

(2) by striking out "in the fiscal year ending September 30, 1982";

(3) by striking out "contracting with Amtrak Commuter"; and

(4) by adding at the end a new paragraph as follows:

"(2)(A) Any funds appropriated under the authority of this subsection prior to the date of enactment of the Rail Safety and Service Improvement Act of 1982 shall be distributed by the Secretary to Amtrak Commuter and commuter authorities according to the statutory provisions of paragraph (1) before the expiration of 10 days after such date of enactment.

"(B) Any funds appropriated under the authority of this subsection on or after the date of enactment of the Rail Safety and Service Improvement Act of 1982 shall be distributed by the Secretary to Amtrak Commuter and commuter authorities according to the statutory provisions of paragraph (1) before the expiration of 30 days after the date of enactment of the Act which appropriates such funds."

(b) Section 216(g) of the Regional Rail Reorganization Act of 1973 (45 U.S.C. 726(g)) is amended—

(1) by inserting "(1)" after "APPROPRIATION.—"; and

(2) by adding at the end the following new paragraph:

"(2) To the extent provided in appropriation Acts, any funds appropriated under the authority of paragraph (1) of this subsection prior to the date of enactment of the Rail Safety and Service Improvement Act of 1982 may be reappropriated to the Secretary, to facilitate the transfer of rail commuter services from the Corporation to other operators, for distribution under the statutory provisions of section 1139(b) of the Northeast Rail Service Act of 1981, except that the total amount of funds which may be so reappropriated shall not exceed \$40,000,000."

(c) Section 217 of the Regional Rail Reorganization Act of 1973 (45 U.S.C. 727) is amended as follows:

(1) Subsection (a) is amended by striking out "\$262,000,000" and inserting in lieu thereof "\$162,000,000".

(2) Subsection (f) is amended to read as follows:

"(f) AUTHORIZATION OF APPROPRIATIONS.—

(1) There is authorized to be appropriated not to exceed \$262,000,000—

"(A) of which not to exceed \$162,000,000 shall be appropriated to the Association for purposes of purchasing securities and accounts receivable of the Corporation under this section, such sums to remain available until the Secretary transfers the Corporation under title IV of this Act;

"(B) of which not to exceed \$75,000,000 shall be appropriated to the Secretary, to facilitate the transfer of rail commuter services from the Corporation to other operators, for distribution under the statutory provisions of section 1139(b) of the Northeast Rail Service Act of 1981; and

"(C) of which not to exceed \$25,000,000 shall be appropriated to the Secretary to be allocated for commuter rail purposes to any commuter authority that was providing commuter service, operated by a railroad that entered reorganization after calendar year 1974, as of January 1, 1979.

"(2) All sums received on account of the holding or disposition of any securities or accounts receivable referred to in paragraph (1)(A) shall be deposited in the general fund of the Treasury.

"(3) The amount authorized to be appropriated under paragraph (1)(B) shall be reduced, in an amount equal to any amounts reappropriated under the authority of section 216(g)(2) of this Act, upon the date of enactment of any Act which reappropriates such amounts."

NORTHEAST CORRIDOR COORDINATION

SEC. 506. (a) Section 505 of the Rail Passenger Service Act is amended—

(1) by striking out "Board of Directors of Amtrak Commuter" both places it appears and inserting in lieu thereof "Northeast Corridor Coordination Board"; and

(2) by adding at the end a new subsection as follows:

"(c)(1) The Northeast Corridor Coordination Board shall consist of (A) one member from each commuter authority, within the meaning of such term under section 1135(a)(3) of the Northeast Rail Service Act of 1981, which operates rail commuter service over the Northeast Corridor; (B) two members to be named by Amtrak; and (C)

one member to be named by the Consolidated Rail Corporation.

"(2) Amtrak shall make available to the Northeast Corridor Coordination Board such staff assistance as such Board requires in the performance of its functions under this section."

(b) Section 216(g) of the Regional Rail Reorganization Act of 1973 (45 U.S.C. 726(g)), as amended by section 505(b) of this Act, is amended by adding at the end a new paragraph as follows:

"(3) The Association shall immediately make available to the Corporation directly, without the purchase of securities, \$1,000,000, out of any funds appropriated under this section for the purpose of constructing a connection from the Corporation's line 64-0597 to line 64-0202 and for other necessary expenses for the improvement of line 64-0202."

TRANSFER OF FEDERALLY OWNED RAILROAD

SEC. 507. (a) The Secretary of Transportation shall, before October 1, 1982, transfer all the rail properties of, and the authority and responsibility for operating, the Alaska Railroad to the State of Alaska. Such transfer shall be made for consideration to the United States equal to 75 per cent of the net liquidation value of such rail properties.

(b) After the transfer under subsection (a), the railroad transferred shall be deemed to be a carrier by railroad subject to the provisions of subtitle IV of title 49 of the United States Code and all other laws applicable to such carriers, including the anti-trust laws of the United States.

(c) For purposes of this section, the term—

(1) "Rail properties of the Alaska Railroad" means all right, title, and interest of the United States to lands, buildings, facilities, machinery, equipment, supplies, records, and other real and personal properties, both tangible and intangible in which there is an interest reserved, withdrawn, appropriated, owned, or administered by or for the Alaska Railroad as of the date of enactment of this Act, but excluding any such properties disposed of, and including any such properties acquired, in the ordinary course of business after that date but before the date of transfer, and also excluding the following:

(A) the unexercised reservation to the United States for future rights-of-way required in all patents for land taken up, entered, or located in Alaska, as provided by the Act of March 12, 1914 (43 U.S.C. 975 et seq.);

(B) the right of the Secretary or any other person or entity to exercise the power of eminent domain;

(C) real or personal property which the Secretary determines with the consent of the State, prior to the date of transfer pursuant to this section, to be necessary to carry out the functions of the Federal Government after the date of transfer;

(D) any lands or interests therein (except as specified in subsection (d)) within the boundaries of any conservation system unit or component of the national forest system, and the right of use and occupancy described in subsection (d)(5);

(E) lands which as of the date of enactment of this Act had been selected by any Village Corporation pursuant to the Alaska Native Claims Settlement Act; and

(F) land subject to claims of valid existing rights other than claims based on selections described in subparagraph (E) of this paragraph.

(2) "Conservation system unit" has the same meaning as such term has under sec-

tion 102(4) of the Alaska National Interest Lands Conservation Act.

(3) "Alaska Railroad" means the agency of the United States Government that is operated by the Department of Transportation as a rail carrier in Alaska under authority of the Act of March 12, 1914 (43 U.S.C. 975 et seq.) (popularly referred to as the "Alaska Railroad Act") and section 6(i) of the Department of Transportation Act (49 U.S.C. 1655(i)).

(4) "State" means the State of Alaska or the State-owned railroad, as the context requires.

(5) "State-owned railroad" means the authority, agency, corporation, or other entity which the State of Alaska designates or contracts with to hold, operate, or manage the rail properties of the Alaska Railroad.

(6) "Secretary" means the Secretary of Transportation.

(7) "Date of transfer" means that date, subsequent to the date of enactment of this Act, upon which the Secretary completes the transfer of the rail properties of the Alaska Railroad to the State pursuant to this section.

(8) "Native Corporation" has the same meaning as such term has under section 102(6) of the Alaska National Interest Lands Conservation Act.

(9) "Village Corporation" has the same meaning as such term has under section 3(j) of the Alaska Native Claims Settlement Act.

(10) "Right-of-way" means an area extending one hundred feet on either side of the centerline of any main or branch line of the Alaska Railroad where permanently fixed railroad tracks were in place on the date of enactment of this Act.

(11) "Lands" means lands, waters, or interests therein.

(12) "Public lands" has the same meaning as such term has under section 3(e) of the Alaska Native Claims Settlement Act.

(13) "Stipulations" means covenants, conditions, and restrictions prescribed and administered by the Secretary of Agriculture for the protection, administration, and utilization of easements over national forest system lands.

(d)(1) Effective on the date of enactment of this Act, all right, title, and interest to lands within the boundaries of a conservation system unit or national forest which are reserved, withdrawn, appropriated, owned, or administered or otherwise used or claimed by or for the Alaska Railroad are vested in the United States to be administered by the Secretary of the Interior or the Secretary of Agriculture, as appropriate, and shall become part of such conservation system unit or national forest.

(2) Effective on the date of enactment of this Act, there shall be granted to the Alaska Railroad the right to use and occupy, without compensation, the surface of the lands within that portion of the right-of-way of the Alaska Railroad located within Denali National Park and Preserve and the surface of any other lands within such National Park and Preserve used on such date for terminal and other facilities, in a manner not inconsistent with the purposes for which the Park and Preserve was established and subject to the following conditions:

(A) use of such lands within such National Park and Preserve shall be limited to railroad and existing transportation, transmission, or communication uses and maintenance only, and shall not include the right to disturb the surface or to remove any minerals, timber, sand, gravel, or other re-

sources except to the extent necessary to reasonably maintain the railroad;

(B) use of such lands shall be subject to all laws and regulations regarding the protection of the scenic, scientific, historic, archaeological, cultural, fish and wildlife, and other values and resources of the national park system;

(C) there shall be reserved to the Secretary of the Interior existing and future rights-of-way and easements for park administration, transportation and utility purposes, provided such rights-of-way and easements do not unreasonably interfere with railroad operation and support functions; and

(D) there shall be reserved to the Secretary of the Interior the right to use and occupy without compensation the property known as McKinley Park Station for national park administrative purposes, provided such use and occupancy does not unreasonably interfere with railroad operation and support functions.

(3) Effective on the date of enactment of this Act, there shall be granted to the Alaska Railroad the right to use and occupy, without compensation, the surface of the lands within that portion of the right-of-way of the Alaska Railroad located within any national forest and the surface of any other lands within national forests used on such date by the Alaska Railroad for terminal and other railroad facilities, subject to such reasonable stipulations as the Secretary of Agriculture may establish.

(4) The rights granted to the Alaska Railroad under paragraphs (2) and (3) of this subsection shall be transferred to the State of Alaska on the date of transfer. If subsequent to such transfer the State abandons any such right, or discontinues use of any of the lands affected by such rights for railroad purposes, such rights shall terminate and shall not be renewed except with the approval of the Congress. For purposes of this paragraph, abandonment shall be effected upon written notice thereof from the Governor of Alaska to the Secretary of Agriculture or the Secretary of the Interior, as appropriate. Discontinuance of use shall result from ten years of continuous nonuse and shall not be effected until one year after notice of such discontinuance is published in the Federal Register by the Secretary, the Secretary of the Interior, or the Secretary of Agriculture, unless, within the one-year period, the State of Alaska brings an appropriate action in United States District Court for the District of Alaska to establish that the use has been continuing without a lapse of 10 years.

(5) On the date of transfer there shall be transferred to the Secretary of the Interior the right to use and occupy without compensation 5,000 square feet of railroad land at Talkeetna as described in ARR Lease Number 69-25-0003-5165 for National Park Service administrative activities.

(e)(1)(A) On the date of transfer, the land excluded from the meaning of the term "rail properties of the Alaska Railroad" pursuant to subsection (c)(1)(F) shall be conveyed to the State subject to valid existing rights.

(B) Within one year after the date of transfer, the Secretary of the Interior shall determine the validity of all claims of valid existing rights arising under Federal law in land excluded from the meaning of the term "rail properties of the Alaska Railroad" pursuant to subsection (c)(1)(F). For the purpose of computing the consideration specified in subsection (a) of this section, the

value of any valid existing rights in such lands shall be deducted from the value of the lands conveyed to the State under subparagraph (A) of this paragraph, and the remainder shall be deemed to be rail properties of the Alaska Railroad.

(2) On the date of enactment of this Act, land described in subsection (c)(1)(E) shall be transferred to the Secretary of the Interior.

(3)(A) Within one year after the date of enactment of this Act, the Secretary of the Interior shall determine, pursuant to the Alaska Native Claims Settlement Act, what tracts of land excluded from the meaning of the term "rail property of the Alaska Railroad" pursuant to subsection (c)(1)(E) were public lands available for selection by and conveyance to Native corporations under the Alaska Native Claims Settlement Act. If the Secretary of the Interior fails to make a final determination with respect to any such tract within one year after the date of enactment of this Act, such tract shall be deemed public land available for such selection and conveyance.

(B) Initial judicial review of a determination by the Secretary of the Interior described in subparagraph (A) of this paragraph shall be vested exclusively in the United States District Court for the District of Alaska. A civil action filed pursuant to this subparagraph shall be assigned for hearing at the earliest possible date, shall take precedence over other matters pending on the docket of such United States district court at that time, and shall be expedited in every way by such court and by any appellate court. The State shall have standing to participate in any administrative determination and in any judicial review described in this paragraph.

(C)(i) Each tract of land which—

(I) is excluded from the meaning of the term "rail properties of the Alaska Railroad" pursuant to subsection (c)(1)(E); and

(II) the Secretary of the Interior determines was public land (and which is not the subject of a civil action described in subparagraph (B) of this paragraph), shall be conveyed by the Secretary of the Interior to the appropriate Native corporations pursuant to the terms and conditions of the Alaska Native Claims Settlement Act.

(ii) Each tract of land which—

(I) is excluded from the meaning of the term "rail properties of the Alaska Railroad" pursuant to subsection (c)(1)(E); and

(II) the Secretary of the Interior determines was not public land (and which is not the subject of a civil action described in paragraph (3)(B) of this subsection), shall be deemed to be rail property of the Alaska Railroad and shall be transferred by the Secretary of the Interior to the State pursuant to subsection (a) of this section.

(D) Prior to the conveyance of a tract of land pursuant to subparagraph (C) of this paragraph, the Secretary of the Interior shall administer such tract in a manner—

(i) which does not substantially impair the value to or the use of such tract (as such value and use were on the date of enactment of this Act) by either the Native corporation which has selected the tract or the railroad, and

(ii) which does not substantially alter the physical condition of, or create new third party interests in, such tract.

(4)(A) On the date of transfer, the State shall have the right to use and occupy, without compensation, the surface of land within that portion of the right-of-way located within tracts of land excluded from

the meaning of the term "rail properties of the Alaska Railroad" pursuant to subsection (c)(1)(E), subject to the condition that use of such land shall be limited to railroad and existing transportation, transmission, and communication uses and maintenance only.

(B) If the Secretary of the Interior determines that a tract of land excluded from the meaning of the term "rail properties of the Alaska Railroad" pursuant to subsection (c)(1)(E) was public land and properly selected, and if such tract includes a portion of the right-of-way, then notwithstanding any other provision of law, within ninety days after such determination, the Village Corporation which selected the tract may relinquish its selection of land within the right-of-way. Upon such relinquishment, such land shall be treated as rail property of the Alaska Railroad which shall be conveyed to the State subject to the following conditions:

(i) the State may not build, construct, or operate a public road or highway not in existence on the date of enactment of this Act within such right-of-way; and

(ii) if the right-of-way is used for other than railroad, transportation, transmission, or communication purposes, or if railroad use of the right-of-way is discontinued—

(I) the surface estate of such right-of-way shall revert to the Village Corporation which relinquished its selection or its successor in interest,

(II) the subsurface estate shall revert to the regional corporation which would have received title to such estate if the right-of-way had been conveyed pursuant to the Alaska Native Claims Settlement Act, and

(III) land within the right-of-way shall not be charged against the acreage entitlement of any Native corporation.

(C) Effective ninety-one days after any determination by the Secretary of the Interior that a tract of land excluded from the meaning of the term "rail properties of the Alaska Railroad" pursuant to subsection (c)(1)(E) was public land and properly selected, if the Village Corporation which selected such tract has not relinquished its selection of any portion of such tract which is within the right-of-way, then with respect to such portion within the right-of-way the reservation of an easement for railroad purposes pursuant to section 17(b) of the Alaska Native Claims Settlement Act shall be deemed not to afford the operation of the State-owned railroad sufficient protection, and the Secretary of the Interior shall immediately convey such lands within the right-of-way to the State.

(f) For purposes of the transfer of the Alaska Railroad pursuant to this Act, the State of Alaska shall have the option of paying the consideration specified in subsection (a) of this section wholly or partly in cash or wholly or partly through transfer to the United States of lands or interests in lands located within the boundaries of one or more conservation system units or areas required by existing law to be studied for possible identification and designation as conservation system units. The Secretary of the Interior or the Secretary of Agriculture, as appropriate, may accept or reject such lands for the purposes of this section, and shall seek to acquire lands which significantly further the conservation purposes of the Alaska National Interests Lands Conservation Act. Lands or interests therein to be transferred to the United States in consideration of the transfer of the rail properties of the Alaska Railroad shall be credited toward the consideration specified in sub-

section (a) of this section according to their value as appraised by the Secretary of the Interior in consultation with the State of Alaska, and upon transfer to the United States, shall become part of any relevant conservation system unit or national forest and administered accordingly.

(g) After the date of enactment of this Act, the State of Alaska may request the Secretary of the Interior or, when appropriate under applicable law, the Secretary of Agriculture to grant expeditiously a right-of-way in order that the Alaska Railroad or the State-owned railroad may be extended across Federal lands for railroad purposes. As part of such application, the State may apply for a lease or permit to the State or State-owned railroad of the surface of any necessary or convenient terminal and station grounds in the vicinity of the requested right-of-way. If such right-of-way is granted, it shall be granted in accordance with applicable provisions of law, including but not limited to title XI of the Alaska National Interests Lands Conservation Act or title V of the Federal Land Policy and Management Act of 1976.

(h)(1) Upon the request of the head of any affected Federal department or agency, or upon his own motion, the Attorney General shall institute, in the United States District Court of Alaska, appropriate proceedings to enforce subsection (d), (e), (f), or (g) of this section.

(2) Any interested party shall have standing to bring an action to enforce subsections (d), (e), (f), or (g) of this section in any appropriate United States district court.

AUTHORIZATION OF APPROPRIATION

SEC. 508. There is authorized to be appropriated to the Secretary of Transportation \$15,600,000 for the fiscal year ending September 30, 1983, for the Office of the Administrator of the Federal Railroad Administration, of which not to exceed \$9,200,000 shall be used for executive direction and administration and not to exceed \$6,400,000 shall be used for policy support.

The CHAIRMAN. Are there amendments to title V?

AMENDMENT OFFERED BY MR. LEE

Mr. LEE. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. LEE: Page 52, after line 14, insert a new section as follows:

RAILROAD DEVELOPMENT CRITERIA

SEC. 509. (a) Section 10910(b)(1)(A)(ii) of title 49, United States Code, is amended by inserting "before an application to purchase such line, or any required preliminary filing with respect to such application, is filed under this section" after "10903 and 10904 of this title."

(b) The amendment made by subsection (a) shall be effective with respect to any application or preliminary filing with respect to which the Commission has made no final decision prior to May 1, 1982.

Mr. LEE (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. LEE. Mr. Chairman, this amendment is very straightforward. It will

overcome an erroneous interpretation that evidently has been adopted by the Interstate Commerce Commission relative to the feeder development lines. The intention of the amendment is to clarify against existing law to insure that the feeder line services are continued explicitly for shippers of agricultural and other commodities.

Mr. FLORIO. Mr. Chairman, will the gentleman yield?

Mr. LEE. I yield to the gentleman from New Jersey.

Mr. FLORIO. Mr. Chairman, the gentleman is correct. This is a clarifying amendment designed to achieve an interpretation which is compatible with the congressional intent in the previous legislation passed.

I would support the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York (Mr. LEE).

The amendment was agreed to.

Mr. GLICKMAN. Mr. Chairman, I move to strike the last word.

Mr. Chairman, for some time I have been interested in the issue of rail safety. Over the last several years we have seen an increasing number of rail accidents, rail employees hurt, property damage increase, and that problem is compounded by the fact that hazardous materials and other forms of materials dangerous to the public are being transported on the rail lines.

I realize that within the last year or so the statistics look a lot better; but because of these problems, as the chairman of the subcommittee, the gentleman from New Jersey (Mr. FLORIO), and the gentleman from California (Mr. MATSUI) and I requested a GAO investigation to evaluate the FRA's rail safety program.

The study makes three very serious criticisms of the Federal Railroad Administration. It indicates the following:

1. FRA should focus more on comprehensively assessing the safety of an entire railroad, rather than concentrating on finding individual safety violations.

2. While FRA should adopt a systems approach, it still needs to monitor discrete problems and assess civil penalties where needed. Yet because of long time lags, FRA's current penalty assessment process is ineffective as a deterrent.

3. The State safety approach is valuable, but is not as well coordinated with the federal program as it should be.

Now, the committee report indicates that these are constructive criticisms and understands that the FRA is generally moving in the direction suggested by the GAO.

The report also indicates the committee believes system assessments can be particularly useful devices for improving rail safety.

My question to the subcommittee chairman, though, is in fact the FRA really moving to this issue of a railroad system assessment? Does the FRA have enough funds to move

toward the issue of system assessment, assessing railroads as a whole rather than in minute pieces which do little to protect the public at large, as well as protect railroad employees. Is the FRA's current effort nothing but a paper facade to let the Congress believe that they are moving ahead on serious safety assessment and enforcement of the law? And does the chairman of the subcommittee intend to monitor the situation to insure that the FRA complies with the GAO request?

Mr. FLORIO. Mr. Chairman, if the gentleman would yield, this whole matter was the subject of a full day's hearing.

The direct answer to the gentleman's questions is that, yes, this Congress and the subcommittee has made it abundantly clear to the FRA that this is the direction we should be going in.

□ 1540

The assurances were obtained from the FRA Administrator that this was the direction in which they were going. We feel that the moneys that have been allocated by way of authorization—and we know the administration did not want quite as much money as we are putting into this authorization—we feel those moneys are needed and it will be the intention of this subcommittee and, hopefully, the Congress to oversee the activities of FRA in accordance with the suggestions of the GAO report.

Mr. GLICKMAN. I know that under the act, the Federal Railroad Safety Authorization Act, which I believe the gentleman from New Jersey (Mr. FLORIO) authored in 1980, required the Department of Transportation to submit a system safety plan January 31 of 1981. That plan came to the Congress 11 months late, almost January of 1982.

I guess my real fear—and I want to express it for the record so that the FRA knows about it—is that it, through its Administrator Robert Blanche, has committed to the gentleman from New Jersey as well as to myself in hearings before the Subcommittee on Transportation, Aviation and Materials of the Committee on Science and Technology, which I chair, that it is not going to do a slipshod job of enforcing any safety violations which are occurring on the Nation's railroads.

I just want to make the point that it has agreed, at least verbally, and in writing, that it is going to comply with the GAO request and enforce safe railroad operating and capital standards with vigor and effectiveness.

I, as one member, expect the FRA to do so.

Mr. Chairman, I yield back the the balance of my time.

The CHAIRMAN. Are there further amendments to title V?

Mr. LENT. Mr. Chairman, I move to strike the last word.

I would like, with the Chairman's agreement, to engage in a colloquy with him. I have prepared, although it is not an amendment fully perfected, which I am not going to offer at the present time, to address two issues involving labor protection for Conrail employees. Through inadvertence, neither of these issues were addressed when the Congress passed the Northeast Rail Services Act last year.

The first of those omissions was a provision that would protect Conrail Northeast corridor passenger service employees when Amtrak takes over such service on January 1, 1983.

It seems to me there ought to be some requirement in the law that Amtrak bargain with the labor representative of those employees. Under the existing law, as I understand it, this is not now required and I would hope that the gentleman from New Jersey and I will be able to work out this particular problem in conference to assure that Amtrak could not simply hire employees off the street but would negotiate a new collective bargaining agreement with the representatives of rail labor.

Rail labor was required to make several sacrifices last year, and in all fairness I think we ought to put something in the statute to take care of this problem.

Mr. FLORIO. Mr. Chairman, will the gentleman yield?

Mr. LENT. I would be glad to yield to the gentleman from New Jersey.

Mr. FLORIO. I thank the gentleman for yielding.

Mr. Chairman, the gentleman is correct. It was this Member's intention, and it is my recollection that it is the intention of the Congress, that the Conrail employees who operate the intercity operations in the Northeast corridor for Amtrak were to be the employees; that in fact negotiations have been going on between Amtrak and the brotherhoods for the assumption of responsibilities by those Conrail operating crews to operate the trains over the Northeast corridor project that are operated by Amtrak.

It is my understanding those negotiations are continuing. It is appropriately a subject for collective bargaining.

These employees will be the employees operating the Amtrak intercity operations in the Northeast corridor.

Mr. LENT. I thank the gentleman.

The second provision that I think was forgotten in last year's Northeast Rail Services Act was a clause which would clarify the scope of section 701 as the exclusive labor protection provided to those Conrail employees who are eligible to be hired for Northeast corridor employment by Amtrak. It is not clear from the language of the

statute that section 701 of the Regional Rail Reorganization Act of 1973 was to be the exclusive provision for labor protection, although there is language—and I would ask that it be entered into the RECORD following our discussions here today—in the statement of the managers on title XI of the Omnibus Budget Reconciliation Act of 1981, which is in section 1143 of that statement, which makes it very clear that section 701 is the exclusive protection for employees, and any employee protection contained in section 405 of the Rail Passenger Service Act or under any collective bargaining agreements is replaced by this provision.

Further on in the statement of the managers, it is stated:

Conrail's liability and the liability of the liability of the Federal Government is strictly limited to the funds authorized in this section.

Some concern has been expressed that those Conrail employees, adversely affected by any assumption of intercity passenger service on or off the Northeast passenger corridor, in addition to the 701 protection, may still be entitled, as well, to protections under section 405 or other provisions of various existing collective bargaining agreements. That would clearly not be the case under the language which is clear in the statement of the managers and also under the clear language of our House committee report on the bill when it exited our committee.

I would hope that the gentleman from New Jersey would agree with me that at conference we would work together to try to remedy this situation.

The statement of managers on title XI follows:

STATEMENT OF MANAGERS ON TITLE XI OF THE OMNIBUS BUDGET RECONCILIATION ACT OF 1981

SECTION 1143—PROTECTION FOR CONRAIL
EMPLOYEES
House bill

Section 301 amends the 3R Act by adding a new Title VII. Section 701 establishes a program for protecting Conrail employees previously protected under Title V of the 3R Act, while limiting the cost to the federal government. Conrail Title V labor protection is repealed and the protection provided is less than the normal protection in the railroad industry. It is less only because of the dire financial circumstances of the Corporation.

If the employees and the Secretary of Labor are unable to agree on the elements of protection for the employees within ninety days, the Secretary of Labor shall prescribe the benefits. The program established should not contain elements which cause funds to be expended beyond those authorized under section 713.

The benefits under this section are intended to replace the benefits provided under Title V of the 3R Act. This is the exclusive protection for employees, and any employee protection contained in collective bargaining agreements is replaced by this protection. Title V was originally intended to provide for a limited amount of federal

funding of employee protection for Conrail employees. It was anticipated that the liability would not be unreasonable. Despite revisions to Title V the liability has proved too great.

A prerequisite to a legislative solution that will permit continued operation of essential rail services in the region is the replacement of Title V with this program of labor protection. Conrail's liability and the liability of the federal government is strictly limited to the funds authorized in this section.

Mr. FLORIO. Mr. Chairman, will the gentleman yield?

Mr. LENT. I yield to the distinguished gentleman from New Jersey.

Mr. FLORIO. I thank the gentleman for yielding.

Mr. Chairman, I expect to be able to work with the gentleman from New York (Mr. LENT) in conference to achieve the end that is fairest to all concerned.

The gentleman is correct that the 701 provision was the successor to title V, and those employees who were entitled to labor protection exclusively under title V would be exclusively entitled to protection under the 701 program.

To the degree that there is any ambiguity as to whether an employee is entitled to protection under title V exclusively, perhaps as we go forward we can clarify that ambiguity.

Mr. LENT. I thank the gentleman.

The CHAIRMAN. The time of the gentleman from New York (Mr. LENT) has expired.

Are there further amendments to title V?

If not, the question is on the amendment in the nature of a substitute, as amended.

The amendment in the nature of a substitute, as amended, was agreed to.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker pro tempore (Mr. MURTHA) having assumed the chair, Mr. FRANK, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 6308) to insure rail safety, provide for the preservation of rail service, transfer responsibility for the Northeast corridor improvement project to Amtrak, and for other purposes, pursuant to House Resolution 546, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment to the amendment in the nature of a substitute adopted by the Committee of the Whole? If not, the question is on the amendment.

The amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the

third time, and passed. The title of the bill was amended so as to read: "A bill to ensure rail safety, provide for the preservation of rail service, ensure the completion of the Northeast corridor improvement project, and for other purposes."

A motion to reconsider was laid on the table.

AUTHORIZING THE CLERK TO
MAKE CORRECTIONS IN EN-
GROSSMENT OF H.R. 6308, RAIL
SAFETY AND SERVICE IM-
PROVEMENT ACT OF 1982

Mr. FLORIO. Mr. Speaker, I ask unanimous consent that, in the engrossment of the bill, H.R. 6308, the Clerk be authorized to correct section numbers, punctuation, and cross references and to make such other technical and conforming changes as may be necessary to reflect the actions of the House in amending that bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

GENERAL LEAVE

Mr. FLORIO. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks, and to include extraneous matter therein, on the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

□ 1550

NATIONAL DEVELOPMENT
INVESTMENT ACT

Mr. OBERSTAR. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 6100) to amend the Public Works and Economic Development Act of 1965 and the Appalachian Regional Development Act of 1965.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Minnesota (Mr. OBERSTAR).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 6100, with Mr. GEPHARDT in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. Pursuant to the rule, the first reading of the bill is dispensed with.

Under the rule, the gentleman from Minnesota (Mr. OBERSTAR) will be recognized for 45 minutes, and the gentle-

man from Pennsylvania (Mr. CLINGER) will be recognized for 45 minutes.

The Chair recognizes the gentleman from Minnesota (Mr. OBERSTAR).

Mr. OBERSTAR. Mr. Chairman, I yield such time as he may consume to the chairman of the full Committee on Public Works and Transportation, the gentleman from New Jersey (Mr. HOWARD).

Mr. HOWARD. Mr. Chairman, I rise in strong support of H.R. 6100, the National Development Investment Act.

I want to commend JIM OBERSTAR, chairman of the Economic Development Subcommittee, for his leadership and foresight in examining the economic development needs and revising and restructuring this legislation in light of the budgetary restraints and the political realities. His dedication, hard work and commitment is apparent through his authorship of this constructive economic development initiative. I also want to compliment all members of this subcommittee for their contribution to this legislation and their interest in improving the Nation's economic development programs.

As has been customary on this committee, not only was there bipartisan cooperation and support, but BILL CLINGER, the recently named ranking minority member of the subcommittee, has been a major contributor to the National Development Investment Act. His ideas, his practical experience as a former counsel of the Economic Development Administration and his perseverance were key factors in developing this bill.

While I will not take the time to mention individually each member of the committee who played a role in shaping this legislation, I do want to thank my colleague, the ranking member of the Public Works and Transportation Committee, DON CLAUSEN, for the valuable advice and assistance he has given on this bill, as well as the major contributions he has made to economic development legislation throughout the years.

Also, a special word of appreciation is due to the members of the Banking, Finance and Urban Affairs Committee, Chairman ST GERMAIN and JIM BLANCHARD, chairman of the Subcommittee on Economic Stabilization, for their assistance in moving this legislation forward so expeditiously.

This bill is the major economic development initiative of this Congress. It provides badly needed funds to promote local economic recovery, to foster economic growth and stability in urban and rural areas and to create jobs. The National Development Investment Act reinforces this committee's longstanding commitment to promote economic and regional development and to assist communities in building the necessary public facilities to support private investment. It pro-

vides \$500 million annually through fiscal year 1985 to assist State and local governments in their economic development efforts. In addition, it provides for an orderly closeout of the highway and nonhighway programs of the Appalachian Regional Commission.

I am very proud of the fact that the Public Works and Transportation Committee has a long-established record of bringing before the Congress legislative initiatives to stimulate local economic recovery and create jobs in the private sector. The Accelerated Public Works Act and the Public Works and Economic Development Act, predecessors of this legislation today, illustrate this point. In the same mold, the legislation before us today stresses job creation and economic expansion in a manner which is geared to address the problems of the 1980's.

H.R. 6100 recognizes that economic recovery depends on the ability of communities and townships throughout this Nation to create jobs for its residents and achieve economic stability. It provides matching grants to local governments to support economic development activities. In this way, we are assisting local government develop a strong economic base to support development and encourage economic renewal. At the same time, this bill gives local officials the maximum flexibility to choose the course of action best suited to their economic needs.

The economic development tools which have been tried and proven in the past 17 years' experience under the Public Works and Economic Development Act are retained under the National Development Investment Act. However, changes have been made to respond to some of the past criticisms which have been leveled at the Economic Development Administration.

This new approach scales down eligibility so that areas of greatest need will receive this assistance. It encourages a community to pool public and private resources to design or develop investment strategy best suited to their needs. Assistance to support their efforts is provided through grants for the construction, rehabilitation, repair or improvement of developmental facilities. In addition, a new feature permits the establishment of locally administered revolving loan funds to support small business expansion and to retain existing firms. Funds are available to provide technical assistance and to aid communities in developing an investment strategy.

The second title of the bill continues the programs of the Appalachian Regional Commission. For fiscal year 1983, \$298 million is provided to fund these programs: \$215 million for highway programs—\$83 million for the nonhighway activities. In subsequent years, the Appalachian funds will de-

cline as the health and nonhighway portions of the programs are completed and the highway construction is accelerated. This extension has been unanimously endorsed by the Governors of the 13 States included in the Appalachian region.

I urge your support of H.R. 6100. It is a very modest proposal in view of the condition of many local economies and the number of unemployed workers—but it is an opportunity to do something positive to encourage economic recovery.

Mr. OBERSTAR. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman and colleagues, it is not often that a committee brings a fresh new legislative concept to the House floor. It is not often that a committee takes a popular and successful program and rewrites it from top to bottom. Today is one of those rare occasions when the House will consider such legislation. H.R. 6100, the National Development Investment Act, is that legislation. It is a fresh new look at economic development, at the participants, at the way in which programs are developed, the way in which economic growth takes place.

Public Works and Transportation is the committee of the House that has taken that courageous and bold step to rewrite both the Economic Development Administration program and the Appalachian Regional Commission program. The Public Works and Economic Development Act, the predecessor to H.R. 6100, was germinated in the 1950's. It was born in the 1960's. It was nurtured in the latter part of that decade. It flowered in the 1970's, in the early part of that decade, but fell into eclipse in the latter half of the decade. The National Development Investment Act which we bring to the floor today is a repository of the best of EDA. It is a program for the decade of the 1980's and beyond.

In this bill, we have refined and brought to maturity the several concepts of economic development that have been tested over the past two decades, in the crucible of economic distress that has troubled many areas of this country, North and South, East and West, rural and urban.

In the course of the deliberations of this committee over the past 1½ years, we have come to the conclusion and we are saying in this legislation that the mayors of the 1980's are not the mayors of the 1960's; that they have grown and matured in the business of economic development; that they are professionals in the field of economic development; that they no longer need the watchful eye of the Federal Government over their shoulders telling them how to make each step and how to make each move in the field of economic growth.

Similarly, we are saying in this legislation that the Governors of the 1980's are not the Governors of the 1960's; that they, too, have become sophisticated and professional in the field of economic development; that they themselves, as are the mayors throughout this country, principally and foremost economic developers. They themselves or their staffs in their departments of government, who are professionals in the field of economic development, know the business in a professional way, and what they need are the tools to help them to do that job of creating growth within their State or within their community.

We are saying in this legislation, "We trust you, Governors and mayors, to do that job."

We are drawing into the economic development process in a full-fledged partnership, in a stronger way than ever before, the private sector, which ultimately creates the jobs, the permanent jobs in the private sector that we want to have created and toward which this bill is geared.

This clearly is a bill for the times in which we live. We do not pretend that this modest measure, with this modest amount of funding, is going to repair the structural damage done to our economy in the past year and a half of continuing recession. We do not pretend that in one fell swoop this legislation can nudge the country out of the current economic recession. We do claim, based on the hearings that we have had over the past year and a half, that this legislation is a guidepost, a useful, effective tool to direct the growth of the country, to help local governments in their task and in their job of creating economic growth and generating new jobs.

It is not going to put all 10 million unemployed Americans back to work, but it is going to have an effect locally and help local economies grow and sustain that growth over a period of years. We believe we have done much in this legislation to respond to the criticism—justified criticism in many instances—leveled at the Economic Development Administration over that past several years.

□ 1600

First of all, we recognize that the Economic Development Administration program has become so loved by the Congress that it could not shed some of the barnacles, let us say, that it carried with it over a period of time, one of them being that every time a county became eligible, it remained so. Congress legislated into permanence the eligibility of certain areas, grandfathering them in and making the program into virtually an entitlement program. We have swept that away in this legislation. It is no longer an entitlement program.

We have developed very clear and specific eligibility criteria, so instead of making 80 percent of the country eligible for economic assistance, we have made 40 percent or thereabouts of the population eligible under the criteria of this legislation. It is very specifically targeted and very clearly drawn to be a program of a sort of rifle-shot assistance into those areas of the country that need help and need it the most, instead of blanketing the whole United States.

We have retained eligibility for communities that have lost or are about to lose their major employer. Instead of waiting until distress has set in, we have given the flexibility to a community to recognize that a military facility may close or that a major industry is going to shut down in a few weeks, and instead of waiting for it to shut down and the unemployment to rise, we are saying in this legislation that "you have the ability to apply for assistance from the Federal Government to turn your economy around and to prevent the impending disaster."

We are also saying that once you have received assistance, that fact does not automatically entitle your community to continue receiving assistance in the years ahead. Having once received a grant from the Federal Government to undertake a program of economic recovery and carry that program out, to apply a second time, you must prove that you are again eligible for assistance and that you need that help. You must come back to the Federal Government with a new showing of economic distress that meets the criteria of this act. You must also show that the previous funds were well invested and well spent, and that they achieved the purpose for which the community applied.

We are giving to local governments maximum flexibility in carrying out the program. Under current law, on a public works grant under EDA, a community must submit detailed documentation about the legal, engineering, and financial condition of that project. The endless paperwork between the community and the regional office and the central office in Washington will be swept away with this legislation.

We recognize that communities have public works departments. They know how to plan and carry out a public works project. They do not have to be coming back to the Federal Government for constant review and revision. They must comply with State laws, and they must comply with local audit and review requirements. We are saying "we trust you to do the job and to carry it out to meet your local requirements."

Furthermore, one of the problems we have had is the amount of paperwork that communities have had to deal with in submitting documentation

which has been sent for review and for rewriting and then sent back again for final consideration. We want a proposal for a community to be submitted in 20 pages or less. We want a strategy that is simple to understand and simple to explain and effective in its implementation.

We are also asking communities to pull together a total concept of economic development. What we have found in the year and a half of hearings on this legislation is that the most effective communities in economic development are those that, instead of getting a grant here and a loan there, had a total concept, a strategy for investment. And that is why that word is a key part of this legislation, the National Development Investment Act. We want those strategies to be developed by the community with the support of the States and with the support of a multicounty economic development planning agency. And that can be done. We have seen many of those. We have seen samples of such strategies that have been submitted to the Department of Commerce that have been successful.

That strategy can include a revolving loan fund; it can include an employees' stock ownership plan; it can include a grant for a waterline to serve a new industry; or a grant for the development of an industrial park. It can include all of those things. But it is what the community decides it needs, not what the Washington bureaucracy decides that community needs.

So we combine, I think, the greatest strengths of EDA and the developed professionalism of communities, of States, and of multicounty organizations in economic development planning and operating over the past 20 years. So we present that to this House and to this new administration in Washington. It is a concept of economic development that is fully within the philosophy of the Reagan administration and that is fully attuned to the needs of the 1980's. This is a program that will reflect great credit on this House and on the Congress as a whole.

Title II of the bill deals with the Appalachian Regional Commission. I will call on my committee colleague, the gentleman from West Virginia (Mr. RAHALL), and later on the gentleman from Alabama (Mr. BEVILL), to talk at greater length about the finish-up program for the very highly successful Appalachian Regional Commission program. Suffice it to say on my part that after hearings in the Appalachian region and hearings that we held here in Washington, I am enormously impressed with the success and the professionalism of that 13-State organization. It has wisely and well invested funds that the Federal Government has provided over the past 17 years for this program to lift a whole region out

of a century of neglect and distress into the mainstream of economic growth of this country.

This is one of the remarkable stories of economic growth, so much so that a group of interested economic development parliamentarians from Italy came here to see what they could learn for the Mezzogiorno from the success story of Appalachia.

In conclusion, Mr. Chairman, I would like to express my appreciation to the chairman of the full Committee on Public Works and Transportation, the gentleman from New Jersey (Mr. HOWARD), for the cooperation that he has given and the free hand that he has given to the subcommittee in fashioning this legislation. He has given us encouragement and support at every step of the way.

Our ranking member on the minority side, the gentleman from California (Mr. CLAUSEN), has literally been a wellspring of new ideas, and his contribution to this legislation is evident throughout its formulation.

Also, my dear friend and colleague, the gentleman from Pennsylvania (Mr. CLINGER), as ranking minority member of the subcommittee, has participated laboriously at every step of the way in the formulation of the legislation.

I also want to express appreciation to the members of the Committee on Banking, Finance, and Urban Affairs, including the committee chairman, the gentleman from Rhode Island (Mr. ST GERMAIN), and the chairman of the Subcommittee on Economic Stabilization, the gentleman from Michigan (Mr. BLANCHARD), who have participated in the hearings and helped us in the formation of this legislation and in bringing it to the floor this afternoon.

The gentleman from Connecticut (Mr. MCKINNEY) has shown a very splendid understanding of the legislation and its purpose.

There are other Members who are not on these two committees of original jurisdiction to whom I also want to express appreciation, including the gentleman from Iowa, Mr. NEAL SMITH, chairman of the Subcommittee on Commerce, Justice, State, and the Judiciary, of the Appropriations Committee, which has watched over the appropriations and funding for this program. The gentleman has made some very constructive suggestions.

The gentleman from Alabama (Mr. BEVILL), chairman of the Subcommittee on Energy and Water of the Appropriations Committee, which has jurisdiction over the Appalachian Regional Commission programs, has also made a very constructive contribution helping us through this thicket of the legislative process.

I include here a brief summary of the bill:

SUMMARY OF THE NATIONAL DEVELOPMENT INVESTMENT ACT: H.R. 6100

HOW THE PROGRAM WILL WORK

Eligibility criteria

Three distress criteria to determine eligibility:

- (1) Unemployment: 1% above nat'l average, previous 24 months.
- (2) Per capita income: 80% of nat'l average, using latest available statistics.
- (3) Anticipated sudden rise in unemployment: imminent plant closing, military base loss, etc.

Only one of the above required to qualify. Eligibility and grandfathering in current EDA law repealed.

Development investment strategy

Cities and counties under 50,000: work with Economic Development District or state economic development agency to devise investment strategy.

Cities and counties over 50,000 or pockets of distress within city: do their own planning.

Strategy, in 20 pages or less, includes:

- Inventory of community's resources, industries, businesses;
- Infrastructure available and needed;
- Workforce; skills available;
- Land availability;

A showing that nonfederal 50% matching funds are available;

A showing that private sector is willing to invest;

Description of industry/business to be created or expanded; and

Description of specific ventures to be funded; e.g.:

- Revolving loan fund;
- Employee Stock Ownership Plan; and
- Grant for infrastructure.

Funding

Strategy Implementation: authorizes \$425 million annually for 3 fiscal years.

Planning and Strategic Development: authorizes \$75 million annually for 3 fiscal years.

These are grant, not loan, funds.

Application procedure

Submitted to Secretary of Commerce.

Secretary reviews application to determine that:

- it meets distress criteria;
- the strategy has a good chance of working.

Secretary approves/rejects project.

Best strategies are to be approved—those with best chance for success.

Limitations

A \$2 million limit on federal funds per strategy.

Revolving Loan Fund limited to \$1 million.

Subsequent applications must requalify on new showing of distress.

(Source: Subcommittee on Economic Development, House Committee on Public Works and Transportation. Telephone: 225-6151.)

With that, Mr. Chairman, I reserve the balance of my time.

□ 1610

Mr. CLINGER. Mr. Chairman, I yield such time as he may consume to the ranking minority member of the Committee on Public Works and Transportation, the gentleman from California (Mr. CLAUSEN).

Mr. CLAUSEN. Mr. Chairman, I rise today to express my support for H.R. 6100, the National Development Investment Act.

I would like to point out to my colleagues that this bill is the result of a truly and genuinely bipartisan effort by both the Democratic as well as Republican members of the Committee on Public Works and Transportation. But I believe special credit must be given to the two principal sponsors, the Economic Development Subcommittee chairman, JIM OBERSTAR of Minnesota, as well as BILL CLINGER from Pennsylvania who was recently appointed to serve as the ranking Republican member of that subcommittee.

Mr. Chairman, this vital legislation has as its goal the transformation of the current Economic Development Administration into an agency that can better meet the unique economic challenges that our Nation will face in the 1980's.

I feel a special personal involvement with this bill because in the past I have been involved in, and seen, tremendous economic accomplishment made in some of the more economically distressed areas of my own congressional district in California as a result of the EDA program involvement. But then, as I am sure many of my colleagues have also seen in their own districts, EDA somehow went astray from its original objectives.

The agency attempted to solve economic problems that were far beyond its intended scope. AS I know most of the Members realize, EDA initially was to be a program directed toward a revitalization of the rural areas of America and particularly the economically distressed rural areas of America.

But what occurred was that eligibility for EDA funding actually expanded to include some 80 percent of the Nation. Increased amounts of its sparse resources were poured into attempts to solve the highly complex economic problems of our urban centers, problems which could really have been better addressed by such other specific urban-oriented programs as the UDAG program and the Community Development Block Grant program.

Mr. Chairman, I would like to state that I am a firm supporter of President Reagan's economic recovery program and, to that end, I have associated myself with the urban and rural enterprise zone bills, both of which I consider to be key components of the President's efforts. In fact, it could be an integral part of his economic development strategy effort that his particular piece of legislation is attempting to address.

I believe H.R. 6100 dovetails with this overall enterprise zone concept. This legislation is aimed at assisting

the communities of our Nation to gain control of their economic destinies.

These are communities which have been hard hit by high interest rates and other economic ills resulting from past irresponsible fiscal and monetary policies.

What is really needed is an economic development and diversification strategy to create a working partnership between the community and private sector.

The cornerstone of H.R. 6100 is the requirement that applicants for funding must devise such a development investment strategy.

That important emphasis on the involvement of the private industry is a key feature of the National Development Investment Act, one which distinguishes it from other Federal giveaway programs which have brought us many of the economic problems our Nation is experiencing today.

Where limited Federal participation in the economic development process is needed, we must look for approaches that are both workable and more importantly, affordable, where every Federal dollar does the work of two. This legislation fully meets this criteria.

My colleagues know that the important requirements of a successful effort in the community is to move in the direction of maximizing the leverage between Federal expenditures and the desired objective of building the private productive sector of our communities.

I also believe that the concept of linkage and leverage goes one step further. Many of us have come to realize throughout the country that there is a serious deterioration of our basic infrastructure. Whether it is a water system, a sewer system, the intran-transportation system network in this country, we have some serious problems that need to be addressed and we believe that that basic strategy can utilize the potential jurisdiction of our committee in a concept of linkage and leverage that will again be integrated into and made a part of the President's overall economic recovery effort.

H.R. 6100 concerns itself also with the Appalachian Regional Commission, and in accordance with the unanimously approved recommendation of the Governors of the Appalachian States, title II of this bill provides a winding down of funding for this program.

So, Mr. Chairman, H.R. 6100 provides a needed impetus of our Nation's economic recovery at a reasonable cost. Therefore, I urge my colleagues to support it enthusiastically and move it to the other body so that we can have it implemented and made a part of our national policy.

Mr. CLINGER. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise in support of H.R. 6100 which, as Chairman OBERSTAR indicated, represents a new approach and I think an exciting and cost-effective approach to the question of economic development and the Federal role, albeit limited, in that effort.

I would like at the outset to congratulate and commend my chairman, the gentleman from Minnesota (Mr. OBERSTAR), who has really been the driving force behind this legislation.

I would stress that he has been completely, utterly fair and cooperative with the minority. He has included within this legislation many of the suggestions that came from the minority side which we think improve the bill. I think he deserves commendation for the very long hours and hard effort he has put into coming up with this very exciting new approach to economic development.

I would also like to express my appreciation to the ranking member from California, Mr. CLAUSEN, and to our chairman of the full committee, Mr. HOWARD, who have also had a great deal of input into this bill.

Finally I would like to tip my hat to my mentor, JOHN PAUL HAMMER-SCHMIDT, who was the ranking member on this Economic Development Subcommittee for so many years; and to the gentleman from Minnesota, (Mr. HEGEDORN), who immediately preceded me.

All of these gentlemen have played a very active role in this legislation which I am strongly supportive of.

I think it is important to point out at the outset what this bill is not, because I think there are some misconceptions about the bill which have arisen because of past activities within the agency and perhaps the direction the agency has gone in the past.

So the bill is not a lot of things. For example, it is not a simple reauthorization of the Economic Development Administration and all of the titles that existed under that act, the Public Works and Development Act of 1965.

It really represents a complete restructuring and tightening of EDA programs; a focused, and I think a streamlined and a much more cost-effective approach to that role.

□ 1620

It does, in my opinion, eliminate those elements of the Public Works Act and of the Economic Development Administration which have not proven to be as successful as others. We got this information through a long series of hearings, in which the people who have actually been working with these programs came and told us what worked and what did not work.

We have eliminated, for example, the loan and the loan guarantee pro-

gram, title II of the bill, which was administered in Washington and which caused problems, because it is difficult to administer a loan portfolio here in Washington. That is gone. I think it is a vast improvement over what we had before.

It also eliminates the designation process, and I think this is perhaps the area where the agency was most criticized. This program was supposed to be directed at the most distressed areas of the Nation. Well, in fact, because we never de-designated anybody, once you qualified as distressed, you were never disqualified, and, as a result, 84 percent of the country is at present qualified for economic development assistance. We have done away with all of that. We have stricken it off the books. And what we have now is a much tighter criteria for determining eligibility of distressed areas.

We have brought the areas of the country which qualify for assistance down from 84 percent of the country to about 41 percent of the country.

It is not, also, just another Government handout program that simply shovels millions of dollars at isolated independent economic development projects one at a time. We are looking here for a strategy based on the experience that we have had in the Economic Development Administration to know what is necessary, what you have got to have in order to have effective economic development occur in the community.

And, finally, this bill does not involve the Federal Government in dictating to States and local governments the way to solve their economic development problems. That has been, I think, one of the valid criticisms of the agency. Too much of the authority, too much of the control, too much of how you could do these things was dictated here in Washington. We tended to ride rough shod over the desires and the intent of the local areas, who know far better how to solve their own problems.

It leaves the decisionmaking, by and large, at the local level, and I think that is where it should be. As Chairman OBERSTAR has indicated, it also eliminates a vast amount of the paperwork which made it very difficult to apply for these projects.

Well, then, what is this bill all about? Well, it really is, in my opinion, a very modest, very limited attempt to address a very small part of what is becoming a very large problem. I am speaking now about the alarming—and I mean alarming—deterioration of our Nation's public facilities.

The basic infrastructure of this country is vital to economic development. We have a lot of studies, for example, which show that corporate decisionmaking is based not so much on

the tax structure in a local area but, rather, on what is the public facilities situation in that community. That is really what gets the corporate decisionmakers to make location decisions.

So it is about this very vital problem. As a child I played a game, and I am sure many of the Members did, called London Bridge is Falling Down. Well, London Bridge is not falling down. As far as I can remember, it is alive and well and living at Lake Havasu in Arizona. But the fact is that there are many, many other bridges in this country that are in danger of falling down. Three-hundred thousand of them have exceeded their useful life. One-half of the Nation's communities, for example, have reached capacity, as far as their water and sewer systems are concerned. That means they cannot participate in any growth, they cannot engage in any economic development because they cannot add anything to their systems.

We have the Interstate Highway System which is wearing out more rapidly than we are repairing and replacing it. Two-thousand miles a year have reached the point where they have exceeded their design life. And there is growing public awareness of this fact. A book called *America in Ruins* by Pat Choate, and others, has called attention to this problem. Newsweek magazine did a feature story on this issue. The point that they are making is that there is a direct connection between economic growth and development and the adequacy of public facilities. I think there is a general recognition also that government has some role to play, some responsibility, to construct and maintain basic infrastructure.

Now, you can argue about—and I am sure we will argue about—what level of government should be involved in this exercise, what level of government should be working on the public infrastructure problem in this country. But I think we can agree that government must have a role to play in developing our public infrastructure.

My personal opinion is that there is a need, a continuing need, for Federal involvement at some level of funding.

The bill that we are talking about here today cannot and will not solve our Nation's infrastructure problem. But it will address problems in some areas, a few areas, which are least able to finance essential public facilities but have a high potential for economic rejuvenation at this time.

The emphasis of this legislation is on the community and on cooperation. In order to be considered for funding under H.R. 6100, a community must utilize every tool at its disposal. It must enlist the cooperation of private industry and it must develop a strategy. In this legislation we call it a development investment strategy, which is simply a long-term, carefully planned

community course toward self-sufficiency.

Certain key factors are essential for any area to support development and thus become economically viable and they must be considered as part of the development strategy. They include available land, public facilities, availability of capital, tax policy on investments, skill of the labor force, and the ability of State and local governments to provide financial assistance.

But the most significant factor in any community's achieving economic growth and stability is the involvement of the private sector. In this bill the level of private sector dollars committed to a community's development is very important in the Secretary's selection of those projects to receive funding. That represents a major departure from the economic development approach taken by EDA in the past, but one which will prove vitally important in the future.

That approach is also in keeping with the President's economic recovery plan which stresses private sector involvement as the key to economic development. In our committee we considered the question of economic development in a strictly bipartisan manner. What we came up with was a united commitment to assisting our distressed communities in an innovative fashion, based on coupling a community's existing resources with a limited amount of Federal assistance. That combination will produce a workable, cohesive, and well-planned approach to economic self-sufficiency.

Mr. Chairman, H.R. 6100 also provides phase out funding for the Appalachian Regional Commission. This is in accordance with the views of the Governors of the 13 States affected by that program and has received their unanimous approval. I would add that the Governors themselves propose the termination of that agency in 1990 when the Appalachian Highway is completed. Area development programs are scheduled for termination in 1987.

H.R. 6100 is a viable bipartisan approach to new economic development and diversification in our Nation. I would urge you to vote for its passage.

Mr. HAMMERSCHMIDT. Mr. Chairman, will the gentleman yield?

Mr. CLINGER. I yield to the gentleman from Arkansas.

Mr. HAMMERSCHMIDT. Mr. Chairman, I want to associate myself with the remarks of the gentleman in the well, and I rise in support of H.R. 6100. My committee colleagues, the gentleman from Minnesota (Mr. OBERSTAR) and the gentleman from Pennsylvania (Mr. CLINGER) are to be commended for their fine efforts in creating this vital, innovative piece of legislation.

Having served as ranking Republican member of the Economic Develop-

ment Subcommittee myself, I can fully appreciate the magnitude of the task which they undertook.

Criticisms of EDA have been numerous and in some cases well deserved. Probably the greatest shortcoming of the agency and the most widely discussed has been the level of eligibility. Eighty percent of the Nation should never have been eligible for funding from this relatively small Federal agency. EDA's budget at its peak was \$600 million. So I agree with the President and other critics of the agency when they say that this program which is currently funded at a little over \$200 million can in no way serve as a responsible vehicle to assist economic development in 80 percent of the United States.

It is my understanding that this bill addresses the eligibility question by significantly altering the distress criteria to target EDA's assistance to only the areas of greatest distress. The percentage of the Nation eligible under this bill is slightly over 40 percent a 50-percent cutback.

Equally as important as these funds being targeted to the most distressed areas is the targeting of funds to areas where the recovery potential is the greatest. The sad sight of empty industrial parks is the unfortunate result of putting Federal dollars into areas which meet the distress qualifications but do not have the other factors which Mr. CLINGER pointed to in his statement; factors that are essential for an area to support economic development.

But the key ingredient in any truly effective economic development effort is the involvement of the private sector. For an area to become economically self-sufficient private industry must be able and willing to do business in that community. I was pleased to note that special attention has been placed on the role of the private sector in this legislation.

H.R. 6100 recognizes that the commitment by the private sector to a distressed area improves the chances that that community has for development. The Secretary is, therefore, directed to take this factor into consideration when selecting grant recipients.

Having had firsthand experience in the drafting of economic development legislation, again, I wish to commend the authors on fashioning this legislation which accurately addresses the appropriate role of the Federal Government in the economic development process. I strongly recommend that this bipartisan proposal be adopted by the House.

Mr. CLINGER. I thank the gentleman for his comments.

Mr. CLAUSEN. Mr. Chairman, will the gentleman yield?

Mr. CLINGER. I yield to the gentleman from California.

Mr. CLAUSEN. Mr. Chairman, it may very well be that this was addressed prior to the time that I came onto the floor, but has the point been made that there is room in function 450 of the budget resolution itself, and that includes the reconciliation budget, for the authorizations contained in this bill? Has that point been made?

Mr. CLINGER. No, it has not. I am glad the gentleman has made the point.

Mr. CLAUSEN. I think it is important for the membership to know that the authorizing committee worked very hard to see that the authorized funding level can be accommodated in the budget resolution if the Congress so desires. In fact it is my understanding that the appropriation bill does contain budget authority for this program, and that the same appropriation bill is subject to the enforcement provisions of the budget resolution. Thus, funding for this program must be within the overall funding levels allowed by the budget resolution.

Mr. OBERSTAR. Mr. Chairman, will the gentleman yield?

Mr. CLINGER. I yield to the gentleman from Minnesota.

Mr. OBERSTAR. Mr. Chairman, I would be happy to respond. The gentleman raises an important point. It was not addressed earlier, and I am glad the gentleman has raised that point.

The funding for the coming fiscal year 1983 is a part of function 450 of the budget that has been approved and, of course, the Appropriations Committee is going to decide specifically how much of that amount will be allocated to the present legislation.

They have tentatively reported out of subcommittee \$200 million committed to the Economic Development Administration programs.

Mrs. SNOWE. Mr. Chairman, will the gentleman yield?

Mr. CLINGER. I yield to the gentleman from Maine.

Mrs. SNOWE. I thank the gentleman for yielding.

Mr. Chairman, I, too, want to congratulate the gentleman for the work that he has done in putting together this legislation.

I would just like to ask the gentleman a couple of questions concerning the intent of this legislation, if I might.

First of all, in section 302 it seems that the language contained in the bill provides considerable flexibility in terms of the Secretary of Commerce dismantling the present organizational structure of EDA.

Could the gentleman tell me, is this the intent of the legislation, to dismantle, to do away with the present organizational structure?

Mr. CLINGER. I thank the gentleman for her question, and I would

respond by saying: Absolutely not. In fact, it is the intent through this legislation to maintain in place the expertise which was developed over a 20-year or so period at EDA. We have a lot of very talented people who have great experience in the area of economic development in the Economic Development Administration. Now, there may be a restructuring within that organization. But clearly the intent is to maintain that expertise.

I would also stress that we intend to retain the Economic Development representatives, who have played a critical role and, I think, a very useful role in the EDA—working with local areas, particularly in those areas where they do not have the expertise to really address their economic development problems.

Mrs. SNOWE. I think that is a vital portion of the present EDA program that is necessary, because I think it maintains a regional equity, so that all regions of the country can participate in the program; and, second, providing the planning and technical expertise that is necessary I think in awarding these projects on a fair basis.

And, second, in section 302, the reason I am addressing this is because it does give a great deal of latitude to the Secretary of Commerce in prescribing the functions under this bill.

Could the gentleman tell me, then, is it the intent of this legislation to disburse the funds under this legislation in block grant form?

Mr. CLINGER. No, it is not. I think that we have tried to fashion a bill which will give as much decisionmaking as possible—the great majority of the decisionmaking is done at the local level. They know what their needs are. They can best fashion a program which will address those needs.

Now, those projects come into Washington. The ultimate decisionmaking is done here. It is not a block grant. We have to maintain accountability for what we are doing, and I think the Secretary is the one to do that.

In effect, it becomes a competition between various economic development strategies submitted by various applicants. The decisionmaking is at the local level, the final selection at the Federal level.

□1630

Mr. CLAUSEN. Mr. Chairman, will the gentleman yield?

Mr. CLINGER. I yield to the gentleman from California.

Mr. CLAUSEN. I thank the gentleman for yielding.

As further amplification of the explanation, I would suggest to the gentleman from Maine that the basic structure of the legislation is directed toward the organizational structure in many parts of the country associated with the National Association of Development Organizations. They have

in place as an example an economic development district and they have the expertise and the personnel as well as advisory boards and directors that actually develop the economic strategy for those areas. This is intended to reinforce that.

In addition, there may be counties or a county where a joint powers agreement could be formulated for purposes of developing this economic diversification strategy. So it is to that end, if it meets the criteria for an economically depressed area under the terms of the legislation, this will enable that to occur.

Mr. LUNGREN. Mr. Chairman, will the gentleman yield?

Mr. CLINGER. I yield to the gentleman from California.

Mr. LUNGREN. I thank the gentleman for yielding.

I would just like to ask a question about the cost here. It sounds as though we have done a good job in taking care of some of the problems that have existed in the previous program.

My hometown of Long Beach, Calif., has been a beneficiary of this and other programs. We were fortunate that we got to the head of the line and got money. There were a lot of things that helped our downtown. But it always struck me that we would never have the amount of money in the treasury necessary to duplicate or replicate this around the country. So it was more which community got in there first.

The other thing was that my hometown prided itself on the fact that they had been determined to be the eighth most distressed city in America. It was almost like cities were vying to find out who was most distressed so that they could get some of the largess of the Federal Government. And it sounds as though the gentleman has addressed some of those problems here.

But I must rise to ask a question and maybe strike a discordant note.

As I understand from the committee report, the CBO estimates that the outlays involved would be \$128.2 million in fiscal year 1983, \$464 million in fiscal 1984, \$723.9 million in 1985, \$783.9 million in 1986, and \$504.8 million in fiscal year 1987, contrasted with the administration's recommendation of a total of \$33 million proposed to phase out EDA between now and 1985.

My question is, is this suggesting that we are going to then be some \$1.5 billion over what the projected budgets will be between now and 1985?

Mr. CLINGER. Well, I think clearly this bill represents a disagreement with the administration on the importance of the economic development program.

Mr. LUNGREN. It is only a billion and a half I realize.

Mr. CLINGER. The administration has requested a phaseout of the program entirely. I think that the budget resolution, which also contemplates continued funding of the Economic Development Administration—

Mr. LUNGREN. For 1 year.

Mr. CLINGER. No—it contemplates and it assumes an outyear funding of this program, at the same level, I might add, as the 1983 figure. It assumes that it would continue at that level.

So that I do not believe that this in fact is contrary to what the budget resolution calls for. Ultimately the question will be resolved by the Appropriations Committee which will set that figure.

In fact, the Appropriations Committee has for this year at least 2 days ago passed out the bill which would include about roughly \$200 million in the economic development function.

Mr. LUNGREN. OK. Maybe I did not state my question very well.

In the budget that we passed, what levels of funding does it anticipate for the next 3 years as opposed to the \$1.5 billion contained in authorization in this bill? Does the gentleman know?

Mr. CLINGER. I do not have the figures here. Does the chairman have the figures?

Mr. OBERSTAR. If the gentleman would yield, the 450 function of the budget does include an adequate amount to cover the funding that we have envisioned in this bill. We cannot predict over a period of years what the next Congress is going to do. We cannot bind another Congress. We can only say that we have determined on an annual basis \$500 million is an amount that will respond to what we perceive as a need.

The budget function 450 includes a sufficient amount to cover that modest sum for the next fiscal year. We are not projecting beyond that what another Congress will do for the economic development function. That has to depend on what the economy may do in other years.

And the figures that the gentleman from California was citing also include the figures for the Appalachia Regional Commission.

So the figures the gentleman has cited are not all attributable to the national development.

Mr. LUNGREN. But under this bill, is that not correct?

Mr. OBERSTAR. The two titles of the bill.

Mr. CLINGER. It does contemplate multiyear funding.

Mr. LUNGREN. If the gentleman would yield further, I understand how we cannot determine precisely what future Congresses are going to do. But the question is next week we are going to be faced with a big vote on whether

we are going to raise taxes or have any cuts. Some of my constituents when I go home ask me, "What are you people doing in Congress with spending."

I realize it is very tough to anticipate what we are going to do next year and the year after. But the question I am trying to get answered is whether or not this bill and its authorization contemplates spending \$2.3 billion for both programs over and above what has been contained in the President's budget. I would just like to know whether that is true or not.

Mr. CLINGER. That would be on both the Appalachia and the EDA.

Mr. LUNGREN. I understand that.

Mr. CLINGER. If the program were fully funded at the authorizing level, that would be the figure.

Mr. LUNGREN. I understand that.

Mr. CLINGER. I would point out as a matter of history since its inception the economic development program has never been funded at even half what the authorization level is. So that I think it is perhaps premature to say that that is going to be the result.

Mr. LUNGREN. If the gentleman would continue to yield, I would suggest since the inception of the budget process in the Congress we have never found ourselves capable of staying within those limits, and at some point in time we ought to consider it.

I am not going to suggest everybody vote against it. But I heard this hosanna of shouts in support of this bill without anybody referring to what the cost is or how it is going to compare with the budget.

I would suggest that if we continue to do that in bill after bill, we are not going to have to worry about a tax increase of \$20 billion, we might have to worry about a tax increase of \$180 billion for next year.

I thank the gentleman.

Mr. OBERSTAR. Mr. Chairman, I yield 4 minutes to the gentleman from Alabama (Mr. BEVILL).

Mr. BEVILL. Mr. Chairman, I want to commend my good friend and colleague, the gentleman from Minnesota (Mr. OBERSTAR) for the tremendous job he and the ranking member, my good friend and colleague, the gentleman from Pennsylvania (Mr. CLINGER) have done and for the tremendous job they and the subcommittee has done. I have personal knowledge of the fact that they have not just held hearings in their committee room. They have been out in the Appalachian area, and they have checked to see what has been accomplished by this program. Certainly, that is all any Member of Congress would need to do in order to support this program.

Mr. Chairman, the Appalachian Regional Commission has been a most successful program, bringing economic development, increased educational benefits, improved health care and

better highways to America's 13 Appalachian States.

These States contain some of the most impoverished areas of our country. Their State and local governments were unable to bear the full load of improving these areas without assistance from the Federal Government. The ARC program has provided that necessary assistance, enabling dramatic improvements in what most of us would consider to be basic human needs.

Tremendous strides have been made in the Appalachian States in community water and sewer systems, rural health clinics, vocational schools, industrial development projects and roadbuilding in remote areas.

My support for H.R. 6100 is based on my personal study of the ARC throughout its 17-history of service to Appalachia. Each year many witnesses have appeared before my Energy and Water Development Appropriations Subcommittee testifying about the improvement of living conditions which has been made possible, largely because of ARC assistance. In fact, this past spring, Gov. John Y. Brown, of Kentucky, representing the 13 Appalachian Governors, appeared before my subcommittee to present a strong statement for ARC's continuation. He told me that the Governors of the 13 States involved have joined in calling the ARC the most important program they have with the Federal Government.

His testimony, along with actual programs I have seen for myself, present a picture of a unique Federal-State-local relationship which has successfully established a public-private partnership to create private sector jobs and to equip the Appalachian people with the skills necessary to perform those jobs.

The ARC program has been successful in substantially narrowing the gap between the region and national averages in terms of growth, income, employment and health care.

In my own district, for example, nearly half the people lived below the poverty level in 1960. But 16 years later this figure had dropped to less than one-fifty of the residents. By 1981, 58,000 additional jobs had been created in my district, due, in large measure, to ARC industrial development assistance. And the steadily dwindling population of the fifties and sixties was turned around and in the seventies was growing at nearly twice the national growth rate.

I am proud that in addition to needed primary health care facilities and rural water system development, much of the ARC emphasis in my district has been on helping people develop job skills. That creates a long-term benefit for the entire country.

ARC involvement provided important supplemental funds for many projects throughout my district, however, I am proud to note that the State of Alabama and local government in my district underwrote the largest share of these project costs.

Unless we provide this additional authorization for the Appalachian Regional Commission, the momentum which it has created in the Appalachian States, during these past 17 years, will be lost. At this critical time, when the recession and major Federal budget cuts have damaged the fragile Appalachian economy disproportionately, we cannot turn our backs on an area which still suffers from poverty and many communities still lack primary health care facilities. The perceived oil glut and other problems are severely limiting the coal mining production industry which is so important to this region of our Nation. And State and local governments have had insufficient time to mobilize public and private resources to ameliorate the dire economic conditions which our Nation's recession has brought to most of this area.

Stopping the ARC program in 1982 could mean that health care might never be extended to the remaining Appalachian counties which are still without basic primary care facilities. And areas with exceptionally high infant mortality rates might never improve this tragic statistic. This sad condition should not be allowed to exist in this, the world's richest nation.

Bringing an abrupt end to the ARC also would mean that the residents of 60 particularly distressed Appalachian counties would continue to suffer chronic health problems, due to unsafe drinking water. And jobs, for many yet unskilled workers, would remain an unrealized dream.

In more developed counties, where conditions now support diversified economic development, the payoff on past investments, in many cases, would be lost for lack of a relatively modest finish-up ARC investment.

The Appalachian States are not looking to the Federal Government to bail them out. They are asking for an investment. Since 1965, these States have increased their taxes at a more rapid rate than the national average, and most have a very limited tax base. In recent years, the per person Federal expenditure in Appalachia has never been more than 84 percent of the national average. And the recent budget cuts will most likely reduce this figure.

The ARC program is worthy. It has performed successfully but a need for its expertise and assistance remains in an area of the country in which too many Americans still live at a distinct disadvantage. I sincerely ask you to

vote in favor of this needed extension of this worthwhile program.

□ 1640

Mr. OBERSTAR. Mr. Chairman, I thank the gentleman for his statement. I want again to commend the gentleman from Alabama for the very positive, constructive contribution that he has made to this legislation.

Mr. Chairman, I yield 3 minutes to the gentleman from Alabama (Mr. FLIPPO), a member of the subcommittee.

Mr. FLIPPO. Mr. Chairman, I would like to add my strong support for H.R. 6100 and thank JIM OBERSTAR for his leadership in bringing this measure to the floor today.

This legislation is essential to continue support for local economic development activities. Reduced Federal funds, monumentally high unemployment and interest rates have halted business investments and expansion, as well as the upgrading of public facilities. This fiscal strain has meant that local communities in my area have been unable to move forward to initiate a full-scale economic development program. The National Development Investment Act provides distressed communities, suffering from high unemployment or underemployment or experiencing a plant closing or other economic emergency, 50-percent grants to build public facilities or develop projects which create jobs and promote economic growth. This program encourages local officials and the private sector to combine their talents and resources to create the type of economic environment which can grow and prosper.

It offers maximum flexibility to allow each community to develop a strategy to solve its particular problems and address their unique needs. Eligible activities include: setting up a revolving loan program to finance small business startups or to retain and expand existing firms; preparing a site for commercial and industrial development; improving the access road, the bridges, the waterline or other key public services which are critical to enticing private companies into an area or beginning a full-scale recruitment program to diversify the economic base and attract jobs more appropriate to the skills of the labor force. This bill can do much to bring life, hope, and jobs to distressed communities. It can stimulate economic development through the Federal matching grants—development that cannot and will not take place in the current economic climate. It can be a catalyst in bringing about economic recovery.

This National Development Investment Act applies the past lessons that have been learned through practical local economic development efforts. It is more responsive to local needs, local initiatives, and local input. It repre-

sents a reduction in Federal intervention, while strengthening the accountability for Federal funds. In this regard, I am pleased that the bill incorporates a provision I authored requiring a semiannual report detailing how these Federal dollars have been used by the grantee.

It requires an audited statement of all funds spent on the project. This is not intended to add to the paperwork or financial burden of local officials, but to insure that the Federal Government maintains its legitimate oversight responsibility. While the bill stipulates the audit should be performed by independent certified public accountants and in accordance with the Comptroller General's standards for audit, local situations may require some flexibility in the selection of auditors. The primary concern is that the audit be performed by an organization or individuals that are independent of grantees and proficient in accounting and auditing. As long as these conditions are met and the Comptroller General's auditing standards are satisfied, both public accounting firms and State or local government auditors may perform the audit required by this bill.

I also want to emphasize the expanded scope audit provisions require financial accountability as well as a review or program efficiency. This information can be useful to more fully judge and evaluate this program and the use of tax dollars.

Equally important to my region of the country, the worthwhile programs and activities funded through the Appalachian Regional Commission are continued. There has been no greater economic development initiative than the Appalachian highway system. It has provided access to a previously isolated and chronically depressed area. The Appalachian highway system has brought thousands of jobs to the 13-State Appalachian region, and it has made possible improved health and educational facilities.

This bill will allow the completion of the highest priority corridors. Unfortunately, it requires a scaling back of the originally proposed 1,700-mile system. However, it provides an orderly and gradual deduction of Federal funds for this purpose. This is needed to protect past Federal expenditures and to assist with the financial hardship created by the fact that the cost of road building in this mountainous terrain far exceeds the local community's ability to pick up the entire tab.

In addition to highway funds, this bill authorizes funds for local development activities concentrating on job retention, providing basic primary health facilities, and firming up the foundation for local support and self-sufficiency.

These funds are sorely needed. Economic progress is taking place in the region, but this supportive Federal help is critical if we are to continue this progress. This region still lags behind much of the Nation in employment, educational achievement, per capita income, and countless other gages. The Appalachian Regional Development Act has been a success. It has been a factor in improving the economic well-being of this vital energy-rich region of the country.

This bill is necessary to complete the task and to truly promote National economic recovery and stability.

Mr. OBERSTAR. Mr. Chairman, will the gentleman yield?

Mr. FLIPPO. I yield to the gentleman from Minnesota.

Mr. OBERSTAR. Mr. Chairman, I want to take this opportunity to thank the gentleman from Alabama for his valuable contribution to this legislation. It has been a matter of concern to the committee how to have an accounting of the funds and to be sure that those funds are spent in accordance with the purposes for which they are intended.

The gentleman is an accountant, is one who has participated in audits and has experience in this field and has made a very, very valuable contribution. We thank the gentleman for his explanation.

Mr. CLINGER. Mr. Chairman, I yield 2 minutes to the gentleman from Minnesota (Mr. HAGEDORN).

Mr. HAGEDORN. Mr. Chairman, I thank the gentleman for the time.

Mr. Chairman, I rise in support of H.R. 6100. I certainly want to extend accolades and compliments to my colleague, the gentleman from Minnesota, who has done yeoman service in cleaning up the Economic Development Administration legislation in the proposal we have before us today. I believe it is a very significant improvement over what exists currently.

Having preceded Mr. CLINGER as ranking minority member of the Subcommittee on Economic Development, I have carefully followed the progress of this bill throughout the extensive hearing process.

Many of my colleagues have contacted me asking how I feel about this legislation which will reauthorize and reform the Economic Development Administration.

It is my firm conviction that this proposal makes significant improvements in the operation of EDA.

The level of eligibility is now in line with the UDAG program, which the administration has endorsed, and the direct loan program, which has been rightly criticized for its 40 percent delinquency rate, has been eliminated.

This legislation, through its emphasis on the involvement of the private sector, realistically addresses the cur-

rent economic needs of the distressed areas of our Nation.

I believe that it makes a valuable contribution to the economic development process, and I urge my colleagues to support passage of H.R. 6100 if they feel a program such as EDA should continue.

Mr. OBERSTAR. Mr. Chairman, I would like to thank the gentleman from Minnesota for that comment and also to express again my appreciation to the gentleman for his cooperation throughout the period of time he served as ranking member of our subcommittee and for the full cooperation and splendid cooperation he has extended to me and to the Members on our side throughout the process of formulating this bill.

Mr. Chairman, I yield such time as she may consume to the gentlewoman from Connecticut (Mrs. KENNELLY).

Mrs. KENNELLY. Mr. Chairman, I rise in strong support of H.R. 6100, the National Development Investment Act, legislation to revise and improve our Nation's economic development program.

The programs currently under the Economic Development Administration have been extremely successful in the State of Connecticut and the EDA enjoys substantial support in my district. During town meetings I have held, public officials have repeatedly expressed their concern over the uncertain fate of the EDA. These local officials face daily the economic distress resulting from the unemployment rate of 9.8 percent. They know that economic recovery for many distressed areas will simply not be possible without Federal assistance.

H.R. 6100, the product of 13 days of hearings, will build upon what we have learned about economic development and Federal assistance over the past 17 years. Under the strong leadership of Representative OBERSTAR and Representative CLINGER, the bill places added emphasis on the rehabilitation and repair of public facilities; it establishes locally administered revolving loan funds to provide seed capital for small business; and it provides assistance for employee stock ownership of plants that would otherwise be shut down. The National Development Investment Act, most significantly, channels Federal assistance to those areas that meet tighter eligibility criteria and that show local initiative and local commitment in developing strategies for sustained economic recovery. In short, in a time of great economic distress and limited Federal resources, H.R. 6100 is a realistic effort to target assistance where it will have the greatest impact.

My strong support for H.R. 6100 is based in part on the centerpiece of the bill, the development assistance strategy, which will be a long-range planning document required from every

applicant to serve as a practical action plan.

In testimony before the Subcommittee on Economic Development, the deputy commissioner of Connecticut's Department of Economic Development testified as to the success of a partnership between the State and the EDA which embodies the concepts underlying H.R. 6100. Seven years ago, under the leadership of the late Gov. Ella Grasso, Connecticut and the EDA worked together to develop a comprehensive strategy for long-term and diverse economic recovery targeted to one of the most severely distressed areas within the State. All levels of government and the business community worked in partnership—respecting the rights and obligations of municipalities for self-determination in their own economic revitalization. The result has been the creation and retention of over 20,000 jobs in a once chronically distressed region—with unemployment, even today, a full 4 points below what it was 7 years ago.

The importance of the programs under the Economic Development Administration cannot be understated. Programs under the EDA have worked well in the past; they promise to work even better under the new National Development Investment Act.

Mr. OBERSTAR. Mr. Chairman, I yield 3 minutes to the gentleman from West Virginia (Mr. RAHALL).

Mr. RAHALL. Mr. Chairman, since the earliest years of the 20th-century events periodically made Americans aware that Appalachia was a region apart, isolated from the rest of the country due to its rough terrain, suffering from the ravages of floods, prone to erratic swings in the coal industry, and subject to severe economic and population shifts than in the rest of the Nation.

By the early 1960's, conditions in Appalachia had reached desperate proportions as major floods and the boom and bust cycle of the coal industry took its toll in human suffering. Despite efforts of religious leaders, public officials, universities, and business groups in the region to alleviate the many socioeconomic problems, little permanent change was accomplished until President Kennedy appointed the President's Appalachian Regional Commission to "prepare a comprehensive action program for the economic development of the Appalachian region."

Today, we have before us legislation to reauthorize the Appalachian Regional Development Act of 1965 and the Economic Development Act of 1965. Today, we have the rare opportunity to use some hindsight during our deliberation of H.R. 6100; we have the ability to judge time-tested programs contained in this bill.

Using even these most stringent of criteria, I stand here today to say that without a doubt, the Appalachian Regional Commission is a program that has worked. During the past 17 years, the ARC has demonstrated the capability to facilitate cooperation among all levels of government and the private sector. It has pioneered new approaches in extending health care in doctor-short areas and has linked the region to the rest of the Nation through a system of highways.

Mr. Chairman, the Appalachian region encompasses 397 counties in 13 States stretching from southern New York to northern Mississippi. The population in this region is over 20 million. And facts stand as testimony to how the ARC program has helped these people. Since the ARC highway program began, 430,000 jobs have been made possible due to this modern transportation network. Before ARC, only 25 percent of Appalachian youth were getting vocational training; today the Commission has made possible 705 vocational/technical education facilities and now 52 percent of the 11th and 12th graders in the region are getting such training. ARC has stimulated the development of almost 20,000 housing units. In the area of health care, the ARC has fought tuberculosis, infectious diseases, and infant mortality, and today, primary health care facilities are within reach of most people in the region.

In my congressional district alone, 62 projects totaling \$10.5 million have been approved including primary health care, long-term care, emergency services and the construction and equipping of hospitals; 25 vocational education projects have been funded at over \$7 million; 15 water and sewer and waste treatment projects have received over \$3.8 million; and 7 solid waste projects have received \$1.5 million. In all, 181 nonhighway area development projects in my district have received a total of \$35.5 million in ARC funds. Largely because of these programs, the gap in per capita personal income in my district and the Nation has been narrowed. People living in poverty have decreased from 40 percent of the total population in 1960 to 16 percent in 1976. The decline in population of nearly 13 percent between 1960 and 1970 has been arrested and there has been a gain of slightly over 11 percent by 1980. Jobs have been created and the unemployment rate, once three times the national average, is now one-third more than the national rate.

Yet, while these facts and figures are testimony to a successful program, let us not fool ourselves. There are still distressing gaps between Appalachia and the rest of the Nation. In my district, for example, the poverty rate is still 25 percent more than the national rate. There are only 119 doc-

tors per 100,000 population; only two-thirds of the national figure of 170 per 100,000 population. Highway projects, such as Corridor G running from Charleston to north of Pikeville, are uncompleted and are crucial to the transportation of coal.

West Virginia, and the region, have made progress but we can ill afford to lose this sound base by an abrupt halt to the ARC program. The bill before us today is a phaseout program encompassing the recommendations of the Appalachian Governors. It is a good program, and one taking into account the economic situation of today. I commend the distinguished chairmen of the Subcommittee on Economic Development, Mr. OBERSTAR, and of the full Committee on Public Works and Transportation, Mr. HOWARD, for their diligent efforts on behalf of the people of Appalachia. We have walked through parts of Appalachia together, heard from the local people, and visited many of the ARC programs. While Chairman OBERSTAR is from a non-Appalachian State, his interest in ARC and his recognition of its importance signifies the importance the development of this region has to the rest of the Nation.

□ 1650

Mr. OBERSTAR. Mr. Chairman, I yield 30 seconds to the gentleman from Michigan (Mr. ALBOSTA).

Mr. ALBOSTA. I thank the gentleman for yielding this time to me.

Mr. Chairman, I want to associate myself with the remarks of the gentleman from West Virginia (Mr. RAHALL).

I was there during the hearings on that area that the gentleman was speaking about, the Appalachian region. I have seen the types of results that he talked about and I just want to be a part of his remarks, because I think that is the best example that I can think of anywhere where EDA has helped and where help from the Federal Government and local governments have really worked.

I want to associate myself with the remarks of the gentleman from West Virginia, Mr. RAHALL.

PARLIAMENTARY INQUIRY

Mr. CLINGER. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. CLINGER. Mr. Chairman, my understanding is that the debate time is 1 hour and 30 minutes, with 45 minutes for each side.

The CHAIRMAN. The gentleman is correct.

Mr. CLINGER. My understanding further is that the gentleman from Minnesota and myself would control all of that time and yield time to the members of the Committee on Banking, Finance and Urban Affairs.

The CHAIRMAN. That is correct. The gentleman from Pennsylvania

(Mr. CLINGER) has 18 minutes remaining, and the gentleman from Minnesota (Mr. OBERSTAR) now has 14 minutes remaining.

Mr. CLINGER. Mr. Chairman, is that the total time?

The CHAIRMAN. That is correct.

Mr. CLINGER. Mr. Chairman, I yield to the gentleman from Connecticut (Mr. MCKINNEY).

Mr. MCKINNEY. Mr. Chairman, I really would like to congratulate the committee and my good friend and fellow Northeast-Midwest congressional coalition member, the gentleman from Minnesota, JIM OBERSTAR, for the work that he and the gentleman from Pennsylvania, BILL CLINGER, the gentleman from New Jersey, Mr. HOWARD, my good friend, the gentleman from California, Mr. CLAUSEN—Mr. Chairman, there have been so many compliments, I guess I can just say I agree with all of the above.

I would like to say, Mr. Chairman, that this was a rewarding experience for us as the Committee on Banking, Finance and Urban Affairs was able to cooperate so closely and so clearly with another committee that we could have joint hearings. I do not think that is often done, although I think it saved a great deal of time and expedited the taxpayers' work and the work of this body.

I very strongly support this bill. EDA has been castigated in the old days and torn apart; it has been said that it locks people and resources and firms into areas that have lost their viability.

I would suggest that the biggest city in the State of Connecticut, Bridgeport, which I represent, would not even have the tremor of life it has today without the economic development assistance program.

I have never found it to lock people in; I have never found it to keep unviable industries alive.

I have found that it came along and took an older and far more strained part of the Nation, whose resources were at the end of their line rather than at its beginning, and made them work again.

The problem I have with the previous economic development assistance legislation was that it would have qualified about 80 percent of the United States of America. I must say, without being parochial about it, as I flew through some parts of this country and left my city with its 125-year-old factories, four stories tall, with bricks falling out of the sides, that I found it difficult to think that some parts of the country were as distressed as mine.

I see my good friend Mr. EVANS from Delaware sitting here. I remember walking through a Chrysler plant in Delaware with him, watching the rain fall through the roof. Yet that plant,

like many plants in Bridgeport, earned the money that paid the taxes that supplied the energy, the finances, and the capital that went to the Sun Belt, to the Dust Bowl, and throughout the United States of America and built this Nation.

I congratulate the chairman and ranking member on creating a bill that targets far more realistically, I would suggest, about 40 percent of those areas really are troubled and really are in need.

I also have to say, Mr. Chairman, that one of the things that has really disturbed me is interest rates. Interest rates are a reflection of the amount of capital in the United States. I would suggest that we have been throwing away capital in the United States faster than we have been creating it by ignoring our infrastructure, by ignoring what we have.

I have often said that I do not see the south Bronx as a distressed community, per se, even though it is one of the most distressed in the United States of America. I see the south Bronx as subway lines, bus lines, streets, sidewalks, water mains, gas mains, the whole infrastructure of a city.

This is true across the United States, from Detroit to Minneapolis, to every older city that one goes to.

I do not think that in a world where capital costs 15 percent prime that we can afford to throw away any capital.

I congratulate the committee on putting the emphasis of this bill on trying to regenerate, to rebuild, and hold onto what we have. I think it is something that we have totally ignored in this country for far too long.

I would hope that the Congress and my colleagues will see fit to pass this piece of legislation. It is an improvement on an old idea. It is not as much money as I would like to see us be able to spend but I do not think I will ever see the kind of money I would like to see in any program for the cities.

I would also hope that a very good friend of mine intends to put in an amendment on the Davis-Bacon problem. I would suggest that the amendment has a terrible flaw in that the 10-percent basis on that amendment can, quite frankly, later on down the path, be voided by that terrible complaint that the contractors are so used to having that "Oh, well, other costs got out of control."

I would suggest that to get into an argument and to argue over a very good bill on that subject is a terrible mistake at this late date in the Congress. I hope my colleagues will keep that in mind.

Mr. Chairman, I would like at this point to yield 3 minutes to the ranking member of the Committee on Banking, Finance and Urban Affairs, Mr. STANTON of Ohio.

Mr. STANTON of Ohio. Mr. Chairman, H.R. 6100, the National Development Investment Act, was jointly referred to the Committee on Public Works and the Committee on Banking, Finance and Urban Affairs. Due to the press of other legislation, however, our committee never met on this proposal. Instead, we waived consideration in exchange for an opportunity to have floor time during general debate on the legislation.

This, then, is my first chance to speak on this legislation. While I share the objectives of the legislation, I rise to indicate the administration's strong opposition to the bill. The administration believes that market forces operating upon the private sector are a better means to foster local economic development than the assistance embodied in H.R. 6100. Federal economic development assistance has a history of subsidizing inefficiency and limiting opportunity.

In lieu of this legislation, the administration seeks to stimulate economic expansion and job creation through regulatory relief, and fiscal restraint. Furthermore, the administration does support targeted assistance through the use of the community development block grant program, the urban development action grant program, and the enterprise zone legislation.

As we consider this legislation, we should also be aware that it adds another layer to the ever burgeoning volume of Federal grants and guarantees which, in turn, has an impact on the Nation's credit markets.

Over the past several years, Federal credit programs have expanded at a rate in excess of direct Federal spending programs. As a consequence, Federal credit program activity has risen to record levels of intrusion into U.S. financial markets. To the objective examiner, it is an undisputed fact that the growth of Federal credit has gotten out of hand. The statistics on the extent of Federal credit activity as a share of total credit allocation in the United States are alarming.

What is particularly unfortunate about this phenomenon of Federal credit growth is that it has gone relatively unnoticed, compared to the attention received by the Federal budget deficit. The lack of awareness and understanding of this aspect of Federal spending is widespread in and out of the Government and is attributable predominately to the fact that the direct loan and loan guarantee programs of Federal agencies and federally sponsored enterprises are not reflected in the Federal deficit, as they are recorded as off-budget activity. Yet these Federal credit programs have essentially the same impact on the economy and the financial markets as do on-budget expenditures. Both types of spending lay claim to scarced domestic resources and both

reallocate them to a vast array of beneficiaries.

In conclusion, while I support the objectives of this bill, I urge my colleagues to be mindful of the administration's concerns and the potential harm that this legislation can cause to our Nation's credit markets before casting their vote on this measure.

□ 1700

Mr. McKINNEY. Mr. Chairman, I yield to the gentleman from Minnesota (Mr. STANGELAND).

Mr. STANGELAND. Mr. Chairman, I rise in support of H.R. 6100. I, too, wish to congratulate Mr. OBERSTAR and Mr. CLINGER on their fine accomplishment in the formulation of this important legislation.

While I am a strong supporter of the President's economic recovery package, I feel that the changes to EDA proposed in H.R. 6100 would enable that Agency to complement the enterprise zone concept as well as work in concert with the community development block grant and urban development action grant programs to provide a balanced approach to economic development.

Coming from a primarily rural district and one which has an unemployment rate in some areas as high as 26 percent, I can see the need for a program of the type envisioned in H.R. 6100, one which not only allows but requires local initiative and involvement in the economic development process.

The realistic approach that this bill takes by focusing on the role of the private sector and requiring the development of a workable strategy makes it a sound and reasonable means of assisting our Nation's distressed communities.

I have cosponsored this bill, I believe it can transform EDA into the effective Agency it was created to be, and I urge you to support passage of this important measure.

Mr. McKINNEY. Mr. Chairman, I yield to the gentleman from Ohio (Mr. McEWEN).

Mr. McEWEN. Mr. Chairman, I rise in support today of H.R. 6100, the National Development Investment Act, and in particular, the provisions in title II which concern the Appalachian Regional Commission. Title II of H.R. 6100 revises and extends the Appalachian Regional Development Act to allow for a "finish-up" of the area development projects by 1987, and of the Appalachian highway program by 1990.

The rural community, and in particular the Appalachian communities, often lack the basic infrastructure needed to achieve economic development and are frequently unable to obtain, without assistance, the resources needed to develop these areas on their own. H.R. 6100 provides the

incentives, the plans, and the resources needed to give these communities the assistance they so desperately require to bring themselves to economic self-sufficiency.

There has been no greater catalyst for development throughout the Appalachian region than the Appalachian Highway System. By September of 1981, 1,730 miles of the highway had been completed of the 3,033 miles originally intended for improvement under the Public Works and Economic Development Act of 1965. With the passage of H.R. 6100 and the execution of the finish-up program outlined in title II, the critical remaining gaps along the Appalachian highway would be constructed. In Ohio, alone, over 90 percent of the proposed system would be completed under the funding plans of this legislation.

Moreover, the increasing importance of the Appalachian Highway System to the entire Nation is growing evermore apparent. By 1980, over 50 percent of the traffic using the Appalachian Highway System was for coal transportation. With the completion by 1990 of the finish-up program for the highway system, the potential for coal transportation will be significantly increased. Each additional finished mile of this system helps to break down the isolation of the Appalachian communities, and assists in linking the remainder of our Nation to these resource-rich areas.

I wish to further emphasize that the funding recommendations for the highway system have been reached only after careful consideration of both the reduced Federal funds available and the commitment made to the Appalachian regions under the Appalachian Regional Development Act of 1965. The already completed portions of the highway have been built with a Federal investment of \$2.8 billion. Title II of this bill provides \$215 million for the highway program in 1983, and an additional \$2 billion for highway construction through fiscal year 1990. The intent of H.R. 6100 is to concentrate on those stretches of the system deemed to be the most advantageous and necessary routes, and to accelerate their completion. To reap the greatest benefit from the already completed 1,700 miles and \$2.8 billion investment, the critical gaps left unfinished to date must be constructed.

A large and important part of the newly proposed Appalachian Regional Development Act Amendments of 1982 is the emphasis placed on an increased role for private investments and job creation. In drafting this legislation, attention was directed toward increased private sector financial contributions and additional local government support for the programs. Such strong local and federal coordination is crucial to the completion of the Appalachian Highway System and the

future economic development and self-sufficiency of the Appalachian regions.

Given the New Federalism which has been become such a resounding theme in our Nation today, and the broad-based public support for this approach, it is our responsibility in Congress to help stimulate and motivate the private sector to actively participate in solving the problems currently facing our society. H.R. 6100 and title II, the Appalachian Regional Development Act Amendments of 1982, provide these incentives along with the necessary funds to help those in the Appalachian regions to help themselves, and in turn to help our country. I urgently request the serious consideration and support of my distinguished colleagues for H.R. 6100.

Mr. OBERSTAR. Mr. Chairman, I yield such time as he may consume to the gentleman from California (Mr. MINETA).

Mr. MINETA. Mr. Chairman, I wish to congratulate both the gentleman from Minnesota, Mr. OBERSTAR, who chairs this Subcommittee on Economic Development, and the ranking minority member, Mr. CLINGER of Pennsylvania. Both are very knowledgeable of this subject matter and have been extremely conscientious in putting this fine piece of legislation together. I rise in support of H.R. 6100. The basic aim of the National Development Investment Act is to encourage public officials and private enterprise to work together to help solve the serious problems of high unemployment, decaying infrastructure, and lack of capital in distressed areas, currently facing many of our urban and rural communities.

This legislation has been carefully crafted to eliminate the problems of the original Economic Development Act. Eligibility criteria have been tightened, local governments will be required to work in cooperation with the private sector, and the Federal share of development money has been reduced to 50 percent for capital projects to assure local commitment.

The program will no longer continuously feed communities which are not helping themselves, but will instead require a commitment by the community to work toward successful economic improvement.

Given the current poor fiscal condition of our States and localities, it is imperative that the Federal Government continue to assist local communities in their efforts to promote economic development. Productivity and growth will be further eroded if our local economies continue to deteriorate.

I urge your support of this measure.

Mr. OBERSTAR. Mr. Chairman, I yield such time as he may consume to the gentleman from Illinois (Mr. SAVAGE).

Mr. SAVAGE. Mr. Chairman, I rise in support of H.R. 6100, the National Development Investment Act. I favor its not only keeping but also improving programs currently under the Economic Development Administration.

This bill addresses past problems and criticisms of EDA by sharpening our focus on current economic development needs.

More specifically and most importantly, I support it because it will ease our present staggeringly high unemployment rate by promoting private and public sector jobs. Moreover, it represents a renewed recognition of the pressing need to maintain our public infrastructure, such as roads, water and sewer lines. In addition, I support it because it provides loans for capital for small business development, and begins to deal with the workers' distress when a plant closes or relocates.

Of course, in terms of how great are our needs, \$500 million a year is very little, and this proposed revitalization of our Federal economic development program is a bit late. Yet, it will do more than save this program, which now is scheduled to be phased out—it will begin correcting and rebuilding it.

Indeed, now more than ever, it is vital that we maintain our Federal concern for reasonable employment opportunities, economic development, and the maintaining of our public infrastructure.

Mr. OBERSTAR. Mr. Chairman, I yield 2 minutes to the gentleman from Michigan (Mr. BLANCHARD), chairman of the Subcommittee on Economic Stabilization of the Committee on Banking and Currency, which worked with us on this legislation.

Mr. BLANCHARD. Mr. Chairman, I would like to commend the chairman of the Committee on Public Works and Transportation and its members for crafting and moving out of committee a very fine piece of legislation. I am glad we on the Banking and Currency Committee played a small part in it, and I support the bill.

Mr. Chairman, this country needs the National Investment Development Act. Many communities in this Nation are suffering economic distress, and some, including my own State of Michigan, are facing the worst economic problems they have known since the Great Depression.

The Federal Government has a responsibility to help these areas help themselves, and I believe the program embodied in this legislation while it will not solve all the economic ills, will give some stimulus and some help to these states and communities and areas to get their economies back on the right track.

There are a number of aspects to the National Investment Development Act program which I think represent an

improvement over the past EDA programs, and which I believe will result in a more efficient, and in the long run, a more productive use of Federal funds. First, the program is truly targeted to truly distressed areas. The distress is measured by unemployment or by per capita income, and once the distress criteria can no longer be met, no further assistance would be forthcoming. There are many areas in this country which could put Federal assistance to good use, but with the limited funds authorized in this bill, this targeting will put the money where it is most needed.

Second, the requirement that the Federal funds be matched by the recipient area will not only spread the limited Federal monies, but will represent a true commitment on the part of the recipient area and, I believe, a careful and more productive use of those moneys.

Third, the emphasis in the program on private sector involvement is an important step toward a realistic and lasting economic development program. Governments must do their part but true economic growth requires investment and involvement of the private sector, for that is, after all, where the jobs and the economic vitality are.

Finally, and perhaps most important of all, this bill puts the planning and decisionmaking in the hands of the States and areas and communities instead of the Federal Government, which has been the case all too often in the past. In the decade-and-a-half since the EDA was first created, our States and communities and localities have become the real experts on what economic development is all about, and what their needs and assets are and how they can best be coordinated and utilized. Under this program, they will make the decisions, and the Government's role will be that of a "helping hand," which I think is as it should be.

This is a good bill, Mr. Chairman, and one which the country badly needs. I want to commend Chairman HOWARD and Chairman OBERSTAR, and their colleagues on the Public Works Committee from both sides of the aisle, for spending the better part of a year examining all aspects of the Economic Development Administration programs and fashioning a program tailored to the times and to what they have learned works best. This is a carefully thought out and workable program. I am pleased that the Banking Committee has had a hand in bringing this bill to the floor. I urge my colleagues to support it.

Mr. CLINGER. Mr. Chairman, I yield 4 minutes to the gentleman from Michigan (Mr. DUNN).

Mr. DUNN. Mr. Chairman, I would like to begin by also complimenting the ranking member of the committee, the gentleman from Pennsylvania, as

well as the distinguished chairman, the gentleman from Minnesota. I wonder if I might have the attention of the chairman for a couple of questions.

I attended one of the gentleman's hearings, and some of the reservations that were expressed at those hearings have indeed been addressed in the gentleman's bill, but nevertheless I still have a couple of reservations, one of them being a similar conduit for revitalizing areas, that being the Economic Development Corporation. Under that scenario local planning units, local banks, local businesses all get together and indeed decide what is best for their community and go about it through the route of tax-exempt revenue bonds.

I wonder if that is not a more efficient way for a local government to decide what its needs are than what the gentleman proposed here in the bill.

Mr. OBERSTAR. If the gentleman will yield, the concept the gentleman has expressed is one that is parallel to the concept of this legislation but does not have within it the feature that I think is a central part of this legislation, which is the up-front infrastructure funding available to a community that money that is needed to invest in water and sewerlines and streets and industrial park development. The concept the gentleman has described does not incorporate that.

Mr. DUNN. The up-front cost brings me to the second part of my question. When we talked again at the hearing about the communities that are about to lose a large employer, and the bill provides for funding for those, can the gentleman give me an example of the type of funds for, say, an area that does not currently have unemployment but is about to lose a major employer? What kind of grant would they be seeking under the bill the gentleman is proposing?

Mr. OBERSTAR. They would be working to develop a strategy for investment of resources to replace the business that would be lost by, say, a military base closure or loss of a major industry. To give the gentleman an example, in northeastern Minnesota a few years ago there was a question as to whether Reserve Mining Co., a major iron ore mining facility, would be forced to close because of environmental questions. A grant from the Economic Development Administration helped an entire county to plan for alternative economic development in the event that industry should close. As it turned out, the industry did not close. The county used those plans to develop alternative industrial development opportunities, which have been an important supplement now that that industry has not closed, to help their economy.

Mr. DUNN. What the gentleman is basically saying is that it would be used for this planning strategy.

One final question. I have heard many jokes in the last few years about EDA being used to provide funds for fast food restaurants and such.

On page 6, at line 18, section 2 reads:

"(2) revolving loan funds to promote the establishment and growth of small businesses and to retain indigenous firms and entrepreneurs which contribute to the creation, retention, and expansion of private sector jobs;

Is it the chairman's opinion that this language is indeed strong enough, specific enough to limit these type of business out of this type of grant application?

Mr. OBERSTAR. In the context of this legislation, the Federal Government is not making the decision for the local government as to what type of investment is best for that community. It is up to the mayor, the council, the local economic development committee, to decide what they need, what suits their local condition best and will best create jobs. We are not attempting to prejudice or to eliminate any kind of investment.

Mr. DUNN. If I might continue, in looking to revitalize an area I do not believe the gentleman would do that, but suppose the example I used of a new McDonalds, could that be creating some sort of new industry in that area? I have a reservation as to whether the gentleman's language here is specific enough.

The CHAIRMAN. The time of the gentleman from Michigan has expired.

Mr. CLINGER. Mr. Chairman, I yield 1 additional minute to the gentleman from Michigan.

Mr. CLINGER. Mr. Chairman, will the gentleman yield?

Mr. DUNN. I will be glad to yield.

Mr. CLINGER. I think the example the gentleman cited of McDonald's really would not apply to EDA. That sort of thing, I think, has been criticized on the industrial bond program, and so forth, but I would really question whether EDA has ever financed a McDonald's. I think they have focused and limited their money to the kind of job generating we are talking about, basically industrial development.

□ 1710

Mr. CLINGER. Mr. Chairman, I yield 4 minutes to the gentleman from Delaware (Mr. EVANS.)

Mr. EVANS of Delaware. Mr. Chairman, I rise in strong support of H.R. 6100, the National Development Investment Act.

I, too, would like to offer my congratulations to the chairman of the full committee, the gentleman from New Jersey (Mr. HOWARD), and the ranking member from California (Mr. CLAUSEN), and especially, to the chairman of the Economic Development

Subcommittee, the gentleman from Minnesota (Mr. OBERSTAR), and the ranking minority member the gentleman from Pennsylvania (Mr. CLINGER), all of whom have done an outstanding job; and to the gentleman from Ohio (Mr. STANTON), and to the chairman of our Subcommittee on Economic Stabilization and our ranking minority member on Economic Stabilization, the gentleman from Connecticut (Mr. McKINNEY) and the gentleman from Michigan (Mr. BLANCHARD).

Over the years I have seen the Economic Development Administration up front, at first hand, as director of development for the State of Delaware back in the late 1960's. I saw some outstanding results.

More recently, through EDA assistance, Delawarans have benefited from the construction of a containerized cargo crane at the Port of Wilmington, the construction of a vocational skills center at Goldey Beacom College, and the construction of the beginning of construction of the Marine Industrial Development Park at Lewes, which is the southern campus of the University of Delaware.

Badly needed jobs have been created and others saved with the investment of relatively few Federal dollars in projects such as these in Delaware.

We need to develop the factors that affect economic development and mean more permanent jobs for American workers. This bill is designed to do just that.

Despite the fact that my friend and our former colleague from Michigan, Dave Stockman, now the Director of the Office of Management and Budget, opposes this bill, we have a responsibility here in this body, under the Constitution, to act independently.

I think this is a wise investment of the limited resources we have available to us.

I must also point out to my colleagues, however, that I have seen EDA make some serious mistakes for which it has been quite appropriately criticized by many, including this administration.

The bill before us today corrects many of those mistakes and many of those problems have been solved under this bill and it adapts the original goals of the act to the economic realities of the 1980's.

The gentleman from Minnesota and the gentleman from Pennsylvania have both pointed out that the level of eligibility has been reduced from 80 percent to close to 40 percent of the Nation.

I will not enumerate on those reasons and those many areas that the bill has been changed except to emphasize that the bill insures that funds go only to areas of greatest need but also where they can realistically produce the greatest results: more productive jobs in the private sector.

Another key element of the legislation is its emphasis on coordination. No longer can we as a nation afford to federally finance isolated public works projects; we cannot do that in a haphazard manner anymore, and this bill takes that into account.

This legislation will not solve all the economic ills of our Nation but it certainly is a major step in the right direction. It provides a new approach to economic growth and development.

No longer will projects be funded in that haphazard manner. They must be a part of a cohesive and a workable investment strategy.

The community itself must take an active and responsible role in the development process. It must look to the private sector as a necessary component for any meaningful economic growth to take place.

Mr. Chairman, taking this realistic approach, the National Development Investment Act is one of the most significant initiatives of this type that the Congress has considered in recent years. I support it strongly. It is reasonable. It is rational. It is the way to target our limited resources in the most effective manner possible and produce jobs for Americans.

The CHAIRMAN. All time of the gentleman from Pennsylvania (Mr. CLINGER) has expired.

The gentleman from Minnesota (Mr. OBERSTAR) has 12 minutes remaining.

Mr. OBERSTAR. Mr. Chairman, I yield 2 minutes to the gentleman from New York (Mr. LUNDINE).

Mr. LUNDINE. Mr. Chairman, I rise today in strong support of H.R. 6100, the National Development Investment Act. This legislation, which provides a new authorization and focus to replace the soon to expire Public Works and Economic Development and Appalachian Regional Development Acts of 1965, is critically needed to bring about national economic revitalization.

The promotion of a partnership between the Federal Government and local communities that is based on local initiative and long-range investment strategies is an important ingredient to insure that the structural adjustments are made in our economy that will support industrial growth. Such local long-range investment strategic investment planning must involve the private sector to a much greater degree than in the past. H.R. 6100, recognizes this and encourages private sector leveraging of local investment strategies.

I want to particularly commend the committee for including a provision in this bill on employee ownership. By doing so, this bill responds to the needs of employee purchasers to have access to capital and technical assistance. Such assistance is particularly important in cases where employees seek to purchase plants or firms which otherwise would be shut down. I am

pleased that this legislation directs EDA to give priority attention to instances where employee-ownership efforts can prevent plant or business shut down.

Employee stock ownership plans (ESOP's) have grown significantly in recent years; there are more than 5,000 of them in America today. Most of these ESOP's hold only small percentages of a company's stock; Nevertheless, such stock plans can facilitate the capital expansion of a business, broaden the base of ownership, and provide an incentive for improved productivity.

In a small but growing number of cases, however, ESOP's have been used by employees to acquire a majority interest in a firm. A 1980 report by the Senate Select Committee on Small Business noted that there were more than 250 firms of 10 employees or more that are majority owned by their employees. This report went on to note that the motivation of roughly 70 percent of these employee purchases was to preserve jobs. The success of this option has been examined and confirmed over the last few years during hearings by the House Banking Committee on which I serve, the House Small Business Committee, the Senate Finance Committee, and the Senate Select Committee on Small Business.

Experience suggests that there are at least three major reasons, in today's economy, why businesses which are on the brink of closing can be kept afloat as employee-owned firms. First, a particular division of a conglomerate may suffer from absentee management. If, instead it is guided by those at the plant level who are familiar with its products and operation, performance may well improve. Second, a plant may be "trapped" within an older, declining firm, even though its own operations are profitable. Third, in this era of fast tax writeoffs and frequent mergers, a parent company may even abandon plants which are still profitable in search of greater returns on investment.

The Federal financial commitment to employee ownership contained in H.R. 6100 will be crucial in leveraging private credit to new or potential employee-owned businesses. The technical assistance that will be provided by this bill recognizes the need for help to employee-owned firms in redesigning their organizations to insure employee participation in management decisions. Finally, the direction to the Secretary under this bill to conduct feasibility studies in employee ownership cases will assure the best use of Federal resources and enable EDA and local governments to factor the possibility of employee ownership into a comprehensive local development strategy.

The employee ownership provisions of this bill build upon the limited but important involvement of EDA in employee ownership ventures over the last few years. Under the current title IX program, EDA has assisted about a dozen employee purchases of plants and businesses.

The advantages of such assistance is no more vividly illustrated than in a case which enabled the employee purchase of a specialty steel corporation which was about to be shut down in my congressional district in Dunkirk, N.Y. In 1976 EDA granted \$10 million to the State of New York which was, in turn, loaned to 35 management employees to purchase the Al Tech Specialty Steel Corp. Since then, the record of Al Tech has been very successful. Perhaps the most impressive fact is that within the first 2 years Al Tech employees paid more than \$10 million in Federal income taxes alone. Obviously, when one considers in addition, business taxes, State and local taxes, and the \$25 million which the firm contributes annually to the local economy, EDA's assistance is easily justified.

There are many other success stories owing to employee ownership which we could discuss here today. The general success of ESOP's and employee ownership has been confirmed by studies conducted by the Survey Research Center at the University of Michigan and the Journal of Corporation Law. The latter study found, for example, that labor productivity in ESOP firms had grown at a rate of 1.5 percent higher than in non-ESOP businesses.

Before concluding, Mr. Chairman, I would like to take a moment to also commend the committee for their action in including in this legislation an extension of the Appalachian Regional Development Act to complete the area redevelopment program and the Appalachian highway system.

This has been a very successful program in the northernmost reaches of Appalachia, which I represent, and indeed throughout the whole of Appalachia. The Appalachian highway program, in particular, has been critically important to the upstate New York area and has been instrumental in the construction of the yet to be completed Southern Tier Expressway, to enable the critical linking of western New York to the rest of the State. Travel time from upstate New York to New York City has been reduced already from 10 hours to 7 hours. I think you can appreciate the importance of this development.

In summary, Mr. Chairman, I offer my strong support to the provisions of H.R. 6100. It offers the kind of Federal targeted assistance to local initiatives that is desperately needed to modernize our industrial base and economically depressed areas to insure a

stable foundation for economic growth in the future.

Mr. OBSERTAR. Mr. Chairman, I yield 2 minutes to the gentleman from Ohio (Mr. MOTT).

Mr. MOTT. Mr. Chairman, I rise in support of H.R. 6100, the National Development Investment Act.

As a Representative from the Cleveland area, I have seen and been part of that city's gallant fight back from severe economic straits. We still have a long way to go, but we will make it. We need the kind of assistance provided in the National Development Investment Act.

The Public Works and Transportation Subcommittee on Economic Development held a hearing in Cleveland last January, to explore the problems of urban unemployment and to obtain insights into how economic development legislation could better serve larger, older cities like Cleveland, as well as other parts of this country.

I was privileged to take part in that hearing. We heard from 16 witnesses, including Cleveland's director of economic development, and the Greater Cleveland Growth Association, as well as spokesmen for other Ohio cities, contractors, and unions.

Cleveland is one of the finest examples of Federal, local, and private cooperation in pulling the city from bankruptcy back to hope. The city was and is, like many similar, older manufacturing cities, suffering from a long-term loss of industrial job opportunities and population. In recent years, however, it has decided to fight back.

The new mayor established an operations improvement task force, composed of the city's top business leaders and management professions, to undertake a top-to-bottom analysis of the city's operations. The task force recommended major management recommendations, and worked with the city administration on almost a weekly basis to assist in their implementation.

The city, the Greater Cleveland Growth Association, the Cleveland private industry councils and private interests have joined together in one of the largest technical assistance efforts in the country to help local businesses secure Federal contracts.

Cleveland has organized a major citywide development corporation, which may ultimately be responsible for administering its \$1 million EDA revolving loan fund. It is already a very aggressive SBA section 503 corporation.

The city has significantly expanded its urban development action grant program capacity.

It is moving ahead to develop major areas around the EDA-assisted Playhouse Square theater complex, and is pulling together a major neighborhood commercial revitalization program, which will be supported by community development block grant

funds, and which will begin bringing jobs and business capacity back to its neighborhoods.

Cleveland is also laying the groundwork for designation as an enterprise zone.

As I said, Mr. Chairman, we still have a long way to go. But now the city has the hope and determination, and the tools to pull itself out of its past troubles.

In recent years it has resourcefully used assistance from EDA, and will be in a prime position to take full advantage of the economic development tools provided by H.R. 6100.

At our hearings last January, the city and the Greater Cleveland Growth Association both provided considerable insights into the economic development process, many of which were incorporated into H.R. 6100.

I urge my colleagues to give the city the chance to benefit from the assistance which will be provided by the National Development Investment Act.

□ 1720

Mr. OBERSTAR. Mr. Chairman, I yield 2 minutes to the gentleman from Michigan (Mr. ALBOSTA), who has played a very significant role and dedicated many hours to the formulation of this legislation.

Mr. ALBOSTA. Mr. Chairman, I rise in strong support of H.R. 6100, the National Development Investment Act. This legislation will continue the Economic Development Administration programs and will target these programs to those areas of the country most in need of economic assistance.

As a member of both the Subcommittee on Economic Development and the full Public Works and Transportation Committee, I participated in countless hearings concerning EDA programs and proposals to change these programs. In fact, I brought the subcommittee to my own State of Michigan last December to hear directly from representatives of business, labor, and government on what needs to be done to help areas like Michigan rebuild their economy.

Out of these hearings came H.R. 6100, a well-thought-out piece of legislation that uses specific criteria to determine an area's economic problems and then requires that a development strategy be put together before any Federal money is spent. This new EDA program will enable the Federal Government to get the maximum bang for the buck.

By providing grants to communities for the construction of industrial parks and the necessary water and sewer lines, EDA gives a community the tools to build a solid economy by being able to attract new business in or expand existing firms. In Michigan, for example, EDA during the past 16 years has provided \$90 million in

public works grants for industrial parks and water and sewer line expansion. At the same time, \$34 million in business loans were made to Michigan companies willing to locate a new or expand an existing facility in the high-unemployment areas of the State. As a result, approximately 25,000 new jobs have been created.

In a State with record unemployment we need this type of a program to help put Michigan on the road to recovery. EDA by itself will not cure Michigan's economic problems. But EDA will give us the tools we so desperately need to start the rebuilding process.

EDA is a proven program combining both Government and industry efforts to improve our Nation's economy. The National Development Investment Act will make the EDA program even more effective and I strongly urge my colleagues to approve H.R. 6100 as passed by the Public Works and Transportation Committee.

Before concluding, I would like to compliment the gentleman from Minnesota, the distinguished chairman of the Subcommittee on Economic Development for his outstanding leadership in working to preserve EDA and improve its programs. I would also like to compliment the gentleman from Pennsylvania, the ranking minority member of the subcommittee for his fine work on the EDA legislation.

Mr. OBERSTAR. Mr. Chairman, I yield 2 minutes to the gentlewoman from Tennessee (Mrs. BOUQUARD), a member of the subcommittee.

Mrs. BOUQUARD. Mr. Chairman, I would also like to express my appreciation to our chairman, the gentleman from Minnesota, Mr. JIM OBERSTAR, for his outstanding leadership, as well as the gentleman from Pennsylvania (Mr. CLINGER) and all who have had an active part in making this legislation a reality.

Mr. Chairman, economic development assistance is needed for the Nation and the opportunity for a transition from the Appalachian Regional Commission to alternative funding sources is a necessity for Appalachia. We cannot continue to see progress slip through our fingers. That is why I am supporting H.R. 6100. It incorporates the finish-up program proposed by the Governors, who made it explicitly clear what should be done, how they would accomplish the unfinished task, and how much funding they felt was needed.

ARC has raised the expectations and given self-esteem to the people of my district and all over Appalachia. The Governors have made good decisions as to what is needed to be done. In my district alone, things have changed dramatically. ARC has assisted 53 vocational education centers and 9 recreation facilities with over \$7 million. These are things people take for

granted, but they were absent before ARC.

We have been able to put in utility systems water-sewer projects servicing our citizens in several counties. Thirty of these bicounty projects received \$7.9 million in ARC assistance. We now have waste treatment plants. Both of these help us with our industrial development and attraction and expansion of industry. In all, 114 community development projects in my district have received \$18.4 million Appalachian funds. Transportation has been improved. Under the Governors' program corridor J could largely be completed, shortening commuter and transportation distance to Chattanooga. Our port development projects will help business and industry, and create badly needed jobs.

During the period of the Appalachian program, earlier outmigration was reversed, and population grew substantially. Between 1960 and 1980, it increased by over 117,000. Personal income rose from 77.4 percent of the national average in 1959 to almost 90 percent in 1979 and those living in poverty dropped from over 34 percent to 16 percent of the population.

However, the recent economic problems in the Nation have been felt especially hard in my district. Unemployment, which had been below the national average, has now risen to 12.6 percent in Hamilton County—almost 3 percentage points above the national average of 9.8 percent. My district, and our State need time to adjust to the changing economic conditions, and to find alternative funding sources as the Appalachian finish-up program is completed.

Furthermore, we still have pockets of major deprivation. For example, much remains to be done in Meigs County. They need basic community facilities. I know there are other such counties in Appalachia. We cannot let them down. The finish-up program would provide special assistance for these counties.

H.R. 6100 incorporates the Governors' finish-up activities for the region. It is a reasonable request. I think it is frugal; I like it because it is targeted, but most of all the finish-up fulfills the promises made in 1965.

Mr. OBERSTAR. Mr. Chairman, I yield 1 minute to the gentleman from Ohio (Mr. ECKART).

Mr. ECKART. Mr. Chairman, I thank the chairman of the subcommittee and fellow Slovene for the fine work he has done, and also my colleague, the gentleman from Pennsylvania for his great work.

Mr. Chairman, today we have the opportunity to relieve some of the vast human suffering of this country's millions of unemployed. The legislation before us, H.R. 6100, proposes a modest economic development program that emphasizes comprehensive

planning to create and retain desperately needed jobs. The unemployed do not want a dole—they want dignity and a job. H.R. 6100 will help to give them both.

The measured approach of this legislation insures that its benefits reach only those truly in need. Its eligibility criteria are both rigid and fair: Unemployment must be higher than the national average for the preceding 24 months, or per capita income must be lower than the national average, or unemployment must rise suddenly as a result of a plant closing, and so forth.

In northeastern Ohio, unemployment is almost mind boggling. Just when we were hoping that the economic tide was turning, we got more bad news—another 360,000 out of a job nationwide this month. The people of northern Ohio will not wait much longer for relief—indeed they cannot wait much longer.

In addition to being a very personal tragedy, unemployment also takes its toll on the community. The shutdown of a factory means more than the loss of the factory workers' jobs—it means that the nearby gas stations, drug stores, and supermarkets also suffer because their customers no longer have the money to patronize their businesses. While this has turned into a national tragedy, this administration has been painfully slow to respond.

If we pass this bill today, we show America's unemployed that we are willing to respond to their needs. We show that we are willing to take concrete action that will help to relieve suffering, rebuild our industrial base, and put people back on the job.

Not at all surprisingly, this legislation is strongly supported by the U.S. Conference of Mayors, the National Association of Counties and many labor organizations, among others. These organizations recognize the importance of a revitalized economic base; if we can work together to rebuild the badly decaying infrastructure in this country we will again bring businesses back to what are now the distressed areas of our Nation. Such a revitalization will have a ripple effect on our Nation's economy as a whole, thereby creating more jobs for more people who want to work.

In conclusion, I believe that this legislation is especially critical because it establishes a structure within which Federal, State and local governments can work together to promote development, preserve our Nation's beleaguered infrastructure, and create jobs. Let us all work together to help put our people back to work.

Mr. OBERSTAR. Mr. Chairman, I yield 1 minute to the gentleman from Puerto Rico (Mr. CORRADA).

Mr. CORRADA. Mr. Chairman, I rise in support of H.R. 6100, legislation

to amend the Public Works and Economic Development Act of 1965.

The legislation, the National Development Investment Act, is vital to the programs of the Federal Economic Development Administration, an agency which—since its inception—has proven to be an important source of funds to help distressed areas combat high unemployment.

In our current period of national recession, it makes no commonsense—in the name of budgetary responsibility—to curtail the proven worth of EDA's record in providing a variety of flexible programs to help local governments put people to work, to construct badly needed public facilities and infrastructure and to undergird the private sector in a partnership with public governments in setting up and financing new business enterprises.

I want to commend the gentleman from Minnesota, Mr. OBERSTAR, for his patience and diligence in building a sound record in the hearings as chairman of the Subcommittee on Economic Development, and in modifying and improving the programs contained in the legislation before us today.

Both the majority and minority members of the House Public Works and Transportation Committee are also to be commended for their diligence in reporting this legislation.

In Puerto Rico, the various programs of EDA have given our island economy a variety of programs to help combat unemployment. No other Federal agency in the broad field of economic development has—since 1966—responded with effective grants, loans and other types of Federal assistance to help stimulate our local economy.

The modification of programs which H.R. 6100 provides for will build upon the expertise of EDA to provide basic economic development tools at the local level. It contains provisions which enable EDA to work with State and local governments in developing a long-range development investment strategy, one geared to the unique problems of any area.

The legislation authorizes \$500 million in each of the next fiscal years for economic development programs, and continues the work of the Appalachian Regional Commission highway program.

On the national level, the legislation creates a new grant program for the establishment of a locally administered revolving loan fund, used to either retain existing businesses or stimulate new enterprises.

The committee has wisely included language that makes any community wishing to participate in this loan fund provide the necessary loan management capability.

The eventual assistance that conceivably could be provided to small businesses on the local level will be another stimulus to the private sector,

and one that will help mayors and local communities provide the "seed capital" so necessary to help new enterprises in the startup stage.

H.R. 6100 is a sound, reasonable bill and one which offers a measure of hope to those areas of our Nation which have been battered by the national recession.

It leaves to local initiative and the private sector considerable flexibility to help turn this economy around.

Puerto Rico, I note particularly that from 1966 to the present, the Federal Economic Development Administration regular programs has provided \$113 million in public works, business loans and guarantees, technical assistance, planning and special programs to help the Puerto Rican economy.

H.R. 6100 would continue that record. It makes no sense to completely phase out an agency that involves the private sector so effectively as EDA has done over the years.

I am in strong support of the legislation and hope that all the rhetoric we hear about the need to involve the private sector is one that will be backed up by more than words, as we do in this bill.

Mr. OBERSTAR. Mr. Chairman, I thank the gentleman from Puerto Rico for his fine statement and for the support he has given to this program which has been so important to his area.

Mr. Chairman, I yield 1 minute to the gentleman from Georgia (Mr. JENKINS).

Mr. JENKINS. Mr. Chairman, I rise in strong support of this legislation.

Through the years I realize that there have probably been, without question, some abuses or perceived abuses of EDA. In my particular area I have been very pleased with the effectiveness of Appalachia, as well as EDA. It has done a tremendous job in working with the private sector to bring truly an industrial base that is bearing fruit today. In most of my 23 counties we have shown an increase in population over the last 10 years. As a matter of fact, my district had grown more than any other single congressional district in the State of Georgia during the past 10 years.

□ 1730

During the previous 10 years, it was the lowest in population.

These programs have worked in my particular area. I urge the Members to support this legislation. I think it is truly an area that we can help make people taxpayers rather than tax eaters.

A wise use of the public money is to provide for water and sewage facilities, roads, industrial parks and similar facilities to promote the expansion of the industrial base of this Nation. We cannot provide the necessary jobs for our jobless, not the necessary tax base

to provide for the needs of our population, unless and until we have the needed services to support new or expanded plant sites. EDA and ARC have proved their worth. I sincerely hope this House and this administration will support their continuation. I urge the support of this bill.

Mr. McDADE. Mr. Chairman, I rise in support of H.R. 6100, the National Development Investment Act, a vital bill which provides continued and revitalized programs for economic development through 1985.

This bill is a consensus bill, a result of countless hearings both here in Washington and in local communities of high unemployment which have used funds like these in the past to provide the needed stimulus to build industrial parks and public facilities to encourage the establishment or expansion of industries. I would like to point out to the critics of these programs that over a 17-year lifespan EDA alone has created 1.5 million jobs, \$4.7 billion in local development initiatives, and over \$9 billion in additional investment. Because of these figures I will have to conclude that the program pays for itself with the tax revenues created by the additional jobs.

Let me relate to my colleagues some specific examples of how the economic development program has helped to not only maintain employment but also to create additional jobs in northeastern Pennsylvania, the area of the country which I proudly represent.

One of our local hospitals, because of an EDA investment of only \$264,000, together with \$70,000 of local funds, managed to save 157 jobs which would otherwise have been lost.

A local industrial park using \$230,000 of EDA money together with \$400,000 of private money created an initial 300 jobs with an estimated payroll of \$4 million.

In another instance, 1,200 new jobs were created when \$455,000 of EDA money was used to expand an existing facility. The project generated \$2.5 million in State and private investment and the EDA investment per new job was only \$2,400.

This measure addresses past criticisms including criteria which was too broad to make the program truly effective by eliminating the one-time, permanent designation and requiring an applicant to requalify every time it applies for assistance. The bill retains grants to aid local communities in the construction of public facilities and improve basic infrastructure necessary to support continued economic development activity. It provides emergency assistance to localities suffering from a sudden and severe economic dislocation of industry. It addresses the serious problem of shortage of capital resulting from lingering high interest rates by making revolving loan money

available for business expansion and retention.

My friends, this period of extended high interest rates and chronic unemployment have placed a tremendous burden on communities across our Nation. Job creation, business expansion, and the construction and maintenance of public facilities have been slowed to a standstill. Programs such as these have long recognized the need for some type of national economic development program for regions of our Nation which suffer from regional economic disparities. The programs have proved successful in the past and with these streamlined revisions promise to help spur economic development for the next 5 years.

I urge my colleagues to vote for passage without amendments.

● Mr. GEJDENSON. Mr. Chairman, I rise in strong support of H.R. 6100, the Development Investment Act. At a time when the administration is calling for the phaseout of the Economic Development Administration, the committee is to be commended not only for reauthorizing a well-proven vehicle for job creation and economic recovery, but for refining the program to address current needs.

Many distressed areas are hindered in their ability to attract businesses because they lack an adequate infrastructure—roads, sewers, transit services, waterlines—sought by firms seeking to open new plants or expand existing ones. The decay is most acute in older industrial areas, where years of use and inadequate maintenance have led to serious deterioration. According to the 1981 Connecticut Department of Transportation report of the "Condition of State Roads and Bridges," over 60 percent of the highways and bridges are in less than good condition. It was noted that although the useful life of a bridge is 50 years, Connecticut has 700 bridges that are over 50 years old.

H.R. 6100 leans EDA's focus more toward infrastructure repair and rehabilitation. The decay of these public facilities has become so extensive that it is beginning to impede economic recovery. This bill provides the stimulus needed to overcome years of capital neglect.

In addition, H.R. 6100 puts added emphasis on small business, targeting its assistance to smaller firms as defined by local communities. This is accomplished by establishing grants, for use in revolving loan funds, that would be used to attract new firms or to provide incentives for existing businesses to remain in the area.

Seven years ago, Connecticut responded to the last major recession by matching State economic recovery programs with EDA funding. In my own district, we saw the creation of the Killingly Industrial Park, a major source of employment. The Federal

EDA has proved to be a vital tool for providing employment stimulation and business development. The need for this Federal/State partnership is needed more than ever in light of the present recession and high interest rates. Just as EDA has been an essential vehicle in aiding troubled areas, its services remain essential now to bridge the gap to better economic times.

I urge my colleagues' overwhelming support of the bill that is before us. ● Mrs. HECKLER. Mr. Chairman, I rise in strong support of H.R. 6100, the National Development Investment Act, a bill that is essential for the economic well-being of thousands of towns and cities in this country.

Throughout my tenure in this House, I have witnessed the vital role played in my congressional district by programs funded under the auspices of the Economic Development Administration. Many of the towns and cities in my district have had to contend with industries that have either folded or left the area, due in part to massive amounts of imported goods. And, while I have made every effort to stem this seemingly endless flow of imports, the municipalities left reeling by economic dislocation have needed and will continue to need Federal assistance.

The localities who have been hit hard by unfair foreign competition and other economic difficulties are more than willing to work hard and lift themselves up by their bootstraps; first, however, they need to have bootstraps with which to lift themselves. Over the years, Federal economic development programs have helped provide some semblance of stability as local economies seek ways of creating job opportunities and fostering business growth.

Mr. Chairman, I believe that the bill before us makes an effective program even more effective. By limiting funding to those areas in real distress, we will be getting more development for the taxpayers dollar which is absolutely necessary for the continued success of the program. In hearing comments from the officials of the Southeastern Regional Planning and Economic Development District, who have developed and administered economic development plans with the highest level of ingenuity and competency, I recognize the strengthening and sharpening of this program by H.R. 6100. At the same time, I recognize that there is still a great need for the development assistance provided in the bill.

Mr. Chairman, I urge the adoption of this bill to spur the revitalization of the distressed areas of our Nation. ●

● Mr. ROGERS. Mr. Chairman, in the early 1960's, one of the most serious problems in the Appalachian region was the lack of adequate health care.

Evidence of the problem was widespread. Throughout the Nation, there were 50 percent more doctors per

100,000 people than in Appalachia. Death from infectious diseases was one-third higher than the national average. Tuberculosis death rates were 40 percent higher, and infant mortality rates were twice the national average in many counties. Outside cities, health care facilities were almost nonexistent.

ARC recognized that adequate health care was essential to economic development. The Commission moved in quickly to correct the problems by funding a network of clinics and hospitals, with a goal of putting a primary health care facility, often staffed by a nurse practitioner or physician assistant, within 30 minutes' driving time of every person in the region.

In the vast majority of Appalachian communities, the objective has been met, with commendable results. The Commission's primary health care program has become a model for the national Rural Health Initiative program. ARC funds spent on training and recruitment of health personnel have helped produce a 30-percent increase in the number of physicians alone.

But, at the end of 17 years, some 60 counties in the region remain outside the health care network. ARC aims to complete this network with some of the funds requested in its finish-up program, which we are considering here today. In addition, the Commission will continue its effort to bring more physicians to Appalachia through a special recruiting program that is already underway.

ARC will also commit some of its finish-up money to further reduce infant mortality rates, which already have dropped to near the national level in most counties.

What ARC is asking in this bill is reasonable. The plan for improvement of the region's health care, set out back in 1965 after the first ARC bill was passed, was well thought out. It requires very little more work to bring these few remaining areas up to the standard that has been achieved throughout the region.

The ARC health finish-up plan calls for \$8 million annually for 3 years to be spent primarily on 82 counties identified as eligible for this funding because they have severe need for a primary care program or because they have unusually high infant mortality rates.

Because of this health care need alone, there is merit to this bill. We have here a program that has come very close to achieving what it set out to do, and we know that in 3 years its goals will have been completely realized.

The difference between success and near success may not seem like much in terms of time and dollars, but it means everything to a mother who

cannot get her sick baby to a clinic in time. ARC projects an additional 600,000 people will gain access to those clinics if these funds are approved.

In this one part of the ARC program we have seen how dramatically careful planning and wise spending can affect the well-being of an entire segment of our population. I urge you to join me in supporting completion of this project, which has made such a vital contribution to the tremendous improvement we have seen since 1965 in the standard of living of the Appalachian people.●

● Mr. WAMPLER. Mr. Chairman, I rise in support of H.R. 6100, the National Development Investment Act, which targets those distressed areas of the Nation badly in need of development assistance for the receipt of Federal grants. I was pleased to cosponsor this measure when it was introduced earlier this year.

Many of my concerns at the time of introduction of this bill have been alleviated and I will continue to monitor the implementation of an enacted version with regard to my previous reservations—basically concerning the needs of rural areas.

By placing the responsibility for development largely at the local level, requiring a strategy for the area concerned that includes long-term goals, and by limiting Federal grants, the impetus for continuing economic development with the use of private and public nonprofit financing is reinforced. Conditions set forth in the proposal should result in realistic planning strategies for the grantees. The targeted nature of the bill should also act as a rein on uncontrolled expansion of the program, unlike the former Economic Development Act growth of coverage. This is one area in which it is especially important that the Congress maintain sufficient oversight to assure the purposes of the legislation.

Most importantly, the bill extends the authorization of the Appalachian Regional Commission programs through 1987, and ARC highway funding through 1990. With economic and budgetary realities apparently foreclosing the option of full funding for the work of the ARC, support for the finish-up plan supported by the Governors of the Appalachian States is vital. The structure of the Commission, with localities determining needs and setting priorities in conjunction with State governments, has proven an effective means to accomplish the most good for the Appalachian region. The highway system, providing vital transportation links with the surrounding areas and States, is a necessary part of the long-term economic improvement plan for the Appalachian area.

I urge my colleagues to support this important legislation.●

● Mr. PERKINS. Mr. Chairman, title II of H.R. 6100 before us today provides for the Appalachian Regional Commission finish-up program that was developed by the Governors of the Appalachian States.

I support this measure enthusiastically, and I believe it is absolutely necessary if we are to have continued progress toward economic stability and growth for the Appalachian region.

It would be the height of folly to terminate the work of the Appalachian Regional Commission without the orderly procedure contained in this bill. And it would be wasteful beyond belief to leave programs in which we have invested so much hanging in midair without ever reaching a successful conclusion.

I think we are well past the time of having to defend the effectiveness of the Appalachian regional development program. We all recognize that it has contributed greatly to the welfare of a region that has as great a potential as any in this country.

It was born of the sixties, and certainly has been one of the most successful development programs ever undertaken by the partnership between the Federal Government and the State.

The 1960 Census showed that over half the people of my congressional district in eastern Kentucky lived in poverty as defined by the then generally accepted standards. By 1976, that sad figure had been halved.

Twenty-three years ago, per capita personal income in that district was less than half of the national average. In the decade before 1980, it climbed from 60 to 73 percent of the national average.

In the early sixties, unemployment had been almost three times that of the Nation as a whole. By last year, my district had gained more than 43,000 jobs.

During the sixties, there was a steady drain of population away from eastern Kentucky. That drain has now been reversed, and the 1980 census showed we had a 25 percent gain in population. That is more than twice the national average.

These changes are heartening, and have given new spirit and new hope to the people who live in our mountainous region.

No one would claim that all of these benefits have flowed directly from the Appalachian Regional Commission, but certainly no one would deny that the A.R.C. has made a significant contribution to the progress that has been made since 1960.

There is, I think, a general feeling of confidence in Appalachia—a feeling that we are on our way.

But, as the Appalachian Governors said in their report to the Congress the job is not yet done. Many districts, including my own, still lag behind the

Nation in too many economic indicators. Substantial gains have indeed been made in income levels, but in the Seventh District, approximately a quarter of the population still lives within the legal definition of poverty. A third of our counties have incomes averaging only 50 percent of the national average. Unemployment today is more than one-third higher than the national average. Only 4 of the 27 counties presently in the district have unemployment rates below double digit levels. One county has an unemployment rate of 28.2 percent, and another 25.5 percent. Nine other are above 15 percent. Only four are below the national average of 9.8 percent, and they are just barely below it.

Among the 60 counties in the 13-State Appalachian region identified by the Governors' report as the most distressed and underdeveloped, 10 are in my district. Many of the communities in these 10 counties still lack the most basic public facilities. Poverty and unemployment rates are disproportionately high.

The finish-up program contained in H.R. 6100 would provide special assistance to these counties, which are Bath, Carter, Knott, Lawrence, Lewis, Magoffin, Menifee, Morgan, Powell, and Wolfe. They have a total population of 130,000.

The Governors' report finds four counties in my district, Greenup, Lewis, Montgomery, and Wolfe, as having health manpower shortage areas and which lack a primary health care program for the residents. A special regionwide health program would allow the State to respond to these health problems.

Mr. Chairman, the significant gains we have made must not be allowed to slip away as a result of Federal neglect. I want us to keep the gains and to solidify them; and I want us to move on to new gains in the counties where there is more work to be done.

I congratulate the Governors of the Appalachian States for the work they have done in drafting the finish-up agenda, and I am grateful to the committee for bringing this legislation to the floor today.

H.R. 6100 deserves our strong support, and I urge the Members to vote for it.

Give Appalachian the tools and it will finish the job.●

Mr. OBERSTAR. To conclude general debate, Mr. Chairman, I yield the balance of the time to the gentleman from Pennsylvania (Mr. EDGAR).

Mr. EDGAR. Mr. Chairman, as we wrap up debate on this particular bill, and move toward the amending process and hopefully the successful passage of this bill, let me just say to everyone involved, the gentleman from Minnesota, the gentleman from Pennsylvania, and the others who worked

so hard, I think this is a historic moment. I think it is a time when our committee has recognized that we do have limited Federal dollars to spend, and here in this piece of legislation we have been innovative and creative, we have come up with some new ideas, we have figured out how to target our economic development dollars more carefully, and therefore helped to use those moneys resourcefully in creating jobs.

This particular bill is I think a new model for future legislation. It does what the gentleman from New York (Mr. LUNDINE) suggests. It provides for employee ownership. It does what the gentleman from Minnesota so articulately wanted to provide, and that is targeting of limited dollars to the areas of greatest need. It does what the gentleman from Pennsylvania suggests, and that is to focus in on local economic development strategies. And it does what the gentleman from Puerto Rico has just said, it looks at the private sector in terms of economic development.

I urge all of our colleagues, Democratic and Republican, conservative and liberal, those from the Northeast and the Midwest, those from the South and the West, to come together to pass this bill with a strong bipartisan commitment, and let this bill become law so that we can move back into the arena of economic development providing jobs and economic resources for the local communities.

Mr. Chairman, I rise in strong support of the National Development Investment Act (H.R. 6100). This legislation revises our Nation's economic development program by rewriting the Public Works and Economic Development Act of 1965. In addition, it provides funding for a finish-up program for the Appalachian Regional Commission.

H.R. 6100 incorporates many of the important lessons we have learned about economic development in the past 17 years—particularly about the importance of strong cooperation between State and local government and the private sector in stimulating new investment and generating permanent, unsubsidized jobs in distressed areas.

The main emphasis of the legislation is on the preparation of local economic development strategies. It does away with the project-by-project approach of the current program, calling upon communities to establish development investment strategies that concentrate resources on coordinated economic development efforts. The bill requires a community to analyze its economic problems, inventory available resources and previous economic development investments, and present a long-term timetable for specific future investments. The program's share would be limited to 50 percent of the total cost of carrying out any strategy.

The act also establishes criteria against which all strategies would be evaluated. Priority would be placed on those that have the greatest potential for success—that, for instance, leverage the most capital and produce the private-sector jobs needed for economic growth and increased productivity. No plan would be selected without evidence of substantial private-sector involvement.

Aimed at rebuilding the economic base of our Nation's distressed areas, the new bill also puts added emphasis on infrastructure repair and rehabilitation, instead of new construction, to help overcome decades of public capital neglect. It concentrates its impact on small businesses—which generate two-thirds of the Nation's new jobs—by establishing locally administered revolving loan funds to provide seed capital business startups and expansions. And, it provides assistance to promote employee stock ownership, primarily employee purchases of plants or firms that otherwise would be shutdown.

In a further refinement, the National Development Investment Act sets tighter targeting provisions—scaling back from the 80 percent of the Nation that now qualifies for assistance to only 41 percent. It narrows the distress criteria, requiring eligible communities to have either an unemployment rate 1 percent above the national average for the last 2 years, a per capita income of 80 percent of the national average, or a sudden rise in unemployment due to a major plant or base closing. These stricter eligibility criteria should help channel assistance to those communities most in need of economic stimulation.

In conclusion, the National Development Investment Act is a strategy to reverse economic decline in distressed areas through partnerships between the public and private sectors. In a time of severe fiscal restraint, it uses limited Federal resources to leverage the kind of long-term investment needed to create permanent private-sector jobs and place communities on firmer economic footings. By involving State and local government and businesses more directly, the new bill increases the chances for successful completion of projects. I urge my colleagues to support H.R. 6100, the National Development Investment Act of 1982.

The CHAIRMAN. All time has expired.

Pursuant to the rule, the committee amendment recommended by the Committee on Public Works and Transportation now printed in the reported bill shall be considered by titles as an original bill for the purpose of amendment, and each title shall be considered as having been read.

The Clerk will designate title I. Title I reads as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

TITLE I—NATIONAL DEVELOPMENT INVESTMENT

SEC. 101. The Public Works and Economic Development Act of 1965 is amended to read as follows: "This Act may be cited as the 'National Development Investment Act'".

"TITLE I—DEVELOPMENT INVESTMENT ASSISTANCE

"FINDINGS AND PURPOSES

"SEC. 101. (a) The Congress reaffirms the proposition that this Nation's economic strength is derived from the health of its regions, States, and local communities, both rural and urban, and that national interest dictates the maintenance and enhancement of economic vitality at the subnational level.

"(b) Congress also recognizes that economic conditions and political relationships change and that legislation must address these changes.

"(c) Congress further affirms that this legislation is designed to make government more efficient and responsive by supporting the following principles: leave to private initiative all the functions that citizens can perform privately; use the level of government closest to the community for all public functions it can handle; utilize cooperative intergovernmental agreements where appropriate to attain economical performance and popular approval; reserve national action for residual participation where State and local governments are not fully adequate and for the continuing responsibilities that only the National Government can undertake, such as monitoring the manner in which Federal funds are used in order to ensure the carrying out of the activities for which assistance is given.

"(d) The private sector remains the ultimate generator of employment and economic growth, but the public sector must reverse decades of infrastructure neglect as a necessary concomitant to private business stability and expansion. State and local governments now have a greater capacity than in previous decades to direct their own destiny, in part because of past Federal efforts; this new capacity must be incorporated in any new legislation at the national level. America's increased involvement in international trade has brought both challenges to some industries, and opportunities for others; these challenges and opportunities must be addressed. Capital shortages will for the foreseeable future curtail the Nation's ability to meet public and private investment needs; it is therefore imperative to marshal the resources of all levels of government and the private sector to create the critical mass of capital and other assets needed to generate growth. Finally, there is a continued need to assist in adjustment of change, which is the only permanent feature of our national, regional, and local economies.

"(e) In recognition of these constants and changes, Congress finds it an appropriate role for the Federal Government to foster the coordination of investments between the public and private sectors and to promote long-term economic development partnerships at the State and local levels, in both rural and urban areas.

"(f) The purposes of this Act are therefore—

"(1) to establish a framework within which Federal, State, and local governments, and the private sectors, in urban and

rural areas, can combine their resources to achieve economic development in all parts of the Nation;

"(2) to help create a strong investment climate which promotes the expansion and retention of job opportunities for local residents; and removes economic barriers in local areas which impede the free market forces;

"(3) to build, rehabilitate, and repair public infrastructure where it is inadequate to support and encourage private investment in the area;

"(4) to recognize and rely upon improved State and local governments' capacity to direct their own destinies;

"(5) to link public and private funds to foster coordination of resources between these sectors, in order to leverage the maximum investment in the long-term economic vitality of all areas;

"(6) to facilitate local and regional economic adjustment and economic development diversification in a changing national economy, by assisting State and local efforts to foresee adverse economic changes; to prevent their consequences where possible; to respond as necessary; and to achieve economic self-sufficiency;

"(7) to assist in relieving capital shortages and fill local credit gaps which impede private business startups and expansion;

"(8) to assist communities and industries to respond to the opportunities and challenges of a world increasingly knit together by international trade; and

"(9) to enhance the economic development of Indian reservations, pursuant to the Federal Government's trust responsibilities to Indian tribes.

"ELIGIBLE ACTIVITIES

"SEC. 102. (a) Upon application of a State, economic development district, unit of local government, Indian tribe, or private or public nonprofit organization established for economic development purposes which meets the eligibility criteria hereinafter established by this Act, the Secretary is authorized to make a grant for a portion of the cost, as provided in section 108 of this Act, of projects submitted in a development investment strategy. Development investment assistance may be for the following purposes—

"(1) the construction, repair, rehabilitation and improvement of public facilities, including the acquisition of land and other public works improvements to encourage and support private development;

"(2) revolving loan funds to promote the establishment and growth of small businesses and to retain indigenous firms and entrepreneurs which contribute to the creation, retention, and expansion of private sector jobs;

"(3) to conduct feasibility studies, site preparation, and other technical assistance to prepare for development and to enhance the investment climate; and

"(4) development activities which address and prevent economic dislocation and facilitate economic adjustment including assistance to promote qualified employee ownership organizations and which contribute to economic diversification and long-term economic vitality of the area.

"(b) The Secretary shall provide technical assistance and conduct feasibility studies to assist any person to establish a qualified employee ownership organization for purposes of subsection (a)(4).

"APPLICANTS

"SEC. 103. (a) A State may apply for a grant under this title for an eligible project

within any unit of local government within the State, other than a unit of local government with a population of fifty thousand or more, if such unit meets the requirements of section 105 and is not within the boundaries of an economic development district.

"(b) A unit of local government within a State, other than a unit of local government with a population of fifty thousand or more, which meets the requirements of section 105 and is not within the boundaries of an economic development district may apply for a grant under this title for an eligible project within such unit, but only if such unit consults the State in the preparation of the grant application.

"(c) An economic development district may apply for a grant under this title for an eligible project within any unit of local government within such district if such unit meets the requirements of section 105.

"(d) A unit of local government within an economic development district may apply for a grant under this title for an eligible project within such unit if such unit meets the requirements of section 105, but only if such unit consults the economic development district in the preparation of the grant application.

"(e) An Indian tribe may apply for a grant under this title.

"(f) A unit of local government with a population of fifty thousand or more which meets the requirements of section 105 and is located outside an economic development district may apply for a grant under this title for an eligible project within such unit and a private or public nonprofit development organization representing an area within such unit may apply for a grant under this title for an eligible project within such area, but only if such grant application is approved by such unit before its submission.

"(g) In the case of a unit of local government which has a population of fifty thousand or more, is located outside of an economic development district, and does not meet the requirements of section 105, such unit may, for an area which meets the requirements of section 105 and is within such unit, apply for a grant under this title for an eligible project within the area and a private or public nonprofit development organization representing an area which meets the requirements of section 105 and is within such unit may apply for a grant under this title for an eligible project within such area, but only if such grant application is approved by such unit before its submission.

"APPLICATION FOR GRANT

"SEC. 104. (a) An application for a grant under this title shall include, but need not be limited to—

"(1) a certification that the area for which the grant is to be made meets the distress requirements set forth in section 105;

"(2) a certification relative to the performance of any responsibilities which the Secretary has agreed to accept under section 306 of this Act; and

"(3) a development investment strategy prepared in accordance with section 106.

"(b) In approving applications for grants under this title, the Secretary shall consider the purposes of this Act as set forth in section 101 of this Act, including but not limited to the following:

"(1) the severity of distress in the area for which the grant is to be made;

"(2) the ratio of private sector investments committed in such area to the amount of the grant applied for;

"(3) the extent to which the appropriate State and local governments have undertaken or agree to undertake other related actions to encourage economic development and the expansion of employment opportunities;

"(4) the effectiveness of the development investment strategy and the degree to which the proposed project contributes to its implementation (including the strategy's relationship to economic problems identified in the strategy), expands employment opportunities in the existing labor market, provides incentives to retain indigenous private businesses, expands or improves public facilities, and encourages private investment;

"(5) the extent to which the strategy and activities are consistent with State and local goals and contribute to long-term economic growth and private sector employment opportunities and establish an overall strengthened economic and business environment which will be self-sustaining; and

"(6) the extent to which assistance under section 102(a)(4) will assist a qualified employee ownership organization to obtain majority ownership of a business.

"DISTRESS REQUIREMENTS

"SEC. 105. (a) In order to be eligible for a grant under this title, the applicant must certify that any activity or project to be funded under such grant will be carried out or located in an area which meets any one of the following criteria:

"(1) the area has a per capita income of 80 per centum or less of the national average;

"(2) the area has an unemployment rate one per centum above the national average percentage for the most recent twenty-four-month period for which statistics are available; or

"(3) the area has experienced or is about to experience a sudden economic dislocation resulting in job loss that is significant both in terms of the number of jobs eliminated and the effect upon the employment rate of the area.

"(b) Documentation of distress shall be supported by Federal data, when available, and in other cases by data available through the State government. Such documentation shall be accepted by the Secretary unless it is determined to be inaccurate. The most recent statistics available must be used.

"DEVELOPMENT INVESTMENT STRATEGY

"SEC. 106. (a) Except as provided in subsection (b) of this section, an applicant for a grant under this title shall prepare a development investment strategy for the area for which the grant is sought which—

"(1) identifies the economic development problems sought to be addressed by the grant;

"(2) identifies past, present, and projected future economic development investments in such area and public and private participants and sources of funding for such investments;

"(3) identifies the extent to which the development investment strategy takes into account—

"(A) availability of developable land and space in the area;

"(B) public works, public service, and development facilities in the area;

"(C) availability of low-cost capital;

"(D) tax policy on investments in the area;

"(E) level of skill of the labor force; and

"(F) ability of State and units of local government to provide financial assistance in the management and implementation of the strategy;

"(4) sets forth a strategy for addressing the economic problems identified in paragraph (1) and discusses the manner in which the strategy will solve such problems;

"(5) provides a general discussion of the projects necessary to implement the strategy, an estimate and analysis of the costs and anticipated benefits of implementing the strategy, and an estimate of the timetables for completion of such projects; and

"(6) provides a summary of public and private resources which are expected to be available for such projects.

"(b) In any case in which a unit of local government is the eligible applicant under subsection (b) or (d) of section 103, the unit of local government shall consult the State or economic development district, respectively, in the preparation of a development investment strategy. In any case in which a private or public nonprofit development organization within a unit of local government is the eligible applicant under subsection (g) of section 103, the unit of local government shall approve the organization's development investment strategy.

"PRIVATE SECTOR INCENTIVES

"SEC. 107. (a) To stimulate small business development and to promote internal economic growth which contributes to an improved local tax base and the creation of permanent employment opportunities, the Secretary is authorized to make grants to an applicant and to a State to establish a revolving loan fund to be used for making loans or guaranteeing loans to small businesses for initial or working capital, or the purchase, rehabilitation or expansion of facilities or equipment. In addition, loans or guarantees may be made to businesses where a relatively small amount of capital is needed to complete financing necessary to retain the business in the area. A grant made to a State under this section shall be made on the condition that the revolving loan fund established by such State shall be available only in areas in such State which meet the requirements of section 105 of this Act.

"(b) No grant for the establishment or recapitalization of a revolving loan fund shall be made for more than \$1,000,000.

"(c) No loan or guarantee shall be made from a revolving loan fund which has received a grant under this title unless the financial assistance applied for is not otherwise available from private lenders on terms which in the opinion of the administrator of the revolving loan fund will permit the accomplishment of the project.

"(d) Any applicant for a grant for a revolving loan fund shall give assurances that amounts of any loan which are repaid to the revolving loan fund will be available only for the purposes set forth in subsection (a).

"(e) No loan or guarantee may be made from a revolving loan fund which has received a grant under this title unless the applicant for such loan or guarantee provides reasonable assurance of repayment of the loan.

"(f) The Secretary may make additional grants for a portion of the cost, as provided in section 108(b) of this Act, of recapitalization of a revolving loan fund, taking into consideration the past performance of such fund.

"(g) The grantee of any grant for a revolving loan fund shall administer the fund.

"FEDERAL SHARE

"SEC. 108. (a) The amount of any grant for a project for any eligible activity described in paragraph (1) of section 102 shall be that

amount which when added to amounts available from all other sources is sufficient to complete such project, except that in no event shall the amount of any grant under this title exceed 50 per centum of such cost of completing the project as determined at the time of the grant application. No additional funds shall be granted or otherwise made available under this Act for any such project for which a grant has been made under this Act.

"(b) The amount of any grant for the establishment of a revolving loan fund under paragraph (2) of section 102 shall not exceed an amount which is equal to the amount of funds available from all other sources for the establishment of such revolving loan fund. The amount of any additional grant for the recapitalization of a revolving loan fund previously established with a grant under this Act shall not exceed an amount which is equal to one-third of the amount of funds available from all other sources for such recapitalization.

"(c) In the case of a grant to an Indian tribe, the Secretary may reduce or waive the non-Federal share.

"LIMITATIONS

"SEC. 109. (a) Except for expenditures to Indian tribes, not more than 15 per centum of the appropriations made pursuant to this title may be expended in any one State.

"(b) The Secretary shall not obligate more than \$2,000,000 in any fiscal year to any person (including any State or local government or public organization) for grants under this title, other than grants which promote qualified employee ownership organizations.

"OBLIGATION OF FUNDS

"SEC. 110. (a) Not later than May 31 of each fiscal year, the Secretary shall obligate for grants under this title not less than 50 per centum and not more than 60 per centum of the funds appropriated for such fiscal year pursuant to this title.

"(b) Not later than September 30 of each fiscal year, the Secretary shall obligate for grants under this title the remaining funds appropriated for such fiscal year pursuant to this title.

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 111. There is authorized to be appropriated to carry out this title, to be available until expended, \$425,000,000 per fiscal year for each of the fiscal years ending September 30, 1983, September 30, 1984, and September 30, 1985. Not more than 25 per centum of the amount appropriated under this section for any fiscal year shall be expended to carry out section 107 of this title.

"TITLE II—INVESTMENT STRATEGY, PLANNING, EVALUATION, AND DEMONSTRATION

"INVESTMENT STRATEGY AND PLANNING

"SEC. 201. (a)(1) The Secretary is authorized to make grants for economic development planning, including the preparation of development investment strategies under section 106 of this Act and the payment of administrative expenses, to States, economic development districts, Indian tribes, counties which meet the distress requirements of section 105 of this Act and which are located outside of economic development districts, and those other units of local government having populations of fifty thousand or more which meet such distress requirements and which are located outside of economic development districts. Such planning shall be a part of a comprehensive planning process and shall be a continuous

process involving public officials and private citizens in analyzing local economies, defining development goals, determining project opportunities, and formulating and implementing a development program. The Secretary is authorized to make grants for preparation of a development investment strategy under section 106 of this Act to any unit of local government having a population of 100,000 or more which meets the distress requirements of section 105 of this Act on condition that such unit consult with any economic development district of which it is a part in the preparation of such development investment strategy.

"(2) Any State economic development plan prepared with assistance under this section shall be prepared by the State with the active participation of units of local government and economic development districts located in whole or in part within such State and shall set goals for economic development within such State. Each State receiving assistance under this subsection shall submit to the Secretary an annual report on the planning process assisted under this section.

"(3) Any economic development planning by an economic development district or a unit of local government for which a grant is made under this section shall be consistent with the State economic development plan for the State in which such district or unit is located.

"(b) Grants under this section shall be used, to the maximum extent possible, to provide logical coordination of investment for community facilities, economic development, manpower training, and transportation services.

"(c) Any applicant for assistance under this section is encouraged to provide project planning, financial analysis, marketing, management, feasibility studies, and other technical and financial assistance to communities and neighborhoods within its boundaries.

"EVALUATION AND DEMONSTRATION

"SEC. 202. (a) The Secretary is authorized to conduct a program of evaluation of Federal, State, and local development investment efforts in order to—

"(1) assist in determining the causes of unemployment, underemployment, severe economic adjustment problems, and chronic distress in areas and regions of the United States;

"(2) assist in formulating, implementing, or improving programs at the National, State, or local levels which are designed to increase employment in private firms, assist depressed industry sectors, or otherwise promote economic development or adjustment.

"(b) The Secretary is authorized to conduct any demonstration program to test the feasibility of new ways to increase productivity and growth and the understanding of regional and local economies, to foster innovative technology and research in the field of economic development, to match the labor force with projected labor markets, to improve United States competitiveness, or to encourage economic diversity and regional balance.

"(c) Programs authorized under subsections (a) and (b) of this section may be carried out by the Secretary acting through the staff of the Department, in cooperation with or by the provision of funding to other departments or agencies of the Federal Government, or by contract.

"FEDERAL SHARE"

"SEC. 203. The amount of any grant under section 201 shall not exceed 75 per centum of the cost of economic development planning or for the preparation of a development investment strategy. In determining the amount of the non-Federal share of costs under this section, the Secretary shall give due consideration to all contributions both in cash and in kind, fairly evaluated, including but not limited to space, equipment, and services. In the case of a grant to an Indian tribe under section 201, the Secretary may reduce or waive the non-Federal share.

"OBLIGATION OF FUNDS"

"SEC. 204. Not later than December 31 of each fiscal year, the Secretary shall obligate for grants under section 201, 90 per centum of the funds appropriated for such fiscal year pursuant to this title (other than those funds available for purposes of section 202). The remainder of such funds shall be obligated during such fiscal year only for making grants under section 201 in areas meeting the criteria set forth in section 105(a)(3) of this Act.

"AUTHORIZATION OF APPROPRIATIONS"

"SEC. 205. (a) There is authorized to be appropriated to carry out this title, to be available until expended, \$75,000,000 per fiscal year for each of the fiscal years ending September 30, 1983, September 30, 1984, September 30, 1985.

"(b) Of sums authorized to be appropriated under subsection (a) of this section, not to exceed \$15,000,000 in each of the fiscal years ending September 30, 1983, September 30, 1984, and September 30, 1985, shall be available for the purposes of section 202.

"TITLE III—ADMINISTRATION"**"DEFINITIONS"**

"SEC. 301. For purposes of this Act—

"(1) the term 'economic development district' means—

"(A) an economic development district designated on or before January 1, 1982, under section 403(a)(1) of the Public Works and Economic Development Act of 1965; and

"(B) any district within a State which is designated by the Secretary, which district is of sufficient size or population and contains sufficient resources to foster economic development on a scale involving more than one county and does not contain within its boundaries any part of another economic development district designated under subparagraph (A) or under this subparagraph;

"(2) the term 'qualified employee ownership organizations' include—

"(A) a qualified employee trust as defined in section 3(c)(2) of the Small Business Act, except that—

"(i) such term shall not be limited to plans maintained by small business concerns or to loans guaranteed under such Act;

"(ii) in the case of any form of financial assistance, the principles of section 3(c)(2)(B) of such Act shall apply under regulations prescribed by the Secretary; and

"(iii) there shall be periodic reviews of the role, in the management of the concern involved, of employees to whose account stock is allocated; and

"(B) any business organized on a cooperative basis;

"(3) the term 'Indian tribe' means the governing body of a tribe, an Indian authority or tribal organization or entity, an Alaskan Native village, or any Indian group which is recognized as an Indian tribe by the Secretary of the Interior;

"(4) the term 'unit of local government' means any city, county, town, parish, vil-

lage, or other general purpose political subdivision of a State;

"(5) the term 'small business' means a business that is independently owned and operated, is not dominant in its field of operations, and meets such other criteria as the Secretary, after consultation with the Administrator of the Small Business Administration, may by regulation establish, including but not limited to, numbers of employees and dollar volume of business by industrial classes;

"(6) the term 'Secretary' means the Secretary of Commerce; and

"(7) the term 'State' means the several States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, the Trust Territory of the Pacific Islands, and the Commonwealth of the Northern Marianas.

"APPOINTMENT OF ASSISTANT SECRETARY"

"SEC. 302. The Secretary shall administer this Act with the assistance of an Assistant Secretary of Commerce, created by section 601 of the Public Works and Economic Development Act of 1965. Such Assistant Secretary shall perform such functions as the Secretary may prescribe.

"CONSULTATION WITH OTHER PERSONS AND AGENCIES"

"SEC. 303. (a) The Secretary is authorized from time to time to call together and confer with any persons, including representatives of labor, management, agriculture, and government, who can assist in meeting the problems of area and regional unemployment or underemployment.

"(b) The Secretary may make provisions for such consultation with interested departments and agencies as he may deem appropriate in the performance of the functions vested in him by this Act.

"ADMINISTRATION OF ASSISTANCE"

"SEC. 304. No grant shall be approved under this Act unless the Secretary is satisfied that the project for which Federal assistance is granted will be properly and efficiently administered, operated, and maintained.

"POWERS OF THE SECRETARY"

"SEC. 305. In performing his duties under this Act, the Secretary is authorized to—

"(1) adopt, alter, and use a seal, which shall be judicially noticed;

"(2) hold such hearings, sit and act at such times and places, and take such testimony, as he may deem advisable;

"(3) request directly from any executive department, bureau, agency, board, commission, office, independent establishment, or instrumentality information, suggestions, estimates, and statistics needed to carry out the purposes of this Act; and each department, bureau, agency, board, commission, office, establishment or instrumentality is authorized to furnish such information, suggestions, estimates, and statistics directly to the Secretary;

"(4) acquire, in any lawful manner, any property (real, personal, or mixed, tangible or intangible), whenever deemed necessary or appropriate to the conduct of the activities authorized by this Act;

"(5) procure by contract the temporary or intermittent services of experts and consultants or organizations therefor as authorized by section 3109(b) of title 5, United States Code, compensate individuals so employed at rates not in excess of \$100 per diem, including travel time, and allow them, while away from their homes or regular places of business, travel expenses (including per

diem in lieu of subsistence) in accordance with section 5703 of title 5, United States Code, for persons in the Government service employed intermittently, while so employed;

"(6) sue and be sued in any court of record of a State having general jurisdiction or in any United States district court, and jurisdiction is conferred upon such district court to determine such controversies without regard to the amount in controversy; but no attachment, injunction, garnishment, or other similar process, mesne, or final, shall be issued against the Secretary or his property. Nothing herein shall be construed to except the activities under this Act from the application of sections 517, 547, and 2679 of title 28, United States Code; and

"(7) establish such rules, regulations, and procedures as he may deem appropriate in carrying out the provisions of this Act.

"CERTIFICATION"

"SEC. 306. (a) The Secretary may discharge any of his responsibilities relative to a project for which a grant may be made under title I of this Act by accepting a certification by the applicant of the applicant's performance of such responsibilities. The Secretary shall promulgate such guidelines and regulations as may be necessary to carry out this section.

"(b) Acceptance by the Secretary of an applicant's certification under this section may be rescinded by the Secretary at any time if, in his opinion, it is necessary to do so.

"SAVINGS PROVISIONS"

"SEC. 307. (a) No suit, action, or other proceedings lawfully commenced by or against the Secretary or Assistant Secretary or any other officer in his official capacity or in relation to the discharge of his official duties under the Public Works and Economic Development Act of 1965, shall abate by reason of the taking effect of the provisions of this Act, but the court may, on motion or supplemental petition filed at any time within twelve months after such taking effect, showing a necessity for the survival of such suit, action, or other proceeding to obtain a settlement of the questions involved, allow the same to be maintained by or against the Secretary or Assistant Secretary or such other officer of the Department of Commerce as may be appropriate.

"(b) Except as may be otherwise expressly provided in this Act, all powers and authorities conferred by this Act shall be cumulative and additional to and not in derogation of any powers and authorities otherwise existing. All rules, regulations, orders, authorizations, delegations, or other actions duly issued, made, or taken by or pursuant to applicable law, prior to the effective date of this Act, by any agency, officer, or office pertaining to any functions, powers, and duties under the Public Works and Economic Development Act of 1965 shall continue in full force and effect after the effective date of this Act until modified or rescinded by the Secretary or such other officer of the Department of Commerce as, in accordance with applicable law, may be appropriate.

"ANNUAL REPORT"

"SEC. 308. The Secretary shall make a comprehensive and detailed annual report to the Congress of his operations under this Act for each fiscal year beginning with the fiscal year ending September 30, 1983. Such report shall be printed and shall be transmitted to the Congress not later than February 1 of the year following the fiscal year with respect to which such report is made.

"PREVAILING RATE OF WAGE"

"SEC. 309. All laborers and mechanics employed by contractors or subcontractors on projects assisted by the Secretary under this Act shall be paid wages at rates not less than those prevailing on similar construction in the locality as determined by the Secretary of Labor in accordance with the Davis-Bacon Act, as amended (40 U.S.C. 276a-276a-5). The Secretary shall not extend any financial assistance under this Act for such project without first obtaining adequate assurance that these labor standards will be maintained upon the construction work. The Secretary of Labor shall have, with respect to the labor standards specified in this provision, the authority and functions set forth in Reorganization Plan Numbered 14 of 1950 (15 F.R. 3176; 64 Stat. 1267; 5 U.S.C. 1332-15), and section 2 of the Act of June 13, 1964, as amended (40 U.S.C. 276c).

"RECORD OF APPLICATIONS"

"SEC. 310. The Secretary shall maintain as a permanent part of the records of the Department of Commerce a list of applications approved for a grant under this Act, which shall be kept available for public inspection during the regular business hours of the Department of Commerce. The following information shall be posted in such list as soon as each application is approved: (1) the name of the applicant, (2) the amount and duration of the grant for which application is made, and (3) the purposes for which the proceeds of the grant are to be used.

"RECORDS AND AUDIT"

"SEC. 311. (a)(1) Each recipient of a grant under this Act shall keep such records as the Secretary shall prescribe, including records which (A) fully disclose the amount and the disposition by such recipient of the proceeds of such grant, the total cost of the project or undertaking in connection with which such grant is given or used, and the amount and nature of that portion of the cost of the project or undertaking supplied by other sources, and (B) review the efficiency, economy, and effectiveness of the project carried out under this Act.

"(2) Not later than ten days after January 1, and July 1 of each year, each recipient shall transmit a report to the Secretary containing all information prescribed under paragraph (1) which relates to all activities carried out during the preceding period relating to grants made to it under this Act. Each report submitted in January of each year shall include an audited statement of all funds spent on the project or undertaking during the preceding fiscal year prepared by an independent certified public accountant in accordance with the Standards for Audit of Governmental Organizations, Programs, Activities, and Functions issued by the Comptroller General of the United States.

"(b) For the purpose of reviewing the efficiency, economy, and effectiveness of programs carried out under the provisions of the Act, including audit and examination, the Secretary and the Comptroller General of the United States, or any of their duly authorized representatives, shall have access to any books, documents, papers, and records of any recipient, subrecipient, contractor, or subcontractor that are pertinent to assistance received under this Act.

"AUTHORIZATION OF APPROPRIATIONS"

"SEC. 312. There is hereby authorized to be appropriated for salaries and administrative expenses to carry out the provisions of this Act \$30,000,000 for the fiscal year ending September 30, 1983, \$35,000,000 for

the fiscal year ending September 30, 1984, and \$40,000,000 for the fiscal year ending September 30, 1985. Appropriations authorized under this Act shall remain available until expended unless otherwise provided by appropriations Acts. Any contract entered into pursuant to this Act shall be effective only to such extent and in such amounts as may be provided in advance in an appropriation Act."

The CHAIRMAN. Are there amendments to title I?

Mr. OBERSTAR. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I yield to the gentleman from Massachusetts (Mr. DONNELLY), a member of the subcommittee, who has contributed considerably in time and effort and ideas to the formulation of this legislation.

Mr. DONNELLY. Mr. Chairman, I wish there was substantial time so I could join the chorus of praise for the leadership of the gentleman from Minnesota and my friend from Pennsylvania.

Mr. Chairman, this is a good bill. The committee has worked very diligently and put a lot of effort into the restructuring of this agency. Let me just simply say I hope the legislation passes.

The CHAIRMAN. Are there amendments to title I?

AMENDMENT OFFERED BY MR. HAGEDORN

Mr. HAGEDORN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. HAGEDORN:

Page 28, line 16, strike out "All" and insert in lieu thereof "(a) Except as provided in subsection (b), all"

Page 29, after line 5, insert the following:

(b) If, on any portion of a project assisted by the Secretary under this Act, the lowest bid on construction work, not based on paying wages in accordance with the Davis-Bacon Act, as amended (40 U.S.C. 276a-276a-5), is at least 10 percent less than the lowest bid based on paying wages for such work in accordance with such Act, and the bid of the contractor or subcontractor whose bid, not based on paying wages in accordance with such Act, is accepted, subsection (a) of this section shall not apply to such construction work.

Mr. HAGEDORN (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

Mr. HAGEDORN. Mr. Chairman, the elimination of excessive Federal spending is something that most Members of Congress like to talk about when we are back in our districts. An amendment I am offering today to the National Development Investment Act gives Congress the means to put those words into action.

Budget cuts have made it incumbent upon us to make the most out of each

Federal dollar spent. We need to make sure that each dollar we devote to economic development is used wisely to combat poverty and to create new jobs rather than to pay excessive wage rates mandated by the half century old Davis-Bacon Act.

I have said in this Chamber many times before that Davis-Bacon adds significantly to the cost of Federal construction projects.

Conservative estimates show that the Davis-Bacon costs your taxpaying constituents at least \$1 billion each year in unnecessary construction and administrative costs. That billion dollar figure is twice the total yearly authorization that the gentleman from Minnesota (Mr. OSBERSTAR) and the gentleman from Pennsylvania (Mr. CLINGER) are seeking for EDA and H.R. 6100.

I believe that the time has come to take a fresh look at the Davis-Bacon issue from a cost versus savings standpoint and from a point of view rather than from a labor versus business perspective.

Both advocates and opponents of the Davis-Bacon Act can support this amendment because it will provide each side with the opportunity to prove the point once and for all. The way this amendment would work is simple.

EDA projects would be open to both Davis-Bacon and non-Davis-Bacon bids. If the lowest non-Davis-Bacon bid comes in at 10 percent or more below the cost of Davis-Bacon bids, the prevailing wage provided in that act will be waived. If the non-Davis-Bacon bid is lower but not a full 10-percent lower, then the contract will be awarded to the lowest Davis-Bacon bidder.

I urge that each Member support this amendment. If supporters of the Davis-Bacon Act are right and it does not add at least 10 percent to the cost of Federal construction on EDA projects nothing will change. If, on the other hand, millions of dollars can be saved for the taxpayers, we owe it to the American people to prevent the continued foolish waste of their tax dollars.

I believe we need to find out if these savings can actually be realized.

I do not need to remind anyone here that we are living in difficult economic times that require fiscal restraint and some tough political votes. Passage of my amendment would be just one small way of demonstrating that Congress is serious about bringing spending under control.

My amendment is procompetition. It eliminates the anti-small-business aspect of the Davis-Bacon Act, and it is protaxpayer. We simply cannot afford to miss another opportunity for significant savings.

So let us put our money where our mouths have been and vote to save the American taxpayers this continued excess expenditure of their tax dollars.

Mr. HAMMERSCHMIDT. Mr. Chairman, will the gentleman yield?

Mr. HAGEDORN. I yield to the gentleman from Arkansas.

Mr. HAMMERSCHMIDT. Mr. Chairman, during our hearings to consider H.R. 6100 and other legislative proposals under the jurisdiction of the Economic Development Subcommittee we received testimony on the impact of Davis-Bacon legislation on the cost of Federal construction projects and its effects on local contractors.

At that time, we heard testimony from the U.S. Chamber of Commerce, the American Farm Bureau, the National Federation of Independent Business, the Associated Builders and Contractors and the Associated General Contractors. Every witness spoke of the overwhelming extra expense tacked onto Federal construction costs as a result of Davis-Bacon legislation. Estimates ran as high as \$2 billion per year. But to take the most conservative estimate—that proposed by a group of House Democrats, the Conservative Democratic Forum—an estimated outlay savings of \$560 million would have occurred in fiscal year 1982 from the repeal of Davis-Bacon. To put this figure in perspective, the Federal Government could recoup the entire authorization for H.R. 6100 and more by repealing Davis-Bacon.

The American Farm Bureau testified that a scientific study conducted by Oregon State University reached two highly significant conclusions: First, in a study of 215 projects in 100 counties, costs were from 26 percent to 38 percent higher on federally funded projects as compared to similar buildings built in the same counties during the same 2 years by the private sector. Second, local contractors were used on 47 percent of the private—non-Davis-Bacon—projects; but only on 28 percent of the federally aided projects. Contractors on the Davis-Bacon projects more often came from adjacent counties or even further away, and were more likely to come from an urban center. The unavoidable conclusion from this data is that Davis-Bacon does increase the construction cost of federally funded projects and is actually working to the detriment of those whom it was designed to protect—the local contractors. I believe the only total solution to the problems created by Davis-Bacon is its repeal. However, one modification has been proposed by my colleague Mr. HAGEDORN, which would go a long way toward ameliorating the negative effects of this provision in H.R. 6100. Basically, this amendment would waive the Davis-Bacon requirement only when at least a 10-percent savings of tax dollars would result. It would

call for this exemption when the winning bid on an EDA project comes in at least 10 percent lower than the next lowest bid. Of course, if the full 10 percent cannot be saved the Davis-Bacon requirements remain in effect.

I appreciate this opportunity to bring into focus the severe impact of Davis-Bacon legislation on EDA, and urge adoption of the Hagedorn amendment.

Mr. HAGEDORN. Mr. Chairman, I thank the gentleman for his contribution.

The American Farm Bureau did testify before our subcommittee. They have conducted a study, utilizing the facilities of the Oregon State University and they found that in a study of about 250 projects, both Davis-Bacon and non-Davis-Bacon that the cost savings would range in the area of 26 to 38 percent to the American taxpayer if we were to repeal Davis-Bacon.

I am not suggesting we repeal it. I am giving them a full 10-percent advantage.

And I must think in these times we can muster the courage to vote in the interest of the American taxpayer in this area, and use it as an example of what can be done by changing this archaic law.

Mr. WEBER of Minnesota. Mr. Chairman, will the gentleman yield?

Mr. HAGEDORN. I yield to the gentleman from Minnesota.

Mr. WEBER of Minnesota. I thank the gentleman for yielding.

I would like to rise in support of the amendment that my colleague from Minnesota is offering.

In addition to the savings argument, I would like to point out one additional argument on this whole Davis-Bacon area.

Often, as the gentleman pointed out in his opening statement, this is portrayed as a business versus labor issue. I do not think that is accurate, either. I agree with the gentleman it should be considered as a cost versus savings issue. But furthermore, in a district like mine that consists of 31 rural counties in southwestern Minnesota, there are many small contractors in small towns who are in effect prohibited from being competitive on many of these projects.

In these cases we find that the Davis-Bacon Act actually has an anti-labor and antibusiness discriminatory effect when it comes to small towns. Is that not the general effect of the act?

Mr. HAGEDORN. That is a very important observation. Originally the reverse was intended.

The CHAIRMAN. The time of the gentleman from Minnesota (Mr. HAGEDORN) has expired.

(At the request of Mr. WEBER of Minnesota and by unanimous consent, Mr. HAGEDORN was allowed to proceed for 2 additional minutes.)

Mr. HAGEDORN. What has been occurring, of course, is originally it was meant to keep migrant workers from moving into the industrial areas and taking away jobs from the big cities. In this day and age we find just the opposite, where the people from the larger communities are moving in taking over the public construction jobs in our small rural areas, because of the fact that small contractors cannot meet the prevailing wage standards as interpreted by the Department of Labor which have a strong union bias, and therefore they just operate out of the bidding process.

This is very discriminatory against small business. And we hear a lot in this Chamber again, rhetoric about helping small business.

Well, this is an opportunity once again to put one's voting card in the slot and vote.

Mr. WEBER of Minnesota. If the gentleman will yield further, can we say in addition to its other benefits this amendment would be pro-rural development in a very real sense of the word and encourage job formation in our rural areas.

Mr. HAGEDORN. Most importantly. If all the good things come out of EDA, as the chairman and the ranking member and many of us have heard that allegedly do, then we need more infrastructure, we need new facilities to build and to provide job opportunities and job expansion.

And we ought to leverage our money to the maximum extent and not blow it with the highest-cost proposals that we can push through this Congress. This is a competitive procompetition piece of legislation, an amendment that I believe deserves and warrants support.

Mr. WEBER of Minnesota. I thank the gentleman.

□ 1740

Mr. CLAUSEN. Mr. Chairman, will the gentleman yield.

Mr. HAGEDORN. Yes. I will be happy to yield to the distinguished ranking member.

Mr. CLAUSEN. Well, this matter has been a subject of discussion in the Public Works and Transportation Committee, where the gentleman has previously addressed the subject of Davis-Bacon.

I would like to ask two or three questions.

First of all, does this directly or indirectly repeal the Davis-Bacon Act?

Mr. HAGEDORN. No, sir. I say to the gentleman from California (Mr. CLAUSEN), this absolutely does not repeal Davis-Bacon. It would merely waive it in this one small area of Federal construction loans and grants.

Mr. CLAUSEN. Well, does it in any way tamper with the way in which the

Davis-Bacon Act is being administered?

Mr. HAGEDORN. It does not in any way tamper, other than it would waive it if there is a 10-percent differential between the lowest Davis-Bacon contractor versus the non-Davis-Bacon contractor.

Mr. CLAUSEN. Finally, does it in any way exempt any of the agencies from the application of the Davis-Bacon regulations?

The CHAIRMAN. The time of the gentleman from Minnesota has expired.

(By unanimous consent, Mr. HAGEDORN was allowed to proceed for 2 additional minutes.)

Mr. HAGEDORN. Not in any way, other than in this instance: if there are 10 percent or less differences. It does not waive Davis-Bacon, and it only applies to the EDA administration. There is no other single area of the Federal Government involved with this amendment today.

Mr. CLAUSEN. So the triggering device is, in effect, the 10-percent figure, where there would be, in effect, a 10-percent advantage given to a Davis-Bacon contractor; is that correct?

Mr. HAGEDORN. That is exactly right. I am so confident that this will work that I am willing to give the Davis-Bacon contractor a 10-percent advantage and if we cannot get a competitive bid of more than 10 percent submitted on one of these projects that we allow them to go under existing law.

Mr. WEBER of Minnesota. Mr. Chairman, will the gentleman yield?

Mr. HAGEDORN. Yes; I will be happy to yield to the gentleman.

Mr. WEBER of Minnesota. So if I understand correctly then, this amendment is guaranteed either to save money or to have no effect at all. In other words, if it does not save us dollars for sure, it would not even go into effect; is that correct?

Mr. HAGEDORN. That is exactly correct. If we cannot save 10 percent for the American taxpayers, we will continue to pay the highest bids that are submitted.

Mr. WEBER of Minnesota. So Members voting in favor of this amendment can be assured that it will save them money or have no effect whatsoever?

Mr. HAGEDORN. Absolutely.

Mr. WEBER of Minnesota. I thank the gentleman for yielding.

Mr. PEYSER. Mr. Chairman, I move to strike the requisite number of words. I rise in opposition to the amendment.

Mr. Chairman, I listened with great interest to the amendment of my friend here dealing with Davis-Bacon. It has been very interesting over the years that I have been in the Congress to see repeated attempts of a variety

of sorts—and I must admit this is a little different variety than we have had before—to really start getting at Davis-Bacon and defeating it.

While someone says this really does not impact Davis-Bacon, it really does impact Davis-Bacon.

It is also interesting to note that over the last 20 years every President of the United States has supported Davis-Bacon, including the present President in the White House. The only difference is that the President in the White House today, through his Department of Labor, just a month and a half ago issued a set of regulations that were supposed to go into effect on the 27th of July that would be very similar to what the gentleman has stated in his amendment, that they are not trying to hurt or kill Davis-Bacon, but they just want to make a few changes.

Those few changes that the Department of Labor put in, with the approval of the administration, would absolutely wipe out Davis-Bacon and leave a nice framework there. However, the courts, when the case was taken to court by members of the building trades, have issued a temporary injunction against the Labor Department because the changes, frankly, are so flagrant and this will hopefully result in a permanent injunction against the change in regulations.

Now, I would also like to call to the attention of the Members of the House that I received, as I am sure many of you did, a card from the National Federation of Independent Business. This is supposed to be small businesses' representative in Washington. This is the same organization that rated every Democratic Member of Congress this year and any other Member who voted against the Gramm-Latta budget and the tax bill last year. In the ratings, as you know, that each organization puts out, we received a zero if we voted against Gramm-Latta and against the tax program. That was the rating.

This organization, in my opinion, really does not represent small business at all, or it never would have taken the steps that led small business into the desperate situation they are in today.

They come out in very strong support of the amendment of the gentleman from Minnesota (Mr. HAGEDORN). That by itself, I think, is a clear reason not to support the amendment because of the actions of this organization; but I think in truth we have to look at one thing: Davis-Bacon has served and is serving this country well. The attempts to chisel away at it and to make little bites here and there are really, I believe, something that is like spring coming every year, someone tries to do this. Fortunately, the Congress has had the courage not to fall prey to this type of action.

Therefore, I would say at this time, one, do not fall into the trap of saying, well, this really does not do anything and it is just going to save 10 percent. I do not think this has anything to do with material costs. Basically, the gentleman is talking about labor costs.

Mr. HAGEDORN. Mr. Chairman, will the gentleman yield?

Mr. PEYSER. I yield to the gentleman.

Mr. HAGEDORN. The total contract.

I am amazed. We have all heard all the accolades about cleaning up the great piece of legislation that existed and how many improvements we are making today, and yet the gentleman from New York will stand in the well and suggest that a law that has been on the books for 50 years is perfect and should never be examined. I think the gentleman is out of touch with the times as much as the legislation is.

Mr. PEYSER. Well, I would like to take back my time and simply say to the gentleman that this legislation, Davis-Bacon, has been examined every year that I have been in the Congress. Every year somebody has a new method of improving, which really is a method of destroying Davis-Bacon.

Now, I understand the gentleman does not approve of Davis-Bacon and the gentleman feels, I am sure, because I can recall a few years back if the gentleman had his option to eliminate Davis-Bacon, the gentleman would vote for that, but that is not what is coming up today. What is coming up is a little chiseling effect of it and which will have a very detrimental effect on the whole program.

The CHAIRMAN. The time of the gentleman from New York has expired.

(At the request of Mr. HAGEDORN, and by unanimous consent, Mr. PEYSER was allowed to proceed for 1 additional minute.)

Mr. HAGEDORN. Mr. Chairman, will the gentleman yield?

Mr. PEYSER. I will be glad to yield to the gentleman.

Mr. HAGEDORN. In regard to chiseling away at Davis-Bacon, saving the American taxpayers 10 percent, I think the American voters would wish there were a few more chiselers in the Congress that would chisel away at these types of laws that appear to be carved in stone, never to be looked at, never to be amended.

We have had GAO studies. I do not know who the gentleman's favorite economist is today. I am sure it is not Milton Freedman; maybe Walter Heller.

Mr. PEYSER. I assure the gentleman, it was not Mr. Laffer.

Mr. HAGEDORN. The gentleman can name the economist and most likely we can find where the economist has called for the repeal of Davis-

Bacon, not just reform; so clearly the gentleman is in the minority on that issue.

Mr. PEYSER. I think that I will be in the majority on this vote, though, which will reject this amendment.

I hope that everyone recognizes this for what it really is, an effort to defeat Davis-Bacon. That is the way it will be viewed and that is the way it actually is.

Mrs. FENWICK. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I was planning to vote against this amendment, until I heard the gentleman in the well. I may still vote against it, despite what the gentleman has said.

I think to characterize the independent businessmen, who represent thousands and thousands of small businesses, as we have heard in the well, is unfortunate, and I resent that on their behalf.

□ 1750

Now, as to the Davis-Bacon Act, I happen to think it is a good law. I do not think the Government of the United States ought to be in the position of using Federal funds to drive down wages. Neither do I believe that the Government of the United States should be in the position of using Federal funds to inflate them.

There is not an honest person in this room who does not know that this has happened. We know it has happened. We know that people, contractors and governments—both local and State—have been paying more than they might have.

The General Accounting Office itself told us that \$480 million more was spent on the Metro because we have the Davis-Bacon law.

It has had some effects that have been difficult, but I still think it is a good law because of the principle which it establishes. But the issue is in the courts, the injunction which the gentleman in the well referred to, is now going on appeal. I do not think it is appropriate now to take an action that certainly would affect the Davis-Bacon Act; whether we admit it or not, we know it, and I do not think we should take it while it is still in the courts.

I hope very much that the amendment will be defeated, and I yield back the balance of my time.

Mr. MILLER of California. Mr. Chairman, I rise in opposition to the amendment.

The CHAIRMAN pro tempore (Mr. MURTHA). The gentleman is recognized for 5 minutes.

Mr. MILLER of California. Mr. Chairman, I think the gentleman from New Jersey hit on the exact point of this debate, and that is the principle for which the Davis-Bacon law was passed.

The principle for which the Davis-Bacon law was passed was to make sure that in hard times, hard times like the Depression, the Federal Government did not use its dollars to undermine the wages and the working conditions of people in this country because at that time there were contractors, moving around, coming into areas, trying to siphon off the few jobs there were and undermine the wages of organized working people in this country.

It is very interesting that we now find, in the worst times since the Great Depression, that the other side of the aisle would raise an amendment to do exactly the opposite, because what this amendment mandates is that we undermine the wages, the prevailing wage in an area paid to working men and women.

That is what this amendment does, because interestingly enough, this amendment does not reform Davis-Bacon; this amendment takes it, with all its warts, that the other side does not like, and simply says, "We will accept that. And if you can undercut wages by 10 percent." The Government will finance the undercutting of those wages.

Now, if you are putting up a building, concrete costs so much per yard, steel costs so much per ton; so where are you going to negotiate? You are going to negotiate on the wages, exactly contrary to the purpose of the Davis-Bacon Act.

Let us review what has happened here: The administration, no fan of Davis-Bacon, the Secretary of Labor, no fan of Davis-Bacon, have decided that they would change the manner in which Davis-Bacon was administered.

The gentleman from Minnesota and others have raised problems with Davis-Bacon regarding wage area determinations, how we determine prevailing wages, how we classify workers. The administration has obviously heard his arguments and has sought to change the administration of the law.

They have been temporarily restrained by the courts, and that will be worked out. That is a reform, if you happen to believe it is necessary, a reform of the law.

This is not. This is a direct attack on the purpose and the principle of the Davis-Bacon Act of this country, to protect workers in hard economic times; and it comes at a time when we find unemployment in the building trades and related trades running into double digits at a minimum. We find it at a time when people have packed up and left the Northeast, they have left the Midwest, they have driven to Arizona, they have driven to Alaska, they have driven to California looking for jobs. They are the modern-day Okies.

Yet we have here a mandate that undermines the principle of the law

that, in similar times, the Congress, the President of the United States, enacted for the purpose of protecting the American worker.

We have had disagreements, the gentleman on the other side and myself, about how Davis-Bacon is administered. As the gentleman from Illinois knows, I currently have an investigation underway investigating the administration of Davis-Bacon. This is not to say that Davis-Bacon is a holy act, but this is to suggest that this amendment goes nowhere near the questions that have been raised, some legitimately so, by opponents of the Davis-Bacon Act.

I would hope that Members of this Congress would not, in these economic times, make what is a very direct attack on the wages of construction workers across this country, at a time when we have seen the best organized unions in this country, in an effort to deal with inflation, give back hours, give back working conditions, give back holidays, give back time.

We have seen it in the industrial unions and we have seen it in the construction unions, and I think for this Congress to speak in this fashion is very bad in these economic times.

So I hope the Members would be very clear about this amendment. If you have trouble with Davis-Bacon, the administration has taken action. You may wish them to go further. That is the political process. They may go further. I do not happen to agree with everything they have done, but this is not the way to correct it.

Mr. HOLLENBECK. Mr. Chairman, I rise in support of the legislation and in opposition to the amendment.

Mr. Chairman, I am opposed to exempting Federal construction programs authorized under the National Development Investment Act from the prevailing wage standards established by the Davis-Bacon Act.

First of all, I think that creating piecemeal exemptions from the Davis-Bacon Act is absolutely the wrong approach. I know of no reason to treat economic development construction projects differently from other types of Federal construction. The same skills are required, and such projects are equally subject to abuses as all other types of Federal construction.

Second, this experimental exemption plan ignores the really crucial question of the whole Davis-Bacon debate: What is the purpose of the act?

We must consider the purpose of the Davis-Bacon Act.

The object of the law was, and is to prevent the Federal Government from undercutting local labor standards in the process of awarding contracts for Federal construction work. The act is intended to protect all construction

workers and contractors, union and nonunion. The need for a prevailing wage law is inherent in the Government contracting industry, since the Government is required by law to award contracts to the lowest bidder, unless there is a compelling case that the firm is unqualified. And it is very difficult to establish this before the work is started. In view of the pressure of competition, and the fact that contractors have little control over interest rates and the cost of materials, I feel that without a prevailing wage law there would be every opportunity to unscrupulous contractors to slash wages in order to win Government contracts. The reputable business, committed to paying sufficiently high wages to attract and keep skilled and experienced construction workers, cannot hope to compete with these tactics. The repeal of the Davis-Bacon Act would enable disreputable contractors to win contracts because they hire low-wage workers.

By encouraging uniform wage rates which are consistent with local practice, I believe the Davis-Bacon Act fosters competition based on merit, and not on how little contractors can pay their workers.

As well as being a matter of basic fairness to workers and reputable contractors, Davis-Bacon also protects Government and taxpayers. Skilled and experienced construction workers are not generally willing to work for substandard wages. The contractor trying to win Government work by drastic reductions in wage rates will hire the lowest-paid people available. These are almost certain to be those with the least training and experience in the industry. The likely consequence will be a shoddy construction job, extra costs when faulty work must be redone, and higher expenses for maintenance and repairs over the life of the project.

These are the basic reasons which led Congress to pass the Davis-Bacon Act 50 years ago. Conditions in the construction industry have improved greatly since 1931, partly because of the Davis-Bacon Act and other labor laws. However, the number of violations of the act increases every year. This alone demonstrates that the act is still needed, and that unscrupulous contractors can still exist despite the protections of the law.

Mr. Chairman, the act has an important role to play in preventing serious abuses on Government construction work. It should be retained, and applied to all Federal construction projects. The exemption for economic development projects should not be made.

Mr. HAGEDORN. Mr. Chairman, will the gentleman yield to me?

Mr. HOLLENBECK. I yield to the gentleman from Minnesota.

Mr. HAGEDORN. I thank the gentleman for yielding.

Mr. Chairman, I just want to ask the gentleman, does he really believe that the American people will only get shoddy construction unless it is done under Davis-Bacon when so much of the construction in America today goes and is being done without union labor and under a procompetitive business?

□ 1800

Mr. HOLLENBECK. The gentleman from Minnesota is misrepresenting my remarks.

Mr. HAGEDORN. The gentleman said, "shoddy."

Mr. HOLLENBECK. I did not say, if the Davis-Bacon Act were repealed, or exemptions were allowed, shoddy work would result. I said that is one of the threats inherent in his approach and in the repeal of Davis-Bacon.

Mr. HAGEDORN. I do not believe it is a threat, if the gentleman will continue to yield. I just certainly hope that the gentleman did not mean that those public construction projects, if there are any, and especially those in the private sector that did not have to deal with Davis-Bacon, are being done in a shoddy manner in any such case.

Mr. DENARDIS. Mr. Chairman, will the gentleman yield?

Mr. HOLLENBECK. I yield to the gentleman from Connecticut who has a long record of support for the working person's rights and dignity.

Mr. DENARDIS. Mr. Chairman, I rise in opposition to the Hagedorn amendment which calls for a Davis-Bacon exemption when the winning bid on an EDA project comes in at least 10 percent lower than the next lowest bid. I need not remind my colleagues that one of the primary purposes of the Davis-Bacon Act was to prevent cutthroat competition by so-called fly-by-night firms that undercut local wages and working conditions. It seems to me that the amendment under consideration promotes and invites just such cutthroat competition. To place the Federal Government in the position of rewarding those undercut local wages and working conditions is a proposition I simply cannot support. While I am not opposed to the consideration of possible refinements in administration of the act, I cannot support the amendment before us, and I urge my colleagues to oppose it.

I would like to think that we could solve the problems on Federal construction projects by simply looking at costs. Unfortunately, I do not think we can. We have all been tempted with "a deal you can't turn down," and in most instances we have all lived to regret it.

The CHAIRMAN pro tempore. The time of the gentleman from New Jersey has expired.

(By unanimous consent, Mr. HOLLENBECK was allowed to proceed for 5 additional minutes.)

Mr. PEYSER. Mr. Chairman, will the gentleman yield?

Mr. HOLLENBECK. I yield to the gentleman from New York.

Mr. PEYSER. Mr. Chairman, I have just a brief comment I would like to state at this time. When the gentleman was referring to the ability of laborers to do their jobs, one of the main things organized labor does is to develop a course of apprentice programs that turn out the kind of workers that really can do a fine job. I think it is vitally important, if we attack things like Davis-Bacon and attempts of this kind of an amendment, what we are going to do is to end those apprentice programs and end the opportunity for young men and women to learn these skills.

Mr. ERLBORN. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, I do rise in support of the amendment offered by the gentleman from Minnesota. I am not going to repeat all the arguments that have already been made in support of the amendment, but I would like to comment on and respond to some of the observations that have been made by the opponents.

The gentleman from New York (Mr. PEYSER) suggested that every President since the act was passed has supported Davis-Bacon, have been opposed to its repeal, which may be correct. I have not looked at that history with that in mind. But, let me say that I think there are other Government officials who have consistently recommended in the last 20 years that the Davis-Bacon Act should be repealed because it no longer performs the function it should.

I think there is a notable difference between those Government officials and the Presidents the gentleman refers to. Presidents get elected through a political process and with the support or the opposition of labor unions. The other public officials that I have reference to are the Comptrollers General of the United States, who neither seek political support nor who utilize it, who are an arm of this Congress and who have consistently over the last 15 or 20 years in more than one formal report recommended the repeal of Davis-Bacon because not only does it no longer perform the function for which it was intended, but it is counterproductive.

The most recent of these reports was issued only a year or two ago. The title of that report stands starkly in my mind because it was quite expressive. The title was, "The Davis-Bacon Act Should Be Repealed."

The Comptroller General had looked at all the problems with the act, had seen and reported its inflationary impact, had pointed out it no longer does perform the functions that it was intended to, and looked at all the alternatives for changing the regulations trying to lessen its adverse impact, and rejected all of them because they were unworkable. He came to that very simple conclusion that Davis-Bacon should be repealed.

I think we all should understand that, like Presidents, the people in this Chamber are elected with the support or the opposition of groups like organized labor. So, it is really unlikely, in my opinion, particularly with the current President not in favor of repeal, that we might do that. I think, therefore, the suggestion contained in this amendment is quite a valid one. Those who have consistently supported the Davis-Bacon Act have said, "Oh, it doesn't have any inflationary impact. It doesn't cause greater costs in these projects."

Well, let us find out. Let us find out whether they are right or they are wrong. Let us just try this one little, small experiment affecting only the projects under this act.

Someone else said, "Well, this doesn't really have any great impact on local governments."

That certainly also is false. Under the projects that would be authorized in this act, 50 percent of the cost of the projects would be borne by your local communities.

The Comptroller General has pointed out that costs of these contracts are driven upward by the Davis-Bacon Act, and therefore the costs borne by your local governments will be driven upward. In these times that are so difficult economically, we do not need to drive up costs for local governments.

Lastly, my good friend, the gentleman from New Jersey, said that this matter is in the courts, and therefore we should not disturb it. I think that is a total misunderstanding of what is in the courts and what is in this amendment. What is in the courts is a challenge to the regulations promulgated by the Secretary of Labor. This amendment does not go to those regulations whatsoever. This has nothing to do with what area they are considering for determining the prevailing wage, how many apprentices can be utilized on the job, or the 30-percent rule as opposed to the 50-percent rule. We are not going to get into that area whatsoever. So, we are not going to disturb the courts or their challenge that is now being heard in the courts between building trade unions.

What we are doing with this amendment is saying, can we experiment to see if we can save your local taxpayers and the Federal taxpayers with this approach of having a small exception to Davis-Bacon.

I hope the amendment will be adopted.

The CHAIRMAN pro tempore. The time of the gentleman from Illinois has expired.

(By unanimous consent, Mr. ERLBORN was allowed to proceed for 1 additional minute.)

Mr. DUNN. Mr. Chairman, will the gentleman yield?

Mr. ERLBORN. I will be happy to yield.

Mr. DUNN. Mr. Chairman, let me just try to put some light on the rhetoric here. I have heard everything from nonunion contractors or fly-by-night operators to the original concept of Davis-Bacon. I have not spent 20 years in the White House or 20 years on the floor here, but I have spent 20 years in the construction business, and nonunion contractors are not fly-by-night operators.

The original concept of Davis-Bacon, like the gentleman from California correctly said, was to prevent the Federal Government from coming in and taking the contractors from outside the area and undercutting the prevailing wage. That was the original intent of Davis-Bacon. I support that original intent, but believe me, that is not the way Davis-Bacon works today.

The scenario, the speech, the rhetoric about prevailing wage does not exist. Davis-Bacon uses highest prevailing union wage rates in any given area. I have had 20 years' experience in dealing with this.

The CHAIRMAN. The time of the gentleman from Illinois has again expired.

(At the request of Mr. DUNN and by unanimous consent, Mr. ERLBORN was allowed to proceed for 2 additional minutes.)

Mr. ERLBORN. I yield to the gentleman from Michigan.

□ 1810

Mr. DUNN. It is my own personal experience where I have operated the largest single company in a metropolitan area and my company was the prevailing wage rate in that area. We were a nonunion company.

Davis-Bacon with its regulations came in, skipped over the number of people that I employed on a daily basis, and went to the prevailing union wage, a minuscule part of our community.

The end result to the Federal taxpayers, to the community, was much more than 10 percent.

This is a good amendment. It is pro-competition. It involves the local contractors, the small guy, and gives them a chance to skip the paperwork and bid.

It is an anti-big-union labor amendment.

I urge my colleagues to support this amendment.

Mr. SHAW. Mr. Chairman, will the gentleman yield?

Mr. ERLBORN. I yield to the gentleman from Florida.

Mr. SHAW. The gentleman made reference to an additional cost to local government. I was not going to speak on this particular amendment until you struck that familiar chord.

I was the mayor of Fort Lauderdale for three terms. In that position I had many contracts, both union and non-union because of Federal involvement. There is no question but that those with Federal money, where Davis-Bacon was strictly applied, cost the city of Fort Lauderdale a lot more money. There is no question about that.

I can also testify here that the quality was no better.

We have simply, by the application of this law, the application, not the word of the law, but the application of the law, we have destroyed competition. We have taken the small businessman completely out of the competitive stream and in doing so we have paid substantially more for Federal projects.

In these particular days when we are talking about going back and cutting human services, and that is what this is about, cutting human services, we have to also look, and if unions cannot compete in this particular situation they are going to have to be able to take these particular cuts.

I think it is a good amendment. I compliment it and I certainly would urge its support.

Mr. ERLBORN. I thank the gentleman for his contribution and yield back the balance of my time.

Mr. LEVITAS. Mr. Chairman, I move to strike the requisite number of words.

Mr. OBERSTAR. Mr. Chairman, will the gentleman yield?

Mr. LEVITAS. I yield to the gentleman from Minnesota, the chairman of the subcommittee.

Mr. OBERSTAR. The gentleman from Georgia is the chairman of the Subcommittee on Investigations and Oversight and has had under consideration for some time extended hearings into the application of the Davis-Bacon Act as it applies to programs under the jurisdiction generally of the Public Works and Transportation Committee.

Could the gentleman tell us what further plans he has for hearings on that matter?

Mr. LEVITAS. Yes. I thank the distinguished chairman of the subcommittee for making this point because it was as a result of the hearings in the full committee on the markup of this particular piece of legislation and as a result of the request and suggestion of the gentleman from Minnesota, the chairman of the Subcommittee on

Economic Development, that, I as chairman of the Subcommittee on Investigations and Oversight, initiated a major study into the entire range of Davis-Bacon impact.

As the Members know, our committee probably has as many programs relating to Davis-Bacon matters as any committee in the Congress.

There has been a great deal of discussion over the last few years about problems in Davis-Bacon. Many of them are those which have been referred to by the gentleman from Minnesota (Mr. HAGEDORN) and the gentleman from Illinois (Mr. ERLÉNBERG), and others. I refer to problems involving administration, the 30-percent rate, where the areas of wage determination are to be made, what is covered and, of course, basically, whether the additional costs are justified at all. Others, in labor, complain that the Davis-Bacon law is poorly administered and poorly enforced.

It is my belief that the time has come for there to be a comprehensive, not a piecemeal, investigation dealing with this entire matter, resulting in a report with specific recommendations. We can no longer sweep this problem and issue under the rug.

I am extremely pleased that the gentleman from Minnesota (Mr. HAGEDORN) is now the ranking Republican member on the Subcommittee on Investigations and Oversight. I know in light of his interest that we will cooperate fully in having these hearings go forward, so once and for all the charges and the countercharges, the claims and the counter claims can be brought into the public and resolved.

Witnesses who believe that Davis-Bacon should be maintained in its present form will be afforded every opportunity to be heard. Those who desire the repeal of Davis-Bacon will be heard. Those who want to see modifications will be heard.

As the Members know, President Reagan has not recommended the repeal of this Davis-Bacon legislation but there are many of us who believe, at the very least, there needs to be some revision and, at the very least, there needs to be, for once and for all time, a comprehensive addressing of the entire matter, not a piecemeal dealing with it. Some proponents of Davis-Bacon shy away from such an approach, and some opponents prefer little nibbles that do not address the real concerns.

So for that reason I can say, as chairman of the subcommittee, that our subcommittee, in light of the recommendation and suggestion of the gentleman from Minnesota (Mr. OBERSTAR), is moving forward at the present time and we will have these hearings and investigation. There will be public hearings and any Member and any outside person who is interested will be afforded the opportunity

to participate. We will determine the facts, and we will make recommendations of a specific nature for the first time in modern history.

Mr. HAGEDORN. Will the gentleman yield?

Mr. OBERSTAR. I am happy to yield to the gentleman from Minnesota.

Mr. HAGEDORN. I thank the gentleman very much for his comments. I look forward to the exhaustive studies and the analysis of the impact of Davis-Bacon.

But, Mr. Chairman, I believe the best analysis of all is still in the marketplace. That is why I ask today for your support for this tiny little program, \$500 million out of \$41 billion in capital budget that this Government spends annually.

When you leverage that with the impact on counties and municipalities and States, Mr. Chairman, is it too much to ask for a real test out there in the private sector rather than wait for more hearings by our committee?

Just one little test and then we will put that in with all of the data that you and I collect.

Mr. LEVITAS. Let me say to my good friend, and I say this in sincerity, and the gentleman has worked with me long enough to know that when I say it I mean it—

Mr. HAGEDORN. I know you do.

Mr. LEVITAS. I do not believe that we are going to accomplish anything of significance unless we really take a very hard look at the whole problem.

I think what would happen if we made another piecemeal attempt to deal with this is that that piecemeal attempt would come and go and we still would not have really looked at what needs to be done.

The General Accounting Office has issued this report and they have issued others. There have been articles in important journals, some of them, like the Washington Monthly, considered to be liberal in its views, which recommend changes or repeal of Davis-Bacon.

The CHAIRMAN. The time of the gentleman from Georgia (Mr. LEVITAS) has expired.

(By unanimous consent Mr. LEVITAS was allowed to proceed for 1 additional minute.)

Mr. LEVITAS. We will let all of those people come in and let us get to the bottom of this once and for all and stop making it a political football.

Let us find out what we need to do to change, if change is needed.

Mr. GILMAN. Mr. Chairman, will the gentleman yield?

Mr. LEVITAS. I am happy to yield to the gentleman from New York.

Mr. GILMAN. Mr. Chairman, I thank the gentleman for yielding and I rise in opposition to the amendment offered by the gentleman from Minnesota (Mr. HAGEDORN), which would

exempt from the coverage of the Davis-Bacon Act certain projects authorized for assistance under this bill if a nonunion contractor succeeded in undercutting the total cost of a project by more than 10 percent.

Mr. Chairman, this is an unnecessary amendment. Although it is billed as an amendment that would save money, there is little doubt that it will cost the American people money. There is no doubt in my mind, for instance, that this bill will result in increased unemployment and in substandard construction practices. What kind of bargain would that be?

I think that this amendment, which, in effect, represents a piecemeal repeal of the act, is ill-timed. I cannot think of a worse time to take this kind of action against the livelihood of our construction workers. I think that we ought to take a more thoughtful approach, by appropriate legislative oversight, to make certain that the Davis-Bacon program works properly. I do, therefore, salute the gentleman from Georgia (Mr. LEVITAS) who has just informed us of his plans to study the program and to recommend improvements, if necessary. Then we can consider the matter calmly and on its merits. At this time, speaking as a long-time supporter of the Davis-Bacon program, and one who has voted repeatedly against amendments restricting its application, I urge my colleagues to reject this amendment.

Mr. PASHAYAN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I look with interest upon the whole notion that the amendment before the committee would save money. I have no doubt that it would save money.

But I must oppose the amendment because I do not think that asking people who work and build this country to reduce their wages is a good way to go about saving money.

I do not think there is anything wrong with the Federal Government adopting a policy—when Federal money is involved—of paying substantial wages rather than a policy of paying subsistence wages.

We are talking here not about people who want to be on unemployment or want to be on welfare. We are talking about people who work and build this country. These are working people who work.

I think for that they should be rewarded.

There are a lot of other ways that this Government could save money. It could save money by reducing the profits of the companies that supply the construction. It could save money by reducing the costs of supplies. It could save money by reducing the amount of Government spending over-

all and reducing the level of interest as well.

I do not think it is good policy for this Government to select one particular group of people, the people who work to build this country, and under the guise of saving money to put an unfair burden on their backs.

□ 1820

Mr. SIMON. Mr. Chairman, will the gentleman yield?

Mr. PASHAYAN. I yield to the gentleman from Illinois.

Mr. SIMON. I simply want to commend the gentleman, and I agree wholeheartedly with what he has to say. And the net impact, if we start down this road, right now, in my district in Southern Illinois, 4 counties have over 20 percent unemployment; I have a bricklayers' local with 9 percent of its people working; operating engineers with 20 percent working. And what this kind of an approach is going to do it to put these hard-working people, who desperately want work, out of work. I commend my colleague.

Mr. PASHAYAN. I thank my colleague.

I do not think it is worthwhile to experiment with the livelihood of people who work. Although the author of the amendment says that this is just a small adjustment, still we are asking people to experiment with their livelihood. And these are not the best of times, let us face it.

No one is saying that Davis-Bacon is perfect. It is going to need some adjustment here and there. It sometimes has a very heavy effect in remote rural areas. But what my colleague from California (Mr. MILLER) is trying to work out, the adjustments that have to be made, I do not think are best made by this amendment or an amendment like it.

Mr. SIMON. I commend my colleague, and I hope we will resoundingly defeat the amendment.

Mr. FORD of Michigan. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, attempts like this to piecemeal reach the Davis-Bacon Act—that is what we have here, not an attempt to repeal or amend the Davis-Bacon Act, but an attempt to limit its application in a very narrow part of a particular program or set of programs in the Government—have been going on for years here. I have been recalling to the Members for years that we are not talking about some modern scheme that came from the bowels of the Democratic National Committee, but we are talking about a well-thought-out policy that was initially designed to provide stability for the construction industry—not only for people who work as laborers in the industry, but

also for people who are the entrepreneurs. Indeed the strongest lobby for the adoption of this kind of a law was small construction companies—as evidenced by the States that adopted Davis-Bacon-type laws before the Federal Government did. The first Davis-Bacon-type laws to protect local contractors against outsiders coming into a stable community and undercutting the local businessmen go way back to Kansas in 1891 and Idaho, Arizona and Oklahoma soon after—States not known ever in their history to be dominated by organized labor. Those four States, together with New York, Massachusetts and New Jersey, all enacted prevailing wage laws before the Federal statute was passed in 1931.

It took Mr. Davis and Mr. Bacon 4 years to succeed passing a law which they originally introduced in 1927. The Davis-Bacon Act was finally enacted when Herbert Hoover gave the measure his vigorous support and signed it into law in 1931. And no one ever has in my generation accused Herbert Hoover of deliberately trying to hurt American business.

Mr. PASHAYAN. Mr. Chairman, will the gentleman yield?

Mr. FORD of Michigan. I yield to the gentleman from California.

Mr. PASHAYAN. Will the gentleman agree with me when I say that every institution in this country needs a certain amount of minimum legal protection? Banks need it against debtors, business needs it in all sorts of ways, and labor needs it, as well. And this is one of those fundamental protections, the protection of local labor and contractors, really, that the construction trades are still very much in need of. I do not think this kind of an unscientific tinkering is the best way to go about whatever adjustments might be necessary.

Mr. FORD of Michigan. I agree completely with the gentleman, and I compliment him on his perception of what is really at stake. I think it is necessary however, to recognize that when you try to characterize this in some fashion, as some special benefit for some segment of organized labor that has to be attacked because it is costing the taxpayers money, you are doing real violence to the history of the act and the application of the act.

The essential center of it is that the Federal Government should not, by spending Federal funds, undercut any local community's labor base or business base.

Someone over there mentioned Dade County in Florida and said that they could have saved money if they got nonunion labor from outside of Dade County to perform their contracts. I do not think that anybody running for office in Dade County would like to advocate that to save money you let a nonunion contractor come in from another State and pay below prevailing

wages in the area to get a public project.

Mr. SHAW. Mr. Chairman, will the gentleman yield on that point?

Mr. FORD of Michigan. No, I do not yield at this time. The gentleman had his own time.

Mr. SHAW. I would like to set the gentleman straight as to where the city of Fort Lauderdale is located. It is in Broward County, not Dade County.

Mr. FORD of Michigan. Excuse me if I have insulted either Broward County or Dade County. I will apologize to both of them simultaneously.

But the very point the gentleman makes illustrates the importance of not fooling around program by program with this kind of a basic policy. It is a basic policy that has been around for a long time. It was valid when it started. It is valid today. And I have to say to the gentleman from Minnesota, I have seen a lot of attacks on Davis-Bacon. This one makes the least sense of any that I have ever seen, because you not only place a premium on undercutting the wage base for you citizens in an area getting a Government project, but you give a special consideration for somebody who is a champion wage undercutter. If a contractor cuts his employees' wages 6 or 8 percent you ignore his bid, but if he cuts their wages 20 percent you reward him with the contract. If you mean to tell me that you can help the constituents of your district or mine by promoting cutthroat competition against local contractors and local workers by your kind of an amendment and benefit them, I would be interested to hear the gentleman's explanation.

Mr. STANGELAND. Mr. Chairman, the debate on this amendment has gone on for a good deal of time. I think our minds are made up.

I ask unanimous consent that all debate on this amendment and all amendments thereto cease at 6:40 p.m.

The CHAIRMAN. Is there objection to the request of the gentleman from Minnesota?

Mr. HOWARD. Reserving the right to object, Mr. Chairman—and I do intend to object—I believe this is an important amendment, and I would like to state that I shall object to extensions of time for Members who are speaking, but I shall also object to an attempt to not permit Members to have a full 5 minutes debate on it.

So, Mr. Chairman, I object.

The CHAIRMAN. Objection is heard.

Mr. DERWINSKI. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, fairly often, proposals are made to remove prevailing wage protections from various Federal construction projects.

Let us remember that the Davis-Bacon Act was established to improve the equity and efficiency of the construction industry. Therefore, in evaluating the success of such a law the question to be asked is whether the conditions perform the function for which they were designed. Also whether the benefits provided justify the costs that may be involved. Let us look at the benefits the Davis-Bacon provides? It insures the local contractors, committed to upholding local labor standards, have a fair chance to compete for Government projects, rather than being undercut by outside firms bringing in outside cut-rate labor. Further, it affords a measure of stability to a notoriously unstable industry. Then the act helps insure that wages in construction will be sufficiently stable and predictable to allow for the recruitment, training and maintenance of a fully skilled construction labor force within the locality. Also it helps protect the Government against operators who might seek to win Government contracts by paying wages too low to attract competent craft workers. While such a move might be profitable for the contractor, it would be dangerous for the Government. The actual consequence could be shoddy work, since those willing to work for substandard wages would tend to be least skilled and least experienced workers.

Finally, the Davis-Bacon Act prevents the economic power of the Government from being used as a device to force down construction wages.

These benefits will be reflected in the overall costs of new installations—operating and maintenance costs as well as the initial construction charges. Other benefits accrue to the local construction industry in the form of stability, the maintenance of a skilled work force, and the guarantee of a fair chance for local contractors to compete for Government work. Other benefits are provided to the local economy, including incomes for area business and employees, reduced unemployment, and a stabilized community.

Mr. Chairman, mindful of the few shouts of "vote" I will be brief.

We have in some form debated this Davis-Bacon amendment or versions thereof every 2 years. Thus the propositioning of the Members I think will be demonstrated by the RECORD. But I do believe that the most practical points made in the debate is the fact that you should not in piecemeal fashion attempt to correct something as embrace as the Davis-Bacon Act. I think it would be far more practical, as the gentleman from Georgia (Mr. LEVITAS) pointed out, to go into it in a full-scale, total committee fashion.

With all due respect to my good friend from Illinois (Mr. ERLBORN) and my good friend from Minnesota,

the sponsor of this amendment, this is not an experiment. It would cause a very complicated procedure, and I do not think it would give a clear picture to anyone, proponent or opponent, of the Davis-Bacon Act, as to what the results would really be.

So I would suggest that practicality dictate at this time that the amendment be rejected.

Mr. JOHNSTON. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, this is an intriguing idea that we have here. Down in North Carolina we play a lot of basketball. We do it fairly well. But the idea of giving the other side a 10-percent head start and then calling it, as the gentleman from Connecticut called it, cutthroat competition, is the most incredible idea I have ever heard. I wonder how many athletic events, with one side given a 10-percent head start, would even have anything but a foregone conclusion. If this is this Congress idea of cutthroat competition, then it is so far removed from the reality that my colleague, the gentleman from Minnesota, seems to try to inject into this body, that it is incapable of considering this whole proposition.

I realize, my distinguished colleagues, that we have carefully exempted ourselves from things like social security taxes and EEOC and OSHA, and all of these other problems that the rest of the country has got to encounter, but this one other example of our removing ourselves from reality, giving the unionized contractor a 10-percent headstart and then calling it cutthroat competition. But for those of you who are tuned to reality, let me remind you that we have a \$100-billion-plus deficit.

□ 1830

And bills like this are the way we got a \$100-billion-plus deficit. A little more spending, a little more inefficiency, a little more zinging it to the American taxpayer so that some special interest group can be given a 10-percent headstart at the expense of all those working men and women out there who do not have a 10-percent headstart, who have got to scramble, who have got to have cutthroat competition. They are the ones we are penalizing so we can get a few votes from organized labor.

Mr. OXLEY. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, I shall not take the full 5 minutes.

It occurred to me most of the people, if not all of the people who were opposed to the amendment come from major metropolitan areas. Many of us represent rural areas or areas that have small towns.

I might relate one particular instance that I had when I talked to a

mayor of a small town in my district. The town is about 20,000 people. He told me that the Davis-Bacon Act alone in his community costs him over \$100,000 a year, a town of 20,000 people, and the Davis-Bacon Act costs him that much money.

That is the case throughout my congressional district. Many small towns, medium-sized cities, that are under the pressure of having to conform with the prevailing wage that perhaps is in Dayton or Toledo, Ohio. It is extremely unfair to those people who live in those types of communities, not only taxpayers, but certainly the local government as well. I think it is important to keep that in mind.

If I had my choice I would offer an amendment that would totally do away with Davis-Bacon. I think its time is far gone.

If my colleagues will remember, back when we had the fair trade laws, and those fair trade laws were enacted to protect small businesses back after the Second World War, those have been since repealed either by legislative activity or by the Federal Trade Commission.

I think the Davis-Bacon Act in many cases represents the same problem that developed with the statutes in the past.

But all throughout this debate the important person that we have to remember besides talking about local government, particularly small towns, is the taxpayer. It is important to remember that \$1 billion—\$1 billion is spent each year as a result of Davis-Bacon, and that is what it costs the taxpayers in this country.

If you bring it down to a lower level, down to the real level of small towns, you are talking \$100,000 to a town of 20,000 people, I think that brings it home.

Mr. BUTLER. Mr. Chairman, will the gentleman yield?

Mr. OXLEY. I yield to the gentleman from Virginia.

Mr. BUTLER. I thank the gentleman for yielding.

I appreciate very much the point that the gentleman makes about the cost, particularly to the small communities. But what the gentleman neglects to mention is that what really results is the opportunities for public projects are foregone or abandoned as a result of the additional cost which this imposes. Not only additional labor cost, but the additional administrative costs and all the problems that go with it.

So I want to join with my colleagues in support of this amendment and congratulate the gentleman from Minnesota in a very unique way of bringing it forward to us. It is a very simple amendment. It is not going to complicate the process. It is going to make it much simpler. And in the long run it

presents us with an opportunity to save substantial Federal dollars so that more dollars will be made available for public projects and more jobs will be created.

I cannot see what is wrong with saving the taxpayers money in this area so that more money and more jobs can be created. I am in strong support of the amendment.

Mr. HAGEDORN. Mr. Chairman, will the gentleman yield?

Mr. OXLEY. I yield to the gentleman from Minnesota (Mr. HAGEDORN), the sponsor of the amendment.

Mr. HAGEDORN. I thank the gentleman for yielding.

I heard earlier tonight remarks that "I cannot vote for this because it hurts the unions."

My friends and colleagues, there is more than the AFL-CIO union. There is the American taxpayers union for one. There are hundreds of millions of tired taxpayers today that are looking for relief from this kind of legislation that this Congress insists on perpetrating, and I hope that you will just give this one little experiment an opportunity to work, and then let us take an evaluation of it 2 or 3 years down the road.

I am going to stop bothering my colleagues, if you just give it a chance. I promise the Members that. Just give it a chance. Let us see if it will work once.

Mr. MILLER of California. Mr. Chairman, will the gentleman yield?

Mr. OXLEY. I yield to the gentleman from California.

Mr. MILLER of California. Mr. Chairman, I would just like to say that the gentleman has raised many of the points that people who have had problems with Davis-Bacon have raised over the years.

That is why the White House has taken action, they happen to agree with the gentleman. That is a reform of Davis-Bacon. They are contending they may save \$800 million with that. This does not do any of that. This is simply directed at the prevailing wage in that area.

A lot of small communities have said they do not like the way the prevailing wage is arrived at. The White House is addressing that problem. That is not what this amendment does at all. This directs and undercuts the prevailing wage, not the union wage, not the union worker, the prevailing wage in that geographical area.

Mr. OBERSTAR. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, we have spent scarcely 2 minutes under the 5-minute rule on the substance of H.R. 6100 in which most everyone has been in general agreement. And better than an hour in debate on a very important issue, one that is far reaching in its scope and significance but one I

submit that is not the subject of this legislation.

A very similar amendment, but not identical, was offered in the subcommittee and again in full committee by the gentleman from Minnesota and in full committee was soundly defeated by a vote of 26 to 11.

Now, we have talked about erosion of the Davis-Bacon Act this afternoon and about social experimentation in this legislation with a labor matter. Perhaps all of those things apply.

What concerns me is that it has perhaps obscured the central issue of this legislation. We are attempting with this bill to help communities who have suffered economic distress and unemployment to deal with their problems locally in their own way, their own creativity and ingenuity.

Now, as an issue by itself, Davis-Bacon is a very fundamental issue in labor relations. It is one that the gentleman who is chairman of the Subcommittee on Investigations and Oversight of Public Works has said hearings will be conducted on it. The Education and Labor Committee has also indicated they, too, have the jurisdiction and properly should inquire into this issue and they will do so.

But if I may deal with this matter as it relates to economic development, it really does not belong in this legislation.

Just yesterday there was a \$7½ billion construction bill on the floor and no one attempted to deal with Davis-Bacon in that bill. This is relatively a small piece of legislation that really ought not to be encumbered with an experiment in labor relations.

On the substance of the measure, though, I must say that while the effect may be to cut wages 10 percent, there is no attempt in this measure to put a limit on prevailing profits. There is no attempt to put a limit on interest rates. There is no attempt in this amendment to put a percentage limitation on building material costs. There is no attempt to limit the amount of profit and overhead that a contractor may charge. Only the wages are singled out. That is unfair. And on the test of fairness, the amendment fails.

I urge the committee to reject the amendment on the basis of fairness.

Mr. HOWARD. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, just briefly and very simply what the Davis-Bacon Act says is that when this Government, using the taxpayer's money, is going to be involved in a construction project, the workers on that project must be paid the prevailing wage as that prevailing wage is determined by the Government.

A few years ago in our hearings we had the President of the National Association of Manufacturers before us,

certainly not a prounion or proworker or prolabor organization, and I asked him directly whether he had any problems with the philosophy of when the taxpayers' money is being used that the workers get a prevailing wage and he had no problem with the philosophy.

□ 1840

What we are dealing with here is not how it is implemented. What we are dealing with here is basic national policy and the philosophy that this Government will use. And who are the taxpayers, by the way? The taxpayers are the working people who pay the money for these construction projects as well as the construction people themselves. For some reason or another, we seem to think that the only people's money that is involved here are the contractors themselves and somehow someone is trying to take away their money. The workers pay the taxes to build things in this country, also.

This amendment says that this provision can be waived if you can get the contract price 10 percent below what the prevailing wage would be. Now, where does the contractor look? There is going to be no difference in the equipment cost. There is going to be no difference in the material cost. There is certainly going to be no reduction in the contractor's profit, and it is interesting that we have no provision if we want to save the taxpayers money by putting a limitation on the profit a contractor can make in this area. So the only place he can get it is out of wages and if he can find workers who will work 10 percent or more below what the prevailing wage is, then by this amendment he must, because the amendment says shall, he must be given that contract. If he is an employer who wants to pay the prevailing wage to his workers, then by law the Government is saying that you cannot have the contract.

I think this is everybody's money involved and I think we have to be fair with everyone and this would be the most unfair thing we could do to accept this.

So I urge the committee to reject this amendment and reject it overwhelmingly and then get on to passing this fine piece of legislation.

● Mr. EVANS of Delaware. Mr. Chairman, I rise in opposition to the amendment of the gentleman from Minnesota, Mr. HAGEDORN, that would repeal the requirements of the Davis-Bacon Act in this legislation.

The Davis-Bacon Act was implemented with perhaps the most indisputably fair and worthy goal possible: That every working man and woman deserves an honest day's wages for an honest day's work.

Unfortunately, some problems have arisen in connection with the act, problems that certainly deserve the careful attention of the Federal Government. The administration is currently drafting proposals to deal with some of the shortcomings of the act administratively. These proposals will be carefully examined by this Congress as we fulfill our oversight responsibilities.

I believe this sort of comprehensive examination of the entire complex and important issue is the correct way to approach some of the problems with Davis-Bacon. We should not try to deal with this important issue in a piecemeal, bill-by-bill manner, as this amendment does.

I urge my colleagues to join me in voting "no" on the Hagedorn amendment.

● Mr. FRENZEL. Mr. Chairman, the Davis-Bacon Act has been controversial since its enactment in 1931. The record is replete with evidence that Davis-Bacon has had an inflationary effect on the construction industry and on our economy.

In addition, administering this program has become a tremendous cost burden to the American taxpayer. Even with the massive body of regulations that has grown around the act during the last 50 years, the Department of Labor has still been unable to come up with a workable or comprehensive way to collect or interpret data.

In my judgment, the Hagedorn amendment provides a reasonable test method for proving whether the program does indeed push up the cost of Government construction projects. In those cases where the Davis-Bacon bids are truly reflective of the prevailing wages in a local area, the Hagedorn amendment would effect no one, either employer or employee.

However, if the bids that contain Davis-Bacon provisions are unreasonably out of line with the prevailing local rates, the Hagedorn amendment would allow for alternative bids to be considered. Only if Davis-Bacon is inflationary will the Hagedorn amendment have any effect. In those cases, all it will do is save the taxpayer some money. I believe that Mr. HAGEDORN has provided the House with a unique opportunity for putting the Davis-Bacon Act to the test, and I encourage my colleagues to vote in favor of his amendment.

● Mr. ROBERTS of South Dakota. Mr. Chairman, I rise in support of the Hagedorn amendment to H.R. 6100.

The Hagedorn amendment will allow contractors bidding on EDA projects to submit bids which are not bound by Davis-Bacon prevailing wages. If the lowest non-Davis-Bacon bid is 10 percent or more below the lowest Davis-Bacon bid, an exemption from the act would be granted. But, if a full 10 per-

cent savings cannot be achieved, normal procedures would prevail.

This is an ideal opportunity for Congress to reduce the costs of Federal construction. The Government Accounting Office has estimated that the Department of Labor's prevailing wage under Davis-Bacon runs 5 to 15 percent higher than the actual wages paid in comparable non-Federal construction projects.

I agree with Congressman HAGEDORN that this is an opportunity that Congress cannot pass up. Savings from Federal construction is a goal I strongly support, and I urge my colleagues to vote for the Hagedorn amendment.

Mr. WEISS. Mr. Chairman, the Hagedorn amendment to the National Development Investment Act (H.R. 6100) would undermine the effectiveness of the Davis-Bacon Act. If this amendment were approved the Federal Government would be in the business of forcing wages down for labor thus damaging the labor market, and generally weakening the economy.

The Davis-Bacon Act was landmark legislation adopted to protect both business and labor and to stabilize local economies. Passed primarily to prevent carpetbagging businesses from depressing wages, this act continues to provide a buffer against activities that would harm a labor market.

The Hagedorn amendment is a deliberate effort to cripple Davis-Bacon. The Hagedorn amendment would permit the Federal Government to award construction contracts to non-union contractors who bid 10 percent or more below union bids, based on prevailing wages costs. This would encourage the exploitation of immigrant and, perhaps, illegal laborers who have been forced in the past to accept illegally low wages under threat of exposure by their employers. The Hagedorn amendment also reflects the dangerous and irresponsible leanings of many conservatives to lower labor costs regardless of the consequences.

When the Labor Department issued a notice of proposed rulemaking for teenage labor just a few weeks ago the intent was to cheapen labor costs. But what would have resulted was the abuse of teenage workers, possibly costing jobs for adults and encouraging teenagers to go to work rather than get an education. I joined with many of my colleagues in Congress at that time in urging the Labor Department to recall the proposed regulation. After much public furor over the Labor Department's proposal, the President dropped the plan.

More to the point, however, were the proposed regulations issued this spring by the Labor Department to accomplish much the same thing that the Hagedorn amendment seeks to do. Despite strong opposition and warnings that the changes violated the intent of Congress in passing Davis-Bacon, the

Labor Department went ahead and issued the regulations. Several labor organizations joined together and filed suit to seek an injunction against enactment of the rules for the reason I have just given, and a temporary injunction was issued.

That suite is not yet resolved, but I am confident that the courts will rule in favor of the unions. Congress did not intend for there to be gaping loopholes in Davis-Bacon, because it was understood that any loophole could effectively undercut that act.

At this time it would be inappropriate for Congress to do what the courts already have indicated may well be illegal. Congress has a responsibility to allow the ongoing judicial review to be seen through.

I strongly oppose the Hagedorn amendment, and support protection of the Davis-Bacon Act, and urge my colleagues to do likewise.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Minnesota (Mr. HAGEDORN).

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. HAGEDORN. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 140, noes 237, not voting 57, as follows:

[Roll No. 274]

□ 1850

The Clerk announced the following pairs:

On this vote:

Mr. Craig for, with Mr. Rangel against.
Mr. Tribble for, with Mr. Mitchell of Maryland against.

Mr. Frenzel for, with Mr. Garcia against.
Messrs. SAVAGE, CHAPPIE, ATKINSON, and SAWYER changed their votes from "aye" to "no."

Mr. DUNCAN and Mr. TAUZIN changed their votes from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

PERSONAL EXPLANATION

Ms. FIEDLER, Mr. Chairman, on rollcall No. 274 I was recorded incorrectly by the computer. My intention was to vote "aye."

□ 1900

The CHAIRMAN. The Clerk will designate title II.

Title II reads as follows:

TITLE II—APPALACHIAN REGIONAL DEVELOPMENT

SEC. 201. This title may be cited as the "Appalachian Regional Development Act Amendments of 1982".

SEC. 202. The sixth sentence of subsection (a) of section 2 of the Appalachian Regional Development Act of 1965 is amended by striking out the period at the end thereof and inserting in lieu thereof the following: "and in severely distressed and underdeveloped counties lacking resources for basic services."

SEC. 203. Subsection (b) of section 105 of the Appalachian Regional Development Act of 1965 is amended by striking out the period at the end thereof and inserting in lieu thereof the following: ", and not to exceed \$5,800,000 for the two-fiscal-year period ending September 30, 1984 (of such amount not to exceed \$900,000 shall be available for expenses of the Federal co-chairman, his alternate and his staff), and not to exceed \$5,800,000 for the two-fiscal-year period ending September 30, 1986 (of such amount not to exceed \$900,000 shall be available for expenses of the Federal co-chairman, his alternate, and his staff), and not to exceed \$2,900,000 for the fiscal year ending September 30, 1987 (of such amount not to exceed \$450,000 shall be available for expenses of the Federal cochairman, his alternate, and his staff)."

SEC. 204. Paragraph (7) of section 106 of the Appalachian Regional Development Act of 1965 is amended by striking out "1982" and inserting in lieu thereof "1987".

SEC. 205. (a) Subsection (g) of section 201 of the Appalachian Regional Development Act of 1965 is amended by striking out the period at the end thereof and inserting in lieu thereof a semicolon and the following: "\$215,000,000 for fiscal year 1983; \$234,000,000 for fiscal year 1984; \$250,000,000 for fiscal year 1985; \$270,000,000 for fiscal year 1986;

\$289,000,000 for fiscal year 1987; \$312,000,000 for fiscal year 1988; \$337,000,000 for fiscal year 1989; and \$364,000,000 for fiscal year 1990."

(b) Subsection (h)(1) of section 201 of the Appalachian Regional Development Act of 1965 is amended by striking out "70 per centum" and inserting in lieu thereof "80 per centum". The amendment made by the preceding sentence shall apply to projects approved after March 31, 1979.

SEC. 206. Subsection (c) of section 214 of the Appalachian Regional Development Act of 1965 is amended by striking out "December 31, 1980" and inserting in lieu thereof "October 1, 1987" in the first sentence, and by inserting "authorized by title 23, United States Code" after "road construction" in the second sentence.

SEC. 207. Part B of title II of the Appalachian Regional Development Act of 1965 is amended by adding at the end thereof the following new section:

"SEC. 215. The Commission is authorized to make grants to States and public and nonprofit entities for projects, approved pursuant to section 303 of this Act, which will—

"(1) assist in the creation or retention of permanent private sector jobs, the upgrading of the region's manpower, or the attraction of private investment;

"(2) provide special assistance to severely distressed and underdeveloped counties which lack financial resources for improving basic services;

"(3) assist in achieving the goal of making primary health care accessible in the region; or

"(4) otherwise serve the purposes of this Act."

SEC. 208. Clause (2) of subsection (b) of section 224 of the Appalachian Regional Development Act of 1965 is amended to read as follows: "(2) to enable plant subcontractors to undertake work theretofore performed in another area by other subcontractors or contractors."

SEC. 209. Section 224 of the Appalachian Regional Development Act of 1965 is amended by adding at the end thereof the following new subsection:

"(d) Notwithstanding any other provision of this Act, grants with funds authorized under this Act shall not, after October 1, 1982, exceed 50 per centum of the costs of any project approved under this Act (except projects under section 201); but such grants may increase the Federal contribution to any project, notwithstanding limitations in other Federal laws, to such percentage as the Commission determines within the limitations in this Act."

SEC. 210. Section 401 of the Appalachian Regional Development Act of 1965 is amended by adding at the end thereof the following: "In addition to the appropriations authorized in section 105 for administrative expenses, and in section 201(g) for the Appalachian development highway system and local access roads, there is authorized to be appropriated to the President, to be available until expended, to carry out this Act, \$166,000,000 for the two-fiscal-year period ending September 30, 1984; \$158,000,000 for the two-fiscal-year period ending September 30, 1986; and \$75,000,000 for the fiscal year period ending September 30, 1987."

SEC. 211. Section 405 of the Appalachian Regional Development Act of 1965 is amended by striking out "1982" and inserting in lieu thereof "1987".

Mr. OBERSTAR. Mr. Chairman, I move to strike the requisite number of words.

I will be very brief, Mr. Chairman. I want to take this opportunity to thank our colleagues on both sides who addressed the just recently defeated amendment with dignity, with respect, with full discussion of the issues, without any acrimony. It was a very commendable debate.

We bring to the House floor a measure designed to generate economic growth at the community level. We have fashioned a bill that is responsible in its funding, that is broad-based in its appeal across this country—East and West, North and South. It is a bill for the 1980's.

Mr. Chairman, I would like to yield at this time to the gentleman from Pennsylvania, to whom I want to express my deep appreciation for the splendid cooperation and thoughtful contribution that he has made to the passing of this landmark piece of legislation.

Mr. CLINGER. Mr. Chairman, I thank the gentleman for yielding, and I thank him for his comments. I would just like to make one point. The question has been raised about funding levels for this program, and I think it should be pointed out that probably under any circumstances we are going to have a continuation of the Economic Development program. There is approximately \$200 million in the budget. There is about \$200 million that has been passed by the Appropriations Committee. The administration itself must more or less concede that we will have funding for the Economic Development Administration next year.

My point is this: If we do not change this authorization, then the money that is appropriated and that will be available for the Economic Development Administration will be spent in some of those programs which we all concede were not as effective as others. Beyond that, we will also have still 84 percent of the country eligible to apply for this assistance, and clearly that is one of the things we tried to cut in this legislation.

I believe, and I am sure the Members agree, that we should change that authorization so that the money we are sure is going to be there will be focused, targeted to those areas of the country which are in greatest need of that aid, and it will be in those programs which all of our testimony indicated are effective, meaningful contributions to economic development.

Mr. OBERSTAR. The gentleman has made a very, very important point. Funds are available; they will be spent. We should spend them in a reasonable way, targeted and focused in a way that will best generate economic development, and in a way that can be man-

aged through the will of the Congress and the spirit of the 1980's.

The CHAIRMAN. The question is on the committee amendment in the nature of a substitute.

The committee amendment in the nature of a substitute was agreed to.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly, the Committee rose; and the Speaker having resumed the chair, Mr. GEPHARDT, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 6100) to amend the Public Works and Economic Development Act of 1965 and the Appalachian Regional Development Act of 1965, pursuant to House Resolution 539, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

The question is on the amendment.

The amendment was agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The CHAIRMAN. The question is on the passage of the bill.

The question was taken, and the Speaker announced that the ayes appeared to have it.

Mr. JOHNSTON. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 281, nays 95, not voting 58, as follows:

□ 1920

The Clerk announced the following pairs:

On this vote:

Mr. Garcia for, with Mr. Frenzel against.

Mr. Mitchell of Maryland for, with Mr. Craig against.

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. OBERSTAR. Mr. Speaker, I ask unanimous consent that all Members may have a 5 legislative days within which to revise and extend their remarks on the bill, H.R. 6100, just passed.

The SPEAKER. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

Mr. OBERSTAR. Mr. Speaker, pursuant to the provisions of House Resolution 539, I call up from the Speaker's table the Senate bill (S. 2144) Appalachian Regional Development Act Amendments of 1982, and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

MOTION OFFERED BY MR. OBERSTAR

Mr. OBERSTAR. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. OBERSTAR moves to strike out all after the enacting clause of the Senate bill, S. 2144, and to insert in lieu thereof the provisions of the bill, H.R. 6100, as passed.

The motion was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed.

The title of the Senate bill was amended so as to read: "A bill to amend the Public Works and Economic Development Act of 1965 and the Appalachian Regional Development Act of 1965."

A motion to reconsider was laid on the table.

A similar House bill (H.R. 6100) was laid on the table.

APPOINTMENT OF CONFEREES ON S. 2144

Mr. OBERSTAR. Mr. Speaker, I ask unanimous consent that the House insist on the House amendment to the

Senate bill, S. 2144, and request a conference with the Senate thereon.

The SPEAKER. Is there objection to the request of the gentleman from Minnesota? The Chair hears none, and appoints the following conferees: Messrs. OBERSTAR, ROE, EDGAR, and RAHALL, Mrs. BOUQUARD, and Messrs. CLAUSEN, CLINGER, HAMMERSCHMIDT, and McEWEN.

A further message from the Senate, by Mr. Spanner one of its clerks, announced that the Senate agrees to the amendment of the House with amendments to a bill of the Senate of the following title:

S. 2271. An act to authorize appropriations to the Secretary of Commerce for the programs of the National Bureau of Standards for fiscal year 1983, and for other purposes.

The message also announced that the Senate disagrees to the amendments of the House to the bill (S. 2036) entitled "An act to provide for a job training program and for other purposes," requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. HATCH, Mr. QUAYLE, Mrs. HAWKINS, Mr. KENNEDY, and Mr. METZENBAUM to be the conferees on the part of the Senate.

The message also announced that the Senate had passed a bill of the following title, in which the concurrence of the House is requested:

S.J. Res. 230. Joint resolution to authorize and request the President to designate August 15, 1982, as "Will Rogers and Wiley Post's Day."

REPORT ON RESOLUTION WAIVING CERTAIN POINTS OF ORDER AGAINST H.R. 6956, HOUSING AND URBAN DEVELOPMENT-INDEPENDENT APPROPRIATION ACT, 1983

Mr. ZEFERETTI, from the Committee on Rules, submitted a privileged report (Rept. No. 97-738) on the resolution (H. Res. 559) waiving certain points of order against the bill (H.R. 6956) making appropriations for the Department of Housing and Urban Development, and for sundry independent agencies, boards, commissions, corporations, and offices for the fiscal year ending September 30, 1983, and for other purposes, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION WAIVING CERTAIN POINTS OF ORDER AGAINST H.R. 6957, COMMERCE, JUSTICE, AND STATE, THE JUDICIARY, AND RELATED AGENCIES APPROPRIATIONS ACT, 1983

Mr. ZEFERETTI, from the Committee on Rules, submitted a privileged report (Rept. No. 97-739) on the reso-

lution (H. Res. 560) waiving certain points of order against the bill (H.R. 6957) making appropriations for the Departments of Commerce, Justice, and State, the Judiciary, and related agencies for the fiscal year ending September 30, 1983, and for other purposes, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION WAIVING CERTAIN POINTS OF ORDER AGAINST H.R. 6968, MILITARY CONSTRUCTION APPROPRIATION ACT, 1983

Mr. ZEFERETTI, from the Committee on Rules, submitted a privileged report (Rept. No. 97-740) on the resolution (H. Res. 561) waiving certain points of order against the bill (H.R. 6968) making appropriations for military construction for the Department of Defense for the fiscal year ending September 30, 1983, and for other purposes, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 6755, CENTRAL AMERICA ECONOMIC REVITALIZATION ACT OF 1982

Mr. ZEFERETTI, from the Committee on Rules, submitted a privileged report (Rept. No. 97-741) on the resolution (H. Res. 562) providing for the consideration of the bill (H.R. 6755) to authorize assistance to promote economic revitalization in the Caribbean Basin region, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 3432, WATER RESOURCES POLICY ACT OF 1981

Mr. ZEFERETTI, from the Committee on Rules, submitted a privileged report (Rept. No. 97-742) on the resolution (H. Res. 563) providing for the consideration of the bill (H.R. 3432) to amend the Water Resources Development Act of 1974 relating to planning and evaluating water resources projects, and for other purposes, which was referred to the House Calendar and ordered to be printed.

RESIGNATION OF MEMBER AND APPOINTMENT AS MEMBER OF SELECT COMMITTEE ON AGING

The SPEAKER laid before the House the following resignation as a Member of the Select Committee on Aging:

HOUSE OF REPRESENTATIVES,
August 12, 1982.

HON. THOMAS P. O'NEILL, JR.,
Speaker of the House,
Washington, D.C.

DEAR MR. SPEAKER: Due to a significant amount of unfinished business to which I must attend as Chairman of the Task Force of American Prisoners and Missing in Action in Southeast Asia, as well as the increased demands on my time as a member of the Select Committee on Narcotics Abuse and Control, I respectfully request that I may be relieved of my position as a member of the Select Committee on Aging. I do this with great reluctance, but I sincerely feel that this is the appropriate action to take.

Sincerely,

ROBERT K. DORNAN,
Member of Congress.

The SPEAKER. Without objection, the resignation is accepted.

There was no objection.

The SPEAKER. Pursuant to clauses 6 (e) and (g) of rule X, the Chair appoints the gentlewoman from Massachusetts (Mrs. HECKLER) to the Select Committee on Aging to fill the existing vacancy thereon.

REPORT ON HOUSE RESOLUTION 521 DISAPPROVING PRESIDENT'S RECOMMENDATION TO EXTEND CERTAIN WAIVER AUTHORITY UNDER TRADE ACT OF 1974 WITH RESPECT TO ROMANIA

Mr. GIBBONS, from the Committee on Ways and Means, submitted a privileged report (Rept. No. 97-743) on the resolution (H. Res. 521) disapproving the President's recommendation to extend certain waiver authority under the Trade Act of 1974 with respect to Romania, which was referred to the Union Calendar and ordered to be printed.

PERMISSION FOR COMMITTEE ON ARMED SERVICES TO HAVE UNTIL MIDNIGHT, AUGUST 13, 1982, TO FILE REPORT ON H.R. 6954

Mr. WHITE. Mr. Speaker, I ask unanimous consent that the Committee on Armed Services may have until midnight tomorrow, August 13, 1982, to file a report on H.R. 6954.

The SPEAKER pro tempore (Mr. ECKART). Is there objection to the request of the gentleman from Florida? There was no objection.

PERSONAL EXPLANATION

(Mr. ERDAHL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ERDAHL. Mr. Speaker, this afternoon during rollcall No. 271, the Wilderness Protection Act of 1982, I was unavoidably delayed. Had I been present, I would have voted in the affirmative.

□ 1930

PERMISSION TO FILE CONFERENCE REPORT ON H.R. 6530, ESTABLISHING MOUNT ST. HELENS NATIONAL VOLCANIC AREA

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that the managers of the Committee on Agriculture and the Committee on Interior and Insular Affairs may have until midnight tonight to file a conference report on the bill, H.R. 6530.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington? There was no objection.

NONVIOLENT PROTESTERS ARRESTED FOR ACTS OF CIVIL DISOBEDIENCE

(Mr. VENTO asked and was given permission to address the House for 1 minute and to revise and extend his remarks, and to include extraneous matter.)

Mr. VENTO. Mr. Speaker, I take this time to call attention to the fact that within the hour at Puget Sound a number of nonviolent protesters have been arrested with regard to their acts of civil disobedience in trying to prevent or demonstrate their concern about the loading of a Trident submarine with nuclear warheads.

Mr. Speaker, I wrote to the President last week concerning this, not because I agree with this type of nonviolent display; I believe clearly, as many of my colleagues do, that the answer is within the political process, not within the concept of this type of behavior. But I wrote because I am concerned that the President confronted the problem by increasing the penalty by a factor of 10.

Some weeks before this, the President invoked his powers, which in fact increased the jail term to 10 years and the penalty to \$10,000 fine for this particular act of civil disobedience. I object to that, and I appeal to the fairness of this House, this country, and this President not to impose this type of chilling effect on those who want to exercise and express an opinion which is contrary to ours or contrary to the President's.

Mr. Speaker, the letter which I wrote to the President, along with other material, is as follows:

AUGUST 6, 1982.

HON. RONALD REAGAN,
President of the United States, The White House, Washington, D.C.

DEAR MR. PRESIDENT: Recently, I have learned that under the Executive Order 10173, a Presidential determination was made that the security of the United States is endangered by reason of the planned protests associated with the arrival of the U.S.S. Ohio at Bangor submarine base in the State of Washington.

Mr. President, I am extremely concerned about the arbitrary exercise of this impor-

tant Presidential power that is reserved under 50 USC 191. I am requesting that you rescind this declaration and reconsider the course of action that you have taken to deal so harshly with these expected non-violent protesters.

While I do not agree with the tactics of the civil disobedience expressed by some groups, I am equally appalled at the combative and confrontational policy which is being pursued by your Administration. The proposed protest in the Puget Sound area upon the arrival of the U.S.S. Ohio clearly is an over-ambitious outgrowth of the constitutional guarantees afforded U.S. citizens. These protesters understand that they are involved in an act of civil disobedience and that there is a legal liability associated with their actions.

What concerns me is not the actions taken to provide for the secure passage of the U.S.S. Ohio, but the substantial increase in the penalties that could be imposed for violations of these security measures. This arbitrary action has a chilling effect on any non-violent protest associated with nuclear arms reduction and will lead to expanded confrontation rather than resolution.

These protesters have acted in "good faith" by alerting military authorities and others of their proposed action. Ironically, if they had not publicly stated their proposed action and surprised the military authorities, it is quite likely that the executive action would not have occurred and hence, the legal liability would be considerably less. Is this the signal that we want to send to non-violent protesters? The contingent of protesters, including ministers and families, is hardly a covert group that is a threat to national security. The message they are trying to communicate is a message of peace, a message of nuclear disarmament. Perhaps this is a message, Mr. President, that you and I ought to heed.

Mr. President, I appeal to your common sense and fairness that the policy in these matters ought to be even-handed and not aggravate or compound the problem.

Thank you for your consideration.

Sincerely,

BRUCE F. VENTO,
Member of Congress.

PASTOR'S FLOTILLA TO CONFRONT TRIDENT

(By Jackie Roodler)

The Rev. Jon Nelson is embarking on a carefully planned act of civil disobedience that could send him to jail for 10 years when a brand new Trident nuclear submarine glides through the picturesque Hood Canal near Seattle in the next few days.

Nelson, a member of the politically and religiously active Youngdahl family of Minnesota, will be one of 37 people waiting in three boats to stop the mammoth sub in restricted waters near the Bangor submarine base in Washington State, where it is to be outfitted with 408 nuclear warheads.

Among Nelson's crew members will be his 78-year-old mother, Ruth Youngdahl Nelson of Edina, the national Mother of the Year in 1973 and wife of the late Rev. Clarence Nelson, formerly pastor of Arlington Hills Lutheran Church. Also in the flotilla of protesters will be Nelson's sister, Elizabeth Lompp of Stuttgart, Germany, a participant in the European peace movement.

Nelson believes the Trident and its dozen sister subs represent a "suicidal end of the world."

"The Trident is this country's first first-strike weapon because its missiles are tar-

geted on Russian missiles instead of cities," Nelson said, "That's why it is called a destabilizing force. If the Russians see anything on their computers, they will be much quicker to fire."

When Pentagon officials recently testified before Congress on the Trident's capabilities, Nelson said, they indicated its missiles could kill 60 million to 80 million Russians. Another 10 million to 12 million people in the United States and other free world countries would be killed within two weeks by radiation "drift."

The Pentagon, Nelson said, termed those deaths "acceptable collateral damage."

Nelson, 48, is a graduate of Gustavus Adolphus College in St. Peter. He is now a Lutheran campus pastor at the University of Washington in Seattle. Nelson was in St. Paul Tuesday to attend a Lutheran campus ministers' conference at Macalester College. He admits he comes by his activism naturally.

The nephew of three-term Gov. Luther Youngdahl and numerous other politicians and clergymen, including the Rev. Clifford Nelson, a former pastor at Gloria Dei Lutheran Church who is now pastor at Fort Snelling Chapel. Nelson became involved in social issues as a college student.

He said he worked closely with the late Rev. Martin Luther King, took part in civil disobedience measures during the Vietnam War, and went to jail for 90 days for trespassing at the Bangor submarine base.

And with 13 children—"three born to us," seven adopted and three permanent foster children—Nelson said he and his wife, who also runs a day care center, have a lot invested in the future. "So it's clear to me we have to say no to this insanity."

Blocking the path of the Trident, which stands five stories tall and is longer than two football fields, will be no small challenge. Thirty Coast Guard helicopters and a convoy of helicopters will be escorting it.

"People ask me what good I can do," Nelson said. "I say this is an act of prayer—it's where I belong. I have to be faithful to the human instincts God has given me. But you don't just leap to do civil disobedience. It comes as a last alternative when you work through the system and all political methods fail."

"But it is our conviction that the government, not us, is illegal. If international laws and treaties were given a fair test, it would be found they outlaw weapons that threaten enemy weapons that are in place."

The eventual confrontation, which could take place anytime between Thursday and Sunday, won't catch the government by surprise. About three weeks ago "and without fanfare," Nelson said, President Reagan declared a national emergency in the Puget Sound area and raised the penalty for protesting against the Trident from one year in prison to 10 years and a \$10,000 fine. Injunction to block enforcement of the law, Nelson said. But the judge ordered them to negotiate with the government. The negotiations are still going on.

The 37 protesters, who represent several countries, are part of a group of 100 people who trained at Ground Zero, a center for non-violent resistance training adjacent to the submarine base. They also leased property near the canal, and it's likely they'll launch Nelson's motorized SS. *Plovshares* and two sailboats from there. They've already been warned to expect an attack with water guns, Nelson said.

Why has the group given the government detailed information on its plan? Civil dis-

obedience in the best tradition, Nelson said, "is open, non-violent and accepting of penalties because it's an act of prayer."

Nelson seems to have hope for the future, although he said Reagan represents a "stage of genetic development I don't hold out a lot of hope for."

"The little people will have to mature as a species or we won't survive," he said. "The question is whether political leaders will pick up on it (the growing international anti-nuclear movement) fast enough."

REINTRODUCTION OF NUCLEAR FREEZE RESOLUTIONS

(Mr. MARKEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. MARKEY. Mr. Speaker, today we are reintroducing the nuclear weapons freeze and reductions resolution.

All across this country the movement to freeze the nuclear arms race is growing and growing. Millions and millions of people are standing up and saying enough is enough.

Last week the nuclear freeze resolution was defeated by the slimmest of margins. But for the nuclear freeze movement across this country, the vote was a victory.

It was a victory for those who wanted to bring this issue before the Congress. It was a victory for those who wanted to wake up the White House to the public outrage over its nuclear war-fighting policies. It was a victory for those who are questioning the mindless stockpiling of nuclear weapons, on both sides.

The freeze movement is here to stay. It will not go away.

The movement will only stop when the arms race stops.

That is why we are reintroducing this resolution today. It is the people's resolution. And no one vote, no one defeat, on one massive lobbying effort by the White House is going to bend the will of the people.

H.J. RES. 571

Joint resolution calling for a mutual and verifiable freeze and reduction in nuclear weapons

Whereas the greatest challenge facing the Earth is to prevent the occurrence of nuclear war by accident or design;

Whereas the nuclear arms race is dangerously increasing the risk of a holocaust that would be humanity's final war; and

Whereas a freeze followed by reductions in nuclear warheads, missiles, and other delivery systems is needed to halt the nuclear arms race and to reduce the risk of nuclear war: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That (1) as an immediate strategic arms control objective, the United States and the Soviet Union should—

(a) pursue a complete halt to the nuclear arms race;

(b) decide when and how to achieve a mutual verifiable freeze on the testing, pro-

duction, and further deployment of nuclear warheads, missiles, and other delivery systems; and

(c) give special attention to destabilizing weapons whose deployment would make such a freeze more difficult to achieve.

(2) Proceeding from this freeze, the United States and the Soviet Union should pursue major, mutual, and verifiable reductions in nuclear warheads, missiles, and other delivery systems, through annual percentages or equally effective means, in a manner that enhances stability.

H.R. 5158 HITS THE DUST AGAIN

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. CORCORAN) is recognized for 30 minutes.

● Mr. CORCORAN. Mr. Speaker, the media this week is making U.S. District Court Judge Harold H. Greene almost as famous in the telecommunications field as our friend and colleague TIMOTHY E. WIRTH of Colorado. Since Judge Greene's fair and timely decision on Wednesday, he has been a major newsworthy all over this country, as well as inside this Congress. And since congressional turf is important, especially regarding telecommunications in the U.S. House of Representatives, you can be sure, Mr. Speaker, that our colleague from Colorado has had much to say about Judge Greene's decision. That is not surprising, nor inappropriate. But what is surprising and inappropriate to principle is his change in tune.

Mr. Speaker, H.R. 5158 was designed as a substitute restructuring plan for A.T. & T. from the U.S. Department of Justice antitrust settlement with A.T. & T. for the benefit of many special interests, large and small. After listening to what the proponents of H.R. 5158 are now saying, one would think the Greene decision is the original H.R. 5158. Nothing could be further from the truth. The Greene decision repudiates H.R. 5158 and justifies its ignoble defeat in the Energy and Commerce Committee of this House.

Mr. Speaker, I say this for many reasons, but let me mention just three. H.R. 5158 First, required A.T. & T. to separate its regulated and unregulated activities in ways that many thought were anticompetitive; second, required that the divestiture of the BOC's occur before the assets of the divested companies were valued rather than after those assets were valued; and third, required that so-called embedded terminal equipment would be included in the assets that were transferred to the BOC's.

Our colleague from Colorado has steadfastly insisted that these controversial provisions must remain in the bill on grounds that they constituted an essential supplement to the proposed antitrust agreement which did not contain similar provisions. In his public statement announcing his deci-

sion to withdraw H.R. 5158 from Commerce Committee consideration, Mr. WIRTH referred specifically to each of these provisions. In doing so, however, he made it absolutely clear that he would not, under any circumstances, delete any of them:

Bell has made it very clear, for instance, that it will not tolerate an independent voice for its local companies during divestiture. It will not tolerate effective safeguards to protect ratepayers against its own monopoly. It insists upon taking ownership of installed telephones away from the local companies.

Mr. Chairman, I have been willing to compromise language; I have been willing to compromise substance. I cannot in good conscience, however, compromise fundamental principles.

In the 178-page opinion that accompanied his order requiring certain revisions in the proposed settlement, Judge Green considered carefully the arguments that had been made by those who had filed comments with him urging that he require modification of the decree to include the three controversial provisions referred to above. After a full analysis of all the comments, the Judge decided to require none of the suggested modifications, as discussed below.

Judge Green concluded that it was unnecessary for A.T. & T. to separate its regulated activities from its unregulated activities as several commenting parties had proposed and as Mr. WIRTH had so strongly advocated. The judge noted that such separation might be justified if, after divestiture, A.T. & T. would have monopoly power in any market. But the judge concluded that A.T. & T.'s local telephone service was its only monopoly and, after divestiture of its local telephone operations, this monopoly would be lost:

There is substantial merit in the suggestion that, absent divestiture, A.T. & T. would still possess significant monopoly power, and that whatever competition developed in the past did so despite anticompetitive conditions * * *. But the overriding fact is that the principal means by which A.T. & T. has maintained monopoly power in telecommunications has been its control of the Operating Companies with their strategic bottleneck position. The divestiture required by the proposed decree will thus remove the * * * main barriers that previously deterred firms from entering or competing effectively in the interexchange market * * *. For these reasons, it appears that after divestiture, A.T. & T. will largely lack the monopoly power that the opponents of the decree suggest, and the trend of increasing competition may therefore be expected to continue. [Judge Green Opinion, pp. 70 and 72.]

Similarly, Judge Green considered, and rejected, requests that he demand that the proposed settlement be modified to require that the BOC's be divested prior to the time their assets were valued. The judge rejected this proposal largely because he thought it was a foolish and unworkable idea:

An immediate spin-off of the Operating Companies, while superficially appealing, would be entirely impractical and, notwithstanding the Court's urging, none of those who has advocated such a spin-off has presented a plan that is even remotely feasible. In fact, such an action would leave entirely unresolved all of the problems of administering coordination, interconnection, and continuity of service that are addressed in the proposed decree. [Judge Green Opinion, p. 168-69.]

Judge Green also explicitly rejected requests that he order a modification in the proposed settlement to take away from A.T. & T. all embedded terminal equipment and give that equipment instead to the divested BOC's. The judge ruled that the equipment properly belongs to A.T. & T.:

The embedded CPE consists primarily of Western Electric equipment, and it is therefore appropriately allocated to A.T. & T. [Judge Green Opinion, p. 111.]

Mr. Speaker, as you know in his decision, Judge Greene ordered A.T. & T. and the Department of Justice to make certain modifications within 15 days to the proposed agreement settling the Government's antitrust suit against A.T. & T. What the final result will be I do not know. That properly depends on the parties to the court suit and the judge. However, I do know this: Like the House Energy and Commerce Committee, Judge Greene rejected H.R. 5158. ●

THE FUTURE OF SOCIAL SECURITY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. LATTI) is recognized for 30 minutes.

Mr. LATTI. Mr. Speaker, every congressional office has been receiving countless letters from citizens worried about the future of the social security system. Those who have retired and dependent upon their monthly social security checks are worried about media reports that benefits may be cut and those who have not yet retired worry whether adequate funds will remain in the trust fund to pay them benefits when they retire in the years ahead. Those paying into the fund are concerned over the increased amounts being deducted from their paychecks for social security taxes and are weighing future benefits against today's payments. These are but a few of the many questions being posed across the length and breadth of this land. I have, therefore, taken this time to speak to the social security system and to review its history, its growth, its problems, and its future.

ITS HISTORY

The Social Security Act which passed in 1935 was a relatively simple and straightforward program. It established a social security trust fund into which a worker paid a small premium during his or her working years for an

insurance policy (FICA) which would pay a given sum of money upon retirement at age 65 based upon the amount contributed. At the time of passage, both President Roosevelt and the Congress emphasized that this insurance would be a supplement to other sources of income of the retirees. At the time he signed the law on August 14, 1935, President Roosevelt stated:

We can never insure 100 percent of the population against 100 percent of the hazards and vicissitudes of life, but we have tried to frame a law which will give some measure of protection to the average citizen and to his family * * * against poverty-ridden old age.

When one considers the many additional benefits which have been added to this supplemental retirement program since its enactment, it is needless for me to say that President Roosevelt's admonishment was not heeded.

ITS GROWTH

When the social security program began, a 1-percent tax was paid on earned income up to \$3,000 annually. This represented a total payment of \$30 per worker into the fund each year with the employer making a matching payment. This rate of payment remained until 1950 when it was increased to 1½ percent. Since 1950, both the amount of the tax and the earnings base have been gradually increased. In 1982 the maximum tax is \$2,170.80 on earnings of \$32,400 at a 6.7-percent rate. Under present law, the maximum tax is scheduled to go to \$4,360.50 in 1990.

Not only have the taxes been increased over the years, so have the benefits. Initially benefits averaged \$22.60 a month. The first social security check went to a person in Vermont in January 1940. The recipient had paid \$22 into the trust fund and collected benefits totalling \$20,944.42. The last monthly check, having been gradually increased over the years to \$112.60, was paid in December 1974.

A worker retiring at age 65 in 1982 who has paid the maximum tax on the maximum earnings allowable under the law will have paid \$14,766 into the trust fund. This person will receive \$8,148 annually in monthly payments of \$679 during his or her retirement plus all subsequent increases provided by law. A nonworking spouse of this worker will also be eligible for an additional 50 percent in retirement benefits at age 65 notwithstanding the fact that no contributions were made by said spouse into this account number. The actuaries say a worker retiring today can expect to live an average of 15 years, thereby drawing a minimum of \$122,220 in social security benefits. When the social security system began only 62 percent of all women and 54 percent of all men were expected to live until age 65; today, 82 percent of all women and 68 percent of all men

are expected to live until age 65. This means more people to collect retirement benefits for longer periods than was originally projected.

In 1940 Congress added survivors' benefits. A few years later, coverage was expanded to the self-employed including farmers, doctors, lawyers, merchants, ministers, and others. In 1954, disability benefits were added and later liberalized. The law was changed in 1956 to permit women to retire at age 62 rather than 65 on their own accounts at 80 percent of benefits; in 1961, men were permitted to make the same choice. Two-thirds of all social security retirees are taking advantage of this early retirement which means they pay into the trust fund for a shorter period and collect the reduced benefits for a longer period. Medicare was enacted in 1965 in order to help defray the hospital and doctor bills of people 65 and older. In 1965 student benefits were added to the social security program, liberalized in 1972, and scheduled to be phased out in 1985 after Congress finally realized other taxpayer-financed programs were available.

ITS PROBLEMS

In addition to the tremendous financial demands made on the trust fund by the above program additions, the Congress has from time to time in the past granted increases to the retirees and then in 1975 indexed social security benefits to the Consumer Price Index. From January 1940 to June 1981 social security benefits were increased for a combined total of 788 percent. During that same 41-year period, the Consumer Price Index rose by only 522 percent.

The ratio of workers paying into the trust fund to those drawing benefits has gone from 20 to 1 in 1940 to 3.2 to 1 at the present. By the year 2030, it is projected there will be only two workers to one retiree. This declining ratio of workers to retirees naturally means less money paid into the fund every year despite the increased tax burden being placed on the individual worker.

Thirty-six million retirees are now receiving monthly checks. Social security annual benefit costs have gone from \$33.8 billion in fiscal year 1970 to an estimated \$206.5 billion in fiscal year 1983—including medicare. This will be 26 percent of the total Federal budget for the year.

Notwithstanding the huge tax increases which have taken place over the years to support the program, by 1975 the trust fund was paying out more money than it was taking in. As a matter of fact, it is now paying out \$17,000 more in benefits every minute than it collects in payroll taxes.

The social security system now has three trust funds. The original and largest is the old age and survivors insurance (OASI) trust fund, which provides benefits to retirees, their depend-

ents, and their survivors. In 1956, the disability insurance (DI) trust fund was created to provide benefits to disabled workers and their dependents. In 1965 the hospital insurance (HI) trust fund was created for medicare. Since the OASI trust fund was being rapidly depleted, Congress approved legislation last year to authorize inter-fund borrowing from the financially healthier disability insurance (DI) and hospital insurance (HI) trust funds. This temporary borrowing authority expires in June 1983. At that time the combined reserves of all three funds will be dangerously low and a simple extension of the borrowing authority will not suffice. Total end-of-year combined reserves are projected at \$36 billion—enough to fund less than 9 weeks of benefit payments and medicare reimbursements.

ITS FUTURE

A recent NBC-Associated Press poll revealed that 73 percent of all Americans have no or little confidence that social security benefits will be there and available to them when it is their turn to retire. To these people and to those now on social security worried that their benefits may be cut, let me say no administration or Congress is about to permit the system to go into default with 36 million people drawing checks. At the time President Reagan announced that current retirees would receive their full 7.4 percent cost-of-living increases this year, he stated he was "determined to protect the current benefits of all social security recipients." In order to make certain that current checks go out without being cut and that future retirees receive the benefits for which they are presently being taxed, it is obvious from the facts set forth that attention to the funding problem confronting social security can no longer be ignored by the Congress.

A bipartisan commission has been established and is presently considering various methods to solve both the short-term and long-term financial problems of the system. The commission not only has a December 1982 reporting time, the Treasury Department has already announced that the checks cannot go out next July unless action is taken. Both of these dates will keep the pressure on the Congress as well as the commission. Action by the Congress will come shortly after the commission makes its report.

COMPETITIVE SHIPPING AND SHIPBUILDING REVITALIZATION ACT OF 1982

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Louisiana (Mrs. Boggs) is recognized for 60 minutes.

Mrs. BOGGS. Mr. Speaker, today I am introducing legislation that I believe will help support and maintain

two of this Nation's most valuable yet overlooked assets, the U.S. merchant marine and the shipbuilding mobilization base. In turn, passage of this legislation will help achieve one of President Reagan's goals, as well as a long-standing objective of the Congress; namely, to insure a merchant fleet capable of carrying a fair portion of our Nation's foreign trade. I am joined in sponsoring this legislation by Representatives PAUL TRIBLE, ADAM BENJAMIN, CHARLES BENNETT, DAVE BONIOR, DON BONKER, CHARLIE DOUGHERTY, TRENT LOTT, HAROLD FORD, JOE GAYDOS, TOM HARTNETT, ARLAN STANGELAND, CHARLIE WILSON, DON YOUNG, LEO ZEFERETTI, BARBARA MIKULSKI, GENE SNYDER, GLENN ANDERSON, and JOHN MURTHA.

Enactment of H.R. 6979 would provide the following benefits:

It will strengthen our national defense by providing a bulk fleet that is capable of serving as a naval and military auxiliary in time of national emergency.

It will strengthen the Nation's shipbuilding mobilization base by providing critical work for commercial shipyards, many of which will close if the bill is not enacted.

It will generate new Federal and State tax revenues.

It will provide jobs to thousands of shipyard and shipboard workers at a time when unemployment is at its worst in 30 years.

It will provide substantial work for the hundreds of allied industries dependent upon shipbuilding in every State, and

It will furnish the stated advantages at no cost to the American taxpayer; the U.S. Treasury will spend no additional funds if the bill is enacted.

These benefits would be derived through the transport of 5 percent of our Nation's bulk cargoes on U.S.-flag, U.S.-built ships in 1983 and increased 1 percent per year thereafter until a minimum of 20 percent of U.S. bulk cargoes would be carried on U.S.-flag, U.S.-built ships by 1998.

These modest measures will help fulfill a commitment made by President Reagan in August 1980, covering the points that he specifically stressed as necessary to the vitality of the maritime industry and the Nation:

ON CARGO POLICY

A specific naval-maritime program must be developed that will . . . recognize the challenges created by cargo policies of other nations. The United States has traditionally espoused free trade. However, the international shipping trade is laced with a network of foreign governmental preferences and priorities designed to strengthen foreign fleets, often at the expense of U.S. maritime interests. We must be prepared to respond constructively for our own interests to the restrictive shipping policies of other nations. A major goal of the United States must be to insure that American-flag ships carry an equitable portion of our trade con-

sistent with the legitimate aspirations and policies of our trading partners.

ON SHIPBUILDING MOBILIZATION CAPABILITY

Should our shipbuilding capability continue to decline, America's mobilization potential will be seriously undermined because a large reduction in a skilled shipbuilding workforce today makes any increase tomorrow very difficult. This is a dangerous threat to our national security, jobs, and a key U.S. industry.

ON THE STATE OF THE MARITIME INDUSTRY

America is a maritime nation. Yet our maritime industry is at a critical stage. Ninety-five percent of our trade moves in foreign vessels—a serious situation. Our active U.S.-flag fleet has declined to 533 ships—about 1/4 the total lost (1,787) by our country during World War II.

The United States does not have a merchant fleet capable of moving a significant portion of its foreign waterborne trade, nor does it have a merchant fleet that could function as an effective auxiliary in time of war or national emergency. We do not even have the ability to maintain and preserve a shipyard mobilization base sufficient to meet national defense requirements. Further, U.S. operators and shipbuilders are hard pressed to compete with other countries, such as Japan, where special financing subsidies for domestic vessel construction are available.

I ask my colleagues to give this bill their full consideration. I have compiled information documenting the need for this legislation, and the benefits that will be derived from its enactment. I request that this information, which follows, be inserted into the RECORD in its entirety.

This Nation cannot survive and prosper as an economic and political entity without the ships and shipyards necessary to support national defense and the industrial economy. I strongly believe that the trend we see in American shipping and shipbuilding can and must be reversed. With the support of the Congress, that objective can be achieved.

Mr. Speaker, the purpose of the Competitive Shipping and Shipbuilding Revitalization Act of 1982 is to promote increased ocean transportation of bulk commodities in the foreign commerce of the United States in U.S.-flag, U.S.-built ships, to strengthen the defense industrial base, and for other purposes.

H.R. 6979 would achieve these objectives by requiring all exporters and importers of bulk commodities in the foreign commerce of the United States to ship 5 percent of their cargoes on U.S.-flag, U.S.-built ships beginning in 1983, and to increase the use of U.S.-flag, U.S.-built ships by 1 percent of all bulk cargoes per year until 20 percent of all U.S. bulk tonnage is shipped in U.S.-flag, U.S.-built ships.

Enactment of this legislation would:

Decrease this country's dependence on foreign shipping for strategic materials;

Rebuild the bulk component of the U.S.-flag merchant fleet engaged in international commerce that today numbers a mere 40 ships—most of which are near the end of their useful life; and

Provide needed work for the commercial shipyards located in the following States which compose the Nation's shipbuilding mobilization base: Alabama, California, Connecticut, Florida, Louisiana, Maine, Maryland, Massachusetts, Mississippi, Ohio, Pennsylvania, Rhode Island, Texas, Virginia, Washington, and Wisconsin.

Provide substantial work for support industries such as mining, steel mills, and foundries, as well as manufacturers of fabricated metals/alloys, pipes and valves, propulsions and machines, and other materials and equipment.

WHY IS IT NEEDED?

The ranking of the U.S. bulk fleet among world fleets has fallen. In 1970, the U.S.-flag, liquid and dry bulk fleet engaged in international commerce totaled 81—today it consists of only 48 ships. If provisions are not made for replacement we can most assuredly expect a further, perhaps irreversible decline in the U.S. bulk fleet. In addition:

Since 1950, the U.S.-flag, U.S.-built fleet carriage of U.S. foreign commerce has shrunk from 42 percent to less than 4 percent (1980) of its total foreign tonnage. In the liquid bulk trades, the U.S. carried approximately 3.9 percent and in the dry bulk foreign trades, a mere 1.3 percent. Liberia, Greece, Panama, Canada, Great Britain, Japan, and Norway, however, carry a substantial portion, almost 75 percent, of our foreign waterborne commerce.

Other countries, especially the U.S.S.R., are expanding their bulk fleets as we allow ours to atrophy. More than 270 new shipbuildings totaling approximately 2,610,000 deadweight tons have been added to the Soviet fleet since 1978, with emphasis on bulk carriage. In contrast, U.S. shipyards received orders for only seven bulk vessels last year. If the trend continues, not only will our fleets dwindle, but also our resources to rebuild them.

Our country requires merchant ships capable of serving the national defense. The Falkland Islands crisis proved that naval and merchant vessels are complementary. Warships guard men and cargo, while civilian ships help transport troops and supplies.

Of the 71 critical raw materials needed to maintain our industrial security, 68 are imported. Most of these imports are currently carried on foreign-flag vessels. This dependency on foreign-flag carriage jeopardizes our

ability to function successfully in a national emergency. U.S. national security interests can best be served by an active U.S.-flag, U.S.-built bulk fleet.

Many countries reserve a portion of their seagoing trade for vessels of their national fleets. Even lesser developed countries are planning or proposing cargo-sharing regimes. The United Nations Conference on Trade and Development (UNCTAD) has formulated a code for liner conferences that provides for a large share of general cargoes to be served for nations that adopt the code and that participate in bilateral cargo-sharing agreements. The United States is currently not a signatory to the code.

RANK CHANGES IN THE WORLD'S LEADING MERCHANT FLEETS: 1938—1950—1980

**WHAT ARE THE NATIONAL SECURITY
IMPLICATIONS?**

Shipbuilding, a strong maritime industry and our national security go hand in hand. As the world's leading trading nation, as an island nation of have-nots in the area of strategic commodities, and as the chief guarantor of freedom of the Western World, the U.S. is in dire need of a rational, reasonable and effective maritime industry. Ronald Reagan, August 19, 1980.

In assessing the role of the merchant marine and shipbuilding industry in support of national security, the concept of "national security" must be considered in its broadest context. It must be extended beyond questions of reinforcements and/or resupply of troops overseas . . . to include the contribution made by these industries to the nation's economy. Adm. Isaac C. Kidd, Jr., former NATO Supreme Allied Commander, Atlantic.

A shipyard mobilization base, with a trained pool of shipbuilding labor is a national necessity. Currently, 26 yards make up this base, but many are in danger of closing. This bill would provide substantial building and repair work for U.S. commercial shipyards for years to come.

A liquid bulk ship operating capability is also essential. In the recent Falklands dispute, three of every four British ships were commercial vessels. Of

these, almost half were tankers. Vice Adm. J. Kent Carroll, commander, the Military Sealift Command, has called the need for the right type of U.S.-flag tankers one of the most pressing current needs for military planners. This bill would help meet that need.

Because we import vast quantities of strategic commodities, and because most of these move in foreign-flag dry bulk ships, we are vulnerable to a cutoff of supplies that are vital to the U.S. industrial base. This vulnerability increases when one considers that the Soviet Union is more self-sufficient with regard to strategic raw materials than any other nation in the world, relying on foreign sources for only seven strategic minerals. This bill would substantially reduce our vulnerability to a supply cutoff. Further, U.S. Industries involved in production of military products would suffer in the event of supply cutoff. The inability of these industries to continue to import and export goods would also strike a serious blow to U.S. defense capabilities.

USES FOR U.S. IMPORT OF SPECIFIC METALS

Material	Material usage
Antimony	Flame retardant batteries, ceramics, chemicals.
Asbestos	Pipe, floorings, roofing, friction products, insulation, coatings.
Bauxite and alumina	90 percent for aluminum; remainder for chemicals, abrasives, refractories.
Cadmium	Plating, batteries, pigments.
Cesium	R & D in MHD power.
Chromium	Construction, machinery, transportation, paints, chemicals, ceramics.
Cobalt	Aerospace, cutting tools, electrical, magnetic materials, catalysts.
Columbium	Construction, petroleum industry, transportation, machinery.
Copper	Electrical, construction, machinery, transportation.
Corundum	Grinding and polishing optical components, fabricated metal products.
Diamond (industrial)	Machinery, transportation equipment, grinding and cutting equipment.
Fluorspar	Steel and aluminum production, fluorine compounds.
Gallium	Electronics.
Gold	Jewelry and arts, electronics, dental, investment bullion.
Gypsum	Building products, agriculture.
Iron ore	Pigments, titanium metal, drilling mud, chemicals.
Lead	Steel.
Lithium	Batteries, paint, chemicals, ammunition, construction, electrical.
Magnesium	Aluminum production, glass, ceramics, lubricants.
Manganese	Refractories, magnesium compounds.
Mercury	Steel production, batteries, chemicals.
Sheet mica	Electrical, paint, chlorine production.
Molybdenum	Electric, electronics.
Nickel	Machinery, transportation, oil and gas industry, transportation, chemical industry, electrical, construction materials.
Phosphate rock	Fertilizers, animal feed, food products.
Platinum	Automotive, chemical.
Potash	Fertilizer.
Salt	Chemical industry, highway deicing, food products.
Selenium	Electronics, glass, chemicals, pigments.
Silver	Photography, electrical, silverware, solders.
Strontium	Color TV tubes, signals, pyrotechnics.
Sulfur	Agricultural chemicals, chemical products.
Tantalum	Electronic components, machinery, transportation.
Tin	Cans and containers, electrical, construction, transportation.
Tungsten	Metal working and construction machinery, transportation, lamps, electrical.
Vanadium	Steel and titanium alloys, catalyst.
Zinc	Construction materials, transportation and electrical equipment, machinery, chemicals.

WHAT ARE THE ECONOMIC BENEFITS?

Enactment of H.R. 6979 offers numerous important economic benefits to the United States at no cost to the U.S. Treasury.

Passage of this bill would provide for:

Construction of 158 bulk ships of 120,000 deadweight ton capacity by 1998. The availability of assured cargo would stimulate investment in the construction of vessels in U.S. shipyards to meet the need for new tonnage and to replace existing tonnage that becomes obsolete.

Increased business to shipbuilding support industries. The shipbuilding industry has a great impact on other industrial concerns in the United States. The Defense economic impact modeling system, prepared by the Office of the Secretary of Defense, identifies mining, steel mills, and foundries as support industries along with fabricated metals/alloys, pipes and valves, machinery and propulsion, and semiconductor as supporting products. According to this source, each dollar invested in the shipbuilding industry, yields an additional dollar generated throughout the private sector.

Thousands of job opportunities for American workers, in maritime-related service, supply and material industries. This legislation would create 146,150 man/years of employment in American shipyards, as well as 6,162 seagoing jobs. Especially important, more than 200,000 existing American jobs in ship construction and repair, ship operation, and maritime-related service, supply, and material industries would be saved. Absent this legislation, jobs will be lost. One group that undoubtedly would be hit hardest by an employment cutback would be minorities. Approximately 28 percent of the U.S. shipyard work force and approximately 17.5 percent of the shipboard work force consists of minorities.

Millions of dollars annually to the U.S. Treasury through corporate taxes on both shipbuilding and shipping profits and income taxes on shipyard workers and seamen. The Treasury Department has estimated that multinational companies escape over \$100 million per year in U.S. taxation by registering vessels under foreign flags and using foreign crews. Subpart F of the Internal Revenue Code provides a special exclusion for shipping income of foreign-based companies. This exclusion amounts to an indirect subsidy of foreign-flag shipping.

A boost in our international balance of payments. When U.S. companies and U.S. crews are used to transport America's imports and exports, dollars are retained in or transferred to the American economy via the services U.S. operators provide to foreign countries. These dollars are used to purchase American goods and services. For the past decade, however, more money has been paid out to foreigners for ocean transportation than to domestic operators. Of the \$8 billion

worth of shipping services recorded in the balance of payments for 1980, only \$2.6 billion was paid to U.S.-flag carriers.

The remaining \$5.4 billion was paid to foreign carriers, leaving a deficit of some \$2.8 billion. If U.S.-flag vessels had a larger share of American bulk cargo imports and exports, this trend would be quickly reversed.

PROJECTED EFFECTS OF 20-PERCENT BULK CARGO RESERVATION

WHAT STATES WOULD BENEFIT FROM THE BILL

Shipyards and their related allied industries are scattered in approximately 26 States across the Nation. Enactment of this bill would have a positive economic impact on these shipyards and their allied industries. Without such legislation, the impact on the shipbuilding industry would be severe. Twelve of the twenty-six active shipyards would be in danger of closing, perhaps permanently. In turn this could damage the growth of many companies directly and indirectly related to the shipbuilding industry.

WHAT DO OTHER COUNTRIES DO

Maritime nations throughout the world have enacted legislation reserving a substantial portion of trade for their own merchant fleets.

At least 45 maritime countries reserve cargo for their fleets through laws or discriminatory practices.

Ten of the thirteen members of the Organization of Petroleum Exporting Countries have enacted cargo preference laws or decrees.

Communist countries, especially the Soviet Union, have effectively supported their merchant fleets through government control of all cargo booking functions.

Other non-Communist nations routinely route cargoes to their own flag ships by controlling cargo booking functions through law. This list includes major oil exporters such as Algeria, Iran, Libya, and Nigeria.

Major shipbuilding nations, including Japan, Korea, and Taiwan, offer heavily subsidized financing plans to shipping companies placing orders in their domestic shipyards. This allows foreign shipyards to offer effective interest rates substantially lower than U.S. yards can offer.

The major trading partners of the United States support their merchant fleets through subsidies, generous tax advantages, and investment financing assistance.

Nations such as Liberia and Panama offer total corporate tax exemption to attract U.S. companies to register their merchant tonnage under the Liberian or Panamanian flag.

The United States is the world's greatest trading nation. Yet, U.S. vessels carry less than 4 percent of the total tonnage moving in U.S. foreign trade. In the liquid bulk arena, U.S. vessels carried only 3.9 percent of the total foreign trade in 1980. In the dry bulk trades, this figure falls to a mere 1.3 percent. Liberia, Greece, and Panama carry approximately 53 percent of U.S. foreign oceanborne commerce, primarily in the bulk trades, while 43 percent is shared by 87 additional countries.

Other maritime nations carry significantly more of their own foreign oceanborne trade than the United States. For example, the Soviet Union transports 50 percent on its state vessels; Great Britain transports 32 percent on its merchant vessels; Japan carries 39 percent; Greece carries 48 percent; and Norway carries 37 percent.

CARGO PREFERENCE POLICIES OF OTHER COUNTRIES

Algeria—100% carriage of liquefied natural gas shipments.

Argentina—50% of all trade, 100% of government cargoes.

Brazil—40% of all trade, 100% of government cargoes.

Chile—50% of all trade.

Colombia—50% of all trade.

Ecuador—50% of all trade, 100% of all hydrocarbons.

France—66% of oil imports, 50% of coal imports.

Gabon—100% of government cargoes, 40% of liner cargoes through unilateral implementation of UNCTAD.

Indonesia—100% of fertilizer, 45% of European cargoes.

Korea—100% of certain specified cargoes.

Kuwait—Oil contracts specify preference for Kuwait-flag.

Mexico*—100% of government cargoes, 100% of oil exports.

Morocco—40% of all imports, 30% of all exports.

Peru—50% of all trade.

Philippines*—100% of government cargoes.

Saudi Arabia—Royal decree providing preference for all cargoes.

Spain—Limited preference on certain imported commodities.

Thailand—100% of all government cargoes.

Venezuela—50% of all trade, 100% of government cargoes.

Zaire—100% of government cargoes.

ABSENCE OF THE FREE MARKET

The realities of world shipping clearly demonstrate that the free market theory is not the mechanism governing the supply and demand of vessels in international trade. Government intervention in the form of subsidies, tax-breaks, cargo allocations, and other preferential treatment has altered the way business is done in the shipping market. Furthermore, many socialist governments operate their state-owned fleets with political rather than profit-oriented goals in mind. Vessels of these fleets charge rates well below those rates that a free market would produce. The result is a market dominated by the actions and policies of national governments intent upon building and maintaining merchant fleets under their national flags regardless of the cost.

Other nations, pursuing valid national security goals, have fundamentally biased the international market in shipbuilding and ocean transportation services. France, for example, pursues an aggressive maritime growth policy including a cargo preference plan reserving two-thirds of oil imports and 50 percent of coal imports for French-flag vessels. France carries approximately 25 percent of its total foreign trade aboard French-flag vessels.

Government-backed low interest financing for shipbuilding, as practiced by countries such as Japan and Korea, among others, creates demand for their shipbuilding services. Foreign shipowners or Korean exporters can receive loans from the Korean Export-Import Bank for up to 80 percent of the cost of vessels with repayment

*Mexico and the Philippines are currently updating their laws to reserve a greater percentage of their commerce for their domestic fleets.

over 8 years at interest rates between 8 and 8.5 percent.

Other countries use national standards policies, taxation policies, regulatory frameworks, insurance practices, and subsidies to promote their own maritime services. Shippers covered by the government-backed French export insurance company, Coface, must make all shipments on French-flag vessels. Brazil levies a stamp tax on freight carried in non-Brazilian bottoms. Argentinian regulations include reduced port charges, rebates on wharfage fees, and elimination of consular fees for national-flag vessels.

State-controlled fleets, such as the U.S.S.R.'s, are 100 percent government subsidized, can operate without a primary regard for profit, and have seriously eroded market opportunities for free world maritime fleets.

WHAT ARE THE COSTS OF THE BILL

COSTS TO THE GOVERNMENT

The Treasury will expend no additional funds if this legislation is enacted.

The U.S. Treasury will, in fact, receive added revenues from corporate and personal taxes paid by shipyards, shipping companies, supporting industries, and their employees.

Without this legislation, the U.S. Government will be burdened with the added costs associated with high unemployment in shipbuilding and related industries. An increase in unemployment affects the Federal Government's costs associated with Medicaid, unemployment insurance, food stamps, and interest charges on the national debt.

State governments carry a large share of the strain of unemployment, too. If, for example, two shipyards were shut down, State costs for unemployment compensation in the first year alone could exceed \$40 million. In addition, U.S. Government costs for food stamps could exceed \$10 million, bringing the total to \$50 million.

Approximately 13,000 additional shipboard and shipyard workers would be hired as a result of this legislation. If those individuals who would be added to the employment rosters by newly created jobs under this bill were left on unemployment instead, the costs associated with unemployment and food stamps benefits could approach \$80 million for a 1-year period.

COST SAVINGS

Series construction of the 158 ships required under this program will reduce current U.S. shipyard costs by 15 percent. This cost reduction is based on a minimum of 10 ships of similar design being constructed by each individual shipyard. In addition, with this commercial shipbuilding program, shipyard overhead applied to naval work would be reduced.

A reliable, long-term workload would increase shipyard labor productivity,

and effect reduction in component costs of shipyard suppliers and manufacturers, as well as create the necessary stability for increased capital improvements in facilities.

The steady workload of this program will create conditions similar to those under the very successful mariner construction program of the fifties, which had standard designs and common components. This will significantly reduce construction times with attendant cost savings.

Several maritime unions have pledged:

Further reductions in manning scales. The union training schools will provide skilled personnel to crew the newer and more technologically advanced vessels.

Contractual arrangements consistent with required skills and the need for higher productivity.

No interruption of service for long-term contractual arrangements.

Joint contracts for each new vessel providing for a top-to-bottom, three-crew, two-ship operation, whereby three crews rotate between two ships on a regular basis. This increases familiarity with the vessels, and productivity of the seamen. Present daily crew costs for U.S. bulk carriers built in the 1970's and operating with a shipboard work force of 26 averages \$6,398.06 per day. Proposals being made in the context of this bill would reduce crews from 26 to 22. Through crew reductions and other measures, average costs would be reduced to \$4,847.79 per day, a savings of \$1,550.27 per vessel per day. On an annual basis this would reduce operating costs by approximately \$565,000 per vessel.

COSTS TO THE SHIPPER

The U.S.-foreign cost differential per ton of cargo on a new 120,000 DWT dry-bulk vessel, produced in a 10-ship series, is estimated by the U.S. Maritime Administration to be \$10.98. When the 15 percent cost-savings by shipbuilders and labor for the program are applied, the differential, is reduced to \$8.05 per ton. If applied to the total value per ton of bulk exports and imports in 1982, this differential would represent only a 3-percent increase.

A 1977 GAO report estimated that a 20-percent U.S.-flag transport requirement would add eight-tenths of 1 cent per gallon to the cost of petroleum.

The bill would establish policy to insure that importers and exporters of bulk commodities would be able to ship goods on U.S.-flag, U.S.-built vessels. To this end, the Department of Transportation would review U.S. bulk ship operation and shipbuilding activities annually.

IS THIS TOO MUCH TO PAY FOR NATIONAL SECURITY

Mr. Speaker, the merchant marine, ocean transportation and shipbuilding

mobilization base are major logistical elements of this Nation's commercial and strategic security. The declaration of policy (title I) of the Merchant Marine Act of 1936 delineates this national policy. I believe that the U.S. merchant fleet and shipbuilding industry can be revitalized through this legislation to meet the national requirements for an efficient and well-equipped merchant fleet. In summary, I urge my colleagues to consider these points:

In light of the national security benefits to be gained this legislation is an inexpensive way to foster the development of two essential components of national defense, the U.S.-flag, U.S.-built merchant marine and the U.S. commercial shipyard industry.

Failure to enact this bill could add to the continuing strain of a declining U.S.-flag, U.S.-built merchant fleet and shipyard mobilization base and increase U.S. dependence on foreign carriage, of both imported and exported bulk commodities. This could pose a situation in which this Nation would have virtually no control.

Enactment of this bill would stimulate vital industrial segments of this Nation's economy, increase employment, impact beneficially on our balance of payments, add tax dollars to the U.S. Treasury, and foster the growth of the U.S.-flag bulk merchant fleet.

This legislation provides for a U.S.-flag merchant marine and shipbuilding mobilization base capable of fulfilling national requirements during peace and war, both industries that are indispensable to this Nation's military and defense structure.

In order to afford the costs of an adequate defense, this Nation must have the means to guarantee its economic security. As this legislation would result in no additional cost to the U.S. Treasury, and only a very low percentage increase in cost to the bulk commodity exporters and importers, it is obvious that we cannot afford the alternative substantial dependence on foreign shipping, even possibly including ships of the Soviet bloc.

In conclusion, Mr. Speaker, I would like to have the text of the Competitive Shipping and Shipbuilding Revitalization Act of 1982 appear in the RECORD along with a section-by-section analysis of the legislation and a series of questions and answers on the proposal.

Thank you.

The material follows:

H.R. 6979

A bill to promote increased ocean transportation of bulk commodities in the foreign commerce of the United States in United States flag ships, to strengthen the defense industrial base, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of

America in Congress assembled, That this Act may be cited as the "Competitive Shipping and Shipbuilding Act of 1982".

FINDINGS, PURPOSES, AND POLICY

SEC. 2. (a) The Congress finds and declares the following:

(1) The United States is totally dependent upon foreign-flag bulk shipping services in that United States-flag vessels now carry less than 4 percent of its bulk import and export commodities in international trade.

(2) Virtually all bulk imports of the United States are critical to American industrial production or to the maintenance of adequate energy supplies.

(3) Bulk exports of the United States contribute substantially to the United States balance of trade, provide major sources of employment in the United States, and contribute to the food supply and other essential requirements on a worldwide basis.

(4) The United States cannot afford to rely heavily upon foreign sources to provide the transportation services needed to maintain the flow of essential bulk imports and exports if it is to ensure its economic and political independence in times of emergency.

(5) The United States has substantially lost and is continuing to lose the major portion of revenues generated by the carriage of its bulk imports and exports in international trade.

(b) It is therefore declared to be purpose and policy of the Congress in this Act—

(1) to take immediate and positive steps to promote the orderly and rapid growth of the bulk cargo carrying capability of the United States merchant marine in order to transport 20 percent of our bulk imports and exports in United States flag ships within fifteen years or less;

(2) to assist and cooperate with the importers and exporters of bulk commodities so that they will be able to ship their goods in United States flag ships in a commercially practicable manner; and

(3) to encourage the construction of new efficient and environmentally safe bulk carrying merchant vessels in United States shipyards.

DEFINITIONS

SEC. 3. As used in this Act—

(1) The term "United States flag ship" means an ocean going ship or vessel of whatever description having United States citizen crews and built in, and documented under the laws of, the United States, and with respect to the construction, hull, superstructure, main propulsion machinery and other machinery articles or components of which not more than 50 percent of the cost thereof is attributed to foreign manufacture.

(2) The terms "bulk commodity" and "bulk cargo" mean cargo transported in bulk without mark or count by an oceangoing ship or vessel of whatever description in the foreign commerce of the United States.

CARRIAGE OF BULK CARGOES ON UNITED STATES FLAG SHIPS

SEC. 4. (a) For the purpose of this section, any percentage of bulk commodities shall be measured by the aggregate tonnage of all such shipments landed at the port at which they enter or leave the United States.

(b) In calendar year 1983, at least five percent of all bulk commodities moved by water and imported to or exported from any point in the United States shall be carried on United States flag ships.

(c) In each calendar year after calendar year 1983, the percentage set forth subparagraph (b) of this section shall increase by one percent until the percentage of bulk commodities carried on United States flag ships during any year is 20 percent.

(d)(1) The Secretary of Transportation, in consultation with representative maritime industry associations of owners, operators, shipbuilders, manufacturers, and labor, shall prepare estimates of current and projected costs of United States flag bulk ship operation and United States bulk shipbuilding.

(2) The estimates prepared under paragraph (1) shall be updated on an annual basis and shall be considered as information vital to the security of the United States. As such, these estimates shall not be released to foreign interests under any circumstances.

(3) In order for the percentages of bulk cargo imports and exports required to be carried in United States flag ships as set forth in this section to be enforced, the actual cost of United States flag bulk ship operation and United States bulk shipbuilding under this program shall be at least fifteen percent below the estimates of projected costs determined as above. To the extent that the percentages of United States flag carriage are not enforceable, they shall be credited against the annual required percentage for each importer and exporter concerned.

REPORTING OF AMOUNT SHIPPED ON U.S. FLAG SHIPS

SEC. 5. (a) Any person, corporation, partnership or other business entity which imports or exports bulk commodities in the foreign commerce of the United States, and whose volume of business exceeds \$1 million annually (in imports or exports or any combination thereof) shall submit to the Secretary of Commerce, on or before January 31 of each year, a sworn statement certifying that the percentages of its imports and exports carried on United States flag ships in the preceding year were at least the percentage of trade reserved to United States flag ships under section 4 of this Act.

(b) Any exporter or importer who fails in any calendar year to use United States flag ships to carry the percentage of his imports or exports required under this Act shall, in the next calendar year, use exclusively United States flag ships to carry all shipments until he has recouped the deficiency from the preceding year. Any importer or exporter who fails to recoup the deficiency and meet the required percentage in this second calendar year shall be subject to the penalties set forth in subsection (c) of this section.

(c) Any exporter or importer who fails to comply with the requirements of this Act shall be prohibited from importing to or exporting from the United States any bulk commodities for a period of one year.

(d) In the event that the Secretary of Commerce has reason to believe that any person or business entity has violated the terms of this Act, he shall within thirty days investigate the possible violation. In the event that his investigation develops any substantial evidence of a violation, the Secretary shall appoint an administrative law judge who shall notify said person of the suspected violation and afford him reasonable opportunity to refute the charges at a public hearing. The judge shall then promptly determine whether the charges were well founded and issue a decision either suspending the person from import-

ing and exporting for a period of one year or dismissing the charges.

(e) Any person suspended from importing and exporting may appeal the decision of the judge to the United States district court for the District of Columbia within thirty days of being notified of the decision. Such appeal may be heard pursuant to chapter 7 of title 5, United States Code, and section 1331 of title 28, United States Code.

(f) The Secretary of Transportation is hereby authorized to issue such regulations as may be necessary to carry out the provisions of this Act.

COMPETITIVE SHIPPING AND SHIPBUILDING ACT OF 1982—SECTION-BY-SECTION ANALYSIS

SECTION 1. COMPETITIVE SHIPPING AND SHIPBUILDING ACT OF 1982

SECTION 2. FINDINGS, PURPOSES, AND POLICY

In Section 2(a) the Congress declares that: the United States is dependent upon foreign-flag bulk shipping services; U.S.-flag vessels now carry less than four percent of its bulk import and export commodities; virtually all bulk imports are critical to American industrial production or maintenance of energy supplies; bulk exports contribute substantially to the U.S. balance of trade, provide major sources of employment, and contribute to the food supply on a worldwide basis; the United States cannot rely upon foreign sources to provide transportation services in times of national emergency; and, the United States has substantially lost the major portion of revenues generated by the carriage of its bulk imports and exports in international trade.

In Section 2(b) the Congress declares that the purposes and policy of the Act are to: take immediate and positive steps so as to transport 20 percent of U.S. bulk imports and exports in U.S.-flag ships within 15 years or less; make it possible for importers and exporters to be able to ship their goods in U.S.-flag ships in a commercially practicable manner; and, encourage the construction of bulk carrying merchant vessels in U.S. shipyards.

SECTION 3. DEFINITIONS

Section 3(1) defines "United States flag ship" as an oceangoing ship having U.S. citizen crews and built in, and documented under U.S. laws. Section 3(1) also requires that no more than 50 percent of the total materials and components of the vessel can be attributed to foreign manufacture.

Section 3(2) defines the terms "bulk commodity" and "bulk cargo" as cargo transported in bulk without mark or count by an oceangoing ship engaged in the foreign commerce of the United States.

SECTION 4. CARRIAGE OF BULK CARGOES ON U.S. FLAG SHIPS

Section 4(a) makes it clear that when bulk commodities are expressed as a percentage, that percentage shall be measured by adding the tonnage of all bulk shipments coming into or leaving the United States.

Section 4(b) requires that in 1983, at least five percent of all bulk commodities moved by water and imported to or exported from the United States must be carried on U.S.-flag ships.

Section 4(c) requires that the five percent figure set forth in Section 4(b) be increased by one percent each year until a maximum of 20 percent is reached. Thus, in 15 years, a minimum of 20 percent of all U.S. bulk imports and exports will be transported on U.S.-flag ships.

Section 4(d) requires the Secretary of Transportation, in consultation with speci-

cally cited members of the maritime industry, to prepare estimates of current and projected costs of U.S.-flag bulk ship operation and U.S.-bulk shipbuilding. These estimates will be used to determine the enforceability of the Act against each importer and exporter concerned. The estimates shall be updated on an annual basis and shall remain confidential. As required by Section 4(d)(3), before the Act is enforceable, the actual U.S. cost of bulk ship operation and shipbuilding must be at least 15 percent below the determined estimates. To the extent that the required percentages are not enforceable, those percentages shall be credited against the annual required percentage for the following year.

SECTION 5. REPORTING OF AMOUNT SHIPPED ON U.S. FLAG SHIPS

Section 5(a) sets forth the reporting requirements for determining whether or not the importer or exporter has met the required percentage of trade reserved to U.S.-flag ships. The provisions and reporting requirements of the bill are applicable to U.S. import and export bulk shippers in the foreign commerce, whose volume of business exceeds \$1 million annually.

Section 5(b) requires that any exporter or importer who fails to carry his required percentage of cargo on U.S.-flag ships shall, in the next year, use exclusively U.S.-flag ships to carry all shipments until he has recouped the deficiency from the preceding year. Should the deficiency not be recouped in the second year, the party will be subject to the penalties set forth in Section 5(c).

Section 5(c) provides an enforcement mechanism whereby any exporter or importer who fails to comply with the Act shall be prohibited from importing or exporting bulk commodities for a period of one year.

Section 5(d) gives the Secretary of Commerce the authority to investigate any possible violations of the Act. Should substantial evidence of a violation be shown, an administrative law judge shall be appointed and the party under investigation shall be afforded an opportunity to refute the charges at a public hearing. A prompt determination shall be made and a decision issued to dismiss the charges or to exercise the penalty provisions of the Act.

Section 5(e) provides for an appeal process whereby any person suspended from importing or exporting may appeal the decision to the United States District Court for the District of Columbia within thirty days of being notified of the decision.

Section 5(f) authorizes the Secretary of Transportation to issue such regulations as may be necessary to carry out the provisions of the Act.

QUESTIONS AND ANSWERS

What is "bulk cargo"?

Bulk cargoes are raw materials, either liquid or dry, usually shipped in large quantities (full shiploads) between various ports. The major liquid bulks are oil and chemicals; the major dry bulks are minerals and agricultural products.

How many bulk ships are there in the United States?

There are only 40 oceangoing bulk ships operating in the foreign trade and registered in the United States.

What size fleet will the legislation generate?

This legislation will require a U.S.-flag bulk fleet operating in the foreign trades of at least 184 vessels by 1998.

What percent of U.S. foreign oceanborne commerce is carried on U.S.-flag ships?

Only 3.6 percent of all U.S. foreign oceanborne trade is carried on U.S.-flag ships. Approximately 3.9 percent of U.S. oceanborne foreign liquid bulk and 1.3 percent of U.S. oceanborne foreign dry bulk is carried on U.S.-flag ships.

If the "Competitive Shipping and Shipbuilding Revitalization Act of 1982" were enacted, what portion of U.S. bulk cargoes would be required to move on U.S.-flag vessels?

The bill provides for five percent of all bulk cargoes to be carried on U.S.-flag vessels in 1983 and increased by one percent annually until a minimum of twenty percent of bulk imports and exports is carried by the U.S. fleet. This goal would be reached by 1998.

What allied industries would be affected by this bill?

The Defense Impact Modeling System, prepared by the Office of the Secretary of Defense, identifies mining, steel mills and foundries as supporting industries, along with fabricated metals/alloys, pipes, and valves, and semi-conductions as supporting products for shipbuilding. It estimates that for each dollar that goes directly into the shipbuilding industry an additional dollar is generated throughout the private sector.

How would a shipper be penalized if he did not comply with the Act?

At the outset, the bill is designed to permit flexibility in meeting requirements. Should a shipper fail to comply with the designated share of cargo on U.S.-flag vessels, he would be permitted to make up the difference by carrying an additional percentage the following year. However, in the next year, if he again failed to ship the proper percentage of his exports and/or imports on U.S.-flag, U.S.-built vessels, he would be prohibited from carrying oceanborne foreign bulk cargo for a period of one year.

Does the "free market" really exist in international trade?

The answer is "no". International trade does not operate in a free and open market because of protectionist mechanisms such as cargo preference, bilateral shipping agreements, favorable tax and tariff policies, and preferential currency and customs treatments administered by foreign governments in their own interests.

How many nations reserve cargo for their national flag fleets?

At least 45 nations reserve cargo for their national flag fleets.

What is the cost to the government of this legislation?

The U.S. Treasury will expend no additional funds if this legislation is enacted.

Why is it mandatory that we maintain our shipbuilding capabilities and our shipbuilding mobilization base?

It is important in order to support our national security and economic needs in the event of war or emergency as well as to avoid future problems in recruiting, training and retaining shipyard workers, and to provide work for support industries essential to the economy.

Why are bulk vessels essential to national security?

Bulk vessels are essential for the transport of strategic raw materials used in defense planning and are designed to carry bulk military cargoes in time of national emergency. Bulk vessels can also be designed with certain "National Defense Features" to make them quickly and easily converted to carry non-bulk cargoes that will be needed in a defense emergency.

How can we reach our goal of a strong merchant marine, as required for the national security?

Many approaches have been tried, both in the United States and in other countries. The single most effective method is to reserve a fair and necessary share of cargoes for the national-flag fleet. This bill would achieve that for the United States, in much the same way that foreign nations successfully do for their own fleets.

Mr. Speaker, at this point I would like to yield to my distinguished colleague, the gentleman from Pennsylvania (Mr. GAYDOS).

Mr. GAYDOS. Mr. Speaker, I want to thank my colleague for yielding and wish at this time for the record to commend her for her outstanding leadership in this matter.

Repeatedly, this is not the first time. And I think the gentlewoman from Louisiana should be especially commended for leading this attack on the problem and taking out the special order today.

Mr. Speaker, I am a sponsor of the Competitive Shipping and Shipbuilding Revitalization Act because it clearly and squarely and effectively addresses the world and world trade as they exist today.

It is an act of self-help of the kind that must be repeated dozens of times across the industrial base if the United States is to increase its chances of surviving other than as a colony of more aggressive industrial nations.

What we have today is a world governed largely by European principles.

We have a world economy where strategies and tactics are based more on Karl von Clausewitz's book, "On War," than on the high-principled "Wealth of Nations."

We have a world in which the precepts of Niccolo Machiavelli on the survival of the state mean more than alliances and highly principled economic theories.

What we have is economic warfare on a complacent and slumbering United States.

This bill recognizes that fact and moves to shore up one point of attack.

Furthermore, it does nothing more than most of our political friends and economic enemies do.

In fact, it requires less than their measures.

To determine what our friends do, let us examine the policy of one of Europe's leading maritime nations. This nation ranks well above the United States in bulk carriers.

First, this nation is not England, Europe's traditional maritime power.

This nation is France, which has little sea-going tradition.

The French require that 66 percent of all oil imports and 50 percent of all coal imports—and I guess that includes coal from the United States—travel in French-flag ships.

This policy offends high principled theories about competition and open markets and the way the theorists want the world economy to work.

But it dovetails nicely with Mr. Mitterrand's announced plan to have France reconquer its economy.

And it recognizes fully the following advice from "The Prince" by Machiavelli:

There is such a GAP between how one lives and how one ought to live that anyone who abandons what is done for what ought to be done learns ruin rather than preservation.

American policymakers have ignored what has come to be customarily done around the world in favor of what high-principled theory says ought to be done.

And both our merchant marine and our shipbuilding industry have learned ruin.

Meanwhile, the French have a maritime-growth policy. Approximately one-quarter of France's foreign trade travels under the French flag.

Has anyone ever envisioned Mexico as a maritime force?

All of the oil Mexico exports must move in Mexican bottoms.

Furthermore, 10 of the 13 nations in OPEC have cargo preference laws.

As an Arabic proverb says:

When you are an anvil, you will suffer like an anvil; when you are a hammer, you will hit like a hammer.

You see, in matters of moving goods in world trade—as in world trade itself—the United States is an open and free market.

But the rest of the world is largely closed.

If not by law, then as custom, Japan carries 39 percent of its oceanborne foreign trade in Japanese ships and Great Britain carries 32 percent.

About 45 maritime countries reserve cargo for their fleets to help insure they have fleets, I am told.

The United States does not.

And the United States rapidly is losing its fleet.

This bill would begin a transformation from anvil to hammer.

As for shipbuilding, the magazine Business Week took a look last June and came to the following conclusion:

Not even subsidies of up to 50% of the cost of a ship have kept U.S. yards competitive with countries like Korea and Japan where the industry is even more heavily subsidized.

Mr. Speaker, I repeat for emphasis, Korea and Japan are even more heavily subsidized, and this makes it a question of something other than efficiency and comparative advantage.

In addition, these larger subsidies also come into play when other nations—and American companies—go ship shopping.

The warlike practices being used in shipbuilding were drawn to my atten-

tion not long ago by the President of Hudson Shipbuilders of Pascagoula, Miss.

Hudson makes utility-supply vessels for offshore operations, and its workers are trying to compete in the export market.

And the following is an answer Hudson got on a bid last April:

FYI, your prices were very favorable compared to the Japanese. Japanese finance of 80% loan at 8.75% over seven years won the day in the end.

Hudson's president wrote that Japanese exporters can provide Government-guaranteed loans in ways that effectively provide 100 percent financing for purchasers of Japanese ships. This Japanese industry has been heavily capitalized by the Government.

The Koreans make similar guarantees, Hudson's letter noted.

Furthermore, the practice is not confined to boats and small ships. I understand it applies to anything that floats.

So keeping work in their yards is not a matter of pure free-market economics as it is here but a matter of political policy.

And the policy is not only to keep their work for their yards, but to gather in all of the world's work that they can—gather it with subsidies and cartels and any other weapon they can forge.

Others will speak on defense implications, Mr. Speaker, but I want to touch them in passing.

In the Falklands war, the British commandeered the *Queen Elizabeth* and certain merchant ships to move their troops and supplies.

Should the United States face such a crisis as things stand today, we would have no choice but to do what the British did.

We, too, would have to commandeer the *Queen Elizabeth* and certain of England's merchant ships—or try to.

You see, we are not strong enough in this regard to rely on our resources for a force of more than 8,000, I have read.

This bill would make us stronger.

But the thing I like best about the Revitalization Act is the self-help it offers.

It is one strand of the bootstraps that American industry needs to pick itself up off the ground where the hammer blows of the trade warriors have driven it.

First, the 158 bulk ships it is designed to produce will require nearly 4 million tons of steel.

Since every 1 million tons of steel is the equivalent of 5,000 steelmaking jobs, it would create real work for 20,000 steelworkers over its life.

Mix in shipyard workers and those who make parts and components in mills and foundries and shops and factories across the country—and those who will transport them—and you have real economic activity.

You have people working and people buying, which puts still more people back to work.

Repeat it a few times across the industrial base and you have an economy that is showing signs of recovery, and the makings of a change of luck.

And making your luck is much better than waiting for it.

As a Japanese proverb says: "to wait for luck is the same thing as waiting for death."

American shipping and American shipbuilding have been on the anvil far too long.

□ 1940

In conclusion, Mr. Speaker, again I want to reiterate, and with the possibility of being repetitious, that the gentlewoman in the well has demonstrated repeatedly her dedication to this problem, not in words alone, but in her action. I take great pride in being a colleague of hers, joining with her, hopefully working hand in hand and we are going to follow this legislation, hopefully putting it into effect and make sure that all the good that is incorporated therein does come to bear fruit and that we have legislation once and for all, probably the first time in the history of the country, that is so practical to be effective in the terms that I have outlined.

Congratulations.

Mrs. BOGGS. Mr. Speaker, I thank the gentleman from Pennsylvania and I would like to say that the gentleman has outlined so magnificently the competitive disadvantage at which the U.S. shipbuilding industry finds itself, the market that is out there, the one world market in which we must, indeed, find America's fair share, the beautiful way in which the gentleman has put forward the need for jobs and the need for our defense capabilities, that I only wish that right now the gentleman's speech had been the concluding speech before the final vote on this legislation.

Mr. Speaker, I would hope that we would be able to go forward with this bill that has been cosponsored by so many of our colleagues and which has a great deal of interest to many others who will be coming along to cosponsor it as well and that we will be able to put forward the Competitive Shipping and Shipbuilding Revitalization Act of 1982, which as the gentleman from Pennsylvania has told us, will promote increased ocean transportation of bulk commodities in the foreign commerce of the United States, in U.S.-flag, U.S.-built ships, to strengthen the defense-industrial base and for other purposes; most especially for the purposes of being able to be competitive in an interdependent world.

● Mr. BONKER. Mr. Speaker, I am joining today with my distinguished colleague from Louisiana, Mrs. LINDY BOGGS, in sponsoring the Competitive

Shipping and Shipbuilding Act of 1982.

As a member of the House Merchant Marine Committee, I have seen the need for Congress to promote the use of U.S.-flag, U.S.-built vessels in the shipment of bulk commodities, and in so doing, increase U.S. national defense capabilities through the support of the U.S. merchant marine and shipbuilding mobilization base.

This legislation provides a necessary component to our efforts to revitalize the American economy. The mechanism is simple: It requires all exporters and importers of bulk commodities in the foreign commerce of the United States to ship 5 percent of their cargoes on U.S.-flag, U.S.-built ships beginning in 1983, and to increase this amount 1 percent per year thereafter until a minimum of 20 percent of all U.S. bulk tonnage is shipped in U.S.-flag, U.S.-built bottoms.

In marking up legislation to deal with port development to handle our emerging international coal trade, the Merchant Marine Committee added similar bulk cargo language to the bill. The committee then saw the positive benefits of such a requirement. A stable and economically healthy bulk fleet is essential for several reasons:

Our economy would benefit from transportation receipts—a medium-sized bulk carrier earns \$12 million per year.

Our economic security would be enhanced by an ability to carry crucial commodities essential to our economic and military well-being. Foreign-flag vessels carry almost all our imports of such precious materials such as nickel, chromite, manganese, and rubber.

National defense requirements would be met by being able to supply bulk commodities to allies and to ourselves, and providing the necessary transportation of military hardware abroad in periods of conflict.

Last but not least, this legislation will provide economic stimulus to a sector of the economy that too long has had to rely on promises alone. It will provide jobs to thousands of shipyard and shipboard workers at a time when unemployment is at its worst in 30 years.

Mr. Speaker, we on the Merchant Marine Committee have been sorry witnesses to the decline of our bulk fleet. In 1970, the U.S.-flag, liquid and dry bulk fleet engaged in international commerce totaled 81; today it consists of only 48 ships. We cannot allow this decline to continue.

I would refer my colleagues to the commendable material Mrs. Boggs has introduced into the record today along with the legislation. It should answer any of the questions that may arise.

This legislation represents a real commitment on the part of Congress to revitalizing a key sector of our econ-

omy, one that plays a vital role in our national security as well. I would urge my colleagues and the administration to support it.●

□ 1950

BANKRUPTCY COURT ACT OF 1982

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Jersey (Mr. RODINO) is recognized for 5 minutes.

● Mr. RODINO. Mr. Speaker, I am introducing legislation today, along with my colleagues, Representative DON EDWARDS, of California, Representative ROBERT MCCLORY, of Illinois and Representative M. CALDWELL BUTLER, of Virginia, to provide for the appointment of U.S. bankruptcy judges under article III of the Constitution. This legislation is designed to remedy the constitutional crisis facing the bankruptcy court system as a result of the U.S. Supreme Court's decision in *Northern Pipeline Construction Co. v. Marathon Pipeline Co.* issued on June 28, 1982.

In a badly split decision, the Supreme Court ruled in *Northern Pipeline* that the present bankruptcy court system violates article III of the Constitution. The Court held that the jurisdiction conferred on the bankruptcy courts by the Bankruptcy Reform Act of 1978 cannot be constitutionally exercised by those courts, because bankruptcy judges are not afforded the constitutional protections set forth in article III to insure judicial independence—tenure during good behavior and guarantee against salary diminution while in office. The effective date of the *Northern Pipeline* decision was stayed until October 4, 1982, to give Congress time to remedy the problem and to protect the orderly administration and adjudication of bankruptcy proceedings in the interim.

The *Northern Pipeline* decision confirmed the express doubts of both the House Judiciary Committee and the House of Representatives as a whole about the constitutionality of the court provisions which were eventually included in the 1978 law. The Judiciary Committee and Civil Rights Subcommittee gave lengthy consideration to the constitutional issues surrounding the court system in both the 94th and 95th Congresses and concluded that the limited circumstances in which a departure from the requirements of Article III have been permitted were not present in the bankruptcy context. The original bankruptcy bill passed by the House—H.R. 8200, 95th Congress—created the bankruptcy courts as article III courts. The present bill is virtually identical to the article III bankruptcy court provisions which were previously passed by the House.

The Subcommittee on Monopolies and Commercial Law of the House Committee on the Judiciary held 2 days of hearings on this matter on July 21 and 22, 1982. Hearings were held by the Senate Judiciary Subcommittee on Courts on July 22 and 23. Both hearing records strongly support the need to create article III bankruptcy courts exercising unified jurisdiction as the only efficient court system to clear constitutionality.

The major provisions of the legislation which is being introduced today are as follows:

First. Beginning April 1, 1983, the President would be authorized to appoint, by and with the advice and consent of the Senate, 227 bankruptcy judges for the several judicial districts—proposed section 152, title 28, United States Code. Such judges would hold office during good behavior and would receive an annual salary of \$65,000. All judicial appointments would be made by October 1, 1983.

There are currently 241 bankruptcy judges—220 full-time and 21 part-time judges. In an April 2, 1982, report, the Advisory Committee, appointed by the Director of the Administrative Office of the U.S. Courts pursuant to section 407(a) of Public Law 95-598, has recommended that, based on the present workload, 303 bankruptcy positions are needed. There have been at least 180 full-time bankruptcy judges since 1969. The current salary of a bankruptcy judge is \$58,500; \$61,200 without the current cap on Federal salaries. The present salary of a Federal district court judge is \$70,300.

Second. Where the judicial workload necessitates, article III bankruptcy judges could be temporarily designated and assigned to perform judicial duties on the Federal district and circuit courts.

Third. An appeal from a final order or judgment of an article III bankruptcy court would be taken to a bankruptcy appellate panel, composed of three bankruptcy judges of the circuit, and then to the court of appeals for the circuit. If the parties to the proceeding agree, an appeal from a bankruptcy court judgment could be taken directly to the court of appeals.

Fourth. Jurisdiction and venue of the bankruptcy courts would be the same as under present law.

Fifth. The U.S. bankruptcy judges who are serving on the date of enactment of the legislation would constitute the bankruptcy courts for the period beginning on the date of enactment and ending on March 31, 1983—referred to as the "transition period." The terms of office of all U.S. bankruptcy judges who are serving on the date of enactment of the act would expire on March 31, 1983. During the transition period such judges would be authorized to exercise the jurisdiction and powers conferred by title 28,

United States Code, on bankruptcy courts. Such judges would be continued at their present salary level.

Sixth. After March 31, 1983, former U.S. bankruptcy judges whose terms expired on that date could be temporarily designated and appointed to hear bankruptcy cases. However, any such designation and appointment would terminate 30 days after all appointments of article III bankruptcy judges to the U.S. bankruptcy court involved had been made or on September 30, 1983, whichever is earlier.

Seventh. A former bankruptcy judge who is not appointed to the article III bankruptcy court after March 31, 1983, would be eligible to receive improved retirement benefits under proposed section 377, title 28, United States Code, if such judge continues in service until March 31, 1983, serves as a bankruptcy judge for at least 10 years, and advises the President in writing of his willingness to accept appointment to the article III court. Proposed section 377 is based on H.R. 5107 which was marked up by the Subcommittee on Monopolies and Commercial Law on November 20, 1981.

Absent congressional action by October 4, 1982, the bankruptcy court system will collapse. The bankruptcy courts will lack jurisdiction to determine any bankruptcy matter. Great uncertainty in the judicial system and credit community will result.

Such potential chaos could not occur at a less opportune time. The Nation has been in a period of severe financial distress for many months now, and no dramatic improvement in the economy is readily foreseeable. The rate of unemployment approaches 10 percent. Many major corporations, employing tens of thousands of employees and having billions of dollars of assets and liabilities, are now operating under chapter 11 of the Bankruptcy Code. Failure to remedy the problem by October 4, by creating a bankruptcy court system of clear constitutional authority, will jeopardize many jobs and threaten heavy losses for creditors and stockholders alike.

The priority and importance of this matter are obvious. If we are to avoid the chaos and confusion that would result from inaction, the Congress must move quickly.●

FINANCIAL DANGER AND THE FEDERAL RESERVE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. GONZALEZ) is recognized for 30 minutes.

Mr. GONZALEZ. Mr. Speaker, I rise tonight to continue and to round out what I said last night, which appears in yesterday's RECORD, concerning the calamitous situation that both the domestic as well as international finan-

cial situation and monetary systems of the world are confronted with.

I presented, in great detail, some statistics and specifics, but more importantly, I did not get an opportunity because of insufficient time to tie in the responsibility and the either malfeasance or nonfeasance of the Federal Reserve Board.

There is so much that is not known generally by Americans, and specifically by the Members of Congress, as to the nature of the Federal Reserve that I am simply astounded, and have been over the 20 years that I have served on the Committee on Banking, Finance and Urban Affairs, to find the greed, the indifference or the lack of knowledge because as it is not turning out, it has everything to do with the well-being of our country, its fundamental standard of living, which is what is at stake here.

But above all, and beyond that, there are questions so fundamental as war and peace that are being decided in those private directors' rooms of these huge financial institutions and their interconnected corporate interests, because of the almost illegal relationship—if not out and out illegal—the interconnecting directorships of the hugest interests in our country.

Now, they transcend national boundaries and are more than national entities; they are multinational. They go beyond and transcend the control of any one sovereign nation in the whole world.

Now such issues as war and peace, unbelievably, are decided there.

So this matter is a very grave concern. What impels the most immediate concern, however, is the situation with respect to the crisis that the Mexican currency finds itself in, and its unavoidable impact on the United States. At this point nationally it has not been registered. It certainly has not been reflected in the national press and even in the regional press along the border where the world is so self-contained. This is true not just in the United States. There are very important happenings just across the Canadian border or the Mexican border right next door, and the newspapers in Texas, upon reading them, will have no account of the most transcending things which are happening and have happened.

The recent so-called devaluation—and the reason I say it is so-called is because when you have a floating system in these international currency relationships there is no such thing as a devaluation because you have no fixed rate of exchange. This is the viciousness of the instability in this floating system that has been on us since about 1968 or 1969. But in Mexico at this time the situation is chaotic. It is ominous in its potential for grave and calamitous confrontations that our country might face.

We are not prepared any more than we have been for some of these other crises. That is what I find so inexcusable because it is not fair to this great country.

In the debate the other day on the Cuban Radio, Radio Marti, the debate on the defense authorization, the debate last December on the Sinai, Americans do not realize that we have over a thousand of the 82d Airborne Division in the Middle East right as a result of an unprecedented—I say unprecedented—congressional action. To think there were only just about 12 of us, and I was the only one who offered any kind of amendment or even debate. Yet we have these military—not observers, not civilians, but military—right now over there except that they are on the other side of that Lebanese geography.

But now the whole question is whether or not our country is going to further find itself held hostage because, as I said then, the only thing our military are now there for are as hostages. This is what they are looking for now, in addition, with the Lebanese situation. But all of this was anticipated. We should have anticipated it because in the great money circles and in the offices of the central banks, whether it is the Arabian oil money-bloated countries that now have such power over us that on the eve of the Israeli invasion reaching Beirut, the Prince of Saudi Arabia picked up the phone and called Mr. Reagan and said, "If you do not restrain Israel we will pull our money out of your banks right now and create a crisis." Within 12 hours, Mr. Reagan did do what he could to restrain Israel for the first time.

Now, all of this was in our newspapers. I could not believe it because most of this has not in the past been. Yet what was the basis of it? It was the basis of something that started to build up several years ago that some of us, solitarily, warned about, spoke about. In fact, I spoke on this House floor—back in 1976—and as a result of that speech the Chairman of the Federal Reserve Board at the time, Mr. Burns, called me and invited me to have breakfast with him at the Federal Reserve.

I will have this much to say for Chairman Burns: He at least took cognizance, which is more than I can say for any of the Chairmen previously serving or those who have been serving since Mr. Burns, since I have been on this committee, that is, which has been almost 21 years.

Mr. Burns said at the breakfast that he had read my remarks and that he agreed.

What were my remarks? My remarks were motivated, as mine are tonight, as I will show later, because it was obvious that the statistics revealed it, independent statistics—they did not em-

anate from the Fed; the Fed does not provide this to Congress or to anybody. The Fed is a runaway powerful monopoly out of total control, even though it is a child, a creature, of this Congress.

Most Congressmen and most Americans think that it is independent, autonomous; that it is something that was struck from the brow of the Greek God Jove and that it does not have to account to anybody.

The fact is that it is a creature of ours. Its legal description is that it is the fiscal agent of the U.S. Treasury. But instead of an agent, it is a master, where it is deciding these fateful decisions for this country.

It has already taken us a long way to bankruptcy, national bankruptcy, believe it or not.

□ 2000

This is not the profligate liberal spenders. These are the most conservative elements. I do not like to use the word "conservative" because it is not fair. I respect that word, although I do not label myself as such. I call them reactionaries—reactionaries, not conservatives, and they are the ones that have wasted the substance of this country and are leading us fast, irretrievably, to out and out bankruptcy. This is why I have been speaking out for more than 15 years, but specifically on this occasion that motivated me, the visit with Chairman Burns, I said that in less than 1 year and 3 months the amount of moneys that the largest banks in our country, concentrated in New York—Chase Manhattan, First City National, Hanover Trust, Manufacturers Trust—had invested in 1 year and 3 months from \$3 billion to over \$47 billion in so-called developing countries that had no financial structure that could insure any kind of a repayment of those loans. In less than 3 years—it is almost 2 years—from \$3 to \$47 billion. You do not have to be an expert to know that that is an overhang that can create a quivering or a shakeup in any financial market if there happens to be such a thing as a default.

Well, believe it or not, today that stands, the American banks, to over \$300 billion with the potential for total disaster now more than imminent, as I brought out last night. So, Chairman Burns wanted me to know that he was concerned and had been, and in fact he said to me, "I returned recently from the Bankers Convention in Honolulu, and I infuriated the bankers because I took them aside and chastised them for this, and told them they would have to restrain themselves, and they almost chased me out, they got so angry at me they almost cursed me."

I said, "Mr. Chairman, I am amazed. You mean to tell me you feel that is

all you can do? You mean you do not have the power, at least some implied and residual powers, you and the Fed have used that. Certainly you can do something more than just warn these greedy, predatory interests."

Franklin Roosevelt called them malefactors of great wealth, because indeed and in fact that is what they have been. They have not hesitated 1 minute to speculate against the dollar since 1970, 1971, when I first noted it. They have not hesitated 1 minute. Why? Because, in effect they have no nationality. They may be incorporated in the United States, but their heart and their soul is where the money is, and all through our history, from the Continental Congress, from the beginning of the formation of this country, our leaders, whether it was Jefferson—even Hamilton, who I guess by today's definition would be called a conservative—even he warned; and through history Jackson and his big battle with the Second United States Bank, and the like. There was Lincoln in 1864, and then later on Woodrow Wilson in 1916, who specifically said that this is the greatest threat to the well-being—and what is the word—independence of the Republic.

We have seen that now happening within the last three decades gradually, and believe it or not, by 1952 and 1953, with the obsequious cooperation of the Congress when it passed special legislation which was not debated at all, that enables this system—we are the only country in the world that handles our money in this way.

If any of you have a dollar, please look at it, and it says "Federal Reserve Note." It used to be a few years ago that you would find some that said, "U.S. Treasury Note." Not today. We are the only country in the world where the people, the Government, has to have a Federal Reserve Bank, which is really the private bankers, print their money and pay interest for it. Every dollar bill you have you are paying interest on it. Believe it or not. It is so fantastic Europeans do not want to believe it. We are the only country in the world that handles the money that way.

That became totally possible after 1952, along about 1953. But, more insidious has been the callous disregard of accountability, of responsibility; the wholesale sellout of the United States and its financial, whether it is monetary and fiscal, destiny to a handful of private power-using, insatiable bankers.

The issue is, shall the people govern or shall the bankers? That is the issue, and it has been, but now it has reached the point that I am afraid it is later than Americans realize. I think there is a point of no return now, and only catastrophe, and then what can come?

But, we may be facing it quicker because of developments south of the border, where the tensions are so great, the violence is already there, and it is going to grow. It is not going to decrease. Our next door neighbor, with 50 percent unemployment, with a labor force that has a potential of being increasing exponentially every year because the average age of the Mexican citizen right now is 15 years; inflation right now at this point exceeds 55 percent. Mexico has had and does now have the greatest external debt of any country. Our bankers have in Mexico exposed almost—almost in excess of \$200 billion.

It was the only one that reported a few months ago, a few weeks ago, that Mexico rushed through a secret deal that was made with our Government last year and acquired about 14 F-5's. Why? Mexico has always prided itself that it believed in self-determination. They call it Auto-Determinacion. Non-intervention, meddling in no other country's internal affairs.

This is the reason why Mexico all along has maintained relations with Cuba. They have prided themselves on being the first Latin American country to stabilize to the point where they could have successful, peaceful access to power by civilians, not military. It has prided itself in not having to have a standing army of any consequence, but now all of a sudden we make a deal, we tie sophisticated jets, and they got two of our destroyers just about 3 months ago. I was the only one revealing that, even though I am sure some of the Members of the House were invited to the ceremonies where they were going to decommission from the active duty list, the destroyer list, and sell them as scrap to the Mexican Government.

Why would Mexico all of a sudden want two destroyers? I asked the question then and I got criticized and assailed in Mexico for being anti-Mexican. I said, "Well, what is the purpose now? Is this to go out and get our shrimping boats," as they have been both in the Gulf of Mexico as well as over on the Pacific coast, but what is the real reason? The real reason is that our banking interests that have invested huge and initial investment, \$2.1 billion in this great Mexican development known as their gas and oil fields that some people say are as vast or greater than the Arabian potential—it was Chase Manhattan, First City National—it is our bankers here that control the whole thing.

All of a sudden they got rather squeamish because of what is happening in Guatemala, their next door neighbor to Mexico, which has already spilled over to Mexico. That does not get reported here. What is happening in El Salvador, the smallest nation in the Western Hemisphere, and we have our Secretary of State drawing the

line and saying, "Here is where we are going to have to gain a victory, this is where we draw the line on communism."

Down the line in Nicaragua, and now in some of the countries we also have just finished making a deal with Venezuela for the sale of 16 F-16's. Why would Venezuela want F-16's?

□ 2010

Then, on top of that, what has happened in the meanwhile with the war between Britain, that is I call it the Second War of Jenkins Year for the British because it is so similar to the Jenkins War in 1739 that I just cannot get over it.

I have always respected and admired and revered the British and the English for their tremendous capacity as diplomats, and I still cannot figure out the unbelievable venture in the Falklands.

Yet all of that had its impact on the United States. It is not being discussed. It is not being written about in this country.

Also our relations with Canada have deteriorated.

But all down the line what this means in the background is your financial relationship, just like in Poland. If it had not been for the overhang of the banks, mostly West German, no telling what we would have done with that big crisis of the Polish workers.

But the whole issue is banking, financial, money.

As I say, now it is in Mexico with the devaluation, so-called, which what it means is that Mexico is prostrate. Last weekend I was on the border and it was exchanging anywhere from 60 to 90 pesos for \$1. I cannot begin to describe to you the chaos and the potential for great mischief, and which we had better get ready to handle as a crisis.

I have always believed in anticipatory government. That is that you do not wait until you have a hot potato and then react out of a crisis, but you anticipate it. So you prepare yourself with some pincers so that you can get that hot potato off the fire without burning yourself or minimizing the damage. But we do not seem to be working that way.

Today I will follow through after rounding out the significance of the presentation of the specifics last night and its interrelationship with the Federal Reserve Board.

The Federal Reserve Board of the United States is the nearest equivalent we have to what other countries call their central banks. It is, therefore, a tremendous power nationally, internationally, but most of all domestically because it does not feel that it has to account to the President or Congress, which means to the people.

This is a reason for my bills. But most of all tonight I want to resume what I call the impeachment of Mr. Volcker, No. 4, I believe.

I have spoken three times in which I gave a general outline of the impeachment resolution language, plus three specific allegations or specifying the items of impeachable offense.

In other words, I was not satisfying myself with just a general clause, which is all that is necessary to present an impeachment resolution.

It is a highly privileged resolution. It can be brought up by any Member provided it is in the proper form.

As I said before in the RECORD, I tried to get the Judiciary Committee to look into it but the chairman apparently was of a different mind and, therefore, I decided, and I have so explained here previously, that I would bring it to the floor of the House.

In order to do so at the proper time I want to first prepare, as if I were arguing or as if I were a member of the Judiciary Committee.

So tonight I proceed with the support to the third charge in which I have alleged the wrongful, the malfeasance and the culpable actions of the Fed through the Open Market Committee, which is really the one that controls our fate.

It is the Open Market Committee that decides whether any administration is going to stay or fall, because they have the power of deciding what will be paid for Treasury bills and the like.

Also on top of this gimmick, where instead of agents they are the masters in this unique national financing scheme that no other country in the world has.

We talk about how democratic we are but, fellow citizens, in many, many ways it is moot. If we continue along the lines of economic slavery, which is what this is, what good does it do to boast of political freedom?

Today economic freedom is the issue.

I became aware of what I felt was improper leaks from the so-called Open Market Committee, which is secret, incidentally. I do not know why they call it the Open Market Committee. There is no reason for that name because it is anything but open. It is secret. It consists of five private bankers, plus the members of the board of the Federal Reserve Board. So you can imagine putting the same interests in charge of their own regulation.

We know what the history of that has been, reading through the history of this Nation back to its point of expansion after the Civil War. But here in this case it has been more than insidious. It has been sinister, catastrophic, abominable to the fate of American liberty, American democracy, American participatory democracy, representative democracy.

I became aware of speculation because of premature release of certain information that would enable certain financial interests, all of them headquartered in New York. We must remember that in New York, in less than a 3-square-mile area, you have over 33 percent of the financial wealth of this country concentrated. It is controlled. Maybe it is more than that by now.

So I raised issues but, of course, I could not get answers as an individual member of the committee.

At that point, and this was when Chairman Burns was still the chairman, which means before 1977, I could not get the chairman to join me in raising an interrogatory. So then Mr. Burns went out and Mr. Paul Volcker was appointed, and I had what seemed to me plain evidence that again something had happened.

So I raised my voice and I started talking about it and I came out and categorically said there have been improper leaks from the Federal Reserve.

As a result of that, the Hanover Bank in New York has had a windfall at the cost to the taxpayers.

Nobody listened either, but I finally did persuade some other Congressmen.

Let me say by way of parentheses, and this is something I have faced all of my career in the context of Washington, the social, ethnic framework of reference, there is only 5 Members that have names like mine in the whole Congress out of 535. But from what we call the Mexican-American side, there is only three of us, one from California and two of us from Texas.

But even here the atmosphere is such that I have many Members, some have been here some time, say "Hey, Henry, how is New Mexico today?"

Well, of course, I am from Texas.

Or I have Members say "Oh, Mr. DE LA GARZA," and I say, "You mean GONZALEZ."

"Oh."

This is the way it was back in my home territory about 45, 50 years ago, almost identical.

So if my name were Kennedy, and I noticed that Senator KENNEDY introduced an almost identical bill to the one I have been introducing for 15 years to bring the Federal Reserve within the accountability range which was intended when Congress debated what turned out to be the Federal Reserve Act of 1913, I noticed he got the newspapers to report it. He had quite a number of articles. In 15 years that I have been introducing it I have not had anybody report it, even my hometown papers, which is fine with me.

I feel impelled because of the tremendous importance and consequences of this unrestrained activity.

Anyway, going back to the second leak, we finally did make a request, and on one occasion the visit of Paul

Volcker to the other body, the committee demanded some action.

So what did the Feds do?

As I have said, we have no oversight. The General Accounting Office can not go on behalf of the Congress to look over the Fed's books. They do not have an independent audit. They do not even have an Inspector General.

So they appointed a committee, and at this point I include in the RECORD that I finally got hold of that special counsel to look into the matter.

The material referred to follows:

FULBRIGHT & JAWORSKI,

Washington, D.C., November 7, 1980.

To: The Board of Governors of the Federal Reserve System and The Federal Reserve Bank of New York.

Attached is the Report of Special Counsel on the Erroneous Money Supply Estimates Published During October 1979. This Report sets forth the results of Special Counsel's inquiry to determine whether any institution or individual, including Manufacturers Hanover Trust Company and persons connected with Manufacturers, the Federal Reserve Board or the Federal Reserve Bank of New York, improperly and knowingly profited from the preparation and release of erroneous money supply data during October 1979. This Report is accompanied by an Appendix and Exhibits which set forth a more detailed statement of the evidence obtained in the inquiry.

We would be pleased to meet with you at your convenience to discuss the Report and respond to any questions you might have.

Sincerely,

ALAN B. LEVENSON,
Special Counsel.

REPORT OF SPECIAL COUNSEL ON THE ERRONEOUS MONEY SUPPLY ESTIMATES PUBLISHED DURING OCTOBER 1979

I. INTRODUCTION

A. Purpose of report

This Report sets forth the results of Special Counsel's inquiry to determine whether any institution or individual, including Manufacturers Hanover Trust Company ("Manufacturers") and persons connected with Manufacturers, the Federal Reserve Board ("Board") or the Federal Reserve Bank of New York ("New York Fed"), improperly and knowingly profited from the preparation and release of erroneously money supply data during October 1979.

B. Background of engagement

On October 25, 1979, the Board announced it was revising downward certain money supply estimates it had released for the weeks ended October 3 and October 10, 1979 by approximately \$700 million and \$3 billion, respectively.¹ The Board attributed these revisions to errors in deposit data submitted to the New York Fed by a major money center bank. On October 26, 1979, Manufacturers stated, in response to inquiries, that it had made errors in computing

¹ The money supply estimates first published by the Board for the weeks ended October 3, 10 and 17, 1979 are generally referred to in this Report as "the erroneous money supply estimates." Errors in the estimate for the week ended October 17 were discovered shortly after the October 25 public announcement of the money supply estimate for that week.

the data it had previously reported to the New York Fed.²

On October 29, 1979, Vice Chairman Frederick H. Schultz and Governor J. Charles Partee of the Board testified before the Committee on Banking, Finance and Urban Affairs of the United States House of Representatives ("House Banking Committee") concerning these revisions. Members of the House Banking Committee expressed concern with the possibility that the underlying errors had been the result of some plan or scheme, or that the institutions involved, or persons connected with those institutions, had used their knowledge of the errors for financial gain. The Chairman of the Committee requested that the Board conduct an investigation to determine if any institution or individual had improperly profited from these errors. Vice Chairman Schultz stated that the Board would do so.

C. Scope of engagement

On November 6, 1979, the Board and the New York Fed engaged Alan B. Levenson of the law firm of Fulbright & Jaworski as Special Counsel to conduct an inquiry to determine whether any institution or individual, including Manufacturers and persons connected with Manufacturers, the Board or the New York Fed, improperly and knowingly profited from the preparation and release of erroneous money supply data during October 1979. Mr. Levenson was directed to make a complete inquiry into the facts of the matter and to prepare a report on the results of the inquiry. He was authorized to select other persons in Fulbright & Jaworski to assist in the inquiry and to retain the services of a public accounting firm and other experts if deemed necessary. Mr. Levenson and the other persons in Fulbright & Jaworski who assisted in this inquiry are collectively referred to herein as "Special Counsel."

Consistent with the scope of the engagement, Special Counsel has not made any inquiry, and has not attempted to reach any conclusions, with regard to any other matter, including what action, if any, could have been taken to prevent the errors or erroneous money supply estimates.

D. Contents of report

This Report is divided into six parts. Part I introduces the Report, describes its purpose, and sets forth the background and scope of Special Counsel's engagement. Part II is a summary of facts and conclusions. Part III describes the investigative approach and the procedures used in the inquiry. Part IV sets forth comments on the nature and scope of the inquiry. Part V discusses the manner in which the erroneous money supply estimates were prepared, released and revised, and certain securities trading activities of Manufacturers and the individuals at each institution who could have had relevant confidential information. Part VI discusses the trading activities of major dealers in certain government securities markets during October 1979. The Report is self-contained, but is accompanied by an Appendix and Exhibits which set forth a more detailed statement of the evidence obtained in the inquiry.

II. SUMMARY

A. Background

The Board's primary function involves the formulation of monetary policy. The money

supply—the amount of money in circulation—is a critical component of monetary policy. During October 1979, the Board released money supply estimates on a weekly basis. The basic money supply estimate, M-1, generally represented the sum of demand deposits and currency in circulation.³ Like other estimates, the M-1 estimate was inherently imprecise, and it was often revised over a period of weeks following initial release as additional information became available. The Board had always stressed that the weekly money supply estimates should not be given undue attention because of their volatility and potential for revision. Nevertheless, professionals in the securities markets, and particularly the government securities markets, looked to the Board's weekly estimates as one indication of possible interest rate changes and of the general success of announced monetary policy.

On October 6, 1979, the Chairman of the Board of Governors, Paul A. Volcker, announced a new program intended to restrain the growth of the money supply and bank credit to help reduce inflation. This announcement appeared to increase the sensitivity of the securities markets to further Board announcements, such as publication of the money supply estimates, that might indicate the success or failure of the announced program. The securities markets were generally unstable during October 1979.

On October 11 and 18, 1979, the Board released money supply estimates for the weeks ended October 3 and 10, respectively, which showed unexpected strength in the money supply. On October 12, the day after release of the money supply estimate for the week ended October 3, the securities markets were relatively stable. On October 19, the day after release of the money supply estimate for the week ended October 10, the securities markets, and particularly the debt markets, fell sharply. Subsequently, on October 25, the Board announced there had been overstatements in the money supply estimates for those weeks of approximately \$700 million and \$3 billion, respectively, due to reporting errors by a major money center bank. On October 26, the securities markets advanced slightly.

A person with prior knowledge that the Board was going to release money supply estimates that were significantly overstated might have been in a position to have profited from this knowledge by entering into transactions in the securities markets, particularly the government securities markets, just before and after the release. It was predictable that the securities markets might react to this news, although it was only one item among others material to the markets. The critical dates for this purpose would have been just before and after October 11 and 18, 1979. In addition, a person who knew of the imminent revision of the money supply estimates might have been in a position to enter into profitable transactions just before and after release of the revisions on October 25.

B. Facts

The following is a summary of the facts based on the evidence obtained in our inquiry.

³ Those portions of this Report which discuss the compilation of the money supply estimates address only the compilation of M-1 before and during October 1979. The Board has since adopted differently defined measures of the money supply with different designations.

1. The Errors in Manufacturers' Reports of Deposits, Vault Cash and Federal Funds Transactions

Each week Manufacturers, like other member banks of the Federal Reserve System, was required to file with the New York Fed a report of its daily deposit balances on form FR 414, titled "Report of Deposits, Vault Cash and Federal Funds Transactions" (the "deposit report" or "FR 414"). On October 1, 1979, Manufacturers converted to a new automated general ledger system. This new system, which replaced a manual general ledger, increased the number of accounts significantly and, as a result, required changes in certain account classifications. The worksheet designed to accumulate data for the deposit reports under the new system incorrectly accounted for two significant items. In addition, the employees responsible for computing these data made a number of clerical errors, some of which appeared to result from unfamiliarity with the new general ledger system and the revised worksheet. Consequently, the FR 414's filed by Manufacturers with the New York Fed each week during October 1979 did not accurately reflect certain categories of Manufacturers' deposits.

2. The Use of Deposit Reports

Data from deposit reports during October 1979 were used to determine the reserve requirements for banks and, in addition, were used by the Board to compile money supply estimates. Individuals at Manufacturers responsible directly or indirectly for deposit reports were generally aware during October 1979 that the deposit reports were used in determining reserves. They were not aware, however, that these reports were used by the Board to compile the money supply estimates, and this use was not a matter of general knowledge.

3. Preparation of the Money Supply Estimates

New York Fed and Board personnel processed Manufacturers' deposit reports in the customary manner, which included inquiries to Manufacturers to obtain verification of the accuracy of certain of the data in the reports. Having received verification from Manufacturers through the New York Fed, and not knowing of any specific errors, the Board relied on the data in compiling the money supply estimates. As a result, the Board's first published money supply estimates for the weeks ended October 3 and 10 were overstated.

4. Revision of the Money Supply Estimates

By October 25, Manufacturers, the Board and the New York Fed had discovered, and Manufacturers had corrected, the most significant errors in Manufacturers' deposit reports for the weeks ended October 3 and 10. Therefore, on October 25, the Board revised downward the previously published estimates for the weeks ended October 3 and 10 and released a first published estimate for the week ended October 17. By Monday, October 29, however, Manufacturers and the New York Fed had discovered, and Manufacturers had corrected, errors in Manufacturers' deposit reports for the week ended October 17. These errors were disclosed by Vice Chairman Schultz during his testimony before the House Banking Committee on October 29. On the next regular publication date of the money supply estimates, November 1, the Board revised downward the estimate for the week ended October 17 and also announced further revisions to the esti-

² The errors in deposit reports initially submitted by Manufacturers to the New York Fed for the weeks ended October 3, 10, and 17, 1979, are generally referred to in this Report as "the errors."

mates for the weeks ended October 3 and 10.

Although the money supply estimates were frequently revised after publication, the revisions announced on October 25 were perceived to be out of the ordinary because of their magnitude. These revisions can be primarily traced to errors in deposit reports submitted to the New York Fed by Manufacturers during October 1979; there were, however, other revisions made for reasons unrelated to Manufacturers. The revisions announced after October 25 were not perceived to be as significant as those announced on October 25 because of their smaller size and the fact of the earlier announced revisions. A detailed description of Manufacturers' errors and their relationship to the erroneous money supply estimates can be found in Parts II and III of the Appendix to this Report.

5. Securities Trading

The large majority of persons interviewed and questioned in our inquiry did not engage in any securities trading activities during October 1979. Where individuals did engage in securities transactions, none of those transactions, with one possible exception discussed later in this Report, appeared to be related directly or indirectly to advance knowledge of the errors or the erroneous money supply estimates. The persons responsible for Manufacturers' securities trading activities stated that they did not have advance knowledge of the errors or the erroneous money supply estimates. Manufacturers' trading activities during October 1979 were consistent with those statements. Further, an analysis of reports of trading in certain government securities by major dealers filed with the New York Fed during October 1979 showed no unusual unexplained trading activities.

C. Conclusions

1. Manufacturers and persons connected with Manufacturers, the Board or the New York Fed did not improperly and knowingly profit from the preparation, release or revision of the erroneous money supply estimates during October 1979.

2. There is no indication that any other institution or individual improperly and knowingly profited from the preparation, release or revision of the erroneous money supply estimates during October 1979.

III. DESCRIPTION OF INVESTIGATIVE APPROACH AND PROCEDURES

A. Investigative approach

Improper and knowing benefit from the preparation, release or revision of the erroneous money supply estimates during October 1979 could have resulted from (1) participation in a plan or scheme intended to distort the money supply estimates so as to take advantage of any effect of the erroneous estimates on the financial markets, or (2) unauthorized disclosure of, or trading activity based on, confidential information about the errors or the erroneous money supply estimates.

Both of these possibilities were investigated. It was important to identify, and understand the roles of, the individuals at each of the three institutions involved in or responsible for the process of providing information used in estimating the money supply or in the actual compilation of the estimate. After doing so, we were able to reconstruct how the errors and revisions occurred and thus to reach a conclusion as to whether the errors were the result of a plan or scheme or where a mistake. In addition, identifying

those persons with advance knowledge enabled us to make inquiry into what use, if any, had been made of such information. Our reconstruction of the events leading to the erroneous money supply estimates and their revision is set forth in detail as a chronology in Part IV of the appendix to this Report.

To check the accuracy of the responses in the inquiry process, the statements of various persons were compared with written records, documents and our understanding of how events occurred. We also made a limited inquiry into trading activities in certain government securities markets, having determined that any attempt to benefit improperly would most likely have been reflected in these markets because these markets were most responsive to interest rate changes.

B. Investigative procedures

In our inquiry, we used the following investigative procedures:

1. Initial Briefings

Immediately following the engagement as Special Counsel, we requested and received briefings from certain individuals at Manufacturers, the Board and the New York Fed as to their understanding of what had been involved in the erroneous money supply estimates. We discussed with these individuals the components of the money supply estimates and the general practices for collection and processing of source data used in the compilation of those estimates. From these briefings, we identified the individuals at the Board, the New York Fed and Manufacturers who could have had access to or knowledge of the errors in Manufacturers' deposit reports or the erroneous money supply estimates before publication of the revised estimates.

2. Review of Documents

At the outset of our inquiry, to prevent routine document retention procedures from resulting in unavailability of data, we requested the three institutions to preserve all records relating to the errors in the money supply estimates and to trading in securities by Manufacturers and persons at the three institutions. Each institution agreed in writing to do so.

We obtained and reviewed copies of documents relevant to the collection and processing of the data used in compiling the erroneous money supply estimates and their subsequent revision. These documents included the deposit reports filed by Manufacturers with the New York Fed between October 1 and November 8, 1979, and the worksheets and ledgers underlying those reports; documents reflecting the processing of Manufacturers' deposit reports by the New York Fed and the Board and the Board's compilation of the money supply estimates; and documents, including individuals' notes and memoranda, relating to the discovery of the errors and their subsequent correction. In addition, we reviewed documents relevant to trading in securities by Manufacturers, persons at the three institutions, and major government securities dealers, including trading reports filed with the New York Fed and brokerage statements. We also reviewed miscellaneous other documents, including publications on the compilation of money supply estimates and their impact on the financial markets.

3. Interviews

We interviewed a total of 193 individuals at the three institutions who we determined

could have had access to or knowledge of confidential information about the errors or the erroneous money supply estimates. 46 of these individuals were employed at the Board, 63 were employed at the New York Fed and 84 were employed at Manufacturers and its subsidiaries. The transcripts of these interviews totalled approximately 4,200 pages.

We began interviews nearly simultaneously at the Board and the New York Fed. Before each of these interviews, the witness was advised of the purpose of our inquiry, the capacity in which we were acting, his or her right to be accompanied by counsel and his or her right to decline to answer our questions.

After completing most of the interviews initially planned at the Board and the New York Fed, we conducted interviews of employees at Manufacturers. Counsel for Manufacturers was present at each interview with the consent of the witness and Special Counsel.

At each interview the witness was sworn and a verbatim transcript of the interview was taken by a qualified court reporter. In only a few instances was it necessary to conduct more than one interview of the same witness. At none of the three institutions did any witness refuse to answer any questions asked about his or her knowledge of what had occurred. No witness asked to be accompanied by personal counsel.

4. Questionnaires

We sent questionnaires to 109 persons at the New York Fed and other Federal Reserve banks, the Board and the United States Department of the Treasury. This group consisted of persons who we learned from our interviews could have had secondary or other limited access to confidential information about the errors or the erroneous money supply estimates. These questionnaires were designed to identify whether or not the recipient or any other persons might have information relevant to our inquiry that should be obtained by personal interview.

Each recipient was informed of the nature and purpose of our inquiry before being asked to complete and swear to the accuracy of the responses to the questionnaire. All questionnaires were completed, executed and returned to us.

Based upon our review of the completed questionnaires, we determined that it was not necessary to conduct additional interviews.

5. Retention of a Public Accounting Firm

Because of the nature and complexity of the accounting, financial and other data involved in our inquiry and the need for systems analysis capability, we retained the accounting firm of Price Waterhouse & Co. ("PW") to assist us.

PW assisted us in the inquiry in two principal ways. First, PW prepared detailed analyses with flow charts tracing Manufacturers' deposit data into the deposit reports filed by Manufacturers with the New York Fed, through their processing at the New York Fed and into the data supplied by the New York Fed to the Board, and then through processing at the Board into the compilation of the erroneous money supply estimates and their revisions. Second, PW prepared working memoranda on various aspects of the inquiry, including: (i) an overview and analysis of the errors in the deposit data reported by Manufacturers; (ii) a reconciliation of the deposit data submitted by

Manufacturers with the records of the New York Fed and the Board; (iii) a report on the effect of the errors in the data submitted by Manufacturers on the erroneous money supply estimates and their revisions; (iv) an analysis of certain trading activities by Manufacturers' trust division and trading departments during October 1979; and (v) an analysis of certain government securities transactions by major dealers during October 1979.

6. Review of Reports Prepared by Manufacturers' Public Accounting Firm

Soon after announcement of the corrections to its deposit reports, Manufacturers requested its outside accountants to review its procedures relating to reporting deposit data to the New York Fed during each of the three weeks ended October 17, 1979, and to report their findings to a committee of the bank's board of directors. Subsequently, Manufacturers requested its outside accountants to recalculate the deposit data reported to the New York Fed for the month of October 1979. Manufacturers' outside counsel also asked the accountants to assist in their special review to determine whether Manufacturers, its parent, Manufacturers Hanover Corporation, or any of their officers or employees, considered to have possibly been in a position to have been aware of the submission of the incorrect reports, had obtained financial or monetary gain as a result of knowledge thereof prior to the October 25, 1979 announcement of the Board. At outside counsel's request, only accounting personnel not routinely engaged in the examination of Manufacturers' financial statements assisted in this review. We received copies of the accountants' two reports from Manufacturers' outside counsel. With the assistance of PW and the full cooperation of Manufacturers' outside accountants, we reviewed these reports and the underlying workpapers.

7. Analyses of Securities Trading Activities

We met with experts in the financial markets from the private sector and government to discuss methods of inquiry into market statistics for evidence of transactions based on advance knowledge of the erroneous money supply estimates.

With the assistance of PW, we analyzed certain trading activities of Manufacturers. This analysis is described in detail at pages 18 to 23. We also reviewed the trading activities of individuals at Manufacturers, the Board and the New York Fed who had access to or knowledge of relevant confidential information. In addition, we analyzed, with PW, reports of trading activities by major dealers in certain government securities markets during the relevant period. A description of this analysis is set forth at pages 26 to 28.

IV. COMMENTS ON NATURE AND SCOPE OF THE INQUIRY

No limitations were imposed by the Board or the New York Fed on our inquiry. Further, we received the full cooperation of the Board, the New York Fed and Manufacturers, as well as their respective employees and representatives.

As may be expected where the testimony and questionnaire responses of more than 300 persons are involved, statements by different individuals varied with respect to certain matters. None of these variances, however, reflects on any matter material to our conclusions.

As noted above, in addition to our interviews and questionnaires, we performed lim-

ited analyses of certain financial markets. These analyses were limited to certain government securities markets because we determined these were most likely to be affected by misuse of confidential information about money supply estimates. Further, it would have been impossible to investigate adequately activities in all markets.

V. MANUFACTURERS AND PERSONS CONNECTED WITH MANUFACTURERS, THE BOARD, OR THE NEW YORK FED DID NOT IMPROPERLY AND KNOWINGLY PROFIT FROM THE COMPILATION, RELEASE OR REVISION OF THE ERRONEOUS MONEY SUPPLY ESTIMATES DURING OCTOBER 1979

A. General

As discussed above under Investigative Approach, improper and knowing benefit from the compilation, release or revision of the erroneous money supply estimates during October 1979 could have resulted from (1) participation in a plan or scheme intended to distort the money supply estimates so as to take advantage of any effect of the erroneous estimates on the financial markets, or (2) unauthorized disclosures of, or trading activity based on, confidential information about the errors or the erroneous money supply estimates. Both these possibilities were investigated.

Based on the evidence obtained in our inquiry, we conclude that Manufacturers and persons connected with Manufacturers, the Board or the New York Fed, did not improperly and knowingly profit from the preparation, release or revision of the erroneous money supply estimates during October 1979.

B. The erroneous money supply estimates were not the result or part of a plan or scheme or international act by any person, institution of group of persons or institutions

As discussed above, we developed an understanding of the process of compiling the money supply estimates. Then we questioned the persons involved in either the collection and processing of Manufacturers' deposit data or the compilation and release of the money supply estimates about their knowledge of, and participation in, the process during October 1979. Through depositions and examination of relevant documents, we reconstructed the manner in which the errors occurred and the erroneous money supply estimates were developed, discovered and revised.

No witness had information indicating that there was any plan or scheme to distort the deposit reports or money supply estimates. All the witnesses with first hand knowledge of the errors identified their cause as errors in the deposit reports submitted to the New York Fed by Manufacturers. At the time the errors were made, those individuals at Manufacturers who had access to the deposit reports were unaware that data included in the deposit reports were used to compile the money supply estimates.⁴ Further, persons at the New York Fed and the Board, although concerned about the accuracy of certain data in Manufacturers' deposit reports, did not know that the money supply estimates were erroneous at the time the estimates were published.

⁴New York Fed officials testified that it was credible that these individuals at Manufacturers were not aware of the relationship between money supply estimates and the deposit reports.

With the assistance of PW, we analyzed certain government securities markets to see if there were any activities suggesting that someone was trading with advance knowledge that might have resulted from a plan or scheme. Nothing in this analysis indicated that there was such a plan or scheme.

1. The Erroneous Money Supply Estimates Were Primarily Traceable to Unintentional Errors Made in Deposit Reports Submitted by Manufacturers to the New York Fed During October 1979

a. Compilation of money supply estimates

During October 1979, the basic money supply estimate, M-1, was one of a series of estimates of the money supply published by the Board. The published figure, an estimate of the daily average for the week ending on Wednesday, was released by the Board to the public eight days later on Thursday afternoon. Estimates were often revised because of corrections by the suppliers of data or the by Board or Federal Reserve Banks. Revisions were published as part of the Board's usual press release on the following Thursday.

During the eight days between the end of a reporting week and the publication of the money supply estimate for that week, the Board also compiled a preliminary unpublished projection of the money supply estimate for the current week. This preliminary projection allowed the Board to monitor movements in the key components of the money supply and to detect potential problems that might be encountered at a later stage in the publication cycle. To compile the preliminary unpublished projection and the first published and revised estimates of the money supply, the Board relied on several data sources, including deposit reports submitted to the Federal Reserve System by member banks.⁵

b. Reporting errors

The erroneous money supply estimates reflected errors in the data reported by Manufacturers on the weekly deposit report FR 414.⁶ The FR 414 is a required weekly report of balances in demand, time and savings deposit accounts, vault cash and of federal funds transactions. The data reported were the basis for the computation of the reserves each bank was required to keep with the Federal Reserve System. Some of the data reported on the FR 414 were also used by the Board to compile the money supply estimates.

Each business day clerical employees at Manufacturers, using an internal worksheet based principally on the bank's daily general ledger, computed daily balances for the categories listed on the FR 414. The daily balances were reported orally to the New York Fed each day with a one-day lag and at the week's end, the FR 414 showing daily balances was filed with the New York Fed.

On October 1, 1979, Manufacturers put into effect a new automated general ledger system which replaced a manual ledger system. The new system expanded the

⁵For a detailed discussion of the components of M-1, see Beck, Sources of Data and Methods of Construction of the Monetary Aggregates, "Improving the Monetary Aggregates: Staff Papers" (November 1978).

⁶There were errors on other types of reports filed by Manufacturers during October 1979, but only the errors in the FR 414's had a direct impact on the published money supply estimates. See pages 2 and 29-30 of the Appendix.

number of accounts from approximately 200 to more than 700 and thus required revised account classifications as well as new worksheets, including the worksheet used in computing the deposit categories on the FR 414. Although Manufacturers ran selected portion tests of the new system, it did not run a parallel test of the computation of the deposit categories on the FR 414 under the old and new systems.

Reporting errors were made by Manufacturers in its FR 414's during October 1979. The cause of the most significant errors was an incorrectly designed worksheet used to compute the deposit categories for the FR 414 from the new automated general ledger. The most significant problem with this worksheet was the erroneous treatment of deposits due to Manufacturers's overseas branches in the calculation of the demand deposit category "due to banks." This error was reflected in Manufacturers' FR 414's for the weeks ended October 3 and 10. In addition, there were a number of clerical errors.

c. Effect of Manufacturers' FR 414 errors on the money supply estimates⁷

The errors in data reported by Manufacturers on its FR 414 for the week ended October 3 initially resulted in an overstatement of \$627 million in the money supply estimate of \$378,166 million released on October 11.⁸ As of November 8, Manufacturers' corrections totalled \$496 million. In addition, corrections of data from sources unrelated to Manufacturers increased the estimate by \$555 million, resulting in a net increase of \$59 million from the first published estimate on October 11 to the revised estimate on November 8.

The errors in data reported by Manufacturers on its FR 414 for the week ended October 10 initially resulted in an overstatement of \$3,225 million in the money supply estimate of \$385,532 million released on October 18.⁹ As of November 8, Manufacturers' corrections totalled \$2,883 million. In addition, corrections of data from sources unrelated to Manufacturers increased the estimate by \$160 million, resulting in a net decrease of \$2,723 million from the first published estimate on October 17 to the revised estimate on November 8.

The errors in data reported by Manufacturers on its FR 414 for the week ended October 17 resulted in an overstatement of \$501 million in the money supply estimate of \$382,160 million released on October 25. Later corrections of data from sources unrelated to Manufacturers decreased the estimate by an additional \$267 million, resulting in a net decrease of \$768 million from the first published estimate on October 25 to the revised estimate on November 8.

⁷For purposes of this Report we have rounded the money supply estimates to the nearest million dollars. The figures actually released by the Board are rounded to the nearest \$100 million. In addition, the figures cited are not seasonally adjusted. A more detailed analysis and description of the effect of the errors on the money supply estimates appear in Part III of the Appendix.

⁸On October 25, the Board announced revisions in the money supply estimate for this week of \$725 million, based in large part on corrections to Manufacturers' deposit reports of \$627 million.

⁹On October 25, the Board announced revisions in the money supply estimate for this week of \$3,055 million, based in large part on corrections to Manufacturers' deposit reports of \$3,225 million.

The errors in data reported by Manufacturers for the week ended October 24 were minimal.

2. There Was Nothing Irregular About the Manner in Which the New York Fed and the Board Processed Manufacturers' Deposit Reports and Relied on Them in Compiling Erroneous Money Supply Estimates

a. Summary of customary procedures¹⁰

During October 1979, FR 414's of New York member banks were submitted to the New York Fed. Customary operating procedures at the New York Fed included quality edits on these reports as a check on their accuracy. An "edit" was the process of manually comparing one day's deposit data to the previous day's data or, by computer, testing reported data against pre-established tolerance levels. An unusual change in any category was discussed with the reporting bank, which was asked to verify that the figures were correct or to make appropriate changes. Because of the volatility of the amounts of some categories of deposits, it was not unusual for data reported by a large bank to show significant weekly changes. Neither was it unusual for a bank to correct its data.

Edited FR 414's were sent to the Board, where they were edited again. If the Board data processors or Board economists responsible for compiling the money supply estimates raised questions about data submitted by New York member banks, the data were referred back to the New York Fed to be explained or to be verified by the reporting bank.

b. Processing of Manufacturers' deposit reports during October 1979¹¹

We were unable to reconstruct all details of the transmission, editing and verification of Manufacturers' erroneous deposit reports through the New York Fed to the Board and into the money supply estimates because of the lack of complete documentation. However, it is clear that Manufacturers' erroneous deposit reports that were rejected by the computer as showing a degree of change beyond tolerance levels or that were, during a manual examination, found to be unusual were questioned repeatedly by both the New York Fed and the Board.

In response to questions from persons at the New York Fed, Manufacturers disclosed that it had installed a new computer system, was having some difficulties, and that revisions might be necessary. However, Manufacturers also indicated that its FR 414's were correct so far as it knew. These verifications were accepted by the New York Fed and, through the New York Fed, by the Board, and the data were relied on to compile the money supply estimates.

3. There Was Nothing Irregular About the Manner in Which the Errors in Manufacturers' Deposit Reports and in the Money Supply Estimates Were Discovered and Corrected by the Board, the New York Fed and Manufacturers

Discovery and correction of the errors occurred as a result of the application of customary procedures within each of the three institutions. Shortly before publication on October 18 of the money supply estimate for the week ended October 10, a significant

error in the FR 2416¹² filed by Manufacturers was discovered and corrected.¹³ Some of the deposit categories on the FR 2416 were roughly comparable to those on the FR 414. Thus, discovery of the FR 2416 error and continuing concern about certain data on Manufacturers' FR 414's, despite verification, led persons at the New York Fed to believe shortly after publication of the money supply estimate on October 18, that there could have been significant errors in Manufacturers' deposit reports. The problems with the data that Manufacturers had provided in its deposit reports were gradually discovered by the Board, the New York Fed and Manufacturers. Between October 18 and 25, certain officials at the Board, the New York Fed and the Department of the Treasury learned of the probability of large revisions in the money supply estimates for the weeks ended October 3 and 10. On October 25, the Board announced significant revisions in the money supply estimates for those weeks.

After the announcement on October 25, upper level management at Manufacturers first became aware that errors in Manufacturers' deposit reports had caused the revisions. Manufacturers then drafted a statement to be used in responding to press inquiries which acknowledged that there had been reporting errors which grew out of a new form used to calculate data reported to the Federal Reserve System.

Errors were also made in the data provided by Manufacturers for the week ended October 17 which were included in the money supply estimate released October 25. These were discovered by the New York Fed and Manufacturers and corrected by Manufacturers. Other insignificant errors were made in the data for the week ended October 24. All of the corrections of the data were reflected in revised estimates published in November 1979.

4. Those Persons Who Were in a Position to Have Profited Improperly From a Plan or Scheme to Distort the Money Supply Estimates Did Not Engage in Any Securities Trading Activities in October 1979 Inconsistent With Their Previous Securities Trading Activities.¹⁴

A plan or scheme to distort the money supply estimates would probably be reflected in unusual securities trading activity by persons with access to or knowledge of confidential information about the errors, the erroneous money supply estimates or their revisions or in unusual activity in the securities markets most responsive to interest rate changes. Our inquiry, as discussed in the following sections of the Report, revealed no unusual securities trading activity by Manufacturers as an institution or by individuals at Manufacturers, the Board or the New York Fed. In addition, our inquiry revealed no unusual unexplained activity reported by major dealers in certain government securities markets.

¹²FR 2416, "Weekly Report of Assets and Liabilities for Large Banks," is a detailed report of assets and liabilities for a single day, Wednesday, filed voluntarily each week with the various Federal Reserve Banks by 171 large commercial banks throughout the country.

¹³A more detailed description appears at pages 29-30 of the Appendix.

¹⁴There is one possible exception to this; see pages 23-24, *infra*.

¹⁰A more detailed description appears in Part IV A of the Appendix.

¹¹A more detailed description appears in Part IV B of the Appendix.

C. Manufacturers and those individuals at Manufacturers, the Board and the New York Fed who had access to or knowledge of confidential information about the errors in Manufacturers' deposit reports, the erroneous money supply estimates or their revisions did not misuse such information

With the assistance of PW, we analyzed the activities of Manufacturers' commercial banking trading departments, its trust division and Lionel D. Edie & Company, Inc. (a wholly owned subsidiary of Manufacturers that provides investment management) during October 1979 to determine whether Manufacturers as an institution might have taken improper advantage of knowledge of the errors in the deposit reports or in the money supply estimates. The analysis focused on transactions and positions taken by Manufacturers that might have anticipated the announcement of the erroneous estimates, particularly on October 18, or the subsequent announcements of revisions of the estimates, particularly on October 25.

The analysis of the commercial banking trading activities concentrated on the following areas: (1) investment portfolio; (2) trading portfolio; (3) domestic liability management department; (4) foreign exchange; (5) international department liability management; (6) major overseas branches and subsidiaries (on the basis of the limited information readily available); and (7) treasurer's department of Manufacturers Hanover Corporation, Manufacturer's parent company. The analysis of the activities of the trust division and Lionel D. Edie focused on fixed income securities. We understood that these were more likely than were equity securities to be affected by information about the money supply estimates.

Although the type and extent of analysis varied according to the nature of the particular trading activity and the availability of information within each area, the general approach was as follows. Through interviews with key managers in each area, depositions, and examination of relevant internal documents, we reviewed management policies and decisions underlying trading activity during October 1979. We obtained the automated and manually prepared reports used in each area, such as the daily dealer records of transactions, the daily records of trading positions and the monthly statements of profits and losses, balance sheets, and average positions or balances. We analyzed trading positions and transactions in comparison to internal trading limits, to movements in the relevant financial markets in October, and to the chronology of events associated with the submission by Manufacturers of the erroneous deposit data and the discovery of the errors. In the commercial area, we compared Manufacturers' average balances and trading volumes or positions taken in October to Manufacturers' prior balances volumes and positions to determine whether trading activity during October appeared to be unusual, and we compared profits earned in October to those in prior months to determine whether there were any unusual or unexplained variations during October.

To determine whether any person used confidential information concerning the errors in the deposit reports or in the money supply estimates for the purpose of trading for personal benefit, we identified the persons with access to such confidential information. We interviewed or sent questionnaires to the persons at each of the three institutions who were involved in the

preparation or processing of data used to compile the money supply estimates, or who we knew had access to such data or to the estimates.

In addition, with the assistance of PW, we conducted a limited inquiry into certain government securities market activities by major dealers for the period from late September through early November 1979.¹⁵ The purpose of this inquiry was to identify for further investigation any anomalies in market activity, i.e., significant variations in trading volume or direction by a dealer with respect to the timing of the money supply announcements and as compared with comparable dealers, all dealers in the aggregate and the dealer's usual activity. In addition, the information obtained was used to check the direct statements of the persons interviewed. The absence of any anomalous market activity, although not determinative, tended to corroborate statements by these persons that confidential information had not been improperly used.

1. Manufacturers, and Those Individuals at Manufacturers, the Board and the New York Fed Who Had Access to or Knowledge of Confidential Information About the Errors in Manufacturers' Deposit Reports, the Erroneous Money Supply Estimates or Their Revisions Did Not Engage in Securities Trading Activities for Their Own or Related Accounts Inconsistent With Their Previous Securities Trading Activities

a. Securities trading activities by Manufacturers

Our analysis, performed in conjunction with PW, revealed that there were no unusual securities trading activities in October and specifically on or about the critical dates of October 11, 18 and 25 by Manufacturers' commercial banking trading departments or, with regard to fixed income securities, by its trust division or Lionel D. Edie.

In each instance, unless otherwise noted, management responsible for the relevant investment portfolio stated that they had no knowledge of the erroneous money supply estimates or of errors in deposit data submitted by Manufacturers until such errors were made public when the revisions were announced.

(1) *Investment Portfolio.* There was no evidence of unusual activity in the investment portfolio in the month of October.

(2) *Trading Portfolio.* Profits earned from trading in government, federal agency and municipal securities, and bankers' acceptances did not represent a significant part of Manufacturers' net income in October 1979. Average closing positions and net trading profits and losses earned in October 1979 did not appear to show any unusual or unexplained variances from previous months.

Positions taken in the government and agency portfolio were reduced following the announcement of new reserve requirements on October 6, and, after that date, Manufacturers largely stayed out of the market. Long and short positions taken in the latter half of October appeared to react to market conditions and public information affecting interest rates and prices. There was no evidence of unusual trading activity.

The Municipal Securities Department also attempted to reduce the size of its portfolio following the October 6 announcement. No significant increases or decreases in the portfolio occurred in the latter half of October.

¹⁵ See pages 26 to 28, *infra*.

The Bankers' Acceptance Department carried out a selling, rather than a trading, function. Its function was to generate funds by selling discounted drafts drawn under letters of credit issued by Manufacturers' International Lending Department. Following the announcement on October 6, Manufacturers attempted to reduce gradually the size of its acceptance portfolio. There were no significant fluctuations in the size of this portfolio during the latter half of October.

(3) *Domestic Liability Management Department.* The Domestic Liability Management Department was responsible for obtaining "wholesale" deposit funds from banks, large companies, and other financial institutions. No evidence was found of efforts to anticipate any changes in interest rates that might result from the announcement of the erroneous money supply estimates, or the subsequent revisions of those estimates.

A section of the Department called the Money Desk was responsible for maintaining Manufacturers' Federal Reserve Account at the level required by the Board through transactions in federal funds and repurchase agreements. The Assistant Vice President responsible for the Money Desk stated that he was informed of errors in Manufacturers' deposit data on October 22 and, on October 23, of the estimated effects of these errors on Manufacturers' reserve requirements for the week ending October 24. As a result of this information, he took action on October 23 and 24 to reduce the reserve account balance so as to meet the revised reserve requirement for that period. He testified that he was not aware that there was any connection between the errors in deposit data and the money supply estimates until the causes of the erroneous money supply estimates were made public. The record reveals that, before public announcement, he discussed the errors only with others assigned to the Money Desk, and neither he nor they engaged in any securities trading for personal benefit.

Manufacturers' wholesale deposit liabilities during October 1979 were maintained at levels close to the goals set by management. Balances in Manufacturers' Federal Reserve Account fluctuated considerably from day to day. These fluctuations appeared to relate primarily to the weekly pattern of inflows and outflows of funds across Manufacturers' demand deposit, commercial loan, and other accounts, and the need to control the day-to-day balance in the Reserve Account so as to meet as closely as possible the aggregate reserve requirements each week. The average balances of wholesale deposit and other funding sources during October 1979 did not show any unusual variances from previous months.

The increase in the aggregate cost of wholesale money provided by the Domestic Liability Management Department in October and November 1979 appeared to be consistent with the general level of increase in market interest rates in that period. There was no evidence that Manufacturers was able to avoid a substantial increase in its interest costs as a result of the general increase in market rates.

The volume of federal funds sold during October did not show any unusual or unexplained variations either in the pattern of day-to-day trading during the month or in comparison to previous months. The increase in profits from federal funds trading in October appeared to be due primarily to a significant increase in the spreads available in the market following October 6.

Most of these profits appeared to have been earned in the period immediately following the October 6 announcement of increased reserve requirements.

(4) *Foreign Exchange.* Foreign exchange limits and positions taken were small in comparison to Manufacturers' total assets and the profits were not a significant part of net income. There was no evidence of any attempt by Manufacturers to take foreign exchange positions in anticipation of any exchange rate movements that might result from the announcement of the erroneous money supply estimates or the subsequent revision of those estimates. Foreign exchange profits earned in October 1979 did not show unusual features in comparison to previous months.

(5) *International Department Liability Management.* Positions taken by the International Department Liability Management (Nassau branch) during October 1979 showed no evidence of trading patterns in anticipation of changes in market interest rates which might have occurred following the announcement of the erroneous money supply estimates or their subsequent revisions. Average asset and liability balances maintained in October did not show any unusual fluctuations in comparison to previous months. Fluctuations in profits earned in the October and November accounting periods (to the 21st of each month) did not appear to be related to the erroneous money supply estimates or their subsequent revisions.

(6) *Major Overseas Branches and Subsidiaries.* Daily commentaries on United States market conditions telexed by Manufacturers' International Department to overseas locations during October 1979 included no statements which indicated advance knowledge of the erroneous money supply estimates or of their subsequent revisions. Based only on summarized data available, the general level of overseas branch foreign exchange and deposit trading in October did not show significant fluctuations compared to other months in 1979. Balance sheets and income statements for October for four major trading branches did not show significant unexplained fluctuations in October compared to September or November 1979.

(7) *Manufacturers Hanover Corporation.* Treasury Department activities of Manufacturers' parent company consisted of short-term money market investments, issuance of commercial paper, and loans to subsidiaries. These activities did not show patterns indicating anticipation of significant changes in market interest rates that might follow publication of the erroneous and revised money supply estimates. Funding activity carried out by the parent company during October did not show any unusual fluctuations in comparison to previous months.

(8) *Trust Division.* The Trust Division stayed out of the long term bond market during October 1979. The Division maintained a substantial proportion of its fixed income portfolio in short maturities. In accordance with the needs of individual portfolios, the Trust Division purchased and sold bonds with maturities greater than one year and swapped bonds of a particular type or quality for another. Towards the end of October, the Division purchased longer term securities. There was no evidence of unusual activity in fixed income securities by the Trust Division in October 1979.

(9) *Lionel D. Edie & Company, Inc.* In mid-September, Lionel D. Edie's New York Office issued fixed income investment

guidelines. These guidelines were not changed during the time period relevant to the erroneous money supply estimates and were implemented by the New York Office in accordance with the needs of individual portfolios during September, October and November. Most of the long term securities purchased were corporate bonds. During October 1979 other purchases and sales of long term securities and swaps of one bond of a particular type or quality for another were made in accordance with the needs of individual portfolios. There was no evidence of unusual trading in fixed income securities by Lionel D. Edie in October 1979.

b. *Securities trading activities by persons at Manufacturers, the Board and the New York Fed*

The large majority of persons interviewed or responding to questionnaires did not engage in any securities transactions in October 1979. Others whom we questioned had engaged in transactions during October. However, with one possible exception discussed below, none of these transactions appeared to be related, directly or indirectly, to confidential information about the errors, the erroneous money supply estimates or their revisions, and none appeared to be inconsistent with previous trading activity. In addition, each person interviewed or responding to a questionnaire stated that he or she had no knowledge of any person engaging in securities trading activities on the basis of nonpublic information concerning the erroneous money supply estimates.

We found only one securities transaction by any person at Manufacturers, the Board or the New York Fed that raised questions we were unable to resolve. This transaction involved Rudolph Thunberg, then a Vice President of the New York Fed. Mr. Thunberg, who is no longer with the New York Fed, testified under oath to the following effect. Upon returning to his office at the New York Fed on October 25, having been out of town since October 16, he was informed of the erroneous money supply estimates and their impending revision. Later in the morning, in response to a telephone message, he called someone whose name he did not recognize. That person was a broker at Bear Stearns & Co. who informed him about a new municipal bond fund (a unit investment trust) similar to one Mr. Thunberg had inquired about previously. Mr. Thunberg had earlier decided to make this type of investment if presented with a yield he believed attractive. He asked the broker to send him a prospectus for the fund, which arrived several days later, but he was otherwise noncommittal. That afternoon, after waiting for the revisions to the money supply estimates to be released at 4:10 p.m., and seeing that they had appeared on the Dow Jones wire at 4:13 p.m., Mr. Thunberg called the Bear Stearns & Co. broker at approximately 4:30 p.m. to place an order for 25 units (for approximately \$25,000) of the fund. That broker was out of his office but another broker took Mr. Thunberg's order, which was stamped 4:39 p.m. Mr. Thunberg did not discuss the money supply error or revision with the broker.

We note that Mr. Thunberg testified that his account with Bear Stearns & Co. was his first and only brokerage account and was opened for purposes of this transaction. The investment constituted a significant portion of his portfolio and was in fact the largest investment he had ever made. Mr. Thunberg also testified to the effect that his other assets were substantial in relation to his investment in the municipal bond fund.

In addition, we note that the value of the units in the fund advanced very slightly during the week following Mr. Thunberg's purchase.

Mr. Thunberg cooperated with our investigation in testifying under oath about the transaction and providing documents. We had one brief telephone interview with the two brokers at Bear Stearns & Co., and they gave us the documents we requested. The limited information obtained from them is consistent with Mr. Thunberg's account of the transaction. In response to our request for sworn testimony from the brokers, the Director of the Legal Compliance Division of Bear Stearns & Co. told us that the firm had no objection but that the brokers declined to be interviewed under oath. We were given no explanation for their refusal. Without the brokers' sworn testimony, we were unable to reach any conclusions with regard to the matter. For this reason, we referred the matter to the Securities and Exchange Commission and requested that they make an inquiry. We understand that the matter is under consideration by the Commission staff.

2. *Persons at Manufacturers, the Board and the New York Fed Who Had Access to or Knowledge of Confidential Information About the Errors in Manufacturers' Deposit Reports, the Erroneous Money Supply Estimates or Their Revisions Did Not Disclose This Information Outside of the Official Course of Business*

Based on interviews and our reconstruction of the events, we determined that, prior to the public release of the revisions, most of the discussions about the errors, the erroneous money supply estimates or their revisions occurred among three classes of persons: those involved in or responsible for the collection and processing of the erroneous data; those who relied on the erroneous data in developing the money supply estimates; and those high-level officials who normally have access to money supply estimates before publication. In addition, information concerning the errors was disclosed to certain persons at the Department of the Treasury in the official course of business by high-level Board and New York Fed officials during a meeting and luncheon. The Treasury officials did not discuss the errors with any persons other than those present at the meeting or luncheon prior to the time that information concerning such errors became public.

The only advance disclosure of confidential information to a non-government person occurred on the evening of October 24, 1979. The public information officer of the New York Fed was responsible for the public release of the estimates. In the belief that Manufacturers' high-level management had been fully briefed on the errors, he called Manufacturers' public information officer to find out how Manufacturers was planning to handle disclosure of the revised money supply estimates. He told the officer that revisions to previously published money supply estimates due to errors in Manufacturers' deposit reports would be released the following day. Manufacturers' public information officer was not then aware of this fact, and he was asked to keep it in confidence until the revisions to the money supply estimates were released to the public. The record reveals that he did not discuss the matter with anyone before the following day's press conference, nor did he engage in any securities transactions before public release of the information.

Individuals' statements that they did not disclose information to anyone outside of the ordinary course of business were corroborated by our analysis of the most relevant securities markets, those for government securities. Had there been a leak of the information about the errors, one would have expected to find evidence of activity in these markets. There were no unusual unexplained market transactions reported by any major government securities dealers during October.

VI. NO OTHER INSTITUTION OR INDIVIDUAL APPEARS TO HAVE ENGAGED IN SECURITIES TRANSACTIONS WITH CONFIDENTIAL INFORMATION ABOUT THE ERRORS IN MANUFACTURERS' DEPOSIT REPORTS, THE ERRONEOUS MONEY SUPPLY ESTIMATES OR THEIR REVISIONS

We undertook, with the assistance of PW, an analysis of the securities markets in which transactions by a knowledgeable person with advance information about the erroneous money supply estimates would probably have occurred. Our inquiry was limited for practical reasons to the financial markets considered most likely to be involved in any attempt to profit from improper and knowing use of advance information about the errors or the erroneous money supply estimates. In theory, of course, virtually any investment medium could be affected by expectations about the money supply and its relationship to interest rates. We concluded that it would be impossible to investigate adequately all markets, and the experts whom we consulted indicated that advance information about the errors would probably have been used by a knowledgeable person, if at all, to purchase or sell government securities, including government-backed securities and futures contracts therein. Accordingly, our inquiry was limited to an analysis of certain government securities transactions.

The largest dealers in government securities voluntarily filed with the New York Fed a daily report on form FR 2004. These reports provided data on the dealers' transactions, positions, borrowings and financing in several varieties of U.S. Government securities. It is our understanding that substantially all transactions in U.S. Government and agency securities were reflected in transactions reported on form FR 2004.

The FR 2004 data were the best available data on transactions in the government securities markets. However, a substantial portion of the data was filed by telephone and telex and was transcribed onto forms at the New York Fed and the reports were not confirmed by the New York Fed. In addition, the forms, issued by the Federal Reserve in 1976, did not include information on sophisticated financing arrangements developed since that time.

The New York Fed provided this data to us in automated form for the period from September 26 through November 5, 1979. With the assistance of PW, we extracted from the FR 2004's the data for purchases and sales of the types of securities that would be most sensitive to interest rate fluctuations. These included Treasury Bills of 92 days or less, U.S. Government Coupon Securities due after one year and Federal Agency Securities due after one year.

Unusual trading activity was defined as trading activity in any of the three classes of securities that deviated significantly in volume and/or direction from the trading by other dealers within the same group (large commercial banks, brokerage and investment firms, unaffiliated dealers) or by all other dealers or from the individual deal-

er's normal trading activities. Although data for the entire period were analyzed, our focus was on trading that took place on or about October 18, the date on which the erroneous estimate for the week ended October 10 was released, and October 25, the date on which the revisions were announced to the public.

A. There was no unusual unexplained trading activity reported by major government securities dealers in October

Review of dealer trading activity during October had to take into account the major events affecting the securities markets at that time. For a period prior to October 6, 1979, market volumes were steady, at apparently normal levels. After Chairman Volcker's announcement on October 6 that the Board was adopting a new policy on money supply, however, market volumes and interest rates became volatile and remained so for the rest of the month of October.

Three instances of reported trading activity that on first examination appeared to be unusual were identified from the FR 2004 reports; these were investigated. What appeared to be the largest anomaly, a large net sale and a large net purchase for one dealer, resulted from a typographical error on the dealer's FR 2004's. A decimal point was erroneously misplaced by two digits in the report of a sale and a purchase.

The second anomaly, net sales of a class of government securities on two consecutive days, was significantly smaller than the first anomaly. After inquiry, we found that the dealer had received a large allotment of that class of securities, and most of the net sales were accounted for by sales of the securities taken in the allotment. The net sales were small relative to the gross positions this dealer held in this class of securities and relative to its total volume of trading reported on its FR 2004.

The last anomaly, net sales of a class of government securities on two days in October 1979, was also significantly smaller than the first anomaly. The dealer had taken two allotments of this class of securities early in the month of October, and as a result, maintained a net long position. Following the Board's announcement on October 6, and the subsequent fall in securities prices, the dealer reduced its long position by selling securities from the allotments. The net sales which were identified as an anomaly were primarily sales of the securities taken in these allotments.

Based upon our inquiry, we found and have concluded that there was nothing unusual about what initially appeared to be anomalous trading activity.

(This Report is accompanied by an Appendix and Exhibits that contain a more detailed statement of the evidence on which our findings and conclusions are based.)

Respectfully submitted,

ALAN B. LEVENSON,
Special Counsel.
FULBRIGHT & JAWORSKI.

□ 2020

FEDERAL INSECTICIDE, FUNGICIDE AND RODENTICIDE ACT

(Mr. FISH asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. FISH. Mr. Speaker, yesterday the House passed H.R. 5203, the reau-

thorization of the Federal Insecticide, Fungicide, and Rodenticide Act. The action taken on the Harkin amendment to H.R. 5203 was an important victory for the sanctity of State responsibility over chemical registrations. No one should doubt the authority of Congress to act on chemical registrations. The issue raised by the Harkin amendment, which was answered in the affirmative, is whether it is a wise policy to tamper with existing law.

When a national problem involving public health and safety calls for a national response, the Constitution in article I, section 8 clearly empowers the Congress to act on behalf of the general welfare of the American people. In many such cases we make a finding that the response of the several States is uneven. So we set a Federal standard, a national norm. But out of a proper respect for the particular interests of our sister State governments, we normally defer to their judgment that a stricter standard would be more appropriate to their circumstances. We are asked now to limit a State's power to do just that. If we do, we would be diluting a principle long observed.

Over and over again, we have affirmed an appropriate balance in our federalist system between the clear constitutional powers of the Congress and the equally clear responsibility of the States to deal with their own health and safety needs by legislating more strictly than the Federal norm. For example, the Solid Waste Disposal Act specifically provides for retention of State authority to enact stricter standards than those required by the Federal Government. The Clean Air Act permits States to adopt certain standards that are at least as strict as Federal requirements.

Mr. Speaker, a decision by this House to abandon our usual deference to the elected State Representatives must be based only on the most compelling grounds. I can conceive of situations arising in a time of national mobilization in which expedition and the paramount interest of the Nation would call for curtailing the role of the States. This is clearly not the case before us. An inconvenience to manufacturers, a potential effect on trade are not equal in importance to fundamental principles of States responsibilities.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mrs. SCHNEIDER (at the request of Mr. MICHEL), from 3 p.m. for the balance of the day, today on account of illness.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. HUNTER) to revise and extend their remarks and include extraneous material:)

Mr. CORCORAN, for 30 minutes, today.

Mr. GINGRICH, for 60 minutes, on August 16.

Mr. GINGRICH, for 60 minutes, on August 17.

Mr. LATTI, for 30 minutes, today.

Mr. SMITH of New Jersey, for 10 minutes, on August 13.

(The following Members (at the request of Mrs. Boggs) to revise and extend their remarks and include extraneous material:)

Mrs. Boggs, for 60 minutes, today.

Mr. RODINO, for 5 minutes, today.

Mr. GONZALEZ, for 30 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. COELHO, for 5 minutes, today.

Mr. ALEXANDER, for 10 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mrs. SCHNEIDER, to revise and extend her remarks in support of the Wilderness Protection Act, H.R. 6542, in the body of the RECORD today.

Mr. PORTER, prior to the vote on H.R. 6542 today.

Mr. WIRTH, prior to the vote on H.R. 6542 today.

Mrs. Boggs, and to include extraneous matter, notwithstanding the fact that it exceeds two pages of the CONGRESSIONAL RECORD and is estimated by the Public Printer to cost \$2,856.

(The following Members (at the request of Mr. HUNTER) and to include extraneous matter:)

Mr. McCLOSKEY.

Mr. HOPKINS.

Mr. BAILEY of Missouri.

Mr. RUDD.

Mr. DERWINSKI in three instances.

Mr. SENSENBRENNER.

Mr. CLINGER.

Mr. PORTER.

Mr. MOORHEAD.

Mr. OXLEY.

Mr. BEREUTER.

Mr. SHUSTER.

Mr. McGRATH.

Mr. LAGOMARSINO.

Mr. CRAIG.

Mr. COUGHLIN.

Mr. GILMAN in two instances.

Mr. GOODLING in two instances.

Mr. MARLENEE.

Mr. DOUGHERTY.

(The following Members (at the request of Mrs. Boggs) and to include extraneous matter:)

Mr. OTTINGER in two instances.

Mrs. Boggs in two instances.

Mr. BRINKLEY in two instances.

Mr. MAZZOLI.

Mr. SYNAR.

Mr. MONTGOMERY.

Mr. FORD of Michigan.

Mr. DIXON.

Mr. LaFALCE.

Mr. WYDEN.

Mr. FUQUA.

Mr. ZABLOCKI.

Mr. MATSUI.

Mr. MINETA in two instances.

Mr. LEHMAN.

Mr. ROSENTHAL.

Mr. BEDELL.

Mr. MILLER of California.

Mr. MOFFETT.

Mr. RATCHFORD.

SENATE BILL AND JOINT RESOLUTION REFERRED

A bill and joint resolution of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 537. An act to aid State and local governments in strengthening and improving their judicial systems through the creation of a State Justice Institute; to the Committee on the Judiciary.

S.J. Res. 230. Joint resolution to authorize and request the President to designate August 15, 1982, as "Will Rogers and Wiley Post's Day"; to the Committee on Post Office and Civil Service.

SENATE ENROLLED BILL SIGNED

The SPEAKER announced his signature to an enrolled bill of the Senate of the following title:

S. 1193. An act authorize appropriations for fiscal years 1982 and 1983 for the Department of State, the International Communication Agency, and the Board for International Broadcasting, and for other purposes.

ENROLLED JOINT RESOLUTION SIGNED

Mr. HAWKINS, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a joint resolution of the House of the following title, which was thereupon signed by the Speaker:

H.J. Res. 541. Joint resolution concerning the successful completion of the test flight phase of the Space Shuttle program.

ADJOURNMENT

Mr. GONZALEZ. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 8 o'clock and 22 minutes p.m.), the House adjourned until tomorrow, Friday, August 13, 1982, at 10 a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

4572. A letter from the Director, Office of Management and Budget, Executive Office of the President, transmitting a cumulative report on rescissions and deferrals of budget authority as of August 1, 1982, pursuant to section 1014(e) of Public Law 93-344 (H. Doc. No. 97-225); to the Committee on Appropriations, and ordered to be printed.

4573. A letter from the Assistant Secretary of the Army (Installations, Logistics and Financial Management), transmitting notice of the decision to convert to contractor performance the bus service and motor vehicle operation activity at Fort Ord, Calif., pursuant to section 502(b) of Public Law 96-342; to the Committee on Armed Services.

4574. A letter from the Assistant Secretary of the Army (Installations, Logistics and Financial Management), transmitting notice of the decision to convert to contractor performance the maintenance and repair of canvas, tents, tarps, furniture, upholstery, and other equipment at Fort Ord, Calif., pursuant to section 502(b) of Public Law 96-342; to the Committee on Armed Services.

4575. A letter from the Assistant Secretary of the Navy (Shipbuilding and Logistics), transmitting notice of the Navy's decision to study the conversion to contractor performance the Marine Corps various functions at different installations, pursuant to section 502(a) of Public Law 96-342; to the Committee on Armed Services.

4576. A letter from the Principal Deputy Assistant Secretary of Defense (Comptroller), transmitting a report of the value of property, supplies and commodities provided by the Berlin Magistrate for the quarter April 1, 1982 through June 30, 1982, pursuant to section 719 of Public Law 97-114; to the Committee on Appropriations.

4577. A letter from the President and Chairman, Export-Import Bank of the United States, transmitting a statement describing a proposed transaction involving U.S. exports to Indonesia exceeding \$100,000,000 or more, pursuant to section 2(b)(3)(i) of the Export-Import Bank Act of 1945, as amended; to the Committee on Banking, Finance and Urban Affairs.

4578. A letter from the General Counsel, Federal Emergency Management Agency, transmitting a draft of proposed legislation to amend the National Flood Insurance Act of 1968, as amended; to the Committee on Banking, Finance and Urban Affairs.

4579. A letter from the Secretary of Education, transmitting the annual report on the status of vocational education in fiscal year 1981, pursuant to the Vocational Education Act of 1963, as amended; to the Committee on Education and Labor.

4580. A letter from the Director of ACTION, transmitting final notice of Young Volunteers in ACTION (YVA) guidelines, pursuant to section 420(d) of the Domestic Volunteer Act of 1973, as amended; to the Committee on Education and Labor.

4581. A letter from the Chairman, Federal Communications Commission, transmitting a summary of actions taken in connection with the rulemaking proceeding relating to revision of its uniform system of accounts, pursuant to section 1253 of Public Law 97-

35; to the Committee on Energy and Commerce.

4582. A letter from the Vice President for Government Affairs, National Railroad Passenger Corporation, transmitting the financial report of the Corporation for the month of March 1982, pursuant to section 308(a)(1) of the Rail Passenger Service Act of 1970, as amended; to the Committee on Energy and Commerce.

4583. A letter from the Director, Federal Emergency Management Agency, transmitting notice of a proposed new records system, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

4584. A letter from the Executive Director, the President's Commission on Executive Exchange, transmitting a draft of proposed legislation to amend section 209(e) of title 18, United States Code; to the Committee on the Judiciary.

4585. A letter from the Assistant Secretary of the Treasury (Legislative Affairs), transmitting the fourth annual report on fishery allocations, permits and foreign import barriers, pursuant to section 201(f) of the Fishery Conservation and Management Act of 1976, as amended; to the Committee on Merchant Marine and Fisheries.

4586. A letter from the Assistant Administrator for Water, Environmental Protection Agency, transmitting final and proposed regulations of the Clean Water Act relating to variances from secondary treatment requirements for municipal discharges to marine waters, pursuant to section 301(h) of Public Law 97-117; to the Committee on Public Works and Transportation.

4587. A letter from the Comptroller General of the United States, transmitting a report on appropriated funds for Defense Commissary Operations (GAO/AFMD-82-45, August 11, 1982); jointly, to the Committees on Government Operations and Armed Services.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. BROOKS: Committee on Government Operations. Report entitled "Failure of Federal Departments and Agencies To Collect Audit-Related Debts" (Rept. No. 97-727). Referred to the Committee of the Whole House on the State of the Union.

Mr. BROOKS: Committee on Government Operations. Report entitled "Failure of the Air Force and Navy To Develop Common Radar Warning Receivers Is Costly" (Rept. No. 97-728). Referred to the Committee of the Whole House on the State of the Union.

Mr. BROOKS: Committee on Government Operations. Report entitled "DOD Wastes Hundreds of Millions of Dollars by Duplicating Base Support Services" (Rept. No. 97-729). Referred to the Committee of the Whole House on the State of the Union.

Mr. BROOKS: Committee on Government Operations. Report entitled "Direct Broadcast Satellites: International Representation and Domestic Regulation" (Rept. No. 97-730). Referred to the Committee of the Whole House on the State of the Union.

Mr. BROOKS: Committee on Government Operations. Report entitled "Security Classification and Executive Order 12356" (Rept. No. 97-731). Referred to the Commit-

tee of the Whole House on the State of the Union.

Mr. BROOKS: Committee on Government Operations. Report on "Presidential Libraries: Unexplored Funding Alternatives" (Rept. No. 97-732). Referred to the Committee of the Whole House on the State of the Union.

Mr. DE LA GARZA: Committee on Agriculture. H.R. 5618. A bill to require the Secretary of Agriculture to establish a network of volunteers to assist in making available information and advice on organic agriculture for family farms and other agricultural enterprises, to establish pilot projects to carry out research and education activities involving organic farming, and to perform certain other functions relating to organic farming, with special emphasis on family farms; with an amendment (Rept. No. 97-733). Referred to the Committee of the Whole House on the State of the Union.

Mr. JONES of North Carolina: Committee on Merchant Marine and Fisheries. H.R. 4828. A bill to set aside certain surplus vessels for use in the provision of health and other humanitarian services to developing countries; with an amendment (Rept. No. 97-734). Referred to the Committee of the Whole House on the State of the Union.

Mr. PERKINS: Committee on Education and Labor. House Joint Resolution 429. Joint resolution to establish State commissions on teacher excellence; with amendments (Rept. No. 97-735). Referred to the House Calendar.

Mr. PERKINS: Committee on Education and Labor. H.R. 6485. A bill to amend and extend the Tribally Controlled Community College Assistance Act of 1978, and for other purposes; with an amendment (Rept. No. 97-736). Referred to the Committee of the Whole House on the State of the Union.

Mr. JONES of North Carolina: Committee on Merchant Marine and Fisheries. H.R. 6732. A bill to amend the International State Container Act; with an amendment (Rept. No. 97-737). Referred to the Committee of the Whole House on the State of the Union.

Mr. MOAKLEY: Committee on Rules. House Resolution 559. Resolution waiving certain points of order against H.R. 6956, a bill making appropriations for the Department of Housing and Urban Development, and for sundry independent agencies, boards, commissions, corporations, and offices for the fiscal year ending September 30, 1983, and for other purposes (Rept. No. 97-738). Referred to the House Calendar.

Mr. ZEFERETTI: Committee on Rules. House Resolution 560. Resolution waiving certain points of order against H.R. 6957, a bill making appropriations for the Departments of Commerce, Justice, and State, the Judiciary, and related agencies for the fiscal year ending September 30, 1983, and for other purposes (Rept. No. 97-739). Referred to the House Calendar.

Mr. FROST: Committee on Rules. House Resolution 561. Resolution waiving certain points of order against H.R. 6968, a bill making appropriations for military construction for the Department of Defense for the fiscal year ending September 30, 1983, and for other purposes (Rept. No. 97-740). Referred to the House Calendar.

Mr. PEPPER: Committee on Rules. House Resolution 562. Resolution providing for the consideration of H.R. 6755, a bill to authorize assistance to promote economic revitalization in the Caribbean Basin region (Rept. No. 97-741). Referred to the House Calendar.

Mr. DERRICK: Committee on Rules. House Resolution 563. Resolution providing for the consideration of H.R. 3432, a bill to amend the Water Resources Development Act of 1974 relating to planning and evaluating water resources projects, and for other purposes (Rept. No. 97-742). Referred to the House Calendar.

Mr. ROSTENKOWSKI: Committee on Ways and Means. House Resolution 521. Resolution disapproving the President's recommendation to extend certain waiver authority under the Trade Act of 1974 with respect to Romania (Adverse report No. 97-743). Referred to the Committee of the Whole House on the State of the Union.

Mr. WHITE: Committee on Armed Services. H.R. 6954. A bill to amend title 10, United States Code, to provide for more efficient and effective operation of the Joint Chiefs of Staff and to establish a Senior Strategy Advisory Board in the Department of Defense (Rept. No. 97-744). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. RODINO (for himself, Mr. EDWARDS of California, Mr. McCORMY, and Mr. BUTLER):

H.R. 6978. A bill to provide for the appointment of U.S. bankruptcy judges under article III of the Constitution, and for other purposes; to the Committee on the Judiciary.

By Mrs. BOGGS (for herself, Mr. TRIBLE, Mr. ANDERSON, Mr. BENJAMIN, Mr. BENNETT, Mr. BONIOR of Michigan, Mr. BONKER, Mr. DOUGHERTY, Mr. LOTT, Mr. FORD of Tennessee, Mr. GAYDOS, Mr. HARTNETT, Ms. MIKULSKI, Mr. SNYDER, Mr. STANGELAND, Mr. WILSON, Mr. YOUNG of Alaska, Mr. MURTHA, and Mr. ZEFERETTI):

H.R. 6979. A bill to promote increased ocean transportation of bulk commodities in the foreign commerce of the United States in U.S.-flag ships, to strengthen the defense industrial base, and for other purposes; to the Committee on Merchant Marine and Fisheries.

By Mr. BROWN of Colorado:

H.R. 6980. A bill to amend the Wild and Scenic Rivers Act of 1968 as amended by designating portions of the Elk River, Colo. and the Encampment River, Colo.; to the Committee on Interior and Insular Affairs.

By Mr. GUNDERSON:

H.R. 6981. A bill to amend chapter 44 (relating to firearms) of title 18 of the United States Code to modify the Federal gun control system; to the Committee on the Judiciary.

By Mr. HOPKINS (for himself, Mr. SNYDER, Mr. HUBBARD, and Mr. ROGERS):

H.R. 6982. A bill to temporarily waive the 120-percent factor used in determining whether extended unemployment benefits are payable in a State; to the Committee on Ways and Means.

By Mr. KASTENMEIER:

H.R. 6983. A bill to amend title 17 of the United States Code to improve the protection afforded to computer software, and for

other purposes; to the Committee on the Judiciary.

By Mr. PEYSER:

H.R. 6984. A bill to amend title II of the Social Security Act to restore eligibility for child's insurance benefits in the case of children aged 18 through 22 who attend post-secondary schools and whose family income is \$30,000 or less; to the Committee on Ways and Means.

By Mr. RATCHFORD (for himself, Mr. PEPPER, Mr. GOODLING, and Mr. WEISS):

H.R. 6985. A bill to amend the Vocational Education Act of 1963 to make grants available for vocational programs for older persons and to establish a grant program for the establishment of model centers for vocational education for older persons; to the Committee on Education and Labor.

By Mr. REGULA (for himself, Mr. FORSYTHE, Mr. GOODLING, Mr. MITCHELL of New York, Mr. JACOBS, Mr. BEVILL, Mr. HENDON, Mr. SOLOMON, Mr. KINDNESS, Mr. SUNIA, Mr. DOUGHERTY, Mr. HAMMERSCHMIDT, Mr. HILER, Mr. WEBER of Ohio, Mr. MINISH, Mr. YOUNG of Alaska, Ms. MIKULSKI, and Mrs. MARTIN of Illinois):

H.R. 6986. A bill to authorize the President to impose a tariff surcharge on the products of certain countries in order to offset the expense of providing U.S. defense assistance to such countries; to the Committee on Ways and Means.

By Mr. ROUSSELOT:

H.R. 6987. A bill to permit the investment by employee benefit plans in residential mortgages; jointly, to the Committees on Education and Labor and Ways and Means.

By Mr. SHARP:

H.R. 6988. A bill to amend the Federal Election Campaign Act of 1971 to reduce the contribution limitation for multicandidate political committees with respect to elections for Federal office and to impose additional limitations with respect to congressional elections; to the Committee on House Administration.

By Mr. FUQUA:

H.J. Res. 570. Joint resolution proposing an amendment to the Constitution of the United States providing for a procedure for removal from office, in every 10th year of service, of the judges of the Supreme Court and inferior Federal courts; to the Committee on the Judiciary.

By Mr. MARKEY (for himself, Mr. CONTE, Mr. BINGHAM, Mr. MOAKLEY, Mr. UDALL, Mr. LOWRY of Washington, Mr. WEISS, Mr. WAXMAN, Mr. EVANS of Iowa, Mr. YATES, Mr. BLANCHARD, Mr. RICHMOND, Mr. LUNDINE, Mr. MOFFETT, Mr. FOWLER, Mr. RODINO, Mr. REUSS, Mr. MOTT, Mr. DENARDIS, Mr. EDGAR, Mr. HALL of Ohio, Mr. ROYBAL, Mr. MCHUGH, Mr. EVANS of Indiana, Mr. ECKART, Mr. D'AMOURS, Mr. LAFALCE, Mr. FAUNTRON, Ms. MIKULSKI, Mr. BARNES, Mr. KOGOVSEK, Mr. GRAY, Mr. OTTINGER, Mr. LANTOS, Mr. WEAVER, Mr. GEJDENSON, Mr. SHANNON, Mr. STARK, Mr. KASTENMEIER, Mr. AUCCOIN, Mr. DASCHLE, Mr. EARLY, Mr. KILDEE, Mr. BEILSON, Mr. COELHO, Mr. FOGLETTA, Mr. PEASE, Mr. FORD of Michigan, Mr. MAZZOLI, Mr. MATSUI, Mr. MINETA, Mr. STOKES, Mr. FASCELL, Mr. OBERSTAR, Mr. SHAMANSKY, Mr. SCHUMER, Mr. DORGAN of North Dakota, Mr. HOWARD, Mr. GLICKMAN, Mr. BROWN of California, Mrs. KEN-

NELLY, Mrs. SCHNEIDER, Mr. HARKIN, Mr. EDWARDS of California, Mr. DIXON, Mr. BEDELL, Mr. ROSENTHAL, Mr. GARCIA, Mr. RATCHFORD, Mr. RANGEL, Mr. LEACH of Iowa, Mr. BOLAND, Mr. FRANK, Mr. SEIBERLING, Mrs. MARTIN of Illinois, Mr. MINISH, Mr. MCKINNEY, Mr. RUSSO, Mr. WILLIAM J. COYNE, Mr. LUKE, Mr. MAVEROULES, Mr. PEYSER, Mr. DWYER, Mr. SMITH of Iowa, Mrs. FENWICK, Mrs. SCHROEDER, Mr. LEHMAN, Mr. WILLIAMS of Montana, Mr. BRODHEAD, Mr. PATTERSON, Mrs. HECKLER, Mr. SCHEUER, Ms. OAKAR, Mr. WASHINGTON, Mr. HOLLENBECK, Mr. STUDDS, Mr. JOHN L. BURTON, Mrs. CHISHOLM, Mr. DELLUMS, Mr. NEAL, Mr. PEPPER, Mr. FLORIO, Mr. ADDABBO, Mr. BONIOR of Michigan, Mr. PANETTA, Mr. MARTINEZ, Mr. NOWAK, Mr. HORTON, Mr. SOLARZ, Mr. BONER of Tennessee, and Mr. WIRTH):

H.J. Res. 571. Joint resolution calling for a mutual and verifiable freeze and reduction in nuclear weapons; to the Committee on Foreign Affairs.

By Mr. MOORE:

H.J. Res. 572. Joint resolution establishing May 15, 1983, as "Peace Officers' Memorial Day"; to the Committee on Post Office and Civil Service.

By Mr. NEAL:

H.J. Res. 573. Joint resolution calling for a mutual and verifiable freeze on and reductions in nuclear weapons; to the Committee on Foreign Affairs.

By Mr. SIMON:

H.J. Res. 574. Joint resolution proposing an amendment to the Constitution altering Federal budget procedures; to the Committee on the Judiciary.

H.J. Res. 575. Joint resolution proposing an amendment to the Constitution of the United States which prohibits the Congress from making any law which causes the total amount of money expended by the United States in any fiscal year to exceed the total amount of revenue of the United States received during that fiscal year; to the Committee on the Judiciary.

By Mr. GILMAN (for himself, Mr. BARNES, Mr. BEDELL, Mr. BINGHAM, Mr. BROWN of California, Mrs. CHISHOLM, Mr. DENARDIS, Mr. DYMALLY, Mr. EDGAR, Mr. FAUNTRON, Mrs. FENWICK, Mr. JEFFORDS, Mr. LEACH of Iowa, Mr. MATSUI, Mr. MOFFETT, Mr. MCHUGH, Mr. MCCLOSKEY, Mr. PRITCHARD, Mrs. SCHNEIDER, Mr. SEIBERLING, Mr. SIMON, Mr. STUDDS, Mr. WON PAT, and Mr. ZABLOCKI):

H. Con. Res. 394. Concurrent resolution expressing the sense of the Congress concerning continuing U.S. participation with respect to a comprehensive law of the sea treaty; to the Committee on Foreign Affairs.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

456. By the SPEAKER: A memorial of the House of Representatives of the State of Illinois, relative to the acquisition by the University of Illinois of the federally owned land currently being used by the Dixon Springs Agricultural Center; to the Committee on Agriculture.

457. Also, a memorial of the Legislature of the State of New York, relative to section

504 of the Rehabilitation Act of 1973; to the Committee on Education and Labor.

458. Also, a memorial of the Legislature of the State of New York, relative to the whereabouts of Raoul Wallenberg; to the Committee on Foreign Affairs.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 450: Mr. PARRIS.
H.R. 1454: Mr. SOLARZ and Mr. SCHUMER.
H.R. 1784: Mr. VENTO, Mr. CROCKETT, Mrs. COLLINS of Illinois, Mr. LOWRY of Washington, Mr. MITCHELL of Maryland, Mr. DELLUMS, and Mr. STOKES.
H.R. 1919: Mrs. SCHNEIDER.
H.R. 2322: Mr. YOUNG of Florida, Mr. ROBERTS of South Dakota, and Mr. SAVAGE.
H.R. 3399: Mr. FRENZEL.
H.R. 4617: Mr. PEYSER.
H.R. 5310: Mr. GEPHARDT, Mr. BREAUX, Mr. FRENZEL, Mr. PRICE, Mr. SKELTON, Mrs. BOGGS, Mr. EMERSON, Mr. RAHALL, Mr. HAGEDORN, Mrs. BOUQUARD, Mr. LEACH of Iowa, Mr. FARY, and Mr. SIMON.
H.R. 5362: Mr. MATTOX.
H.R. 6087: Mr. RAHALL, Mrs. KENNELLY, Mr. GLICKMAN, Mr. COELHO, Mr. MADIGAN, Mr. BOWEN, Mr. MCKINNEY, Mr. FORD of Tennessee, and Mr. SABO.
H.R. 6190: Mr. CLINGER, Mr. ERTTEL, Mr. WALGREEN, Mr. NAPIER, Mr. LAFALCE, and Mr. LEE.
H.R. 6219: Mr. TRAXLER.
H.R. 6311: Ms. FERRARO and Mr. STUMP.
H.R. 6467: Mr. HUNTER, Mr. SENSENBRENNER, Mr. ZABLOCKI, Mr. HUBBARD, Ms. FERRARO, Mr. SNYDER, Mr. GUNDERSON, and Mr. BEARD.
H.R. 6591: Ms. FERRARO and Mr. MAVEROULES.
H.R. 6613: Mr. HYDE, Mr. RUDD, Mr. COURTER, and Mr. LAFALCE.
H.R. 6623: Mr. CROCKETT and Mr. RANGEL.
H.R. 6690: Mr. GOODLING.
H.R. 6783: Mr. SYNAR and Mr. HUGHES.
H.R. 6852: Mr. SMITH of Oregon.
H.R. 6885: Mr. CONABLE, Mr. FISH, and Mr. DASCHLE.
H.R. 6963: Mrs. BOGGS, Mr. BREAUX, Mr. HUCKABY, Mr. LIVINGSTON, Mr. LONG of Louisiana, Mr. MOORE, and Mr. TAUZIN.
H.J. Res. 172: Mr. ROEMER.
H.J. Res. 323: Mr. HIGHTOWER, Mr. FLORIO, and Mr. KASTENMEIER.
H.J. Res. 454: Mr. TAUKE, Mr. FORSYTHE, Mr. HOWARD, Mr. MARKEY, Mr. GORE, Mr. FORD of Michigan, Mr. GOLDWATER, Mr. EMERSON, Mr. CONABLE, Mr. ARCHER, Mr. BEARD, Mr. BIAGGI, Mr. HEFTTEL, Mr. MOORHEAD, Mr. SABO, Mr. RICHMOND, Mr. HUNTER, Mr. MURTHA, Mr. HAWKINS, Mr. PURSELL, Mr. ERDAHL, Mr. HUTTO, Mr. HOLLAND, Mrs. FENWICK, Mrs. KENNELLY, Mr. JONES of Tennessee, Mr. LATTI, Mr. KAZEN, Mr. CORRADA, Mr. FORD of Tennessee, Mr. FROST, Mr. WHITTAKER, Mr. MOAKLEY, Mr. MOTT, Mr. DICKS, Mr. JACOBS, Mr. HOPKINS, Mr. NATCHER, Mr. HANSEN of Idaho, Mr. WIRTH, Mr. MILLER of California, Mr. WHITTEN, Mr. BEILSON, Mr. PAUL, Mr. COUGHLIN, Mr. CROCKETT, Mr. DAN DANIEL, Mr. DICKINSON, Mr. DOWNEY, Mr. DYMALLY, Mr. FOUNTAIN, Mr. MCDADE, Mr. LEATH of Texas, Mr. MARRIOTT, and Mr. OXLEY.
H.J. Res. 472: Mr. WEAVER and Mr. DASCHLE.
H.J. Res. 523: Mr. RATCHFORD, Mr. SHAMANSKY, Mr. LENT, Mr. BRINKLEY, Mr.

McHUGH, Mr. GARCIA, Mr. BENJAMIN, Mr. CLINGER, and Mr. WILLIAM J. COYNE.

H. Con. Res. 383: Mr. PEYSER.

H. Res. 456: Mr. MINETA.

H. Res. 553: Mr. DOWNEY, Mr. EDGAR, Mr. BARNES, Mr. RATCHFORD, and Mr. FOGLIETTA.

H. Res. 558: Mr. FORD of Michigan, Mr. NELLIGAN, Mr. MATSUI, and Mrs. KENNELLY.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

560. By the SPEAKER: Petition of the American Legion, Quezon City, Philippines, relative to issuing discharges or statements of service to certain Philippine veterans; to the Committee on Armed Services.

561. Also, petition of the County Council, County of Hawaii, Hilo, Hawaii, relative to support of S. 2036, reauthorizing the Comprehensive Employment Training Act; to the Committee on Education and Labor.

562. Also, petition of the American Legion, Quezon City, Philippines, relative to "Special Immigrants"; to the Committee on the Judiciary.

563. Also, petition of the American Legion, Quezon City, Philippines; relative to repeal of section 107 of title 38 United States Code, to expand beneficiaries; to the Committee on Veterans' Affairs.

564. Also, petition of the American Legion, Quezon City, Philippines, relative to extending the grants-in-aid program to the Veterans' Memorial Medical Center; to the Committee on Veterans' Affairs.

565. Also, petition of the American Legion, Quezon City, Philippines, relative to allowing judicial review of claims denied by the Veterans' Administration; to the Committee on Veterans' Affairs.

566. Also, petition of the American Legion, Quezon City, Philippines, relative to restoration of recognition of the Philippine Commonwealth Army Veterans; to the Committee on Veterans' Affairs.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 4230

Mr. LEE:

—Page 9, after line 9, insert the following:

"(7) Notwithstanding any other provision of this Act, the Commission shall not issue a certificate of public convenience and necessity to construct, operate, or maintain a coal pipeline until the U.S. Geological Survey conducts a comprehensive study of the uses of the coal pipeline's water sources over the life of the coal pipeline and, to the extent feasible, beyond the life of the coal pipeline, and considering the cumulative effect of all uses of the water sources certifies to the Commission that the use of the water sources will not cause a significant adverse impact on the quality and quantity of the water sources. The U.S. Geological Survey shall include in its determination of a coal pipeline's impact on its water sources a study of the pipeline's impact on water supplies in States surrounding those States from which water is proposed to be taken.

—Page 9, after line 9, insert the following:

"(7) Notwithstanding any other provision of this title, no certificate shall be issued unless the Commission determines that—

"(A) each source of water to be used by the proposed coal pipeline lies in only one state, or

"(B) for those sources of water to be used by the proposed coal pipeline which are located in more than one State, there is in effect for each of these sources an interstate compact between the States in which the source is located which governs the use by the pipeline of water from the source. A source of water which passes through or under a State is deemed to be located in that State even though the proposed pipeline would draw water from that source only when it passed through or under a different State.

—Page 12, after line 12, insert the following:

"(f) No certificate shall be issued under this section for a coal pipeline for which water would be taken from any aquifer or other body of groundwater which underlies more than one State unless—

"(1) there is in effect an interstate compact between the affected States which governs such sale or transfer; or

"(2) all the affected States consent to such sale or transfer."

Reletter the subsequent subsections accordingly.

—Page 13, after line 2, insert the following:

"(h)(1) In this subsection—

"(A) 'affiliate' means an entity which—

"(i) directly or indirectly is controlled by a carrier,

"(ii) directly or indirectly controls a carrier, or

"(iii) directly or indirectly is controlled by a person who also directly or indirectly controls a carrier.

"(B) 'control' means the possession, direct or indirect, of the power to direct the management and policies of a person. Any person, who—

"(i) is a director of another person, or

"(ii) owns in excess of 5 percent of the stock, partnership interest, or any like evidence of participation, of another person, shall be deemed to have control of the other person.

"(2) No carrier certificated under this section shall transport any coal mined or supplied by it or an affiliate, which is, has been, or will be owned by it or an affiliate, or which will be used by it or an affiliate."

—Page 30, line 18, after "Code," insert "or for which a right-of-way is granted over, under, upon, or through Federal lands under this Act or any other law of the United States."

—Page 31, line 3, after "Code," insert "or for which a right-of-way is granted over, under, upon, or through Federal lands under this Act or any other law of the United States."

By Mr. NOWAK:

—Congressional Findings

I. In section 2(2) change "is" to "may be."

—Page 4, strike out line 13 and all that follows through line 25 on page 5 and insert in lieu thereof the following:

"(a) Any certificated transporter of coal by pipeline desiring to acquire a right-of-way across lands belonging to a common carrier engaged in the interstate transportation of coal may apply to the Interstate Commerce Commission for an order requiring use of the common carrier's lands for a coal pipeline right-of-way. The Commission may by order require the use of the railroad rights-of-way or facilities and shall fix just and reasonable compensation therefor.

"(b) In determining whether to issue such an order, the Commission shall take into account the willingness of the respective parties to negotiate the terms and conditions

for a grant of the right-of-way and the need for the right-of-way."

—Page 8, line 7, strike out the comma and all that follows through line 12 and insert in lieu thereof "; and".

Page 8, after line 17, insert the following:

"(5) If the Commission finds that issuance of any certificate under this section will result in diversion of revenue or traffic from an existing carrier, the Commission shall not approve the application for the certificate."

Renumber the subsequent paragraphs accordingly.

—Page 8, strike out line 1 through 17 and insert in lieu thereof the following:

"(4) No application for a certificate may be approved under this section unless the Commission determines in writing that—

"(A) the coal pipeline or extension thereof will provide the capacity necessary to fulfill the requirements of a common carrier of coal;

"(B) there is a substantial likelihood the rates to be charged by the applicant for the transportation of coal will be less than those which would otherwise be actually charged by other common carriers for the transportation of such coal; and

"(C) there is a substantial likelihood that the coal pipeline will not materially impair the financial ability of any other common carrier to provide necessary transportation.

"(5) As part of the determination to be made under paragraph (1)(B) of subsection (b) of this section, the Commission shall consider and include in its written determinations under this subsection a discussion of at least the following issues:

"(A) The extent to which the rates to be charged by the applicant are reasonably expected to be lower than those which would otherwise be charged by other carriers for the transportation of such coal over the expected useful life of the coal pipeline.

"(B) The extent to which the coal pipeline or extension thereof would be likely to impair the financial integrity of other carriers or the existing level or type of transportation services any such carrier is able to provide.

"(C) The extent to which the coal pipeline or extension thereof would assist in meeting transportation needs for the attainment of national coal utilization goals in a safe, adequate, economical, and efficient manner.

"(D) The extent to which existing carriers have the ability to meet the same transportation needs as the coal pipeline or extension for the attainment of national coal utilization goals in a safe, adequate, economical, and efficient manner.

"(E) The environmental impact of the coal pipeline or extension and alternative routes, means of transportation of coal, or methods of utilization of coal.

"(F) The balance between the energy needs of the area to be benefited by the coal pipeline or extension and the impact on the area from which the coal is to be transported, including the impact on the water needs of such area.

"(G) The effect that the coal pipeline or extension thereof will have on other carriers.

"(H) The extent to which the coal pipeline or extension would affect surface or groundwater at the point of origin from which the coal is to be transported, at the point of destination to which the coal is to be transported, and at the point of disposal of water utilized in the transportation of coal.

“(I) The extent to which the coal pipeline or extension thereof would disrupt the coal industry in regions of the United States other than the region in which such pipeline will originate.

“(6) No certificate may be issued under this section unless an environmental impact statement is prepared under section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)) and notice of the availability of such statement is published in the Federal Register.

“(7) No person may be issued a certificate under this section for construction or extension of a coal pipeline unless, before the issuance of the certificate, each State which has a legal interest in the groundwater to be used and beneath whose lands any part of the ground water aquifer constituting any part of the source of the groundwater to be used lies shall consent in writing to the use of its water before the issuance of the certificate.

Renumber the subsequent paragraphs accordingly.

—Page 12, after line 12, insert the following:

“(f) Not later than 10 days after any application under this section is filed with the Commission, the Commission shall notify the Secretary of Agriculture of the filing of the application, and the Commission and the pipeline applicant shall provide such information as the Secretary of Agriculture shall require to conduct a review of the effect of the diversion of water by the pipeline project on agriculture, including irrigation needs. The Secretary of Agriculture shall have 120 days from the date of receipt of such notification to conduct such review and to advise the Commission with respect thereto. The Commission shall make no final determination under this section with respect to the application until it has received a report and accompanying finding from the Secretary of Agriculture.

Reletter subsequent subsections accordingly.

By Mr. SHUSTER:

—Page 4, lines 16 and 17, strike out “private lands” and insert in lieu thereof “those lands owned by any common carrier engaged in the interstate transportation of coal which are needed for such transportation and are”.

—Page 5, line 16, strike out the semicolon and insert in lieu thereof a period.

Page 5, strike out lines 17 through 21.

Page 27, line 20, strike out “unless” and all that follows through line 25 and insert in lieu thereof a period.

—Page 5, after line 25, insert the following:

“(e) A person issued a certificate under section 10952 of this subchapter to construct a coal pipeline or extension thereof may not acquire by exercise of the power of eminent domain under this section rights-of-way over, under, upon, or through any lands located in any State if the chief executive officer of such State certifies to the Commission, within 90 days after the certificate is issued, that the laws of such State relating to eminent domain allow the acquisition of such rights-of-way by eminent domain, except that such person may acquire by exercise of the power of eminent domain under this section all or any part of the rights-of-way necessary to construct, operate, and maintain such coal pipeline or extension in such State if such person is unable to acquire such rights-of-way under the laws of such State within a reasonable period of time.”

Page 25, after line 21, add the following:

“(f) The amendments made by this section shall take effect on the date of enactment

of this Act, except that section 10951 of title 49, United States Code, as added by subsection (a) of this section, shall take effect two years after such date of enactment.

—Page 7, line 23, strike out “and”.

Page 7, line 24, strike out the period and insert in lieu thereof the following: “, and (D) establishing a maximum allowable cost for the construction of the coal pipeline or extension. For purposes of the preceding sentence, maximum allowable cost shall be exclusive of any cost increase that results from subsequent inflation or an unanticipated grave, natural disaster or other natural phenomenon of an exceptional, inevitable, and unavoidable character.”.

—Page 8, strike out lines 1 through 17 and insert in lieu thereof the following:

“(4) In making its findings under paragraph (1)(B) of this subsection with respect to any proposed coal pipeline, the Commission shall, at a minimum, determine the extent to which the pipeline—

“(A) would help meet national needs for coal utilization, considering, among other matters, alternate routes or means of transportation of coal and the relative costs of such alternative routes or means;

“(B) would balance the energy needs of the area to be benefited by the project and the water requirements and other impacts on the area from which the coal is to be transported;

“(C) would be likely to impair the financial integrity of other modes of transportation or the level or type of transportation services any such mode is able to offer;

“(D) would be likely to result in lower rates for the coal transported than would be in effect if such coal were transported by other modes of transportation; and

“(E) would unduly impact on the surface and ground water at the point of destination and disposal of such water in the environment.

—Page 9, after line 9, insert the following:

“(7) No certificate of public convenience and necessity may be issued to or held by any person under this section who controls, is controlled by, or is under common control with, any person who—

“(A) uses or will use coal transported by the coal pipeline constructed or proposed to be constructed pursuant to such certificate, or

“(B) supplies or will supply coal to such pipeline.

In addition to the meaning given the term ‘control’ by section 10102(6) of this subtitle, any person who owns 5 per centum of the voting stock of another person shall be deemed to control such other person for purposes of this paragraph.

—Page 12, after line 21, insert the following:

“(g) No application may be approved under this section unless an environmental impact statement is prepared with respect to such application under section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)) and notice of the availability of such statement is published in the Federal Register. Such statement shall be prepared by the Commission in consultation with the head of any other department, agency, or instrumentality of the United States which will be involved if such application is approved.

Page 12, line 22, strike out “(g)” and insert in lieu thereof “(h)”.

Page 12, line 24, insert after “costs” the following: “(including, but not limited to, the costs of preparing an environmental impact statement with respect to such application under subsection (g) of this section)”.

—Page 13, after line 2, insert the following:

“(h) No person may be issued a certificate under this section for construction or extension of a coal pipeline unless each State which has a legal interest in any part of the groundwater to be used for the pipeline or beneath which any part of an aquifer lies which contains any part of the groundwater to be used for the pipeline consents in writing, before the issuance of the certificate, to the use of such groundwater.

—Page 13, after line 2, insert the following:

“(h) Any person issued a certificate under this section shall be deemed to be a Federal agency for purposes of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 with respect of rights-of-way acquired by power of eminent domain under section 10951 of this title.

—Page 34, after line 24, add the following new section:

NONSEVERABILITY

Sec. 13. If any provision of this Act or the applicability thereof to any person or circumstances is held invalid, the remainder of this Act and the application of such provision to other persons or circumstances shall be invalid.

H.R. 6957

By Mr. BEARD:

GENERAL PROVISIONS—FEDERAL TRADE COMMISSION

Sec. 101. (a) The restrictions upon the authority of the Federal Trade Commission established in section 20 of the Federal Trade Commission Improvements Act of 1980 (15 U.S.C. 57c note) shall apply with respect to the use of funds appropriated for the Commission in this Act.

(b) The provisions of section 21 of the Federal Trade Commission Improvements Act of 1980 (15 U.S.C. 57a-1) shall continue in effect until the end of the fiscal year ending September 30, 1983, notwithstanding subsection (l) of such section (15 U.S.C. 57a-1(l)).

—Page 17, after line 8, insert the following:

GENERAL PROVISIONS—FEDERAL TRADE COMMISSION

Sec. 101. (a) None of the funds appropriated in this Act may be used by the Federal Trade Commission to conduct any study, investigation, or prosecution of any agricultural cooperative for any conduct which, because of the provisions of the Act entitled “An Act to authorize association of producers of agricultural products”, approved February 18, 1922 (7 U.S.C. 291 et seq.), commonly known as the Capper-Volstead Act, is not a violation of any of the antitrust Acts (as defined in section 4 of the Federal Trade Commission Act (15 U.S.C. 44)) or the Federal Trade Commission Act (15 U.S.C. 41 et seq.).

(b) None of the funds appropriated in this Act may be used by the Federal Trade Commission to conduct any study or investigation of any agricultural marketing orders.

By Mr. LEVITAS:

—Page 17, after line 8, insert the following:

GENERAL PROVISIONS—FEDERAL TRADE
COMMISSION

SEC. 101. None of the funds appropriated in this Act may be used by the Federal Trade Commission (1) to promulgate any final rule under the Federal Trade Commission Act (15 U.S.C. 41 et seq.), other than a rule described in section 18(a)(1)(A) of such Act (15 U.S.C. 57a(a)(1)(A)); or (2) to carry out any such rule which became final under such Act on or after August 1, 1982.

—Page 17, after line 8, insert the following:

GENERAL PROVISIONS—FEDERAL TRADE
COMMISSION

SEC. 101. None of the funds appropriated in this Act may be used by the Federal Trade Commission to promulgate any final rule under the Federal Trade Commission Act (15 U.S.C. 41 et seq.), other than a final rule described in section 18(a)(1)(A) of such Act (15 U.S.C. 57a(a)(1)(A)), unless such final rule is promulgated in accordance with the provisions of section 21 of the Federal Trade Commission Improvements Act of 1980, notwithstanding subsection (i) of such section.

—Page 17, after line 8, insert the following:

GENERAL PROVISIONS—FEDERAL TRADE
COMMISSION

SEC. 101. (a)(1) None of the funds appropriated in this Act may be used by the Federal Trade Commission to promulgate any final rule under the Federal Trade Commission Act (15 U.S.C. 41 et seq.) unless such final rule is promulgated in accordance with this section.

(2) The Commission, after promulgating a final rule, shall submit such final rule to the Congress for review in accordance with this section. Such final rule shall be delivered to each House of the Congress on the same date and to each House of the Congress while it is in session. Such final rule shall be referred to the Committee on Commerce, Science, and Transportation of the Senate and to the Committee on Interstate and Foreign Commerce of the House, respectively.

(3) Any such final rule shall become effective in accordance with its terms unless, before the end of the period of 90 calendar days of continuous session after the date such final rule is submitted to the Congress, both Houses of the Congress adopt a concurrent resolution disapproving such final rule.

(b)(1) The provisions of this subsection are enacted by the Congress—

(A) as an exercise of the rulemaking power of the Senate and the House of Representatives, respectively, and as such they are deemed a part of the rules of each House, respectively, but applicable only with respect to the procedure to be followed in that House in the case of concurrent resolutions which are subject to this section, and such provisions supersede other rules only to the extent that they are inconsistent with such other rules; and

(B) with full recognition of the constitutional right of either House to change the rules (so far as relating to the procedure of that House) at any time, in the same manner and to the same extent as in the case of any other rule of that House.

(2)(A) any concurrent resolution disapproving a final rule of the Commission shall, upon introduction or receipt from the other House of the Congress, be referred immediately by the presiding officer of such House to the Committee on Commerce, Science, and Transportation of the Senate or to the Committee on Interstate and Foreign Commerce of the House, as the case may be.

(B) If a committee to which a concurrent resolution is referred does not report such concurrent resolution before the end of the period of 75 calendar days of continuous session of the Congress after the referral of such resolution to the Committee on Commerce, Science, and Transportation of the Senate or to the Committee on Interstate and Foreign Commerce of the House, as the case may be, under subsection (a)(1), it shall be in order to move to discharge any such committee from further consideration of such concurrent resolution.

(C)(i) A motion to discharge in the Senate may be made only by a Member favoring the concurrent resolution, shall be privileged (except that it may not be made after the committee has reported a concurrent resolution with respect to the same final rule of the Commission), and debate on such motion shall be limited to not more than 1 hour, to be divided equally between those favoring and those opposing the motion. An amendment to the motion shall not be in order, and it shall not be in order to move to reconsider the vote by which the motion was agreed to or disagreed to. If the motion to discharge is agreed to or disagreed to, the motion may not be renewed, nor may another motion to discharge the committee be made with respect to any other concurrent resolution with respect to the same final rule of the Commission.

(ii) A motion to discharge in the House may be made by presentation in writing to the Clerk. The motion may be called up only if the motion has been signed by one-fifth of the Members of the House. The motion is highly privileged (except that it may not be made after the committee has reported a concurrent resolution of disapproval with respect to the same rule). Debate on such motion shall be limited to not more than 1 hour, the time to be divided equally between those favoring and those opposing the motion. An amendment to the motion is not in order, and it is not in order to move to reconsider the vote by which the motion is agreed to or disagreed to.

(3)(A) When a committee has reported, or has been discharged from further consideration of, a concurrent resolution, it shall be at any time thereafter in order (even though a previous motion to the same effect has been disagreed to) to move to proceed to the consideration of the concurrent resolution. The motion shall be privileged in the Senate and highly privileged in the House of Representatives, and shall not be debatable. An amendment to the motion shall not be in order, and it shall not be in order to move to reconsider the vote by which the motion was agreed to or disagreed to.

(B) Debate on the concurrent resolution shall be limited to not more than 10 hours, which shall be divided equally between those favoring and those opposing such concurrent resolution. A motion further to limit debate shall not be debatable. An amendment to, or motion to recommit, the concurrent resolution shall not be in order, and it shall not be in order to move to reconsider the vote by which such concurrent resolution was agreed to or disagreed to.

(4) Appeals from the decision of the Chair relating to the application of the rules of the Senate or the House of Representatives, as the case may be, to the procedure relating to a concurrent resolution shall be decided without debate.

(5) Notwithstanding any other provision of this subsection, if a House has approved a concurrent resolution with respect to any final rule of the Commission, then it shall

not be in order to consider in such House any other concurrent resolution with respect to the same final rule.

(c)(1) If a final rule of the Commission is disapproved by the Congress under subsection (a)(2), then the Commission may promulgate a final rule which relates to the same acts or practices as the final rule disapproved by the Congress in accordance with this subsection. Such final rule—

(A) shall be based upon—

(i) the rulemaking record of the final rule disapproved by the Congress; or

(ii) such rulemaking record and the record established in supplemental rulemaking proceedings conducted by the Commission in accordance with section 553 of title 5, United States Code, in any case in which the Commission determines that it is necessary to supplement the existing rulemaking record; and

(B) may contain such changes as the Commission considers necessary or appropriate.

(2) The Commission, after promulgating a final rule under this subsection, shall submit the final rule to the Congress in accordance with subsection (a)(1).

(d) Congressional inaction on, or rejection of, a concurrent resolution of disapproval under this section shall not be construed as an expression of approval of the final rule involved, and shall not be construed to create any presumption of validity with respect to such final rule.

(e)(1) The Comptroller General shall prepare a report which examines the review of Commission rules under this section. Such report shall—

(A) list the final rules submitted to the Congress by the Commission during the period in which this section is in effect;

(B) list the final rules disapproved by the Congress under subsection (a)(2);

(C) specify the number of instances in which the Commission promulgates a final rule in accordance with subsection (c); and

(D) include an analysis of any impact which the provisions of this section have had upon the decisionmaking and rulemaking processes of the Commission.

(2) The Comptroller General shall submit the report required in paragraph (1) to the Congress before the end of fiscal year 1982.

(f)(1) Any interested party may institute such actions in the appropriate district court of the United States, including actions for declaratory judgment, as may be appropriate to construe the constitutionality of any provision of this section. The district court immediately shall certify all questions of the constitutionality of this section to the United States court of appeals for the circuit involved, which shall hear the matter sitting en banc.

(2) Notwithstanding any other provision of law, any decision on a matter certified under paragraph (1) shall be reviewable by appeal directly to the Supreme Court of the United States. Such appeal shall be brought not later than 20 days after the decision of the court of appeals.

(3) It shall be the duty of the court of appeals and of the Supreme Court of the United States to advance on the docket and to expedite to the greatest possible extent the disposition of any matter certified under paragraph (1).

(g)(1) For purposes of this section—

(A) continuity of session is broken only by an adjournment sine die; and

(B) days on which either House is not in session because of an adjournment of more than 5 days to a day certain are excluded in

the computation of the periods specified in subsection (a)(2) and subsection (b).

(2) If an adjournment sine die of the Congress occurs after the Commission has submitted a final rule under subsection (a)(1), but such adjournment occurs—

(A) before the end of the period specified in subsection (a)(2); and

(B) before any action necessary to disapprove the final rule is completed under subsection (a)(2);

then the Commission shall be required to resubmit the final rule involved at the beginning of the next regular session of the Congress. The period specified in subsection (a)(2) shall begin on the date of such resubmission.

(h) For purposes of this section:

(1) The term "Commission" means the Federal Trade Commission.

(2) The term "concurrent resolution" means a concurrent resolution the matter after the resolving clause of which is as follows: "That the Congress disapproves the final rule promulgated by the Federal Trade Commission dealing with the matter of —, which final rule was submitted to the Congress on —." (The blank spaces shall be filled appropriately.)

(3) The term "rule" means any rule promulgated by the Commission pursuant to the Federal Trade Commission Act (15 U.S.C. 41 et seq.), other than any rule promulgated under section 18(a)(1)(A) of such Act (15 U.S.C. 57a(a)(1)(A)).

—Page 17, after line 8, insert the following:

GENERAL PROVISIONS—FEDERAL TRADE
COMMISSION

Sec. 101. (a)(1) None of the funds appropriated in this Act may be used by the Federal Trade Commission to promulgate any final rule under the Federal Trade Commission Act (15 U.S.C. 41 et seq.) unless such final rule is promulgated in accordance with this section.

(2) The Commission, after promulgating a final rule, shall submit such final rule to the Congress for review in accordance with this section. Such final rule shall be delivered to each House of the Congress on the same date and to each House of the Congress while it is in session. Such final rule shall be referred to the Committee on Commerce, Science, and Transportation of the Senate and to the Committee on Interstate and Foreign Commerce of the House, respectively.

(3) Any such final rule shall become effective in accordance with its terms unless, before the end of the period of 90 calendar days of continuous session after the date such final rule is submitted to the Congress, both Houses of the Congress adopt a concurrent resolution disapproving such final rule.

(b)(1) The provisions of this subsection are enacted by the Congress—

(A) as an exercise of the rulemaking power of the Senate and the House of Representatives, respectively, and as such they are deemed a part of the rules of each House, respectively, but applicable only with respect to the procedure to be followed in that House in the case of concurrent resolutions which are subject to this section, and such provisions supersede other rules only to the extent that they are inconsistent with such other rules; and

(B) with full recognition of the constitutional right of either House to change the rules (so far as relating to the procedure of that House) at any time, in the same manner and to the same extent as in the case of any other rule of that House.

(2)(A) Any concurrent resolution disapproving a final rule of the Commission shall, upon introduction or receipt from the other House of the Congress, be referred immediately by the presiding officer of such House to the Committee on Commerce, Science, and Transportation of the Senate or to the Committee on Interstate and Foreign Commerce of the House, as the case may be.

(B) If a committee to which a concurrent resolution is referred does not report such concurrent resolution before the end of the period of 75 calendar days of continuous session of the Congress after the referral of such resolution to the Committee on Commerce, Science, and Transportation of the Senate or to the Committee on Interstate and Foreign Commerce of the House, as the case may be, under subsection (a)(1), it shall be in order to move to discharge any such committee from further consideration of such concurrent resolution.

(C)(i) A motion to discharge in the Senate may be made only by a Member favoring the concurrent resolution, shall be privileged (except that it may not be made after the committee has reported a concurrent resolution with respect to the same final rule of the Commission), and debate on such motion shall be limited to not more than 1 hour, to be divided equally between those favoring and those opposing the motion. An amendment to the motion shall not be in order, and it shall not be in order to move to reconsider the vote by which the motion was agreed to or disagreed to. If the motion to discharge is agreed to or disagreed to, the motion may not be renewed, nor may another motion to discharge the committee be made with respect to any other concurrent resolution with respect to the same final rule of the Commission.

(ii) A motion to discharge in the House may be made by presentation in writing to the Clerk. The motion may be called up only if the motion has been signed by one-fifth of the Members of the House. The motion is highly privileged (except that it may not be made after the committee has reported a concurrent resolution of disapproval with respect to the same rule). Debate on such motion shall be limited to not more than 1 hour, the time to be divided equally between those favoring and those opposing the motion. An amendment to the motion is not in order, and it is not in order to move to reconsider the vote by which the motion is agreed to or disagreed to.

(3)(A) When a committee has reported, or has been discharged from further consideration of, a concurrent resolution, it shall be at any time thereafter in order (even though a previous motion to the same effect has been disagreed to) to move to proceed to the consideration of the concurrent resolution. The motion shall be privileged in the Senate and highly privileged in the House of Representatives, and shall not be debatable. An amendment to the motion shall not be in order, and it shall not be in order to move to reconsider the vote by which the motion was agreed to or disagreed to.

(B) Debate on the concurrent resolution shall be limited to not more than 10 hours, which shall be divided equally between those favoring and those opposing such concurrent resolution. A motion further to limit debate shall not be debatable. An amendment to, or motion to recommit, the concurrent resolution shall not be in order, and it shall not be in order to move to reconsider the vote by which such concurrent resolution was agreed to or disagreed to.

(4) Appeals from the decision of the Chair relating to the application of the rules of

the Senate or the House of Representatives, as the case may be, to the procedure relating to a concurrent resolution shall be decided without debate.

(5) Notwithstanding any other provision of this subsection, if a House has approved a concurrent resolution with respect to any final rule of the Commission, then it shall not be in order to consider in such House any other concurrent resolution with respect to the same final rule.

(c)(1) If a final rule of the Commission is disapproved by the Congress under subsection (a)(2), then the Commission may promulgate a final rule which relates to the same acts or practices as the final rule disapproved by the Congress in accordance with this subsection. Such final rule—

(A) shall be based upon—

(i) the rulemaking record of the final rule disapproved by the Congress; or

(ii) such rulemaking record and the record established in supplemental rulemaking proceedings conducted by the Commission in accordance with section 553 of title 5, United States Code, in any case in which the Commission determines that it is necessary to supplement the existing rulemaking record; and

(B) may contain such changes as the Commission considers necessary or appropriate.

(2) The Commission, after promulgating a final rule under this subsection, shall submit the final rule to the Congress in accordance with subsection (a)(1).

(d) Congressional inaction on, or rejection of, a concurrent resolution of disapproval under this section shall not be construed as an expression of approval of the final rule involved, and shall not be construed to create any presumption of validity with respect to such final rule.

(e)(1) The Comptroller General shall prepare a report which examines the review of Commission rules under this section. Such report shall—

(A) list the final rules submitted to the Congress by the Commission during the period in which this section is in effect;

(B) list the final rules disapproved by the Congress under subsection (a)(2);

(C) specify the number of instances in which the Commission promulgates a final rule in accordance with subsection (c); and

(D) include an analysis of any impact which the provisions of this section have had upon the decisionmaking and rulemaking processes of the Commission.

(2) The Comptroller General shall submit the report required in paragraph (1) to the Congress before the end of fiscal year 1982.

(f)(1) Any interested party may institute such actions in the appropriate district court of the United States, including actions for declaratory judgment, as may be appropriate to construe the constitutionality of any provision of this section. The district court immediately shall certify all questions of the constitutionality of this section to the United States court of appeals for the circuit involved, which shall hear the matter sitting en banc.

(2) Notwithstanding any other provision of law, any decision on a matter certified under paragraph (1) shall be reviewable by appeal directly to the Supreme Court of the United States. Such appeal shall be brought not later than 20 days after the decision of the court of appeals.

(3) It shall be the duty of the court of appeals and of the Supreme Court of the United States to advance on the docket and to expedite to the greatest possible extent

the disposition of any matter certified under paragraph (1).

(g)(1) For purposes of this section—

(A) continuity of session is broken only by an adjournment sine die; and

(B) days on which either House is not in session because of an adjournment of more than 5 days to a day certain are excluded in the computation of the periods specified in subsection (a)(2) and subsection (b).

(2) If an adjournment sine die of the Congress occurs after the Commission has submitted a final rule under subsection (a)(1), but such adjournment occurs—

(A) before the end of the period specified in subsection (a)(2); and

(B) before any action necessary to disapprove the final rule is completed under subsection (a)(2);

then the Commission shall be required to resubmit the final rule involved at the beginning of the next regular session of the Congress. The period specified in subsection (a)(2) shall begin on the date of such resubmission.

(h)(1) Notwithstanding the provisions of section 21(i) of the Federal Trade Commission Improvements Act of 1980 (15 U.S.C. 57a-1(i)), the Commission shall not use funds appropriated in this Act in connection with the promulgation of a final rule after

the date of the enactment of this Act and before January 1, 1983, unless the Commission submits such final rule to the Congress in accordance with section 21 of such Act (15 U.S.C. 57a-1).

(2)(A) Any final rule promulgated by the Commission through the use of funds appropriated in this Act and submitted to the Congress on or after January 1, 1983, shall be subject to the provisions of this section.

(B) In any case in which—

(i) the Commission submitted a final rule to the Congress under section 21 of the Federal Trade Commission Improvements Act of 1980 (15 U.S.C. 57a-1) before January 1, 1983;

(ii) such final rule was disapproved by the Congress under section 21 of such Act (15 U.S.C. 57a-1); and

(iii) the Commission did not submit a final rule relating to the same acts or practices, under section 21(c) of such Act (15 U.S.C. 57a-1(c)), before January 1, 1983;

the Commission may submit a final rule relating to the same acts or practices in accordance with subsection (c).

(C) In any case in which the Commission would have been required to resubmit a final rule under section 21(g)(2) of the Federal Trade Commission Improvements Act of 1980 (15 U.S.C. 57a-1(g)(2)), but for the

expiration of such provision in accordance with section 21(i) of such Act (15 U.S.C. 57a-1(i)), as modified by the provisions of paragraph (1), the Commission shall be required to resubmit such final rule in accordance with subsection (g)(2).

(i) For purposes of this section:

(1) The term "Commission" means the Federal Trade Commission.

(2) The term "concurrent resolution" means a concurrent resolution the matter after the resolving clause of which is as follows: "That the Congress disapproves the final rule promulgated by the Federal Trade Commission dealing with the matter of —, which final rule was submitted to the Congress on —." (The blank spaces shall be filled appropriately.)

(3) The term "rule" means any rule promulgated by the Commission pursuant to the Federal Trade Commission Act (15 U.S.C. 41 et seq.), other than any rule promulgated under section 18(a)(1)(A) of such Act (15 U.S.C. 57a(a)(1)(A)).

By Mr. WALKER:

—On page 25, after line 23, insert the following new section:

Sec. 203. No funds appropriated under this act may be used to prevent the implementation of programs of voluntary prayer and meditation in the public schools.

SENATE—Thursday, August 12, 1982

(Legislative day of Monday, July 12, 1982)

The Senate met at 10 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, LL.D., D.D., offered the following prayer:

Let us pray.

In the words of scripture, *Husbands love your wives as Christ loved the church and gave Himself for it . . . Ephesians 5:25, (KJV) . . . fathers do not frustrate your children . . . Ephesians 6:4, (RSV).*

Father in heaven, Thy Word is unequivocal in its teaching that the family is the nucleus of society, the basic unit of social order. History teaches that no culture can survive the disintegration of the home; and no unit of society—school, community or church—can replace parents or compensate for failure in the family. Forgive those of us who give family such a low priority.

Gracious God, help the Senate to take seriously the family, to put the family on its agenda. Help it not to perpetuate schedules that are destructive of family life. Help the Senators not to be so busy trying to save the Nation that they let their children go to hell. In the name of Thy Son. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is recognized.

Mr. BAKER. I thank the Chair.

THE JOURNAL

Mr. BAKER. Mr. President, I ask unanimous consent that the Journal of the proceedings of the Senate be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

SENATE SCHEDULE

Mr. BAKER. Mr. President, after the time for the two leaders has expired, the Senator from Florida (Mr. CHILES) will be recognized on special order for 15 minutes, to be followed by a period for the transaction of routine morning business in which Senators may speak for not more than 3 minutes each and to extend not past 10:45 a.m.

At 10:45 a.m. or the closing of the time for the transaction of routine

morning business, whichever occurs first, the Chair under the previous order will lay before the Senate S. 2222, calendar order No. 665, the Immigration Reform and Control Act of 1982, as was arranged yesterday and subject to an objection by the minority leader.

Mr. President, the Senate will continue the debate of the immigration bill during the day today. I have not yet conferred with the distinguished manager of the bill, the Senator from Wyoming, on how late he would propose to stay in tonight.

I remind Senators that for 2 weeks now we have been on notice that in these final days before our August recess it may be necessary to ask the Senate to remain past the usual recess or adjournment hour of 6 p.m. on any evening, and such is the case today. If we can make good progress on this bill, if the managers on both sides wish to stay past 6 p.m., I advise my colleagues that we will stay past 6.

Mr. CHILES. Is that past 6 today or tomorrow?

Mr. BAKER. Today.

Mr. President, it is my hope that we could finish this bill even today. Once again, I will confer with the managers on both sides about that when we have an opportunity to confer. If we cannot do that, then we will be on the bill tomorrow and there will be votes tomorrow.

Mr. President, I will try to have a further announcement in respect to the schedule later in the day after I have had an opportunity to confer with Senators, and especially with the minority leader.

Mr. ROBERT C. BYRD. Mr. President, if the distinguished majority leader will yield, I am ready to state that there is no objection on this side of the aisle to proceeding with the immigration bill today.

Mr. BAKER. I thank the Senator.

Mr. ROBERT C. BYRD. Secondly, I should like to ask the distinguished majority leader, if I may, what his plans are, if he can state them at this time, with respect to the antitrust bill?

Mr. BAKER. Yes.

Mr. ROBERT C. BYRD. And the bankruptcy bill.

Mr. BAKER. I thank the Senator.

Mr. President, on the antitrust bill—that is S. 995—I have had a number of inquiries about whether that might be scheduled prior to the August 20 recess. My reply has been and is now to the distinguished minority leader that having stated a must list that we

must deal with in order to go out on August 20, I would not anticipate that S. 995 could be called up before August 20, unless we have finished all of the items on the must list, and that would include the debt limit. If we have finished all of the items on the must list before August 20, then I would be perfectly willing to try to proceed to S. 995 before August 20 but only on that condition.

I might say, parenthetically, that I have no desire to bottle up S. 995. It would be my intention to schedule it at some point after the August recess if we cannot reach it before August 20.

On the bankruptcy reform bill, I must say to my friend, the minority leader, I have not conferred with my staff on that and I will do so and give him a further statement at that time.

Mr. ROBERT C. BYRD. I thank the majority leader.

Mr. BAKER. Mr. President, I have no need for any further time that remains under the standing order. I offer it to the minority leader.

Mr. ROBERT C. BYRD. Mr. President, I thank the majority leader. I accept his offer of time and will yield it back to him if I do not use it.

RECOGNITION OF THE MINORITY LEADER

The PRESIDING OFFICER (Mr. KASTEN). The minority leader is recognized.

Mr. ROBERT C. BYRD. Mr. President, I yield 3 minutes to the distinguished Senator from Wisconsin and the remaining time to the distinguished Senator from Florida (Mr. CHILES).

CARNEGIE PANEL OF EXPERTS ASSESSES NUCLEAR BALANCE

Mr. PROXMIER. Mr. President, the Carnegie Endowment recently assembled a panel of 32 experts in diplomacy, international relations, and nuclear warfare for a conference on the status of the nuclear balance. The results of their deliberations are important to the Senate's continuing review of the relative balance of power between the U.S.S.R. and the United States.

The panel has made a number of distinct and pertinent observations. First, they conclude that the command, control, and communications capabilities of this Nation are our weakest link in the nuclear preparedness field. The ability to react to warnings; the response time to place strategic systems

on higher levels of alert; the need for clear and unambiguous channels of communications—all of these are generally not discussed by Congress in the same detail as the more glamorous weapons systems. Yet command and control is, in many ways, more important, not only to our war fighting ability, but to arms control and the elimination of risk taking.

The panel also concluded that the United States is not vulnerable to a blinding attack and that a surprise attack is not likely. When coupled with their stated analysis that the United States and Soviet strategic forces are in rough balance, this provides a much welcomed relief from the more alarmist positions taken by some in the administration.

The Carnegie experts did not conclude their analysis without addressing the long-term goals of our strategic program. They called for improving the deterrent capability of the U.S. submarine force and bomber force. They suggested that more time and attention be spent on antisubmarine warfare research. And in a more controversial point, they recommended developing more and larger accurate weapons for our land-based ICBM's. This latter argument does not carry the same weight of logic as the others, it seems to me, given the increasing vulnerability of all fixed based land systems. We should be considering alternatives to vulnerable land-based systems rather than improving their warhead characteristics.

Mr. President, I ask unanimous consent that a Milwaukee Journal article about the Carnegie panel be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Milwaukee Journal, Aug. 6, 1982]

UNITED STATES CAN RESPOND TO FIRST STRIKE

WASHINGTON, D.C.—UPI—Although the command and communications system controlling U.S. nuclear forces is the country's "weakest link," the nation is not vulnerable to a first strike that would knock out its ability to respond, a panel of experts says.

The Carnegie Endowment's Panel on U.S. Security and the Future of Arms Control said that, without remedial steps in communications, the U.S. ability to respond to an attack—given a warning of as little as 10 minutes—was questionable.

But, it said, even with the existing communications system, the U.S. is not vulnerable to a "blinding attack" that would knock out its early warning system or prevent the president or his successors from issuing orders for a "controlled and effective response."

Survival of the decision-making authority is essential, the panel said.

"Convincing the Soviet Union that the United States could continue to manage its forces effectively after a Soviet attack in itself makes an important contribution to deterrence," it concluded.

At the same time, the panel said, a surprise attack is unlikely.

"A real risk of outbreak of nuclear war is far more likely to arise in the context of a grave crisis, in which external pressures, not abstract calculations of the theoretical possibility of a surprise decapitating strike, might make Soviet leaders think seriously about a nuclear attack and be prepared to take greater risks," the panel said.

The panel—composed of 32 policy-makers, business leaders, technical experts and military strategists—includes Brent Scowcroft, the national security adviser in the Ford administration; Leslie Gelb, chief of State Department's Bureau of Politico-Military Affairs in the Carter administration; and Gen. Robert Pursley, former commander of U.S. forces in Japan.

With U.S. and Soviet forces in "rough balance," the panel said, "political and psychological factors"—especially perceptions of how vulnerable U.S. forces are to a debilitating first strike—assume greater importance.

SOVIETS GIVEN EDGE

President Reagan said at a news conference March 21 that the Soviet Union had "a definite margin of superiority," and "the Soviets' great edge is one in which they could absorb our retaliatory blow and hit us again" after launching a first strike.

However, the panel said, the strength of the U.S. nuclear arsenal is its reliance on a triad of overlapping forces—land-based missile, sea-launched missiles and bombers.

"To the extent that we exaggerate the significance of the vulnerability of one component of our forces and fail to put it into the context of overall vulnerability, we inflict this political damage upon ourselves," it said. "In this sense, rhetoric about a 'window of vulnerability' is not helpful."

The study acknowledged that the vulnerability of America's 1,052 land-based intercontinental ballistic missiles had increased as the Soviets built larger and more accurate missiles.

Failure to resolve the problem, it added, is eroding the U.S. ability to deter a Soviet attack and "could lead U.S. allies to reassess their dependence on the American nuclear guarantee."

Among the things the panel recommended were:

Larger and more accurate warheads for land-based missiles.

Larger and more accurate submarine-launched missiles.

Advances in technology to counter improved Soviet antisubmarine warfare.

Deployment of new cruise missiles aboard bombers better protected against attack.

The panel recommended continued emphasis on arms controls, despite its mixed results over the years.

REVIVAL OF KHATYN CONTROVERSY—ANOTHER REMINDER TO TAKE ACTION AGAINST GENOCIDE

Mr. PROXMIER. Mr. President, approximately 40 years ago, 4000 to 10,000 Polish officers were brutally murdered in the Khatyn Forest of the Soviet Union. Just who was responsible for the mass murder is a controversy that has yet to be resolved. Last week in Russia, a protest by a Nordic group was staged in order to revive that controversy.

The dispute over whether the executions of those Polish officers were ordered and carried out by the Soviets or

the Nazis is not the focus of my remarks. The point is that such brutal murders, in fact, did occur.

Mr. President, 40 years ago, this world witnessed the systematic annihilation of not only those Polish officers, but millions upon millions of other innocent lives. Those instances, and countless others, have left their mark on all historically conscious and compassionate human beings.

This mark, which has already stained the continents of Africa, South America, Asia, and Europe, was so significant that the world decided to adopt a treaty that would make acts committed with the "intent to destroy, in whole or in part, a national, ethnical, racial, or religious group," an international crime. The International Convention on the Prevention and Punishment of the Crime of Genocide was unanimously adopted by the General Assembly of the United Nations on December 9, 1948. Since that time, 88 nations have given their full support to the convention. The United States stands alone in our refusal to ratify this treaty.

Mr. President, the controversial incident which I cited in my opening paragraph is a poignant reminder that the experiences of genocide will never simply vanish.

What went on many years ago, whether it happened to the Polish officers, the Jews, the Armenians, or any group which has suffered this unthinkable crime, cannot be changed. What can be dramatically altered is the way a newer, more sophisticated, more compassionate, and more experienced world will handle such matters in the future.

We all must hope that 40 years from now, newer controversies, like the one in Khatyn, will not arise. I urge the Senate to help make this abstract concept of hope an admirable reality. Let us ratify the Genocide Convention.

Mr. President, I thank the Democratic leader, and I yield the floor.

THE CALENDAR

Mr. BAKER. Mr. President, is the distinguished minority leader in a position at this time to consider certain items that may be dealt with by unanimous consent according to our calendar?

Mr. ROBERT C. BYRD. Mr. President, we are ready to go forward on this side.

I yield back to the majority leader such time as he may require from the time of the two leaders under the standing order.

Mr. BAKER. I thank the Senator. I appreciate the typical cooperation of the minority leader in that respect.

Mr. President, there are several items, and I will go through them as they appear in my folder.

NATIONAL COIN WEEK

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on the Judiciary be discharged from further consideration of House Joint Resolution 516, a resolution to designate April 17 to 23, 1983, as National Coin Week, and I ask for its immediate consideration.

Mr. ROBERT C. BYRD. There is no objection, Mr. President.

The PRESIDING OFFICER. The resolution will be stated by title.

The assistant legislative clerk read as follows:

A joint resolution (H.J. Res. 516) to provide for the designation of April 17 to 23, 1983, as National Coin Week.

The PRESIDING OFFICER. Is there objection to the present consideration of the joint resolution?

There being no objection, the joint resolution (H.J. Res. 516) was considered, ordered to a third reading, read the third time, and passed.

The preamble was agreed to.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I am pleased that the Senate has approved today House Joint Resolution 516 to authorize the President to issue a proclamation designating the week of April 17 through 23, 1983, as "National Coin Week."

Coin collecting is a hobby enjoyed by millions of Americans. Coins are also popular as investments. There are few cities in the United States of any size that do not have a coin club. Numismatists are enthusiastic about their hobby and enjoy the opportunity to introduce noncollectors to this interesting and educational hobby.

National Coin Week was first introduced in 1924, and is now an annual event. Celebration of a "National Coin Week" provides an opportunity to coin collectors to foster the interest of young and old in a subject that is entertaining and instructive, as well as valuable in encouraging thrift.

I am pleased to cooperate in this effort.

POTATO RESEARCH AND PROMOTION ACT

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on H.R. 2160.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the House disagree to the amendments of the Senate to the bill (H.R. 2160) entitled "An Act to amend the Potato Research and Promotion Act."

Mr. ARMSTRONG. Mr. President, it is often said that nothing is ever as easy as it seems. There was never a more clear example than this legislation, H.R. 2160, the Potato Research and Promotion Act Amendments of 1982. Making such a simple change in a simple law, a change that affects no one on Earth except potato growers and costs the taxpayers nothing, has been one of the more difficult pieces of legislation to move that I have been associated with.

I introduced the original Senate version of this bill, S. 862, on April 2, 1981—nearly 17 months ago. The bill was talked about a great deal early this year in the Agriculture Committees of both Houses. It was finally reported out of the Senate Agriculture Committee on March 31 of this year, but with an amendment that has greatly hindered the progress of the bill. Since this version had already passed the House, it would have made more sense, I think, to have simply passed it without amendment, so that the Nation's potato growers could continue a program that is very important to them. Instead, the presence of the Senate amendment forced it back into the House Agriculture Committee and the process began again.

The House wisely, in my view, returned the measure to us for action, again without the earlier amendment—which I might say was totally unrelated to the scope of this legislation.

The original Potato Research and Promotion Act was signed into law in January of 1971 and approved by a growers referendum shortly thereafter. The act established the National Potato Promotion Board under the Secretary of Agriculture, and authorized the board to assess potato growers up to 1 cent per hundredweight to fund advertising and marketing programs, export promotion, and to provide research assistance to the potato industry. The problem was that Congress did not foresee the rate of inflation we have faced since that time. As a result of steadily increasing prices, the fund provided by this "checkoff" system is simply inadequate for its purpose.

The current 1 cent assessment generates about \$2.5 million per year, representing over 97 percent grower participation in the program. Participation is strictly voluntary, though nearly all producers choose to take part, indicating strong producer support for the program.

Since 1971, though, the Consumer Price Index has risen over 100 percent, and the fund does not provide enough money for the kind of research and promotion that the producers want. This bill would provide additional funds by putting the checkoff level on a formula basis, like many other similar promotion boards, based on the av-

erage price of potatoes over the previous 10 years. In this way, the price could be adjusted as consumer prices change, up or down. In current dollars, the fund could then be increased to around \$5 million in the next year, with modest increases in later years.

It must be made clear that we are not talking about tax dollars. This is a program where potato growers can choose whether or not they wish to contribute to their own board. In fact, it is ludicrous on the surface that allowing people to contribute more of their own money to their own fund for their own purpose requires an act of Congress, but it does.

Finally, I want to point out that even with the adoption of this bill, producers will still have to approve the change in a referendum, and each individual producer will still have the opportunity to decline participation. This is a noncontroversial bill, since it affects only potato growers and results in no cost to the taxpayer.

I thank the Agriculture Committee chairman, Senator HELMS, for his help on this important bill, and urge my colleagues to support it.

Mr. SYMMS. Mr. President, I rise to support the passage of H.R. 2160 the Potato Research and Promotion Act.

The bill, which passed the House on March 9 and the Senate on May 5, 1982, will authorize a mechanism necessary to generate increased and much needed revenues from direct assessments to the Nation's potato producers. More specifically, it will change the method by which this assessment is calculated. Rather than a flat 1 percent per hundredweight, it would allow the National Potato Promotion Board to determine the assessment, so long as it does not exceed one-half of 1 percent of the average potato price received by growers over the past 10-year period.

These funds are used for research and development assistance, export promotion, and advertising and marketing of potatoes. It is a worthy cause, but it also carries with it a sense of urgency. Not only are current assessments insufficient to meet costs that have risen markedly over the past decade, but congressional action only opens the door for a producer referendum to approve the new assessment formula. Consequently, I note with concern and a growing sense of urgency the unfortunate delays that have plagued congressional action on H.R. 2160 and I urge its prompt adoption by this body.

Mr. BAKER. Mr. President, I move that the Senate recede from its amendments.

The PRESIDING OFFICER. The question is on agreeing to the motion.

The motion was agreed to.

EMERGENCY SERVICES IMPROVEMENT ACT OF 1982

Mr. BAKER. Mr. President, Calendar No. 701, S. 2625, as has been cleared for action on this side, if it is agreeable to the minority leader.

Mr. ROBERT C. BYRD. Yes, Mr. President, that is agreeable.

Mr. BAKER. I ask unanimous consent that the Senate proceed to the consideration of S. 2625.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 2625) to amend the Federal Property and Administrative Services Act of 1949 to make Federal surplus property more accessible to local emergency preparedness and volunteer firefighting organizations and to authorize and direct the Federal Emergency Management Agency to recommend available Federal surplus to the Administrator of the General Services Administration for transfer to such organizations, and for other purposes.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Governmental Affairs with amendments, as follows:

On page 2, line 3, beginning with "section", strike through and including "amended", and insert the following:

"This bill may be cited as the 'Emergency Services Improvement Act of 1982'.

SECTION 1. Section 484(j) of title 40, United States Code is amended":

On page 2, line 19, strike "educational";

On page 3, line 12, strike "206", and insert "207";

On page 3, line 20, strike "excess", and insert "surplus";

On page 3, line 23, strike "excess", and insert "surplus";

On page 4, line 11, strike "207(a).", and insert "208(a).";

On page 4, line 13, strike "206", and insert "207"; and

On page 4, in the material after line 14, strike "207.", and insert "208."

So as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this bill may be cited as the "Emergency Services Improvement Act of 1982".

SECTION 1. Section 484(j) of title 40, United States Code, is amended by striking subsection (j)(2) and inserting in lieu thereof the following new paragraph:

"(2)(A) In the case of surplus personal property under the control of the Department of Defense, the Secretary of Defense shall determine whether such property is usable and necessary for the civil defense needs of the United States or for educational activities which are of special interest to the armed services, such as maritime academies, or military, naval, Air Force, or Coast Guard preparatory schools. If the Secretary determines that such property is usable and necessary for said purposes, the Secretary shall allocate it for transfer by the Administrator to the appropriate State agency for distribution, through donation, to such activities. If the Secretary determines that

such property is not usable and necessary for such purposes, it may be disposed of in accordance with paragraph (3) of this subsection.

"(B) Before making any determination concerning the property described in paragraph (2)(A), the Secretary shall confer with and ask the guidance of the Director of the Federal Emergency Management Agency. The Director shall continuously review the available property under the control of the Department of Defense and shall immediately notify the Secretary whenever he has identified property appropriate for civil defense purposes.

"(C) The Director shall notify the Congress whenever the Secretary has refused to accept his recommendation to allocate property to the Administrator of the General Services Administration as provided under subsection (2)(A)."

SEC. 2. (a) The Federal Civil Defense Act of 1950 is amended by inserting after section 207 the following new section:

"TRANSFER OF PROPERTY TO STATE AND LOCAL GOVERNMENTS

"SEC. 208. (a) Upon notification of the Administrator of General Services in accordance with the Federal Property and Administrative Services Act of 1949 by any agency other than a department or organization within the Department of Defense that such agency has surplus property under its control, the Director shall be notified by the Administrator of General Services of the availability of such surplus property. Before transferring or allocating any such property, the Administrator shall consult with and ask the guidance of the Director of the Federal Emergency Management Agency concerning which such property would be suitable for civil defense purposes. The Administrator shall carefully and completely consider the recommendations of the Director and, based on such recommendations, shall transfer property to the appropriate State agency for distribution to the civil defense organizations identified by the Director.

"(b) The Director shall notify the Congress whenever the Administrator has refused to accept his recommendations to transfer property identified by the Director as provided in section 208(a)."

(b) The table of contents of such Act is amended by inserting after the item relating to section 207 the following new item:

"Sec. 208. Transfer of property to State and local governments."

Mr. ROTH. Mr. President, I am pleased that the Senate is acting today on legislation which I first introduced 3 years ago. This bill is intended to improve the availability of surplus Federal property to State and local emergency services organizations by establishing emergency preparedness as an important national priority. I believe the legislation is an efficient and effective way to assist State and local emergency preparedness organizations perform their lifesaving duties and I urge my colleagues to support it.

The Emergency Services Improvement Act would help address the needs of State and local emergency and disaster preparedness organizations for trucks, generators, firehoses, tools, and other emergency supplies. Currently, there are over 1½ million volunteer firefighters, 28,000 fire companies, some 6,000 civil defense agen-

cies, and countless local rescue squads providing services to their local communities in fighting fires, rescuing and treating hurt or trapped persons, and planning for natural or manmade disasters. Many of these organizations are volunteer based and operate on funds raised from private sources. They do not have the time or the money to become knowledgeable concerning Federal property programs and have found themselves, over the past 5 years, less and less accessible to Federal personal property declared as surplus.

Before 1977, many of these groups relied, to some degree, on their ability to obtain usable surplus equipment from the Federal Government to help them maintain and improve their services. Most often, the property they obtained was old and in a state of disrepair but they utilized their talents to restore the equipment to working order. In many cases, the trucks and generators they received were of Korean war vintage and their willingness and ability to devote considerable time and effort to revamp the aged Federal equipment was commendable. My Committee on Governmental Affairs received dozens of letters and photographs detailing how the equipment was being rebuilt and used from local disaster preparedness groups across the country.

Changes made in the law in the 1970's greatly reduced the availability of surplus Federal personal property to State and local firefighting rescue and civil defense organizations. Civil defense organizations at the local level have operated for many years as coordinating groups for all disaster preparedness organizations in their efforts to acquire surplus personal property from the Federal Government. In 1976, over \$170 million worth of surplus equipment was sent through civil defense organizations to volunteer firefighting companies, sheriffs' offices, and rescue squads. Last year, only \$30 million went to these same organizations. Many civil defense organizations have been unable to acquire equipment for disaster preparedness groups in their areas.

Local emergency preparedness organizations make good use of available Federal surplus property. In my own State, the Frankford Volunteer Fire Co., used surplus military equipment in the blizzard of 1980 to provide shelter and aid to 35 people in its firehouse. One of my constituents, Mr. Wayne Ellingsworth, director of Sussex County, Del., Department of Emergency Services, noted in testimony before my committee concerning a severe blizzard which struck the county in 1980:

Most of our success in saving lives during this blizzard was attributed to those 41 four-wheel drive vehicles that my department

had acquired through the excess equipment program then administered by the Defense Civil Preparedness Agency.

Mr. President, S. 2625 would establish emergency preparedness in the law as a priority need for the donation of surplus Federal property. It would require the Federal Emergency Management Agency (FEMA) to continuously survey available Federal property in the Defense Department and the civilian agencies to locate equipment appropriate for emergency services. When such equipment is found, FEMA would notify the General Services Administration (GSA) to transfer it to local emergency service organizations. GSA is the agency responsible for Federal property programs. The bill also specifically requires the Defense Department to consider the emergency preparedness needs of local organizations before sending its surplus equipment to the GSA for final disposal.

I think this legislation will improve the access of State and local emergency preparedness organizations to available surplus Federal property. It represents a cost-effective method of enhancing the ability of local volunteer fire and rescue squads to perform their lifesaving duties without increasing local taxes. I strongly urge my colleagues to support this measure.

The PRESIDING OFFICER. The question is on agreeing to the committee amendments.

The committee amendments were agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

BUDGET ACT WAIVER

Mr. BAKER. Mr. President, I intend to proceed to a budget waiver which is on the calendar as No. 738, Senate Resolution 434, and the waiver is to accompany Calendar No. 704, H.R. 6260, if that is agreeable to the minority leader.

Mr. ROBERT C. BYRD. Mr. President, both requests are agreeable.

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Senate Resolution 434.

The PRESIDING OFFICER. The resolution will be stated by title.

The assistant legislative clerk read as follows:

A resolution (S. Res. 434) waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of H.R. 6260.

The resolution (S. Res. 434) was considered and agreed to, as follows:

S. RES. 434

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to the consideration of H.R. 6260. Such waiver is necessary because H.R. 6260 authorizes appropriations for the Patent and Trademark Office which includes the implementation of new patent and trademark fee schedules on October 1, 1982, and such a bill or a companion Senate bill was not reported on or before May 15, 1982, as required by section 402(a) of the Congressional Budget Act of 1974.

The waiver of section 402(a) is necessary to permit enactment of H.R. 6260 in a timely manner so (1) the Patent and Trademark Office of the Department of Commerce can be authorized for fiscal years 1983, 1984, and 1985, and (2) new patent and trademark fee schedules can be implemented by October 1, 1982. With regard to the latter point, time is of the essence since a notice period and hearing on the proposed fee schedules must occur prior to October 1, 1982.

The levels of appropriations authorized by H.R. 6260, although \$8 million above the President's request for fiscal year 1982, are supported by the Reagan administration and would be within budget outlay levels for that purpose.

The Appropriations Committees of the Senate and House of Representatives have therefore had adequate notice of this authorization. Thus, congressional consideration of this authorization will in no way interfere with or delay the appropriations process.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AUTHORIZATION OF APPROPRIATIONS TO THE PATENT AND TRADEMARK OFFICE

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of H.R. 6260, which is the accompanying bill to the budget resolution just adopted.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 6260) to authorize appropriations to the Patent and Trademark Office in the Department of Commerce, and for other purposes.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

Mr. WEICKER. Mr. President, I am pleased that the Senate is today considering H.R. 6260, a bill to amend Public Law 96-517, the University and Small Business Patent Procedures Act. This is the House-passed version of S. 2326, which I introduced 3 months ago with Senators THURMOND, DECONCINI, HATCH, and KENNEDY.

S. 2326 was originally introduced as a substitute to S. 2211, the administra-

tion's proposed amendment to Public Law 96-517, which would have required all recipients of U.S. patents to pay 100 percent of the cost of patent user fees to be set by the Patent Commissioner.

While I generally support the concept of user fees in this time of budgetary restraint, as a way of making the Patent and Trademark Office (PTO) more self-sufficient, I am concerned that the 100-percent recovery fees being proposed by the administration would have a strong chilling effect on those who have been demonstrated to be the most innovative, job producing, sector of our economy—small businesses and independent inventors.

Under the administration's proposal, all patent recipients would be required to pay a minimum of \$800 in filing and issuance fees, and a minimum of \$2,400 in maintenance fees. While these costs are not likely to pose a significant financial burden for large firms, they could discourage small businesses and independent inventors from applying for patents.

Mr. President, we cannot allow this to happen. It is a well-known fact that small businesses account for a far greater number of inventions and innovations than do large firms. Moreover, small firms have been shown to have a faster growth rate, to create more jobs, and to create them more rapidly, and to contribute substantially more to the U.S. economy in terms of taxes paid.

Imposing the kind of user fees proposed by the administration could be just the thing to bring the innovative sector of this marvelous small business economic engine to a halt. And I do not need to tell any of you who have been reading the business pages that this is not the time to present any sector of the small business community with more hurdles to surmount.

On the contrary, this is the time when we should be doing everything in our power to encourage the development of new ideas and small innovative businesses.

S. 2326, the bill which we are considering today in the amended version of H.R. 6260, was designed to recognize the particular economic needs and circumstances of innovative small businesses, as well as those of universities and independent inventors.

Mr. President, I do not believe the right to protect the exclusivity of an idea should be determined solely by the ability to pay. My bill would allow small businesses and inventors to continue to exercise their full innovative capacity, while at the same time allowing them the uncontested right of ownership of their ideas. That right, as well as the overall state of innovation in this country, would be seriously jeopardized, in my opinion, if small firms and independent inventors were

required to pay fees at the 100-percent level.

My bill would establish a two-tier system for the payment of patent user fees. Simply stated, it requires that large firms pay at the 100-percent level, while smaller firms, independent inventors, and nonprofit organizations would pay at a 50-percent level.

I believe this two-tier approach is both reasonable and feasible. In fact, I have been assured by the PTO that no undue difficulty in administering such a system is anticipated.

The House Judiciary Committee incorporated the main provisions of S. 2326 in H.R. 6260 and added a section permitting arbitration of patent disputes when agreeable to both parties involved in the controversy. In addition, while the Senate measure would have allowed one consumer price indexing adjustment of the fees specified in the bill, H.R. 6260, makes such adjustments automatic every 3 years. The House version was unanimously approved by the House Judiciary Committee on May 11 and passed the full House by a voice vote on June 8.

H.R. 6260, the amended version of S. 2326, is a good bill and I strongly urge the Senate to adopt it.

I should like to take this opportunity to thank my colleagues, Senators THURMOND, DeCONCINI, HATCH, and KENNEDY for their help in promoting this legislation.

The bill was considered, ordered to a third reading, read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

BUDGET ACT WAIVER

Mr. BAKER. Mr. President, another budget waiver is Calendar No. 740, Senate Resolution 438, which is to accompany S. 2059. If there is no objection by the minority leader, I ask unanimous consent that the Senate proceed to the consideration of the budget resolution.

Mr. ROBERT C. BYRD. There is no objection.

The PRESIDING OFFICER. The resolution will be stated by title.

The assistant legislative clerk read as follows:

A resolution (S. Res. 438) waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 2059.

The resolution (S. Res. 438) was considered and agreed to, as follows:

S. RES. 438

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to the consideration

of S. 2059, a bill to change the coverage of officials and the standards for the appointment of a special prosecutor in the special prosecutor provisions of the Ethics in Government Act of 1978, and for other purposes. Such waiver is necessary to permit reauthorization of funds for the functions of the Department of Justice under section 601(c) of the Ethics in Government Act of 1978, with respect to independent counsels appointed under chapter 39 of title 28, United States Code.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ETHICS IN GOVERNMENT ACT AMENDMENTS OF 1982

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate S. 2059, calendar order No. 707, the subject matter of the budget waiver.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 2059) to change the coverage of officials and the standards for the appointment of a special prosecutor on the special prosecutor provisions of the Ethics in Government Act of 1978, and for other purposes.

There being no objection, the Senate proceeded to consider the bill which had been reported from the Committee on Governmental Affairs with amendments, as follows:

On page 3, line 6, after "amended", insert "by";

On page 3, line 7, strike "by";

On page 3, line 10, strike "by";

On page 3, line 13, strike "by";

On page 3, line 22, strike "5315", and insert "5313";

On page 4, line 10, strike "incumbency"; and insert the following: "incumbency, but in no event longer than five years after the individual leaves office;

"(7) any individual described in paragraph (6) who continues to hold office for not more than 90 days into the term of the next President during the period such individual serves plus one year after such individual leaves office;

On page 4, line 18, strike "(7)", and insert "(8)";

On page 4, line 22, strike "director; and", and insert "director, during the incumbency of the President; and";

On page 4, line 24, strike "(8)", and insert "(9)";

On page 5, line 3, after "(a)", insert "(1)"; On page 5, after line 6, insert the following:

(2) Section 591 of title 28 of the United States Code is amended by adding at the end thereof the following new subsection:

"(c) Whenever the Attorney General receives information sufficient to constitute grounds to investigate that any person not described in subsection (b) of this section has committed a violation of any Federal criminal law other than a violation constituting a petty offense, the Attorney General may conduct an investigation and apply for an independent counsel pursuant to the

provisions of this chapter if the Attorney General determines that investigation of such person by the Attorney General or other officer of the Department of Justice may result in a personal, financial, or political conflict of interest, or the appearance thereof."

On page 6, line 1, strike "section 591(a)", and insert "subsection (a) or (c) of section 591";

On page 6, line 15, strike "28", and insert "28 of the";

On page 6, line 16, strike "Code," and insert "Code";

On page 6, line 16, strike "'finds that'", and insert "'that'";

On page 6, line 21, strike "28," and insert "28 of the";

On page 6, line 22, strike "Code," and insert "Code";

On page 6, line 22, after "amended", insert "by";

On page 6, line 23, strike "by";

On page 7, line 2, strike "by";

On page 7, line 8, strike "by";

On page 7, line 11, after "written", insert "or other established";

On page 7, strike line 14, through and including line 17, and insert the following:

(e) Section 592(c)(2) of title 28 of the United States Code is amended—

(1) in clause (A) by striking out "specific information" and inserting in lieu thereof "information sufficient to constitute grounds to investigate"; and

(2) in clause (B) by striking out "such information warrants" and inserting in lieu thereof "reasonable grounds exist to warrant";

On page 8, line 12, after "for", insert "all or part of";

On page 9, line 5, strike "by", through and including line 7, and insert the following: by—

(1) striking out "to the extent that such special prosecutor deems appropriate" and inserting in lieu thereof "except where not possible"; and

(2) striking out "written policies" and inserting in lieu thereof "written or other established policies";

On page 9, line 19, after "written", insert "or other established";

So as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Ethics in Government Act Amendments of 1982".

SEC. 2. (a)(1) Chapter 39 of title 28 of the United States Code is amended by—

(A) striking out "special prosecutor" wherever it appears and inserting in lieu thereof "independent counsel"; and

(B) striking out "special prosecutors" wherever it appears and inserting in lieu thereof "independent counsel's";

(2) The tables of chapters for titles 28 of the United States Code and for part II of title 28 are amended by striking out the item relating to chapter 39 and inserting in lieu thereof the following new item: "39. Independent Counsel."

(b)(1) Section 49 of title 28 of the United States Code is amended by—

(A) striking out "special prosecutor" wherever it appears and inserting in lieu thereof "independent counsel";

(B) striking out "special prosecutors" wherever it appears and inserting in lieu thereof "independent counsels"; and

(C) striking out "special prosecutor's" wherever it appears and inserting in lieu thereof "independent counsel's".

(2) The item for section 49 in the table of sections for chapter 3 of title 28 of the United States Code is amended by striking out "special prosecutors" and inserting in lieu thereof "independent counsels".

(c) Title VI of the Ethics in Government Act of 1978 is amended by—

(1) striking out "SPECIAL PROSECUTOR" in the heading for section 601 and inserting in lieu thereof "INDEPENDENT COUNSEL";

(2) striking out "special prosecutors" in subsection (c) of section 601 and inserting in lieu thereof "independent counsels"; and

(3) striking out "SPECIAL PROSECUTORS" in the heading for section 602 and inserting in lieu thereof "INDEPENDENT COUNSELS".

Sec. 3. Paragraphs (3) through (6) of subsection (b) of section 591 of title 28 of the United States Code are amended to read as follows:

"(3) any individual working in the Executive Office of the President who is compensated at or above a rate equivalent to level II of the Executive Schedule under section 5313 of title 5;

"(4) any Assistant Attorney General and any individual working in the Department of Justice compensated at a rate at or above level III of the Executive Schedule under section 5314 of title 5;

"(5) the Director of Central Intelligence, the Deputy Director of Central Intelligence, and the Commissioner of Internal Revenue;

"(6) any individual who held any office or position described in any of paragraphs (1) through (5) of this subsection during the period consisting of the incumbency of the President such individual serves plus one year after such incumbency, but in no event longer than five years after the individual leaves office;

"(7) any individual described in paragraph (6) who continues to hold office for not more than 90 days into the term of the next President during the period such individual serves plus one year after such individual leaves office;

"(8) the chairman and treasurer of the principal national campaign committee seeking the election or reelection of the President, and any officer of the campaign exercising authority at the national level, such as the campaign manager or director, during the incumbency of the President; and

"(9) the President's spouse, the President's children and their spouses, and the President's parents, brothers and sisters and their spouses during the incumbency of the President."

SEC. 4. (a)(1) Section 591(a) of title 28 of the United States Code is amended by striking out "specific information" and by inserting in lieu thereof "information sufficient to constitute grounds to investigate".

(2) Section 591 of title 28 of the United States Code is amended by adding at the end thereof the following new subsection:

"(c) Whenever the Attorney General receives information sufficient to constitute grounds to investigate that any person not described in subsection (b) of this section has committed a violation of any Federal criminal law other than a violation constituting a petty offense, the Attorney General may conduct an investigation and apply for an independent counsel pursuant to the provisions of this chapter if the Attorney General determines that investigation of such person by the Attorney General or other officer of the Department of Justice

may result in a personal, financial, or political conflict of interest, or the appearance thereof."

(b) Section 592(a) of title 28 of the United States Code is amended to read as follows:

"(a)(1) Upon receiving information that the Attorney General determines is sufficient to constitute grounds to investigate that any person covered by the Act has engaged in conduct described in subsection (a) or (c) of section 591 of this title, the Attorney General shall conduct, for a period not to exceed ninety days, such preliminary investigation of the matter as the Attorney General deems appropriate. In determining whether grounds to investigate exist, the Attorney General shall consider—

"(A) the degree of specificity of the information received, and

"(B) the credibility of the source of the information.

"(2) In conducting preliminary investigations pursuant to this section, the Attorney General shall have no authority to convene grand juries, plea bargain, grant immunity, or issue subpoenas."

(c) Section 592(b)(1) of title 28 of the United States Code is amended by striking out "that the matter is so unsubstantiated that no further investigation or prosecution is warranted" and inserting in lieu thereof "that there are no reasonable grounds to believe that further investigation or prosecution is warranted".

(d) Section 592(c)(1) of title 28 of the United States Code is amended by—

(1) striking out "finds that the matter warrants further investigation or prosecution" and inserting in lieu thereof "finds reasonable grounds to believe that further investigation or prosecution is warranted";

(2) striking out "that the matter is so unsubstantiated as not to warrant further investigation or prosecution" and inserting in lieu thereof "that there are no reasonable grounds to believe that further investigation or prosecution is warranted"; and

(3) adding at the end thereof the following new sentence: "In determining whether reasonable grounds exist to warrant further investigation or prosecution, the Attorney General shall comply with the written or other established policies of the Department of Justice with respect to the enforcement of criminal laws."

(e) Section 592(c)(2) of title 28 of the United States Code is amended—

(1) in clause (A) by striking out "specific information" and inserting in lieu thereof "information sufficient to constitute grounds to investigate"; and

(2) in clause (B) by striking out "such information warrants" and inserting in lieu thereof "reasonable grounds exist to warrant".

SEC. 5. Section 593 of title 28 of the United States Code is amended by adding at the end thereof the following new subsections:

"(f) Upon a showing of good cause by the Attorney General, the division of the court may grant a single extension of the preliminary investigation conducted pursuant to section 592(a) of this title for a period not to exceed 6 days.

"(g) Upon request by the subject of an investigation conducted by an independent counsel pursuant to this chapter, the division of the court may, in its discretion, award reimbursement for all or part of the attorney's fees incurred by such subject during such investigation if—

"(1) no indictment is brought against such subject; and

"(2) the attorney's fees would not have been incurred but for the requirements of this chapter."

SEC. 6. (a) Subsection (a) of section 594 of title 28 of the United States Code is amended by—

(1) striking out "and" at the end of paragraph (8);

(2) striking out the period at the end of paragraph (9) and inserting in lieu thereof a semicolon and "and"; and

(3) adding after paragraph (9) the following:

"(10) consulting with the United States Attorney for the district in which the violation was alleged to have occurred."

(b) Subsection (f) of section 594 of title 28 of the United States Code is amended by striking out "to the extent that such special prosecutor deems appropriate" and inserting in lieu thereof "except where not possible", by—

(1) striking out "to the extent that such special prosecutor deems appropriate" and inserting in lieu thereof "except where not possible"; and

(2) striking out "written policies" and inserting in lieu thereof "written or other established policies".

(c) Section 594 of title 28 of the United States Code is amended by adding at the end thereof the following new subsection:

"(g) The independent counsel shall have full authority to dismiss matters within his prosecutorial jurisdiction without conducting an investigation or at any subsequent time prior to prosecution if to do so would be consistent with the written or other established policies of the Department of Justice with respect to the enforcement of criminal laws."

(d) Paragraph (1) of subsection (a) of section 596 of title 28 of the United States Code is amended by striking out "extraordinary impropriety" and inserting in lieu thereof "good cause".

SEC. 7. Section 598 of title 28 of the United States Code is amended by striking out "after the date of enactment of this chapter" and inserting in lieu thereof "after the date of enactment of the Ethics in Government Act Amendments of 1982".

Mr. COHEN. Mr. President, I am pleased that the Senate is considering today S. 2059, the Ethics in Government Act Amendments of 1982. This bill would amend the special prosecutor provisions of the Ethics in Government Act of 1978 to better insure impartial investigations of high-ranking executive branch campaign officials, as well as members of the President's family, and to remove inequities from the present law. Six of my distinguished colleagues—Senators LEVIN, RUDMAN, EAGLETON, STEVENS, SCHMITT, and SASSER—are cosponsors of my legislation, which was unanimously reported by the Committee on Governmental Affairs on June 17.

In the almost 4 years since the Ethics Act was passed, there has been substantial criticism of the special prosecutor provisions. Much of this publicity stemmed from the controversial nature of the first two cases in which special prosecutors were appointed pursuant to the act: two Carter administration officials were investigated for alleged possession of

cocaine. After extensive investigation, prolonged media attention, and high costs to both the Government and the officials investigated, the special prosecutor in each case concluded that there was no basis for an indictment. Some critics, however, have expressed larger concerns about the special prosecutor process itself, saying that the law creates unfairness by applying a higher standard of criminal law to public officials and that the act usurps the legitimate discretion and prosecutorial authority of the Attorney General.

To evaluate these and other concerns, the Subcommittee on Oversight of Government Management has studied the special prosecutor law for over a year. Last year, the subcommittee held extensive hearings on the law at which we received testimony from both its strong supporters and its critics. S. 2059 would implement recommendations which we made as a result of our investigation and hearings.

S. 2059 retains the basic structure of the current law because the subcommittee concluded that dangers of conflict of interest were not unique to Watergate, but rather are inherent in our system of government. As a political appointee of the President, a close adviser to the President, and part of an administration which hopes to gain political success, an Attorney General may be placed in a difficult situation when investigating allegations against a senior executive official. Even when such an investigation is truly handled impartially, the public may doubt that it was if the official is cleared by the Department. In other cases, the Attorney General may bend over backward and prosecute an official when prosecution is not warranted, in order to avoid the appearance of favoritism.

When such conflicts of interest exist, or when the public perceives there to be a conflict, public confidence in the investigation of public officials is eroded, if not totally lost. By providing a special prosecutor to conduct impartial and thorough investigations of officials, the present law guards against conflicts of interest and guarantees that public officials are not above the law.

The recent case of Secretary of Labor Donovan illustrates clearly the importance of the special prosecutor process to the official involved, the public, and the administration. In December of last year, Leon Silverman was appointed special prosecutor to investigate allegations of bribery and related offenses by Secretary Donovan. After conducting a thorough investigation, Mr. Silverman issued a fully documented report in which he concluded that there was insufficient credible evidence on which to base an indictment on any allegation. When Mr. Silverman's findings were made public, the cloud of suspicion was lifted from

Secretary Donovan. The public and the press accepted the findings of the special prosecutor as impartial and thorough. I do not doubt that the Department of Justice could have performed the same type of investigation; however, the same level of public confidence could not have been achieved if the Attorney General, a fellow Cabinet member of Secretary Donovan, had conducted the investigation and reached an identical conclusion.

S. 2059 reaffirms the need for the special prosecutor law by extending it for 5 years.

An endorsement of the special prosecutor process does not mean, however, that the present law is perfect. To the contrary, our investigation and hearings revealed that there are substantial weaknesses in the Ethics Act. The foremost problem is that the law has created unfairness by imposing a stricter application of criminal law on public officials. This inequity results from the very low standards for triggering a preliminary investigation and for appointing a special prosecutor. These standards leave the Attorney General little practical opportunity to dismiss even frivolous allegations without seeking a special prosecutor. This process subjects officials to exhaustive, costly, and lengthy investigations in cases which would not ordinarily be pursued against private citizens. For example, in both the Hamilton Jordan and Timothy Kraft cases, special prosecutors were appointed to investigate alleged possession of cocaine by these officials despite the fact that the Department of Justice rarely prosecutes for possession of cocaine in the quantities alleged.

The subcommittee also concluded that the coverage of the present law is flawed. The act does not cover persons who create great dangers of conflict of interest—the President's family—yet at the same time it covers persons who present little realistic dangers of conflict—for example, middle-level executive officials and officials who have long since left public service.

S. 2059 would remedy these and other problems of the present law. First, it would revise the standard which triggers a preliminary investigation to allow the Attorney General to consider the credibility of the accuser, as well as the specificity of the information, in deciding whether to pursue an allegation.

Second, the bill would tighten the standard for appointment of a special prosecutor from the present very low threshold requiring appointment unless the matter is "so unsubstantiated that no further investigation or prosecution is warranted" to one requiring appointment when the Attorney General "finds reasonable grounds to believe that further investigation or prosecution is warranted." In determining whether reasonable grounds

exist, the Attorney General would follow the written or other established prosecutorial policies of the Department of Justice. These changes would enable the Attorney General to screen out allegations which would not ordinarily be prosecuted, while assuring that serious cases are sent to a special prosecutor. Permitting the Attorney General to follow the prosecutorial guidelines of the Department, which govern ordinary criminal cases, would remove a major inequity in the law.

Third, S. 2059 would amend the law so that its coverage more closely reflects those instances posing the greatest danger of conflict of interest. It would restrict coverage to only those officials who occupy top-level executive branch positions close to either the President of the Attorney General but would extend coverage to members of the President's family. It would also more clearly define which campaign officials are subject to the act. In addition, the bill would permit the Attorney General to use the special prosecutor process to investigate an individual not otherwise covered by the act, such as a very close friend of the President, if a Department of Justice investigation of this person would create conflicts of interest. Other provisions of S. 2059 would limit and standardize the coverage of officials under the act, so that officials would no longer be covered for many years after they leave office.

S. 2059 also would make the law less burdensome to both the Government and the subject of the special prosecutor investigation. By changing the name of the special prosecutor to "independent counsel," this legislation would remove the Watergate connotation from an investigation. S. 2059 also would authorize the court to award attorneys' fees to the subject of a special prosecutor investigation under strictly limited circumstances.

Additional provisions would check the potential for abuse of power by the special prosecutor by requiring him or her to follow prosecutorial guidelines of the Department of Justice, by expressly enabling him or her to dismiss a case without further investigation and to consult with the U.S. attorney, and by allowing removal of a special prosecutor for the more definable standard of "good cause."

S. 2059 recognizes that statutory independence of a special prosecutor is crucial to public confidence in the prosecutor's findings and decisions. In amending the removal standard, S. 2059 retains three important provisions of the present law which guard against unwarranted removal of the special prosecutor. Upon removing a special prosecutor, the Attorney General must file reports with the court and the Judiciary Committees of both the Senate and the House fully speci-

fying the facts and grounds underlying the removal. These reports may be released to the public. S. 2059 also retains the provisions of present law that enable a special prosecutor to obtain judicial review of his removal and permit the court to reinstate the special prosecutor or to provide other appropriate relief for improper removal. By retaining these protections, I am confident that S. 2059 in no way compromises the independence of the special prosecutor.

Mr. President, it is crucial that the Senate address these issues immediately by passing S. 2059. Under a sunset provision, the special prosecutor law will expire in October 1983. Failure to correct the inequities of the present law now could produce another unfortunate case similar to those experienced during the Carter administration and could provide ammunition to those who favor outright repeal or expiration of the entire law.

The special prosecutor process was an important reform that must be retained. Congress would be remiss if it does not act swiftly to reaffirm its strong commitment to this reform by extending, and correcting deficiencies in the present law. Far from diluting the special prosecutor process, S. 2059 would improve the law by making it fairer and less burdensome. In this way, we can better insure that public officials and private citizens are treated impartially—and equally—under the law.

I wish to express my appreciation to my cosponsors and all the members of the Governmental Affairs Committee for their assistance in my subcommittee's efforts to reform the special prosecutor law.

Mr. President, I ask unanimous consent that a section-by-section analysis and an explanation of the provisions of S. 2059 be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

**S. 2059: THE ETHICS IN GOVERNMENT ACT
AMENDMENTS OF 1982**

SECTION-BY-SECTION ANALYSIS

Short title

The first section sets forth the short title of this bill, the Ethics in Government Act Amendments of 1982.

Section 2: Name of Special Prosecutor

Section 2 would change the name of the special prosecutor to "independent counsel" in order to reduce the stigma of, and remove the Watergate connotation from, a special prosecutor investigation and to more accurately describe the purpose of appointing an individual to conduct an investigation.

Section 3: Coverage

Section 3 would amend the coverage of officials who are potential subjects of the special prosecutor process.

First, the present law (Section 591) would be amended to reduce coverage of middle-level Executive officials who, because they are close to neither Presidential nor Department of Justice decision-making, do not

present realistic dangers of conflict of interest. Under the proposed amendments, the President, Vice-President, Cabinet members, Director and Deputy Director of the Central Intelligence Agency, Commissioner of the Internal Revenue Service, and positions in the Department of Justice paid at amounts equivalent to or above Level III of the Executive Schedule would continue to be covered. The amendments would limit coverage of officials in the Executive Office of the President to persons compensated at rates of pay at or above Level II of the Executive Schedule rather than Level IV or above, as under present law.

Section 3 would more precisely define which campaign "officers" are subject to the Act by specifically covering the chairman and treasurer of the principal national campaign committee seeking election or reelection of the President and any other officers of the campaign exercising authority at the national level, such as the campaign manager or director. The present law's coverage of campaign officials (Section 591(b)(6)) is vague and overinclusive by not limiting coverage to only officers who hold positions of authority. This section also specifies that these campaign officials are covered only during the incumbency of the President. No length of coverage is specified under present law.

Section 3 would extend coverage to family members of the President for only the incumbency of the President. Under present law, family members of the President are not covered.

This section also would reduce and standardize the length of time during which executive officials remain subject to the Act. Under Section 591(b)(5) of the present law, an official remains covered for the entire incumbency of the President under which he serves and the full term or terms of the next President if the new President is of the same political party. Thus, an official can remain subject to the Act for as long as 16 years after he or she leaves public office. The proposed amendment would cover all Executive officials for the incumbency of the President under which they serve plus one year, but in no event longer than five years after the individual leaves office, regardless of which political party holds the presidency.

Finally, Section 3 would reduce the length of coverage of officials who remain in office only in a transitional capacity under a new administration. Under present law, these officials can continue to be covered for the entire incumbency of the new President. The proposed amendment would specify that officials who continue to hold office for not more than 90 days into the term of the next President shall be covered during the periods such individuals serve, plus one year.

Section 4: Standards for Conducting a Preliminary Investigation and Appointing a Special Prosecutor

Section 4(a)(1) and 4(b) would raise the present standard for determining whether a preliminary investigation is required. The proposed amendment states that "upon receiving information that the Attorney General determines is sufficient to constitute grounds to investigate" that any person covered by the Act has violated a federal criminal law, the Attorney General must conduct a preliminary investigation. The proposed amendment stipulates that in determining whether "grounds to investigate" exist, the Attorney General shall consider the degree of specificity of the information and the

credibility of the source of the allegation. The proposed standard differs from Section 592 of the present law which does not enable the Attorney General to consider the credibility of the accuser, but rather provides that a preliminary investigation must be conducted whenever the Attorney General receives "specific information" that a covered official has violated a federal criminal law. This standard can result in preliminary investigations for allegations with little or no factual merit.

Section 4(a)(2) adds a new subsection to the statute. This section vests discretionary authority in the Attorney General to conduct a preliminary investigation and apply for the appointment of a special prosecutor pursuant to the provisions of this chapter when the Attorney General receives information of criminal activity by a person not covered by the Act if he determines that investigation of such person by the Attorney General or other Department of Justice officer may result in a personal, financial, or political conflict of interest, or the appearance thereof. The present law does not allow the Attorney General to use the special prosecutor process for persons who are not expressly covered by the Act.

Section 4(b) adds a new section 592(a)(2) to the statute. This is a clarifying amendment which provides that in conducting the preliminary investigation the Attorney General has no authority to convene grand juries, plea bargain, grant immunity or issue subpoenas. Although the legislative history of the Act expressly denies these powers to the Attorney General, the Act itself is silent on this issue, thus giving rise to varying interpretations on the permissible extent of the preliminary investigation.

Section 4(c)-(d) would raise the standard for appointment of a special prosecutor to require appointment if the Attorney General "finds reasonable grounds to believe that further investigation or prosecution is warranted." The amendment directs the Attorney General to comply with written or other established policies of the Department of Justice with respect to the enforcement of criminal laws in determining whether reasonable grounds for further investigation or prosecution exist.

The present law (Section 592 (b)-(c)) requires appointment unless the Attorney General concludes that the matter under investigation "is so unsubstantiated that no further investigation or prosecution is warranted." This trigger of appointment is almost automatic, leaving little practical opportunity for the Attorney General to dismiss allegations supported by little or no factual support. The standard fails to incorporate the prosecutorial guidelines and policies of the Department of Justice, and requires a special prosecutor investigation even for offenses which would not be prosecuted if made by an ordinary citizen. By ignoring the standardized policies of the Department, the Act imposes a different, more stringent application of criminal law on public officials.

Section 5: Extension of Preliminary Investigation and Reimbursement of Attorneys' Fees

Section 5 provides that the Special Prosecutor Division of the court may, upon a showing of good cause by the Attorney General, grant a single extension of the preliminary investigation for a period not to exceed 60 days. The present law (592(a)) places a 90-day limitation on the preliminary investigation with no provision for extension. This

strict 90-day limitation may force the Attorney General to seek appointment of a special prosecutor simply because the 90-day period was too short.

Section 5 also would allow the court to grant, in its discretion, reimbursement of all or part of the attorneys' fees incurred by the subject of a special prosecutor investigation if no indictment is brought and if the fees would not have been incurred but for the special prosecutor appointment. No provision for reimbursement exists in the present law and officials may incur extensive legal fees during an investigation by a special prosecutor. The proposed amendment would not allow reimbursement for expenses incurred during a preliminary investigation as even private citizens would be subject to this type of investigation.

Section 6: Powers and Removal of the Special Prosecutor

Section 6(a) would authorize the special prosecutor to consult with the U.S. Attorney for the district in which the violation of criminal law was alleged to have occurred. Although this is not prohibited under present law, the proposed amendment would expressly authorize the special prosecutor to do so in order to assist him in determining the policy of the particular jurisdiction regarding prosecution of the alleged offense.

Section 6(b) would require the special prosecutor to follow the written or other established prosecutorial policies of the Department of Justice. Section 594(f) of the present law requires the special prosecutor to comply with the written policies of the Department "to the extent that the special prosecutor deems appropriate." Section 6(b) would amend this section to require compliance "except where not possible" in order to create a presumption that the special prosecutor will follow prosecutorial guidelines.

Section 6(c) states that the special prosecutor shall have full authority to dismiss matters within his prosecutorial jurisdiction without conducting an investigation or at any subsequent time prior to prosecution if to do so would be consistent with the written or other established policies of the Department of Justice. Although this is permissible under present law, the proposed amendment clarifies this authority so that special prosecutors will not unduly prolong investigations.

Section 6(d) of the bill would provide for removal of the special prosecutor by the Attorney General for "good cause," a standard which is used for removal of some independent agency officials. The amendment would not change the present law's provisions for full reports to Congress upon removing a special prosecutor and opportunity for judicial review of such removal; these are maintained as checks against interference by the Attorney General in the independence of the special prosecutor.

The present law (Section 596(a)(1)) provides for removal by the Attorney General only on the grounds of "extraordinary impropriety" or mental or physical disability.

Section 7: Expiration of the Special Prosecutor Provisions

Section 7 would extend the sunset date of the Act to five years after the adoption of these amendments.

The present law (Section 598) provides that the special prosecutor provisions will expire in October, 1983, unless otherwise extended by Congress.

S. 2059: PROVISIONS OF THE ETHICS IN GOVERNMENT ACT AMENDMENTS OF 1982

1. COVERAGE

A. Amending the number of officials subject to the Special Prosecutor process

Current Law: Section 591(b) of the Act defines the federal executive and campaign officials who are potential subjects of the special prosecutor process. These covered positions include the President, Vice-President, all Cabinet members, the Director and Deputy Director of the Central Intelligence Agency, any Assistant Attorney General, and the Commissioner of the Internal Revenue Service. In addition, all positions in the Executive Office of the President above Level IV of the Executive Pay Scale and in the Department of Justice above Level III are subject to the Act. Finally, any officer of the principal national campaign for the election or re-election of the President is covered.

Problems with Current Law: Currently, there are over 120 positions subject to the special prosecutor provisions, 93 of which are in the Executive Office of the President. Based on testimony received at its hearings, the Subcommittee found that investigations of individuals holding many of these positions, who are close to neither Presidential nor Department of Justice decision-making, would create little danger of conflict of interest, or the public perception thereof, if conducted by the Department of Justice. In light of the extreme stigma and costs which a special prosecutor investigation can impose on its subject, coverage of the Act should be limited to those positions which present realistic dangers of conflict.

Also, the Subcommittee concluded that the Act's coverage of campaign officials is overinclusive, as many campaign "officers" do not hold positions of authority which would give rise to conflicts of interest.

S. 2059: The Act would be amended to reduce coverage of middle-level Executive officials. Section 3 of the proposed amendments specifies that the Act would cover: the President, Vice-President, Cabinet members, Director and Deputy Director of the Central Intelligence Agency, Commissioner of the Internal Revenue Service, any Assistant Attorney General, and officials in the Executive Office of the President receiving salaries at or equivalent to Level II or above, and Department of Justice officials paid at or above rates equivalent to Level III of the Executive Schedule.

Also, Section 3 of the proposed amendments would reduce the number of campaign "officers" subject to the Act by covering the chairman and the treasurer of the principal national campaign committee seeking election or re-election of the President, and any officer of the campaign exercising authority at the national level, such as the campaign manager or director during the incumbency of the President.

B. Amendment to cover family members of the President

Current Law: Under present law, only present or past government or campaign officials are subject to the Act.

Problem With Current Law: Ironically, while the Act's coverage of officials is overinclusive, the Act's coverage is underinclusive by failing to cover a class of persons very close to the President who would present dangers of conflict of interest if investigated by the Department of Justice: the President's family. The so-called "Billy-gate Affair," in which Billy Carter was suspected of having an improper relationship with the

Libyan government, illustrates the perceived conflict of interest which arises when the Department of Justice investigates the President's family members.

S. 2059: Section 3 of the proposed amendments specifies that the Act would cover the President's spouse, the President's children and their spouses, and the President's parents, brothers and sisters, and their spouses during the incumbency of the President.

C. Amendment to establish a catch-all provision for individuals not covered by the act

Current Law: Under present law, the Attorney General may use the special prosecutor provisions for only persons who are covered by the Act.

Problems with Current Law: The Department of Justice testified that there may be instances in which investigation of persons not covered by the Act would create actual or perceived conflict of interest problems if conducted by the Attorney General, e.g., business associates and close friends of the President. Under present law, the Attorney General has no discretion to use the special prosecutor mechanism to investigate these persons.

S. 2059: Section 4(a)(2) of the proposed amendments provides that: "Whenever the Attorney General receives information sufficient to constitute grounds to investigate that any person not described in subsection (b) of this section has committed a violation of any Federal criminal law other than a violation constituting a petty offense, the Attorney General may conduct an investigation and apply for an independent counsel pursuant to the provisions of this chapter if the Attorney General determines that investigation of such person by the Attorney General or other officer of the Department of Justice may result in a personnel, financial, or political conflict of interest, or the appearance thereof."

D. Reducing and standardizing length of coverage of persons subject to the act

Current Law: Section 591(b)(5) provides that individuals who hold covered positions, except campaign officers, continue to be covered for the full term of the President who appointed them and that President's second term, even if they have left government service. Also, these individuals continue to be covered for the full term or terms of the next President if he or she is of the same political party.

Problems with Current Law: Under existing law, an official can remain subject to the special prosecutor provisions for as long as 16 years after he or she leaves public office. There was a consensus at the Subcommittee's hearings that there can be no realistic fear of conflict of interest if an individual has been out of office that long. Also, this coverage turns on which political party wins the Presidential election, and thus creates a "politicization" of the administration of justice.

The present law also covers "holdover" officials long after they leave office. These are officials who continue to hold office into the term of the new President in merely a transitional capacity. Although these officials may serve for only a very short period of time, under the present law they would be covered for the entire term(s) of the new President and any successor of the same political party.

S. 2059: In order to reduce and standardize coverage, the proposed amendments provide that all officials would be covered by the Act for the incumbency of the President under which they serve plus one year, but in

no event longer than five years after the individual leaves office. This coverage would apply to all Executive Branch officials, regardless of which political party holds the Presidency. Campaign officials and the President's family would be covered only for that President's incumbency.

In order to remedy the "holdover" problem, the amendments state that: "Any individual . . . who continues to hold office for not more than 90 days into the term of the next President [shall be covered] during the period such individual serves plus one year."

This language enables an official to serve up to three months into the new term without subjecting himself or herself to coverage for the full incumbency of the new President. Although there may be holdovers who serve longer than 90 days, this new language should substantially ameliorate the problem of covering holdover officials for the entire incumbency of the new President.

2. AMENDMENTS OF THE PRELIMINARY INVESTIGATION PHASE OF THE PROCESS

A. Revise standard which triggers a preliminary investigation

Current Law: Section 592(a) requires the Attorney General to conduct a preliminary investigation whenever he receives "specific information" that any of the persons covered by the Act has violated a federal criminal law, other than a petty offense.

Problems with Current Law: This standard is so low that a preliminary investigation can result for allegations with little or no factual basis. The Department of Justice and others testified that preliminary investigations are required even when the source of an allegation is known to lack credibility. Such an automatic trigger wastes Departmental resources and creates unfairness by requiring investigations of officials for allegations which would not be pursued under ordinary circumstances.

S. 2059: Section 4(b) of the proposed amendments changes the standard to require the Attorney General to conduct a preliminary investigation whenever he receives "information that the Attorney General determines is sufficient to constitute grounds to investigate" that any person has violated a federal criminal law other than a petty offense. In determining whether "grounds to investigate" exist, the Attorney General shall consider (a) the specificity of the information received, and (b) the credibility of the source of the information.

B. Allow court to grant single extension of the preliminary investigation and restrict use of investigative tools during the preliminary investigation

Current Law: Section 592 of the Act provides that the preliminary investigation may not exceed 90 days and that the Attorney General may conduct a preliminary investigation "as the Attorney General deems appropriate." While the Act is silent on the powers the Attorney General has in conducting the preliminary investigation, the legislative history of the Act expressly denies the powers of subpoena, plea bargaining, use of grand jury or other prosecutorial functions during the preliminary investigation on the theory that the Attorney General's purpose is to merely screen cases which are referred to a special prosecutor.

Problems with Current Law: The strict 90-day limitation on the preliminary investigation ignores the reality that fact-gathering is time-consuming, particularly in light of the sensitive nature of cases involving public officials. Typical criminal investigations take between two and five years before

an indictment. The 90-day limit may force the Attorney General to seek appointment of a special prosecutor simply because he did not have sufficient time to investigate the allegations received.

By failing to prohibit specifically the use of investigative tools during the preliminary investigation, the Act can result in differing interpretations on the permissible extent of the preliminary investigation. The Subcommittee concluded that the express language of the Act should be clarified so that attorneys general will be prohibited from conducting a full-blown investigation rather than simply screening cases as the Act intends.

S. 2059: Section 5 of the bill authorizes the court to grant a single extension of the preliminary investigation upon a showing of good cause by the Attorney General. In no case would the extension exceed 60 days. The amendments allow only a single limited extension in order to prevent abuse or intentional delays by the Attorney General and to assure that public confidence is not jeopardized. The intent is that extending the preliminary investigation should not become a routine practice.

Section 4(b)(2) of the bill clarifies the intent of present law by providing that the Attorney General has no authority to convene grand juries, plea bargain, grant immunity, or issue subpoenas during the preliminary investigation.

3. RAISE THE STANDARD WHICH TRIGGERS APPOINTMENT OF A SPECIAL PROSECUTOR

Current Law: Unless the Attorney General can state in his application to the court that "the matter is so unsubstantiated that no further investigation or prosecution is warranted," he must apply for a special prosecutor.

Problems with Current Law: Extensive testimony at hearings indicated that this trigger of appointment leaves little practical opportunity for the Attorney General to dismiss allegations following the preliminary investigation. For example, former Attorney General Civiletti testified that in the case involving an allegation of cocaine use by Hamilton Jordan, although he specifically concluded that a prosecution would not have resulted on the basis of facts received, he was unable to dismiss the case because of the very low trigger. The standard is far lower than that generally used by prosecutors in both federal and state courts systems in determining whether a case should be investigated extensively, i.e., probable cause. Moreover, the present appointment standard ignores the legitimate use of prosecutorial discretion and guidelines that the Department has developed to standardize its discretion and policies of law enforcement. Consequently, persons subject to the act are held to a different, more stringent application of criminal law than are ordinary citizens. For example, in the Hamilton Jordan and Timothy Kraft cases, special prosecutors were appointed to investigate allegations of cocaine use, a violation which is not pursued extensively under normal circumstances. Former Attorney General Civiletti testified that the alleged violation in both of the cases would not have been prosecuted under the Carter administration or any administration except for the stringent requirements of this Act.

The Subcommittee concluded that the low threshold and failure to incorporate prosecutorial guidelines in the present standard create unfairness by imposing a special, stricter application of criminal law on public officials.

S. 2059: Section 4(c)-(d) of the bill raises the appointment standard to require appointment when the Attorney General "finds reasonable grounds to believe that further investigation or prosecution is warranted." In determining whether "reasonable grounds" exist, the bill requires the Attorney General to comply with the written or other established policies of the Department of Justice with respect to the enforcement of criminal laws.

This new standard would strike an appropriate balance between the need to permit the Attorney General to exercise limited discretion in evaluating the results of the preliminary investigation and the need to assure that ultimate prosecutorial decisions are left to the special prosecutor. The bill anticipates that the Attorney General will be able to justify his decision to the court that a special prosecutor is not needed upon a showing that the Department of Justice or the U.S. Attorney for the district involved does not, as a matter of established practice, prosecute the alleged violation of federal criminal law.

As under current law, the bill provides that if the Attorney General makes no determination at the end of the 90-day preliminary investigation period, the court shall appoint a special prosecutor.

4. REIMBURSEMENT TO SUBJECT OF INVESTIGATION

Current Law: There is no provision for reimbursement of persons who are investigated by a special prosecutor.

Problems with Current Law: Officials incur extensive legal fees, in some cases easily exceeding \$100,000, and receive much adverse publicity during a special prosecutor investigation.

S. 2059: Section 5 of the bill authorizes the court, in its discretion, to award all or part of the attorneys' fees incurred by the subject of a special prosecutor investigation if no indictment is brought and if the fees would not have been incurred but for the special prosecutor appointment. There is no provision for reimbursement of cost incurred during a preliminary investigation, as the Subcommittee concluded that under the amended version of the Act, even ordinary citizens would be subject to a preliminary investigation.

5. AMENDMENTS TO POWERS AND REMOVAL OF SPECIAL PROSECUTOR

A. Powers of Special Prosecutor

Problems with Current Law: There is no express provision in the law stating that the special prosecutor may dismiss matters without extensive investigation. It is possible that special prosecutors may extensively investigate allegations which would be dismissed in ordinary cases.

S. 2059: Section 6 of the bill specifies that the special prosecutor has full authority to dismiss matters within his jurisdiction without conducting an investigation or at any subsequent time prior to prosecution if to do so would be consistent with the written or other established policies of the Department of Justice with respect to the enforcement of criminal laws.

Section 6 of the bill also provides that the special prosecutor must follow the written or other established policies of the Department "except where not possible." This shifts the burden to the special prosecutor to substantiate to the court why he deviated from established policies and thus reduces the different treatment given to officials under the Act. Finally, the Act specifies

that the special prosecutor may consult with the U.S. Attorney for the district in which the violation allegedly occurred.

B. Removal of the Special Prosecutor

Current Law: Under Section 596, the Attorney General may remove the special prosecutor only on the grounds of extraordinary impropriety, or physical or mental incapacity.

Problem With Current Law: There is no standard defining what constitutes "extraordinary impropriety," and such a high standard may permit the special prosecutor to abuse his powers.

S. 2059: Section 6(d) of the bill amends the standard for removal from "extraordinary impropriety" to "good cause," a standard which is used for the removal of some independent agency officials. This allows the Attorney General to have a developed body of law on which to base removal. The current law's provisions for full reports to Congress upon removing a special prosecutor and opportunity for judicial review of such removal are maintained as checks against dangers that the Attorney General will interfere with the independence of the special prosecutor.

6. CHANGE NAME OF SPECIAL PROSECUTOR

S. 2059: The bill would change the name "special prosecutor" to "independent counsel" in order to remove the Watergate connotation from a special prosecutor investigation and to more accurately indicate that the investigation is being conducted by an impartial investigator.

7. AMEND SUNSET PROVISION

S. 2059: The special prosecutor provisions are scheduled to expire in October, 1983. S. 2059 would extend the expiration date to five years from the adoption of these amendments.

The PRESIDING OFFICER. The question is on agreeing to the committee amendments.

The committee amendments were agreed to.

Mr. RUDMAN. Mr. President, I would first like to commend Senator COHEN for his leadership in holding hearings and promulgating legislation to reform the special prosecutor section of the Ethics in Government Act of 1978. This important aspect of the Ethics in Government Act of 1978 was one of the many pieces of legislation growing out of the Watergate controversy. As we all remember, only too well, the investigation into the affairs of President Nixon fostered within the general public an element of mistrust in the ability of the executive branch to properly investigate itself. In order to prevent any reoccurrence of the events of that time, Congress developed special prosecutor legislation which was enacted as title 6 of the Ethics in Government Act of 1978.

The last 4 years have served as a testing period for the act, providing Congress with an opportunity to appraise its application. The initial investigatory provisions of the act were triggered 11 times, and special prosecutors were appointed in three of those cases. However, none of the cases resulted in prosecution, and, in fact, the act has generated substantial

criticism. Hearings held by Senator COHEN indicate that some serious flaws exist in the law. In fact, some testimony, especially that of Ambassador Elliot Richardson, suggest that the act is unnecessary. In our opinion, the act remains necessary; however, it requires substantial revision. In saying this, I must point out that the act is not intended to imply any mistrust or doubt in the veracity and impartiality of our U.S. Attorney General. Indeed, I do not doubt that they would properly investigate allegations of malfeasance by high ranking officials in the executive branch. Instead, the act is intended to prevent potential conflicts of interest that would give rise to an appearance that the Attorney General would be incapable of impartially investigating allegations. Essentially, it prevents a problem before it arises.

During hearings before the Governmental Affairs Subcommittee on Oversight of Government Management it became clear that several changes would be needed to improve the special prosecutor legislation and develop it into a more equitable and fair method of investigating high ranking officials in the executive branch. Chief among the flaws in the present law are the trigger mechanisms prompting first, a preliminary investigation, and second, the appointment of a special prosecutor. Presently, the law requires a preliminary investigation whenever the Attorney General receives specific information that a subject violated a Federal criminal law. This standard is so low that a preliminary investigation can result from allegations with little or no factual basis. The end result is often a waste of departmental resources and an unfair investigation of the subjects involved. S. 2059 would respond to this problem by providing some leeway for the Attorney General to determine when there is sufficient information to constitute grounds for an investigation.

The standard which triggers appointment of a special prosecutor is also so low that it is almost automatic. Present law requires the appointment of a special prosecutor unless the information is "so unsubstantiated that no further investigation or prosecution is warranted." The evidence indicates that the standard for appointment leaves little practical opportunity for the Attorney General to dismiss allegations. Consequently, insignificant and unnecessary investigations can occur which are not only unfair but potentially damaging to individuals. Therefore, the ethics in Government Act Amendments of 1982 would provide additional flexibility for the Attorney General, requiring appointment when the Attorney General "finds reasonable grounds to believe that further investigation or prosecution is warranted." This would provide the Attorney General with additional

discretion so that unwarranted cases would not be pursued.

An additional major flaw in present law is the designated class of executive office and Department of Justice positions subject to the provisions of the act. The act applies to some individuals who are not close to either top officials to some individuals who are not close to either top officials of the President's office or the Department of Justice, and, therefore, investigations would not present the conflict of interest or public perception problems that gave rise to the act. Senator COHEN's legislation would respond to this problem by reducing the number of individuals covered by the act. On the other hand, the bill would also respond to the glaring problems associated with the Carter administration's "Billygate" affair. The proposed legislation would add family members to the class of persons subject to the act.

Since any designated class can also be underinclusive, Senator COHEN's legislation would take a simple step to insure that a potential conflict arising outside of the designated class would be covered. S. 2059 would provide the Attorney General with discretionary authority to use the special prosecutor provisions of the act to investigate any person not covered by the act if he perceives that a potential conflict may arise. In this manner, the rigidity of the class designation is eliminated.

In my mind, these are the major elements of the Ethics in Government Act Amendments of 1982. The changes provide a necessary adjustment to the present law, reaffirming the position that the law is necessary, but insuring additional measures of fairness. By accepting office, top officials in the executive branch subject themselves to increased public scrutiny. This justifies the special prosecutor provisions of the Ethics in Government Act. We must assure the public of impartial investigation of malfeasance by eliminating the appearance of a conflict of interest. Nonetheless, these procedures must be balanced with a measure of fairness for the individuals covered by the act. S. 2059 strikes such a balance and should be enacted into law.

Mr. SASSER. Mr. President, Watergate abuses of a decade ago inspired Congress to set up a statutory procedure for the appointment of a special prosecutor, independent of the Justice Department, to investigate allegations of criminal law violations by high-ranking executive branch officials. The 1978 Ethics in Government Act set the standards for the appointment of such a prosecutor.

Such a special prosecutor guards against conflicts of interest in the executive branch and assures impartial and thorough investigations of highly placed public officials. The legislation

before us, S. 2059, extends for 5 years the special prosecutor provisions of the Ethics Act.

It also draws on the experience of the past 4 years to correct certain inequities in the law. The coverage of the act is broadened to include members of the President's family who might otherwise receive favored treatment by the Justice Department. And the "trigger" for appointment of a special prosecutor is adjusted to allow the Attorney General to consider the credibility of an accuser before an investigation is launched. This is to prevent endless investigations of meritless allegations of wrongdoing made by unreliable sources.

I believe these adjustments are sound and the overall objectives of the Ethics in Government Act are well served by these and other changes made by S. 2059. That is why I am proud to cosponsor this legislation.

My congratulations to Senator COHEN, chairman of the Subcommittee on Oversight of Government Management, and to Senator LEVIN, the ranking Democrat on the subcommittee, for the work they have done on this legislation. The hearing held by the subcommittee on this bill was a comprehensive probe of the application of this law over the past 4 years.

I urge rapid passage of this legislation.

Mr. LEVIN. Mr. President, I am proud to speak in support of the legislation which Senator COHEN has just described so eloquently. Under Senator COHEN's able leadership as chairman of the Senate Governmental Affairs Oversight Subcommittee, on which I am the ranking minority member, the subcommittee held a series of extensive hearings on the special prosecutor provisions of the Ethics in Government Act of 1978. During those hearings, we heard and learned much from an array of distinguished witnesses who were all well experienced in the actual operation of these provisions.

At the time of those hearings, I stated that the special prosecutor provisions must reflect our best effort to balance two competing interests: to insure that persons in high office are prosecuted for their crimes without political favoritism, and to insure that these same persons are not unfairly prosecuted solely because of their positions.

I believed then, as I do now, that the statute as then on the books guaranteed that high public officials would be impartially prosecuted for their crimes. The focus of my concerns then was on the second of the competing public interests; whether the statute's provisions needlessly created disparate and unfairly harsh treatment of these officials, and if so, how this disparity could be remedied without weakening the law. Our goal should be that high

public officials be treated no better and no worse than other citizens.

Senator COHEN has already well described the changes which the subcommittee has proposed be made in the existing statute. Those changes address the concerns I have about the stigma and costs attendant to special prosecutor appointment, and the extent to which a public official would be prosecuted for a crime for which other citizens would not. Changes in the quality of the information necessary to trigger an investigation and in the number of officials covered by the act also insure that the existing law's effectiveness will be improved.

The changes proposed do not weaken the act's original intent and purpose. In proposing these changes, we have not lost sight of a matter of critical importance: The need for an independent, untainted investigation and prosecution of criminal allegations against high public officials. What we have attempted to do rather is to learn from the actual experience under the existing law, from those who have been on both sides of the process as it now works, and to fashion amendments which increase the fairness and efficiency necessary to meet the second public interest requirement I mentioned earlier. This legislation achieves just that.

Again I commend Senator COHEN and my colleagues on the subcommittee for their hard work on this legislation and urge its speedy passage.

The PRESIDING OFFICER. The question is on the engrossment and the third reading of the bill.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

PROFESSIONAL TRAINING FOR CERTAIN STAFF OF THE SELECT COMMITTEE ON ETHICS

Mr. BAKER. Mr. President, Senate Resolution 425 has been cleared for action by unanimous consent on this side if it is cleared by the minority.

Mr. ROBERT C. BYRD. Mr. President, the resolution, Senate Resolution 425, has been cleared.

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate, Senate Resolution 425, calendar order No. 714.

The PRESIDING OFFICER. The resolution will be stated by title.

The assistant legislative clerk read as follows:

A resolution (S. Res. 425) to authorize the Select Committee on Ethics to provide training assistance to its professional staff.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 425) was agreed to as follows:

S. RES. 425

Resolved, That the Select Committee on Ethics (hereinafter referred to as the "Select Committee") is authorized, with the approval of the Committee on Rules and Administration, to provide assistance for members of its professional staff in obtaining specialized training, whenever the Select Committee determines that such training will aid it in the discharge of its responsibilities.

SEC. 2. (a) Assistance provided under authority of this resolution may be in the form of continuance of pay during periods of training or grants of funds to pay tuition, fees, or such other expenses of training, or both, as may be approved by the Committee on Rules and Administration.

(b) The Select Committee shall obtain from any employee receiving such assistance such agreement will respect to continued employment with the Select Committee as it may deem necessary to assure that it will receive the benefits of such employee's services upon completion of his training.

SEC. 3. The expenses of the Select Committee in providing assistance under authority of this resolution shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman of the Select Committee.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

BURNS PAIUTE INDIAN COLONY

Mr. BAKER. Mr. President, S. 1468 has been cleared on this side, if it is agreeable to the minority.

Mr. ROBERT C. BYRD. Mr. President, there is no objection.

Mr. BAKER. Mr. President, then I ask that the Chair lay before the Senate calendar order No. 726, S. 1468.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 1468) to provide for the designation of the Burns Paiute Indian Tribe as the beneficiary of a public domain allotment, and to provide that all future similarly situated lands in Harney County, Oregon, will be held in trust by the United States for the benefit of the Burns Paiute Indian Colony.

There being no objection, the Senate proceeded to consider the bill which had been reported from the Select

Committee on Indian Affairs with an amendment, as follows:

On page 2, after line 17, insert the following:

Sec. 3. Section 2 of the Act of November 24, 1942 (56 Stat. 1022, 25 U.S.C. 373b), is amended by deleting "2,000" and inserting in lieu thereof "50,000".

So as to make the bill read:

S. 1468

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, pursuant to section 2 of the Act of November 24, 1942 (56 Stat. 1022, 25 U.S.C. 373b), the estate of Jesse Joseph James, Burns 144-N1116, consisting of a public domain allotment, Burns Paiute domain allotment numbered 144-111, northwest quarter, section 32, township 23 south, range 32½ east, Willamette meridian, Harney County, Oregon, is hereby declared to be held in trust by the United States for the Burns Paiute Indian Colony of Oregon and part of the Burns Paiute Indian Reservation.

Sec. 2. Section 2 of the Act of November 24, 1942 (56 Stat. 1022, 25 U.S.C. 373b), is amended by inserting the following immediately before the period at the end thereof: "Provided further, That interests in all Burns public domain allotments located in Harney County, Oregon, belonging to Indians who die intestate without heirs shall be held in trust by the United States for the Burns Paiute Indian Colony of Oregon and shall be part of the Burns Paiute Indian Reservation".

Sec. 3. Section 2 of the Act of November 24, 1942 (56 Stat. 1022, 25 U.S.C. 373b), is amended by deleting "2,000" and inserting in lieu thereof "50,000".

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

The committee amendment was agreed to.

Mr. HATFIELD. Mr. President, I am pleased that the Senate is turning its attention for a moment to the consideration of S. 1468, a bill which will designate a parcel of land in Harney County, Oreg., to be held in trust for the Burns Paiute Tribe pursuant to the requirements of Federal law 25 U.S.C. 373b. This statute provides that parcels of land, where the value of the land exceeds \$2,000 and the allottee dies without legal heirs, shall be held in trust by the United States for such Indians as Congress may designate. S. 1468 fulfills this affirmative duty to designate a deserving tribe the rightful possessor of the public allotment in question.

I introduced this bill in July of 1981 to address a matter that arose in 1978 in Harney County, Oreg., where a Burns Paiute Indian named Jesse T. James died intestate and without legal heirs. Included in his estate was a parcel of land stretching over 160 acres of trust land, land which is classified as a "public domain allotment." Federal law 25 U.S.C. 373b requires that such allotments "be held in trust for such needy Indians as the Secretary may designate, where the value of the estate does not exceed \$2,000, and

in the case of estates exceeding such sum, such estates shall be held in trust by the United States for such Indians as the Congress may designate."

Since the value of the allotment exceeds \$9,000, Congress must designate which Indians are to receive possessory rights to this property. During hearings on this matter before the Board of Hearings and Appeals in the Bureau of Indian Affairs, the Board stated:

Based on the record before the Board . . . were it within (our) authority to decree, (we) would allow the (Jesse T. James) allotment to go to the Burns Paiute Tribe.

Indeed, the record has ample evidence that the Burns Paiute Indians are deserving of this land allotment. They have occupied the southeast corner of the State of Oregon for the last several hundred years and the present Burns Paiute reservation comprises 770 acres. The Burns Paiute Tribe currently farms 110 acres of land on which they cultivate alfalfa, and proceeds from the sale of this crop compose a major source of tribe revenue. As is true with an overwhelming number of Indian tribes across this country, the poor economic conditions have occasioned high unemployment rates and, with respect to the Burns Paiute Indians, impoverished conditions. The Jesse T. James public allotment would expand the Burns Paiute Tribe's economic base, and in so doing, would double the Burns Paiute Indians' potential for farming since over 80 percent of the allotment is viable agricultural land. In light of the equities involved in this case, S. 1468 is a legitimate congressional response to a situation that requires, by statute, congressional action.

I would like to point out to my colleagues one other change this proposed legislation will make on the procedures to be followed in cases similar to the instant case. As I mentioned earlier, current Federal law requires Congress to act when the value of the property in dispute is greater than \$2,000. Section 2 of S. 1468 amends section 2 of 25 U.S.C. 373b by changing the threshold amount that triggers congressional action from the current \$2,000 to a more reasonable amount of \$50,000. The original amount, established in 1942, is far too low and it imposes an obligation on Congress which is both burdensome and unnecessary. Instituting a higher threshold amount will serve the intent of the original act and will conform to the interests of both the Congress and the executive branch. The Secretary of the Department of the Interior is capable of making the determination of need when the value of a public allotment to be probated is less than \$50,000.

Mr. President, I am grateful for the opportunity to speak on behalf of this needed piece of legislation. I urge the

Senate to adopt S. 1468 as reported by the Senate Select Committee on Indian Affairs.

The PRESIDING OFFICER. The question is on the engrossment and the third reading of the bill.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AWARDING OF SPECIAL CONGRESSIONAL GOLD MEDALS

Mr. BAKER. Mr. President, I am prepared to proceed to the consideration of H.R. 4647, if the minority leader is.

Mr. ROBERT C. BYRD. Mr. President, there is no objection.

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate Calendar Order No. 734, H.R. 4647.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 4647) to award special congressional gold medals to Fred Waring, the widow of Joe Louis, and Louis L'Amour.

There being no objection, the Senate proceeded to consider the bill.

Mr. RIEGLE. Mr. President, on April 8, 1981, we witnessed the passing of a truly great American, Joe Louis. I believe that President Reagan's subsequent decision to grant special permission for Joe Louis to be buried in Arlington National Cemetery is a fitting tribute to a great champion and an outstanding athlete.

Joe Louis' professional boxing record is certainly impressive. He first took the world heavyweight title in 1937, only 3 years after winning the AAU title. He held the crown until 1949, defending his title 25 times. Of the 71 professional fights that Joe fought he lost only 3, scoring 54 knockouts. It is no wonder that he is recognized as one of the great boxing champions of all time.

Perhaps one of Louis' most spectacular victories was against Max Schmeling in 1938. This fight became more than just a simple heavyweight contest, and Joe Louis raised the pride of all Americans, becoming a symbol of hope in those severely troubled times.

Joe Louis' life was a string of victories. He broke the barrier of racial segregation in professional sports 10 years before Jackie Robinson became the first black man to play major league baseball. Joe also served his country with distinction in World War II—enlisting at the prime of his

boxing career and taking part in numerous exhibition fights which boosted Army morale and enhanced our national spirit.

Mr. President, on April 30, I introduced legislation authorizing the President of the United States to present a commemorative medal to the widow of Joe Louis. I am gratified that the Congress has finally acted on this matter, and know that my colleagues join me in this fitting tribute to a great American hero.

LOUIS L'AMOUR

Mr. ARMSTRONG. Mr. President, I am delighted that today we are recognizing the literary talents and contributions of Louis L'Amour, a man who has done much to celebrate the spirit of the American west.

Mr. L'Amour's thrilling but historically accurate western novels portray the courage, ruggedness, and character of the early west and the pioneers who settled it.

L'Amour, born in Jamestown, N. Dak., is a self-educated man, but his literary accomplishments are outstanding. He has authored more than 70 western novels which have been printed in several foreign languages and have sold over 82 million copies. Many of these novels have been adapted into motion pictures.

Although Mr. L'Amour's primary literary achievements are western novels, he has also written about the ancient civilization of the Fertile Crescent in the Middle East, the trade routes that sent European civilization across the globe, screen plays, television scripts, and a collection of poetry. He was chosen by the United Nations' Education, Science and Cultural Organization to write an indepth report on the Ute Indian Tribe of southwestern Colorado.

It is fitting in an age when courage, self-reliance, and boldness are needed so desperately throughout the land, that we take time to honor and appreciate the labor of this versatile American writer, whose works inspire us to work diligently to preserve the land and culture that means so much to us today.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the bill.

The bill, H.R. 4647, was ordered to a third reading, was read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

NATIONAL RECOVERY ROOM NURSES DAY

Mr. BAKER. Mr. President, I am prepared to go to Senate Joint Resolution 188, if there is no objection.

Mr. ROBERT C. BYRD. Mr. President, there is no objection.

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate Calendar Order No. 736, Senate Joint Resolution 188.

The PRESIDING OFFICER. The joint resolution will be stated by title.

The assistant legislative clerk read as follows:

A joint resolution (S.J. Res. 188) to authorize and request the President to designate March 1, 1983, as "National Recovery Room Nurses Day".

The joint resolution (S.J. Res. 188) was considered, ordered to be engrossed for a third reading, was read the third time, and passed.

The preamble was agreed to.

The joint resolution, and its preamble, are as follows:

S.J. Res. 188

Whereas the immediate postanesthetic period is the most critical in a patient's recovery;

Whereas the primary focus of the American Society of Post Anesthesia Nurses is the education of its membership, with a goal of excellence in the care of patients who have undergone surgery and the administration of anesthetic agents;

Whereas the postanesthesia recovery nurse is skilled in basic and sophisticated life support and monitoring techniques;

Whereas the availability of professional, skilled nursing personnel has been demonstrated to reduce the incidence of postoperative complications and mortality;

Whereas the postanesthesia recovery nurse provides safety and comfort to the patient who is unable to meet his or her own physical needs; and

Whereas the postanesthesia recovery nurse, in a single day, must care for patients who range in age from a few hours to one hundred years or more, and must treat each with calm, personalized, professional care: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President is authorized and requested to issue a proclamation designating March 1, 1983, as "National Recovery Room Nurses Day" and calling upon the people of the United States to observe the day with appropriate programs, ceremonies, and activities.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

NATIONAL BUREAU OF STANDARDS AUTHORIZATION ACT FOR FISCAL YEAR 1983

Mr. BAKER. Mr. President, I have another matter, a House message on S. 2271. If the minority leader has no ob-

jection, I intend to proceed with consideration of that.

Mr. ROBERT C. BYRD. Mr. President, there is no objection.

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 2271.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the bill from the Senate (S. 2271) entitled "An Act to authorize appropriations to the Secretary of Commerce for the programs of the National Bureau of Standards for fiscal year 1983, and for other purposes", do pass with the following amendment:

Strike out all after the enacting clause, and insert:

That this Act may be cited as the "National Bureau of Standards Authorization Act for Fiscal Year 1983".

AUTHORIZATION FOR PROGRAM ACTIVITIES

SEC. 2. (a) There are hereby authorized to be appropriated to the Secretary of Commerce, hereinafter referred to as the Secretary, to carry out activities performed by the National Bureau of Standards, the sums set forth in the following line items:

(1) Measurement Research and Standards, for fiscal year 1983, \$50,389,000.

(2) Engineering Measurements and Standards, for fiscal year 1983, \$20,807,000.

(3) Computer Science and Technology, for fiscal year 1983, \$10,000,000.

(4) Core Research Program for Innovation and Productivity, for fiscal year 1983, \$11,188,000.

(5) Technical Competence Fund, for fiscal year 1983, \$6,986,000.

(6) Fire Research Center, for fiscal year 1983, \$4,991,000.

(7) Central Technical Support, for fiscal year 1983, \$13,500,000.

(b) Notwithstanding any other provision of this or any other Act, for fiscal year 1983:

(1) of the total amount authorized under subsection (a)(1) not less than \$1,000,000 shall be available for the "Office of Weights and Measures";

(2) of the total amounts authorized under subsections (a)(1) and (a)(2), not less than \$1,000,000 shall be available for "Measurement Standards for the Handicapped";

(3) of the total amount authorized under subsection (a)(3), not less than \$10,000,000 shall be available for "Computer Science and Technology"; and

(4) of the total amount authorized under subsection (a)(4), \$3,200,000 for "Discrete Process Technology (Robotics)".

EXCESS FOREIGN CURRENCY

SEC. 3. In addition to the sums authorized in section 2, not more than \$500,000 is authorized for fiscal year 1983 for expenses of the National Bureau of Standards incurred outside the United States, to be paid for in foreign currencies that the Secretary of the Treasury determines to be excess to the normal requirements of the United States.

NATIONAL TECHNICAL INFORMATION SERVICE

SEC. 4. In addition to the sums authorized in section 2, the sum of \$1,980,000 is authorized to be appropriated to the Assistant Secretary to carry out activities performed by the National Technical Information Service.

OFFICE OF PRODUCTIVITY, TECHNOLOGY AND INNOVATION

SEC. 5. In addition to the sums authorized in section 2, the sum of \$1,898,000 is authorized to be appropriated to the Assistant Secretary for fiscal year 1983 for the purpose of research, development, and related activities in the field of innovation and productivity.

SALARY ADJUSTMENTS

SEC. 6. In addition to the sums authorized to be appropriated by this Act, such additional sums as may be necessary to make any adjustments in salary, pay, retirement, and other employee benefits which may be provided for by law are authorized to be appropriated for fiscal year 1983 and, if the full amount necessary to make such adjustments is not appropriated, the adjustments shall be made proportionately from sections 4 and 5 and in the line items in section 2(a) in a manner reflecting the extent to which the amount of each such line item in section 2(a) is attributable to employee benefits of the type involved.

AVAILABILITY OF APPROPRIATIONS

SEC. 7. Appropriations made under the authority provided in this Act shall remain available for obligation, for expenditure, or for obligation and expenditure for periods specified in the Acts making such appropriations.

ACTIVITIES PERFORMED FOR OTHER AGENCIES

SEC. 8. The Secretary of Commerce shall charge for any service performed by the Bureau, at the request of another Government agency, in compliance with any statute, enacted before, on, or after the date of enactment of this Act, which names the Secretary or the Bureau as a consultant to another Government agency, or calls upon the Secretary or the Bureau to support or perform any activity for or on behalf of another Government agency, or to cooperate with any Government agency in the performance by that agency of any activity, regardless of whether the statute specifically requires reimbursement to the Secretary or the Bureau by such other Government agency for such service, unless funds are specifically appropriated to the Secretary or the Bureau to perform such service. The Secretary may, however, waive any charge where the service rendered by the Bureau is such that the Bureau will incur only nominal costs in performing it. Costs shall be determined in accordance with section 12(e) of the Act of March 3, 1901, as amended (15 U.S.C. 278b(e)).

Mr. BAKER. Mr. President, I move that the Senate concur in the House amendment with two further Senate amendments which I send to the desk on behalf of the Senator from New Mexico (Mr. SCHMITT) and the Senator from Nevada (Mr. CANNON), and ask that they be considered en bloc.

The PRESIDING OFFICER. The clerk will report the amendments.

UP AMENDMENT NO. 1225

(Purpose: To amend the House amendment redefining Robotics research program, and to amend the House amendment to S. 2271 by eliminating a floor on the Office of Weights and Measures and providing a floor for Metals Processing)

The assistant legislative clerk read as follows:

The Senator from Tennessee (Mr. BAKER), on behalf of Mr. SCHMITT and Mr. CANNON, proposes an unprinted amendment numbered 1225:

On page , line , insert the following: In section 2(b)(4) strike "Discrete Process Technology (Robotics)" and substitute "Robotics Research and Development".

On page , line , insert the following: In section 2(b)(1) strike "(a)(1) not less than \$1,000,000 shall be available for the 'Office of Weights and Measures';" and substitute "(a)(4) not less than \$3,000,000 shall be available for 'Metals Processing'".

Mr. SCHMITT. Mr. President, S. 2271, "The National Bureau of Standards Authorization Act for Fiscal Year 1983," was originally passed by the Senate on April 29, 1982. On May 19, 1982, the House of Representatives amended and passed S. 2271, authorizing funds for the National Bureau of Standards (NBS) and for the Office of Productivity, Technology, and Innovation. The House also set floors for four activities.

S. 2271, as amended and passed by the House of Representatives, is acceptable to the Committee on Commerce, Science, and Transportation with minor modifications to the House amendments. The modifications we recommend do not increase the total authorization.

In section 2b(1), strike "(a)(1) not less than \$1,000,000 shall be available for the 'Office of Weights and Measures'" and substitute "(a)(4) not less than \$3,000,000 shall be available for 'Metals Processing.'" The committee has been assured that the NBS will make available the \$1,200,000 for the "Office of Weights and Measures" and that no floor is necessary. The President proposed eliminating Federal support for "Metals Processing," a joint Federal Government-industry program initiated in fiscal year 1982. This program is important for developing new alloys and products, for conservation of critical materials, and for controlling metals-alloying processes. It conducts research and develops measurement standards for rapid solidification techniques and for alloy coatings and to generate new phase diagrams. The committee believes this is an important effort which requires continued Federal support in fiscal year 1983 and recommends adoption of this amendment which directs NBS to make available \$3,000,000 for continuing funding at the level provided in fiscal year 1982.

The committee recommends modifying section 2(b)(4) from "Discrete Process Technology (Robotics)" to "Robotics Research and Development." The committee believes a formal robotics R. & D. program to improve robotics performance measures, programing languages and standards, visual and tactile sensors, and hierarchical control strategies is needed along with a floor for these activities. The committee recommends changing the title to insure that NBS activities are focused on robotics research and

development and that \$3,200,000 are made available.

S. 2271, as amended by the House of Representatives, includes a funding floor of \$10,000,000 for the Institute for Computer Sciences and Technology (ICST). These funds are intended in part to meet previously mandated efforts, especially the Brooks Act (Public Law 89-306), for the economic and efficient purchase and use of ADP equipment by Federal agencies. The committee believes that ICST must also devote substantial effort and resources to assist in the development of international standards for ADP, to expand its research program for standards development, and to conduct policy-oriented research and analyses related to the efficient use of computers and data processing by the Federal and non-Federal sectors. These efforts are necessary for promoting the orderly growth and international competitiveness of U.S. computer and data processing industries and for determining the appropriate roles of the Federal Government in the computer and data processing fields and especially in the merging fields of computers and data processing, information processing, and communications.

Mr. President, this concludes my comments in support of the adoption of S. 2271, as amended by the House of Representatives, and with the two amendments proposed by the Committee on Commerce, Science, and Transportation. Senate passage of S. 2271 with these amendments is acceptable to the House Committee on Science and Technology and will likely be passed by the House of Representatives, thereby avoiding the need for conference.

Mr. CANNON. Mr. President, I am pleased to join with the distinguished chairman of the Commerce Subcommittee on Science, Technology, and Space, Senator JACK SCHMITT, to co-sponsor an amendment to enhance the metals processing research of the National Bureau of Standards.

I stress the value and importance of the provisions in this bill for support of the National Bureau of Standards program for research on metals processing. The industrial base of our country, so essential to our defense and civil needs, is in continuous jeopardy because of its dependence on foreign sources for a number of critical materials. Our national program to stockpile a safe reserve of such materials has been neglected by the administration. This makes it particularly important—indeed vital—that we pursue alternate metal processing which may be made possible by research in metallurgy. In this way, we may be able to develop required performance characteristics without use of certain critical alloys or with sharply reduced levels of such alloys.

This amendment will allocate \$3 million of the Bureau's budget in fiscal year 1983 for metals processing research involving such areas as rapid solidification techniques, new alloy coatings, and generation of new phase diagrams. It is a program which the 96th Congress initiated and is at least as vital to our national interest now as it was when first authorized. Major elements of our country's industrial activities involved in military and civil production depend upon advanced metal processing technology for competitive survival. This, in turn, affects the well-being of our metal mining industry, which has suffered severely in recent years.

I commend my colleague, JACK SCHMITT, and am pleased to join with him in restoring this important program to the National Bureau of Standards.

The motion to concur in the House amendment with the Senate amendments (UP No. 1225) was agreed to.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDER OF BUSINESS

Mr. BAKER. Mr. President, I thank the minority leader for permitting us to transact this routine business at this time, and I thank the Senator from Florida, who has a special order, for deferring his remarks so we might conclude these activities.

RECOGNITION OF SENATOR CHILES

The PRESIDING OFFICER. Under the previous order, the Senator from Florida (Mr. CHILES) is recognized for not to exceed 15 minutes.

THE CRIME CONTROL ACT OF 1982: TITLE IV—HABEAS CORPUS REFORM

Mr. CHILES. Mr. President, for over 2½ months now, Senator NUNN and I have come to the floor of the Senate to urge our colleagues to move promptly to pass a package of anti-crime bills. We both were delighted, of course, that the Senate has come up with a time agreement for the consideration of one such package of anti-crime proposals, S. 2572. Both Senator NUNN and I are original cosponsors of that bill, and the fact that over 50 Senators have signed on as sponsors of S. 2572 indicates that crime fighting legislation has strong support here in the Senate. Senator NUNN and I also introduced our own package of crime fighting proposals, S. 2543, and we were able to have that bill placed di-

rectly onto the Senate Calendar. It too received support from some 18 other Senators. My hope is that the Senate can move on one of these proposals as soon as possible, so that we can try to put anticrime laws on the books this year.

One essential element of any reform in our criminal justice system has to be the overhaul of today's habeas corpus laws. Senator NUNN and I have focused on the need for reform in this area for over the last month, and we have taken turns speaking out every day on the shortcomings in the present law and on the broad base of support for habeas reform. Some of the strongest words of support come from those persons most directly involved in the criminal justice system. The National Conference of Chief Justices has endorsed the need for habeas reform, and has specifically endorsed the reform proposals contained in title 4 of S. 2543, the anticrime bill that Senator NUNN and I introduced.

Earlier this week, in a speech to the American Bar Association, Supreme Court Justice Lewis Powell outlined his concerns with the present habeas laws, and called for reforms to eliminate frivolous habeas appeals. I would like to share some of his remarks with my colleagues. Mr. Justice Powell was discussing the causes of the overload in the Supreme Court's docket. He said, and I quote:

Another cause of overload of the Federal system is the law conferring Federal habeas corpus jurisdiction to review State court criminal convictions. There is no statute of limitations, and no finality of Federal review of State convictions. Thus, repetitive recourse is commonplace. I know of no other system of justice structured in a way that assures no end to the litigation of a criminal conviction. Our practice in this respect is viewed with disbelief by lawyers and judges in other countries. Nor does the Constitution require this sort of redundancy.

In a note to his remarks, Justice Powell cited a specific example that occurred during the 1981 term of the Supreme Court, in which petitions were filed in more than 30 cases by a single prisoner. Each petition became a case on the Supreme Court's docket, duplicate copies were sent to each Justice, and each Justice had to make a personal decision as to the merits of each one of the petitions.

Justice Powell went on to point out that, while many of the habeas cases are not unduly burdensome, each case starts up a process, requires staff work, and ultimately requires a judicial decision. He also noted that the present system of dual review demeans our State courts, and the endless review process tends to frustrate rehabilitation within the penal system.

Justice Powell put his finger on what may be the root cause for today's system. He said and I quote:

We have tolerated a system under S. 2254 so easily abused because of the rare case in

which an unconstitutional and unjust conviction is not identified until years later. One would think that we are wise enough to provide for the exceptional case, without continuing a system that otherwise seems indefensible.

I agree with that observation, and I too believe that we are capable of providing for the exceptional case where a miscarriage of justice has occurred.

I also agree with Justice Powell's assertion that he does not favor the total repeal of our Federal habeas corpus statutes. That is not what our habeas reform proposals would do. Instead, the proposals in S. 2543 and the administration's proposals both attempt to carry out what Justice Powell thinks we must do, and that is to consider means of limiting collateral review by Federal courts of State convictions to cases of manifest injustice—where the issue is guilt or innocence. That was the original purpose of the writ of habeas corpus, and I believe that we in Congress need to act to bring the habeas statute back in line with that original purpose.

Mr. President, another distinguished jurist has added his voice to those in the academic community, the justice system, the Congress and the public who are calling for reform of our habeas laws. We in Congress have an opportunity to make those reforms, but unless we act promptly, our opportunity will slip away. Time is running out in this Congress, with as few as 26 days remaining in this session. We can take action to make the changes which Justice Powell and so many others have recommended, but only if we act now.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of routine morning business to extend not beyond the hour of 10:45 a.m., with statements therein limited to 3 minutes each.

Mr. GORTON addressed the Chair. The PRESIDING OFFICER. The Senator from Washington.

THE IUS VERSUS CENTAUR DECISION

Mr. GORTON. Mr. President, the Sunday News Journal of Wilmington Del., recently carried an article respecting Congress decision to proceed with the sole-source development and procurement of a high-energy upper stage rocket to be used by NASA and the Defense Department in connection with the Space Shuttle. Although Senator HEFLIN and I succeeded in amending the urgent supplemental appropriations bill (H.R. 6685) to require the competitive procurement of any high-energy upper stage space booster that may be needed in the 1990's, that

language was deleted during conference. As a result, as this article points out, the American people are purchasing at a substantially greater cost the Centaur upper-stage booster made by General Dynamics Corp. even though the need for this upper-stage and the safety of it is seriously questioned by both NASA and DOD. I ask unanimous consent that a copy of the article be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

(From the Sunday News Journal
(Wilmington, Del.), Aug. 1, 1982)

**COSTLY ROCKET RATTLES CRITICS—CENTAUR
CITED AS DUPLICATION**
(By Joe Trento)

WASHINGTON.—Obscure legislation will bring the General Dynamics Corp. a long-sought windfall and cost taxpayers \$2 billion to build a space booster that NASA and Department of Defense officials say is a wasteful duplication.

The \$2 billion Centaur would replace the already completed \$715 million Boeing Co.'s Inertial Upper Stage.

The purpose of the upper-stage rockets is to boost spacecraft to the planets and to high earth orbit that America's space shuttle fleet cannot reach.

The Boeing IUS was chosen by NASA and the Defense Department several years ago because experts said it was safer and more reliable than the Centaur. Spokesmen for both companies defended their upper-stage systems as being superior.

The legislation sponsored by former astronaut Sen. Harrison "Jack" Schmitt, R-N.M., was attached to an emergency federal budget bill signed into law by President Reagan earlier this month. It provides NASA funds for development of the Centaur, a liquid-fueled, upper-stage spacecraft booster, and stipulates that it replace the Boeing IUS on two key NASA planetary flights in 1986.

Critics of the measure say it:

Will mean wasting the almost \$715 million investment in the IUS.

May delay two important space missions.

Bypassed competitive bidding procedures. Simply is not safe enough.

Schmitt dismisses the critics, saying while the Centaur isn't perfect, it's needed.

The decade-long fight between General Dynamics and Boeing to build the upper stage has been fierce. NASA has switched back and forth between both contractors and finally settled on Boeing, for what the NASA program manager described as "safety reasons."

The contract Boeing won in 1976 was to be for an "interim" upper stage that would fulfill NASA and Air Force needs until the early 1990s.

NASA and the Air Force planned to have aerospace contractors bid again on a more powerful and possibly manned upper stage, called the high-energy upper stage, in the late 1980s.

Schmitt said the IUS was too limited to serve this purpose.

Schmitt, fearful that support for such a program would fade, said he forced NASA into the Centaur program to make certain that some move was made toward a high-energy upper-stage booster.

He added that neither the Reagan Administration nor the Defense Department

seemed interested in pushing the high-energy program. "It is a foot in the door," the former Apollo 17 astronaut said.

"This administration has no space policy. This was a way of getting a high-energy upper-stage in the budget... It is not a perfect solution," he added.

Other senators say they have received complaints that plans to open the bidding on the high-energy upper-stage, to be used in the 1990s, were sidetracked by Schmitt's legislation. These senators say that Schmitt in effect gave General Dynamics not just the contract for the interim upper stage, but for the final upper stage as well.

"Hell, after we put all this money into this, no one will vote for another upper stage," one California senator said.

Schmitt "snowed these guys on this. They just won't take him on cause he walked on the moon," an aide to Sen. John H. Glenn Jr., D-Ohio, said.

The day before the Schmitt legislation was passed, a letter to House Speaker Thomas P. "Tip" O'Neill Jr., from Vernon Orr, secretary of the Air Force, and NASA Administrator James M. Beggs, called the Schmitt legislation "restrictive and wasteful."

President Reagan, in his July veto of the 1983 supplemental budget appropriation, told the Congress that Schmitt's legislation forcing NASA to buy the Centaur was a wasteful duplication. "Language mandating minimum spending levels for certain NASA programs will severely disrupt two important scientific missions and lead to the waste of more than \$150 million..." the president told the Congress.

When the White House was asked last week why the president eventually signed legislation containing the Schmitt measure, a reporter was referred to the Office of Management and Budget.

A staffer there who's an expert on the NASA budget commented, "Because the bill gave money to government agencies that would have run out of funds, the President just held his nose and signed the thing." The staffer asked not to be identified.

Rep. Harold C. "Cap" Hollenbeck, R-N.J., the ranking Republican on the House Subcommittee on Space Science and Applications, said: "This action by Congress clearly bypassed competitive bidding, committee oversight. It exploited a weakness in the legislative system and it is going to cost NASA, the Defense Department and the American taxpayer plenty."

NASA and Air Force engineers originally selected Boeing because the company offered more reliable and safer solid-fuel design, officials said. General Dynamics wanted to revamp a proven and more powerful early version of the Centaur. That Centaur upper stage was originally designed to fly atop the old Atlas and Titan ICBMs for deep space probes launched during the 1960s.

But NASA had never launched an upper stage from a manned spacecraft, and wanted to be sure the system was safe and reliable. The stage had to have back-up and safety devices and at least 98 percent reliability. Boeing achieved this with solid-fuel rockets. But not before huge cost overruns and delays preceded the delivery of the first IUS in June.

Two years ago NASA was so discouraged with Boeing that it issued a contract to General Dynamics to start again on Centaur. The contract was canceled because of budget restrictions and after Boeing overcame its technical problems.

The first Boeing upper stage has exceeded all NASA and Defense Department design specifications, officials said.

The first operational IUS is to be launched aboard an Air Force Titan ICBM this fall. The first shuttle launch of the IUS is set to boost a NASA communications satellite aboard space shuttle Challenger in January.

Schmitt's legislation requires that NASA drop out of the IUS program, set to boost two planetary spacecraft in 1985, and replace them with Centaur. The now non-existent Centaur would be used to launch the \$600 million Galileo spacecraft on a mission to Jupiter and to launch the Solar-Polar mission from the cargo bay of a space shuttle. The Solar-Polar mission is a joint National Aeronautics and Space Administration/European Space Agency project to send a spacecraft to study the sun.

Frustrated members of the House Science Committee's subcommittee on Space Science and Applications, charged with overseeing NASA, are angry about the change and fear it may endanger key NASA missions.

Hollenbeck, like Schmitt a Republican, said: "NASA spends more than half a billion dollars to develop Galileo and designs it to fly on the IUS. By the time the mission was set to go in 1985, the IUS would have been tested a dozen times by the Air Force and NASA in space. Now by legislative fiat, NASA is forced to count on a booster that doesn't exist, when we have already paid \$715 million for one that works and is in hand."

"This is like building a successful moon rocket and then having some senator come in with a law and say, 'Well, I don't like the way it looks, or the name of the company that built it, so let's delay the whole program, spend another billion dollars or more and do it again,'" Hollenbeck said.

Schmitt concedes, "There is a chance the Centaur might not work, but I think it can be done and we have to try. I think there is room for both IUS and Centaur in the program."

Some members of Congress have been personally critical of Schmitt, who has picked up the nickname of "Moonrock" in the senate, for his legislation. One Republican congressman, who asked not to be named, attributed Schmitt's legislation to "his myopic view of his own expertise."

Schmitt's staff members, who are not permitted to speak for the record, hinted that their boss supported Centaur for national security reasons. "You know he is on the intelligence committee and is privy to secrets," one Schmitt aide said.

But sources on the intelligence committee, and at the CIA, say there is no mission planned requiring Centaur. These sources explained that intelligence satellites fly in low earth orbit and that the shuttle needs no assistance in placing them in space.

Schmitt concedes "that there is no military mission as yet... but I believe that such lifting capacity will be needed for anti-killer satellite defense. I think the problem is the military hasn't really thought about the uses of space."

The Air Force says it plans to spend \$8 billion in military uses of space this year.

According to Hollenbeck, no matter what the Congress does now, the General Dynamics Corp. will almost certainly receive \$150 million over the next two years for its liquid-fueled Centaur upper-stage system.

But the real costs of Schmitt's legislation could total \$2.1 billion. That figure includes changes NASA and the Defense Depart-

ment will have to make to alter its existing hardware to fit the Centaur.

NASA and the Air Force must reconfigure hardware to fit the 12-foot-diameter Centaur instead of the 9½-foot diameter IUS.

In addition, it will cost NASA about as much in penalties for breaking its contract with Boeing and shutting down production of the two planetary probes as it would have cost to purchase the two Boeing upper stages.

NASA spokesman William O'Donnell said that if "unforeseen problems develop with Centaur, such as incompatibility with the shuttle, we will have no back-up to launch those two planetary missions."

The Defense Department estimated that it would spend between \$200 million to \$500 million to modify payloads to fit the Centaur. Total Defense Department costs came to an additional \$1.1 billion to \$1.46 billion. NASA estimated that to switch to Centaur would cost the civilian space agency another \$626 million.

In the NASA figure is \$110 million to modify shuttles Columbia and Challenger to carry the pressurized and liquid-fueled Centaur.

It's these modifications that bother NASA engineers most. Although Centaur would have greater power in its liquid-fuel configuration than the existing IUS system built by Boeing, IUS is approved for manned flights. The 19-foot-long booster stage could fit in the shuttle cargo bay, be safely handled by the astronauts, released by spring latches and fired when the shuttle was safely away from its cargo.

The Centaur does not operate in the same manner. The Centaur must launch into precise mathematical windows in space. In addition, the liquid fuels aboard evaporate, which means that the stage must be launched within seven days, or run short of fuel.

If there is a malfunction that prevents launch, the solid-fuel IUS needs no special preparations to bring it back safely. The Centaur must be carried back, fully pressurized in the cargo bay, with gases from the boiling fuel being vented into the cargo bay during the critical re-entry process.

With the volatile liquid fuel aboard, the risk of an explosion is greater.

According to NASA upper-stage manager B. C. Lam, "this was the key problem with Centaur all the way."

The existing IUS also a compatible with both the Air Force's Titan and the shuttle. But while the early versions of the Centaur were compatible with throwaway rockets like the Titan, the version designed for the shuttle isn't.

The Air Force also objected to the fact that the Centaur was so much larger than IUS that it used up too much space in the 60-foot-long shuttle cargo bay, forcing extensive redesigning of Defense Department payloads.

To successfully compete with a commercial European consortium called Ariane Space, the space shuttle has to have an upper stage to launch communications satellites into what is called a geosynchronous orbit. This 22,500-mile-high orbit allows satellites to stay in the same place relative to earth to allow for uninterrupted communications. The space shuttle itself is capable of orbiting large payloads no higher than 700 miles without the upper stage.

The ability of the space shuttle to get commercial, military and scientific spacecraft into geosynchronous earth orbit will determine if the Space Transportation System is commercially viable.

Mr. GORTON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

BUDGET ACT WAIVER

Mr. BAKER. Mr. President, before the Chair makes a further announcement on the immigration bill, I have been advised that all parties have cleared for consideration the budget waiver which must accompany this bill. That is calendar order 739.

Mr. President, I ask unanimous consent, and I am advised the minority leader is agreeable to this, that the Chair now lay before the Senate Calendar order No. 739, Senate Resolution 435, the budget waiver to accompany S. 2222.

The PRESIDING OFFICER. The resolution will be stated by title.

The legislative clerk read as follows:

A resolution (S. Res. 435) waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 2222.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 435) was agreed to, as follows:

S. RES. 435

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to the consideration of S. 2222. Such waiver is necessary because S. 2222 authorizes the enactment of new budget authority which would first become available in fiscal year 1983, and such bill was not reported on or before May 15, 1982, as required by section 402(a) of the Congressional Budget Act of 1974 for such authorization.

The waiver of section 402(a) is necessary to permit enactment of important reforms of the immigration laws and policies of the United States. S. 2222 is the result of two years of deliberations by the bipartisan Select Commission on Immigration and Refugee Policy, as well as a year's series of hearings in the Congress, including joint hearings conducted by the appropriate subcommittees in the Senate and the House of Representatives.

S. 2222 provides an authorization for fiscal year 1983 of \$60 million to implement measures which will improve control of both illegal and legal immigration to the United States.

At the time of the 1983 budget hearings, the Attorney General testified before both the Committees on the Judiciary and the Appropriations Committees of the Senate

and House of Representatives that the administration would support appropriations needed to carry out immigration reforms in 1983. Furthermore, because the 1983 appropriations process is not yet complete, congressional consideration of this authorization will in no way interfere with or delay the appropriations process.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. SIMPSON. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

IMMIGRATION REFORM AND CONTROL ACT OF 1982

The PRESIDING OFFICER. Under the previous order, the Senate will resume consideration of S. 2222, which the clerk will state by title.

The legislative clerk read as follows:

A bill (S. 2222) to revise and reform the Immigration and Nationality Act, and for other purposes.

The Senate resumed the consideration of the bill.

The PRESIDING OFFICER. The Senator from Wyoming.

Mr. SIMPSON. Mr. President, I ask unanimous consent that the privileges of the floor be granted to the following members of the Subcommittee on Immigration and Refugee Policy staff:

Richard W. Day, Charles Wood, Donna Alvarado, Arnold Leibowitz, Valentine Jones, Frankey DeGooyer, Avelina Sabangan, Ellen Hughes, Ally Milder, Ed Baxter, Eric Hultman, and Jerry Tinker during the pendency of S. 2222, the Immigration Reform and Control Act of 1982, today, August 12, 1982, and each day the measure is pending and for rollcall vote thereon.

The PRESIDING OFFICER (Mr. ANDREWS). Without objection, it is so ordered.

COMMITTEE AMENDMENT AGREED TO

Mr. SIMPSON. Mr. President, I move that the committee substitute be agreed to, and that the bill, as so amended, be treated as original text for the purpose of amendment.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

The committee amendment in the nature of a substitute was agreed to.

Mr. SIMPSON. Mr. President, I wish to deeply thank the majority leader, Senator BAKER, for his courtesy and similar persistence in seeing that this matter is considered before the Senate, and also that same message to Senator ROBERT C. BYRD, with deep appreciation for his assistance in

seeing that this measure is before us for consideration.

I also thank the subcommittee members: Senator THURMOND; Senator GRASSLEY, who has done yeoman work; Senator DeCONCINI, who has been most helpful in his participation, and particularly tribute to Senator KENNEDY, the ranking minority member of the subcommittee, who has been an extraordinary helpmate in the crafting of this measure.

Senator KENNEDY has some reservations which he will present to you today, but I thank him deeply for his method in which he participated.

Mr. President, we have a phrase we use in Cheyenne during Frontier Days, "Grab a tight rein because here we come out of chute No. 4."

That is where we are with this one. Here is an issue that will consume our interest for a bit, our legislative deliberations, one that will not go away. The current U.S. immigration policy is hopelessly inadequate to deal with modern conditions, including the growing immigration pressure yet to come in this country.

The current policies no longer serve or promote the well-being of a majority of the American people. Immigration to the United States is out of control and it is so perceived at all levels of government by the American people—indeed, by people all over the world. I deeply feel that uncontrolled immigration is one of the greatest threats to the future of this Nation, to American values, traditions, institutions, to our public culture, and to our way of life. It exists in sharp contrast to controlled immigration, which, indeed, has been one of the finest traditions of our remarkable heritage.

Mr. President, let me present a few statistics. When I began my service on the Select Commission of Immigration and Refugee Policy 3 years ago, serving there with three other Members of this body—Senator KENNEDY, Senator MATHIAS, and Senator DeCONCINI—I think all of us sincerely trusted that we would never reach the point where we would come to talk so often about numbers, since behind every number is a very real face and a very real human being. Unfortunately, we do make this reference, since the numbers show so very clearly the essence and the extent of our problem.

In the 5 years just passed, total legal permanent admissions to the United States, including refugees, increased from a little over 450,000 in 1976 to 800,000 in 1980 if we include the 135,000 Cubans and Haitians entering in that year. As recently as 1965, the total was under 300,000. During that same 5-year period, the numerically unlimited category of "immediate relatives" of U.S. citizens grew 40 percent, from 114,000 to 152,000. In this same period, refugee admissions have ranged from 5,000 in 1977 to over

200,000 in 1980, 4 times the 50,000 level indicated as the normal flow in the Refugee Act of 1980.

The United States today is taking in more legal immigrants and refugees for permanent resettlement—that is a key definition; not just temporary camps or readying them for another country—than the rest of the world combined, perhaps twice as many. It is because of the inflow of the "immediate relatives" and refugees that legal immigration to the United States has reached so high a level.

Mr. President, as my colleagues are well aware, the level of refugee admissions is set by the President after consultation with the Judiciary Committees of the House and the Senate. As a result of the maturing of that consultation process, which has occurred through the fine assistance of my ranking member (Mr. KENNEDY) and the great assistance of my counterpart in the House, the chairman of the House Judiciary Subcommittee with regard to immigration—let me pay tribute to RON MAZZOLI, that able and articulate, dogged and determined, delightful friend. During the development of this legislation and during the period since the enactment of the Refugee Act, we, as I say, have reached a maturing process in consultation—all of us. I believe the process now provides an appropriate degree of control over refugee admissions. However, present law still provides no control whatsoever over the number of "immediate relative" admissions.

Mr. President, in addition, thousands of illegal immigrants now enter the United States every year. Some estimate the annual inflow at over 500,000. The present inflow is substantially higher than it was 10 years ago. Some indication of that can be found in these dramatic figures on apprehensions. In 1967, the number was 162,000. In 10 years, those apprehensions have increased to 1 million per year.

Consider, then, that just 4 years ago, applicants for asylum numbered less than 5,000 for the year. Today, that backlog is over 105,000. We are well informed that a significant fraction of those may actually be "economic migrants" and not, thus, legally qualified for asylum. Who would have ever dreamed we would have become a country of first asylum?

The number of illegal aliens already in the country is unknown. The select commission used a figure of 3.5 to 6 million for the best estimate for 1978. Whatever the number presented 4 years ago, there are surely many more now. Immigration—legal plus illegal—now appears to be accounting for 30 to 50 percent of our annual population growth of about 2 million.

Well, Mr. President, I am certain there may still be some of my colleagues thinking, "well, so what?"

Why should we do anything? Let me make an effort to explain why those persons, as elected representatives on behalf of the American public, should be concerned.

Net immigration, legal plus illegal, 750,000 per year. A net immigration of 750,000 would lead to a U.S. population in 100 years of 300 million, even if it were assumed that the fertility rate of the existing population remains at its present low level, which seems improbable, and if the fertility rate of the new immigrants immediately declines to that of the present population as a whole, which is even less probable, given the high fertility rates of the countries from which most of the immigrants now come. About 100 million of this 300 million would consist of immigrants arriving after 1980, and their descendants.

Indeed, these overall figures actually underestimate the impact of immigration, since it may actually be concentrated in only a few regions of the country. For example, under the same assumptions and assuming continuance of existing settlement patterns, the population of California would double by 2080. Over one-half of the State's population would consist of post-1980 immigrants and their descendants.

I am not going to delve into the problems of excessive population. Those items are well known and there are organizations that express that very clearly and very sincerely. I shall not discuss them.

Not only is the total number of legal and illegal immigrants high, but less than 5 percent even of the legal immigrants are individually admitted on the basis of characteristics which are likely to benefit the Nation as a whole, and this is limited only to an analysis of labor market impact.

As a result of this and of the fact that the present procedures for the determining of the effect on the labor market would appear to be of limited effectiveness, I believe that our present policies have produced adverse job impacts, especially upon low-income, low-skilled Americans—who are the most likely to face direct competition. Such adverse impacts include both unemployment and less favorable wages and working conditions than would otherwise be offered. Not only do such impacts cause economic harm to the directly affected Americans and their families, and in many cases a public assistance burden on the taxpayers, but it may also increase the social and political problems associated with unemployment and poverty.

Let me add here that if it is determined as a national objective that the use of foreign labor is beneficial under particular circumstances—and I believe such use should be limited—then the law should allow this use under

appropriate limitations and conditions. Obviously, however, if the necessary limitations and conditions cannot be enforced, then no beneficial results can be assured.

Although population and job impacts are of great significance, I think most people would agree that the national interest of the American people also includes certain even more important and fundamental aspects, such as the preservation of freedom, personal safety, and political stability—as well as the public cultural qualities and political institutions which are their foundation.

Mr. President, a careful comment, please, that must be carefully heard, because it is easily misunderstood and easily distorted.

If immigration is continued at a high level, and yet a substantial portion of these new persons and their descendants do not follow the historical patterns of earlier immigrant groups in becoming full participants in American society and our public culture, then they have the potential to create here a measure of the same social, political, and economic anguish which exist in the countries from which they have voluntarily chosen to depart. That is reality.

Mr. President, now that the problem has been presented, I should like to outline what we believe to be the solution—the form of immigration reform which we believe the American people desire and deserve, and which America's future requires.

First, I wish to firmly make the general point that immigration can always continue to benefit the United States if the law is reasonably amended to be appropriate for contemporary conditions—if the amended law can be enforced.

Mr. President, the major provisions of S. 2222 contains provisions intended to reduce the problem of illegal immigration.

The potential benefits and protections of even the most carefully designed statutory standards for determining who may enter the United States, as well as for how long and under what conditions they may remain, will not be available in practice if those statutory standards cannot be enforced.

All objective, comprehensive studies of the problem of illegal immigration, including those by the Ford, Carter, and Reagan administrations, as well as the Select Commission on Immigration and Refugee Policy, have concluded that adequate enforcement of U.S. immigration laws cannot be achieved by direct enforcement alone.

Why? Because as long as greater job opportunities are available to foreign nationals who succeed in physically entering this country, intense illegal immigration pressure on the United States will continue, and that pressure

will decline if the availability of U.S. employment is eliminated, or if the disparity in wages and working conditions is reduced, either through improvement in the Third World or deterioration in the United States.

The United States, of course, should always assist in Third World development activities but the achievement of substantially higher living standards in those nations is a prospect only for the long run. Since deterioration in the United States is certainly not an attractive resolution, only one approach remains: To prohibit the knowing employment of illegal aliens.

S. 2222 provides for penalties against employers who knowingly employ illegal aliens and also against persons who knowingly and for a fee recruit or refer for employment such illegal aliens. In order to protect persons subject to penalties and also the members of minority groups legally in this country, the bill provides for a system to verify that employees and potential employees are U.S. citizens, legal aliens, or authorized to work in the United States.

It has been claimed that any new verification system would be "too costly" and that it would pose a threat to privacy and to civil liberties. I respectfully disagree. The Social Security Administration recently estimated that the cost of replacing all social security cards with a tamper- and counterfeited-resistant version would be \$108 million per year for 10 years—but since total replacement would not be required, the cost would actually be much less. The Department of Labor has estimated that the cost of a verification system which would utilize a telephone call to a new Government data bank would average \$333 million per year for the first 5 years and about \$200 million per year thereafter.

These are not small numbers, but there are also tremendous costs in inadequate or no enforcement. For example, each unemployed person in the United States receives an average of about \$7,000 per year in unemployment and welfare benefits. If the number of illegal aliens in the United States today is estimated to be 6 million, and if even 2 percent of those hold jobs which unemployed Americans would take, then the savings would be \$840 million per year. Actual displacement is probably substantially higher. Thus, a new system to verify work eligibility may well not exceed in cost the amount directly saved as a result of reduced public assistance alone, not even considering the value of the other benefits of reducing illegal immigration.

The question of how the revising of the form of the social security card, which is one of the most attractive available alternatives, could pose risks to liberty was asked of many witnesses at the hearings of the Subcommittee

on Immigration and Refugee Policy. I do not believe that a satisfactory answer was ever presented. Many persons who are well known for their sincere interest in civil liberties agree that the threat is not serious, including Father Ted Hesburgh, former Chairman of the U.S. Commission on Civil Rights and also Chairman of the Select Commission on Immigration and Refugee Policy; the editorial writers of the New York Times, Washington Post, Los Angeles Times, Boston Globe, and other major newspapers across the country; former Attorneys General Elliot Richardson and Benjamin Civiletti, and many others.

Furthermore, the bill contains specifically crafted safeguards intended to minimize the risk of undue invasion of privacy and the risk of Government abuse. In addition, I think we should harken that there are far stronger protections already in place in this land, the most important being not "the law," which can always be changed, but rather the cultural elements which underlie the law, including the values and traditions of our form of government, which are part of the American character. There is no "slippery slope" toward loss of liberties, only a long staircase where each step downward must be first tolerated by the American people and their leaders.

In an attempt to further deter the violation of U.S. immigration law and to reduce the harmful impact of such violations when they do occur—through reducing the time illegal aliens are able to remain in the country after apprehension—S. 2222 contains improvements in exclusion, deportation, and asylum adjudication procedures.

The bill provides a summary exclusion proceeding without an appeal for those who enter the country without documents and who are not claiming asylum. For all cases involving asylum, the bill provides for extensive administrative consideration, within the Justice Department but outside of the Immigration and Naturalization Service: First a full due process hearing on the record before a specially trained immigration judge and then, if desired, an administrative appeal to a newly created U.S. Immigration Board. Consistent with the practices of most other countries, there will be no right of further review on the merits of an asylum claim. The constitutionally guaranteed right to seek a writ of habeas corpus will, of course, be available in order to remedy any violations of procedural due process.

In addition to tightening of asylum proceedings the bill streamlines the adjudication procedure for both deportation and exclusion. In exclusion cases not involving asylum and not subject to the summary exclusion pro-

cedure, an administrative hearing and appeal will be available as in asylum cases. In deportation, the procedure will be the same except that judicial review of the decision of the Board will be available.

As a result of the measures discussed and the increased resources that we anticipate will be devoted to enforcement by the Immigration and Naturalization Service, illegal immigration should be reduced substantially.

We fully recognize, I think, the possibility that substantial adverse economic impact might occur on certain employers who have, quite lawfully, become dependent on illegal foreign workers. We feel that we deal properly with this problem in the bill. First, the prohibition on the employment of illegal aliens will not apply—this is a key part of the legislation—to those who are hired before the bill is enacted. Second, the legalization or amnesty program will legalize many currently illegal workers. Third, the certification of the Department of Labor which must be obtained for certain job-related visa categories, is modified in order to allow for a more efficient and accurate determination as to when a foreign worker is needed. Finally, the H-2 program is modified so that employers who are able to demonstrate a genuine need for a foreign worker for temporary services or labor will receive an approval within a reasonable length of time.

In addition to reducing illegal immigration, S. 2222 is intended to modify legal immigration so that it will better serve the national interest—by increasing control over the number admitted and by amending the selection criteria.

Although "immediate relatives" of U.S. citizens will indeed continue to be exempt from numerical limitations, the number available for the family reunification preference categories would be determined by subtracting the number of "immediate relatives" admitted in the prior year from the cap of 350,000 in that category, therefore, and increase in the number of "immediate relatives" will be compensated for by a reduction in the visa numbers available for other family reunification categories. A similar approach will link the numerically exempt "special immigrants" with the independent preference categories. The limit will be the cap of 75,000 in that entire category minus the number of "special immigrants" admitted in the prior year.

So the effect of these changes is that at least for the next 10 to 30 years, the total of all new immigrants, excluding refugees, will not exceed 425,000, which is approximately the current level.

S. 2222 also makes several changes in the current criteria for allocating numerically limited immigrant visas.

The family preference categories would not include what is now referred to as the fifth preference.

There is an amendment pending to modify that. I think it may be acceptable. We will deal with that later in the debate.

But what we want to recall is that what we were trying to do is reserve for closer relatives the limited visas available for family reunification and to allow an increase in immigration opportunities for those who have no close relatives in the United States but do have skills that will benefit the American people as a whole—the so-called "seed immigrants," those who had already received fifth-preference status and where on the waiting list as of March 1, 1982, will be protected and applications processed. For these same reasons, the second preference will be narrowed somewhat to cover only spouses and minor children of permanent residents—more properly meeting the definition of "the nuclear family". The percentage of family reunification visas allocated to this category is, therefore, greatly increased.

The highest priority independent preference category is reserved for aliens with exceptional ability in the sciences, arts, professions, or business. This is the present third preference with certain modifications: "Business" is added to the fields covered and "exceptional ability" is required of members of the professions. There is also a new independent category for substantial investors in the U.S. economy who create jobs for U.S. Citizens and permanent residents other than their own relatives.

In addition to the changes with respect to immigrants, S. 2222 amends certain nonimmigrant categories as well. For example, the bill amends the current H-2 temporary worker program in order to establish a special procedure for seasonal workers in agriculture.

Mr. President, last, but certainly not least, in the controversy department, there is legalization or amnesty.

S. 2222 provides for the legalization of illegal aliens into two categories of legal status. An amendment will be presented to modify the provisions in the bill, and I think that may become quite acceptable.

First, aliens who have continuously resided illegally in the United States since before January 2, 1978—this is under the bill—will qualify for permanent resident status, not citizenship.

Second, those who have continuously resided illegally in the United States between the dates of January 1, 1978, and January 1, 1982—under the present bill—or who are in the Cuban/Haitian "entrant" status, will qualify for a temporary status, not citizenship, which may be adjusted to permanent status after 2 years if the alien meets certain conditions of present law.

Persons convicted of certain crimes, Nazis and other persons who have persecuted others, Communists, anarchists, saboteurs, and those seeking to overthrow the Government will be excluded from each category of legalization, as under present law. Most other classes of excludable alien, including aliens who are likely to become a "public charge" under present law, will also not qualify, unless a waiver is obtained.

We seek to achieve three major goals through legalization, which is very controversial.

The first is to avoid the wasteful use of the Immigration and Naturalization Service's limited enforcement resources, the United States is most unlikely to obtain as much enforcement for its dollar if the Immigration and Naturalization Service exhausts its efforts in attempts to locate and deport those who have become well settled in this country, rather than to prevent new illegal entry or visa abuse.

The second goal is to allow currently economically dependent employers to continue lawfully hiring from this pool of labor.

The third is to eliminate the illegal subclass of persons now present in our society. Not only does their illegal status and their resulting weak bargaining position cause these people to depress U.S. wages and working conditions, but it also limits their participation in U.S. society, which may have the effect of hindering the participation even of legal immigrants from the same country of origin, as they become people who are afraid to go to the police, afraid to go to the hospital unless it is for a birth, and afraid to go to their employer, who says, "One peep from you, and it's off to the I. & M." If you could not find them coming in, how are you going to find them to get them out?

Mr. President, that concludes my description of the major provisions of the bill. I will conclude with a few personal remarks.

I became chairman of the Immigration Subcommittee at the beginning of this session of Congress. It has been a fascinating year and a half—quite an educational process for me, as was my time on the Select Commission on Immigration and Refugee Policy.

Mr. President, in those nascent efforts I originally rejected certain of the key provisions now in this bill, possibly feeling a bit like some of my colleagues must feel at this moment on the issue. I wish all of my colleagues could have shared in that rich 3-year learning process, for I assure them that the longer one is in it, the more one understands that this is the approach we must take. ROM MAZZOLI, my House counterpart, and I have discovered that this is the approach we must take.

The bill we have drafted is the product of an evolutionary process of many years. It has to be clearly stated that this bill does not suddenly rise up as a solution to higher unemployment or as a panacea for some rough economic times. No, indeed. It has been incubating for many years, and now we hope we can bring it to fruition. It owes much to hundreds, yes, even thousands, of Americans, even to those who are not Americans. The subcommittee itself conducted 18 days of hearings and 5 formal consultations on the myriad subjects related to this bill. In addition to these extensive hearings, we had access to all of the excellent prior work on immigration reform done in the past few years, including the efforts of the administrations of Presidents Ford and Carter, the final report of the select commission—and I attended a good many hearings and meetings of that fine group during that process, too; the very perceptive and interesting proposals of that fine and able senior Senator from Kentucky, DEE HUDDLESTON; the efforts of my able colleague from Massachusetts, TED KENNEDY, the ranking member of the subcommittee, who chaired this subcommittee for 12 years and has given of his assistance and support through the hearings as has his capable and very bright staff, including the minority staff counsel, Jerry Tinker; the excellent ideas of the Reagan Task Force on Immigration, headed by our most capable and knowledgeable Attorney General Smith—a real trooper on this issue—and his staff; and, finally, the portions of the proposals and the bill submitted by the President in July of last year.

Those various proposals and recommendations are remarkably similar. This should not be surprising to anyone, since they were all the product of intelligent, caring men and women who were attempting to deal with the same problem—that immigration to the United States is out of control.

Because those of us involved in the drafting of S. 2222 faced the same problem, it is then not surprising that our solutions are not dramatically different from proposals of the recent past.

The entire issue is a very, very tough one. It evokes feelings and accusations of guilt, emotionalism, and racism and it is so susceptible for a vehicle to engage in high drama. RON MAZZOLI and I have done our level best to prevent the national debate from going in that way.

Some have suggested that now is not an appropriate time to debate immigration reform in the Congress. The mood is too "restrictive" they say. It brings out our "dark side." Fair immigration reform cannot be accomplished in such an atmosphere.

I want to express my strong disagreement with that view. First, I do not believe there is an atmosphere of restrictiveness or mean spiritedness—not in any Member here—concerning immigration reform in this body. Second, matters are only going to grow worse if we do not obtain control over immigration to this country.

Now is the time to act. Every poll taken in the Nation shows that over 90 percent of the American people believe our immigration laws and policies are out of control and must be reformed. Pressures to migrate are increasing worldwide and some of the greatest pressure is on this country. As long as people around the world know that once they arrive in the U.S. illegally they will be able to obtain jobs, they will obviously continue to come in increasing numbers.

I firmly believe that this is the time to reform our immigration laws. A wide diversity of public interest groups involved in immigration, the editorial writers of the major newspapers of this country, and the administration have agreed that this bill is a fair, workable, and humane approach to controlling illegal and legal immigration. If we do not act now in a rational way, I am deeply concerned that the debate in the future will become increasingly unpleasant and clouded by racism, restrictionism nativism, and other elements which we have successfully excised out of this reform effort.

I am pleased that the balance which we achieved in S. 2222 has received such wide acclaim throughout the country, including editorial support in the Washington Post, New York Times, Los Angeles Times, the Boston Globe, and many other of the fine newspapers across America.

The bill, of course has its critics, especially among certain special interest groups. Indeed, I get hammered pretty hard in Wyoming on this issue—I assure you I did not go into this fray to gain political support from my constituents. This is a "no win" issue in that sense. But I tell my wife, Annie, to keep up the housepayments in Cody, Wyo., so that if enough folks back home do not believe what I am doing is right for the country, or if they should wish a Senator who would use a lesser standard, I will at least have a roof over my old bald dome.

Actually, though, the people in Wyoming are like most Americans: If we have faith in their commonsense and let them know honestly what we are doing, they understand very well. In particular they understand that the future of America—the America of their immigrant ancestors, their children, and their grandchildren and their great grandchildren—is more important than some special short-term benefit for themselves.

Mr. President, this is one national issue that will not go away, and

anyone who feels that there is not a massive constituency out there for immigration reform is misreading the tea leaves. I say this to my colleagues: Do not be anxious or fearful that we here repeat the wretched racist overtones or previous immigration reform in this land. Here I hope you will consider that there are no hidden agendas or subtle meanings within this proposal—No mysteries or alchemy—but simply the expression of the national legislature that we intend to clearly exercise that first and primary function of a sovereign nation, which is to control its borders, and that we intend to send a signal to the rest of the watching world that to work in the United States of America, you must be in "legal" status. This legislation expresses nothing more profound than those two basics.

I look forward to the debate, the consideration of the amendments, and the legislative processes which will likely lead us really only to the beginnings of a solution of this destabilizing, disruptive, and gut-hard issue.

Mr. President, I yield to the Senator from South Carolina (Mr. THURMOND), who has to attend an urgent meeting.

The PRESIDING OFFICER. The Senator from South Carolina.

Mr. THURMOND. Mr. President, this is a subject in which I have long been interested. When I became chairman of the Judiciary Committee, I concluded that action must be taken to rectify the situation now existing in this country with regard to immigration.

I requested that I be made a cosponsor of the bill. I do not believe the RECORD shows that. If it does not show that, I ask unanimous consent that I be made a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. THURMOND. Mr. President, the Senate now has before it one of the most important measures considered by the Committee on the Judiciary this year. The Immigration Reform and Control Act of 1982 is directed at increasing control over both illegal and legal immigration, which has become a significant problem in this country.

The distinguished Attorney General of the United States, William French Smith, in testimony before the committee on April 20, 1982, stated:

It is now time for the Congress to act boldly and realistically by enacting comprehensive immigration reform in this session. The Administration continues in its firm commitment to this effort.

The Attorney General feels strongly about this legislation, as do a majority of the members of the Committee on the Judiciary. S. 2222 was reported by a vote of 16 to 1 on May 17, 1982. It is time for Congress to act on this measure.

NEED FOR LEGISLATION

Mr. President, in the last 5 years legal immigration to America has increased from 450,000 in 1976 to 800,000 in 1980, including the 135,000 Cubans and Haitians that entered in 1980. During that same period, the category of "immediate relatives," over which there is currently no limitation, increased by 40 percent. Refugee admissions went from 5,000 in 1977 to more than 200,000 in 1980.

We have no firm knowledge of the number of illegal aliens in this country. Some have estimated the flow to be in excess of 500,000 a year. One indicator is the number of apprehensions. In 1967, it was 162,000. In 1977, apprehensions were more than 1 million. The Select Commission on Immigration and Refugee Policy in 1978 used the figures of 3.5 to 6 million as an estimate for the number of illegal aliens in the United States. Now, 4 years later, we can only assume these figures are higher. In the words of Attorney General Smith, "we have lost control of our borders."

Presently, net immigration, which includes both legal and illegal, is approaching 800,000 annually. Although compared to a population of 230 million Americans, the figures seem acceptable, but such comparisons are deceiving. If we assume the same levels of immigration, fertility rates, and settlement patterns, the population of California would double by the year 2080. Other areas of the Nation would also be inordinately affected by continued levels of current immigration flow.

We are a Nation of freedom and opportunity. But that too is being threatened by a policy of unrestrained immigration and refugee admissions. The political stability, personal safety, and the preservation of our cultural and political institutions must be brought to account. We can no longer be the sole refuge for victims of the economic ills of other nations. Moreover, the record of the ability of certain immigrant groups to assimilate into our society has been questionable.

Although 50 to 60 percent of illegal aliens come from Mexico, of those who remained in the United States for 7 years, only 5 percent had naturalized. It is clear that Mexican nationals wish to share in the rewards of our capitalist system of government, but have reservations about becoming American citizens. Other immigrant groups have much higher percentage rates of naturalization. If these individuals cannot easily assimilate into our society, that poses social, economic, and political problems that must be recognized and addressed by Congress.

RESPONSE TO PROBLEM—S. 2222

Mr. President, S. 2222 is not the ultimate answer to the immigration and refugee problem in America. It is intended to pose solutions to the major

problem of illegal immigration. The bill approaches this in two ways.

First, it makes changes in the law that will enable the authorities of the Immigration and Naturalization Service (INS) to engage in better enforcement of the immigration laws. Improved border control and interior enforcement is provided for in S. 2222.

Second, it reduces the incentives to enter the United States illegally. S. 2222 seeks to accomplish this by providing increased penalties for employers who knowingly hire illegal aliens and the institution of an improved verification system so that honest employers are not punished for good faith efforts to hire foreign-looking workers.

These two policies, stronger enforcement and a reduction of incentives to enter and stay in the United States, are really the only ways of controlling our borders short of building a wall around the entire country. We must permit a certain flow of immigrants to meet the needs of certain sectors of our economy, including agriculture, as well as other areas of employment where U.S. labor is unavailable or unwilling to meet the demand. We must, however, increase border and interior enforcement, and reduce incentives for foreign workers to come to America and for U.S. employers to hire such individuals at below-market wages.

REFORM OF LEGAL IMMIGRATION

Mr. President, the other major aspect of S. 2222 is to make reform in the present law regarding legal immigration. Family reunification, which has been a major basis for legal immigration in the past, is retained, but with certain modifications. For example, the per-country ceiling for Mexico and Canada has been increased from 20,000 to 40,000 a year. The independent category of legal immigration is more closely tied to preference immigrants in "family reunification" categories. Thus, there will now be a limitation on overall relative immigration.

Changes are made in the labor certification process to make it more responsive to the needs of the domestic labor market. There are also new provisions which make changes in the nonimmigrant H-2 provisions which cover temporary agricultural or service employees.

The student visa program, long subject to abuse, has been changed to require that foreign students, whether academic or vocational, return to their native country for a period of 2 years after graduation and before they obtain permanent resident status in the United States. Students will also be required to adjust their status to permanent resident and receive it from abroad.

LEGALIZATION PROGRAM

Finally, Mr. President, S. 2222 provides for a legalization program for those illegal aliens who are presently

in this country, but who have developed equities that justify their receiving an adjustment to permanent resident status and receipt of a green card entitling them to work legally in the United States. The bill permits the Attorney General to adjust the status of an alien, not otherwise excludable or ineligible, who can establish residence prior to January 1, 1978. The Attorney General is also authorized to adjust the status of certain aliens who entered prior to January 1, 1982, to temporary resident. Such temporary residents will not be eligible for Federal financial benefits other than for old age, blindness, disability, or needed health care because of serious illness or injury.

Mr. President, this program of legalization is not something I support without reservation. If I did not believe that the only way the Federal Government can gain control over immigration and refugee policy is by way of a legalization program, I would be opposed to it. I supported the legalization program originally in S. 2222, but opposed the version reported by the committee. For that reason, I reserve my rights to reconsider the type of legalization provision, if any, that may be included in this measure. Frankly, the bill as now drafted is too generous. It rewards, unreasonably, illegal entrants who have had little or no time to build the equities generally recognized to be necessary in order for an immigrant, legal or not, to adjust status. I would prefer to see some changes in this provision.

Moreover, there are significant cost implications connected with this legalization program, whatever its form. The administration has indicated to me that it will propose a legalization program more consistent with the original legislation of the administration and within a reasonable budgetary range.

CONCLUSION

Mr. President, S. 2222 contains several other changes in asylum adjudication procedures, reports to Congress, and visa waivers which will further reform the current law. The Senator from Wyoming (Mr. SIMPSON), chairman of the Subcommittee on Immigration and Refugee Policy, has detailed those changes in this opening statement. I will not go over them here.

Speaking of the Senator from Wyoming, I must commend him for bringing this measure to the floor of the Senate. There is no way I can describe the long, arduous, and difficult path that Senator SIMPSON had to traverse in order to place this legislation before the Senate. It was a tough job, but Al SIMPSON was up to it. I knew he could do it when I asked him to chair the Subcommittee on Immigration and Refugee Policy. He has not let me down nor has he let the Senate down.

I trust my colleagues will recognize this effort and reward it with their support and their votes.

Mr. President, I wish to commend the distinguished Senator from Massachusetts for his interest in the immigration question and for the hours he has spent on this matter. I hope he will see fit to support this bill as it goes through the Senate.

Mr. President, I yield the floor.

Mr. SIMPSON. Mr. President, I thank the Senator from South Carolina for those generous remarks. I could not have had a more supportive chairman of a committee, and I deeply appreciate that, and will say it one more time with great sincerity.

I now yield to the Senator from Massachusetts.

The PRESIDING OFFICER. The Senator from Massachusetts is recognized.

Mr. KENNEDY. First of all, Mr. President, I want to express my very sincere appreciation and respect for the Senator from Wyoming, who has been the chairman of the Immigration Subcommittee, for the tireless work he has done on this particular subject which has enormous importance for this country here at home and in our relations abroad particularly in the Western Hemisphere.

This generally, Mr. President, is not what we call a front burner issue. Perhaps in the minds of many Americans it is, but I would say, given the general conditions we are facing here at home with the state of our economy and other challenges overseas and in our foreign policy, that this generally would not be considered an issue of that particular magnitude.

But it is an issue of enormous importance because what we do on the issue of immigration says a great deal about the kind of society that we are and that we want to become.

The issue of immigration is a public policy question which is as old as this Nation, and I think the Senator from Wyoming pointed it out very well, and I would certainly agree, that it has been over the history of this Nation one which has reflected the proud instincts of our country and our people but has also reflected the rather darker aspects of our Nation's people.

Mr. President, as the Senate initiates debate today on S. 2222, the Immigration Reform and Control Act, I want to take this opportunity to note the historic significance of our undertaking today—as well as to commend the unflagging dedication and leadership of Senator SIMPSON in moving forward this long overdue effort to achieve immigration reform.

The action we begin today marks the first significant effort by the Senate to reform our Nation's immigration laws since the major reforms of 1965—which I was honored to manage on the Senate floor. The 1965 act finally re-

moved from our laws the discriminatory national origins quota system and the notorious Asian-Pacific triangle provisions—perhaps the most discriminatory laws ever enacted by the U.S. Congress.

Until today, there has been no general effort to restructure our immigration law—even though we took a major step in 1980 in reforming our laws on the admission and resettlement of refugees.

In 1978, Congress acted to lay the basis for the reforms we are considering today, when we established the Select Commission on Immigration and Refugee Policy. As the chief Senate sponsor of the legislation creating the Select Commission, I did so in the hope that it would finally bring some high-level study and review of our outdated immigration laws, which previous executive branch interagency task force's had failed to achieve, and which Congress had failed to address.

It was also clear then that immigration was becoming a controversial issue, clouded by misunderstandings and false stereotypes, and overwhelmed by the fear of illegal immigration—all to the detriment of legal immigration.

Suddenly, one of the oldest themes in our Nation's history was becoming one of our most contentious and misunderstood public policy issues.

In part, this was a product of the times—a reflection of our preoccupation with stubborn and increasingly critical domestic and international challenges. But part of the problem derives as well from our existing immigration law, which is a generation out of date.

After 2 years of work—after 12 regional hearings around the country, dozens of consultations and exhaustive research—the Select Commission, under the chairmanship of Father Ted Hesburgh of Notre Dame, filed its recommendations with the President and Congress in March 1981. These recommendations have largely formed the basis for the bill we are considering today.

And this is due, Mr. President, in no small part to the efforts of my distinguished colleague and chairman of our Subcommittee on Immigration and Refugee Policy, Senator SIMPSON.

He served, as I did, on the Select Commission. He was immersed, as I was, in the complex and difficult immigration issues we confronted during our 2-year review. We sat together, all day in a room not far from here in the Capitol with 14 other commissioners—including our colleagues, Senator DeCONCINI and Senator MATHIAS—and we wrestled from 9 a.m. in the morning until late that night, over many of the immigration issues contained in the bill before us today.

To Senator SIMPSON's credit, following the submission of the Select Com-

mission's recommendations, he took them and moved them forward. He initiated, along with congressman MAZZOLI, the first joint hearings between the two immigration subcommittees of the House and Senate in more than 30 years. And he launched a year-long series of hearings to listen to all sides to this controversial issue.

Having joined him in many of those hearings—as well as in the numerous consultations we have held with representatives of the executive branch, the voluntary agencies and other interested groups—I know firsthand of the dedicated and thoughtful work he has devoted to the development of this bill. And I want to commend him for it.

As ranking minority member of the subcommittee I have been honored to work closely with him, in a bipartisan effort to achieve immigration reforms based upon reason, fairness, and careful study. We have attempted to review immigration policy in light of America's best interest, yet with full regard for our immigrant heritage and our humanitarian traditions.

We have rejected—as we must continue to reject—calls for harsh and discriminatory enforcement of our immigration laws, including the deputizing of local police officers to enforce our complex immigration policies.

We have rejected cruel and racist calls against immigration—of using immigrants and undocumented aliens as scapegoats for some of the problems our Nation faces today—problems that have nothing to do with immigration.

We have rejected calls to drastically reduce our annual immigration quotas or to restrict the admission of refugees—sometimes from the very people who also call for the establishment of a massive temporary worker program.

And we have rejected calls that we should begin the mass deportation of undocumented aliens who have been leading productive lives in our country for many years.

The Judiciary Committee rejected all of these proposals, Mr. President, because they are wrong—because they are shortsighted—and because they are contrary to our national interests and humanitarian traditions.

I am confident, Mr. President, that the Senate will also reject these proposals when they come to the floor.

We have come a long way, Mr. President, toward achieving immigration reforms that many of us have advocated for many years. But I believe we still have some distance to go.

That is the spirit in which I offered a number of amendments to this bill when it was marked up in the subcommittee, and when the full Judiciary Committee considered it in May. And this remains my intention in offering a series of amendments to the bill.

As my colleagues know, I voted against reporting the bill because of the serious concerns I had about it in its present form—concerns which I know from the tens of thousands of pieces of mail that I have received, are also the concerns of many Americans.

Therefore, at the outset of this debate, I would like to review for the record some of the issues I hope to address in my amendments—which I outlined in the minority views I filed with the committee's report.

EMPLOYER SANCTIONS

Mr. President, my overriding concern is that this bill must not become a vehicle for discriminatory action against Hispanic Americans and other minority groups.

The recent nationwide raids by the Immigration and Naturalization Service—called Operation Jobs—have spread unnecessary fear and alarm in the Hispanic community, whose members feel that the very name given the raids suggests that migrants and undocumented aliens are being unfairly blamed by the administration for the current high levels of unemployment in the United States.

I believe we must be extremely cautious to avoid legislation that raises the level of intolerance and discrimination in our society. The employer sanctions provisions contain this danger, and I regret that the committee did not accept my amendment that addresses this issue.

I have in the past supported legal sanctions against employers who knowingly hire undocumented aliens. I have done so as a matter of principle: It is wrong that the sanctions under current law fall solely on the undocumented aliens, not on employers who may be exploiting them. The Government needs stronger enforcement tools to deal with the serious problem of employers who engage in a pattern and practice of hiring and exploiting undocumented aliens.

However, throughout the select Commission's work, as well as during our extensive hearings, two central objections were raised again and again: First, that the proposed employer sanctions might result in discrimination against certain American workers, especially Hispanics and Asians; and second, that employers would be unnecessarily burdened with paperwork in implementing the sanctions.

The history of immigration legislation in recent decades is that once an immigration law is enacted, Congress does not act again for many years to come. To assure that Congress will not ignore any discrimination that arises in the implementation of employer sanctions, I believe an amendment should be added to provide the following two safeguards:

First, the employer sanctions should be "sunsetting" after 3 years, so that Congress will be obliged to face this

issue of discrimination squarely. If, as some fear, the sanctions become a pretext for discrimination, then they should expire—and properly so—unless Congress enacts new legislation with additional protections. If no discrimination materializes, then the sanctions will be continued.

Second, to insure that a fair and impartial study of the sanctions program is available to Congress, the General Accounting Office and the Commission on Civil Rights should be explicitly required in the statute to undertake an independent study of their implementation.

Finally, part of the incentive to hire undocumented aliens is their willingness to accept substandard wages and working conditions. We must intensify the enforcement of existing laws, including the minimum wage, the Fair Labor Standards Act, social security insurance, unemployment insurance, and title VII of the Civil Rights Act. Vigorous and effective enforcement of these laws will reduce the incentive for employers to hire undocumented aliens. To accomplish this, I propose authorizing additional funds to support these enforcement efforts while employer sanctions are implemented.

I hope the Senate will accept these reasonable proposals. If they are adopted, minorities in our society will be given a pledge that, if a pattern of discrimination emerges, Congress will not ignore it. Given the significant changes proposed by this legislation, this is the minimum assurance we should provide.

Surely, if the President of the United States cannot certify that no pattern—I repeat, no pattern—of discrimination has resulted from employer sanctions, then I think we must all agree that they should be terminated, forcing Congress to take remedial action if they are to be continued.

PREFERENCES FOR IMMIGRATION

Mr. President, the pending bill makes a number of unfortunate and unwise changes in the existing immigration preference system. These changes will jeopardize our country's historic commitment to family reunion as the principal goal of our immigration policy.

For the first time, this bill places the admission of the immediate relatives of U.S. citizens—spouses, children and parents—under a rigid annual ceiling. In addition, the current fifth preference for the admission of brothers and sisters of U.S. citizens is eliminated entirely.

These changes are contrary to the recommendations of the Select Commission as well as to the views of every recent administration—Republican or Democratic. I agree with the Reagan administration's view that these changes will compromise our traditional concern for family reunification.

Throughout our history we have never placed a ceiling on the admission of immediate relatives, and there is no valid reason for doing so now. Under the terms of the bill, immediate relatives of American citizens are still given the highest priority; but if their numbers increase in the years ahead, other family reunion preferences will be cut back.

We should also restore the fifth preference, at least for unmarried brothers and sisters. This would amount to only 17,000 persons a year—hardly a significant number—yet it represents an essential element in the family reunification goals of several communities in our society.

JUDICIAL REVIEW OF ASYLUM CLASS ACTIONS

Mr. President, I support the important reform of the asylum adjudication process that has been achieved in this legislation. However, I regret that the committee limited judicial review of the asylum process without granting full independence to the new Immigration Board, as originally proposed when the bill was introduced. As a result, the committee bill does not achieve the autonomy the asylum process needs in order to assure fair and nonpolitical adjudication of asylum claims. In this situation, the limitation of judicial review is particularly objectionable, since it has been the only avenue for challenging discriminatory decisions.

There are valid arguments for limiting judicial review of individual asylum applications under the new procedures, however, there is no justification for denying judicial review to asylum class actions, where there is an alleged pattern and practice of discrimination in the processing of asylum claims.

We must assure both the appearance and the reality of fairness in the asylum adjudication process by giving some recourse to the courts if a class of cases is questioned. I will want to review this issue with the distinguished manager of the bill.

TEMPORARY FOREIGN WORKERS

Mr. President, the select commission unanimously voted against establishing a massive, new temporary foreign worker program, and I support the actions of the committee in rejecting such proposals. Adoption of the legalization program and implementation of the new immigration system will result in the legal admission of additional immigrants and an adjustment in the status of undocumented aliens already working here.

Until the impact of these changes is assessed, there is no valid justification for a large new temporary foreign worker program. Any such program would have serious consequences for American labor and American wages. The committee has acted responsibly

in rejecting calls for a new "Bracero" program.

The need for temporary workers can be met by the existing H-2 visa program, and I intend to offer an amendment to restore the existing law and regulations.

Employers seeking H-2 workers must be required to seek American workers first, and we should plan the elimination of this program in the future, not its expansion.

FOREIGN STUDENTS

Mr. President, under the provisions of this bill, no future foreign students will be able to adjust their immigration status without first leaving the United States for 2 years, unless they marry an American citizen. I believe this provision is too restrictive, especially in areas such as engineering, computer sciences, and other areas of high technology, where the United States is facing critical shortages in industry and in teaching.

I believe it is essential that the pending bill should be amended to permit students of exceptional merit and ability—who are participating in essential academic, professional and industrial programs—to remain in this country without leaving for 2 years. To do otherwise is contrary to our national interest. It also ignores the current reality that exceptionally qualified students do not return to their homes in the Third World or elsewhere; they simply move to Japan or Europe and use their skills to help those nations compete against the United States. It makes no sense, when our own faculties and firms are starved for scientific talent, for the United States to train engineers or computer specialists at MIT or Berkeley for jobs in Tokyo or Bonn.

My office has been deluged by letters from American companies, research institutions and universities documenting in very persuasive terms that this change in student visas would be contrary to our national interests. I am confident the Senate will see that too.

LEGALIZATION OF UNDOCUMENTED ALIENS

It is clear, Mr. President, that there will be attempts on the Senate floor to seriously restrict, or to reject altogether, the reasonable legalization proposals contained in the pending bill. I urge the Senate to reject these amendments—as did the Judiciary Committee, and as every governmental study of this question has done over the past decade.

The Select Commission voted unanimously to recommend that a flexible and generous program be established to adjust the status of undocumented aliens who are contributing members of their communities in the United States. It did so because the existence of a large undocumented/illegal migrant population should not be tolerated—and because the costs to society

of permitting a large group of persons to live in illegal, second-class status are enormous. The Commission recognized that mass deportations were out of the question, for both legal and humanitarian reasons. More importantly, such deportations would undermine new enforcement programs and would waste available enforcement resources.

For a legalization program to work, it must be comprehensive, it must reach out to as many undocumented aliens as possible, and it must have as few exceptions as possible. It is for this reason that I am gratified the committee voted to support my amendment to make the legalization program more inclusive by moving the cutoff date forward from January 1, 1980, to January 1, 1982. This will mean that as new enforcement programs are implemented, a large, subterranean, exploited class of people will not be left in limbo; it helps to finally resolve the issue of millions of undocumented aliens in our midst.

Although the legalization program is clearly a crucial element of immigration reform, concern has been expressed over the impact it may have on State and local social service programs. According to the Research of the Select Commission and others on the characteristics of the undocumented alien population, these concerns are exaggerated. Undocumented aliens are here to work, not to seek welfare; they are in many respects undocumented taxpayers contributing to the communities in which they live without the benefits of those taxes.

Despite this documented fact—and despite the estimates of the Congressional Budget Office—we have seen paraded before us a whole set of "scare statistics" which suggests a reasonable, workable legalization program will cost billions of dollars.

Mr. President, those figures are pulled out of thin air, and are based upon assumptions that all the undocumented aliens who came here to work—and who are working—will suddenly all go on welfare, and that their dependency rates will equal that of refugees or our population as a whole. But these assumptions fly in the face of logic and facts.

Opponents cannot have it both ways. They cannot be in favor of employer sanctions because it curtails the "magnate" of jobs which brings undocumented aliens to the United States, and they cannot support Operation Jobs because it proves that undocumented aliens are taking well-paying jobs from Americans—and then turn around and argue we cannot legalize them because they will all be going on welfare. If they are here to work on well-paying jobs, why would they go on welfare? On its face it is illogical and all available research does not support such fears.

And that is what they are, Mr. President, "fears"—false fears—raised by opponents to a humane and responsible legalization program. They have no real basis in fact, and I urge the Senate to reject them.

LEGAL IMMIGRATION

Finally, Mr. President, there is a tendency in many quarters to mix the issue of legal immigration and illegal aliens. In recent days we have seen a lot of lobbying for immigration reform from people who are really lobbying against immigration. In their arguments for immigration reform there is the unmistakable implication that immigration to the United States is bad—that the numbers are too high, the impact is undesirable, and the consequences for the future are negative.

Mr. President, these implications are contrary to American history, and I reject them, as did the Select Commission on Immigration and Refugee Policy.

Yes, illegal immigration must be controlled. But there is no evidence that the current levels of legal immigration are dangerous or contrary to our national interests. In fact, the Select Commission concluded quite the contrary. Their report unanimously stated:

Based on its research and analysis, the Commission has found the contributions of immigrants to the U.S. society to be overwhelmingly positive. It believes that an immigrant admissions policy that facilitates the entry of qualified applicants is in the U.S. national interest. Whether measured by the number of Nobel prize winners who have come to the United States as immigrants (30 percent of all U.S. Noble laureates), the introductions of new concepts in music, art and literature or the industries built by immigrant labor, immigration has been of enormous benefit to this country.

The Commission also rejected the notion that current immigration is destabilizing or somehow threatening to our national unity. Although the admission of immigrants and refugees to the United States has increased numerically over the past decade, the proportion of foreign-born citizens in the United States is dramatically lower than at any previous point in our history. In 1890, the percentage of foreign born was 14.7; in 1970, it was down to a bare 4.7.

Veiled reference is also frequently made to the more than 800,000 immigrants and refugees who entered the United States in 1980. But those who use that figure do so knowing it was an extraordinarily unusual year due to the influx of Cubans and Haitians. The numbers before and since are much lower, and they are going down rapidly. We will not reach the 1980 level again in the foreseeable future.

We must avoid scare statistics designed to feed false fears. Otherwise we will undermine the very goals and reforms this bill seeks to attain.

Mr. President, we have historically been a country which has welcomed individuals to our Nation, and I think we could just go over the individuals who serve in this body even today and find that there is a significant percentage of them who served in this body and in the House of Representatives, as Governors and in legislatures, in commerce, in the arts, in the churches, and find out it was not very long ago when either their parents or grandparents came to this country, and who have made an extraordinary contribution to it.

So, Mr. President, it is important that we deal with this issue, as the Senator from Wyoming pointed out, looking at the facts devoid of emotionalism, and trying to act in our Nation's interests today and for the ensuing months and years.

Mr. President, I mentioned I feel this body has been extremely fortunate and that we have been well served by the tireless efforts of the Senator from Wyoming in this important area of public policy.

Some of us come from and represent States, and proudly so, which have felt the benefit, but also have been stung by the discriminatory aspects of past immigration laws.

When I first came to the U.S. Senate and was appointed to the Judiciary Committee, I requested to be on the Immigration Subcommittee because there were many aspects of the immigration law that worked in a discriminatory and harsh way on the citizens of my State.

The State of Wyoming is blessed with many different people who have come from many different backgrounds, but I dare say that on the range of different concerns, the people of that State would probably not be as intense on this issue as people might be in my State or many other States of this Nation.

But in spite of that fact, I think the Senator from Wyoming has really performed a very important service to this body and to our Nation making this recommendation to the Senate, although I felt compelled to vote in the committee against this proposal for reasons I have outlined earlier and for the reasons I will outline when I offer my amendments.

Mr. President, I think it is important to recognize the important work of the Select Commission on Immigration, which studied this issue for about 18 months.

I take some satisfaction as the chief sponsor of that Commission, because I felt this issue deserved the thoughtful consideration, which I think it did receive by many dedicated individuals coming from a wide range of different backgrounds. It has been primarily because of those recommendations that the legislation is here before us. The work of that Commission, and the

hearings which have been held by the subcommittee, have done a great deal to clarify some of the difficulties we are facing as a country in terms of the flow of immigrants into this country.

Mr. President, a great deal has been said and will be said about numbers, individuals, coming to this country. I think it is important to look back upon the history of the flow of individuals to this country.

We can look back to the early part of this century where we see from 1900 to 1910 in excess of 800,000 people came to this Nation. From 1910 to 1920, about 550,000; from 1920 to 1930, some 450,000; and from 1970 to 1979, about 400,000.

Reference has been made about 1980 and 1981, about the high numbers in those years, but any reference to those numbers ought to also acknowledge that this Nation was faced with the extraordinarily complex situation of the hemorrhaging of South Vietnam and Indochina and the boat people which saw tens and tens of thousands of individuals seeking refuge, and who were admitted to this country.

We also faced the situation where tens of thousands of individuals left Cuba and were brought to this Nation, as a result of a public policy, Mr. President, which I deplored at that time and under the previous administration.

But when we look at the numbers which are coming to this country—and I am talking now just about the numbers which are legal, not undocumented, aliens—we ought to recognize that the projections into 1983 suggest we will soon be back around 550,000 numbers.

We all recognize that there was an important increase in the late 1970's, even last year, with the Indochina refugees and also with the Cuban refugees. But the flow lines are going back to 550,000, which is generally the same figure that this country has had over the period of these last 100 years. That is important, because there will be a great deal that will be said about the flow lines and birth rates and numbers coming to our shores. Those happen to be the facts and those happen to be the figures, Mr. President.

In 1965, Mr. President, we changed the immigration law in two very important ways, in other ways but in two very significant and important ways. First of all, we eliminated what was then known as the national origin quota system, which allocated quotas for individuals to come to this country on the basis of their ethnic background. If you were blue-eyed and blond, you could come to the United States of America virtually in unrestricted numbers. But if you traced your ancestry to the Mediterranean basin, to Italy, or to Greece, or to other countries in the Mediterranean

basin, there was strict restrictions—let alone Africa or let alone Asia—strict restrictions on family reunifications and on the numbers that would come to the United States of America.

There have been discriminatory aspects which have been incorporated in the statutes in this country. But that was one of the most insidious provisions that has ever been enshrined in American law.

A second provision, Mr. President, was a provision called the Asian Pacific triangle, a carefully devised geographic area which included generally all Asians—that said if you come from that particular geographical area, you were effectively denied the opportunity of coming here even to join your family that might have come here at some earlier period of time. You could measure the number of Asians that came here in the 1950's and the 1960's by a few hundred, if that many.

Well, we changed those provisions, Mr. President, and I think we changed them wisely. We eliminated the national origins quota system and we eliminated the Asian Pacific triangle and we said the countries around the world were going to be fairly and equitably treated on the basis of two important criteria: One was going to be family reunification. I think one of the proud values of this Nation is the importance of families and the reunification of families.

It was not that long ago, in terms of American history, where particular families were able to save up enough resources to send someone here to the United States. That individual saw the land of opportunity, worked hard, contributed. Their desire was to be reunited with their parents, reunified with their brothers, reunified with their sisters or reunified with their children. And that took place. That was part of the driving effort that saw this country develop into one of the strong economic and cultural nations of the world. It is a proud tradition, a proud part of our heritage, the reunification of families, husbands and wives, fathers and mothers and children, brothers and sisters together. That was the key element of the 1965 act. And, Mr. President, that is an aspect which is being eroded by the present legislation before this body and which I object to.

Second, Mr. President, we provided in that legislation that we would permit certain individuals to come to this country if they could show and demonstrate by their skills that they would be able to increase employment opportunities for American citizens.

So, Mr. President, those were the fundamental concepts which were built into the 1965 act.

We also had the provision later to deal with refugees, the Refugee Act of 1980.

I think, Mr. President, as we address this issue, we should be under no illusions. In spite of the comments and statements that have been made, in spite of the provisions which have been included in this legislation, the enforcement provisions, this legislation will not and cannot fully resolve the issue of the undocumented aliens. I think it is important to understand that, Mr. President.

We have, as the Senator from Wyoming has pointed out, estimates of 3.5 million, and there have been estimates as high as 6 million, undocumented aliens in this country. We are bordering a country, Mexico, that has 32 percent unemployment and whose population is going to double in the next 20 years. It is hard to believe that the limited enforcement provisions in this bill will control these pressures, especially when we look at the cutbacks in the enforcement of existing laws—the fair labor standards law, or farm contractor compliance provisions or minimum wage provisions.

How in the world do we think we will ever be able to enforce employer sanctions when we cannot enforce existing laws? I dare say even if they were enforced in a way that has been established even under the ideal situation of the primary sponsors of this provision, we should be under no illusion that we are not going to have to take some significant, important, and probably costly measures to try and do something about the flow of individuals coming across the borders, or we are going to be faced—and let us face it—with an issue that we are going to have to try and build a fence across our southern borders with spotlights and trenches. We can ask ourselves how that is going to affect our relations with certainly one of our most important allies and friends south of the border—Mexico.

Having said that, Mr. President, I recognize that we should not throw out the reasonable or the good in an effort to achieve the perfect. But I do believe that history would bear out that whenever the Congress has written into immigration legislation provisions that can be used to discriminate, they have been used to discriminate. I say that having studied this issue and having spent many, many hours on the general issue of immigration.

Mr. President, I believe that we have such a provision in this legislation, the employer sanctions provision, which has been described by the Senator from Wyoming and which I will talk about at the time I offer my amendment.

In the past, I have felt that if we could devise a procedure in which you could find a pattern or practice of an employer exploiting undocumented aliens, we ought to be prepared to address that issue. I am prepared to support such a provision and, for a rea-

sonable period of time to test that provision. If, at the end of that time, we could require a Presidential certification that employer sanctions were not being used in a discriminatory fashion, and if studies would be made available to the Congress on that particular issue, I would support it.

We provide Presidential certification on human rights in El Salvador. We provide Presidential certification on human rights with regards to Argentina. Why are we not prepared to ask for Presidential certification on the violation of human rights of American citizens in an area which provides enormous anxiety—and I think legitimately—to millions of Americans who have suffered the whip of discrimination over the period of the past years?

I do not think that is unreasonable, Mr. President, and I think it is extremely essential.

I think without those particular provisions, we may very well be taking steps which will write into this law a provision which can be used for discriminatory purposes.

"You do not look American. You may not quite have the papers. Therefore, we are not going to hire you."

That fear of millions of American citizens being denied the opportunity for employment because of this particular provision is a legitimate concern and one which I will address later.

Mr. President, I know there are probably others who want to speak on the general issue. Then I shall be prepared to offer an amendment.

Mr. SIMPSON. Mr. President, before we come to the opening remarks of Senator GRASSLEY and Senator HUDDLESTON, I feel I must respond to the remarks of the Senator from Massachusetts. I would like to think of something quite erudite and wise, but the one that came to me was, "Holy smokes, dig in for a long day!" I wondered, I guess, when that would come. I am very puzzled by those remarks of my colleague. I say I wondered when they would come. They have not come for 3½ years, and they are here.

Family reunification, the rich tapestry of that, is just as real to me as it is to the Senator from Massachusetts. The reason it is just as real is it is in the bill. The whole bill discusses family reunification. It remains the criterion; it is the very essence of our heritage.

I have worked with the Senator from Massachusetts for 3½ years in a spirit of accommodation and compromise and spirited discussion and friendship. That will remain, I can assure you, Mr. President, whatever occurs. In all that time together, in all these amendments presented by the Senator from Massachusetts—some 12 of them—we have reached accommodation on about half of them already. The only thing I have attempted to do

for the last 3½ years is to avoid high drama. It will serve no purpose whatsoever in this debate. It will rob it of everything appropriate and humane. Racism, spotlights, trenches—good heavens. That is the stuff that you have to wade through in this arena.

There are three ways you win or lose an issue in the U.S. Senate. You use equal parts of racism, emotionalism, or guilt and just mix them all up. You get the right mix to win one, you get the right mix to lose one. But those are the ingredients. Those are the principal ingredients of activity that I have observed in my short 3½ years.

The Mexican Government—I have been to Mexico to confer with them. I have talked to President Lopez Portillo and Garcia Ramirez, and Castaneda. I said, "What would you have us do in immigration reform?"

They have said, "You're a sovereign nation, we don't want to tell you what to do. But please do one thing for us, take care of our people."

I said, "How do you do that when they are there illegally?"

"Well, do the best you can, please."

Well, we cannot.

Mr. President, do you know who is going to be discriminated against if we do not do anything in this arena? The minorities of this country—the Hispanic Americans, the black Americans. Those are the people who are going to be discriminated against if we do nothing.

I can tell you what Congress will do in its wisdom if we do nothing. They will say, give the INS more money, give the border patrol more money, and get with it. What that means is more project jobs, more targeted searches, more intrusions in the workplace. And finally, we will have an employer portion of America which says, "I am never going to hire anybody again who looks foreign, because I keep getting busted."

How that can be good for the people of this country and its minorities, I fail to see.

To suggest, Mr. President, that now is not the time to debate immigration reform in Congress will not ring; that the mood is too restrictive, that it brings out the dark side in our country, will not ring.

For 8 years we have been grappling with this issue. Any fair immigration law cannot be accomplished in such an atmosphere.

So, as I say, I am totally puzzled, but not at all surprised. Spirited debate in 3½ years, but it will not wash. It will not wash.

The Senator from Massachusetts supported this measure in the subcommittee. That will be an item of record. He did vote for this measure in the subcommittee. I did not ever wish to make that any part of the discussion, but it must be.

Then he had very sincere reasons for not supporting it in the full committee, but I understood fully, as I will always understand whatever he will express to me with regard to them. But I think finally, you have to draw the cue ball back and get the right English on things. That is where we are at this point.

The other things that have to do with that type of flight do not fit the scope of the debate. They do not fit the intensity of the debate. They do not fit the decorum of the debate. They would lead only to a further degree of puzzlement and almost bemusement.

So I look forward to the amendments presented by the Senator from Massachusetts. I look forward to working with him. I look forward to his continuing friendship. But I am one who believes that, somewhere, the system will begin to work when we deal with each other in the privacy of our offices just exactly the way we deal with each other on the floor of the U.S. Senate. Maybe then we can clean away the stuff that we have a word for in Wyoming, which is very rich and very real, and get on with the business of trying to operate the country in a congressional manner.

Mr. KENNEDY addressed the Chair. The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. KENNEDY. Mr. President, we shall have an opportunity to get into the details of the matters about family reunification. But I want to make it very clear that the Senator from Wyoming is enormously persuasive. He is a very compelling debater. But it is important for this body to understand the facts—the facts.

Fact number one: In the history of this country, we have never included in the total immigration ceilings the spouses and children of U.S. citizens.

Sure, they are going to be able to come in ahead of others, but once you put a ceiling on those particular numbers, then you begin to squeeze down other numbers. I will be interested in listening to the Senator from Wyoming explain how this legislation will permit what is permissible today, and that is the admission of brothers and sisters of American citizens to come to the United States, because in the expression of someone from Massachusetts or the expression of someone from Wyoming, "It ain't so."

As the Senator pointed out, I supported the subcommittee action to get the bill to the full committee. My views generally on these issues which I have outlined, Mr. President, with all due respect to the Senator from Wyoming, have been issues that I have stood for since I have been in the Senate. As the Senator will see from the 12 or so amendments that I will be offering, a heavy percentage of them deal with the issue of family reunifica-

tion. If there have been no changes in terms of the reunification of families, there will not be any trouble in getting those amendments accepted. If there have been, then the Senate will have a chance to vote on it. But I do not think that this body ought to be under any illusions that this issue does not alter and change existing laws on the reunification of families, because it does, and it does so in important ways.

One of the points that has not been mentioned by the Senator from Wyoming is that we only began to permit family reunifications since 1965 for hundreds of thousands of Asians. They were not like the Irish that came in over 100 years ago, and were able to bring in all their brothers and sisters. After eliminating the discriminatory provisions of the 1965 act, we permitted some of those individuals to come in. But we are saying now we are going to close that door.

So I do not yield on this issue, no matter what the dialog is or how far it is characterized, that this is a significant change and it is going to affect particular groups. It is important that this body understands that. They will make their judgement on it. I have no illusion about what the outcome is going to be; the Senator from Wyoming has the votes, but it is important I think that the membership of this body understand at least what is in the bill and what is not. I yield the floor.

The PRESIDING OFFICER. The Senator from Iowa is recognized.

Mr. GRASSLEY. Mr. President, before coming to this body last year, I was a Member of the other body for 6 years, and as a Member of that body I was never on any of the committees that dealt with the immigration issue. As an outsider looking in, I always was asking, as my constituents in my State were asking me, "Why can't this illegal immigration problem be solved? Why can't we protect our borders? Why can we not regulate the flow of people in and out of our country?"

I have to say that, as a Member of the other body, not being involved with the committees dealing with this legislation, I was one of those who asked those questions, expecting immediate answers, and wondering why there was not an immediate solution.

Then, having come to this body and having been appointed to the Judiciary Committee and the Immigration Subcommittee, and for a year and a half now dealing with this issue, with the experience and the in-depth view I have had as a member of this subcommittee, I can say that I have those questions answered now, not only for myself but also for my constituents—that this is probably one of the most complicated issues I have ever been involved with in my 24 years of public service—8 years in Congress and 16 years in the State legislative bodies.

It is an issue that cuts across all economic and philosophical bounds and brings together an odd assortment of people of philosophical backgrounds in favor of this legislation, and brings together a diverse group in opposition to this legislation.

Approximately 30 years have passed since the last major reform of the U.S. immigration policy. The time has arrived to undergo this painful process again.

Theodore H. White recently described in his book "America In Search of Itself," the situation America finds itself in resulting from our current set of chaotic complicated immigration laws, I quote from the book:

One starts with the obvious: That the United States has lost one of the cardinal attributes of sovereignty—it no longer controls its own borders. Its immigration laws are flouted by aliens and citizens alike, as no system of laws has been flouted since prohibition. And the impending transformation of our Nation, its culture, and its ethnic heritage could become one of the central debates of the politics of the 1980's.

I think one can see from that, this debate has already begun, and let us hope that S. 2222 is just the first step in the reformation process.

Though most Americans currently residing in the United States owe their presence here to the open door immigration policies of the past, perpetuation of the myth that this country is one without limits can only prove harmful in the long run. Technology is 1 of the major reasons why today's immigration phenomenon is entirely different from the immigration waves of the past. As Mr. White continued to explain:

... The earlier immigrants from Europe spent weeks trekking to ports, and then more weeks in the steerage of tramp steamers, to reach the promised land. A modern immigrant can be here in three or four hours from any airport from the Caribbean, in fifteen hours from Asia. . . . It once took years of work and savings for an honest man to buy passage for his family to join him. Now, after six months, a diligent immigrant can afford air passage for all the rest of his family. The result has been a stampede, almost an invasion.

America currently accepts over twice as many legal immigrants as the rest of the world combined. This does not include the estimated 3 million to 6 million aliens illegally in the country. Control of our borders is essential in order to protect U.S. citizens from a continued high unemployment rate and to foster a reliance on our laws and respect for our laws by those outside our country who wish to reside here.

Elected officials who loudly claim that illegal immigration is not a problem for this country are not only deluding themselves but doing a disservice to the Americans they represent. The illegal population estimate to which I just referred was first enunciated

ated in the report of the Select Commission on Immigration and Refugee Policy. It is a generally held view that approximately 500,000 people have continued to enter this country each year since that estimate was made, bringing the figures closer to between 6 million and 10 million. I fail to understand how anyone can perceive an ever-increasing population of this size to have little if any impact upon American life.

The current unemployment rate of 9.8 percent and the impact illegal immigration has on that rate cannot be ignored. This impact is demonstrated by INS's Operation Jobs, conducted in nine major cities, which freed up over 54,000 jobs.

INS conducted a random survey soon after the operation was completed which indicated that 73 percent of those vacancies created were filled later by legal workers. Though some newspaper accounts stated that 30 to 80 percent of those aliens apprehended returned to the same job, it is unequivocally clear that Americans are being displaced by illegal workers. As Senator SIMPSON indicated in his Tuesday editorial to the New York Times, if only 2 percent of the illegal alien population held jobs that unemployed Americans would take, this would result in a saving of \$490 to \$840 million in unemployment benefits and public assistance. If 1 million Americans are being displaced, it is estimated that \$7 to \$9 billion would be realized in aid savings. Not only that, but those 30 to 80 percent who allegedly returned to their jobs would be unable to do so if this legislation is passed.

If the illegal flow was substantially curtailed, not only would the effects on current unemployment rates be immediate, but also the future American employment atmosphere would be greatly enhanced. Sylvia Ann Hewlett in her article on coping with illegal immigration accurately describes the situation we will be facing in the not too distant future if the economic conditions in predominately sending countries persist. I quote a passage from her article:

The pressures that will make for an accelerating inflow (in the absence of tighter controls) are fairly obvious and stem from the inability of many Third World countries to absorb their rapidly expanding populations into productive, decently paid occupations. The world's population was about four billion in 1975 and will reach approximately 6.4 billion by the year 2000. Most of this population growth is in developing countries which already have serious unemployment and underemployment problems. These nations will need 600-700 million new jobs between 1980 and 2000 just to keep unemployment from rising.

To put this in perspective, this is more jobs than existed in all of the industrialized countries combined in 1980. These pressures will not be significantly lessened by declining birth rates, which tend to accompany

the industrialization of Third World nations, since most of the people who will enter the work force during the next two decades have already been born.

As half of our illegal immigrants are Mexican nationals, U.S. policy may well be more affected by the specifics of the Mexican situation than by the general characteristics of the Third World. Despite its high growth rates and oil wealth, Mexico, too, reflects the problems described above. The current Mexican population of over 70 million is projected to increase by at least two-thirds by the year 2000, and the total number of jobs that would have to be created in Mexico during the next 20 years in order to accommodate all new entrants to the labor force and absorb the present arrears of unemployed and underemployed into productive full-time employment is more than 30 million. Even if Mexico were to sustain a growth rate of 6.6 percent per year over the next 20 years (a record of sustained economic growth that is virtually unprecedented among developing countries), only 20 million new jobs would be created before the end of the century. This leaves a sizeable deficit. And no matter how many new jobs are created in Mexico, the huge real wage differential between the United States and Mexico (currently ten to one in many cases) will continue to drive workers to seek to cross the border.

It is clearly demonstrated, by Ms. Hewlett and countless other experts in the field, that the effect illegal aliens have on current and future unemployment rates is frankly staggering. In addition, what effect illegal status itself has on the alien cannot be dismissed. This status contributes to the creation of an underground society afraid to employ basic police and health related services necessary for not only their own protection, but for the general community's welfare. Crimes go unreported and diseases go untreated. All in all, this is a sad state of affairs.

This legislation contains the basic and necessary elements for a solution. The provisions in the bill relating to employer sanctions, increased interior and border enforcement, asylum adjudication, and a secure worker eligibility system are essential in order to regain control over our borders. With certain revisions in the area of legalization, which I will address later on in the debate, I believe this legislation will accomplish the important goal of immigration reform.

At this point, I should like to commend Senator ALAN SIMPSON and state how much I have enjoyed working with him on the Immigration Subcommittee over the past 2 years. I know of no other committee chairman who has given such careful attention and deliberation to an issue. He has attended what by this time has been, years of hearings, listened to a countless number of witnesses, and has digested innumerable pages of testimony. Though we have disagreed about certain specifics contained in the legislation, he has been nothing less than totally honest and candid with me throughout this process. I think I can safely say that we share common goals

in the area of immigration reform, we have resolved our differences, and now will work together in producing a final product acceptable to us both.

The staff of the Immigration Subcommittee is probably one of the most knowledgeable and hardworking staffs in the Senate. I commend Dick Day, Donna Alvarado, Chip Wood, and Arnold Leibowitz on their fine work. I also compliment Ally Milder of my staff for her diligent work as well. Of particular help to me has been the Federation for American Immigration Reform including Dr. John Tanton, Mr. Roger Conner, and Mr. Barnaby Zall. I truly appreciate their able assistance.

Finally, Mr. President, if the Senate does not take the opportunity to pass this legislation this year, another 30 years may go by before the opportunity comes again. This legislation will influence the character of American life for the foreseeable future. Should we fail in our duty now, I am afraid the outcome could be much worse than anyone has anticipated. Mr. President, I urge the passage of the Immigration Reform and Control Act of 1982.

I thank the Chair.

I yield the floor.

Mr. HUDDLESTON. Mr. President, in taking up the Immigration Reform and Control Act of 1982, S. 2222, the Senate is attempting to solve one of the most complex problems facing the United States today. Immigration, without question, is one of those rare policies which ultimately impacts upon almost every aspect of our society and economy, and to a large degree determines what kind of a country we are.

The question that faces us on this extremely complicated issue is how to assure the most beneficial results while minimizing the detrimental consequences. However, I am certain the distinguished chairman of the Subcommittee on Immigration and Refugee Reform, Senator SIMPSON, found out a long time ago that there are no easy answers. As he has threaded his way through this maze of special interests, he has discovered that for every solution to a particular problem, there are at least two or more groups opposed it. For the distinguished Senator from Wyoming, I am certain that at times he believes he has taken on the most thankless job in Congress.

Yet, I wish to assure him that he has the gratitude and thanks of this Senator and I think of the American people. We thank him for his perseverance, his good judgment, his compassion, his dedication, and his patience. Because of all of these good traits, the distinguished chairman has brought us to the point where we have an extremely good chance to address in a constructive manner many of the

immigration problems that this country faces.

Senator SIMPSON, along with his counterpart over in the House, my good friend, Congressman MAZZOLI, from Louisville, have worked diligently and hard and have approached this job without any preconceptions, in my judgment. They have taken into account the opinions and interests that have been expressed by every person who is interested in this subject matter throughout the country. I think they have produced a good starting point.

Of course, this expression of gratitude also goes to the members of the subcommittee—Senator THURMOND, Senator KENNEDY, Senator DeCONCINI, and Senator GRASSLEY. They have all contributed a great deal to this process and they too deserve our thanks.

As a nonmember of the Immigration Subcommittee, I may be one of the few Senators who can fully understand and appreciate all the frustrations and obstacles they have had to overcome to produce this immigration bill. Since 1975 I have actively fought for meaningful immigration reform without the benefit of any direct committee connection. During that period of time there were a number of successes that chipped away at some of the problems. These have included: In 1975, an amendment to require greater planning and direction in the refugee assistance program; in 1978, a bill I introduced with Senator DeCONCINI to permit the INS to confiscate vehicles used in smuggling illegal aliens; in 1980, several amendments to strengthen the Refugee Reform Act; and later, an amendment that put the Senate on record supporting the concept of an immigration ceiling. Nonetheless, we still have a great deal more to accomplish in the area of immigration control, and S. 2222 takes us much closer to that goal.

The need for this kind of legislation should be clear to all by now. In 1980 we admitted more people to the United States than in any other year in the history of this country. More than 800,000 people were admitted legally, and at least that number came illegally. Close to 1 million illegal immigrants were apprehended and another 900,000 ineligible aliens were turned away at ports of entry. Estimates of the illegal immigrant population in the United States have risen from 3.5 to 6 million 5 years ago to perhaps 8 or 10 million today.

How did we get to this state of affairs? For 15 years, from 1965 to 1980, Congress refused to face the problems of immigration. For 15 years we chose to ignore the problems that were thought to be too far in our future. However, while a few concerned individuals struggled to make us aware of the worsening situation, both legal

and illegal immigration continued to mount.

Then in 1979 we woke up to find what has turned into a ceaseless flow of "boat people." We resettled hundreds of thousands, far more than the rest of the world combined. And we are continuing to accept thousands of refugees each month, not just from Southeast Asia but from all around the world. In the process we have spent billions of dollars in this seemingly endless effort.

To help these refugees, Congress passed the first major change in our immigration laws since 1965, the Refugee Act of 1980. But even this major loosening of our immigration laws was not enough to meet the unending demand. The number of refugees has risen to 16 million worldwide and all our efforts, and those of the U.N. High Commission for Refugees, seem unable to reduce the number.

Americans are the most generous people in this planet in admitting immigrants and refugees. In fact, the United States admits more immigrants and refugees for permanent resettlement than the rest of the world combined. But as Americans continue their historical generosity in the face of unending pleas for entry, they have become increasingly concerned that the lack of control in immigration, as Senator SIMPSON has referred to it "compassion fatigue," has set in.

Resentment has turned to violence between Americans and new immigrants in Colorado and Texas. In Florida, researchers found that at least part of the cause for the 1980 riot in Miami was resentment about the large numbers of new Cuban entrants forcing blacks out of the growing economy.

Two-thirds of Americans wanted complete suspension of immigration until unemployment fell below 5 percent, according to a November 1980 Gallup-Newsweek poll. Think of the resentment that must exist now that unemployment is well over 10 million Americans and approaching 10 percent.

Some people blame the Cuban exodus of last year for the "great awakening" of the American people. However, I think that they have been concerned over uncontrolled immigration for much longer.

A 1977 Roper poll found that 91 percent of those polled wanted "an all-out effort" to stop illegal immigration, and 75 percent wanted legal immigration reduced below 400,000 per year. In 1980, that poll was repeated; again 91 percent wanted all-out action on illegal immigration, and the number calling for decreased legal admissions rose to 80 percent. In such a climate, comprehensive immigration reform is difficult. We must regain control over immigration before we can hope to completely reform it.

Fortunately, we are finally moving in that direction. S. 2222 addresses the more serious issues facing us on immigration—employment of illegal aliens, amnesty for illegal aliens, and an immigration ceiling. It also deals with many of the lesser problems. However, as I said when S. 2222 was introduced, it is a good beginning but it can be improved. Since that time the bill has undergone change and I believe additional improvements will be made here on the floor of the Senate.

I again thank the distinguished floor managers of the bill, Senator SIMPSON and Senator KENNEDY, for the outstanding work they both have done on this very complex issue. And, I again assure them, as I have in the past, that they will have my full support and cooperation in fully developing and passing this bill.

And, I urge all my colleagues to do likewise. Unless this Congress acts on these immigration control proposals, we may not be able to avoid a tremendous backlash, which could permanently endanger the most generous immigration policies on Earth.

I do have some changes that I might suggest during the course of this consideration. One, of course, would deal with an overall ceiling that would include the number of refugees that come into the country under the ceiling which will be established by the bill.

While I will await the appropriate time to discuss the merits of that particular issue, I would just like to make one comment here. Every writer I have read on this subject, every person who has expressed an opinion, has always included somewhere within his or her remarks that, "of course, the United States cannot take into this country all of the people who want to come here."

Everybody is willing to walk up to that problem, but very few so far have indicated the courage and the determination to develop a solution to that problem.

What I would hope we would be able to do during the course of this deliberation is to say, "We agree. The United States cannot take everybody who wants to come to this country." That is an almost irrefutable fact, and hardly anyone would ever disagree with it.

The question then is whom do we take? How many and what kind of a mechanism do we establish to make the determination as to who shall come and who shall not?

The Senator from Massachusetts has already indicated in his comments that there is competition existing among the various categories of immigrants who want to come to this country, and he wants to eliminate some of that competition. Well, there is a competition existing, and always has exist-

ed, among all categories and among all individuals who want to come to this country because of that single irrefutable fact that we cannot take everybody who wants to come here.

I have indicated before, and I think it is accurate, that there are at least 16 million refugees in the world. In our wildest dreams I have not heard anyone suggest that we ought to open our doors and welcome them all to this country. Obviously, we cannot.

There is another question, and that is is the United States really a part of the solution to the refugee problem in the world or are we a part of the problem? There is a significant amount of evidence, there is a significant amount of opinion that it has been the overly generous policies of the United States, the willingness of the United States to rush in and try to solve every problem that exists in the world with a gigantic resettlement program, the policies of the United States that amount to a recruiting policy that the State Department has followed particularly in Southeast Asia, which have contributed to the large flow of refugees that still exist in various parts of the world.

The problem of refugees is an international problem. If it is ever going to be solved it will be solved by international actions and not the action of any one country.

But, the fundamental fact is that: Of course, the United States can no longer take all who want to come.

I hope the Senate of the United States will face up to that during the debate and will decide that that being the case we ought to determine ourselves what the number ought to be and how we go about selecting that number.

In recent years, the immigration flow into this country has been determined more by Fidel Castro than it has by the Senate of the United States. It has been determined more by the despots in Southeast Asia than it has by the Senate or the President of the United States.

The question is, Are we willing to surrender that part of our sovereignty? Are we willing to say that this country has no right to control its borders, has no right to determine who comes and how many and under what conditions?

I do not think the American people want us to adopt that kind of policy. So we will have an opportunity during the course of these discussions to address head on the question of whether the Congress of the United States will make the determination or whether we will leave it to someone else and sit almost hopelessly by while more and more numbers come to our shores without our approval, without our consideration.

One of the great problems we have had over the years, of course, is that we always dealt with those problems

on an ad hoc basis. There is always a tremendous amount, a lot more, of emotion connected with the issue than there has been logic or commonsense, and we have always waited until we are in the middle of a crisis before we get very concerned about it. You cannot write immigration policy and refugee policy when thousands of people are approaching our shores in leaky boats or when a great exodus has already begun. Now is the time to put in place the kind of mechanism that will enable us to deal with the situations we are confronted with in the future.

Former Secretary of State Al Haig, looking over the situation that now exists in Central and South America, commented some time ago that what we are likely to see in the near future as far as immigrants coming into this country from that part of the world, will make the Mariel boatlift from Cuba look like a Sunday picnic.

So it is a serious matter, and it is one that ought to be approached in a serious and thoughtful way.

I feel confident that before we finish deliberation on this bill we will have an opportunity to give it the consideration it deserves.

Again I thank the sponsors of this bill for getting us to this point where we can consider these important issues. I think if we do not now enact the kind of legislation the people of the United States expect us to we may not be able to avoid a backlash throughout the country that could permanently endanger the best motives of many in this country who want us to continue to be the most generous country in the world as far as immigration policy is concerned.

I thank the Chair.

(Mr. HUMPHREY assumed the Chair.)

Mr. CHILES. Mr. President, I am delighted that today the Senate begins its consideration of S. 2222, a bill to reform our immigration laws and policies.

The need to act is clear. We know that our immigration laws have not been examined in any comprehensive way in years. We know the events of recent years have underscored the shortcomings of our current laws. We know that both legal and illegal immigration are at unprecedented levels. Our current laws set a cap of 270,000 a year. However, over 800,000 people legally immigrated into the United States in 1980, and over 600,000 in 1979.

While legal immigration is a serious problem, illegal immigration presents an even more serious problem. It is estimated that there are between 3.5 million and 6 million illegal immigrants in the United States.

The very fact that we have that kind of a variant is indicative of the kind of problems we have. We know that was

the estimate that was made in 1978. Goodness knows how much it has risen in the last 4 years, or how much it will continue to rise unless we reform our policies. In fact, the reports of the Judiciary Committee indicate that the immigration, legal and illegal, is now amounting to 30 to 50 percent of the annual population growth in the United States. Those figures show us that our present immigration policy is, in fact, not a policy at all. As a result of today's absence of policy, the United States, for all of its power and richness as a nation is unable to control one of the most fundamental aspects of national sovereignty, the ability to control our borders.

Mr. President, the issues, serious as they are, remain an abstract concern to many of the citizens of this country. They read about the Haitian situation in Florida; they have seen pictures of the Mariel boatlift; they have seen pictures of the boat people from Cambodia; they come across some news about immigration from Mexico and Latin America. But, by a large, their daily lives have not been affected by the immigration crisis that the country is facing.

That is not the case, Mr. President, with the people in my home State of Florida. Floridians have felt and, more importantly, continue to feel the impact of uncontrolled immigration which our present laws have created.

First, Florida had to contend with the Mariel boatlift, and the absence of U.S. policy which enabled Castro to force us to accept inmates of his prisons and mental institutions along with those fleeing his oppressive regime. Florida's State and local officials were left with the responsibility for thousands of people who needed food, shelter, medical care and education.

Our absence of policy ended up turning Cuban criminals loose onto the streets. Violent crime in Florida has skyrocketed. Miami has become the murder capital of the Nation, and Florida has 6 of the top 10 criminal cities in the country.

At the same time, we see thousands of Haitians and people from other countries beginning to land illegally on Florida shores. Once again the people of Florida have had to pay more than their share to provide for this new wave of entrants. The Federal Government stood idly by and did little or nothing to stop the flow of people. The Immigration and Naturalization Office of Florida was overwhelmed. Backlogs of literally thousands of immigration cases appeared overnight. A holding facility for newly arrived aliens was set up at an abandoned military base called Krome North.

The conditions at Krome were horrible. There was overcrowding, lack of

proper sanitation, and the real threat of the outbreak of diseases within the compound and throughout south Florida. That led the State of Florida to file suit against the Federal Government. I supported that lawsuit and encouraged the Governor to file it. In fact, I later introduced an amendment in the Senate to relieve the overcrowding at Krome and the threat it posed to the health and safety of south Florida.

In any case, it became clear to the people of south Florida that the Federal Government simply did not care about its problems. The irony, of course, Mr. President, is that the State of Florida was powerless to do anything about it. Immigration is a Federal responsibility. The Federal Government had failed to meet its responsibility in the first instance and then continued to fail to meet its responsibility.

For those of us who represent Florida here in the Congress, it was a time of tremendous frustration. We attempted, Democrat and Republican, Senator and Congressman alike, to get the Federal Government to recognize its responsibility to deal with this problem and to put policies into place that would assure that the problem would not occur again. All too often, though, what I heard was that, "LAWTON, this is a local problem. You all ought to take care of it. It is not the problem of the Federal Government."

Fortunately, however, we were able to get some help for Florida. Last fall, the administration established a policy of interdiction, turning back boats filled with aliens before they reached our shores. That was a move which all Floridians had called on the Government to take and its success was immediate. From the days of last summer, when 400 to 500 persons landed on Florida shores each week, the flow has been cut to a mere trickle.

Eventually, the Government opened a new processing center for illegal entrants in Puerto Rico and, under our prodding, the conditions at Krome were improved.

Last year, in order to assure that such crises would not occur again, I joined with Senator HUDDLESTON in introducing an immigration reform proposal, S. 776. That bill called for streamlining our appeals procedures and for closing the loopholes in the annual immigration ceiling and for doing something about illegal jobs, the magnet which attracts illegal migrants to the United States.

Nevertheless, despite these few bright spots, the problems facing Florida are far from being solved. Every attempt to get Federal reimbursement for costs incurred in providing for the refugees has been a major struggle and Florida has been forced to bear

many costs which the Federal Government should have carried.

Every time we passed a bill or received some aid, we found OMB or some agency trying to take that money away, or to put tremendous burdens on the State, or delaying the payments owed to the State. Little has been done about the backlog of some 17,000 asylum cases now pending in Florida. Some of the Haitians who came here last summer have been held in the Krome Detention Center for over a year pending the outcome of their applications for asylum.

It is not surprising, given the lack of policy and direction in today's immigration laws, that the Haitian issue ended up being decided in the courts. Homicide remains the major cause of death among Mariel refugees. Dade County is facing a critical shortage of jail space due to the 500 Mariel refugees who are being held there for crimes they committed in Florida. Those 500 have averaged over two felony arrests each in the 2 years they have been here. As a result of this overcrowding, Dade County is now under a court order to improve the conditions in its jails, but, at the same time, it has no money to do so.

Mr. President, the picture I paint is not a pretty one. I recognize that there has been some improvement and some positive steps taken, but serious problems remain. More importantly, the people of Florida feel, and rightfully so, that there is nothing to prevent the immigration crisis that they faced in the past from happening again in the future. They know that our laws do not work and they believe, with good reason, that the Federal Government's help is usually too little and too late.

Nevertheless, the people from Florida from all walks of life have worked together to try to seek solutions to these problems on an individual level. But there are limits to what individuals and States and localities can do when they are dealing with a problem that is the exclusive responsibility of the Federal Government. For that reason, they have come here to Washington to make their voices heard and to press for solutions both of the problems facing Florida and to our national immigration problem.

Earlier this year, a half dozen housewives from Miami came here with a petition signed by over 25,000 south Florida residents. The petition which these women had carried from door to door throughout south Florida called for immediate action on immigration reform legislation. The people of Florida have shown their hospitality. They have shown their compassion throughout this ordeal. Going back to 1960, when we had the first Cuban exodus, the people of Florida opened their doors, welcomed the people, and helped them assimilate into this coun-

try. But as long as the hopelessness of our present policy, or lack of policy, continues to exist, they will also show the tensions and the despair that go hand in hand with feeling that their Government has abandoned them.

I speak for all of them when I say that it is imperative that Congress act to put into place a new set of immigration policies that will enable the United States to control immigration.

To some extent, the fact that the bill is before us today is a tribute to the persistence of Floridians. Their voices are finally being heard. But it is also a tribute to the leadership, the will, and the determination of the Senator from Wyoming (Mr. SIMPSON) and the members of his subcommittee. I want to congratulate him and each of the members of the subcommittee for the work that they have done.

As I said earlier, immigration is an abstract problem to most Americans. The issues of immigration are not easy. They are certainly not very sexy. I am certain that immigration is not the hottest issue in Wyoming. But the Senator has managed to raise the public's attention and educate the public as to the nature of the immigration problems facing us. Moreover, he has conducted a comprehensive set of hearings on all aspects of the problem, and he has produced a bill which seeks to fairly address the concerns of all persons interested in this issue. He has kept the debate on a substantive level, and he has brought a well-thought-out proposal to the Senate floor. My hat is off to the Senator from Wyoming, and I congratulate him on his efforts.

The provisions of S. 2222 reflect the careful study and care which Senator SIMPSON has brought to the immigration issue. I would like to make a few comments on the bill itself. The most important reform it makes is the way that it deals with the question of illegal jobs.

The problem caused by illegal jobs cannot be overstated. It is estimated that there are as many as 6 million illegal aliens in the United States. Just last week 10.8 million Americans were unemployed. The Congressional Budget Office estimates that each unemployed worker costs \$7,000 in unemployment and welfare benefits. If only 1 percent of the jobs that are held by illegal aliens were held by unemployed Americans, the cost of unemployment could be reduced by over \$400 million. It is likely that much more than 1 percent of the illegal aliens work in jobs that unemployed Americans would be delighted to fill.

Mr. RANDOLPH. Will the able Senator from Florida (Mr. CHILES) yield?

Mr. CHILES. I yield.

Mr. RANDOLPH. Mr. President, the Senator speaks of the unemployment in this country. It is approximately 10 percent in West Virginia, with thou-

sands of steelworkers and aluminum workers unemployed. In a cross-section of our State, regardless of where it is, we are hit heavily by unemployment. The only reason I mention unemployment there is because we are perhaps the fourth or fifth State in unemployment figures, compared with other States.

It is estimated that there are more than 10,000 illegal aliens working in the District of Columbia. Does the Senator believe that is a high, low, or medium figure?

Mr. CHILES. I would say to the distinguished Senator from West Virginia that there is no way of knowing. I would not say that it is high. I think that it might be a median figure or maybe lower. I would not guess that it is high, given the fact that we have no control over the situation today.

Mr. RANDOLPH. I believe the estimate that I have mentioned has validity to it, and I wanted to have it made a part of the RECORD. I thank the Senator.

Mr. CHILES. Displacement of American workers is just one of the costs of illegal immigration. Illegal aliens exist as a subclass within our society. They are beyond the obligations and protections of our laws. The Supreme Court recently decided that illegal aliens have a constitutional right to a free public education. At this point, it is uncertain what the impact of that ruling is going to be on other benefits, but it is clear that illegal immigration is a costly burden to the American economy and the taxpayers.

Illegal aliens have come to the United States for one reason. That is to work. As long as they are able to find employment in the United States, they are going to send word back to others to join them, and the others are going to come as long as they can get those jobs.

We can try to solve that problem by increasing the border patrol, but with thousands of miles of border, there is no way that we will ever be able to provide enough border patrols, enough guards, enough fence, enough boats, enough dogs to thoroughly police the border. Thousands of people will enter the United States illegally each year, and many of them will succeed.

Mr. RANDOLPH. Will my colleague yield again?

Mr. CHILES. I yield.

Mr. RANDOLPH. If the illegal aliens within the United States that the Senator mentioned are working here in very, very large numbers in every State, in the larger cities, is it not also illegal for those citizens of the United States who are the owners of these businesses to hire these people?

Mr. CHILES. It should be, but it is not.

Mr. RANDOLPH. I thank the Senator.

Mr. CHILES. S. 2222 takes a direct approach and, I believe, the proper approach to curbing illegal immigration. It attempts to eliminate the magnet which draws the illegal aliens to the United States, the magnet of illegal American jobs. Quite simply, it closes the loophole in our present laws and makes it a crime for an employer to knowingly hire an illegal alien. I believe this prohibition is the key to controlling illegal immigration. Unless we remove the incentive that brings illegal aliens to the United States, other attempts to solve the problem are going to be futile.

S. 2222 calls for the Justice Department to develop a secure worker verification system that cannot be easily counterfeited. The system is necessary to make the prohibitions against employing illegal aliens enforceable. It will protect employers from inadvertently hiring an illegal alien. At the same time, it will provide a method for identifying an employer who intentionally violates the law. The verification system will also protect American workers from discriminatory hiring practices by placing the same documentary requirements on everyone.

In order for the system to be effective, it must be designed to encourage the cooperation of the business community. In addition to being secure against fraud, it has to be efficient and easy to use. It should minimize the paperwork requirements and expense to employers.

Prohibitions against hiring illegal aliens, coupled with an effective worker verification system, will go to the source of our illegal immigration problem and give us a method for controlling it.

The alternative is to do nothing and to allow the current situation to continue, unchecked.

Another equally important provision is the reform of the asylum process. Our laws currently guarantee that the United States will provide asylum to any alien who is in the United States and who can prove that he has a well-founded fear of political persecution if he returns to his homeland.

In the past we had relatively few aliens who requested asylum. Just 4 years ago, as few as 5,000 requests for asylum were pending with the Immigration and Naturalization Service.

Today the backlog of pending asylum cases is over 105,000. That may seem like an abstract number to some people, but I assure you it is not an abstract number to the people of Florida, where 200,000 Cubans and Haitians seeking political asylum entered the United States. There are currently 17,000 cases pending in Florida alone. Many of those cases have been pending since 1979.

Unfortunately, when the current law was written, Congress did not account for the possibility that the United

States would be a country of first asylum.

When we were changing the law in 1980, we envisioned, that the people would go from Cambodia to Thailand, or that they would go from one country to another, but that they would be set up in camps outside of the United States. We could then screen the refugees and determine who should be admitted to this country.

We did not know that the boats were going to land on our shores. Yet, during the Haitian influx, there were 400 to 500 refugees landing on Florida's beaches daily.

Now each one of them gets a case-by-case determination for their status. And now, under the court decisions, they have said that they can avail themselves to every right that a citizen has to use our courts. You can tie that process up forever. We are right back to where we were talking about habeas corpus. You can never have finality in the cases.

Some asylum cases have been pending since 1979. They are not near completion. If we do not do something to close off the process of allowing the alien to have all the constitutional rights of a citizen, then, again, we might as well admit that we have given up the game, we might as well get ready for the deluge of people who are going to come because that word is beginning to go out.

The word is going out that the Texas case says we now provide educational benefits to all illegal alien children. The word is now going out from the Spellman case that we cannot hold an illegal alien, we cannot detain them while they are seeking to determine their status.

So if we cannot hold them and if we have to give their kids educational rights, we have no reason to really claim that we are solvent, we have no reason to claim that we can have a border or any checkpoints, and we can invite everyone to come into this country.

As the epitome of a free and democratic Republic, the United States has a great responsibility to provide refuge to those who are fleeing persecution. But we cannot, and should not, accept every alien who arrives in the United States and makes a claim for asylum simply because he is here and wants a better life. If we are going to do that, let us just say that that is our policy. We might as well. Then everybody can come.

The legal definition of a refugee is very narrow. It needs to be reserved to those who are truly victims of persecution.

If we are going to grant asylum to refugees, we must have an efficient and equitable system for deciding who qualifies. To do less is a disservice to all those who apply, whether they are

eligible or not, as well as to the people of this country.

S. 2222 will expedite the asylum process by giving immigration officers the authority to summarily exclude undocumented aliens who do not appear to have a legitimate basis for making an asylum claim. Only those who express fear at returning to their homeland or who specifically request political asylum or would be admitted to the United States. They will receive a hearing before an immigration judge, who will be specifically trained to hear asylum cases. There will only be on appeal available to a newly created, independent immigration board, outside of the immigration and naturalization service. Asylum decisions would not be subject to judicial review.

I support this provision of S. 2222. It will put us in a much stronger enforcement position in the event of another mass migration. Had the system been in place 2 years ago, we could have avoided many of the administrative delays that characterized the Cuban/Haitian crisis.

Finally, Mr. President, I am pleased that S. 2222 requires a new annual immigration ceiling that includes immediate relatives of U.S. citizens. Immediate relatives of American citizens is one of the fastest growing immigration categories. Between 1976 and 1980, the number of immediate relatives increased 40 percent from 114,000 to 152,000. Yet this significant source of immigration into the United States is not counted against our annual immigration quota. This gives us an unrealistic impression of the number of aliens who are being admitted to the United States each year. Our immigration cap is 270,000 but the number of legal immigrants who actually enter the United States each year is over 400,000 refugee admissions raise the number of illegal immigrants to nearly 600,000 in an average year.

I believe that the United States should be able to decide in advance exactly how many new residents we will accept each year from foreign nations. Family reunification should be one of the primary objectives of our immigration policies. S. 2222 retains that objective by allowing for unlimited entry of immediate family members of U.S. citizens but it requires that those family members be counted against our annual immigration ceiling.

Mr. President, I believe that S. 2222 is a good bill that will make many improvements in our immigration laws. It will close some of the most glaring loopholes in our current laws and holds the promise of restoring order to our chaotic immigration policies, but I believe the bill could be strengthened to make it even more effective. I would like to take the opportunity today to mention ways in which I believe the bill could be made even more effective.

My first concern is with the failure to include refugees in the immigration ceiling. When Senator HUDDLESTON offers his amendment to include refugees in the cap, I will have some further remarks on this issue. At this point, it is worth noting that our immigration laws are among the most generous in the world. The United States accepts more immigrants and refugees than any other nation. In fact, we accept more than all the other nations put together. But if we are to provide jobs and a healthy economy for the people who are already here, we must place limits on that generosity. If we accept the premise that we need a ceiling on immigration, then it seems to me that all aliens who come to the United States, with the intention of staying should be included in the ceiling, regardless of whether they come to reunite with their families, to work, or to escape persecution. The failure to include refugees in the annual immigration cap is a serious omission in the bill which will perpetuate one of the loopholes in legal immigration policies today. I hope that we will act to correct this problem in the bill.

I am also concerned that S. 2222 does not provide adequate safeguards against the kind of immigration emergency that we experienced in Florida. We need to have a contingency plan in place which outlines exactly what steps the Federal Government will take in the event of another immigration emergency.

The reforms that S. 2222 calls for in the asylum procedures will greatly enhance our ability to control an immigration emergency, but those reforms do not go far enough. I feel strongly that we need to address the issue of the Federal Government's responsibility for averting another immigration crisis and that we must clarify the President's authority to act to prevent another massive, uncontrolled influx of aliens within the context of this bill.

In conclusion, Mr. President, again I commend Senator SIMPSON, Senator KENNEDY, and all of the members of the subcommittee for their efforts to bring about comprehensive reform of our immigration laws. This is a monumental task and I believe that S. 2222 is an admirable legislative package. It gives us an opportunity to eliminate the growing problems in our immigration laws, and to restore the United States to a position in which we, not other governments, or the people of other nations, control immigration to this country. I hope that the Senate will use this opportunity to close all of the loopholes in our immigration laws and to pass a strong, comprehensive immigration reform bill.

Mrs. HAWKINS. Will the Senator yield?

Mr. CHILES. I yield to my colleague.

Mrs. HAWKINS. Mr. President, I join my colleague from Florida in commending Senator SIMPSON and his fine staff for their dedication to the issue of immigration reform. While we disagree in several important respects on what should and should not be included in this bill, there is no question in my mind that the distinguished Senator from Wyoming deserves much credit for keeping this important issue alive and on the minds of Congress and the Nation. I do believe that before we proceed, we should outline the serious omissions in the bill before us today.

Our State of Florida, as the senior Senator has so ably outlined, has been seriously affected by an immigration policy that has lost its sense of direction and purpose. Nothing is more important to Florida than a purposeful, useful, and appropriate immigration bill. In a poll taken last week by the major newspapers across our State, immigration was the second highest issue of concern to Floridians. The health of the economy was No. 1, immigration No. 2, and crime No. 3, even though, as my colleague has stated, 6 of the top 11 cities with the highest crime rates are in our State. Immigration is now the No. 2 concern in the minds of our citizens.

To put it bluntly, however, Mr. President, this bill unfortunately does not deal with the most serious immigration problems we are experiencing in Florida today. What the bill does not include is my foremost concern.

Conspicuously absent from this legislation is a provision to protect States and cities in the event of an influx of undocumented aliens encouraged by a hostile foreign power. This kind of legislation is critical to a comprehensive immigration bill. During a period of 5 months in 1980, south Florida was inundated with 125,000 Cubans.

During that same year and in subsequent years, thousands of Haitians succeeded in reaching the shores of Florida. In Dade County alone, 1 out of every 18 people is now an undocumented Cuban or Haitian. The cost of Florida's good faith and good will has been tremendous. Florida's taxpayers have spent over \$150 million to help these aliens adjust to American society. This expense does not include the sacrifices made by the members of the community because of strains placed on local fire and police services, local governments, and courts.

Many of the people of Florida are rightly frustrated and downright angry because, although they have no control over our immigration or foreign policy, they are expected to support undocumented aliens invited by the Federal Government. The Federal Government has always been a gracious and benevolent host, offering food, housing, and medicine to foreign

guests who have suffered what we have never known: Religious and political persecution. I take no issue with the generosity of the Federal Government. All I ask is that someone other than Floridians foot the bill.

This bill contains no guarantee that the Federal Government will pay for its guests. In my opinion, this is a grave omission.

Senator SIMPSON has stated that this is related to the idea of immigration emergency powers. Senator SIMPSON is very sympathetic to my problem and to Florida's problem, and we have had many discussions on it. The Senator believes it would be better to hold separate hearings on the subject and to deal with it separately from the rest of the immigration issue.

I am open to that suggestion. However, I am convinced that unless we deal with this issue now, when we are dealing with all other major immigration problems, the time will come when we are once again inundated by undocumented aliens—with still no protection from the Government.

Another omission from this bill is the question of emergency powers. Senator CHILES has said quite a bit about emergency powers in his remarks, and I concur with everything he said. I have great confidence that should another immigration emergency like the 1980 Mariel boat lift occur, the Reagan administration would act promptly and decisively to deal with the situation. There are a range of actions an administration could take, under current law, to deal with an immigration emergency. I do believe there is a need significantly to expand those powers to give an administration greater control over such an emergency. We should actively support efforts to bring up this issue. I feel we ought to debate it, and we ought to talk about it. It may not receive the support that it needs, but I would like to emphasize that this is still a tremendous problem in Florida.

Everyday we have a line of immigrants, four deep, surrounding the INS building in Miami. You have to get in line by 4 a.m. in Miami just to get a card to walk inside. Immigrants have to sell the spots in the line simply to get in to talk to someone inside the immigration building.

That is a constant problem. It is one I saw again last week when I was there.

A final serious problem with this legislation concerns the amnesty provisions. Amnesty seems to me a very shortsighted way of dealing with our immigration problems. Indeed, it appears to me to guarantee that there will be even more illegal immigration. What it suggests to those who propose to come to this country illegally is this: If they can hide out long enough until more illegal aliens arrive, then another amnesty will be granted. It

perpetuates a vicious circle. If the United States once ignored its immigration laws and welcomed illegal aliens into its society, then it surely will do so again. Amnesty rewards law-breaking. It makes a mockery of American law. It will perpetuate the very immorality and lack of ethics that it seeks to end.

Who pays for amnesty? It is an expensive process. The cost to American taxpayers for the amnesty program is expected to run into billions of dollars in social services and welfare benefits. These costs will not be borne by the Federal Government alone. State and local governments will groan under the burden as well.

The entire idea of amnesty must be carefully rethought, and I will support efforts to restructure the amnesty provision into a more acceptable form. The bill as it stands now seems to ignore concerns of great importance to Floridians. I hope that the Senate will give careful consideration to the concerns I have mentioned. We must pass immigration legislation that meets the needs of all areas of the country.

In no way do I want to take away from the thoughtful, careful, and thorough work of those members of the Immigration Committee, including Senators SIMPSON, GRASSLEY, KENNEDY, and others. They have held meetings throughout the United States and have spent a great number of hours of work on this new immigration bill. It is a beginning tool for reformation of our immigration problems. I commend those who have worked on it. Florida simply asks you to consider the items that I mentioned—to find some way to assure Floridians that never again will they be called upon to bear such a financial burden as well as dangerous health problems and overcrowding.

I daresay there is not a community in the United States that could have accepted as many new people in such a short period of time with as much peace and harmony as did Dade County, Fla. Its residents are to be commended. They are still struggling and still making accommodations because of the great influx. I want to pay tribute to the citizens of Florida who have had to accept these invited and uninvited guests to our shores. All we ask is that there be some concern for the thoughts that are still uppermost on the minds of Floridians today as we take up this most important bill.

Mr. KENNEDY. Will the Senator from Florida yield?

Mrs. HAWKINS. Yes.

Mr. KENNEDY. I welcome the statements that have been made by both Senators from Florida on this extremely difficult issue for Florida. I was one that was sharply critical of the efforts undertaken by our Government in 1980, where we vacillated the policy between opening our shores and closing our shores to Cubans, and

failed to utilize the international machinery which is available and which President Ford used in 1975 during the Vietnam refugee crisis—actually, a diplomacy which was worked out even under President Johnson with Cuba in 1965 which resulted in a negotiation and an orderly movement of some individuals and reunification of families, in which the voluntary agencies were very much involved and which was an orderly and humane process.

The statements that have been made by both of the Senators from Florida I think are important to this dialog. I have voted in support of assistance to local communities in the past, I want to give the assurance that I will contribute every bit of help and assistance I can in the future to Florida and other States and communities who are bearing that particular burden.

Mrs. HAWKINS. I thank the Senator.

The PRESIDING OFFICER. The Senator from Wyoming.

Mr. SIMPSON. Mr. President, I share the observations of the Senator from Massachusetts, and indeed in our discussions and as we worked together with the refugee resettlement issues and the Refugee Act of 1980, we did not consider this simply a Florida issue. It is a national issue. I pledge, win, lose, or draw with regard to this effort, that we will receive the President's emergency powers provisions. They are in the final draft. There are administrative procedures now in place which would take care, we are advised, of the Mariel Harbor situation. But I pledge that regardless of what may occur with this legislation, or any other aspect of the refugee settlement reauthorization, we will have in the subcommittee the receipt of the legislation, hearings on the legislation and markup on the legislation prior to the election day recess. That is a pledge of the chairman of the subcommittee.

I believe we are now ready to proceed with amendments to the legislation.

Mr. RANDOLPH addressed the Chair.

Mr. SIMPSON. I am sorry. I yield to Senator RANDOLPH.

Mr. RANDOLPH. Will the Senator yield to me? I will speak just very briefly.

Mr. SIMPSON. I will certainly yield to the Senator from West Virginia.

Mr. RANDOLPH. Mr. President, I commend all the members of the Senate committee as they bring to this forum S. 2222.

There will be times during the discussion when this Senator from West Virginia, now speaking, and others may actively support amendments that will be offered. I ask at this time, if I may be permitted, not as one who

has been in the hearings or who has gone through the process of intensive study, but as a concerned Senator among the 100 Senators, whether I may be listed as a cosponsor of S. 2222. I ask unanimous consent, Mr. President, to be so listed.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SIMPSON. Mr. President, I thank the Senator from West Virginia, one of the most gracious men in this Chamber, who was chairman of the first committee I served on in this body and who has been very attentive, helpful, and supportive in almost all the things I have been involved in. I deeply appreciate his asking to be a cosponsor of this measure.

Mr. RANDOLPH. Mr. President, I am grateful for the Senator's words.

I had the pleasure of serving with ALAN's father. I am going to use his name now, and it can be stricken from the RECORD later, if that is the proper procedure. There are Members of the Senate who do not know that ALAN SIMPSON's father was a Member of this body for several years. The Senate changes in membership. New Members come and sometimes, understandably, do not know those Members who were here 10 or 20 years before.

So, when a father is succeeded here by his son, both constructive Senators, I wish to have that made part of my tribute, not only to the son but to the father as well.

I am delighted to know that the father is going to be celebrating a very wonderful occasion in Casper, Wyo., in a very few days. I wish I might be there with those friends who will salute him on that occasion.

Mr. President, it may seem that I go back too far, but I quote from the Farewell Address of George Washington. It was never spoken; it was written. In that address, our first President of the United States said these words:

Citizens by birth or choice of a common country, that country has a right to concentrate your affections.

The word affection was used at that time perhaps more than now, but the word meant commitment. Washington spoke of commitment to a country—a country, of course, that was going to be peopled by native and naturalized citizens.

So, today, although this bill may not appear to have the national attention or impact that other measures have had in the past few days here, there perhaps is no more vital and crucial subject matter to be discussed and decided in the Senate than what we are now beginning.

So I commend not only the Senator from Wyoming (Mr. SIMPSON) but also the Senator from Massachusetts (Mr. KENNEDY) and all those who have given painstaking study to this problem. I thank especially Senator SIMP-

son, whom I have come to know, to respect, and to honor.

Mr. President, S. 2222, the Immigration Reform and Control Act is an urgently needed measure. The problems of uncontrolled immigration and illegal aliens are of great concern to citizens throughout our Nation. We are not unsympathetic to the plight of people who wish to come to this country and we will continue to be generous under S. 2222; but, we must as a nation secure control of our destiny.

The number of illegal immigrants residing in the United States is estimated at 3.5 to 6 million, and some experts have estimated a net growth of 500,000 new illegal immigrants per year. Current law cannot contain this problem because it is legal to employ aliens who are in the United States illegally. The major reason for illegal immigration is the prospect of employment in this country. Merely increasing levels of existing enforcement is unrealistic.

The procedure for granting political asylum to refugees reaching our shores is not working. It is increasingly used by immigrants seeking procedural delays to remain and work in the United States. There are currently five levels of appeals on asylum cases, which can take years to complete. In 1979, there were approximately 4,000 asylum cases pending; currently there are over 105,000 backlogged in various states of adjudication.

Finally, our programs for the admission of legal immigrants and temporary workers must be refined.

S. 2222 makes substantial progress toward resolving these problems. It contains provisions to prohibit the hiring of illegal aliens and imposes sanctions against employers who knowingly employ such persons.

It establishes a streamlined system to handle asylum cases and the cases of persons who attempt to enter this country with or without documentation.

S. 2222 also sets an annual ceiling on legal admissions to the United States of 425,000 per year. Unfortunately, this ceiling does not include refugees. In this regard, I am cosponsoring an amendment to bring refugees under this ceiling. This amendment is sponsored by the very able Senator from Kentucky (Mr. HUDDLESTON) who has been a knowledgeable and active student in this field.

There may be other amendments to S. 2222 that I will support. However, this is a sound and reasonable measure and it is my sincere hope that the Senate will act affirmatively.

Mr. DOLE. Mr. President, the challenge presented to our Nation of immigrants as we attempt to assimilate hundreds of thousands of new entrants has caused us to question the vitality of our world reputation as a safe harbor and land of freedom and opportunity for the oppressed and

homeless. It is a tribute to our free land and its citizens who extend their blessings to today's immigrants and refugees, that we continue to find strength in our ethnic and racial diversity as the globe's melting pot.

The economic, religious, and political freedom and opportunity sought by our ancestors is as strong a magnet today as it was in the early 19th century when waves of immigrants began to reach our shores. We must not forget that as we open our gate to the world, we invest in the future of our country, welcoming the many hard working and hopeful newcomers, most of whom develop strong community and patriotic ties and contribute to our Nation's strength.

The spirit of compassion that has marked our dealings with those who seek new roots here by staking their futures in our land is viewed by some as having been strained by the sheer overwhelming numbers of aliens entering our land for political freedom and family reunification.

Senator SIMPSON's characterization of a growing climate of "compassion fatigue" unfortunately describes the dilemma that this distinguished body faces in maintaining a reasonable level of legal immigration and controlling the mounting numbers of illegal aliens settling in the United States. Many, including the Attorney General, have concluded that we have lost control over our borders. Escaping detection, millions of illegal aliens have settled in communities throughout the land.

If the United States is to continue to preserve a stable economic and political sovereignty in the face of the multitudes yearning for freedom and opportunity, we must temper our compassion and generosity for those of other lands with a heartfelt concern for those legally here who must maintain the vitality and strength of our treasured way of life. The immigration laws of our land have developed with a recognition that there must be some reasonable limits to our generous open door policy, limits which can still make us the most welcoming nation in the world.

I support the fundamental values and judgments represented by this legislation. While we must keep the eternal flame at our gate held high, we should recognize that the strength and resilience of our way of life, the very things that attract the world's hopeful, must be weighed as we mold our Nation's immigration course for decades to come. Our immigration policy must be flexible and realistic enough to respond to world economic, population and political pressures that have pushed and pulled millions of migrants across the face of our Earth and have created a large subculture of illegal aliens in our Nation who submit

to social and economic exploitation, often creating social instability.

The Senator from Kansas believes that legalization and sanctions against the hiring of illegal aliens are a realistic and effective means of exercising humanitarian concerns and regaining control over the enforcement of our immigration laws. Many of the millions of cowering illegal aliens, failing to report crime or disease and often subjected to exploitation, have sunk their roots here, and have become contributing community members.

If we expect to effectively enforce our immigration laws we must support stepped-up enforcement and focus on stemming the daily tide of aliens drawn primarily by jobs. The bill's prohibition against knowingly hiring illegal aliens is critical to eliminating the irresistible magnet of economic opportunity that attracts the illegal alien. The fear of apprehension and deportation alone has not deterred enough aliens.

S. 2222 represents a compassionate as well as pragmatic approach to a problem that faces every nation fortunate enough to have been blessed with freedom and opportunity. It is the product of a true bipartisan effort with a solid foundation laid by the findings of the Select Commission on Immigration and Refugee Policy, weeks of joint congressional hearings and the efforts of the administration's task force.

The carefully considered provisions of this omnibus bill represent a comprehensive and propitious vehicle to guide our immigration policy into the next century in the face of unprecedented world migration. It carefully balances the vital concerns for our Nation's economic and political welfare with a long and proud tradition of compassion for those who flee persecution to seek the blessings of our land as did our immigrant ancestors. I urge my colleagues to support Senator SIMPSON's legislation which represents a fundamentally compassionate and pragmatic blueprint for regaining control over immigration problems that must be laid to rest.

DOLE AMENDMENT TO S. 2222

The Senator from Kansas will introduce an amendment to strengthen provisions for the protection of personal information contained in any permanent worker verification system developed to enforce certain immigration laws and to encourage the utilization of available Federal and State identification system resources to avoid the development of a costly and redundant system to detect illegal aliens seeking employment.

Mr. MATTINGLY. Mr. President, my colleague from Wyoming, Senator SIMPSON, has done a masterful job of dealing with some significant and controversial issues inherent in any immigration reform bill. He should be com-

mended for his knowledge, his dedication, and his enthusiasm for tackling this difficult task. The fact that the basic structure of immigration law is changed about once a generation attests to the immense difficulty of this task.

On Tuesday, March 23, I stood on the Senate floor and expressed my support for Senate bill 2222. The United States as a sovereign nation must insure the well-being of its people. While protecting our borders is essential, we have failed miserably to control illegal entry. There are currently between 4 and 6 million illegal aliens in our Nation's work force. This has an enormous negative impact on our own citizens and on the economic condition of our Nation.

The problem of illegal immigration is only one of the problems that we must deal with in this legislation. Under current law, 270,000 immigrants may enter for permanent residence annually. This is in addition to certain relatives of U.S. citizens and refugees designated by the President in consultation with the Congress. In 1980 alone, total immigration, including Cuban and Haitian entrants and Indonesian refugees, was estimated at more than 800,000. The United States admits more of the world's stock of 14 million refugees than any other nation.

Responsible immigration policy must be our goal. History has proven that our country is strong because of the diverse backgrounds of our people. Thirty percent of all U.S. Nobel laureates came to the United States as immigrants. Legal immigrant residents have contributed greatly to the strength of the Nation.

I am sure that the debate on many provisions of S. 2222 will be heated and controversial. I would urge my colleagues to remember that we must act in a manner which will insure that those who currently reside in America and those new Americans that will come to our shores in the future will be protected. As I have said before, Senator SIMPSON's bill, S. 2222, is fair and does not fatigue the compassion of America.

Mr. SIMPSON. Mr. President, I thank the Senator from West Virginia.

I will communicate those remarks to my father, who will be "roasted" in Casper, Wyo., on August 17. His intellect is undiminished, although his physical limitations are severe, and he will be most appreciative of those remarks.

Mr. KENNEDY. Mr. President, I should like to inquire of the manager of the bill as to his reaction to a procedure I will offer at this time for the convenience of the Members of the Senate.

I have three amendments that relate to family reunification. Even though they are independent issues, they obvi-

ously are related to each other in this particular legislative proposal.

I suggest that I be able to offer the amendments *seriatim*, and we could talk about each one. We will have an opportunity ourselves to debate this issue, and we will have an opportunity to exchange our views on those issues. Then I would like to have a rollcall vote on each. I am prepared to vote on them together, for the convenience of the Senate and for the understanding of Senators. It would probably be in their best interests and in the best interests of public policy.

Mr. SIMPSON. Mr. President, the suggestion is a helpful one. We could deal with the amendment of immediate relatives, second preference, and fifth preference. They are all interrelated. We could handle them in that order.

Perhaps we could have 1 hour of debate on those amendments. A half-hour equally divided might do it. I like that suggestion.

Then we could have three rollcall votes of 10 minutes each in a series. I await some negotiation to be assured that that is agreeable to Members on this side of the aisle.

So, if the Senator wishes to proceed with the debate, we will seek an agreement on the three stacked votes a little later.

Mr. KENNEDY. Mr. President, why do we not proceed along that line, in consideration of the amendments, and then we can consider the time for the vote later?

AMENDMENT NO. 1997

(Purpose: To strike out provisions by which the number of available family reunification visas would be reduced by the number of immediate relatives admitted in the previous fiscal year)

Mr. KENNEDY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Massachusetts (Mr. KENNEDY) proposes an amendment numbered 1997.

Mr. KENNEDY. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 121, line 25, strike out "three hundred and fifty thousand" insert in lieu thereof "two hundred and fifty thousand".

On page 122, beginning on line 1 with "(i)", strike out all through "residence," on line 5.

On page 122, line 6, strike out "(ii)" and insert in lieu thereof "(i)".

On page 122, line 8, strike out "such".

On page 122, line 9, strike out "(iii)" and insert in lieu thereof "(ii)".

On page 122, line 11, strike out "(iv)" and insert in lieu thereof "(iii)".

On page 124, lines 12 and 13, strike out "immediate relatives specified in section 201(b)."

On page 124, line 15, strike out "such".

On page 130, lines 19 and 20, strike out "immediate relatives specified in section 201(b)."

Mr. KENNEDY. Mr. President, what this amendment does is recognize that throughout our history we have considered it a basic right of an American citizen to bring his or her spouse and child without regard to ceilings and limitations, and I see no reason why we should abandon this principle now.

Mr. President, I believe the pending legislation takes a major step away from our Nation's historic commitment to the reunification of families as the fundamental objective of our immigration laws. For the first time in our history, this bill places an annual ceiling on all legal immigration—except for refugees. The spouses and children of American citizens will not come under a ceiling. Although they are given the highest priority and are assured of admission, their admission could come at the expense of other family reunification preferences.

Unless my amendment is adopted, we will seriously penalize the admission of families under the established preferences, creating backlogs where none exist, and making existing backlogs even longer.

Mr. President, the administration has indicated it supports the objectives of this amendment. In fact, it was contained in the amendments the administration forwarded to the subcommittee during our markup of the bill.

In addition, the Select Commission voted almost unanimously—15 to 1—in support of the provisions of this amendment. Let me read from the Commission's discussion of its recommendation on continuing the present system where some immigrants are numerically limited but certain others—such as immediate relatives—are exempt:

Proposals have been made to the Commission which maintain that regardless of what number is set, all immigrants and refugees should be admitted under a total, fixed ceiling, with adjustments made within the immigrant categories as a result of any fluctuations in the number of refugee admissions each year. While attracted by the fact that a firm ceiling on total numbers of immigrants would facilitate planning, the Commission, nevertheless, concludes that the present system—under which a varying number of refugees may be admitted subject to Presidential/congressional consultation, and the immediate relatives of U.S. citizens and certain special immigrants are admitted outside of any numerical limitation—provides the proper flexibility to meet U.S. needs. Therefore, while favoring numerical limits on most groups of immigrants, the Commission recommends that, to allow for flexibility in refugee, immediate relative and special immigrant admissions, total U.S. immigrant and refugee admissions be subject to no total cap or ceiling.

Mr. President, I hope that this amendment will be accepted and I also point out again that it is consistent with the administration's position. When the administration testified before the subcommittee, for the reasons that I have mentioned and that is primarily the reunification of families, they had an identical position.

Mr. SIMPSON. Mr. President, right off the bat, we come to one of the critical issues that have to do with the title of the bill and that is control, and that is where we are with this amendment. Immediate relatives of U.S. citizens is the designation.

Now immediate relatives of U.S. citizens are not presently subject to any numerical limitation under our law.

Under S. 2222, they are not subject to any numerical limitation under our law but here is the condition: The bill does require, in effect, that if the number of immediate relatives increases, then offsetting reductions will be required in numerically limited family reunification categories.

The State Department has advised us in our previous hearings and debates that immediate relative admissions increase at the rate of 7,000 to 10,000 per year. That number may well increase after some of the newly legalized group—legalization is an important part of this bill—are naturalized. Presently 155,000 immediate relatives are admitted each year. It is the largest immigrant category and it is neither accounted for nor controlled.

So there are only two ways to achieve control over total legal admission of immigrants. We either impose a cap, and include immediate relatives in that cap, or we require offsetting reductions elsewhere while not restricting immediate relatives.

A U.S. citizen I do not think should be told that he cannot bring in his spouse or minor children. Therefore, we have chosen the second course. Unrestricted admission of immediate relatives with offsetting reductions against the total cap of 425,000.

So that is the essence of the argument in opposition to the amendment of the Senator from Massachusetts. I do oppose it because the amendment would very effectively simply remove the cap and, if there is one thing I sense in the debate at least in the past 2 or 3 years, it is that somewhere in this debate we will place a cap on legal immigration. As unfortunate or fortunate as we may believe that to be, a cap will be set.

So this amendment would effectively remove the cap. It would restore the present situation and it would prevent us from obtaining control over immigration. It is indeed the true opening, the true wedge in the control aspects of the legislation.

So those are our choices. That is why we arrived at this inclusion of im-

mediate relatives, and I conclude my remarks for the moment.

Mr. KENNEDY. Mr. President, I am not opposed to putting caps on particular categories. We did that in the 1965 act. But I think it is important to note, as the Senator from Wyoming has pointed out, this will be the first time in our history where we have done it for immediate relatives, the spouses and children of U.S. citizens, and, as the Senator from Wyoming has rightfully pointed out, if we look at those numbers from 1976 through 1981 they have gone from 114,000 up to 151,000 in 1981. They are estimated to be 155,000 this year, and that is the figure in the bill offered by the Senator from Wyoming.

But as that figure increases and the 425,000 ceiling remains the same, it is going to mean that there will have to be a reduction in other categories.

The other categories relate to the reunification of families too. So we should be under no illusion about what the implication of this ceiling means.

Again, as I stated at the outset, I think on the issue of members of families we should be able to give the assurance to American families that under an immigration law there will be the opportunity for their reunification. And my concern is that, first of all, we have never limited this, and I do not think it is a wise thing to do—but second, I think it should be very clear to Members of this body, if we do not accept this particular amendment, we are deferring and delaying, if not perhaps for all intents and purposes, in some instances eliminating the possibilities of members of families to be reunified.

As I said, I know that the Senator has given this a great deal of thought and attention.

I point out, as I mentioned earlier, that the Select Commission supported this position 15 to 1 and that reflected a wide range of different opinions, both politically, ideologically, and from those who had strong differing views on other provisions of this act.

So that is what the amendment would do and that is the reason that I proposed the amendment.

Mr. SIMPSON. Mr. President, that is a fair resumé of the issue.

I think I would make one statement, that actually we do not place the cap on immediate relatives of U.S. citizens, but I do not want to get into sophistry of meaning. We do say that in this legislation we do not limit immediate relatives but we do indeed, as the Senator points out, then require offsetting reductions in what are other areas of the preference system that have to do with family reunification. But again immediate relatives of U.S. citizens, in the sense of a cap, are not within there, but, of course, those numbers

are offset down in the numerically restricted preference system.

Mr. CHILES. Mr. President, will the Senator yield?

Mr. SIMPSON. Yes; I yield to the Senator from Florida.

Mr. CHILES. It sounds to me as if the thrust of the bill is to say the debate really should be as to what the cap should be. But the whole idea of the cap, as I understand it, is that the people of this country are going to know how many people a year we are going to attempt to assimilate. If we have provisions not covered by that cap, then saying we have a cap is kind of meaningless, just as saying that we have a cap today is meaningless.

The cap today is 270,000. In 1980 we took in 800,000; the year before that, 1979 over 600,000. As we said, only since 1965 did we start having a family preference, and it is a growing thing. All of us support that, but we should recognize that it is growing. To say you are going to have a cap on immigration but that you are not going to cover the family in that cap may produce a situation where the exception will quickly be bigger than your cap. And it might just turn out that way if you really start thinking about it. It is as if you were saying "I only want my land and the land that borders on mine. That is all I want."

Well, it is the same thing. If we are going to allow a preference to everybody who has family, you just geometrically start measuring that. In the end, there is no restraint, unless you have an overall cap.

It would seem to me if we are debating how many people should come into this country, the debate necessarily should come on what the total number should be. But if you exclude the family, and members who come in under the family preference, then there is no way we have made any kind of constraint on what the total number would be.

Mr. BUMPERS. Mr. President, will the Senator from Massachusetts yield for a question?

Mr. KENNEDY. Yes.

Mr. BUMPERS. The Senator from Wyoming has said that while there is no cap on immigration of members of an immediate family of American citizens, there must be some kind of a cap or the Senator would not be offering his amendment. I do not understand that. The Senator from Wyoming has said that what the bill does is it does not limit the members of an immediate family that can come in but it reduces the overall cap of 425,000, is that correct?

Mr. KENNEDY. The Senator is correct.

Mr. BUMPERS. What is the effect of the Senator's amendment then?

Mr. KENNEDY. First of all, historically there never has been a cap on the immediate members of the fami-

lies of U.S. citizens. But what the Senate has done under this legislation is to put an overall figure of 425,000, and put the immediate members of families within that 425,000.

The fact of the matter is there are only 155,000 who are coming now, and they get the first preference, so they will not be adversely affected in and of themselves because of what the historic trends may be because it may go up to 55,000 or go up 10,000 more, to 165,000. Maybe it will be 175,000 in another year. So for all intents and purposes for the next 20 years or so that particular group would never likely reach 425,000.

Once we see that group growing, what it does do is squeeze down the other categories, which are all family reunification categories as well.

Mr. BUMPERS. Does the Senator's amendment merely say there is some kind of a subcelling, is there not, on this first preference group—within 425,000 is there not a subcelling on how many can be members of the immediate family before you start squeezing other groups?

Mr. KENNEDY. The Senator is correct.

Mr. BUMPERS. What is that figure?

Mr. KENNEDY. 270,000.

Mr. BUMPERS. All right.

Is the effect of the Senator's amendment to raise that sublevel limit or to remove the cap?

Mr. KENNEDY. No. We would retain that level, we would retain that 270,000.

Mr. BUMPERS. But you would not squeeze the others.

Mr. KENNEDY. But you would not squeeze the others, that is exactly right. So we would retain the cap. We say, "Look, you say 155,000. All right, we will just take that group out and follow historic precedent and we will leave 270,000 for all the others." But at least we know that that is going to be the level for the future. Even within those categories, there will be some delay in family reunification.

It is not the contention of the Senator from Massachusetts just to eliminate 155,000 and say that is just going to be an open figure for whoever wants to come in here. What we are saying though is with regard to the families, the immediate relatives, they should not be included.

Mr. BUMPERS. Does the Senator have other amendments that do the same thing for other categories?

Mr. KENNEDY. No; the Senator will have two other amendments dealing with the existing second preference and the fifth preference. One deals with spouses and unmarried sons and daughters of permanent resident aliens. Under the Simpson proposal it says the nuclear family ends when you turn 21 years of age, even if they are unmarried sons and daughters that you cannot bring them to the United

States. I think that works a particular hardship on some groups.

Mr. HUDDLESTON. Mr. President, if the Senator will yield, it does not say you cannot bring them to the United States. They are still eligible for immigration under the immigration laws of the land. We are not excluding them by that.

Mr. KENNEDY. You are excluding them for all intents and purposes.

Mr. HUDDLESTON. It does not make it automatic.

Mr. KENNEDY. If we can come back to the second and fifth in just a few minutes and deal with this one here, I think we might argue about that one.

Mr. BUMPERS. Let me ask one final question. We have an overall cap of 425,000 immigrants and refugees; is that correct?

Mr. KENNEDY. The refugees are outside.

Mr. BUMPERS. I guess I am thinking about the Senator from Kentucky's amendment. Refugees are outside of the 425,000.

Mr. KENNEDY. The refugee figure is outside. It is covered by the Refugee Act of 1980, and that has been outside. It has fluctuated from 19,000 in 1977 to 111,000 in 1979, but has basically averaged 50,000 over the past 20 to 30 years.

(Mr. SPECTER assumed the chair.)

Mr. BUMPERS. My question really is a hypothetical one that is certainly not likely to occur in the immediate future. But, under the Senator's amendment, is it conceivable that—the Senator from Wyoming said that there is no limit on how many members of an immediate family can come to the United States, emigrate to the United States. Now, what if the figure could conceivably exceed 425,000? Would that be permissible?

Mr. KENNEDY. Well, if they are immediate relatives, I think it is inconceivable that you would go in excess of 425,000. It is not conceivable to me that it would go in excess of 425,000. But in these other preference categories, we take unmarried adult sons and daughters of U.S. citizens. That is considered an immediate member of the family for the purposes of this definition.

Mr. BUMPERS. My question is: You do have a ceiling of 425,000 in the bill; is that not correct?

Mr. KENNEDY. The Senator is correct.

Mr. BUMPERS. Now, forget the amendment, under the bill—this, I recognize, is a wild assumption and not likely to occur, but just thinking for a moment—if we had 500,000 immediate family members who wanted to come to this country, would that be permissible under the bill?

Mr. KENNEDY. No; the answer would be no. If you had 500,000 wives

and children of U.S. citizens, 75,000 would not be able to come to the United States because of the ceiling.

Mr. BUMPERS. But would 425,000 be eligible?

Mr. KENNEDY. The Senator is correct, 425,000 would be eligible, and that is all.

Mr. BUMPERS. What the Senator does is take the cap off on immediate family to this extent: You say that however many come in under that category, which is first preference, if it exceeds the subcelling level you cannot squeeze the other preferences in because of that excess; is that correct?

Mr. KENNEDY. That would be the effect of the amendment. What I want to do is just follow current law with regard to the immediate families.

Mr. BUMPERS. I thank the Senator.

Mr. SARBANES. Will the Senator yield for a question?

Mr. KENNEDY. Yes.

Mr. SARBANES. As I understand it, at the same time the Senator's amendment would exclude immediate relatives from the count against the overall figure, and it would at the same time lower the overall figure remaining for the other preference categories; is that correct?

Mr. KENNEDY. The Senator is correct.

Mr. SARBANES. And with respect to the other two amendments which the Senator has indicated he intends to offer, which I think involve important concern for the definition of family, I understand the Senator's amendments would count unmarried sons and daughters in the second preference category and unmarried brothers and sisters in the fifth preference category against any figure established for the preference categories; is that correct?

Mr. KENNEDY. The Senator is correct. So that there probably would be some delay, but at least they would be on a faster track system.

Mr. SARBANES. The amendment before us, which goes to the immediate family, as I understand it, is to maintain the existing approach under which that limited group is treated as being outside the preference categories with respect to the numbers; is that correct?

Mr. KENNEDY. The Senator is exactly correct. The history of our immigration laws is that immediate spouses and children of U.S. citizens have never been included in a ceiling. It is 155,000 now, but it is not expected to alter or change dramatically from that figure. But it will obviously go up in the years ahead.

Mr. SARBANES. Am I correct that, under the existing law, to be included in the immediate family category, means first of all the immediate family of an American citizen?

Mr. KENNEDY. The Senator is correct.

Mr. SARBANES. Not a permanent resident. So you must start with an American citizen. The immediate family then runs to the spouse of an American citizen, the children of an American citizen.

Mr. KENNEDY. Minor children.

Mr. SARBANES. The minor children of an American citizen and the parents of an American citizen; is that correct?

Mr. KENNEDY. That is correct.

Mr. HART. Mr. President, at some point in time, would the Senator from Wyoming or the Senator from Massachusetts yield me 3 minutes just for a general statement on the bill?

Mr. SIMPSON. I certainly will yield. Let me just respond to the inquiries of the Senator from Arkansas and the Senator from Maryland, then I will propose a unanimous-consent request and then I will slice out 3 minutes for the Senator from Colorado.

This is a very difficult issue of comprehension. I know, because I have been dabbling around in it for 3½ years. But let me say that there is no limit on immediate relatives in the United States right now. And there will be none in this bill.

I do not want it to be read that we are capping immediate relatives—we are not. We are, however, saying that that issue then, when we impose a cap, which we do in this bill of 425,000, and we include in that cap immediate relatives, we are not saying how many may come. Maybe 150,000 will come. But whatever the number is that comes, there will be a reduction in other preference categories down the list.

So I think that, for the purposes at least of debate, to say that there is a limitation or a cap on immediate relatives, that is just not so.

But the kicker is that if they come in great numbers, and I respectfully comment to the Senator from Massachusetts, as many could come to the United States as could possibly be numbered and there would be no limitation on them under present law. Right now, the numbers are in the figure of a 10-year attitude or feeling that it might increase 70,000 to 100,000 in 10 years, incrementally up in 20 years, and so on. But there is no limit right now to how many could come: 100,000 could come, 200,000 could come, 300,000 could come, and there is no limitation upon that whatsoever.

Mr. BUMPERS. Mr. President, let me ask the Senator this question: Is there a sublevel that the number that could come in before you deducted from other categories? Is there a 150,000 level for members of an immediate family before you deducted from some other preference within the

425,000? I want to be sure I am clear on that.

Mr. SIMPSON. Mr. President, the number that we have chosen is 155,000.

Mr. BUMPERS. So if 175,000 come, you have to take the 25,000 off the other categories?

Mr. SIMPSON. It would be after it reaches that figure.

Mr. BUMPERS. After 150,000?

Mr. SIMPSON. That we would begin to reduce the other categories.

Mr. BUMPERS. What the Senator from Massachusetts is saying is if they exceed 150,000, you will not deduct the excess from other categories.

Mr. KENNEDY. That would be the effect.

Mr. BUMPERS. Is that the effect of what he is trying to do?

Mr. SIMPSON. That would be the effect of the Senator's amendment.

Mr. KENNEDY. Mr. President, if I could just add one other point, because we have talked a good deal about whether this affects family reunification or whether it does not affect family reunification.

I just heard the statement of the Senator from Wyoming that we are really not affecting family reunification. Let me point out that unless you think that a brother or a sister is not a member of the family, you will be affecting family reunification under this bill. I will have more to say about that on the fifth preference later.

But I think it is extremely important for the Members of the Senate, whose attention has been diverted with the second supplemental and the debt ceiling and other matters, to understand that the position of the Senator from Massachusetts is that I am not opposed to caps. We wrote them in the 1965 act and I support them in this provision, with a certain very important exception—and that is with regards to the immediate spouses and minor children of American citizens, which have never been included in a ceiling.

But also understand, in this other preference category, under the bill that is before us, we have effectively excluded brothers and sisters of American citizens. To that extent, I will have more to say about it. But they, as far as I always thought, are members of a family.

THE NEED FOR IMMIGRATION REFORM

Mr. PERCY. Mr. President, I want to commend the members of the Senate Judiciary Committee, in particular the distinguished chairman, Senator SIMPSON, for their work in bringing to the Senate floor the Immigration Reform and Control Act of 1982, S. 2222. No one can deny that consideration of immigration law reform is long overdue.

In the last 5 years, total legal permanent admissions to the United States

increased from a little over 450,000 in 1976 to 800,000 in 1980. In addition, the population of illegal immigrants residing in the United States at any one time has been estimated at between 3.5 and 6 million. Some experts have estimated a net growth of 500,000 new illegal immigrants per year since then. Apprehensions of illegal aliens, one measure of the flow of illegal immigrants, grew from 162,000 in 1967 to more than 1 million in 1977.

Perhaps the most important part of S. 2222 is title I which addresses the problem of illegal immigration. Its key provision makes it unlawful for an employer to knowingly hire an illegal alien, a measure I have long supported.

All independent, comprehensive studies of the problem of illegal immigration, including those by the previous two administrations, the present administration and the Select Commission on Immigration and Refugee Policy, have concluded that adequate enforcement of our immigration laws cannot be achieved by direct enforcement alone. It is, therefore, essential to reduce the incentives to persons who enter this country illegally.

S. 2222 takes the very necessary step of prohibiting the knowing employment of undocumented aliens. The bill also provides for increased border patrol and other enforcement activities.

Legal immigration control is also addressed by S. 2222. The bill puts an overall limit on legal immigration and reforms existing preference categories for both family reunification and independent immigrants. I have reservations about the proposed changes in the family reunification preferences. I intend to support amendments to reinstate the fifth preference category for unmarried brothers and sisters of adult citizens, and to retain second preference status for adult unmarried sons and daughters of permanent residents.

I do, however, believe we should have an overall limit on legal immigration. Obviously, there is no way this country can accommodate all persons who wish to immigrate here. The ever-increasing numbers of persons who wish to immigrate demand that we establish some limit. This bill takes a reasonable approach by not specifically limiting the number of immediate relatives that may be admitted under the first preference but does put a limit on total legal immigration with the exception of refugees who are admitted under a separate admissions system authorized by the Refugee Act of 1980.

Last, the bill provides for legalization of undocumented aliens already in this country within certain limitations. I support this part of the bill as the only solution to a serious problem. Legalization has three major goals:

First, not to expend the efforts of the Immigration and Naturalization Service in locating and deporting those aliens who have settled in this country; second, to allow currently economically dependent employers to continue lawfully employing this pool of labor; and third, to eliminate this subclass of people who have little or no rights or protection under our laws.

I am, however, concerned about the projected costs of the legalization program to not only the Federal Government, but State and local government as well.

I have several other concerns about the bill and possible amendments to it.

I do not support the amendment that will be offered to place refugees under the same numerical ceiling with other legal immigrant categories and intend to speak at more length when it is offered.

I am also concerned about the elimination of judicial review of asylum class actions and the potential for discrimination against minority groups and will give close and careful review to amendments offered to address these concerns.

On balance, Mr. President, I support S. 2222 and urge my colleagues to do so as well.

Mr. SIMPSON. Mr. President, may I state the unanimous-consent request which I believe has been agreed to on both sides of the aisle?

I ask unanimous consent that there now be 40 minutes of debate on three Kennedy amendments dealing with family preference, all three amendments to be debated during the 40-minute period, and that there be three back-to-back votes on those amendments at the conclusion or the yielding back of time, with the first vote to be 15 minutes and each succeeding vote 10 minutes each.

The PRESIDING OFFICER. Is there objection?

Mr. KENNEDY. That is satisfactory. The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SIMPSON. Since I have the floor, Mr. President, I yield now on a separate time schedule for 3 minutes to the Senator from Colorado—is that a different matter?

Mr. HART. It is a general statement on the bill itself.

Mr. SARBANES. Is this time being yielded from the bill?

Mr. SIMPSON. There is no time limit on his bill.

Mr. SARBANES. Mr. President, I ask unanimous consent that the time used by the Senator from Colorado not be charged against the time agreement with respect to the amendments.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HART. The Senator has not called up his amendment.

The PRESIDING OFFICER. The first amendment has been called up.

Mr. HART. Mr. President, I thank the Senator from Wyoming for his indulgence.

Mr. President, the distinguished Senator from Wyoming and his colleagues in the Senate and the House have made a tremendous effort to modernize our immigration laws. To a large extent, many of us believe they have succeeded, and the bipartisan support the bill has attracted is testimony to their efforts.

However, a number of us are very concerned that several provisions of the bill as it now stands do not provide adequate safeguards against possible hiring discrimination against American citizens, nor adequate provision for due process of law in class-action suits involving refugees.

I plan to support Senator KENNEDY's amendment to require monitoring of the employer sanctions provision over the next 3 years, and to provide for GAO and Civil Rights Commission participation in the monitoring process. I also plan to support efforts to insure judicial review for class-action suits in refugee asylum cases.

In addition, I am concerned about a possible amendment which would permit State and local law enforcement officers to assume immigration enforcement responsibilities which are the proper prerogative of the INS. This amendment is strongly opposed not only by civil liberties and Hispanic organization, but by the Police Executive Research Forum, which believes local police involvement in enforcing immigration laws would harm already tenuous police-minority relations and strains limited local resources.

We also need to waive the 2-year foreign residency requirement for students with critical skills. William Perry, former Under Secretary of Defense for Research and Engineering, has estimated in 1985, U.S. colleges will produce only 15,000 electrical and computer engineers, while the market will require 51,000 such graduates. I plan to support Senator KENNEDY's efforts to amend the bill in this area; labor certification requirements will insure that no American jobs will be at risk.

Finally, I am concerned that State and local governments should not be saddled with any financial burden that may result from passage and implementation of this bill. I will therefore support reasonable efforts to reimburse States and municipalities for financial costs incurred as a result of the legislation program.

Beyond these issues and in the long run, I have serious reservations about the practical effects of both current law and this bill. Immigration is a domestic problem, but it is also a foreign affairs problem, an international relations problem. More comprehensive solutions to immigration problems

than those contained in current or proposed legislation must ultimately be developed with the cooperation—and participation—of other governments.

For example, proposals which would provide tax and investment incentives to American and Mexican firms willing to locate in the five northern States of Mexico, from which most undocumented Mexican aliens come, in return for increased Mexican efforts to direct citizens from those states to local industries, warrant serious consideration. A consistent human rights and foreign policy in the Caribbean Basin would facilitate intergovernment action on immigration problems. Examination and development of long-term proposals such as these should be the next step in immigration policy reform.

In the meantime, Mr. President, all of us add a word of thanks and congratulations to those who have spent such a considerable amount of time in fashioning this legislation before us.

I thank the Senator from Wyoming.

Mr. SIMPSON. I thank the distinguished Senator from Colorado, with whom I have worked so closely for so long, for his comments.

I might say, Mr. President, that indeed we will address each of the issues raised by the Senator, if not here then in future revisions of the Immigration and Nationality Act.

Now, Mr. President, I believe we are back within the scope of the time agreement, 20 minutes on each side. I yield myself 2 minutes. I want to return to the issue of the immediate family and the cap.

It is not pleasant for any of us to consider reducing the numbers for other categories, but we have a choice here of either attempting to reduce the increases in immigration, as apparently it is clearly indicated the American people wish to do, or not trying to do that and allowing immigration then to increase in a nonaccounted for area, increase by numbers where we really do not know what the numbers will be, but we know they will be larger with any legalization process, or they will get larger.

Our feeling throughout that the issue was, if we are going to take care of immigrants, let us take care of spouses and minor children of U.S. citizens. That is what we do in this bill because we put no limit on that. But whatever number of spouses and minor children of U.S. citizens come, whatever those numbers, they are not heavy enough to impede in any way on a figure of 155,000. But whatever they are, they will go under the cap and as that cap is set we will then have to reduce the areas of the other preferences.

That is the issue. It did come before the Select Commission on Immigra-

tion and Refugee Policy. It was a serious debate in the Select Commission.

In that time that we debated it, the vote was 15 to 1 against an absolute cap, but the bill did not contain an absolute cap on immediate relatives.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. SIMPSON. I yield myself 1 additional minute.

I would repeat, then, that this bill is not inconsistent with the Select Commission's recommendations because there is no absolute cap set on immediate relatives. There is, as I say as clearly as I can, a reduction on the preferences below, when and if that time should come.

I emphasize again that the cap, by that definition, is not there.

Mr. KENNEDY. Mr. President, I ask unanimous consent that it be in order to ask for the yeas and nays on all three amendments.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KENNEDY. I ask for the yeas and nays on all three amendments.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. KENNEDY. Mr. President, I ask unanimous consent to be able to set aside my amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 1951

(Purpose: To accord a second preference in the allocation of family reunification visas to qualified immigrants who are the adult unmarried sons and daughters of permanent resident aliens)

Mr. KENNEDY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Massachusetts (Mr. KENNEDY) proposes an amendment numbered 1951.

Mr. KENNEDY. Mr. President, I ask unanimous consent that the further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 126, strike out lines 3 through 14, and insert in lieu thereof the following:

"(2) SPOUSES AND UNMARRIED SONS AND DAUGHTERS OF PERMANENT RESIDENT ALIENS.—Qualified immigrants who are the spouses, unmarried sons, or unmarried daughters of an alien lawfully admitted for permanent residence shall be allocated visas in a number not to exceed 65 per centum of such numerical limitation, plus any visas not required for the class specified in paragraph (1)."

Mr. KENNEDY. Mr. President, in this second category we have talked about earlier, we have altered the second preference in a way that says

that if an individual is here as a permanent resident alien—for example, admitted here into the United States because they have certain skills for employment in the United States—we are putting a limitation which has not existed heretofore on their ability to bring their children to the United States. The bill establishes a cutoff in the legislation at the age of 21. My amendment just says that they can bring unmarried sons and daughters, without regard to age.

This amendment simply restores the existing terms of the second preference immigration category.

I support the efforts by my distinguished colleague, Senator SIMPSON, to increase the numbers available for this preference—to help relieve some of the enormous backlogs that have developed especially in Mexico.

However, I think it was unnecessary to limit the admission of unmarried sons and daughters to those who are under 21 years of age. According to the committee's report,

The elimination of unmarried sons and daughters over 21 reflects the committee's view that the limited visas available for this preference should be used to reunite "nuclear families."

Mr. President, I do not know of any legal definition of what a "nuclear family" is, but commonsense and past practice tells us that simply because a son or daughter reaches 21 he does not leave the nuclear family—especially if he is unmarried.

If this provision in the bill is left to stand, we will have established a preference that will divide families, rather than uniting them.

I agree with the provisions of current law, that sons and daughters of permanent resident aliens who are married should be assumed to have left the nuclear family. But it is totally unjustifiable to say that simply because a son or daughter turns 21 he should be barred from living with his family in this country.

Again, I think it is an issue of family unity. I think most of us would say that once the individuals of a family are married, then they are no longer immediate family members. Make no mistake about it, Mr. President, with the limitations and the caps that have been placed in this bill, unless we do this, what we are saying to those unmarried sons and daughters is that they just will not be able to be reunited with their families if they turn 21. This amendment would address that problem. We recognize that if they are married, they have a different situation.

We understand that those who would be affected are about 25 percent of the second preference category.

I want finally to point out that we are not increasing the 270,000 cap, so that they would have to be in line

with others. But at least, they would not be denied the ability to be reunited.

Mr. President, I reserve the remainder of my time.

Mr. SIMPSON. Mr. President, there is only a limited number of visas available for family reunification for permanent residents. Therefore, it is the feeling of the subcommittee and the full committee that visas should be reserved for reuniting the very closest family members—those who are most likely to live together in the United States. The legalization program will bring additional heavy pressures for visas in the second preference—aliens who will be legalized if this bill should pass within the permanent resident status—that type of legalization. They will petition, then, for family members under this second preference. Indeed they will. By limiting this preference to spouses and children, there is some assurance that permanent residents will be able to bring in their immediate families.

An expansion of this preference under this amendment would simply mean that children of permanent residents may have to wait in line for many years. That may result in new illegal immigration, since the immediate family is always most unlikely to stay separated.

We have tried to avoid those periods of separation and here, as with the fifth preference, aliens on the second preference waiting list as of March 1, 1982, who do not fit the new definition—the old group includes the adult or married sons and daughters of permanent residents—would retain their preference under a savings clause. That would be as of the date of the approval of their visas. So, again, it was one of those choices which one finds painful at the time. But if we are going to put a cap on—and, as the Senator from Massachusetts has said also, there is a cap coming; we know that; we knew that in the Select Commission. We have known it in this legislation. Then we have to find priorities within the cap. Here, we think, is a way to do that when we reserve those for reuniting the closest family members in that procedure.

I thank the Chair.

Mr. SARBANES. Will the Senator yield, Mr. President?

Mr. KENNEDY. Yes; I yield on my time.

Mr. SARBANES. Mr. President, I support the amendment offered by the Senator from Massachusetts. It seems to me that the response made by the able chairman of the subcommittee, and I join with others in commending the extraordinary effort he has given to developing this legislation, really ends up defining the family unit in a way that is inapplicable to the concept of the family held not only by recent immigrant groups

but also by many Americans of long lineage in this country. It seems to me one of our great strengths as a nation, if we can maintain the concept, is the broader definition of the family unit which is contained in the amendment offered by the Senator from Massachusetts.

Mr. President, we should be clear about one thing. This amendment does not involve any additional numbers so it does not carry with it any question that the numbers would be increased. It simply includes within the preference—here we are talking about the second preference—unmarried sons and daughters. I submit that they ought to be regarded as members of the family unit.

I think one of the undesirable trends that has taken place in this country is a narrowing definition of the family unit and the resultant concept of the nuclear family, which loses any sense of a broader family network and the reciprocal reinforcement to its numbers in terms of support and assistance provided to one another which comes from that view of a family.

If this amendment carried with it additional numbers, I could understand the concern of some. It does not do that. And I understand that the other amendment to be offered by the Senator with respect to the fifth preference will not increase the numbers, either.

Therefore we ought to maintain the concept which now exists in the law and I hope the Senate will support the amendment which has been offered by the Senator from Massachusetts.

I believe any parent wishing to be joined by an unmarried son or daughter, would naturally consider them part of the family unit. The Senator's amendment concedes that if they were married, a different situation would be obtained. I gather that same distinction is carried over in the proposal to be made with respect to the fifth preference, which actually would be an adjustment in the existing law with respect to fifth preference. It is important to note this distinction on the basis of marital status with the idea that if you are married you have set up a separate family unit and receive different treatment.

Mr. SIMPSON. Mr. President, the number available for family reunification categories is limited. If the second preference is to include adult sons and daughters, then the result is inevitable, because a permanent resident will bring in an adult son or daughter, and when they do bring in an adult son or daughter, some other permanent resident will not be able to bring in his minor son or daughter.

The issue is this—and I address the questions back to the perceptive Senator from Maryland—does an adult son or daughter need the care and attention of a parent as does the minor

child? That is what we were trying to assure by the amendment within the bill.

Mr. SARBANES. Will the Senator yield on that point? As I understand it, with the numbers provided here, within a reasonable period of time we would be able to accommodate all of the unmarried sons and daughters, whether minors or not.

Mr. SIMPSON. Mr. President, married sons and daughters were always omitted from this preference. They were never in it.

Mr. SARBANES. I am not talking about married sons and daughters. I am talking about unmarried sons and daughters, whether minors or not, and making the point that, as I understand it, with the numbers provided in the committee bill—which are not changed by this amendment; they are not increased—we would be able to communicate within a reasonable period of time all such unmarried sons and daughters, whether minor or not, that is, whether below or above the age of majority.

Mr. SIMPSON. Mr. President, the issue dovetails in with what we did with the fifth preference in the bill, which is elimination of it except to take care of the backlog which is there, which is now about 700,000 people. We then opened up the second preference; from a previous percentage of entire legal immigration which was 26 percent of 270,000, we now open that up to 65 percent. The reason for doing that is to try to take care of some of the problems that come from the elimination of the fifth preference, which is brothers and sisters of adult U.S. citizens. And even though I may not directly address the Senator's concerns at least it gives the Senator the rationale as to why the fifth preference and the second preference are addressed together.

Mr. SARBANES. Will the Senator yield for a question?

Mr. SIMPSON. I will.

Mr. SARBANES. What is the waiting list on the second preference; what is the time period?

Mr. SIMPSON. The time as of clearance of applications in second preference? I can get that information for the Senator.

Mr. KENNEDY. If I may directly respond to the question of the Senator from Maryland, he is exactly correct. There are only three or four countries where there is a waiting list at the present time. We are increasing the percentages for second preference from 26 percent to 65 percent of the 270,000 ceiling, so we are making an adjustment to deal with those particular backlogs. I think the point that has been taken by the Senator from Maryland is certainly an accurate one. We would not expect that there would be any unreasonable delay. I think the

Senator from Maryland has stated the reasons well.

Mr. SIMPSON. Mr. President, I cannot give the Senator the numbers of human beings, but I can give the Senator the dates with regard to the waiting period in second preference: Mainland China, January 1982; Jamaica, November 1981; Korea, January 1982; Mexico, May 1973; Philippines, April 1979; Hong Kong and the Colony, February 1977. I cannot furnish the numbers, but those are the figures of the waiting period.

Mr. SARBANES. Are those the only countries with waiting periods?

Mr. SIMPSON. In the second preference?

Mr. SARBANES. Yes.

Mr. SIMPSON. That is correct, under the system now.

Mr. SARBANES. Then I submit to the distinguished chairman of the subcommittee that the conflict which he posited only a few minutes ago with respect to second preference as between unmarried sons and daughters in a minor status and unmarried sons and daughters who have reached the age of majority is not a conflict which exists in the current law with respect to almost all countries.

Second, if we are going to make a change in the fifth preference—and we will address that in a moment; as I understand it your proposal eliminates it altogether, and the Senator from Massachusetts addresses part of that—we will still get a shift in the percentages available in the second preference, which again lends some assurance that this conflict will not arise.

In light of that, it is very difficult for me to see what the argument is against the amendment offered by the Senator from Massachusetts.

Mr. SIMPSON. Mr. President, may I inquire as to the time remaining?

The PRESIDING OFFICER. The time remaining is 10 minutes and 13 seconds on the Senator's side and 11 minutes and 45 seconds to the opposition.

Mr. HUDDLESTON. Will the Senator yield me 1 minute?

Mr. SIMPSON. I will yield to the Senator from Kentucky.

Mr. HUDDLESTON. I suggest that there is one element that is being somewhat overlooked. If we are talking about the potential pressures that may build up of adding the legislation number to the family reunification numbers that would exist otherwise—then once these persons are made legal residents and achieve permanent resident status, all of them and all of their families become immediately eligible for this particular category. And while no numbers are involved as far as the ceilings are concerned, the additional numbers that would be built up, we would be under very heavy pressure in short time to do something

about the big backlog that would occur.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. SIMPSON. I yield an additional 30 seconds to the Senator.

Mr. HUDDLESTON. I yield back the time.

Mr. SIMPSON. Mr. President, I would direct this to the Senator from Maryland. We are told that the number available in the preference categories will decrease as the number of immediate relatives increases. That I think we could call a given. The number legalized may well be in the millions. If legalization takes place under this bill, and we designate that people who came here prior to January 1, 1977, as permanent resident aliens who will therefore have the opportunity to seek to bring in their relatives, the Senator may be assured that that figure may well be in the millions. Therefore, I think whether we have numbers today that one can draw on or refer to, it is only unrealistic to expect that backlogs will not increase heavily in the future under the new system.

Mr. SARBANES. Will the Senator yield on that point?

Mr. KENNEDY. I yield 2 minutes.

Mr. SARBANES. If the number, as the Senator from Wyoming asserts, is going to be in the millions, then, of course, we are going to have tremendous waiting lists in any event, any way we look at it—if that is a correct assertion. It seems to me then that the scheme proposed by the committee will not under any circumstance enable us to avoid the difficulties mentioned by the Senator. Given that situation, it is better to maintain the view of the family reflected in the amendment of the Senator from Massachusetts.

Otherwise, what you are doing, is imposing a definition of the family, again without any benefit on the overall numbers, that does not reflect the close family relationship which exist in many instances—relationships which we should seek to enhance and maintain.

I think it is a good thing for the family unit to be brought together. What we are talking about here are unmarried sons and daughters and parents who wish to reunite with one another and in the fifth preference are talking about unmarried brothers and sisters wishing to be reunited with their siblings.

Mr. KENNEDY. Mr. President, how much time do I have?

The PRESIDING OFFICER. Ten minutes and 7 seconds.

AMENDMENT NO. 1998

(Purpose: To allocate visas for qualified immigrants who are the unmarried brothers or sisters of certain citizens of the United States and for certain immigrants qualifying under the previous fifth preference category)

Mr. KENNEDY. Mr. President, under the previous agreement, I ask unanimous consent that the amendment before the Senate be temporarily set aside, and I send an amendment to the desk.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Massachusetts (Mr. KENNEDY) proposes an amendment numbered 1998.

Mr. KENNEDY. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Beginning on page 126 with line 22, strike out all through line 6 of page 127 and insert in lieu thereof the following:

"(4) Unmarried brothers and sisters of citizens and previous fifth preference.—

"(A) Qualified immigrants who are the unmarried brothers or sisters of citizens of the United States, if such citizens are at least twenty-one years of age, and

"(B) qualified immigrants who (i) as of the date of enactment of the Immigration Reform and Control Act of 1982 had received approval of a petition made on their behalf for preference status by reason of the relationship described in paragraph (5) of section 203(a) of this Act as in effect on the day before such date, and (ii) continue to qualify under the terms of this Act as in effect on the day before such date,

shall be allocated visas in a number not to exceed 10 per centum of such numerical limitation, plus any visas not required for the classes specified in paragraphs (1) through (3)."

Mr. KENNEDY. Mr. President, the purpose of this amendment is to recognize that the fifth preference, which under existing law provides for the reunification of brothers and sisters of U.S. citizens, would be modified to permit the reunification of brothers and sisters of U.S. citizens if they are unmarried. This, I think, is a very modest adjustment to what I consider an extremely unfortunate action to eliminate entirely the possibility of brothers and sisters of American citizens to be united.

Following the logic of the earlier amendment, this amendment is very limited in stating that it will restore the fifth preference for the admission of brothers and sisters of United States citizens, but limiting it to unmarried brothers and sisters.

I know my distinguished colleague, Senator SIMPSON, will recall from our service on the Select Commission, that this issue was one of those on which the Commission was deeply divided. A

majority—nine commissioners—voted to maintain the existing fifth preference, and seven commissioners voted to limit it to unmarried brothers and sisters.

I voted to keep the preference as it is, and the Senator knows that I offered similar amendments during the subcommittee and full Judiciary Committee markup of this bill.

I would like to see us restore the fifth preference as it is under current law. However, in a spirit of compromise—and to acknowledge the concerns of many that this preference should be limited in order to give greater numbers to more immediate family reunion categories—I am offering an amendment that allows at least unmarried brothers and sisters to join their families here.

I believe it would be wrong to totally close the door to all brothers and sisters, as this bill does. The fifth preference represents an essential element in the family reunification goals of several communities in our society—especially Asian families—whose opportunity to take advantage of this provision began only after the 1965 reforms, which removed the racist national origins quota system. Now, just 17 years later, we are again closing the door.

Mr. President, if we limit fifth preference to unmarried brothers and sisters, the demand for numbers would be considerably smaller than they are now—only 17,000 persons a year. This is hardly a significant number, and will not result in the huge backlogs that have developed in recent years.

In any case, I do not believe the existence of a backlog in a certain immigration category should be the basis for eliminating it. We should judge the category on the merits, whether it serves to foster family reunification.

Eliminating the fifth preference entirely, as this bill does, is contrary to those family reunification goals, and I hope the Senate will support my amendment to restore the opportunity for unmarried brothers and sisters of U.S. citizens to join their families in our country.

For many reasons which have been pointed out in the discussion of the earlier amendment and for the reasons I outlined in my opening statements, if we do not accept this amendment, we are placing an extremely harsh and unfair burden on those families who were severely and adversely affected prior to the enactment of the 1965 act, which were limited by the national origins quota system and the Asian Pacific triangle, and who have not had the opportunity that other groups have had in our society to be able to reunify their families in the United States.

Mr. CRANSTON. Mr. President, will the Senator yield?

Mr. KENNEDY. I yield.

Mr. CRANSTON. Mr. President, I compliment the Senator on these amendments. He has a number of amendments which I believe have a great deal of merit.

I am very interested in the fifth preference amendment. In terms of justice, equity, compassion, and commonsense, it should be supported, and I hope it will be.

Mr. KENNEDY. Mr. President, I reserve the remainder of my time.

Mr. SIMPSON. Mr. President, what is the time remaining?

The PRESIDING OFFICER. The Senator from Wyoming has 8 minutes and 17 seconds, and the other side has 4 minutes and 32 seconds.

Mr. SIMPSON. Mr. President, this has been a difficult portion of the legislation; but I remind Senators that the fifth preference backlog is now nearly 700,000 persons. That is more than three times the 1978 level. That backlog is going to continue to grow, under this amendment.

Mr. BOSCHWITZ. Mr. President, will the Senator yield for a question?

Mr. SIMPSON. I will yield for a question, for 30 seconds. I have a limited amount of time.

Mr. BOSCHWITZ. Then, I will wait until the Senator finishes his statement.

Mr. SIMPSON. I appreciate that. I have 8 minutes.

The backlog is going to continue to grow, under this amendment.

It should be recalled that less than half of that backlog was the brothers and sisters of U.S. citizens themselves. The rest are the spouses and children of those brothers and sisters. We do intend to clear up the existing backlog.

That date should be amended from March 1 to April 9, which I think is a more appropriate date, because that was the day the subcommittee fully addressed that issue, and that would mean an extension of the fifth preference—as to those who have been approved for fifth preference as of April 9, rather than March 1.

Those backlogs are most desirable, as they create continuing pressure for private bills—if you look, you will see where we have gone with that over the years—remedial legislation, and illegal entry.

So the issue is back to this: If numbers are made available for brothers and sisters of U.S. citizens, these numbers will be taken away from the closer family members—that is, spouses, sons and daughters of permanent resident aliens, and married sons and daughters of U.S. citizens.

The committee decided that it was preferable to make the limited visa numbers available to the closer family members. That is what we had to do throughout the situation, because of one thing—we know that a cap is coming. There is no question—I doubt

that anyone in this Chamber or within hearing of my voice knows—that we are going to put a cap on legal immigration.

When we do, the sorting process gets tough. So throughout in what we did with S. 2222 was recognize who should be reunited first and we felt it should be the very closest family members. I hate to use that definition “nuclear family.” It has all sorts of connotations for me with my other duties. But what we do define it as is a spouse and minor children. That is unfortunate perhaps but in hearings it was clear that the American definition of a nuclear family includes a spouse and minor children. It certainly does not fit an Asian definition of a nuclear family, and that is painful indeed.

So what we are doing throughout and what we did throughout was try to see that we reunited the closest family members first, and that minor children would be recognized first in these situations and that adult children would take a lesser position in the squeezed categories that are going to come under a total cap. Those were the reasons.

The date I mentioned as a proposed amendment of mine at a later time will be the one that the committee proposed. It was either the April date or May 27, and we will have that defined carefully at the time of the amendment.

I thank the Chair.

Mr. BOSCHWITZ. Mr. President, will the Senator now yield for a question?

Mr. SIMPSON. I yield.

Mr. BOSCHWITZ. The Senator talked about 700,000 backlog. This amendment, as I understand it, really does not apply to approximately 79 percent of that backlog. This amendment applies only to adult unmarried brothers and sisters. Is that correct?

Mr. SIMPSON. Excuse me. Will Senator Boschwitz state that again?

Mr. BOSCHWITZ. I say this amendment by the distinguished Senator from Massachusetts applies only to adult unmarried brothers and sisters, is that correct?

Mr. KENNEDY. Just unmarried brothers and sisters. It can be minor or over 21.

Mr. BOSCHWITZ. Right. That is correct, is it not?

Mr. SIMPSON. That is correct.

Mr. BOSCHWITZ. And really the question and numbers of the fifth preference has come from married brothers and sisters arriving and then the spouses bringing in their relatives under either that or other preferences as well but particularly that preference.

So I support the Senator from Massachusetts. This is a relatively narrow increase in the definition as he has it. As I understand the objectionable

parts of the preference that the Senator and I have talked about really come from the relatives of the married brothers and sisters.

Mr. SIMPSON. Mr. President, we have been advised it is maybe a higher figure, that perhaps as many as half within that preference are spouses and children of such brothers and sisters. But I am not able to furnish the numbers at this time.

Mr. BOSCHWITZ. Is the Senator saying that the unmarried brothers and sisters of U.S. citizens that this amendment applies to are half of the 700,000? I believe it is a very small fraction.

Perhaps I should address that question to the proponent, the senior Senator from Massachusetts.

Mr. KENNEDY. The Department of State has given us the figure of 17,000.

Mr. BOSCHWITZ. I thank the Senator.

Mr. SARBANES. Mr. President, will the Senator from Massachusetts yield me time?

Mr. KENNEDY. I think we have about 4 minutes remaining; is that correct?

The PRESIDING OFFICER (Mr. QUAYLE). The Senator has 4½ minutes remaining.

Mr. KENNEDY. I yield 2 minutes.

Mr. SARBANES. Mr. President, I rise in support of the amendment.

I point out to the distinguished chairman of the subcommittee that the existing law, and I hope he will correct me if this is not accurate, permits in the fifth preference both the unmarried and married brothers and sisters of a U.S. citizen. Is that not correct?

Mr. SIMPSON. That is correct, brothers and sisters of adult citizens?

Mr. SARBANES. The amendment of the Senator from Massachusetts is limited to unmarried brothers and sisters. So whatever problems there have been with the backlog, which is the issue that the Senator from Minnesota was touching upon, they are primarily the consequence of the numbers connected with married brothers and sisters of U.S. citizens. This would not arise on the basis of the amendment of the Senator from Massachusetts, which deals only with the unmarried brothers and sisters.

I give a hypothetical case of 25-year-old American citizen who has no parents, and no other brothers and sisters except one whom he wishes to bring into the country one who is unmarried and has not yet started his own family in some other place.

It seems to me that we should maintain the fifth preference for that sort of situation. It again goes back to the fact that these are unmarried brothers and sisters. They have not begun a family elsewhere and they are the unmarried brothers and sisters of an American citizen. Again, the inclusion

for continued eligibility under the fifth preference does not raise the figures. They are still subsumed within the overall figure placed on the preference categories.

It seems to me that this is a very reasonable and indeed modest proposal. The Senator from Massachusetts has indicated that a reliable estimate of the numbers we are talking about would be 17,000 in total to cover the unmarried brothers and sisters of American citizens and to continue, thereby to unite that family unit. It is a very narrow definition of the family that would preclude uniting an American citizen with his unmarried brother or sister.

The PRESIDING OFFICER. The Senator's 2 minutes have expired.

Who yields time?

Mr. SIMPSON. I will use the remaining time on this.

The PRESIDING OFFICER. The Senator has 1 minute.

Mr. SIMPSON. I will just say that, even with this amendment, we will still be giving up visas which would go to closer family members. And I am intrigued by the Senator from Maryland with his thoughtful approach to things, as I have learned it in this body. Indeed he is right. That is a reasonable approach. I do not choose to make it a substitute for the amendment by the Senator from Massachusetts. We shall see what occurs with that amendment, but I have been intrigued with the proposal of making it applicable to unmarried minor brothers and sisters or as the House of Representatives has discussed, even up to the age of 27. That is intriguing to me, but it does not fit well in this debate in context with this amendment.

Mr. KENNEDY. Mr. President, we have concluded the time on all three amendments but there is an underlying theme in all three of my amendments. That is, in the 1965 act we acted to recognize the importance of the family and the family unit, with secondary provisions with regard to the admission of skilled workers. But it was the family and family unit that was our priority. As this bill has come out of the committee I think we have eroded and weakened that priority.

We who support this amendment recognize that there has to be something done about the fifth preference. We have recognized that. That is where the principal backlog has been. That is why rather than restoring the fifth preference in its entirety we have limited it to the reunification of unmarried brothers and sisters with American citizens. We have also recognized the importance of permitting children to be reunited with their family, and not be prohibited because they turn 21. Third, this idea of the reunification of the family will be weakened because of the inclusion within a rigid ceiling for the first time

in our history of immediate relatives of American citizens.

I think that is a significant and important retreat upon what I consider to be the commitment of the American people to family reunification. Yes, we have to do something about the flow of people coming into this society. We cannot deal with all of those who want to come here, but I think the American people feel strongly that we should not compromise on the importance of the family unit. That is the underlying theme in all three of these amendments, and I am hopeful they will be accepted by the Senate.

Mr. SIMPSON. The remaining time, Mr. President?

The PRESIDING OFFICER. Twenty-eight seconds to the Senator from Wyoming.

Mr. SIMPSON. Indeed, the underlying theme is the historic commitment of family reunification and immediate family, and we meet that here, especially the immediate family, and we meet the other one, too, spouses and minor children.

Where we make our difference is we think they should take precedence over adult brothers and sisters, and what has happened to change the attitude of the past is that a cap on legal immigration is imminent.

Mr. KENNEDY. I am prepared to yield back the time.

The PRESIDING OFFICER. The Senator yields 37 seconds?

Mr. KENNEDY. I yield back 37 seconds.

Mr. SIMPSON. I shall yield back my 1½ seconds.

The PRESIDING OFFICER. Eight seconds.

VOTE ON AMENDMENT NO. 1997

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment of the Senator from Massachusetts. The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

The PRESIDING OFFICER. Are there other Senators in the Chamber desiring to vote?

The result was announced—yeas 30, nays 70, as follows:

(Rollcall Vote No. 312 Leg.)

YEAS—30

Biden	Eagleton	Metzenbaum
Boschwitz	Glenn	Mitchell
Bradley	Hart	Moynihan
Bumpers	Hayakawa	Pell
Cannon	Inouye	Proxmire
Chafee	Kennedy	Riegle
Cranston	Leahy	Sarbanes
D'Amato	Levin	Specter
Dixon	Matsunaga	Tsongas
Dodd	Melcher	Welcker

NAYS—70

Abdnor	Brady	Cohen
Andrews	Burdick	Danforth
Armstrong	Byrd	DeConcini
Baker	Harry F., Jr.	Denton
Baucus	Byrd, Robert C.	Dole
Bentsen	Chiles	Domenici
Boren	Cochran	Durenberger

East	Jepsen	Quayle
Exon	Johnston	Randolph
Ford	Kassebaum	Roth
Garn	Kasten	Rudman
Goldwater	Laxalt	Sasser
Gorton	Long	Schmitt
Grassley	Lugar	Simpson
Hatch	Mathias	Stafford
Hatfield	Mattingly	Stennis
Hawkins	McClure	Stevens
Heflin	Murkowski	Symms
Heinz	Nickles	Thurmond
Helms	Nunn	Tower
Hollings	Packwood	Wallop
Huddleston	Percy	Warner
Humphrey	Pressler	Zorinsky
Jackson	Pryor	

So the amendment (No. 1997) was rejected.

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. HATFIELD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

VOTE ON AMENDMENT NO. 1951

The PRESIDING OFFICER. The pending business before the Senate is amendment 1951 offered by the Senator from Massachusetts. This will be a 10-minute vote. The yeas and nays have been ordered and the clerk will call the roll.

The bill clerk called the roll.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 37, nays 63, as follows:

[Rollcall Vote No. 313 Leg.]

YEAS—37

Bentsen	Dodd	Melcher
Biden	Eagleton	Metzenbaum
Boren	Glenn	Mitchell
Boschwitz	Hart	Moynihan
Bradley	Heflin	Pell
Bumpers	Heinz	Percy
Byrd, Robert C.	Inouye	Riegle
Cannon	Jackson	Sarbanes
Chafee	Kasten	Specter
Cranston	Kennedy	Tsongas
D'Amato	Leahy	Weicker
DeConcini	Levin	
Dixon	Matsunaga	

NAYS—63

Abdnor	Gorton	Packwood
Andrews	Grassley	Pressler
Armstrong	Hatch	Proxmire
Baker	Hatfield	Pryor
Baucus	Hawkins	Quayle
Brady	Hayakawa	Randolph
Burdick	Helms	Roth
Byrd	Hollings	Rudman
Harry F., Jr.	Huddleston	Sasser
Chiles	Humphrey	Schmitt
Cochran	Jepsen	Simpson
Cohen	Johnston	Stafford
Danforth	Kassebaum	Stennis
Denton	Laxalt	Stevens
Dole	Long	Symms
Domenici	Lugar	Thurmond
Durenberger	Mathias	Tower
East	Mattingly	Wallop
Exon	McClure	Warner
Ford	Murkowski	Zorinsky
Garn	Nickles	
Goldwater	Nunn	

So Mr. KENNEDY's amendment (No. 1951) was rejected.

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. THURMOND. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

VOTE ON AMENDMENT NO. 1998

The PRESIDING OFFICER. The question now is agreeing to amendment numbered 1998 of the Senator from Massachusetts. The yeas and nays have been ordered. The clerk will call the roll. This will be a 10-minute vote.

The bill clerk called the roll.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 41, nay 59—as follows:

[Rollcall Vote No. 314 Leg.]

YEAS—41

Bentsen	Domenici	Levin
Biden	Eagleton	Matsunaga
Boschwitz	Exon	Melcher
Bradley	Ford	Metzenbaum
Bumpers	Glenn	Mitchell
Byrd, Robert C.	Hart	Moynihan
Cannon	Heflin	Pell
Chafee	Heinz	Percy
Chiles	Hollings	Riegle
Cranston	Inouye	Sarbanes
D'Amato	Jackson	Specter
DeConcini	Kasten	Tsongas
Dixon	Kennedy	Weicker
Dodd	Leahy	

NAYS—59

Abdnor	Grassley	Packwood
Andrews	Hatch	Pressler
Armstrong	Hatfield	Proxmire
Baker	Hawkins	Pryor
Baucus	Hayakawa	Quayle
Boren	Helms	Randolph
Brady	Huddleston	Roth
Burdick	Humphrey	Rudman
Byrd	Jepsen	Sasser
Harry F., Jr.	Johnston	Schmitt
Cochran	Kassebaum	Simpson
Cohen	Laxalt	Stafford
Danforth	Long	Stennis
Denton	Lugar	Stevens
Dole	Mathias	Symms
Durenberger	Mattingly	Thurmond
East	McClure	Tower
Garn	Murkowski	Wallop
Goldwater	Nickles	Warner
Gorton	Nunn	Zorinsky

So the amendment (No. 1998) was rejected.

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. THURMOND. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

(Later the following occurred:)

Mr. GLENN. Mr. President, my vote earlier today on the third Kennedy amendment (UP 1998) to S. 2222, rollcall vote No. 314 was inadvertently not recorded. I therefore ask unanimous consent that the Journal and the RECORD be corrected to record that I voted "aye."

The majority leader has approved this. He was on the floor, but he had to leave the Chamber.

Mr. President, I ask that this appear in the RECORD at a point not interfering with the present debate.

The PRESIDING OFFICER. Is there objection? Hearing none, it is so ordered.

(The foregoing vote has been changed to reflect the above order.)

Mr. HELMS addressed the Chair.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. BAKER. Mr. President, will the Senator yield?

Mr. HELMS. I am delighted to yield to the distinguished majority leader.

Mr. BAKER. I thank the Senator from North Carolina.

CONFERENCE REPORT ON H.R. 5930

Mr. BAKER. Mr. President, I wish to make an announcement.

I have been approached by Members who are urgently interested in doing the war risk conference report tonight—that is, the conference report on H.R. 5930, the aviation insurance bill. I have indicated that I would be willing to call up that privileged matter sometime around 6 or 6:30 p.m., after other amendments that the managers of the immigration bill think are available and appropriate until that time.

So the Senate should be on notice that sometime this evening, we will perhaps proceed to the consideration of that conference report.

I believe there is a 90-minute limitation on the conference report. I understand that the principals may be willing to reduce that to an hour, or perhaps even less.

JOB TRAINING PROGRAM

Mr. BAKER. Mr. President, I ask the Chair to lay before the Senate a message from the House of Representatives on S. 2036, the jobs training bill.

The Presiding Officer laid before the Senate the amendments of the House of Representatives to the bill (S. 2036) to provide for a job training program, and for other purposes.

Mr. BAKER. Mr. President, I move that the Senate disagree to the House amendments and request a conference with the House, and that the Chair be authorized to appoint the conferees on the part of the Senate.

The motion was agreed to and the Presiding Officer appointed Mr. HATCH, Mr. QUAYLE, Mrs. HAWKINS, Mr. KENNEDY, and Mr. METZENBAUM conferees on the part of the Senate.

Mr. BAKER. Mr. President, I take this brief additional time to commend the distinguished occupant of the chair, the Senator from Indiana (Mr. QUAYLE), for his participation in the passage of this measure.

SENATE SCHEDULE

Mr. BAKER. Mr. President, based on the information given to me by the

managers of the bill and the time it will take to do the conference report, I estimate that the Senate should be able to finish its work tonight by 7:30 or 8 o'clock.

It is the intention of the leadership to ask the Senate to convene in the morning at approximately 10 and to conduct business on the immigration bill.

APPOINTMENT BY THE VICE PRESIDENT

The PRESIDING OFFICER. The Chair, on behalf of the Vice President and upon recommendation of the majority leader, in accordance with section 276(a)(2) of title 22, United States Code, appoints the Senator from Vermont (Mr. STAFFORD), chairman, and the Senator from Iowa (Mr. GRASSLEY), vice chairman, to attend the Interparliamentary Union Conference, to be held in Rome, Italy, September 14-22, 1982.

IMMIGRATION REFORM AND CONTROL ACT OF 1982

The Senate continued with the consideration of S. 2222.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. HELMS. I yield to the Senator from Minnesota.

Mr. BOSCHWITZ. Mr. President, I ask unanimous consent that Peter Levinson, a professional staff member of the House Immigration Subcommittee, be allowed to join me on the floor during the consideration of this measure.

Mr. BAKER. Mr. President, will the Senator yield to me to reserve on his request for the moment?

I discussed this with the Senator from Minnesota and indicated to him that I had no objection to that request. I wonder if he will postpone that request until I can confer with the minority leader, and then I will be in touch.

Mr. BOSCHWITZ. I withdraw my request.

The PRESIDING OFFICER. The Senator from North Carolina.

AMENDMENT NO. 1987

(Purpose: To eliminate provisions relating to the legalization of the status of certain aliens under the Immigration and Nationality Act)

Mr. HELMS. Mr. President, I call up amendment No. 1987 and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from North Carolina (Mr. HELMS), for himself and Mr. EAST, proposes an amendment numbered 1987.

Mr. HELMS. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 121, lines 14 and 15, strike out "and aliens whose status is adjusted to permanent residence status under section 245A."

Beginning on page 154, line 15, strike out all through line 10 on page 162.

On page 162, line 11, strike out "TITLE IV" and insert in lieu thereof "TITLE III".

On page 162, line 13, strike out "Sec. 401." and insert in lieu thereof "Sec. 301."

Beginning on page 165, with line 23, strike out all through line 10 on page 166.

Mr. HELMS. Mr. President, I say to the distinguished manager of the bill, if I can entice him a little, that I am willing to enter into a time agreement on this amendment, if he has any interest in doing so.

Mr. SIMPSON. Indeed, I do. I will receive the proposal with great glee.

Mr. HELMS. I thought the Senator would.

Thirty minutes equally divided—would that be acceptable to the Senator?

Mr. SIMPSON. That is acceptable to the Senator from Wyoming.

Mr. HELMS. Mr. President, I ask unanimous consent that the time limitation on this amendment be 30 minutes, equally divided.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. Mr. President, I have the highest admiration and even gratitude for the distinguished chairman of the Immigration and Refugee Policy Subcommittee. What a whale of a job he has done on this legislation.

Producing this legislation is something like presiding over the conference between the House and the Senate on a farm bill. The distinguished chairman has had all sorts of pulls and tugs on him, and I am reluctant to be pulling and tugging a little myself. He has shown perseverance in bringing this comprehensive immigration reform bill to the floor of the Senate.

While I commend the distinguished chairman of the Immigration and Refugee Policy Subcommittee for his perseverance in bringing a comprehensive immigration reform bill to the floor of this body, I respectfully disagree with the decision to grant amnesty to millions of foreigners who entered our country illegally and who are living here illegally.

My amendment therefore would delete the amnesty provisions of S. 2222. Basically, it would delete title III in its entirety, the title that supplies the authority for legalization. References in other sections relating to amnesty would also be deleted from the bill and the titles would be renumbered appropriately.

Mr. SYMMS. Mr. President, could we have order please?

The PRESIDING OFFICER. The Senate will please come to order.

Those Senators or staff desiring to converse please retire to the cloakroom.

Mr. HELMS. Mr. President, I thank the Chair. I do not mind if other Senators cannot hear me, but when I cannot hear myself, it does become a little confusing.

Mr. President, Attorney General William French Smith testified last year on the immigration crisis. He accurately summed up the problem where he declared: "We have lost control of our borders."

The National Commander of the American Legion in a letter to Members of the Senate on July 28 clearly described our predicament. He wrote:

This Nation stands virtually alone among Western nations in having failed even minimally to exercise its sovereign rights to police its own borders.

The American Legion and the Veterans of Foreign Wars are among those who oppose amnesty for illegal aliens. Their opposition reflects massive public concern over our present immigration crisis.

How many illegal aliens are here today? While it is impossible to calculate exactly, estimates range from some 3.5 million to over 10 million. Some estimates run as high as 15 million. The administration is currently using a figure of 6 million which, it would appear, is a conservative estimate. Whatever the exact figure is, it is clear that effective measures are necessary to regain control of our borders.

The bill before us provides for blanket amnesty for millions of illegal aliens. There are amendments which change various dates and alter welfare benefits. My amendment, on the other hand, is simple and direct. My amendment eliminates amnesty from the bill entirely by deleting title III.

Mr. President, it is wrong to reward lawbreakers. It is wrong to set in motion a program which will encourage further lawbreaking and which will polarize our society. Citizenship in our great Republic is too precious to grant in a vast blanket program to millions of foreign nationals who have flagrantly violated our laws. We expect our fellow citizens to obey the law. We proudly say that this is a nation of laws. Yet, amnesty for millions of illegal aliens—for millions of conscious lawbreakers—would show our own citizens and indeed the world, that our great country cannot muster the will necessary to enforce our own very generous immigration laws.

What will the working man and woman in this country think of this massive surrender? What will the children of the working man and woman of this country think of this surrender? Will it teach them respect for the law?

Or, will it engender disrespect for the law and for our institutions? My office has been deluged by phone calls and letters opposing amnesty for illegal aliens. The public outcry against amnesty for millions of illegal aliens may well exceed anything that we in this Congress have experienced in recent years.

Our duty, as representatives of the citizens of these United States of America, is to protect the interests of the American people. We are not here to legislate bailouts for foreign governments whose internal policies have led to severe problems in their own countries. These governments must accept the responsibility to improve the conditions in their own countries in order to achieve progress.

MEXICAN VIEWPOINT ON ILLEGALS

Mr. President, as Mexicans comprise the majority of illegal aliens inside our borders, it is worthwhile to reflect on what the Mexicans themselves are saying about the illegals here. I would like to read to this body some excerpts from an article by a well known Mexican columnist, Carlos Loret de Mola. The article is entitled, "The Great Invasion, Mexico Recovers Its Own" and it appeared in the July 20, 1982, edition of *Exelsior*, Mexico's leading newspaper.

Senor Loret states that the "Mexicanization of Los Angeles" has been a sociological phenomenon of tremendous implications. He calls the entry of illegal Mexican aliens into these United States an unstoppable invasion which in his view is the most important in human history. He draws attention to the idea that these illegal Mexican aliens are conquering a great region, once primitive and virgin, that belonged to our fatherland, and we lost it.

Senor Loret goes even further stating that the Southwest seems to be slowly returning to the jurisdiction of Mexico without firing a single shot, nor requiring the least diplomatic action, by means of a steady, spontaneous, and uninterrupted occupation.

Mr. President, the fundamental question before us is the preservation and enforcement of our sovereignty. Put simply, amnesty is a massive surrender in the face of what Senor Loret has characterized as an unstoppable invasion. Amnesty will legitimize what Senor Loret has characterized as an uninterrupted occupation.

Mr. President, I ask unanimous consent that the entire article from *Exelsior* be printed in the *RECORD* at the conclusion of my remarks, as well as an editorial from *Exelsior* on the same topic.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

AMNESTY COULD INCREASE ILLEGAL FLOW

Mr. HELMS. Mr. President, amnesty for the millions of illegal aliens cur-

rently in these United States would establish a dangerous precedent which could well encourage additional illegal immigration. Additional millions of desperate people could head to the United States on the heels of economic chaos or political chaos in their homelands. For example, between the Rio Grande and the Panama Canal there are over 100 million people. If only 10 percent of these people flee economic chaos or political chaos engendered by Communist expansion in this area the illegal population could very well be doubled in this country.

An Associated Press report from Mexico City on July 14, 1982, states that American officials predict that,

One of Mexico's worst recessions since World War II probably will increase the flow of Mexicans going illegally to the United States in search of jobs and a better life.

Inflation in Mexico is running at some 60 percent per year and Mexico's foreign debt could reach some \$80 billion in the near term. The Mexican peso was devalued by 40 percent in February of this year further adding to Mexico's economic problems.

By the end of 1982, it is expected that an additional 1 million Mexicans will be unemployed. Unemployment and underemployment now total about 45 percent of the labor force in Mexico and Mexico needs to create over 850,000 new jobs every year just to keep up with its population growth which is one of the highest in the world. Mexico is a resource-rich country with oil reserves which are well known as well as mineral and potential agricultural wealth. Yet, Mexico for decades has adopted a type of socialist experimentation—including so-called land reforms—which has brought the country to its current straits. We would hope that the Mexican Government and all governments in the region would encourage policies which will lead to real economic growth. We should not adopt our immigration laws just to bail out other nations from the effects of decades of poor economic policies.

Mr. President, I ask unanimous consent that an article from the current August 16 issue of *U.S. News & World Report* entitled "Mexico: Another Neighbor in Distress" be printed in the *RECORD* at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 2.)

AMNESTY WILL INCREASE WELFARE COSTS

Mr. HELMS. Mr. President, amnesty would increase welfare costs dramatically. Many millions of illegal aliens would qualify for various welfare programs—AFDC, SSI, medicaid, food stamps, State and local assistance, and public housing.

Today, a number of factors are holding down the use of welfare programs

by illegal aliens. These include fear of discovery by authorities as well as the fact that a large percentage of illegal aliens are working males with families across the border. Amnesty would change the situation dramatically.

Mr. President, I realize that there are a variety of amnesty proposals that have been discussed in recent days. By moving dates for permanent residency around, by moving dates for temporary residency around, and by suggesting a variety of welfare package benefits, all of these amendments are avoiding the fundamental cost issue in the long term. Whether we start paying out welfare benefits tomorrow or 3 years from now or 10 years from now, the bill will eventually come due for the American taxpayer. My amendment is simple and direct, it eliminates amnesty and thereby eliminates the problem of additional hundreds of millions—and even billions—of dollars of taxpayer money being spent on welfare for illegal aliens.

AMNESTY AND U.S. UNEMPLOYMENT

Mr. President, there are today almost 10 million Americans out of work. Congress should be making every effort to remove illegal aliens from our work forces and should avoid voting for legislation which will grant them legal rights and benefits through an amnesty program. It should be understood that illegals are at work in a broad spectrum of jobs. Attorney General William French Smith testified last July that, "Only 15 percent of the illegals are estimated to work in agriculture; 50 percent are employed in service industries; and 30 percent are in blue-collar jobs." The Federation for American Immigration Reform has pointed out that, "Half of all new jobs created in the late 1970's went to legal and illegal immigrants." F.A.I.R. also has pointed out that, "There is not a single labor market that immigrants enter in which the majority of workers are not Americans." Marvin Stone, editor of *U.S. News & World Report*, has pointed out in this regard that, "If newcomers show skill and initiative as workers and entrepreneurs, they often cut in on the livelihood of local people and arouse hostility; if not, they lean heavily on the public purse."

It is a myth that illegal aliens seek and obtain only low-paying jobs, indeed, a number of studies and reports have found that illegal aliens obtain well paying jobs. For example, the *Phoenix Gazette* of December 9, 1981, in reference to a nuclear reactor plant in Arizona stated that, "Immigration officials said they believe the relatively high wage scale, which begins at about \$10.50 per hour, has attracted a large population of illegal workers." Human Events ran a story on December 12, 1981, which described a case in Elgin, Ill., in which Immigra-

tion and Naturalization Service officers "arrested 69 aliens who earned between \$4.50 and \$13 an hour." Within hours, the Human Events story reported, "hundreds of local residents had applied for these jobs, all of which were filled within 3 days."

Prof. Donald L. Huddle of the Department of Economics at Rice University has written a report on "Undocumented Workers in Houston Non-Residential and Highway Construction: Local and National Implications of a Field Survey." Professor Huddle has estimated, for example, that one-third, and possibly more, of the workers in the construction industry in the Houston area are illegals. He notes that "residential construction is more heavily infiltrated by illegals than in commercial construction." This is because unions "still act as a partial barrier" in the commercial construction field. The wages earned by illegals ranged from \$4 to \$9.50 per hour. A study by Frank Bean and Allan King at the University of Texas for Governor Clement's Task Force on Immigration was quoted in the Houston Post of April 7, 1982, and estimated that one in every five Texas Hispanics is illegal.

From his research, Professor Huddle extrapolates that—

For the United States as a whole, the number of illegals working in construction may reach an estimated 1 million or more.

He then goes on to state that—

The wages collected by the illegals in construction nationally probably exceed \$7 billion per year and could well be over \$9.5 billion.

Former Secretary of Labor, Ray Marshall, has stated that removing illegal aliens from the work force could cut our unemployment rate in half. According to Professor Huddle's research,

The amnesty provisions of the Simpson-Mazzoli bill are too generous *** giving amnesty to illegals *** will be costly in terms of implementation, will cost unemployed American citizens hundreds of thousands if not millions of jobs, and lead to many more millions of relatives of illegals not now in the U.S. becoming legalized in the future.

It is important to consider a report by the Congressional Budget Office which shows that each unemployed American received \$7,000 annually in unemployment benefits and other public assistance. Thus, 10 million unemployed Americans cost the taxpayers a minimum of \$70 billion annually. This does not include the loss of revenues to the Federal Government from tax payments generated by working Americans.

Where there is a genuine need for seasonal foreign workers, for example, in the agricultural field, the answer is a temporary guest worker program. Amnesty is not the answer. In fact, by giving permanent resident status and access to our generous welfare pro-

grams to millions of illegals currently in low-paying agricultural jobs, amnesty will encourage legalized aliens to move away from this type of work and into the welfare system.

AMNESTY CAN POLARIZE OUR SOCIETY

Mr. President, I fear that the granting of amnesty to millions of illegal aliens could polarize our society. With 10 million Americans out of work, with our economy suffering from unbalanced budgets, and with increasing crime and lack of respect for our laws, amnesty could engender a tremendous backlash.

This backlash could affect relations between Hispanic and non-Hispanic Americans generally as well as between illegal Hispanic and Hispanic-Americans who have either legally settled here themselves or whose parents or ancestors came to our land to settle. It is not just illegal Hispanic aliens that we are talking about, of course, there are illegal aliens here from all parts of the world. We must not allow, through an amnesty program, the polarization of our society.

Referring to illegal Mexican aliens, it is important for this body to consider the opinion of Hispanic-Americans who are legal citizens. The Dallas Times Herald, for example, on June 3, 1982, carried an article entitled, "Illegal alien issue splits Hispanic citizens." The article pointed out that,

In Dallas, most of the complaints to the U.S. Immigration and Naturalization Service about illegal aliens come from Mexican-Americans.

The article goes on to state that the regional INS Director, William Chambers, reported that 85 percent of the complaints about illegal aliens are made by Mexican-American citizens. He added that,

A lot of people are surprised by this, and it used to be that Mexican-Americans did not get into reporting illegal aliens. But they (Mexican-Americans) are being much more adversely affected than previously. The illegal aliens go into their neighborhoods to live and they are in direct competition with them for jobs.

In an article published by the Washington Post on July 19, 1982, additional information is presented which demonstrates that polarization is already in progress. For example, the distinguished State Senator Hector Uribe who represents the lower Rio Grande Valley in Texas was quoted as warning that,

Those most traumatized (by the Supreme Court's education decision) are Mexican-Americans at the lower rung of the ladder. They see themselves paying for the education of illegal aliens' children. And they see their jobs being taken away by these illegal aliens.

The Post article pointed out a study by the Institute for Constructive Capitalism at the University of Texas which found that among various demographic groups, Mexican-American citizens were those most likely to be-

lieve that illegal immigration was the most important problem facing Texas. Another study, a poll taken by the Southwest Polymetrics Co. of Austin, Tex., found that 58 percent of those surveyed in the lower Rio Grande Valley—State Senator Uribe's district—opposed free education to illegal alien children. Among the Mexican-American respondents to the poll, the percentage of negative respondents was even higher.

Raul Besterio, superintendent of schools in Brownsville, Tex., expressed his sentiments in the Post article and the sentiments of many Mexican-American citizens stating that,

Think how I feel. I'm a Mexican-American. People say why are you against your own people. Well, I'm an American. I was born and raised here. The federal government made me a Mexican-American.

Mr. President, the polarization process has begun in our country between illegal aliens and our fellow citizens. This body must face up to this fact and act in a responsible manner to prevent any escalation in this process and to heal the wounds that already exist.

Mr. President, I hope that all Senators will carefully consider the far-reaching consequences of amnesty for illegal aliens. I realize that there is no easy way out. All of the choices before us are difficult when we confront the immigration crisis, and I say that to emphasize the respect that I have for the distinguished Senator from Wyoming (Mr. SIMPSON) and his committee.

The treatment of aliens and the question of citizenship have been issues throughout the ages. The consequences of the decisions made by ancient societies on these matters, by the Romans and others, endured for generations—indeed for centuries. The decisions that we make on these matters will affect our Nation's destiny and the lives of those who come after us.

Mr. President, the pending amendment, which will prevent the granting of amnesty for millions of aliens who are in this country illegally, is very important. I hope that Senators will carefully consider the implications of their vote and support the amendment.

EXHIBIT 1

THE HISPANIC MOVEMENT

EDITORIAL

In the United States for the first time in history Hispanic organizations and congressmen of Spanish or Latin American origins, surely with a preponderance of Mexican blood, have worked out a legislative agenda and program to strengthen and coordinate the power of this transcendent group. Member organizations plan to make themselves felt more than ever in the political life of that country, and they believe they can transform the decade of the 80s into the decade of the Hispanics.

Anything that contributes to unify and strengthen the Latinos and Hispanics in the United States constitutes an important step in the area of social justice and institutional progress. Every day there are more Hispanics in that gigantic nation to the north because of their demographic capacity and the well-known results of migration.

The world is for all its inhabitants. Nations that are located in privileged geographic areas in the long run will have to pay the price for their rich natural resources, and there will not be in any part of the world privileged minorities, nor territories reserved for selected races or dominant groups.

Latinity or Hispanicity is a powerful presence in the United States. They (the Hispanics) must make their intelligence, their capabilities, and their rights known in a political world that cannot, must not be hostile, nor reject them.

History repeats itself. There is no territory that does not belong to Man in the greatest sense of the word. The biblical teaching, people the earth, does not recognize frontiers nor admit of privileges.

The Hispanics will make their presence felt more and more in the United States as a great force, contributing also, as individuals and as a group, important cultural and social values.

THE GREAT INVASION—MEXICO RECOVERS ITS OWN

LOS ANGELES, CALIF.—This is the second largest Mexican City in the world for the number of our compatriots settled there, and it must have as many Spanish-speakers as Madrid. The Anglosaxons are still the most numerous and there are a lot of Negroes, but the numerical advance of the Mexicans is astonishing. Ten movie houses at once show the Cantinflas comedy "El Barrendero." On the streets one has the impression of a great Mexican city. "La Opinion," with a circulation of 60,000 copies, is one of three daily newspapers in Spanish in this enormous country. When did the Mexicanization of Los Angeles happen?

It has been a sociological phenomenon of tremendous implications.

A peaceful mass of people hardworking, carries out slowly and patiently an unstoppable invasion, the most important in human history. You cannot give me a similar example of such a large migratory wave by an ant-like multitude, stubborn, unarmed, and carried on in the face of the most powerful and best-armed nation on earth.

But neither barbed-wire fences, nor aggressive border guards, nor campaigns, nor laws, nor police raids against the undocumented, have stopped this movement of the masses that is unprecedented in any part of the world.

In 1950 they were called "Pachucos" (half-breeds); today they are called "Chicanos." They have marked social and family characteristics, ability for adapting to the environment and for conquering a great region, once primitive and virgin, that belonged to our fatherland, and we lost it. But it seems to be slowly returning to the jurisdiction of Mexico without firing a single shot, nor requiring the least diplomatic action, by means of a steady, spontaneous, and uninterrupted occupation.

These are not assault troops. Nor are they potentates who take over a territory through economic power and purchase of properties. They are a mass of workers, artisans, women, and students who arrive to

reinforce the base of the common people and the human virtues of this society in California. Much like them, despised and persecuted, were the humble Christians in the sovereign empire of Rome; but the meek brought down the Caesars and established—for some two thousand years now—their own style of life over those all-powerful enslavers of the ancient world.

There is a great difference in circumstances. Today we perceive as powerful those who control and manage U.S. society; and it seems crazy to dare to believe it, but let's not forget that great social movements, and changes in social structure, were done by populist forces, so long as they know how to work together.

The United States is the richest and best organized country in the world, within the limitations of the capitalistic system. Its industrial power and way of living absorbs immigrants and readily converts them to nationals. But the Mexicans in the southern part of this nation continue to be Mexican and even impress their personality on their surroundings, in limited proportions and yet ever growing.

Usually they take low-paying jobs, nevertheless, they put such industry, will-power, and self-interest into their efforts—precisely because of unequal status in a hostile and deprecatory ambience—that they end up making themselves indispensable.

California society does not dare to suppress them. The efforts of misguided authorities to expel them always end in failure. They (the Chicanos) are a social and physical reality that cannot be uprooted.

The U.S. upper classes in the western states live in increasing splendor. Their apogee of luxury and comfort doubtlessly marks the inevitable beginning of their decadence. The Mexican invasion continues.

Who are they? Those who have a great capacity to take risks, the more ambitious, those with more character, the strongest from the rural and suburban areas of their home country. A human current of natural selection flows out of Mexico and settles down in the United States, where a second selection takes place. Those who are selected must meet two tests: that of leaving, with fortitude, their family and society and giving up familiar ways and customs; and then that of having the character to adapt to new working conditions. A human current with these qualities, if it can succeed in maintaining itself united and coherent, will end by winning: It's a question of time.

The territory lost in the XIX century by a Mexico torn by internal strife and under centralist dictatorships led by paranoid chiefs, like Antonio López de Santa Ana, seems to be restoring itself through a humble people who go on settling various zones that once were ours on the old maps.

Land, under any concept of possession, ends up in the hands of those who deserve it. All of us Mexicans should prove ourselves worthy of what we have and what we want. The problem is one of organization.

And those humble Mexicans—the braceros, the "wetbacks" the undocumented—teach us with their example of tough, iron-like character and their spirit of great adventure how to overcome a hostile environment. Let us imitate them from within the Mexico that belongs to us.

EXHIBIT 2

MEXICO: ANOTHER NEIGHBOR IN DISTRESS

Despite billions in oil wealth, Mexico is a nation caught up in a mounting wave of unease and despair, marking it as yet another

other potential trouble spot in America's back yard.

The confidence once generated in this country of 71 million by petroleum riches has given way to jittery uncertainty in the face of inflation, unemployment, an ailing peso, huge foreign debts and rampant waste and corruption.

American officials analyzing Mexico's declining fortunes worry that they could lead to political instability. And turbulence in Mexico would make it a more vulnerable target for the Communist guerrillas already battling in Central America.

Other angers raised by the malaise here disturb Washington planners:

One is that an unstable Mexico will be unable to fill the role of oil supplier, as the Reagan administration hopes, to help offset the U.S. dependence of the flow from the volatile Mideast.

Another is that the stream of illegal immigrants from Mexico will continue on a massive scale if there is no dramatic turnaround in the economy.

A third: Without a firm hand in Mexico City, drugs and other contraband will continue to be smuggled from this country into the U.S.

Looking at the array of economic and social difficulties ahead, a frequent visitor to this country finds it easier to understand why Mexicans now use the terms "sad and crushed in spirit" and "resignation" to describe their mood.

Inflation is the most visible sign of Mexico's ills. Prices jumped by more than 30 percent in both 1980 and 1981 and are expected to shoot up 70 percent more this year. The value of the peso has plunged in the past year from 26 to 70 to the dollar in a new free market announced August 5, and more drops are expected.

A BULL DIET

All classes of society share in the discontent. A factory worker with two children, earning the minimum wage of around \$10 a day, complains of a diet consisting of nothing but "meat, beans and coffee."

Officially, there are wage and price controls in place to control inflation. But the public-administration system is limited and inefficient, allowing what one observer describes as "daily anarchy, with everybody charging what he can get away with."

Higher prices come at a time when more and more workers are out of jobs. Unemployment and underemployment in Mexico have long been estimated at nearly 50 percent. The economy must create 700,000 to 800,000 new jobs each year to keep up with Mexico's 3 percent annual birth rate, one of the world's highest.

Today's recession is creating an even larger pool of unemployed. Union leaders predict that a million additional Mexican workers may be laid off by the end of the year in the construction, automotive, textile, shoe, cotton and general manufacturing industries.

Jobless workers are not protected by unemployment insurance, and some here are bracing for trouble. "A major social disaster will probably hit this country in the next six to eight months," says one U.S. businessman.

The need to fight inflation and provide employment comes at a time when Mexico is strapped for revenue and is running out of borrowing power despite its rank as the world's fourth largest oil producer.

The worldwide decline in oil prices has reduced Mexico's revenue expectations drasti-

cally over the past two years, forcing heavy government borrowing to finance industrial-development projects and subsidize social services.

Result: Foreign debt is expected to reach 85 billion dollars by the end of 1982, making it one of the highest in the world. Of the estimated 26 billion dollars the government expects to borrow this year, 17 billion will go just to pay interest of foreign loans.

The government's massive need for credit is squeezing the private sector. Banks pay over 50 percent interest on deposits, and charge from 60 to 100 percent interest on business loans.

Borrowing money, Mexican business executives say, is a step you take only if you are "either desperate or crazy."

DYING BUSINESSES

The lack of credit, coupled with government-ordered wage increases, has forced more than 10,000 small and medium-size companies into bankruptcy so far in 1982.

Although graft and the mordida—the bribe—are deeply rooted in Mexico, the problem has worsened with the sudden influx of oil wealth in recent years. The magnitude of the corruption—highlighted by recent scandals involving police and government officials—has shocked even the most complacent Mexicans, who believe the nation's oil wealth has been squandered and mismanaged.

Adding to the sense of gloom is the evident deterioration of this once-lovely capital city. Officials admit privately that it is virtually impossible to provide efficient water, power and garbage-collection services.

An estimated 17 million people live in greater Mexico City. Some 2.5 million cars congest city streets combining with industrial pollution, to create a heavy cloud of dirty air that hangs over the city much of the time.

Crime, because of the economic crisis, has become a major problem. Local newspapers comment on "muggings, theft and now rampant crime on our streets."

Economic critics place a good deal of the blame for Mexico's plight on outgoing President José López Portillo. The main complaints:

The President poured billions of dollars of oil money into an economy incapable of absorbing it efficiently. Rapid development through large-scale borrowing was chosen over clamping down on inflation. The result, coming in the midst of worldwide recession, was an overheated economy that became overdependent on foreign loans and oil sales at the worst possible time.

Complicating the President's ambitious plans for development were the country's pervasive social programs. The official party, the Party of Revolutionary Institution (PRI), prides itself on its doctrine of social justice. Basic foods, transportation, water and gasoline are subsidized by the government, which also owns or shares control of more than 800 industries, many of them inefficient. As a result, the subsidy drain amounts to between 20 and 25 percent of the federal budget.

The task of grappling with Mexico's massive problems will fall to President-elect Miguel de la Madrid, 47, a U.S.-educated lawyer and economist who scored an easy victory in national elections last July 4.

The new leader will be inaugurated on December 1, but already he has made clear that austerity and sacrifice will be the cornerstones of his policies. Basic thrust of his strategy, as outlined by one adviser: Renegotiate the incredible foreign debt, strengthen

the private sector, eliminate wasteful subsidies, accelerate industrial development and create jobs by judicious use of oil income and public and private savings.

Enforcing austerity will not be easy. For example, the present government, in an effort to reduce the subsidy burden, announced on August 2 major price hikes for bread, tortillas, electricity and gasoline. But labor leaders are demanding pay increases for the workers and warn that they will call a general strike if prices continue to rise.

PRI leaders also worry that government moves to bail out business will produce a backlash. Says one: "In Mexico, you can't cut back on social justice without political dangers."

SLANT ON U.S.

The right-of-center de la Madrid is seen bringing a new view to foreign policy as well. While determined not to become dependent on the American economy, he hopes to improve Mexico-U.S. relations. López Portillo's warm support for Communist Cuba and Sandinista Nicaragua has irritated the Reagan administration. De la Madrid's advisers believe he will turn slowly—so as not to alienate Mexican leftists—away from that course.

He is said to feel the economy can be turned around in two years and that Mexicans will regain their traditional confidence in the future. Others here feel it will take far longer. There also are pessimists who warn that the problems may be unsolvable and that an eventual military takeover is a possibility. But there is no sign of such a scenario now. Some armed forces leaders have been critical of López Portillo's chumminess with Cuba and Nicaragua as well as the economy's deterioration, but the military, it is felt, still strongly backs the civilian government.

Still, some Mexicans fear that the slide toward economic and social chaos must be slowed or Mexico will plunge down a dangerous path challenging the basic foundations of democratic rule.

Mr. HELMS. Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time.

Mr. HELMS. Mr. President, I yield to the Senator from North Carolina such time as he may require.

The PRESIDING OFFICER. The Senator from North Carolina is recognized.

Mr. EAST. Mr. President, I have joined with my distinguished colleague from North Carolina in supporting this opposition to blanket full and complete amnesty in this legislation.

I also commend the Senator from Wyoming for his great work in bringing this matter before the Senate.

However, the concept of amnesty as espoused in this bill, in my opinion, is ill conceived and ill placed.

I know it is understandable to put this problem behind us of illegal aliens in this country and simply grant a blanket amnesty, but as a matter of public policy and public law, I do not think it is sound.

First of all, amnesty has the idea of forgiveness because of some unanticipated or some inequitable impact of the law. That is the origin of the concept.

In this case, I think it is clear that the rationale for amnesty is simply this: The sheer numbers of people who have poured into the country illegally—it becomes unmanageable, so we simply forgive it.

On that theory, we might forgive drug trafficking, we might forgive any kind of illegal activity simply because of the sheer numbers of people involved that we cannot cope with it.

I do not find, as a concept, that this is the sort of situation historically in Anglo-American law that amnesty is meant to apply.

Beyond that, I think it is inconsistent with the goals of this legislation. The purpose of this legislation is to gain control of our borders which many Americans concede today we no longer seem to have. We simply become a dumping ground.

I know we have had many fine people come in legally and illegally. But the problem remains that we are trying to regain control of our borders. That is the whole purpose of the legislation.

Mr. President, the concept does not apply here.

I respectfully urge my colleagues to delete it. I think the timing is poor. We should at least see if the legislation will work in allowing us to gain control of our borders, if we can, and then if amnesty would seem appropriate, let us do it.

But to put it in this bill at this point is premature, ill conceived, and I strongly urge my colleagues to strike it from the legislation.

Mr. President, since our time is limited, I yield back the floor.

The PRESIDING OFFICER. Who yields time?

Mr. HELMS. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator from North Carolina has 6 minutes and 45 seconds remaining. The Senator from Wyoming has 15 minutes remaining.

Mr. HELMS. Mr. President, I yield 4 minutes to the Senator from Idaho.

Mr. SYMMS. I thank the Senator from North Carolina for yielding, and I wish to express my support for the amendment offered by my good colleagues, Senators HELMS and EAST, and in expressing my support for this amendment which deletes from S. 2222 the provision granting amnesty to illegal aliens, I do not detract in any way from the monumental efforts made by Senator SIMPSON and others, and I voice the great admiration for the job that Senator SIMPSON has done and others on the committee, the distinguished Senators who brought this bill to this committee because I realize this has been a very long and difficult task for them and it has certainly been that I know for many of them, particularly Senator SIMPSON

working on this issue coming from a Western State. In a bill as comprehensive as this it does create a lot of disagreement as to the approach and the degrees of minor subjects. But I do believe, as Senator HELMS and Senator EAST have pointed out, that total blanket amnesty goes a little too far in this bill for illegal aliens residing in the United States prior to January 31, 1982.

It is a subject that, in my opinion, strikes right at the core of our national immigration policy. The problem, of course, is that we currently have residing, as has been talked about here, anywhere from 3.5 to 15 million people in the country, and the problem will further be compounded by the fact that to date we have not been able to devise a method of gathering and deporting these people. It seems to be an insoluble problem. But we are just talking about defining it out of existence by granting blanket amnesty.

I had the opportunity this morning, Mr. President, to visit with Mr. Tom Dunnigan who runs the labor association in my State, and where they are employing farm laborers, and in this case, in some instances, people who are illegal get in those work forces working in those crews, and he made the point with me that even though it would provide a lot of the people who are working in the farm community—it would make them legal, he feels that it is going to rapidly and very dramatically expand the use of many of the transfer payment welfare programs that the Federal Government operates because of these people.

The response of this bill is to solve the problem by defining it out of existence. If we have a problem of illegal aliens, we will no longer have a problem if we make or define them as legal aliens. No one is hurt, everything is fine, and everyone is happy.

The problem with the approach, Mr. President, is that it fails to address the issue and in fact postpones the day of reckoning while the problem grows worse. We have lost control of our borders and have not devised a viable means of controlling the illegal influx.

In another light, Mr. President, what do we gain by granting amnesty to those who have circumvented our laws at the expense of those who are seeking to enter our country by legal means? By what right or through whose decree do illegals merit such favored treatment?

I can think of no reason other than a desire on our part to avoid the issue by trying to make it go away, or define it out of existence. Have we fully thought out the consequences of such an action? Such a declaration of amnesty creates a dangerous precedent for the continuing handling of this problem. It is my feeling and the feeling of many of my constituents in Idaho that this bill does little in actu-

ally stemming further illegal immigration. Amnesty will only increase the flow.

Such a declaration creates the impression—and rightfully so—that there are no penalties or sanctions for disobeying our laws. It creates the feeling that those who abide by U.S. immigration laws—with the red tape and waiting periods—are suckers.

Such a declaration of amnesty will result in the loss of jobs of American citizens and aliens who are legally here. The administration uses the figure of 6 million illegal aliens that would surface and openly compete for jobs we need for our own citizens. This competition for jobs would occur not in the agricultural field but in the blue collar and service industry areas. We need these jobs for Americans.

In addition to the loss of jobs and job opportunities as a result of amnesty, we also face the very bleak prospect of Federal, State, and local treasuries being required to pay out additional sums in welfare. Many presently noneligible illegal aliens would automatically qualify for numerous welfare benefits as a result of the bill's amnesty provision. The administration's own figures indicate that the increased costs of welfare brought about by this bill would be as high as \$10 billion in the first 4 years.

Mr. President, the amnesty provisions of this bill must be deleted. I have no substitute or answer for this problem but I know that amnesty is "the ostrich hiding its head in the sand." If we must spend additional time and resources to reach a viable solution, then let us do so. Our citizens, indeed the entire world, must know that we have the will to establish and enforce realistic, effective immigration laws.

The PRESIDING OFFICER. Who yields time?

Mr. SIMPSON. Mr. President, may I emphasize, in opposition to this amendment, that under our measure, as presented by S. 2222, legalization is not a reward for violation of the immigration law. If we start with that premise I think we can work the issue a little more appropriately.

Legalization into this measure is a practical solution to a serious national problem.

There is in this country because of illegal immigration in the numbers we have had in years past a population estimated at 3.5 to 6 million by the Select Commissions, and that was 4 years ago. One identifiable fact is real: There is a fearful subclass of at least 3 to 6 million human beings in the United States, and most likely many more. This results in a group of human beings who live in enclaves or groups fearful to report crimes against their property or their person or their families; afraid to seek medical help, afraid to go to a hospital unless it is to

give birth, and then the individual is giving birth to a U.S. citizen. These persons have a weak bargaining position with their employers—indeed they do because if they complain too loudly or too long they will simply be reported to the INS, and that situation cannot be good for this country. I think that diminishes us.

We seek to achieve three major goals through legalization. When I first heard legalization proposed by the Select Commission I blanched. I said, "What for? Why should we do that?"

Again it is one of those issues that you realize is the only practical solution to the problem.

What are the three major goals we seek through legalization? The first is not to expend the efforts of the Immigration and Naturalization Service in these law enforcement activities. They have a limited, a totally limited, budget. We are very unlikely to see them obtain any kind of enforcement for the dollars that we expend if they are going to expend it in locating and deporting from the United States those who have become settled in this country rather than being about their job of preventing new illegal entries or visa abuse, which are the known factors and the known causes of our problem.

The second goal—and this is a very important one—is to allow the currently economically dependent employers to continue lawful hiring from that pool of labor. These employers have lawfully become dependent upon the illegal supply of human beings. Legalization will assist in that transition from an illegal flow and illegal use to a legal pool of labor.

The third is to eliminate, as I say, this illegal subclass of persons with the weakest of bargaining conditions, who are limited in their participation in U.S. society which, sadly enough, even has the effect of hindering the participation of legal immigrants from the same country of origin.

As I shared with you some hours ago, there is even a more pragmatic and fascinating reason for legalization, and that is, if you could not find them coming how are you going to find them to get them out? It is an impossible task. I believe if there is anything that would rupture the fabric of this country it would be the search for illegal undocumented aliens. I would hate to see it take place.

We need a reasonable legalization program. We are not out to reward illegal activity but to resolve a critically serious national problem.

I understand Senator GRASSLEY will be offering an amendment which contains a very reasonable and responsible and very thoughtful modification of the bill's legalization program. I intend to support that amendment of

Senator GRASSLEY, and I urge my colleagues, therefore, to reject the amendment of the Senator from North Carolina.

I appreciate his intent, but it is in no way to be considered as a reward, in no way then do we legalize those who are here illegally, and hinder those who have been waiting patiently. All those are very real arguments, but the issue indeed is one of avoiding a critical national problem.

I support the Grassley compromise, and will yield to the ranking member of the subcommittee, the minority floor manager.

Mr. KENNEDY. Mr. President, I join with my colleague from Wyoming in urging that the Senate resist and reject the amendment of the Senator from North Carolina. The Senator from Wyoming, I think, has stated very well the reasons why we should reject this amendment.

A legalization program has been recommended time and time again, by Republican and Democratic Presidents alike—by President Ford, by President Carter, and recently by President Reagan.

As the Senator from Wyoming and the past administrations have pointed out, unless we take these steps in terms of adjusting the status of these individuals we are going to have a permanent class in our society which is subject to extraordinary exploitation, that refuses to report crimes because of fear of the consequences.

We also find there will be a better opportunity for targeting the limited resources of the Immigration Service into the current challenges we are facing with the flow of individuals who are coming here illegally, even at the present time.

Mr. President, I am interested in the fact that the Senator from North Carolina has offered this amendment, although he must not object to the concept of amnesty, because he himself has introduced a private bill that has been before the Judiciary Committee to provide amnesty for one of his own illegal constituents. The amnesty for that individual—an individual who has been involved in visa fraud—was tabled in the last Congress but reintroduced in this Congress. I do not know the particular merits of that situation. I know the fact of the situation, but I do not know the particular merits.

One thing I think is important is the principle, and that is that we should free ourselves in this body from the series of private bills which all of us get called upon to introduce to take care of some aliens needing amnesty. And yet when the time comes to try and deal with amnesty for individuals who do not have the benefit, for whatever reason, of having a Member of the U.S. Senate to advance a private bill, we draw the line against those individuals.

Mr. President, I do not know whether the Senator, since he is here, wants to make any comment on the private bill that he has introduced with regard to granting permanent residency for an individual who was involved in visa fraud.

Mr. HELMS. I would just say that the Senator, by bringing up this matter, is making my point for me. Blanket amnesty is perilous for this country. There is a difference between 6 million cases, with no consideration of individual merits, and one case where careful examination of compassionate circumstance is possible. I think it ought to be on a case-by-case basis. The Senator has said that he does not know the merits of the situation in the private bill I introduced. I hope he will study the case carefully before he makes any harsh judgments on it. But I thank the Senator for bringing it up.

Mr. KENNEDY. Well, this individual was involved in visa fraud in behalf of his wife.

The PRESIDING OFFICER. The 4 minutes yielded to the Senator have expired.

Mr. KENNEDY. Will the Senator yield me 30 more seconds?

Mr. SIMPSON. Yes.

Mr. KENNEDY. It just seems to me, Mr. President, for the reasons that have been outlined here during the course of this discussion, as the Senator from Wyoming has pointed out, that the provisions in this bill offer the best practical solution of this troublesome problem. We cannot be involved in the mass deportation of these individuals. This legislation is trying to deal with the challenge that we are facing here and now, the fact that there are undocumented aliens who have lived here, their children live here, for many years, and to regularize their status and to deal with the current situation in a realistic and practical way. I hope the amendment will be defeated.

The PRESIDING OFFICER. Who yields time?

Mr. GRASSLEY. Will the Senator yield?

Mr. SIMPSON. Could I inquire of the time remaining?

The PRESIDING OFFICER. The Senator from Wyoming has 3 minutes 35 seconds and the Senator from North Carolina has 2 minutes 47 seconds.

Mr. SIMPSON. I yield 3 minutes to the Senator from Iowa.

The PRESIDING OFFICER. The Senator from Iowa is recognized for 3 minutes.

Mr. GRASSLEY. I thank the distinguished chairman of the subcommittee for yielding to me.

I, too, as does my friend from Wyoming, oppose the Helms amendment. I, too, had difficulty with the legalization proposal when I first got into the

issue of immigration reform. As I sat through the hours of hearings on the subject, I came to realize that to me there is really no practical alternative for either American citizens or for the majority of illegal aliens other than legalization.

I suppose that wherever you might go in most sections of America, and if any of us stand up and said that all these people should be rounded up and shipped home, there would be much agreement with our position. I think it would be very easy to go to Idaho, North Carolina, or even to Iowa and say those things and receive support. But when you look at the practical aspect, it just is not an answer. We do not have the resources to put forth. All you have to do, as I had an opportunity to do, is to fly with the border patrol over the Rio Grande and see so many people coming into our country, as that plane, a symbol of authority, is flying over. That plane is ignored. They come in and they do it every day. The problem is massive.

You must take the bill in its totality, not just the legalization aspects, but the employer sanctions as well and the other aspects of the bill. We have no way of saying, nor do we try to say, that the legalization aspects are the only answer. But they are part of an answer.

And I would ask the Senator from North Carolina to look at this as just one of the very important aspects of the bill. Even if his amendment is adopted, it would not solve the problems that we are trying to solve.

Such deportation proposals, if they were to be carried out, would lead to the disruption of peoples' lives. It would be extremely costly and it would contribute to racial tension.

As many may be aware, I had and still do have concerns regarding the legalization program. But I think we have worked that out. This solution will be presented by way of an amendment shortly. The amendment would move permanent residency back from January 1978 to January 1977. It would move temporary residency back from January 1982 to January 1980. In addition eligibility for welfare would be greatly diminished and a block grant would be provided to the States.

Therefore I urge the Senate to accept this amendment as I feel it answers many questions regarding legalization.

The PRESIDING OFFICER. The time yielded to the Senator has expired.

Mr. SIMPSON. Mr. President, the time remaining is 35 seconds, is that correct, if I quit talking?

The PRESIDING OFFICER (Mr. BRADY). Twenty seconds.

Mr. SIMPSON. Let me just say the reference to private bills is one of the things we can correct with legaliza-

tion. We will have equities for these people. Please understand one thing. Legalization does not mean suddenly that they are transferred into U.S. citizenship. That is not the issue.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. SIMPSON. I ask unanimous consent for 1 additional minute to conclude my remarks.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. SIMPSON. These persons would not automatically become U.S. citizens. They would be designated, prior to a certain date, as permanent resident aliens; between a certain date, they would be designated as temporary resident aliens; and they would then be on the track to citizenship if they so desired. That is the purpose of the legalization.

Mr. DOMENICI addressed the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. DOMENICI. Will the Senator yield a minute on the bill?

The PRESIDING OFFICER. There is no time limit on the bill.

Mr. DOMENICI. Can he yield off the bill?

The PRESIDING OFFICER. There is no time on the bill.

Mr. DOMENICI. I ask unanimous consent that the Senator from New Mexico be yielded a minute.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. DOMENICI. Mr. President, I want to ask the distinguished Senator from Wyoming a question. Do I understand correctly that illegal aliens entering America after the cut off dates as provided in the bill or as provided in the distinguished Senator from Iowa's amendment and those illegal aliens that enter from that date and on and on in the futures will not be part of the amnesty?

Mr. SIMPSON. Mr. President, under the proposal in Senator GRASSLEY's amendment, we say that those who come here before January 1, 1977, will be designated as permanent resident aliens. We say that those who come between January 1, 1977, and January 1, 1980, will be designated as temporary resident aliens, and those who come here after that date will be subject to deportation.

Mr. DOMENICI. I gather, then, it is the hope that there will be fewer illegal aliens in the future?

Mr. SIMPSON. That is the while thrust of the legislation, which is the Reform and Control Act.

Mr. DOMENICI. I have read the bill and I am not sure that is so, but I would like the Senator's view. What is the Senator's opinion as to the principal part of this bill that is going to cause there to be fewer in the future?

What is going to cause there to be fewer illegal aliens in the future under the new bill?

Mr. SIMPSON. Two things. Employer sanctions against those who knowingly hire illegal, undocumented workers, and some kind of a universal employment verification system, which will be put into place within 3 years using perhaps, a revised social security card, or data bank system, or a telephone system. That system, which must be in place within 3 years, must utilize a counterfeit-resistant, tamper-resistant method. Without those two elements, there will be no reform. It would make no difference if the legalization is there.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. DOMENICI. I ask unanimous consent for 1 additional minute.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. DOMENICI. Therefore, if we do not have employer sanctions that work, the Senator would conclude the cutoff date for amnesty would probably ultimately become a floating situation because in 10 or 15 years we would have to enact another amnesty, is that about right?

Mr. SIMPSON. The entire purpose of the legislation is a one-time only legalization. We do not know how many may come forward.

Mr. DOMENICI. With reference to tourists and students—which I happen to think also the United States is unique in the world in not being able to know how many of either we have left, even though they are supposed to leave—what is this bill going to do, if anything, to make sure that America's laws, which have both of those as temporaries, actually are enforced?

Mr. SIMPSON. Mr. President, we addressed both of those issues, the so-called nonimmigrant visa, which includes the tourist visa, and the student visa. They are both addressed here. We require that students, other than students trained in high technology and some other categories, must return to their country before they adjust status. They must remain there for 2 years before they adjust status into another category.

Tourists, will be monitored under a computer system, monitored by the State Department and INS, and a visa control system.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. DOMENICI. I thank the distinguished Senator.

Mr. HELMS. Mr. President, in conclusion, let me say that there is no immediate mass deportation required by this amendment of mine which is pending. The crisis has been building for a decade and it may take a decade to wind it down. But if we set the precedent of amnesty once, we will be en-

couraging future millions of illegals to take a chance.

Let me say to Senators that if this amendment, or something closely akin to it, is not adopted, Senators will rue the day that they allowed this bill to go through with amnesty for 6 million aliens, or is it 10 million, or 15? We do not even know.

I repeat, there is not simple solution, there is not easy solution. Certainly, we need to strengthen our border patrol. We have more people guarding the Capitol of the United States today than we have guarding our entire southern borders. That is a ludicrous situation under the circumstances.

Let me warn the Senate that giving amnesty to illegals will be costly in terms of implementation. It will cost unemployed American citizens hundreds of thousands if not millions of jobs that they might otherwise get, and will lead to many more millions of relatives of illegal aliens not now in the United States becoming legalized in the future.

I am satisfied in my conscience in offering this amendment, Mr. President, no matter how it comes out. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. CHILES. Will the Senator yield?

Mr. HELMS. Have I time remaining?

The PRESIDING OFFICER. The Senator has 1 minute.

Mr. HELMS. I yield.

Mr. CHILES. I want to say to the Senator from North Carolina that I really think we ought to try to close the borders first. We ought to try to find out if we can close the borders first. Then we all recognize that we have to do something about all those people who are here. I would like to do just what he has said. I have become persuaded that we are not going to be able to pass this bill if we do not have some amnesty feature in it. I am so concerned for the plight of my State, and the position that we are in. If we do not do something to be able to stop the flow and to set up a speedy procedure for determining who is alien and who is entitled to political asylum and who is not then the situation in my State will get even worse. We will just be overwhelmed. Because of that, this bill can help stop the flow and speed up procedures. I will support the bill. However, I hope we will come up with something that is much more restrictive than the amnesty the bill now holds. I am not going to vote for the Senator's amendment now, but if we do not get that more restrictive amnesty, I might ask him to offer it again.

Mr. HELMS. I am sorry the Senator will not vote for my amendment, but I understand his reasons.

Mr. CRANSTON. I wish to state my opposition to the amendment offered by the Senator from North Carolina to strike the legalization program from S. 2222.

Despite my criticisms of S. 2222, the legalization program is absolutely essential if the bill is to become law.

Legalization has its humanitarian aspect which is important.

But equally important is the pragmatic commonsense need to avoid the severe disruption of communities and places of business that will take place if there is not a legalization program from the hundreds of thousands of individuals estimated to be affected by S. 2222.

I remind my colleagues that American immigration policy has tolerated, and often actively encouraged, persons to enter the United States without proper immigration papers to work and to live here. S. 2222 marks a dramatic reversal of what has been our actual policy for many years. This is not a case where the law and practice have been clear and consistent. This is not an amnesty. As a matter of fact there is little for which to absolve undocumented workers.

They are significant contributors to American productivity. They aided the growth of my State and much of the Southwest. They continue to do so. They are honest, hardworking people and welcome members of many communities.

It would be a tragedy to drive them from this land as proposed by Senators HELMS and EAST. I urge rejection of this proposal.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from North Carolina. The yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from South Dakota (Mr. PRESSLER) is necessarily absent.

The PRESIDING OFFICER (Mr. HATCH). Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 17, nays 82, as follows:

[Rollcall Vote No. 315 Leg.]

YEAS—17

Armstrong	East	Jepsen
Boren	Exon	Long
Byrd	Ford	McClure
Harry F., Jr.	Heflin	Nickles
Cohen	Helms	Symms
Denton	Humphrey	Zorinsky

NAYS—82

Abdnor	Byrd, Robert C.	Dole
Andrews	Cannon	Domenici

Levin	Randolph	Weicker
Lugar	Riegle	
Mathias	Roth	

NOT VOTING—1

Pressler

So Mr. HELMS' amendment No. 1987 was rejected.

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. KENNEDY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from Iowa.

UP AMENDMENT NO. 1226

(Purpose: Revising legalization program and to provide State block grants for legalization impact assistance)

Mr. GRASSLEY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Iowa (Mr. GRASSLEY), for himself, Mr. THURMOND, Mr. LAXALT, Mr. DENTON, and Mr. GORTON, proposes an unprinted amendment numbered 1226.

Mr. GRASSLEY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Page 154, line 21, and page 162, in the matter following line 8, strike out "1982" and insert in lieu thereof "1980".

Page 155, line 4, and page 156, line 10, strike out "one-year" and insert in lieu thereof "eighteen month".

Page 155, amend lines 6 through 13 to read as follows:

"(2)(A) the alien (other than an alien who entered as a nonimmigrant) establishes that he entered the United States prior to January 1, 1977, and has resided continuously in the United States in an unlawful status since January 1, 1977, or

"(B) the alien entered the United States as a nonimmigrant before January 1, 1977, the alien's period of authorized stay as a nonimmigrant expired before January 1, 1977, through a passage of time or the alien's unlawful status was known to the Government as of January 1, 1977, and the alien has resided continuously in the United States in an unlawful status since January 1, 1977, and

Page 156, amend lines 12 through 19 to read as follows:

"(B)(i)(I) the alien (other than an alien who entered as a nonimmigrant) establishes that he entered the United States prior to January 1, 1980, and has resided continuous-

ly in the United States in an unlawful status since January 1, 1980; or

"(II) the alien entered the United States as a nonimmigrant before January 1, 1980, the alien's period of authorized stay as a nonimmigrant expired before January 1, 1980, through the passage of time or the alien's unlawful status was known to the Government as of January 1, 1980, and the alien has resided continuously in the United States in an unlawful status since January 1, 1980; and

Page 157, amend lines 1 through 4 to read as follows:

"(ii) the alien is—

"(I) a national of Cuba who arrived in the United States and presented himself for inspection after April 20, 1980, and before January 1, 1981, and who is still physically present in the United States;

"(II) a national of Haiti who on December 31, 1980, was the subject of exclusion or deportation proceedings under section 236 or section 242 of the Immigration and Nationality Act, including a national of Haiti who on that date was under an order of exclusion and deportation or under an order of deportation which had not yet been executed;

"(III) a national of Haiti who was paroled into the United States under section 212(d)(5) of such Act or was granted voluntary departure before December 31, 1980, and was physically present in the United States on that date; or

"(IV) a national of Cuba or Haiti who on December 31, 1980, had an application for asylum pending with the Immigration and Naturalization Service;

Page 157, line 24, strike out the semicolon and insert in lieu thereof ", and".

Page 158, line 4, strike out the semicolon and insert in lieu thereof a period.

Page 158, strike out line 5 and all that follows through page 159, line 12.

Page 159, line 20, strike out "twenty-fifth" and insert in lieu thereof "thirty * * *

Page 160, line 21, strike out "thirty-first" and insert in lieu thereof "forty-second".

Page 161, after line 24, insert the following new subsection:

"(d)(1) During the period an alien is in lawful temporary resident status granted under subsection (b)(1) and during the three-year period beginning on the date an alien is granted lawful permanent resident status under subsection (a) or (b)(3), and notwithstanding any other provision of law—

"(A) except as provided in paragraph (2), the alien is not eligible for—

"(i) any program of financial assistance furnished under Federal law (whether through grant, loan, guarantee, or otherwise) on the basis of financial need, as such programs are identified by the Attorney General in consultation with other appropriate heads of the various departments and agencies of Government,

"(ii) medical assistance under a State plan approved under title XIX of the Social Security Act, and

"(iii) assistance under the Food Stamp Act of 1977, and "(B) a State or political subdivision therein may provide that the alien is not eligible for the programs of financial or medical assistance furnished under the law of that State or political subdivision.

"(2)(A) Paragraph (1) shall not apply to an alien described in subsection (b)(1)(B) to (ii) (relating to certain Cuban and Haitian entrants).

"(B) For the purpose of section 501 of the Refugee Education Assistance Act of 1980

(Public Law 96-122), assistance shall be continued under such section with respect to an alien without regard to the alien's adjustment of status under this section.

Page 162, line 1, strike out "(d)" and insert in lieu thereof "(e)".

Page 162, line 9, strike out "(c)" and insert in lieu thereof "(c)(1)".

Page 162, after line 10, insert the following new paragraph:

(2) The repeal made by paragraph (1) shall not apply to a native or citizen of Cuba who has been inspected and admitted or paroled into the United States before April 21, 1980.

Page 162, after line 10, insert the following new section (and insert a corresponding item in the table of contents):

STATE LEGALIZATION IMPACT-ASSISTANCE BLOCK GRANTS

Sec. 302. (a) There are authorized to be appropriated for grants (and related Federal administrative cost) to carry out this section such sums as may be necessary for fiscal year 1983 and for each of the five succeeding fiscal years.

(b)(1) From the sums appropriated under subsection (a) for a fiscal year (less the amount reserved for Federal administrative costs), the Secretary of Health and Human Services (hereinafter in this section referred to as the "Secretary") shall allot to each State (as defined in subsection (g)(1)) meeting the requirements of subsection (b) an amount determined in accordance with a formula, established by the Secretary, which takes into account—

(A)(i) the number of eligible legalized aliens (as defined in subsection (g)(2)) residing in the State in that fiscal year and

(ii) the ratio of the number of eligible legalized aliens in the State to the total number of residents of that State and to the total number of such aliens in all the States in that fiscal year and

(iii) the amount of net expenditures the State is likely to incur in providing assistance for eligible legalized aliens under programs of public assistance (as defined in subsection (g)(3)), and

(B) such other factors as the Secretary deems appropriate to provide for an equitable distribution of such sums.

(2) For each fiscal year the Secretary shall make payments, as provided by section 203 of the Intergovernmental Cooperation Act of 1968 (42 U.S.C. 4213), to each State from its allotment under paragraph (1). Any amount paid to a State for a fiscal year and remaining unobligated at the end of such year shall remain available for the next fiscal year to such State for the purposes for which it was made.

(c) A State may use amounts paid to it under subsection (b)(2) for the purpose of providing assistance with respect to eligible legalized aliens under programs of public assistance, but only to the extent such assistance is otherwise available under such programs to citizens residing in the State.

(d) In order to receive an allotment for a fiscal year under subsection (b), a State must prepare and transmit to the Secretary—

(1) a report describing the intended use of payments the State is to receive under this section for the fiscal year, including (A) a description of those programs of public assistance and localities of the State identified by the State as needing assistance from grants under this section, and (B) criteria for and administrative methods of disbursing funds received under this section, and

(2) a statement of assurances that certifies that (A) funds allotted to the State under

this section will only be used to carry out the purposes described in subsection (c), (B) the State will provide a fair method (as determined by the State) for allocating funds allotted to the State under this section among the programs and localities identified under paragraph (1)(A), and (C) fiscal control and fund accounting procedures will be established that are adequate to meet the requirements incorporated by subsection (e).

The State shall promptly revise the report referred to in paragraph (1) to reflect substantial changes in its intended use of the funds allotted to the State under this section. Such report (for fiscal years after fiscal year 1983), and any revisions proposed thereto, shall be made public within the State in such manner as to facilitate review of and comments from interested persons and local governments on the intended use and distribution of funds for the fiscal year.

(e) The provisions of sections 506, 507 (other than subsection (b) thereof), 508 of the Social Security Act (relating to reports and audits, criminal penalties, and nondiscrimination, respectively, under the maternal and child health service block grant) shall apply to activities, funds made available, and allotments under this section in the same manner as those provisions apply to activities, funds made available, and allotments under title V of such Act; and for this purpose—

(1) any reference to that title in any of those sections shall be deemed a reference to this section, and

(2) a reference to section 502(a) or 502(b) or to section 505 in any of those sections shall be deemed to be a reference to subsection (b) or to subsection (d), respectively, of this section.

(f) In establishing regulations and guidelines to carry out this section, the Secretary shall consult with representatives of State and local governments.

(g) For purposes of this section:

(1) The term "State" has the meaning given such term in section 101(a)(36) of the Immigration and Nationality Act (8 U.S.C. 1101(a)(36)).

(2) The term "eligible legalized alien" means—

(A) an alien who has been granted permanent resident status under section 245A(a) of the Immigration and Nationality Act, but only until the end of the three-year period beginning on the date the alien was granted such status; and

(B) an alien who has been granted temporary resident status under section 245A(b)(1) of such Act, but only until—

(i) such temporary resident status is terminated or

(ii) if the alien has been subsequently granted permanent resident status under section 245A(b)(2) of such Act, until the end of the three-year period beginning on the date such permanent resident status was granted,

whichever is later. (3) The term "program of public assistance" means a program which provides for cash, medical, or other assistance (as defined by the Secretary) designed to meet the basic subsistence or health needs of individuals or required in the interest of public health.

Mr. GRASSLEY. Mr. President, the crisis situation of rampant illegal immigration—

The PRESIDING OFFICER. The Senator will suspend. The Senate will please be in order. The Senator deserves to be heard.

The Senator from Iowa.

Mr. GRASSLEY. Mr. President, the crisis situation of rampant illegal immigration to the United States is obviously a complex problem which has been steadily growing more serious over the past 20 years, and especially over the past decade.

The result is that we currently have a population of 3.5 to 6 million persons or maybe more who came to this country illegally because they knew they would find work and who are now living as a furtive underclass, afraid to claim even the most basic of human rights. The existence of such a class of underground residents undermines the fabric of our democratic society, and this problem must be addressed as part of a comprehensive effort to control illegal immigration.

The most obvious answer to this problem would seem to be to simply locate and to deport these aliens who are illegally in this country. However, as the distinguished Senator of the Subcommittee on Immigration and Refugee Policy has pointed out, "If they could not be located when they were coming in, how can we find them to get them out?" Even if we were to substantially beef up our interior enforcement for the INS, which is doubtful in these times of trimming the Federal budget, it would still be practically impossible to apprehend these persons who come from many countries and are located in all States.

During the Iranian crisis, as an example, the INS was unable to apprehend even the Iranian students who had entered legally and for whom INS had records.

Furthermore, we know that many of the illegal immigrants are concentrated disproportionately in certain industries and geographical areas which have grown dependent on their labor. Even if we could locate these persons, their sudden removal could cause severe economic disruption for a temporary period of time in those industries and areas of the country that have grown dependent upon these workers.

Also, attempts at mass deportation have been undertaken in the past such as Operation Wetback in 1954, and the rights of many citizens and permanent residents of Hispanic background were violated in the course of that drive.

Finally, this Nation, I believe, is unwilling to place an army on the borders, thereby straining the cordial relations with our neighbors Canada and Mexico.

If it is true that over half of the illegal immigrants—1.5 to 3 million—are from Mexico, then a sudden deportation of such a large number to a country that already has unemployment and underemployment rates of 30 to 40 percent, a burgeoning population, and a severe economic difficulty would

almost certainly jeopardize the stability of that country and possibly our own strategic interests. A stable country to the south is clearly in our national interest.

The only realistic remedy—and I say this after considerable thought—to deal with the current population of undocumented immigrants in the United States is to legitimize their status in a way which will insure that these people continue to work and will become productive and participating members of their communities.

I have worked very closely with Senator SIMPSON and with the Reagan administration on this problem. Clearly, a legalization program is needed, but the Reagan administration has indicated that the legalization provisions reported by the full Judiciary Committee in S. 2222 are likely to produce a heavy expense to the Federal Government, as these people would be able to adjust status after only 2 years to permanent residence and thereupon become eligible for the full range of public assistance benefits available to our citizens.

We hope these persons will continue to work, and we believe they will. Nevertheless, as we saw with the refugee program, access to cash assistance programs can create high rates of public dependency among groups that formerly were hard working in their homeland.

Therefore, I have worked closely with Senator SIMPSON and the administration in developing a compromise legalization program which will insure legal status for the vast majority of illegal immigrants, while limiting the eligibility to financial assistance programs for a period of time.

Because these persons may be eligible for medical or financial assistance programs available to citizens by the individual States, we have also added a provision for a block grant program to the impacted States in meeting excess costs attributable to this population.

Essentially, this amendment will grant permanent resident status to illegal immigrants who entered before January 1, 1977, and have resided here continuously; and it will grant temporary status to those who entered prior to January 1, 1980. After 3 years of temporary residence, the latter group may adjust status to permanent residency.

The temporary residents are ineligible for all Federal assistance programs, such as AFDC, food stamps, and Medicaid. The permanent residents are ineligible for Federal programs for the first 3 years of their permanent residence.

I believe this compromise reflects a workable legalization program which is fair to those illegal immigrants who have established ties with the United States as well as with the American people.

The PRESIDING OFFICER. There is no time agreement.

Mr. SIMPSON. Mr. President, I ask unanimous consent that we have a time agreement on this amendment of 30 minutes equally divided.

The PRESIDING OFFICER. Is there objection?

Mr. DOMENICI. Mr. President, reserving the right to object, is its 30 minutes to a side or 30 minutes equally divided?

Mr. SIMPSON. Thirty minutes equally divided.

Mr. DOMENICI. I object. I have a few questions, and I do not want to have to ask unanimous consent. If Senators want to have a time agreement, I would not need more than 5 minutes for my questions. If 5 minutes are added to the request, I will have no objection.

Mr. SIMPSON. Mr. President, 35 minutes equally divided, with 5 minutes for Senator DOMENICI.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOMENICI. I thank the Senator.

Mr. SIMPSON. Mr. President, I think Senator GRASSLEY has come to a very reasonable compromise in connection with the legalization proposals, which I can certainly support. I do so and I think the cosponsors of the bill do so because it does not decrease the number of aliens eligible for legalization under the original bill.

It will not result in legalized aliens being held in any kind of temporary status for an unreasonable or unconscionable length of time. It does address the legitimate concerns about the possible cost of legalization in a way which does not place a large fiscal burden upon the Federal Government.

I thank Senator GRASSLEY. He has worked absolutely diligently in this area. He had a serious concern about it and as a result of that serious concern developed his compromise. He has done so with great skill.

We do restrict benefits under this amendment for persons legalized. That is in accord with U.S. policy for the past 100 years. We have always been concerned that legal immigrants not receive Federal payments.

The first immigration statute of 1882 prohibited entry of paupers and persons likely to become a public charge. Similar restrictions have been included in every immigration statute since that time. An immigrant who is likely to become a public charge is excludable initially, and an immigrant who becomes a public charge after admission is subject to deportation.

So, because of the adjustment of benefits contained in this amendment, OMB has indicated to us, through the Attorney General's office, that funds are available—this is a critical issue—for a block grant to the States to offset any emergency or other bene-

fits. It reduces the cost to State and local governments that they may have to provide in the future for legalized aliens.

As I say, the administration has embraced the concept of the block grant to the States.

Many groups, such as the National Association of Counties, the National Municipal League, and the National Governors Conference strongly support Senator GRASSLEY's amendment because it recognizes that this is a Federal responsibility, and it provides the State and local governments with the needed financial safeguards against these added financial burdens. I am pleased to announce that those groups have indicated that with this amendment, they are fully supportive of the legislation.

Mr. KENNEDY. Mr. President, if I may have the attention of the Senator from Iowa, one of the adjustments we made in the committee was to move the cutoff date from 1980 to 1982 so that we would deal fully with the problem we are faced with today. When we start moving back from 1982 to 1980, we are leaving in limbo a large number of undocumented aliens who are here today.

I do not think an argument can be made with regard to any prospective date, because that would serve, perhaps, as an inducement for individuals to come in order to be included. But those who were here in 1982, prior to the time this issue was addressed, if we are serious about dealing with the problem, they should be included, too.

What will be the status of those people between 1980 and 1982? It seems to me that they will be left in limbo.

Mr. GRASSLEY. To be perfectly candid, they are subject to deportation if they are illegally in this country.

Mr. KENNEDY. Why does the Senator take 1980, then? If you came here on January 1, 1981, you would be deported, and if you got here on Christmas Eve in 1979, you would be able to stay.

Mr. GRASSLEY. Any date we take in legislation is arbitrary. But let me say this: The word was out in the report of the Commission in 1980 that there may be legalization and there was probably an anticipation of legislation, and there were maybe 1 million people covered by the date since 1980 who came into this country in anticipation of legalization. That is one of the reasons. We are talking about numbers and costs associated with those numbers. Should we legalize people who purposefully came into the country in anticipation of legalization?

Second, I think it is legitimate that these people have some connection with the community, be part of the community, and I think those residing here prior to 1980 have established

some equity. They are a part of the community. Frankly, I am not prepared to extend the program to what may be a million people who have come to the country since that date and who in that short period of time, in my judgment, have not established that equity. I have tried to say to my friends particularly on this side of the aisle, who are opposed to any legalization, Listen, a lot of these people are part of the community; they have established equity.

It is a matter of justice. There is precedent in previous legislation, other times that immigration legislation has passed in which we have legalized people.

Those are the answers I feel confident in giving to the Senator and I am not expecting him necessarily to agree with them because I know the Senator feels strongly.

Mr. KENNEDY. I respect the views of the Senator from Iowa. It just seems to me that the reasons that were given by the Senator from Wyoming earlier about trying to put this issue behind us, first by the legalization program and second by the other provisions on enforcement, which I will have more to say about later, have a sense of logic to them. But what we will be doing if we accept the Grassley amendment—and I am not under any illusion that we will not because it has the support of the chairman of the subcommittee—but we will be saying that there still will be this subclass of individuals who will be subject to exploitation, as well as their children.

But let me ask the Senator this question: I take some issue about the fact that these individuals who come here are overutilizing the welfare system. For the most part, I think if one examines the facts, and I know the Senator has, those who are coming here are generally the more ambitious. They want to work. They are willing to work under extremely difficult circumstances. They are not individuals who exploit the system, as was stated by the Senator from Wyoming, perhaps with the exception of when they are giving birth to individuals here that changes their status. Generally they are not exploiting the system. I am most interested in regularizing their presence here and I am wondering if the Senator—and, as I indicated earlier to the Senator from Florida, I have supported in the past and will support in the future separate provisions to try and help communities that are particularly burdened—would he be willing to defer the benefits but at least permit the adjustment of the status? It puts them on the road to citizenship. It will, I think, go a long way from the continued exploitation of those individuals, but we would defer granting to them the kinds of inclusion in the welfare programs which the Senator is very much concerned

about in terms of the financial burdens to local communities and to the States and even to the Federal Government.

I have not had a chance to talk with the various interest groups, but it does seem to me if that is acceptable to the Senator we could work out the language and that would remove the financial burden yet permit the legalization of these individuals in the society and would, I think, go a long way toward avoiding the exploitation we have seen, and nonetheless meet the concerns of the Senator from Iowa—which I quite frankly do not believe are quite as significant as he does but albeit this would at least avoid that problem.

Mr. GRASSLEY. Let me say to the Senator from Massachusetts, and I might invite the attention of the Senator from Wyoming, because I worked very closely with him on this compromise, that those of us who worked on it were a long time coming to a compromise. Obviously, I think any time during the legislative process we should consider all alternatives. But I think that we have worked on this especially as far as cost was concerned and I know that the Senator's proposal does not affect the cost. I am satisfied particularly from the standpoint that we feel that this port of legalization should be available to those who have been in the community a certain period of time and we have chosen that to be January 1980, that being an important element of this compromise. The Senator's proposal does not answer that particular aspect of our compromise, regardless of costs, as I know his is not going to be any more costly than our proposal.

Mr. KENNEDY. We say that within that period from 1978 to 1982 they have to be in place, so to speak, for 2 years before they could adjust to the permanent residency, and then it takes 5 years to move toward citizenship. So they would have to have that 2 years, in any event. Then we would permit permanent residency. We would defer their opportunity or their ability to take advantage of the various benefit systems. So the cost would not be any different.

What I inquire of the Senator, if he is not concerned about the cost, is that we accept the concept in terms of limiting the cost, but we leave in place the legislation date of 1982.

This would seem to me to deal with the cost problems, yet make the legislation program as inclusive as possible to put this subclass, so to speak, on some road to legitimacy if they can meet these requirements.

Mr. GRASSLEY. Will the Senator yield?

Mr. KENNEDY. Do we have a little time? I think we are getting close.

Mr. GRASSLEY. I will take some of the time.

Mr. KENNEDY. All right.

Mr. GRASSLEY. Does the Senator's proposal also allow those people, who he would legalize in this country beyond the period of time that I do, to petition for relatives? And if so he is increasing further the backlog.

Mr. KENNEDY. It would not permit it for those between 1978 and 1982. Once they qualify as permanent resident aliens, they would then be entitled to petition and move toward citizenship.

I think what we are trying to do, if we are not going to deport all these individuals, is to try to legalize them, and take them out of a subclass of exploitation. But it would not alter or change their position in terms of application for the reunification of family until they qualify.

Mr. GRASSLEY. The Senator from Wyoming wanted to comment.

Mr. SIMPSON. How much time does the Senator have on the amendment?

The PRESIDING OFFICER. Six minutes 57 seconds.

Mr. SIMPSON. I will take 2 minutes, if I may.

Mr. GRASSLEY. I yield 2 minutes.

Mr. SIMPSON. Mr. President, we have covered the issue of why we have provided this legalization because they have attained "equities." They have contributed to their community, worked in their community, put roots down—participated. These are aliens that other people ask us to cover with private bills. Usually they are young, single males without families. They are working here. They came here to work. That was their sole reason for coming to the United States.

When they are involved in the cutoff date, after the date that Senator GRASSLEY is proposing, they are likely to run home if they are unable to work in the United States after the implementation of employer sanctions.

But I would say that each year we extend the date we include about 500,000 additional human beings, and when we do that then the local governments have serious reservations and complaints.

Let me say this. Of all the immigration laws I have studied and which have been on our books through our history, this is the most generous legalization date we have ever had.

In fact, the old method was to have a registry date, which was sometimes 15 years back. This is the most generous date which has ever been proposed in any statute of our country. I thank the Senator and I thank the Chair.

Mr. GRASSLEY. Mr. President, I yield 1½ minutes to the Senator from Alabama.

Mr. DENTON. Mr. President, I thank my colleague from Iowa.

I want to voice my support for his legalization amendment, and express my admiration for the chairman of the

subcommittee who has worked so long and so hard to make this a fair bill.

I consider the limited legalization program he proposes to be fair and a reasonable attempt to reduce substantially the ever-increasing number of illegal aliens.

I am convinced that the overwhelming majority of this Nation's citizens are unwilling to accept a near blanket amnesty for those who entered the United States in blatant disregard of our immigration laws. It would be patently unfair to the taxpayers of this country to enact a legalization program which is estimated to cost for fiscal years 1983 to 1990 \$26 billion in Federal, State, and local tax dollars, a program which would also be unfair to the thousands of foreign nationals, perhaps more certainly potential hard workers, who have waited patiently through the present backlog of visa applications in order to enter this country through legal procedures.

The Grassley amendment is stringent enough to avoid rewarding law-breakers and to discourage further illegal immigration. The amendment is expected to cut nearly \$21 billion in the anticipated costs that I mentioned previously, an 80-percent savings. I urge my distinguished colleagues to accept this compromise position.

The PRESIDING OFFICER. Who yields time?

Mr. KENNEDY. Well, Senator, I inquired earlier, I gathered from that that the adjustment was not acceptable; am I correct?

Mr. GRASSLEY. Yes, Senator.

Mr. KENNEDY. Mr. President, I regret that because I do think, as the Senator from Wyoming has stated again, the individuals who are coming here are single, interested in jobs and in work. I do not think the case has been made about the heavy drain upon the various benefits programs. I have not seen the evidence.

I, for one, was quite prepared to see, since that was the case, that we exclude them from participating in certain benefit programs, but at least not deny them the opportunity for inclusion in the legalization program.

If we accept the Grassley amendment, we should not fool ourselves by not recognizing that we are still going to have a very substantial group of undocumented aliens in this Nation who are going to be subject to continued exploitation, with all of the implications that have been pointed out in the previous discussion and debate. So I hope the amendment will be defeated.

Mr. GRASSLEY. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator has 3 minutes, 55 seconds.

Mr. GRASSLEY. Mr. President, I ask unanimous consent to modify my amendment, striking the words "a program" in section 302(g)(3) on line 17 at

page 10 of the unprinted amendment, and insert in lieu thereof "State or local programs."

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered. Will the Senator please send the modification to the desk?

The modification is as follows:

(3) The term "program of public assistance" means state or local programs which provides for cash, medical, or other assistance (as defined by the Secretary) designed to meet the basic subsistence or health needs of individuals or required in the interest of public health.

Mr. GRASSLEY. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. Who yields time?

Mr. GRASSLEY. Mr. President, I yield 2 minutes to the senior Senator from South Carolina.

The PRESIDING OFFICER. The Senator from South Carolina.

Mr. THURMOND. Mr. President, I rise in support of the Grassley amendment. This amendment strikes a good compromise, in my opinion, on this subject of legalization. First, it moves the date for permanent residency from January 1, 1978 to January 1, 1977.

Next, it moves the temporary residency date from January 1, 1982 to January 1, 1983.

Next, it provides for a block grant program to fund it.

Next, it prohibits permanent residents from getting welfare benefits for a period of 3 years after the enactment of S. 2222.

Mr. President, I commend the able Senator from Iowa for his willingness and effectiveness in putting this compromise together. It addresses the concerns of many Senators, including myself, the administration and those groups who have expressed concern about an amnesty for illegal aliens in this country.

I feel this is a good amendment, and I hope the Senate will approve it.

The PRESIDING OFFICER. Who yields time?

Mr. DOMENICI addressed the Chair.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. DOMENICI. Mr. President, I do not know that I even need my 5 minutes, but I remember now when I was talking a few minutes ago I mistakenly, Senator GRASSLEY, in referring to your amendment, referred to the Senator from Idaho, and I know the Senator is not from Idaho and I regret having said that.

I ask unanimous consent that the Record be corrected, Mr. President.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOMENICI. Let me ask the distinguished sponsor of the amendment a question. Do I understand correctly that if the Senator's amendment passes, as far as social benefits available to the aliens legalized by this amnesty, that none could accrue and occur before the year 1986? Just arithmetically, is that not correct?

Mr. GRASSLEY. The Senator is correct.

Mr. DOMENICI. Does the Senator have an estimate of what that cost in 1986 to the Federal Government and to the local governments would be? I have a dollar number here. There are so many different estimates. CBO, OMB, and the Justice Department all have figures.

Mr. GRASSLEY. To the Senator from New Mexico, the only answer I can give him with any certainty, is that it is strictly dependent upon the number of people who come forth for identification and legalization.

Mr. DOMENICI. Of course, I understand that, and I say this respectfully, but that is the case in all these estimates. Yet we have had estimates for what the base bill would cost, and they are figuring some estimate of how many people will come forth and how many will be eligible for benefits. But if we use the same base, do we know what the cost might be?

Mr. GRASSLEY. It would be expected by the time those legalized become eligible to be the same as for U.S. citizens.

Mr. DOMENICI. We have a dollar number that I would use just for purposes of discussing it. We think about \$232 million in 1986 for the Federal share and about \$135 million for State and local share under the Grassley amendment.

Mr. GRASSLEY. We have some projections that include the figures that the Senator gave for the year that he suggested but we also have them extended out for 7 years—1983 to 1990—of course, there is no cost in the first 3 years. The final cost is estimated to be \$5.5 billion.

Mr. DOMENICI. For the entire period you just discussed?

Mr. GRASSLEY. Yes. But the figures the Senator gave for the year he suggested are similar to what we have.

Mr. DOMENICI. I thank the Senator.

Mr. GRASSLEY. Let me clarify that by saying that is a combination of Federal and State costs.

Mr. DOMENICI. The \$5.5 billion, I was going to say, must be Federal and State.

Mr. GRASSLEY. Yes.

Mr. DOMENICI. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator from New Mexico has 2 minutes and 17 seconds remaining.

Mr. GRASSLEY. The Senator from New Mexico understands that we have proposed as part of my amendment a block grant to States that are impacted to the greatest extent by the legalization provision.

Mr. DOMENICI. I understand that. And I thank the Senator.

Mr. President, I think we have before us one of the most difficult situations that Congress is ever going to face. And I am sure that after months of work and a lengthy set of committee hearings that we have a good bill before us. I personally think that the proposal that the distinguished Senator from Iowa offered makes it somewhat better.

But I really do not think we ought to be excited about the future because it is not going to work out as it is predicted here. Those who are saying that even with the employer sanctions that are going to be made into law and with the other disincentives that are allegedly here, I think it is safe—I will not be around probably—to predict that you are going to have hundreds and hundreds of thousands of illegal aliens in the country even after this becomes law, and I mean in the sense that they will be brandnew illegal aliens.

I think the issue is economic. As long as we have poverty in high proportions in the world and on our borders, man's ingenuity, pushed by the drive to survive, is going to bring hundreds of thousands here and they are going to be here. That does not mean the bill is not good. It is. That does not mean this amendment is not good. It is.

But I think to talk about this as if we are going to forever be rid of the problem that illegal aliens bring to our country and the problem that we bring to illegal aliens in our country is to delude ourselves.

The PRESIDING OFFICER. The time of the Senator from New Mexico has expired.

Mr. DOMENICI. I ask unanimous consent for 1 additional minute, Mr. President.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOMENICI. I think we are just kidding ourselves. So I think that any notion that we ought to be yet more generous here that is premised upon the fact that we are not going to have the problems any more, so we ought to really solve them all by moving the date back to 1980 or move it up to 1982 for those who are here, I think that is premised on a proposition that is absolutely not going to happen.

It does not mean we ought not try this. We ought to. But I just think, unless and until we face up to the fact that there are millions of Mexican-Americans who are going to come here to seek work—and they are going to come here; there may not be quite as many, they are going to come regard-

less of this bill, they are going to come regardless of the employee sanctions—they are going to be another group with all the problems that have been discussed here on the floor.

So I think we ought to make it a privilege to become legal in this country. And the value of the privilege has always been based upon how much time a person has to spend to earn that privilege. So I think the longer we can insist that they are here, the more we preserve the privilege of being a citizen of the United States.

I yield the floor.

The PRESIDING OFFICER. Who yields time?

Mr. KENNEDY addressed the Chair. The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. KENNEDY. Just on this issue of the cost to the Federal Government of the legalization program, I think it is important to put in the RECORD the CBO estimates of what the cost would be. They recognize the estimate is very uncertain. But their estimate of the costs in 1983 is only \$50 million. The GAO, on the other hand, have estimated that the undocumented aliens paid in 1976 in local, State, and Federal taxes, something between \$3.5 billion and \$5 billion in 1976 dollars. Billions of dollars going in, and here we are with an amendment trying to suggest—with no real documentation—there are these tremendous costs in benefits.

The fact of the matter is that I am sufficiently convinced that these needs and costs are so exaggerated, that I would be willing to see that they would not be eligible for these benefits.

I have no illusion about what the outcome of this vote is going to be. But I welcome the opportunity to vote against it, and I hope that my colleagues will do so as well. I am prepared to yield back the remainder of my time.

The PRESIDING OFFICER. Have both Senators yielded back their time?

Mr. GRASSLEY. Yes.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment of the Senator From Iowa (Mr. GRASSLEY). The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

The PRESIDING OFFICER (Mr. MATTINGLY). Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 84, nays 16, as follows:

[Rollcall Vote No. 316 Leg.]

YEAS—84

Abdnor	Bentsen	Brady
Andrews	Biden	Bumpers
Armstrong	Boren	Burdick
Baker	Boschwitz	Byrd
Baucus	Bradley	Harry F., Jr.

Byrd, Robert C.	Heinz	Pell
Cannon	Helms	Percy
Chiles	Hollings	Pressler
Cochran	Huddleston	Proxmire
Cohen	Humphrey	Pryor
D'Amato	Jackson	Quayle
Danforth	Jepson	Randolph
Denton	Johnston	Riegle
Dole	Kassebaum	Roth
Domenici	Kasten	Rudman
Durenberger	Laxalt	Sasser
Eagleton	Leahy	Schmitt
East	Long	Simpson
Exon	Lugar	Stafford
Garn	Mathias	Stennis
Glenn	Matsunaga	Stevens
Goldwater	Mattingly	Symms
Gorton	McClure	Thurmond
Grassley	Melcher	Tower
Hatch	Mitchell	Wallace
Hatfield	Murkowski	Warner
Hawkins	Nickles	Weicker
Hayakawa	Nunn	
Heflin	Packwood	

NAYS—16

Chafee	Hart	Sarbanes
Cranston	Inouye	Specter
DeConcini	Kennedy	Tsongas
Dixon	Levin	Zorinsky
Dodd	Metzenbaum	
Ford	Moynihan	

So Mr. GRASSLEY's amendment (UP No. 1226) was agreed to.

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. GRASSLEY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ARMSTRONG addressed the Chair.

The PRESIDING OFFICER. The Senator from Colorado.

Mr. ARMSTRONG. I send an amendment to the desk and ask for its immediate consideration.

Mr. SIMPSON. Mr. President, may I ask the Senator from Colorado if he would defer. I told the majority leader and the minority leader that the next amendment would be the amendment of Senator HUDDLESTON, and then immediately after that the body would turn to the war risk conference report. Will the Senator from Colorado defer that amendment until tomorrow? We will be involved in session between the hours of 10 and approximately 2 or 2:30 to conclude amendments on this legislation. Will the Senator from Colorado agree to that?

Mr. ARMSTRONG. Mr. President, I sort of like the Baskin-Robbins system of offering amendments where everybody takes a number and we do them in sequence. I am willing to do that, but if we are going to do that and if I am going to defer to the Huddleston amendment, I would just like to know what my number is. I do not have to offer it now, but either we have an ordering for amendments or we do not.

Mr. SIMPSON. I think that my fellow floor manager and I would indicate you might lay that amendment down tonight at the conclusion of the war risk conference because—

Mr. ARMSTRONG. Mr. President, that would suit me to a "T" although I

must say that if it is laid down, it will be finished so quickly that it will scarcely merit any discussion, so I will be glad to lay it down and then continue it over to tomorrow or handle it tonight, as the managers think best, and I withdraw the amendment.

Mr. SIMPSON. Mr. President, that is why we will lay it down.

The PRESIDING OFFICER. The Senator from Wyoming.

Mr. SIMPSON. Mr. President, I ask unanimous consent that there be 1 hour of debate equally divided on the amendment of the Senator from Kentucky.

The PRESIDING OFFICER. Is there objection?

The Chair hears none, and it is so ordered.

UP AMENDMENT NO. 1227

(Purpose: To include refugees and asylees within the numerical limitations for family reunification immigrants and independent immigrants)

Mr. HUDDLESTON. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

Mr. BOSCHWITZ. May we have order, Mr. President.

The PRESIDING OFFICER. There will be order in the Chamber.

The clerk will report.

The legislative clerk read as follows:

The Senator from Kentucky (Mr. HUDDLESTON), for himself, Mr. COCHRAN, Mr. CHILES, Mr. GRASSLEY, Mr. RANDOLPH, Mr. PRESSLER, Mr. JOHNSTON, Mr. RUDMAN, Mr. FORD, and Mr. KASTEN, proposes an unprinted amendment numbered 1227.

Mr. HUDDLESTON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 122, line 11, strike out "and".

On page 122, line 13, insert after "section 214(d)," the following: "and (v) 82 percent of the number of aliens admitted under section 207 or granted asylum under section 208 during the previous fiscal year,".

On page 123, line 1, insert "the sum of (1)" after "(B)".

On page 123, line 6, insert after "residence," the following: "and (ii) 18 percent of the number of aliens admitted under section 207 or granted asylum under section 208 during the previous fiscal year,".

Mr. HUDDLESTON. Mr. President, I advise the Members of the body that the cosponsors—

The PRESIDING OFFICER. Will the Senator refrain for just one moment?

Will the other Senators who desire to talk please leave the Chamber so we can give respect to the Senator from Kentucky so he can present his amendment?

The Senator from Kentucky.

Mr. HUDDLESTON. Mr. President, the cosponsors of this amendment are

Senators COCHRAN, CHILES, GRASSLEY, RANDOLPH, PRESSLER, JOHNSTON, RUDMAN, FORD, and KASTEN.

May I state very succinctly what the amendment does. It is a very short amendment. It merely places within the cap that is established in the legislation that is now pending, 425,000 immigrants per year, all immigrants that come into the country under the designation of refugees.

Mr. President, the Washington Post a few weeks ago editorialized, and I would like to quote from that editorial:

The burning desire of so many refugees and immigrants to come to this country is a tribute. They come not simply because we are prosperous but because also we are free. The sad fact is that we are no longer able to follow our humanitarian instincts and accept as we did for so many years anyone who wants to come. Because of economic conditions and the need to maintain social and political stability, we must regulate the flow and make hard choices about who will be admitted.

Just a couple of days ago that same newspaper editorialized in opposition to the amendment that we are presenting at this time.

Mr. President, I submit that the duplicity of the Washington Post on this issue on this question is characteristic of the attitude of many people who are genuinely concerned about the question of immigration, the question of refugees, the question of just what precisely the role of the United States should be.

What my amendment does is require that we address this issue face on, that we make some of those hard choices that were referred to in the first editorial that I quoted from.

Now, S. 2222 that is before us makes in my judgment some very significant improvements in the immigration and refugee policy of this country, but it does have a glaring flaw, a weakness, which is the failure to establish a comprehensive, all-inclusive immigration ceiling for the United States. What I mean, very simply, is that refugees must also be recognized as the immigrants that they are and that their numbers, with some flexibility, must come within the ceiling.

By failing to establish an all-inclusive ceiling, we are admitting that a substantial portion of our refugee policy will not be based on a rational and logical determination of what is in the best interest of our Nation. Instead, we will continue to permit special interest groups, outside pressures, the political process itself, to dictate our immigration policy.

The Refugee Act of 1980, which S. 2222 would continue to set refugee limits, has failed to keep refugee admissions under control.

Instead, it has created a vague open-ended admission process that has never come close to keeping refugee flows anywhere near the 50,000 per

year normal flow specified in that statute.

In reality, the 50,000 has now become a floor instead of an average and the admission levels will move upward from that floor, resulting in a significantly higher average over the coming years.

This is not just idle speculation. In the 3 years the Refugee Act has been in effect—assuming this year's admission level will be 140,000 as set by the admission—we have a yearly average of 177,000. In other words, we are running at over 300 percent of the so-called normal flow.

In fiscal year 1980, legal admissions of immigrants, including the massive influx from Cuba, was 808,000 persons. It is significant, Mr. President, I think, to reflect that if S. 2222 were in effect at that time, if this legislation applied in 1980, the legal admission level would still have been about 800,000 people. That is why we must have a ceiling and one written into this law through the amendment that I am offering.

The consultation process is not adequate for assuring congressional control over refugee admission policies. The most recent consultation process produced a situation whereby the administration dictated an admission level of 140,000 for fiscal year 1982, and that was done in the face of substantial opposition from the Congress.

I know that Chairman SIMPSON on this side and Congressman MAZZOLI on the other side have taken the position that the consultation process will be more strictly utilized to bring refugee admissions more under control. I personally believe that both of them will make every effort to fulfill that commitment. However, there are other serious considerations. First of all, the consultation process has no teeth. Judiciary Committees can do little more than was done last time, which is simply to recommend a different figure, a lower figure in this case, which was promptly ignored by the administration.

Mr. President, it is the responsibility of Congress and should be the responsibility of Congress to set the figures and the limits of our immigration and refugee policies. We have abdicated this authority and that responsibility and it has been assumed by the executive branch.

The current ambiguous and open-ended refugee law created the circumstances which permitted the U.S. Department of State to undertake a policy of recruiting large numbers of economic migrants in Indochina by bullying the Attorney General into making an unsubstantiated ruling which presumed that all migrants leaving Laos, Cambodia, and Vietnam were refugees.

This was done even though it was well known that many were economic migrants and therefore not entitled to the same benefits we have reserved for legal refugees.

While Indochinese economic migrants were being welcomed with open arms—indeed, there is much evidence that they were being actively encouraged to come—the Haitian economic migrants were being detained in camps awaiting deportation.

Where, I ask, is the fairness in this?

The Refugee Act of 1980 was designed to assure that all refugees were treated alike. Obviously, it has failed to accomplish that.

Mr. President, I think it is worth pointing out here what refugee status means. When a person is declared to be a refugee for purpose of admission to the United States, he immediately becomes a special, privileged person so far as the United States is concerned. He has available to him assistance programs and benefits with a criterion that is not the same as we apply to our own citizens. It is more generous. He has assistance given to him by the various voluntary agencies and others that is not available to our citizens.

I just say this to point out that with these situations existing, we should take some care. We should follow the law that has been written, which describes what a refugee is, before embarking upon massive programs of resettlement.

Our present open-ended refugee law has contributed substantially to a refugee assistance bill that costs U.S. taxpayers over \$2 billion each year. However, at a time when severe national economic problems are forcing the Congress to make draconian cuts in vital domestic assistance programs we do not see the same kinds of cuts in the refugee programs. Instead, we simply use a little sleight of hand to make it appear that the cuts are larger than they actually are.

The technique used here is to shift more of the assistance burden to the State and local governments.

The present ad hoc refugee policy which ignores the intent of Congress is merely a continuation of past policies which have done the same.

Mr. President, in my judgment, the only way to get a handle on the total immigration into this country is to establish a reasonable ceiling, one that can be abided by, one that is flexible enough to meet emergency situations that may arise; and the amendment I have offered on behalf of myself and the cosponsors has that flexibility. If a situation arises someplace in the world and the United States feels that we should extend open arms to meet a particular crisis, we can do that. We can bring in any number that might be required.

We simply then have the floating concept that is built into the bill. Of

course, there is nothing sacred about the 425,000 number. It is very generous. It still leaves the United States more generous than any other country in the world. Actually, from the terms of offering permanent resettlement to foreign persons, it is more generous than the rest of the world combined. But it can be changed, if necessary, if conditions exist. Congress can change the figure, but it should be Congress and not the executive branch that pulls a figure out of the air and determines how many new people will be brought into the country.

I believe this amendment strikes the necessary balance we need in dealing with this very serious problem.

I need not recite again the statistics gathered by the recent polls that indicate what the general public feels about this problem. They are beginning to see the difficulties with which we are confronted. I think the average American citizen basically maintains his outer generosity. He or she wants the United States to be the beacon of hope, the haven for those who are disadvantaged around the world. But because of the uncontrolled nature of our immigration and refugee policy in recent years and because of the difficult times we are experiencing now, the vast majority of the American people want substantial reductions in the immigration and refugee flow to this country. I think we can do that in a humane way, in a proper way.

As I have said, nearly everybody says that we cannot take them all. Somebody needs to say, "OK, that is true; we cannot." But let us develop a mechanism to determine whom we can take, how many we can take, and what process we go about in determining which ones we will take.

That is what this amendment does. It is a very simple amendment. I believe it will vastly improve this bill and will, for the first time, bring the immigration and refugee program of this country under control.

The flagrant misuse of refugee laws is not a new or unusual occurrence. The repeated abuse of the Attorney General's parole authority has been well documented over the years.

Attorney General Bell called this practice of ignoring the letter and intent of the statute doing an end run on the law. With this type of attitude going unchallenged by the Congress over the years, it should come as no surprise that this administration and the past administration felt very comfortable in going far beyond the bounds of the Refugee Act.

Unless Congress reasserts its power and authority in this area, future administrations will feel just as free to make their own refugee law. The political and economic pressures which have contributed to past flows of migrants will not only continue but most experts predict that they will increase.

The 1980's are expected to be the "Decade of the Refugees" due to increased tensions worldwide.

Even though the flow of migrants in Indochina may be slowing we now find ourselves faced with the same problem in an area much closer to home—the Caribbean Basin.

The Cuban mass migration in 1980 was merely a small taste of what could be yet to come. The former Secretary of State has publicly stated that we could be swamped with massive flows of refugees from that area. Unfortunately, the Secretary is a little late with his warning because we are already receiving a flood of migrants from that area.

Conservative estimates place the number of El Salvadorans in this country illegally at over 400,000. Special interest groups have already begun to demand that these illegal immigrants be given asylum.

It is also well known that Castro has identified at least 2 million of his people who might be expelled to this country when it suits his political or economic needs. What is not so well known is that this action could happen at any time. Without a very firm policy in place I do not believe we can deal effectively with this type of massive movement of people.

If the United States brings illegal immigration under control through fair and effective employer sanctions and if a ceiling is placed on legal immigration, the pressures to come into the United States under the open-ended refugee-asylum provisions will increase significantly. If we have learned anything from our past experience with immigration, it is that people will do nearly anything to immigrate to this country.

America is a Nation of immigrants and the children and grandchildren of immigrants who have come here seeking, and finding, a better life than they could have found anywhere else in the world.

We have that tradition to uphold, and we should uphold it proudly. But at the same time we have an obligation to our own citizens to restrict our immigration to numbers we can manage, both economically and socially. We must perform that obligation to the best of our abilities as well.

I believe a balance can be struck in which we can both uphold our traditions and perform our obligations to our own citizens. S. 2222 takes a giant step in that direction. I urge the Senate to take the extra step of committing to an overall ceiling on immigration, as my amendment would do.

Mr. COCHRAN. Mr. President, will the Senator yield?

Mr. HUDDLESTON. I yield to the Senator from Mississippi.

Mr. COCHRAN. I thank the Senator from Kentucky.

Mr. President, I commend the Senator for the leadership and the diligence he has shown in this area. For some time, he has been one of those in the Senate who has researched the facts and tried to focus the attention of the Senate on this very serious problem of how to control unlimited refugee immigration into the United States.

I have joined him in cosponsoring this amendment, and I urge the Senate to approve it. I am confident that without this amendment, the bill is going to fall short of its effort to establish effective controls over legal admissions into the country. This bill, as drafted, establishes only a partial limit on legal admissions. This amendment sets a comprehensive ceiling.

From what has developed over a period of years, 425,000 is a generous figure. During the period from 1921 to 1980, our average immigration level was only 274,469. As a matter of fact, I am confident that this figure is much more generous than public sentiment indicates it should be. I believe the public supports stricter controls over immigration.

Mr. President, it is obvious that unlimited numbers of people, however unfortunate their situation may be, coming into this country in large, unrestrained numbers, are necessarily forced to compete with American workers for jobs. This is causing problems in certain areas of the country already.

We have heard about events in Miami, in Denver, and along the Gulf Coast involving fishing practices which have been caused, in large part, by the unrestrained numbers of refugees who have been allowed to settle in the United States.

I think we all know that there is sentiment in this country to be a good neighbor, to be caring and concerned, and I think we are. As a nation, we do not have to prove that over and over every day. I think history bears that out and speaks much more strongly than any speech in this Chamber can to describe how humane and concerned we are as a nation. I think we will continue to be.

The adoption of this amendment would require that Congress determine how many people will be admitted into the country in any 1 year. If there is an international event that justifies, in the President's mind, the admission of more than that number, he is free to do that. But, of course, those extra numbers that are admitted have to be taken into account in future years to assure that the overall ceiling will not be surpassed.

This amendment recognizes the need for flexibility to respond to an international crisis by permitting unlimited admissions in any 1 year.

Mr. President, I must say before I sit down that I really think the Senator

from Wyoming, ALAN SIMPSON, and others who have worked with him have done a great job, not only in serving on the Commission but in working in the Judiciary Committee to report the recommendations that are contained in this bill. I intend to vote for the bill whether this amendment is agreed to or not. But I hope that it is included in the bill because it strengthens the commitment of Congress to take a more active role in establishing refugee policy.

When the Refugee Act of 1980 was adopted, a normal flow of refugees was expected to be 50,000 a year. Since then, as we have seen, the numbers have increased dramatically.

Mr. President, the amendment that the Senator from Kentucky is offering will provide needed control over the total number of those who are permitted to immigrate yet will maintain the flexibility that we must have in this area of responsibility.

Mr. JOHNSTON. Mr. President, will the Senator yield 2 minutes?

The PRESIDING OFFICER. Who yields time?

Mr. HUDDLESTON. May I ask the Chair who is controlling the time on my side?

The PRESIDING OFFICER. The Senator from Kentucky is controlling time on his side.

Mr. HUDDLESTON. Very good. Then I will yield to the Senator from Louisiana.

Mr. JOHNSTON. I want to engage the distinguished Senator from Kentucky in a colloquy and congratulate him on this amendment.

In my judgment, the immigration problem in this country is one of the most serious facing this country and will be for the rest of this century and unless we come to grips with it I think the country is in terrible shape.

I congratulate the Senator and ask him—perhaps he covered this in his opening statement, but if he did not I wish for him to explain to our colleagues in the Senate about the infrastructure which is out there which is being financed by the Government, paid by the Government in order to get refugees into this country. Is it not a fact that our Government is paying up to \$1,000 per person to get refugees?

Mr. HUDDLESTON. There is no question that a substantial industry has built up around the entire world, some if it legitimate, some of it very illegitimate, stemming principally from the generosity of the United States, the ease with which people are brought into this country and what is available to them once they get here.

The Senator from Louisiana may be referring to the voluntary agencies that exist for the purpose of assisting immigrants who come here, particularly refugees. Many of these do an outstanding job and provide a good serv-

ice. They are, in fact, of course paid a fee per refugee that they bring in. For instance, the last information I had relating to the Haitians who are being released is that the payment to the voluntary agency is \$650 for each one. They more or less commit that they will take care of the needs of that refugee, but in most cases that is not the case. The person probably will wind up on one or more of the public assistance programs.

Mr. JOHNSTON. In effect, what it amounts to is a \$650-bounty for which they do very little except get the alien here. Once they are here, then are they not those same organizations that bring lawsuits to free them from detention?

Mr. HUDDLESTON. Some of them do that. Many of them have been around the Capitol in the last few days lobbying very hard against this amendment and against some other provisions of this bill.

Mr. JOHNSTON. I do not criticize their motivation. It may be not only legitimate but wonderful. But the point is, we have an industry built up out there with jobs dependent upon the number of refugees brought into this country, financed by the Federal Government, and there is no reason to think that that industry is not going to continue to prosper and to increase the number of people it brings into this country, and to continue to operate, along with that profit motive, somewhat of a propaganda machine; is that not somewhat correct?

Mr. HUDDLESTON. I do not know that they suggest any kind of restriction on the numbers that are brought in. I think the Senator's assumption is right, that they contribute to the flow.

Mr. SARBANES. Mr. President, will the Senator yield on that point?

Mr. JOHNSTON. May I—

Mr. SARBANES. The assumption, I understood, is that they are not only concerned about the numbers, but out to make a profit. I do not think that is fair or legitimate with respect to the various church organizations and comparable groups that are involved with the question of resettling the refugees.

The Senator from Kentucky is not suggesting that in response to the Senator?

Mr. HUDDLESTON. I am not suggesting that. I do not believe the Senator from Louisiana did.

Mr. JOHNSTON. No, I am not suggesting that. I said the motivation is probably very good.

Mr. SARBANES. The Senator made reference to the profit motive. I do not understand that motivation or that reference. These are church groups.

Mr. JOHNSTON. Employment motives, shall we say? I think it is correct that there are many, many thousands of jobs of well-motivated people who

are dependent on bringing refugees into this country. Is that fair or not?

MR. HUDDLESTON. I do not know there are that many. But I certainly do not want to either question the—

MR. SARBANES. I say I do not think that is fair to the church groups that are involved.

MR. JOHNSTON. They are not all church groups.

MR. SARBANES. No, they are not all, but they are an important part of what is involved.

The PRESIDING OFFICER. Who yields time?

MR. HUDDLESTON. I have the floor.

MR. JOHNSTON. I do not mean to say all the groups are illegitimate or whatnot. But I do think there is, as I say, an industry.

That is not the principal motive for my supporting the Huddleston amendment. But can the Senator tell me how many people are poised in Central America ready to come here?

MR. HUDDLESTON. I do not think anyone can give the Senator that figure but I quoted earlier the former Secretary of State who said that if the conditions continue as they appear to be in South America, we can expect the influx will make the influx from Cuba of 130,000 look like a Sunday picnic.

We do know that Fidel Castro has the names of upward of 1 million people who signed up during the Mariel boat lift who he could at any time give reason to leave the country to come here.

So we do know that the number is substantial. The conservative estimates now are there are 400,000 El Salvadorans in this country illegally. We know there are a good many from all the other countries.

MR. JOHNSTON. What the Senator is saying is that there are out there on the starting blocks ready to come with the first excuse given or whatever with the first nose under the tent ready to come amounts that far exceed those who have already come, not just Salvadorans?

MR. HUDDLESTON. I think that is a safe assumption.

MR. JOHNSTON. But all over South America?

MR. HUDDLESTON. I think that is a safe assumption.

MR. JOHNSTON. I thank the distinguished Senator. I congratulate him on the leadership he has given.

MR. BRADLEY. Mr. President, will the Senator yield?

MR. HUDDLESTON. Let me make one statement that relates to the question the Senator from Louisiana asked first about the infrastructure out there. Many people do not realize that a great number of the Haitians who came here came here because they were recruited by entrepreneurs, very unsavory characters who promised

them safe passage, promised them entry into this country, and of course, all of the things this country has to offer. In exchange they took their savings. The standard fee was several hundred dollars to put them on a boat and set sail for our coast. That, too, is an industry that has been built up. That industry also exists in Southeast Asia. In Indochina many of those refugees get here through the same kind of system. It is not an inconsiderable industry that has been established.

I yield to the Senator.

MR. BRADLEY. Can the Senator from Kentucky confirm for me that his amendment would place refugees in the overall total of immigrants allowed into this country, 200,000, 250,000 of the total in that year. There are 100,000 refugees, and that means 325,000 minus the 75,000 exceptional ability immigrants, and that would be the total, is that correct?

MR. HUDDLESTON. That would put the refugee essentially on the same level as the immediate family.

MR. BRADLEY. And the category the Senator has referred to is refugees, is that correct?

MR. HUDDLESTON. I am sorry, I did not hear.

MR. BRADLEY. The category that the Senator's amendment refers to is refugees.

MR. HUDDLESTON. That is correct, and asylees also.

MR. BRADLEY. Does the Senator's amendment at all refer to a category called entrant?

MR. HUDDLESTON. No; so far as I know, there is no legal status of that category except that created by the statement of a former President.

MR. BRADLEY. Is it correct to state that if the Senator's amendment had been law in 1980, it would not have prevented any of the Cuban-Haitian immigration because they were not categorized as refugees but as entrants; is that correct?

MR. HUDDLESTON. I am not sure because their status has not been determined. Whenever their status is determined, they are either going to be deported as exclusionary or they are going to be asylees or refugees. They cannot stay in limbo forever. Once they are, then whatever category they come in would apply.

MR. BRADLEY. Is there a date by which the entrant category must become another category?

MR. HUDDLESTON. No.

MR. BRADLEY. So that it could in fact remain entrant forever.

MR. HUDDLESTON. The Senator is talking about the Asians now?

MR. BRADLEY. The Cuban and Haitian category called entrant.

MR. HUDDLESTON. Theoretically they could. They are still entrants. Their cases are being determined.

The PRESIDING OFFICER. All the time of the Senator has expired.

MR. HUDDLESTON. Their condition is in limbo until the Congress or the courts decide what their status is.

Is my time up?

The PRESIDING OFFICER. The time has expired.

The Senator from Wyoming.

MR. SIMPSON. Mr. President, I yield myself 3 minutes.

Refugees and immigrants are two distinct groups. I speak against the Huddleston amendment. There is no one I respect more on this issue. He has worked in this area for many years. He has been sensitive to it. He followed it even when he had no committee assignment. All of us on the subcommittee agree that he is most extraordinarily adept in this area.

But there are two distinct groups, and they must be treated separately. They should not be competing with each other for admission to the United States.

Refugee admissions are now controlled by the Refugee Act of 1980. The President requests and justifies refugee numbers for the next fiscal year. He justifies that proposal through a consultation with the Judiciary Committees, receiving a recommendation from Congress and setting the final figures.

Last year this administration proposed 173,000 admissions, and we on the committee, the manager of the bill on the opposite side, and myself, revised the limit downward. We reduced the numbers to 140,000 after congressional consultation. The House agreed.

In addition, at the request of Congress we agreed to manage that number so that entries to the United States, would if possible, be at even a lower rate. This has happened so that this year actual admissions to the United States of refugees will be probably less than 100,000. The consultation mechanism is working.

The administration I think needs the flexibility which is provided by the Refugee Act to consider both domestic and foreign policy interests in the U.S. refugee program.

If we include refugees in this total cap, we will seriously reduce this flexibility.

Here is the difference: Immigration policy is principally concerned with family reunification. We have discussed that for most of the day; whereas refugee policy is concerned with the United States accepting its fair share of persons who are fleeing persecution in their homeland. Both policies obviously have a humanitarian purpose, but the two groups should never be allowed to compete for admission.

This administration strongly opposes the amendment also because of the severe limitations it would place on the flexibility that it requires in ad-

dressing domestic and foreign policy interests.

So I say, Mr. President, in objecting to the amendment, that we do have control. It is finally working. Last year, as I indicated, the 173,000 figure is now down to less than 100,000, and we will reach the normal flow of 50,000 I feel quite assured within a very limited time.

Mr. SIMPSON. Mr. President, I yield 7 minutes to Senator DANFORTH.

Mr. DANFORTH. Mr. President, I rise to oppose the amendment offered by Senator HUDDLESTON. Before I speak, I would ask unanimous consent that a letter from the State Department in opposition to this amendment be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. COORDINATOR
FOR REFUGEE AFFAIRS,

Washington, D.C., August 12, 1982.

Hon. JOHN C. DANFORTH,
U.S. Senate,
Washington, D.C.

DEAR SENATOR DANFORTH: The Immigration Reform and Control Act of 1982 (S. 2222) provides urgently needed reforms to improve our control over immigration to the United States. Its carefully balanced provisions have been developed over a long period in a truly bipartisan spirit.

Recently Senator Walter Huddleston proposed that S. 2222 be amended to include refugee admissions under the fixed numerical ceiling which the bill would impose on routine immigrant admissions. We urge that you oppose this amendment since we do not believe that it serves our national interest to combine immigrants and refugees in the same ceiling.

Refugees and immigrants pose separate problems and we should continue to treat them separately. S. 2222 will give us flexibility in selecting the categories and levels of immigration we desire while helping the United States regain control over its borders. As to refugees, the approach that Congress developed two years ago in the Refugee Act of 1980 best provides for the necessary degree of domestic controls while permitting the President the flexibility to cope with those emergency situations that generate refugees. We urge, therefore, that you oppose any amendment to S. 2222 which would alter the procedures which Congress just recently established in the Refugee Act of 1980.

The notion of a combined ceiling on immigrants and refugees is not new. Congress rejected it during its work on the Refugee Act of 1980. The Bipartisan Select Commission on Immigration and Refugee Policy, the Reagan Administration, and the authors of S. 2222—Senator Alan K. Simpson and Representative Romano Mazzoli—have also rejected it.

The Refugee Act has established a comprehensive statutory procedure to admit refugees. It replaces the limited conditional entry and open-ended parole provisions of previous laws. In transferring the responsibility for refugee policy decisions from the Attorney General to the President, it recognizes that refugee admissions are so important that they should be made at the highest level. Finally, while the Refugee Act provides for policy direction by the President, it

likewise establishes that the final decision on refugee admissions will be the product of consultations between the Administration and the Congress. This system is working. Refugee admissions are coming down as an act of conscious policy: from 212,000 in fiscal year 1980 to 159,000 in fiscal year 1981 and a fiscal year 1982 total of 100,000 or less. The Administration has now been engaged in extensive consultations with States, the voluntary agencies, and Congress on the admission levels for next fiscal year. We fully expect that admissions will continue to decline. The Huddleston Amendment would thoroughly disrupt these procedures.

The cornerstone of American immigration policy has been a commitment to family reunification. Within the framework of S. 2222, future immigration of immediate relatives of U.S. citizens and resident aliens would comprise roughly 75 percent of our immigrants. Senator Huddleston's Amendment in combining immigrants and refugees would pit these two groups with different origins and different problems against each other. Instead of giving the President the capability of providing separately for the unique problems of these two groups, it would put him in the impossible position of having to choose, for instance, between providing relief for refugees from Communist repression and the admission of parents or children of longtime U.S. residents. It is clearly not in the best interest of the U.S. to structure the President's choices in this invidious fashion.

The Huddleston Amendment would not only reduce the President's flexibility, it would also invite a return to the still all too familiar pattern of special interest legislation. Further, it would demoralize many of the American religious and non-sectarian groups and individual citizens who form the backbone of our proud record of refugee assistance. And finally, it would tell the world that the United States has retreated from its leadership position on the refugee question and thus set back the Administration's efforts to broaden the international base of refugee resettlement.

The American people want a clear statement on immigration policy. The Simpson/Mazzoli bill gives that clear statement. The Refugee Act of 1980 gives a clear statement on the separate refugee problem. Let us not confuse these issues.

As two of our country's public officials most concerned with America's proud record of human rights and humanitarian assistance, we urge you to speak out against Senator Huddleston's amendment. The Refugee Act of 1980 is working. The provisions of S. 2222 should be given an opportunity to prove effective.

ELLIOTT ABRAMS,
Assistant Secretary of
State for Humanitarian Affairs.
H. EUGENE DOUGLAS,
Ambassador at Large.

Mr. DANFORTH. Mr. President, this well-intentioned but misguided amendment runs directly against the proudest traditions of this country. It would pit against each other two types of people seeking to come into this country—immediate family members or persons already living in the United States—citizens or permanent resident aliens—and refugees, people fleeing persecution in their own countries.

We all know who would win that kind of perverse competition—the relatives of those already here.

I wish there were no refugees in the world, then we would not have this problem. But there are millions of them. They are fleeing Vietnam, Afghanistan, Ethiopia, Poland, and so on. I have seen these people.

In October 1979, I went to the border of Thailand and Cambodia with two of my colleagues, Senator SASSER and Senator BAUCUS. We were there at the height of the exodus of Cambodians fleeing their country. After suffering for years the ravages and atrocities of Pol Pot, the Cambodian people were starving under the rule of the Vietnamese puppet government.

The people we saw were dying. Walking skeletons, these human beings stared blankly at those around them. They crossed the border and lay down on the ground to die. The children did not laugh or play, their bellies were distended from malnutrition, and their faces were shriveled up like those of little old men.

This Nation's refugee policy helped keep those people alive—not because they would eventually come to the United States, but because we could credibly demonstrate to other countries in the region our willingness to help them with a large refugee population.

The biggest problem with the world's refugees is not finding them a third country for permanent resettlement. The biggest problem is finding a place of temporary refuge, a place of first asylum, where they can stay either until conditions in their home country permit their return or until resettlement can be arranged.

Vietnamese refugees had overloaded the capacity of friendly countries in that region to respond humanely. Hundreds of thousands more Cambodians exacerbated the problem. Thailand, the principal refuge for both groups, was having great logistical and political difficulty with the presence of so many refugees in their country. The Thai Government was able to withstand internal pressures against providing asylum for one reason, and one reason alone—the United States committed itself to resettling a large number of refugees in this country. Equipped with this knowledge, the Thais were able to withstand internal pressure to turn away those coming across their borders for refuge.

Tens of thousands of Cambodian lives were saved in 1979 and 1980. Those people are alive today not only because they were fed, and clothed, and sheltered. They are alive because there was a place to go for food and shelter. Our refugee policy was fundamental to that fact.

This amendment would effectively shut off our ability to respond similar-

ly at a time of future crisis. This is a life-threatening amendment, and it is wrong.

Others have made the arguments that ours is a nation of immigrants who often came seeking refuge from oppression. I agree. I also believe very strongly that the principal difference between America and the Soviet Union is the value that we as a society place on the sanctity of human life, dignity, and personal freedom. A flexible refugee policy personifies these proud American traits. Let us not reject our heritage. Let us not tie our hands. Let us vote down this insidious amendment.

Mr. BOSCHWITZ addressed the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. SIMPSON. I yield 7 minutes to the Senator from Minnesota.

The PRESIDING OFFICER. The Senator from Minnesota.

Mr. BOSCHWITZ. Mr. President, I also rise in opposition to this amendment and state, as does my friend from Wyoming, that this amendment is the wrong forum, the wrong bill to discuss and to control refugees. We have a refugee bill. It has gone through committee in the House and it will be before us.

I agree with my friend and colleague from Kentucky that perhaps some redefinition of refugees and their rights and privileges in this country is proper. But this is not the bill to do it, nor is this the bill to limit the number that comes to this country.

We have talked, and I have heard other talks here, about the rich tradition that we have, and indeed it is. And nowhere is it better exemplified than in Russia and in Eastern Europe where they must build walls to keep their people in while, unfortunately, we must pass laws to restrict the number of people who come to this country.

It was mentioned here on the floor during the course of this debate that there are hard choices here—425,000 people were going to be admitted into this country other than the refugees. I do not consider that a hard choice, Mr. President. That is only one-fifth of 1 percent of our population. That is really not a large number to admit to a country of 240 million. That is approximately one-fifth of 1 percent, as I say.

During the two decades of 1956 to 1978, the U.S. ratio of legal immigrants was approximately 2.8 people per 1,000. My friend and seatmate, the Senator from Mississippi, says that we are more generous than any country in the world. It is just not so, Mr. President.

During that same period of 1956 to 1978, when admissions, legal admissions to this country were 2.8 per 1,000, in Canada it was 17 per 1,000,

and in Australia it was 15 per 1,000. So, indeed, it is a generous number, I do not dispute that; but it is not a number that is going to cast hardships on our society.

My friend from Mississippi pointed out that during a long period of time, starting in 1921, that the average number was 271,000 that came into this country legally. If he had gone back a few years, the numbers were over 1 million, year after year, and during that period of time most of the forebears of the Members of this body undoubtedly came to this country.

In considering this number, Mr. President, no one has spoken about emigration, the numbers that leave our country. And historically approximately 30 percent of as many people who have left have come in. So when you talk about 425,000, probably the net figure is closer to 300,000 who stay in this country, new entrants or net new entrants each year.

Even during the period of peak immigration, Mr. President, from 1908 to 1913, when each year over a million people came to this country, emigration averaged 32.1 percent of immigration. During that period of time we used to keep records and there was a commission and a report called "The Repatriation in American History," by Thomas Kessner. And during the highest time of our immigration, 32 percent of the number immigrating had emigrated and left our country. So that the net amount of immigration really is not the figure that is before us.

I heard a Senator say that they are competing for jobs in this country. I also want to add to that that they are the ultimate of consumers. They come to this country with nothing and they have to buy what we consider the most regular part of our lives, the most basic things in our society. So they not only come and take jobs, often jobs that others will not take, but they come and they consume as well. And they create jobs. Indeed, if you look back in the history of our country, among the most creative people are those who come to our shores and seek haven in our country.

One of my colleagues talked about all these folks who were out on the starting blocks about to come in, that if this bill—as though this bill would make a difference—were passed and if the refugees numbers were not taken as a diminution of a total of 425,000, that these people would somehow come quicker.

Of course, the flow of illegal immigrants needs to be checked. It is the first duty of any country to be secure within its borders. But while that needs to be checked, that is not going to be affected by this figure, Mr. President. Illegal immigration does not require quotas. Illegal immigration continues. The people who run these un-

fortunates, who charge \$2,000, I heard, are going to stop if we raise or decrease quotas.

Indeed, Mr. President, we do have that rich tradition, that proud tradition, and I am part of it, Mr. President. I am one of the two immigrants here in the Senate. Senator HAYAKAWA is the other. We are two Members of the Senate, indeed, who can seek higher office, who can run for President or Vice President. I believe at last count we may be the only two who are not seeking those offices. [Laughter.]

In any event, Mr. President, I came when I was too young to understand the promise of America and what it meant, but I heard it very often from my parents. That promise must be kept alive.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. BOSCHWITZ. May I have 1 additional minute?

Mr. SIMPSON. For the Senator, 1 additional minute.

Mr. BOSCHWITZ. Indeed, that promise has to be kept alive.

I thank my colleague from Wyoming. His generosity is always so marvelous.

The promise of America, Mr. President, is something that we have to keep alive. People, as my friend from Missouri, Senator DANFORTH, said, are kept alive because they feel that promise is out there. We have a marvelous tradition in this country. We are indeed the hope of mankind. It is something that we cannot allow to die. It is something that we have to kindle and increase. I yield the floor.

Mr. SIMPSON. Mr. President, may I inquire of the time remaining?

The PRESIDING OFFICER. The Senator has 15 minutes, 40 seconds.

Mr. SIMPSON. I yield 4 minutes to the Senator from South Carolina.

Mr. THURMOND. Mr. President, I want to say in the beginning that no Member of the Senate has taken more interest in immigration matters and sounder positions than the able Senator from Kentucky. I have to disagree with him on this particular matter.

Mr. President, it is with some reluctance that I intend to vote against the Huddleston amendment because I am sympathetic with its purpose. As I understand the amendment, it would include annual refugee admissions within an overall ceiling on immigration and refugee admissions for each year. If the number of refugees exceeds the number provided for, it would be charged against other admission classifications.

Mr. President, I share the goals of the Senator from Kentucky to limit the number of immigrants and refugees coming into the United States. We cannot take them all. Senator HUDDLESTON has been in the forefront on immigration and refugee matters

for years and I respect and support his efforts to bring our immigration and refugee policy under control. I am afraid, however, that I cannot support him on this particular amendment.

Mr. President, the Committee on the Judiciary has wrestled with this question on refugee policy and the relationship between the executive and legislative branch authority to control it. Two years ago, the Congress passed the Refugee Act of 1980, which provided for an annual ceiling of 50,000 refugee admissions and required consultation between the President and the Congress before any refugee admissions beyond that level could be authorized. The track record of that law is fairly good.

In 1980, refugee admissions reached a high of 232,000, far in excess of the 50,000 emergency level in the Refugee Act. In 1981, refugee admissions dropped further, and in 1982, the Congress, pursuant to consultation with the President, authorized a ceiling of 140,000 refugee admissions. To date, only 100,000 refugees have been admitted during fiscal year 1982. Although these levels are not as low as I would like, the process is working.

Mr. President, we will also have an opportunity in the committee to study and review the proposal of the Senator from Kentucky when we take up those immigration and refugee reforms not contained in S. 2222. For example, emergency powers of the President in dealing with refugee matters will be the subject of consideration by the committee early next year. I can assure the Senator from Kentucky that his proposal to review the level of refugee admissions and the role of the Congress in that process will be given careful consideration.

Mr. President, this amendment is well intended, but it goes against the reforms we are trying to achieve in this bill, which is to focus on legal and illegal immigration. Refugee policy is important, but should be addressed separately. For these reasons, I will vote against the amendment.

Mr. President, I ask unanimous consent that a letter to me from the Secretary of State, Mr. Shultz, on this amendment be printed in the *RECORD* at the conclusion of my remarks.

There being no objection, the letter was ordered to be printed in the *RECORD*, as follows:

THE SECRETARY OF STATE,
Washington, D.C., August 12, 1982.

HON. STROM THURMOND,
Chairman, Committee on the Judiciary,
U.S. Senate.

DEAR MR. CHAIRMAN: I am writing in regard to the amendment proposed by Senator Huddleston to S. 2222 which would include refugees in an overall "cap" on immigration.

The passage of such an amendment would seriously limit the President's flexibility to conduct foreign affairs, inasmuch as it would severely restrict his ability to formu-

late solutions for those international situations that can—and all too—frequently do—create refugees.

I am aware of the factors that originally underlay Senator Huddleston's approach, but I believe the Congress has dealt with them effectively. Thus, the concerns of some Members over the use by the Executive Branch of the parole authority were reflected in the amendments to the Immigration and Nationality Act that are contained in the Refugee Act of 1980, and these concerns should now have been met. Moreover, the consultations mandated by the Refugee Act have become an increasingly effective vehicle for the exercise of meaningful oversight of the U.S. refugee program by the appropriate Congressional committees. This is largely because the Congress has set forth comprehensive guidelines. The refugee admissions system is therefore now running smoothly, and there is no reason to believe that it will not continue to do so.

Under these circumstances, I do not believe that Senator Huddleston's amendment is necessary or desirable. I hope that you will oppose passage of the Huddleston amendment to S. 2222, the Immigration Reform and Control Act of 1982.

Sincerely,

GEORGE P. SHULTZ.

Mr. SIMPSON. Mr. President, would you please review the time situation?

The PRESIDING OFFICER. Ten minutes, nine seconds.

Mr. SIMPSON. I yield 4 minutes to the Senator from Illinois.

Mr. PERCY. Mr. President, I intend to oppose this amendment to the Immigration Reform and Control Act of 1982 that would place under a single numerical ceiling both refugee and immigration admissions.

S. 2222 places a limit on all legal immigration into this country with the exception of refugees. This bill leaves in place the refugee admissions system created by the Refugee Act of 1980. I strongly endorse a separate refugee admissions system and will oppose the amendment.

The present law provides for a "normal flow" of up to 50,000 refugees a year. It allows the President to increase this number after appropriate consultation with the Congress if it is justified by humanitarian concerns or is otherwise in the national interest. This system recognizes that immigration and refugee admissions serve different purposes. Immigration policy in large part reflects family reunification. Refugee admission levels are generally set in response to critical humanitarian situations or foreign policy considerations.

The Huddleston amendment will reduce considerably the ability of the U.S. Government to respond to refugee emergencies. The loss of this flexibility could have the unfortunate effect of undermining various foreign policy objectives.

As we all know, our Government offers assistance to refugees not simply out of compassion, but because large refugee populations can threaten the stability of countries of first

asylum. This is especially true for developing nations which are ill-equipped to cope with large influxes on their own. The presence of refugees can raise serious tensions between sending and receiving countries in a particular region, and the refugees can come to fear mistreatment in the first asylum country as much as they might fear persecution in their homeland if they were to return.

At the height of the Indochinese refugee crisis in 1979-80, the previously generous countries of first asylum in Southeast Asia adopted desperate measures in the face of new waves of refugees. Thousands of Khmer and "boat people" from Vietnam lost their lives after being pushed back across land borders or back out to sea. In time, however, many receiving countries were able and willing to offer refuge with assurances of support from the international community.

The granting of first asylum provides time for the development of humane solutions to refugee problems. These include voluntary repatriation when conditions in the homeland permit, settlement in the region or, as a last resort, resettlement in third countries. Africa is a good example of an area where first asylum countries have traditionally offered hospitality to refugees, where refugee problems have been resolved through regional cooperative efforts, and where requests for outside support have come only recently in response to rapidly increasing refugee populations.

It is to the credit of the international community and to the United States that its response has helped ease many African and other refugee situations in the last few years. After decades of ad hoc arrangements, there are now international mechanisms to help first asylum countries provide immediate humanitarian relief, longer term maintenance, and voluntary repatriation or resettlement where appropriate. The Geneva conference on Indochinese refugees in July 1979 and the conference on African refugees in April 1981 underlined the need for greater coordination and broader international participation.

One of the major reasons for the success of these efforts has been the leading role of the United States in pledging support and having the ability through the Refugee Act to accept large numbers of refugees in times of crisis. Our support at the 1979 and 1981 Geneva conferences set examples that many countries subsequently followed. Our lead also reassured the countries of first asylum in Africa and Southeast Asia that their plight would not be ignored by the international community.

The cooperation has led to an alliance between donor countries, recipient countries, and international orga-

nizations that has made it possible to manage refugee problems of unprecedented scope. While much remains to be done, the emergency stage is behind us in assuring the survival of Afghans in Pakistan, refugees in the Horn of Africa, and the Khmer people. What worries me is that this relief network is fragile. Any precipitous decrease in the ability of the United States to meet an unforeseen refugee crisis could lead to the unraveling of the system. Receiving countries may again believe their only recourse is to deny asylum to new arrivals and to treat harshly those who have already arrived. No one, including the United States, gains from a return to chaos and brutality.

As responsible members of the international community, we must work to resolve the root causes of refugee flows. We must also recognize the urgency of responding to refugee problems as they arise. In some situations, third-country resettlement of some refugees may be the only solution. The Huddleston amendment would eliminate our ability to respond to international emergencies. It would also undermine our efforts to encourage more nations to assist in refugee resettlement and to accept a larger share of the financial burdens associated with refugee care which bears so heavily on the United States. The Huddleston amendment which combines immigrants and refugees under one ceiling would undermine our position of leadership in the international community with respect to the humane treatment of refugees.

Mr. SIMPSON. Mr. President, will the Chair please review the time remaining?

The PRESIDING OFFICER (Mr. HEINZ). The Senator from Wyoming has 5 minutes, 46 seconds; the Senator from Kentucky has zero minutes and zero seconds.

Mr. SIMPSON. I yield such time as remains of my time to the Senator from Massachusetts.

Mr. KENNEDY. Mr. President, I thank the Senator from Wyoming.

I acknowledge both the interest and the expertise of the Senator from Kentucky (Mr. HUDDLESTON), who has taken very considerable interest in the whole issue of refugees and immigration policy. I do take issue with his recommendation to this body as to how this body and this Nation can best address those particular concerns.

I must join with my distinguished colleague, Senator SIMPSON, in opposing the amendment offered by our good friend from Kentucky. I do so because I believe it will be destructive of the important immigration reforms we have proposed in this carefully balanced bill—a bill that seeks greater control over immigration to our country, without undermining the flexibil-

ity of our laws or closing our doors to immigrants and refugees.

By placing refugees and immigrants under a single rigid ceiling, the pending amendment mixes two, totally separate categories of migration. It places us in the position of taking immigration numbers from family reunion cases if we attempt to respond to humanitarian emergencies involving refugees.

Under the provisions of this amendment, if our country chooses to accept additional refugees beyond the ceiling, we could do so only if we reduced future immigration numbers for family reunion and other immigrants standing in line around the world.

The questions involved in the admission of refugees and immigrants are different. Our response to them must also be different.

Immigrants come to our country in a predictable fashion. Under annual ceilings and quotas. Many are admitted under established preferences reflecting our concern for family reunification. They come in an orderly way, with no expenditure of taxpayer's funds. And when they apply for admission, or when their American citizen relatives petition for them, they do so knowing they may have to wait, but that they can expect to be admitted on a certain date.

Refugees, on the other hand, are admitted under extraordinary circumstances, reflecting the unpredictability of their plight and the urgency of their needs. We cannot foresee who or how many refugees may have a claim upon our attention or concern. Each refugee situation and each refugee must establish why they should be admitted, and why they are "of special humanitarian concern" to the United States, as stipulated by the Refugee Act of 1980.

Furthermore, their admission is dependent upon the authorization and appropriation of public funds.

The Senator from Kentucky has spoken of the lack of congressional control over the admission of refugees. But the admission of every single refugee to the United States involves the action of at least eight committees of both Houses of Congress. Every year, the Budget committees act to set overall spending ceilings. The authorizing committees act on budget requests. The appropriations committees allocate the funds, and the judiciary committees consult and approve the final admission levels. These steps hardly reflect a lack of congressional control. Some may disagree with the votes and actions of these eight committees—and they may disagree with the verdicts of the Judiciary committees after their consultations with the President on refugee admissions—but I do not think they can say there is "the flagrant misuse of refugee laws" or that there is a lack of congressional in-

volvement and control over the admission of refugees.

In fact, the Refugee Act of 1980 has proven to be a significant new tool in bringing greater order and control to the resettlement of refugees in our country, as all those who have worked in this field agree. No one—not the select commission on immigration and refugee policy, not the Reagan administration's task force on immigration, and not the Judiciary Committees of the House and Senate—has recommended changing the basic terms of the Refugee Act. The law is working well, and the act provides the controls Congress has long needed over the admission of refugees.

Reference has been made to the past abuse of the Attorney General's "parole authority." The Refugee Act explicitly abolished the use by the Attorney General of his parole authority for the admission of refugees.

Reference has also been made to the fact that every year the admission of refugees has exceeded the "normal flow" of 50,000. But that figure, Mr. President, was known to be inadequate for the past 2 years when the Refugee Act was written. We knew then, that we were in the midst of responding to the Indochinese refugee emergency, and that the numbers would be larger for the first few years. There was no secret about that.

But the numbers are now coming down—by more than 50 percent in 2 years. We will soon be near the so-called "normal flow" figure—a figure based upon the overall average of the past 20 years.

And, beginning this fiscal year, that "normal flow" figure will disappear from law—in accord with the "sunset" amendment of the Senator from Kentucky.

So, in the future, the annual authorization for the admission of refugees will be zero. The admission of a single refugee must now be justified by the President and come under the full range of controls established in the Refugee Act. The President must consult, and the judiciary committees must agree, before a single refugee can be admitted. For those who have argued that refugee ceilings have tended to become floors, it should be noted that there will soon be no ceiling—that any figure must be justified each year.

Finally, Mr. President, as justification for this amendment we have heard references to the Cuban influx of 1980—to the specter of the uncontrolled influx of tens of thousands of persons. But the fact is that this amendment is irrelevant to that issue. The Cuban influx came outside the Refugee Act. They were not admitted as "refugees," but given a new status called "entrants." If this amendment were law in 1980 it would not have

helped in dealing with such a mass influx, since the Cubans were deemed not to be refugees.

And even if they were classified as refugees, the terms of this amendment would not address the problem—it would only penalize the admission of family reunion and other legal immigrants the following year, and cripple our ability to respond to genuine refugee situations.

Other provisions in this bill are designed to help us deal with mass asylum problems.

Mr. President, I think it is worthy to note that all the national organizations and voluntary agencies involved in our Nation's effort to assist immigrants and refugees for more than 30 years, have unanimously urged the Senate to reject this amendment. I hope we will follow their sound advice. I ask unanimous consent that their views be printed at this point in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

AMERICAN COUNCIL OF VOLUNTARY
AGENCIES FOR FOREIGN SERVICE,
INC.,

New York, N.Y., July 22, 1982.

HON. EDWARD M. KENNEDY,
Russell Senate Office Building,
Washington, D.C.

DEAR SENATOR KENNEDY: As the national organizations who have been responsible for refugee resettlement in the United States since World War II and before, and as agencies also deeply concerned with broader immigration issues, we are writing to express our grave concern over a recent legislative initiative. In a letter dated June 21st, addressed to their colleagues, Senators HUDDLESTON and COCHRAN have urged that the Immigration Reform and Control Act of 1982 which will shortly be considered by the Senate, be amended so as to combine numerical limitations for both immigration and refugee admissions under the same ceiling. The purpose of our letter is not to advocate either higher or lower refugee or immigrant admission levels, but rather to express reservations about placing refugee and immigrant admission levels under the same ceiling. We believe that such a combined ceiling is unwarranted and would be contrary to the national interest of the United States.

The notion of combining refugee and immigrant admissions under one ceiling has been suggested periodically in the past. All recent major reviews of immigrant and refugee policy—the bipartisan Select Commission on Immigration and Refugee Policy, interagency reviews undertaken by the Ford, Carter and the most recent Reagan administration review, and the bipartisan Simpson-Mazzoli proposed legislation—all considered this proposal and rejected it for what we think are persuasive reasons.

We believe the current system for setting admission numbers is both a more thoughtful and realistic process than implied in the joint letter from Senators HUDDLESTON and COCHRAN. Recent admission numbers reflect the serious efforts of the responsible subcommittees charged with admissions oversight, and their chairmen, to consider both international and domestic concerns in setting admission levels.

The issues of immigration and refugee admissions are substantively different. Immigration policy reflects in large part family reunification considerations. Refugee admission levels are generally set in response to critical humanitarian situations and/or foreign policy concerns. Placing two conceptually different programs under a single admission ceiling would force destructive competition between responding to refugee crises and reuniting divided families, and would pit one ethnic group against another within our own society.

Interestingly enough, the single numerical ceiling would not address the very issue which seems to be the basis for many of the points made in the June 21st letter—uncontrolled immigration. For example, the 1980 influx of large numbers of Cubans to our shores was an aberration which would not have been addressed by the existence of a combined ceiling for immigrant/refugee admissions. Nor would such a ceiling in any way affect the chronically high numbers of illegal admissions to the United States. In short, the proposed ceiling will not help us deal with our most acute admissions problem—direct, unplanned arrivals in the United States.

Ironically, the single ceiling issue is proposed at a time when the number of refugee admissions has decreased dramatically (by nearly 50 percent over the last 2 years) due to both domestic and international considerations. It is important to note that under the current system the essential elements of both control of overall numbers as well as flexibility to respond to acute international problems has been maintained in the best American tradition. It is also worth noting that the United States is not bearing the burden of refugee resettlement alone. For instance, both Canada and Australia have recently resettled more refugees on a per capita basis than has the United States.

As national organizations representing broad and often overlapping religious, ethnic and generally concerned constituencies, it is our belief, based on decades of working with immigrants and refugees, that the combined ceiling proposal would have two critical effects: (1) it would virtually destroy the flexibility our country needs to respond to pressing humanitarian and foreign policy concerns—concerns to which the American public has traditionally responded—and would abrogate our historical international leadership in this area. (2) It would generate serious divisiveness within our own society over the allocation of numbers within the single ceiling. In view of these considerations we urge retention of the present system as provided for by current law.

Sincerely,

WELLS C. KLEIN,
Chairman, Committee on Migration
and Refugee Affairs.
